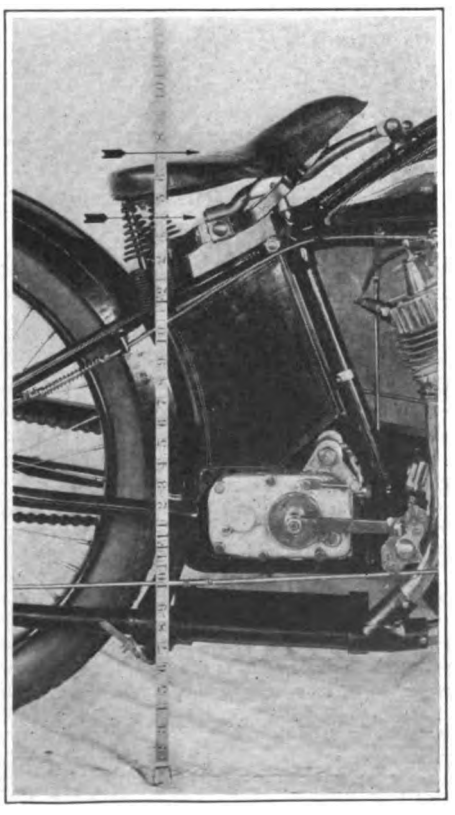
All chain drive is fitted on the eight models, Duckworth chains being standard for 1917. The primary chain in each case is fitted with a neat and noise proof cover, while the final drive chain has an effective guard extending over the top and partially encircling the rear sprocket. The Dayton



Illustrating Low Position on New Dayton Motorcycles—Note 27½-Inch Mark on Tape

double acting band brake is fitted, this being actually two brakes in one. These are actuated by the right foot pedal and by a lift lever on the right handlebar respectively.

Dayton Spring Fork

The Dayton spring rocker fork, which has been used to such good effect for the past four seasons, is, of course, continued on the new models. The handlebars are extra wide and are formed to give a comfortable feeling at all times, a feature which makes long distance riding without fatigue possible. Under the right bar is the brake lift lever, while under the left is the valve lifter lever. Throttle control is from the right grip and spark from the left.

The muffler and tail pipe are the same as in 1916. For the new season, the Troxel Jumbo saddle is fitted. United States chain tread or Goodyear tires as desired are standard. The wheelbase on Models E1, E2, E5 and E6, is 58 inches, while on the three speed models the wheelbase is 60 inches.

Dayton Motor Bicycle

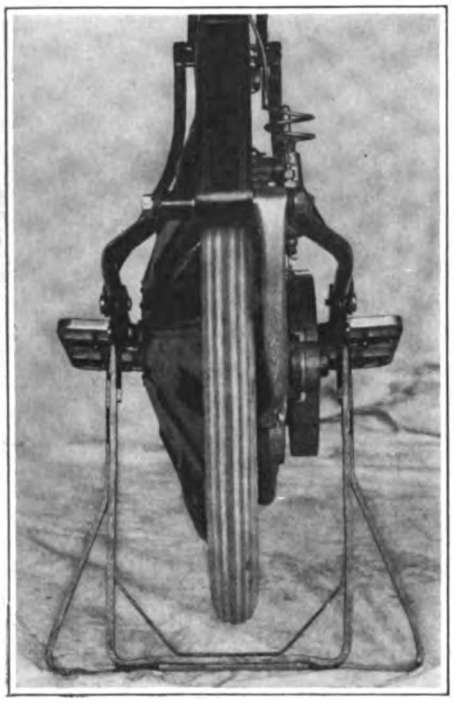
The most noticeable improvement on the Dayton Motor Bicycle is the broader base for the stand. On each side of the sidebars are now formed triangular members, whose bases are prolongations of the "foot" of the stand. With the added road surface thus obtained, the motor bicycle will rest safely on any ground and will remain upright under even violent side shocks.

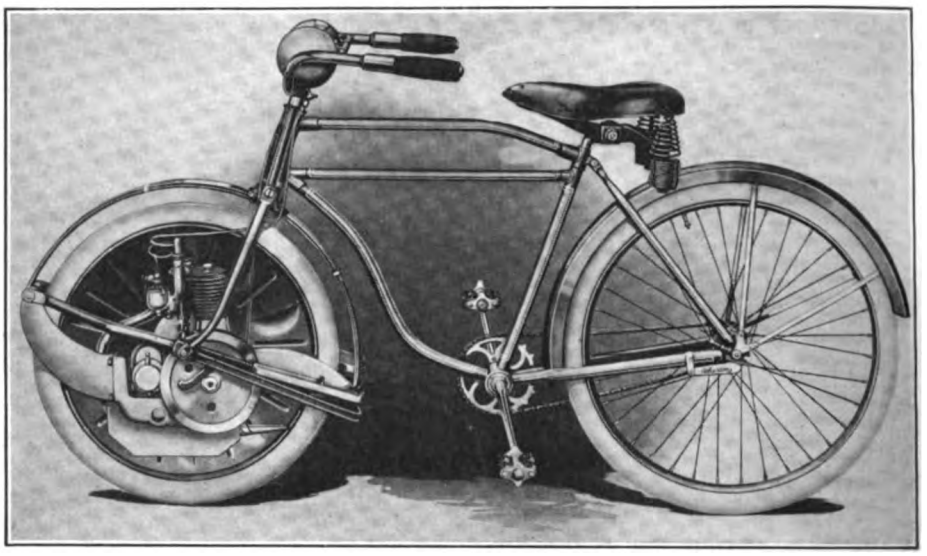
The intake valve on the motor is slightly changed to give greater flexibility and power than in the previous model. There is a decompressor pin on the top of the dome, enabling ease in starting on all occasions. The priming cock fitted during 1916 has been done away with, there being no further need of this fitment.

Oil Leakage Prevented

The exhaust valve tappet on the 1917 motor bicycle power plant is grooved to eliminate oil leakage at the tappet guide. One groove is formed circumferentially slightly above the center of the tappet, while the other runs lengthwise, tapering at the top to flush with the tappet surface and being full depth at the bottom. There is a shoulder formed in the guide, and the construction traps any oil entering from the crankcase

Digitized by Google





Left, Front View of Dayton Motor Bicycle Showing Stand with Broader Base; Above, Left Side View of Machine—Note Drip Pan Below Exhaust Pipe

and returns the surplus to the case automatically.

The breather pipe, which leads from the rear of the crankcase and down through the bearer arm, has been increased from 5/16 inch to ½ inch bore and prolonged to carry the oil well away from disc and tire. The drip pan, which was fitted during the 1916 season under the crankcase to catch any overflow of oil, is continued on the new model.

A small but important improvement lies in the lock on the needle valve controlling the carbureter jet opening. The short handle of the valve is fitted with a spring which engages in notches on the lug in which it works, the spring entering a notch and holding the valve from all involuntary movement. The lock in no way interferes with a change being made by the rider.

For 1917, the Dayton motor bicycle is fitted with a Troxel "Pillow Pad" saddle, of motorcycle dimensions. This saddle is specially built for the machine, and is remarkable for its easy riding qualities. A Troxel Jumbo tool bag with full complement of tools is fitted on every motor bicycle. In other respects the motor bicycle is the same as in 1916.

While no confirmation can be obtained from the engineers of the Davis Sewing Machine Company, it is rumored that some further refinements will be made on the Dayton motor bicycle before the 1917 season is on the wane, these refinements tending to make the machine even more satisfactory to the rider and dealer.

The Davis Sewing Machine Company is in a position to make immediate delivery on all models. It has inaugurated the Dayton one-price sales policy, which it considers the fairest agency proposition ever offered in the cycle trade. In this policy there is no discrimination or waste capital involved, among other things. The firm invites dealers to communicate with them with regard to representation for either or both the motorcycle and motor bicycle lines.

TO VISIT THE SHOW

Louisville Dealers are Getting Ready for Chicago Trip

LOUISVILLE, Ky.—Four motorcycle dealers of this city are laying plans to attend the Chicago show. Frank Marshall, and N. J. Murphy of the Century Cycle Co., Indian representatives, are among the sure starters as is also Herb. Kline, of the firm of Kline Brothers, Harley-Davidson agents. R. L. Davis, Pope and Reading Standard agent, and J. H. Eteen, of the Cycle Shop, Henderson dealers, are also counting upon making the trip. Al Ray, head of the bicycle and supply house of Al Ray Co., may also be among the Louisville visitors at the Chicago exhibition.

Mr. Kline will go to Milwaukee to attend the conference of Harley-Davidson salesmen on November 9-11 and will later pay a visit to the Show.

McBRIDE'S SHOP BURNS

SANTA BARBARA, Cal.—The motorcycle shop of J. E. McBride was destroyed by fire recently, the loss being a total one, with the exception of the motorcycles, which were rescued unharmed.

MOTORCYCLE ELOPEMENT

CHICO, Cal.—Ed. Newton, Indian agent in this city, has joined the ranks of the benedicts, having eloped with Miss Mildred Wodlington to Stockton a few days ago.

The couple left Chico at 11 p. m., reaching Stockton at 8 in the morning, where they took out a license and were married. The honeymoon is being spent in San Francisco.

NEW FIRESTONE TIRE

Akron Firm Brings Out 29x3½-Inch For Heavy Duty

AKRON, O.—The Firestone Tire & Rubber Company, of this city, is putting out a new motorcycle tire for the coming season. It is 29 x 3½ inches, to fit standard CC rims, and is designed for those who desire a heavy duty pneumatic. It is especially adapted for sidecar service.

It is planned to list this tire at $13.50 or $13.75, which is close to $4 less than the cost of the same size of automobile tire.

REED MAKES LIVELY START

SANTA PAULA.—Harley Reed has only been in business for himself a few weeks, but is getting things moving in fine shape as Excelsior agent at Santa Paula. This week he took two machines for delivery, and is to have a third from the Goudy-Hoffer Co., southwestern distributors, in the next few days.

INDIAN DIRECTORS

Stockholders Ratify Program Proposed When Hendee Resigned

SPRINGFIELD, Mass., Oct. 28.—As an aftermath of the change in Indian personelle which resulted from the resignation of George M. Hendee from the Hendee Mfg. Co. comes the election of Carl O. Hedstrom and Leon J. Harley, Jr., to the board of directors; they fill the places left vacant by H. F. J. Knobloch and Samuel A. Miller, both of New York. The change took place at the annual meeting of the stockholders of the Hendee company this week.

The plans, as mapped out when Mr. Hendee stepped out last July, were carried through practically as announced at that time. John F. Alvord, of New York, was elected to the presidency in Mr. Hendee's stead; William E. Gilbert, of Springfield, remains the vice-president, and Frank J. Weschler was re-elected clerk and treasurer.

The new board of directors comprises: John F. Alvord, of New York; Edwin A. Carter, of Springfield; Charles E. Childs, of Northampton; William E. Gilbert, of Springfield; Leon J. Harley, Jr., of Springfield; Carl O. Hedstrom, of Springfield; Henry H. Skinner, of Springfield; Frank J. Weschler, of Springfield, and Robert Winsor, of Boston.

SHARP'S NEW JOB

Former Research Man Becomes Ad. Manager Crolius' Assistant

MILWAUKEE, Wis.—Hugh Sharp, one of the most consistent and energetic all-round boosters of the motorcycle in these parts, and who has been in charge of the research department of the Harley-

Assistant Advertising Manager Hugh Sharp

Davidson Motor Company for the past year, has been promoted to the position of assistant advertising manager. Through his various activities, along both trade and club lines, Mr. Sharp has made friends in all branches of the motorcycle field and his first-hand experience has given him a keen insight into the requirements of the industry.

It was Sharp's capable work in the research department that won him the attention of Advertising Manager Lacy Cronus, and when it became evident that the rapidly multiplying demands upon the Harley-Davidson advertising department, further stimulated of late because of the addition of the company's bicycle line, necessitated the taking on of an assistant the genial Hugh was the logical man for the job.

Sharp has been a frequent contributor to the trade journals and other periodicals, was instrumental in getting the Milwaukee *Journal* to institute a motorcycle department and was for three years secretary of the Milwaukee M. C.

MOTORCYCLES BEAR DISPATCH TO PRESIDENT

(Continued from page 9)

and James Keenan of the Harley-Davidson branch who provided them with some much needed nourishment and escorted them through the city.

The 83 miles from Philadelphia to Asbury Park were covered by way of Trenton and Freehold.

The trip had a double purpose in that it was intended to bring the motorcycle further into the limelight as military vehicle and direct the attention of the military powers that be toward it as well as to fulfill the mission of inviting the President to attend the Pittsburgh celebration.

Their mission accomplished, and with the President's replies stowed away in their weatherproof dispatch cases, the couple left Shadow Lawn late tonight headed toward Philadelphia to deliver a similar invitation to Mayor Thomas B. Smith.

BEAT TRAIN TIME

Adams and McDonald on Cygnet Cover Long Island

NEW YORK, Oct. 31.—As evidence of what can be accomplished by the motorcycle as a salesman's vehicle, E. W. McDonald, of the Cygnet Rear Car, and O. A. Adams, of the Cyclemotor Corp., are pointing with pride to a thorough canvass of the Long Island territory, which took in some 21 separate cities and towns which they consummated on an Indian and Cygnet Rear Car combination last week.

Adam's little Cyclemotor demonstrator was stowed in the body of the rear car and strapped in place to prevent its jarring around. The trip was completed in five days.

Adams points out that last year it took him six weeks to cover the island as thoroughly as he has done on his last trip on the Cygnet outfit.

CLOVER LEAF PRIZES

Reading M. C. Gives Awards for Annual Reliability Run

READING, Pa.—The Reading M. C. has just awarded the prizes in the third annual "Clover Leaf" reliability run, held recently. Charles Sweigertogt got the first prize—a speedometer—in the solo class, while Earl Myers, who is registered as second, got a tire. Raymond Fritz, third man, and Ezra Von Neida, fourth, also received tires.

Subscriptions—Domestic, $2.00 a year; Canadian and foreign, $3.00 a year. Ten cents a copy.
Entered at the New York post-office as second-class matter under act of Congress, March 3, 1879.

In the twin or tandem class, Webster Schlott received the first prize, a tire, while Alfred Eisenberg, got a speedometer for second place. Harry Sonon, third man, came away with an inner tube as his award.

WINS 36-MILE RACE

Skeen, on Indian, Captures Carnival Event at Ontario

ONTARIO, Cal.—Jess Skeen, of this city, won the 36 mile road race which formed part of the recent Firemen's Carnival in this city. Skeen rode a Powerplus Indian and covered the distance in 36 minutes flat. Anson Hammer, Excelsior, came second, while Paul Cason, Excelsior, came third. Hammer and Cason are from Pomona. J. Burk, Excelsior, finished fourth.

The race was exciting from start to finish. Nine riders lined up for the gun and through the entire distance.

HERE'S MISS OKAY

You'll Often See Her and the Little Bike Motor Together

BROOKLYN, N. Y.—The smiling damsel who appears in the accompanying photo has just become the official Okay Girl, and hereafter the Okay Motor Mfg. Co., Inc., Brooklyn, will feature her in various attractive photographic poses in connection

with the Okay bicycle motor. It will be seen at a glance that Miss Okay is very "easy to look at," and her only fear at present is that folks who learn to call her Miss Okay will take it for granted that she comes of Japanese ancestry.

She doesn't, though, and when not indicating by her smile that the Okay motor is just about the cutest and most capable little chugger she ever saw. Miss Okay may be discovered among the show girls at the Winter Garden, New York. Her honest-to-goodness name is,—but what's the difference? She smiles just as convincingly under her new name, and that's what counts.

Folks, meet Miss Okay!

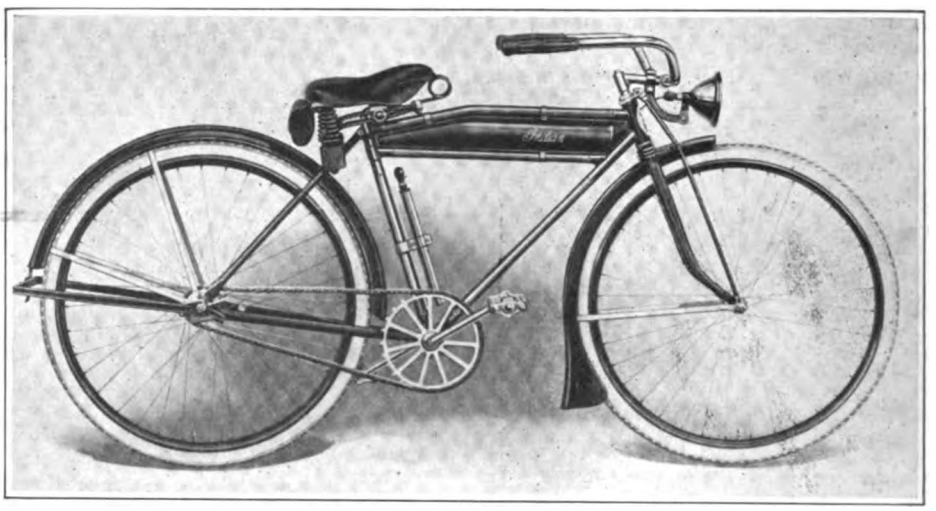
ELEVEN MODELS IN INDIAN BICYCLE LINE

Series for 1917 Season from Springfield Factory Includes Three for Men, Ladies' Roadster, Racer and Six Juveniles—New Crankhanger, Fork and Rear Wheel Stand

SPRINGFIELD, Mass., Nov. 1.—Following its policy of offering the cycling public machines to suit all demands, the Hendee Manufacturing Company, of this city, is listing 11 bicycle models for the 1917 season. These models, while not differing radically from those of the 1916 season, incorporate a number of improvements and refinements, chief among which are a new crank-hanger, front fork and rear wheel stand.

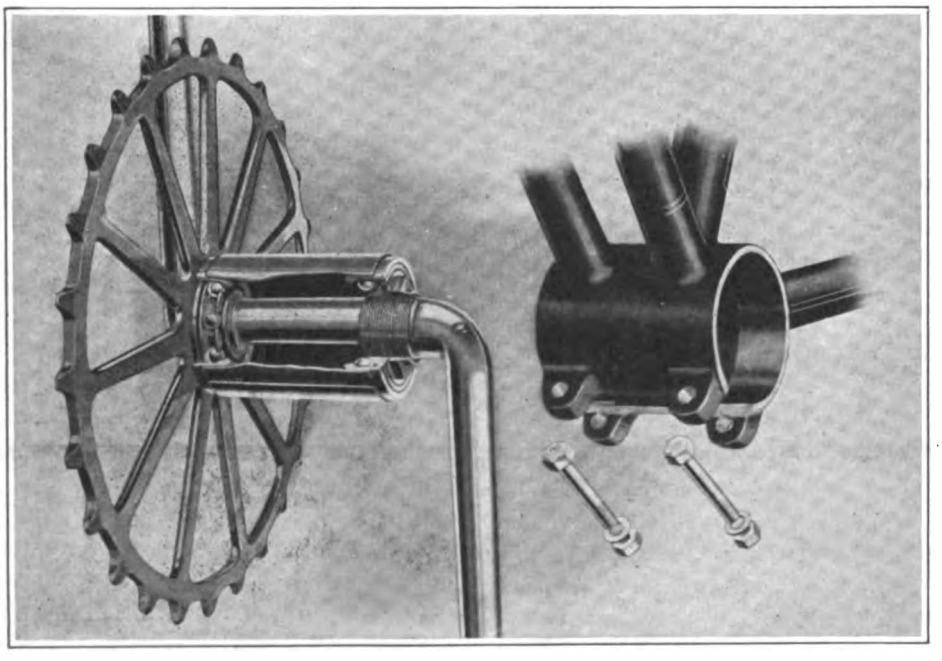
Following are the 1917 Indian models with list prices: Model 30, men's roadster, $35; 31, men's Moto-Bike, $40; 32, electrically equipped Moto-Bike, $45; 33, Speedway, $45; 34, ladies roadster, $35; Model 35, boys 15-inch frame, $26; 36, girls 15-inch frame, $26; Model 37, boys 16-inch frame, $28; 38, girls 16-inch frame, $28; 39, boys 18-inch frame, $30, and Model 40, girls 18-inch frame, $30.



Model 32, Electrically Equipped Moto-Bike With Old Sol Headlight and Battery Tank—Note Frame Pump and Stand Which Are Standard Fitments

Indian Crankhanger

The Indian crankhanger for 1917 is a revival of the old and well-tried Indian hanger of past seasons. The hanger is assembled in a split bracket held firmly in place by two binder-bolts and nuts. It is enclosed in a one-piece sleeve that fits snugly over the bearings, ensuring protection from dust and at the same time keeping the bearings in perfect alignment. The crank can be removed from the frame by slacking the bolts and nuts without interfering with the adjustment of the machine.



New Crankhanger Construction, Showing Bearing, Crank and Split Bracket Details—Sleeve Is in One Piece and Protects Bearings from Dirt

The new Indian fork is another big feature for 1917. It is a four-plate crown construction, although appearing to be of the three-plate type. The bottom plate consists of two smaller plates joined in one. The fork is of the motorcycle type, with reinforced sides and stem, the top plate being bulged in the center and gradually sloping down on either side to the edge of the plate cluster.

Rear Wheel Stand

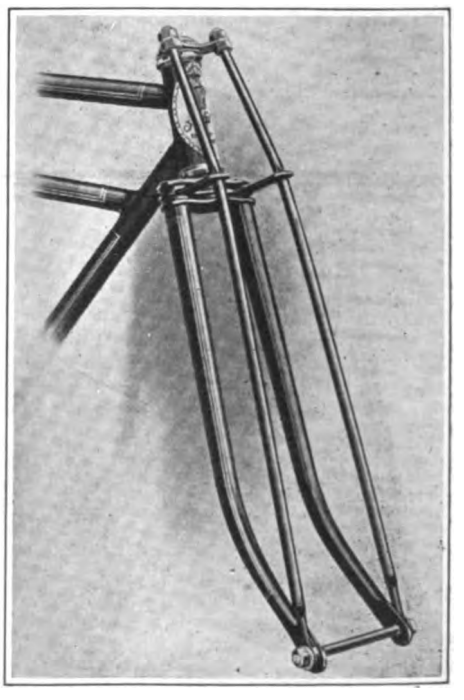
The 1917 rear wheel stand is of channel iron, along motorcycle lines. It is fitted with heavy side pieces which fit under the rear tubes and give the stand great strength and solidity when in action. The stand is of heavier material than is usual in bicycle construction and will support the rider's weight as well as that of the machine.

The one-piece 16-gauge cold rolled steel Indian frame head is continued for 1917. This head is a patented form of construction in which three elements are inseparably brazed by a special process into a compact unit. By this construction, the greatest strength is found at a point when riding strains are heaviest. The head is practically unbreakable.

A distinctive nameplate, made from German silver oxidized, and with an embossed border design is fitted. The nameplate shows the familiar Indian head while the words "Hendee Mfg. Co." and "Springfield, Mass., U. S. A." are also embossed within the border. Below is the word "Indian" enameled in Indian red.

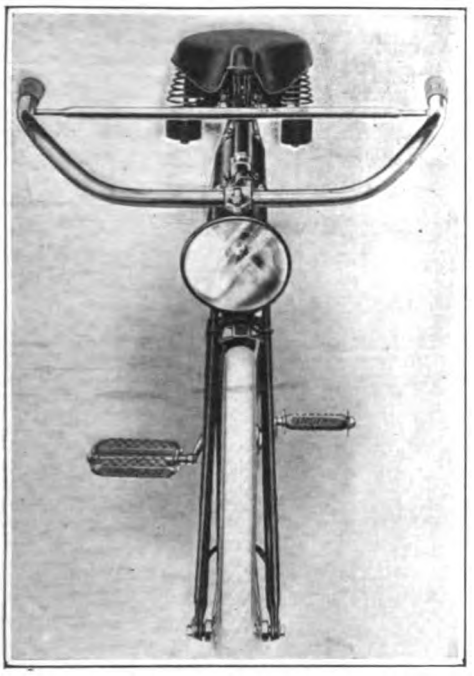
Range of Equipment

The Hendee Manufacturing Company is offering a most liberal choice of tires and coaster brakes this season. These lines include Fisk Gripfast, Fisk Cord Nonskid, Goodyear Blue Streak, U. S. Chain Tread



New Indian Front Fork With Quadruple Crown and Brace Members

Digitized by Google



Front Forks Seen End On, Showing the Brace Bar and Head Connection

tires for the roadsters, U. S. Road Racer and Pye-Musselman tires for the Speedway model. In the coaster brakes are the Corbin Duplex, New Departure and Morrow. Troxel Eureka and Comfort saddles, Indian Rough Rider and Wearwell grips, Austin pumps, Diamond E spokes and Old Sol headlights are standard equipment.

Extra equipment on several of the new models includes the Indian luggage carrier, listing at 45 cents, net, and the Sturmey-Archer three-speed rear hub with brake, at $3.75 net.

Model 30 Roadster

At the head of the Indian series is the Men's Roadster, Model 30. This machine has a 22-inch frame, new Indian fork, and is finished Indian red with double gold striping. Tires are Premier Gripfast and the brake is a Corbin. The normal gear is 72, with 26 tooth front and 10 tooth rear sprockets. A 3/16-inch pitch imported roller chain is fitted. The saddle is a Troxel Eureka. The handlebars are of the forward extension type, 23 inches wide with 6-inch drop and Wearwell grips.

The hanger is the new Indian with 7-inch cranks. Pedals are Standard No. 5 with Indian rubbers. A Troxel toolbag with full kit is attached in rear of the saddle. Mudguards are of heavy steel, enameled to match the frame. List price is $35. Options: 20 or 24-inch frame, Goodyear Blue Streak tires, 81-inch gear, Morrow or New Departure coaster brake. Extras: Rear wheel stand, 45 cents, net; luggage carrier, 45 cents, net; Sturmey-Archer three-speed hub, $3.75, net.

Indian Men's Roadster, Model 30, with Breakproof Head, Guards and Coaster Brake Equipment—Complete Tool Outfit in Neat Bag Is Included

Up-to-the-Minute News from California

SOME CRACK SHOTS

Are Discovered Among Excelsior Riders in Southern California

SAN DIEGO, Cal.—Ray Smith, manager of the San Diego branch of the Goudy-Hoffer Co., Excelsior distributors at 10th street and Broadway, claims that the riders of the Excelsior are the most persistent and successful game-getters in the Southern end of the State. Mr. Groves, who rides his machine every day on his job as collector for the Benbow Furniture Co., took a vacation at Laguna, where he had great success in punishing the quail with his old scattergun. J. C. Patrick was one of the men who rode a motorcycle way back into the mountains, where it would be hard to get a mule to travel, in the deer open season, and brought out a fine buck. Now the deer season is over, but about every Sunday Patrick and Ray Smith get out after the quail. They have located some fine canyons for hunting, and always bring in a good bag.

LEE SEES BIG YEAR AHEAD

LOS ANGELES.—With the first carload sold exclusively to agents, T. Lee, of the Henderson Motorcycle Sales Corporation, sees the traveling he has done throughout the State on his four-cylinder coming into practical results of a sort that more than satisfy the expectations of the State distributors. Mr. Lee has just returned from a trip in the North, on which he closed agency contracts in several of the best towns in the State.

C. L. SMITH ILL ON TRIP

LOS ANGELES.—C. L. Smith, jobber and Pope distributor, went to San Francisco on a business trip, and was taken ill at Stockton while returning. His illness is reported as not serious, and he is returning by easy stages, calling on dealers along the route.

BERGES STARTS WITH A JUMP

BAKERSFIELD.—Jules Berges, just appointed Bakersfield agent for the Henderson, sold six machines within two hours of the arrival of his 1917 demonstrator. Secretary F. A. Sutphen, of the Henderson Motorcycle Sales Corporation, who closed the agency contract with Berges, personally took the machine to Bakersfield by train. It arrived at Berges' store, where a crowd was waiting, at 8.30 p. m. It was out of the crate, filled with gas and oil and running in just seven minutes. When he closed up the store for the night Berges had deposits on six machines.

S. F. CLUB GAINS 48

Frisco Organization Membership Is Increased Largely

SAN FRANCISCO, Cal.—To Oct. 24, the membership campaign of the San Francisco M. C. gained 48 additional names for the rolls. The contest does not close until Nov. 2, so President Meyer expects that 75 new members will be added by that date. The "Reds" are still ahead in the contest.

TWO NOVEMBER RUNS

SAN FRANCISCO, Cal.—The San Francisco M. C. will hold an official run to Modesto on Nov. 12, while on Nov. 26 the club will go to Pigeon Point. These are the only two runs planned for November, but more will be held if weather conditions are favorable.

H. N. BUCK RETURNS SMILING

SANTA ANA.—H. N. Buck, senior member of Buck & Buck, Excelsior agents, at Santa Ana, has just returned from a trip East. While there he went through the Excelsior factory, and got the dope on the next, new, machine, and his smile has been growing more optimistic with every mile he traveled West.

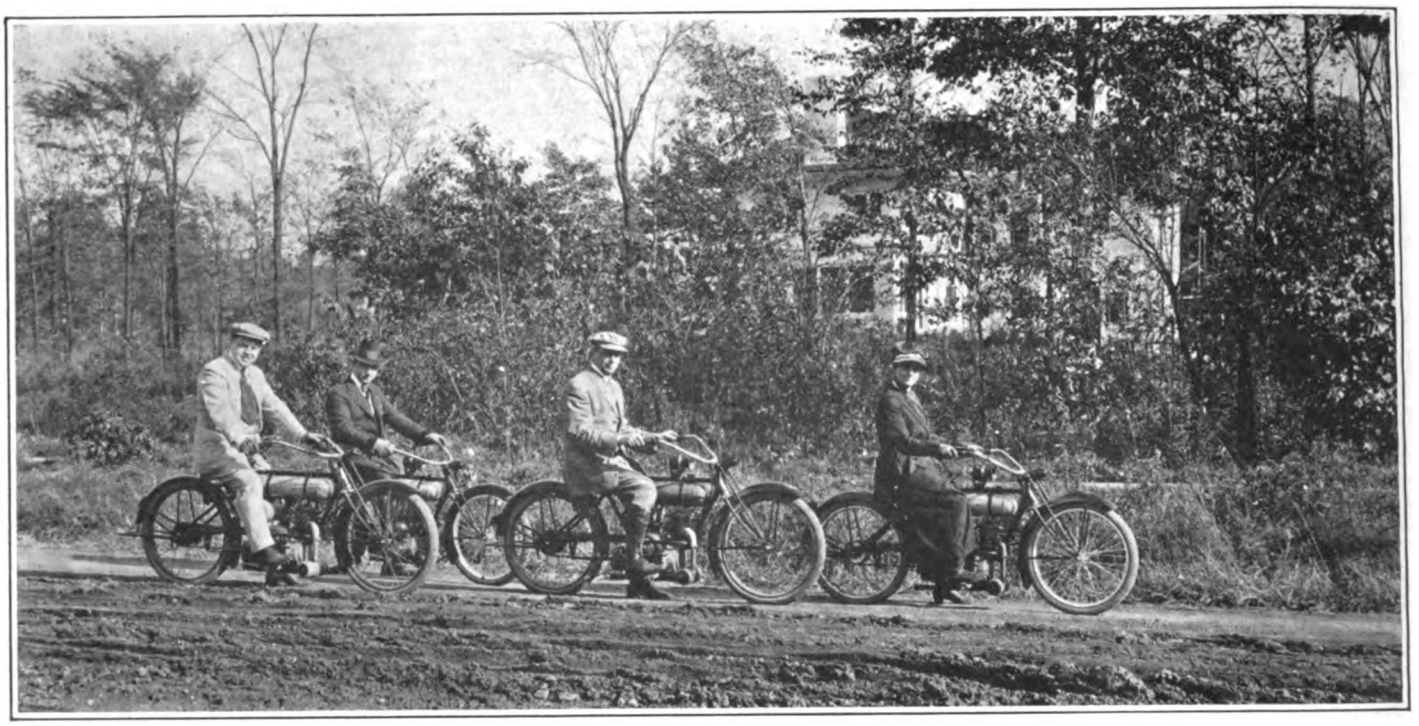
EVERY ONE OF THIS QUARTET OWNS AN AUTOMOBILE



This Is the Sort of Picture That Inspires Faith in the Cleveland Lightweight. It Depicts Mrs. and Mr. H. G. Alexander, the Latter President of the Cleveland Motorcycle Mfg. Co., Starting Out on a Pleasure Run With W. B. Alexander and Fred Foster

CYGNETS ABROAD

Sales Manager Ogden Tells of Widespread Foreign Use

NEW YORK, Oct. 30.—Prior to his departure for foreign countries to push the Cygnet Rear Car, Leadley Ogden, Cygnet sales manager, referred to the widespread use of this attachment outside of the United States. "Outside of the Central Powers (Turkey, Bulgaria, Austria and Germany) there is not a country in the world which does not have Cygnet Rear Cars," said Mr. Ogden.

An agency for Sweden was recently closed with 50 cars fitted with tops and brakes; the Denmark representative took 60 and Norway also took its share. Mr. Ogden states that there are Rear Cars in Mexico, Central America and Africa also.

CYGNET IN PHILIPPINES

MANILA, P. I.—Squires, Bingham & Company, of this city, have taken the agency for Cygnet Rear Cars throughout the Philippine Islands. The first order sent to the maker was for 50 cars and part of this order is now on the way.

CARLTON IS BOSCH MANAGER

SAN FRANCISCO, Cal.—B. R. Miller has resigned as manager of the San Francisco branch of the Bosch Magneto Company. He is succeeded by Lee C. Carlton, who comes from the engineering department at the main Bosch office in New York.

STEWART-WARNER EARNINGS

CHICAGO, Ill., Oct. 31.—The net earnings of the Stewart-Warner Speedometer Corp., makers of Stewart-Warner speedometer and warning signal, were $604,939 for the third quarter of the present year. For the same period a year ago the earnings were only $450,000, the increase amounting to slightly more than 25 per

FLAGG'S NEWEST

Former Standard Welding Man in New Tube Concern

DETROIT, Mich., Oct. 31.—When Howard A. Flagg resigned from the Standard Welding Company a couple of weeks ago there was much speculation as to his future plans. With the formation of the Michigan Steel Tube Products Company, which has incorporated with an authorized capitalization of $300,000, speculation along these lines are set at rest.

Associated with Flagg in this newest venture, which includes the manufacture of all sorts of steel tubing and bent parts in a plant to be established at Hamtramck, just outside of Detroit, are Charles E. Miller and Frank Kritz. Miller and Kritz were also associated with the Standard Welding Company.

PENNSYLVANIA RUBBER DIVIDENDS

JEANNETTE, Pa.—The usual dividend of 1 1-3 per cent. on the preferred stock and 1½ per cent. on the common stock has been declared by the Pennsylvania Rubber Co., makers of Vacuum Cup tires. The dividends are payable on the first of the coming year.

PLAN 200-MILE RUN

READING, Pa.—Encouraged by the large turnout of riders in the recent 165-mile, reliability run, the Reading M. C. is planning a 200-mile, "Clover Leaf" run before the winter sets in. Three new members were taken into the club recently and two additional membership applications are being considered.

HIGHER PRICES

Are Coming in the Brake Lining Field Due to Materials Costs

NEW YORK, Oct. 31.—Because of marked increases in the prices of the raw materials entering into the manufacture of brake linings, rumor has it that the prices of the fabric are to be advanced considerably within the next few months.

It is pointed out that the cost of brass wire, which enters largely into the manufacture of the friction material, has increased 200 per cent. over the price of a year ago, while the demand for the asbestos portion of the fabric greatly exceeds the supply, so that the prices are soaring skyward.

The situation in the brake lining field has been brought to a head by the formation of the Association of Brake Lining Manufacturers who at present are threshing out the material situation.

MOTOR WHEELS IN JAVA

MILWAUKEE, Wis., Oct. 30.—A repeat order of 48 Smith Motor Wheels have just been shipped to Batavia, Java, by the A. O. Smith Company. Reports from that far away country state that the motor wheel has become very popular.

OHIO REGISTERS 21,910 RIDERS

COLUMBUS, Ohio.—In a report made recently by Registrar of Automobiles W. H. Walker, the number of motorcycles registered in Ohio since the first of the year is 21,910, which is somewhat in excess of the whole number registered during the previous year. Motorcycle dealers and manufacturers are not separated from the private owners in this statement. Next year the department will issue a special number plate to manufacturers and dealers.

INDIAN-ROGERS CARS NOW ON WAY TO BECK

Eastern Sidecar Man to Get Load of Passenger Attachments Adaptable to 1917 Hendee Product

NEW YORK, Oct. 31.—Irving Beck, representing the Rogers sidecar in the East, is awaiting the receipt of a carload for the 1917 Indian models. The carload was shipped a few days ago, from the Chicago Rogers' headquarters, and will be in this city in a few days.

The Indian model of Rogers for 1917 has a four-point connection, utilizing all the lugs formed on the Powerplus frame. The sidecar frame is braced, while the front connection is dual. All agents in Beck's territory are now supplied with the new model.

Beck leaves tonight for his annual Western trip, stopping first at Chicago and also at Detroit. In the latter city he will visit he F-N factory. The trip will take four weeks and will include a week at the forthcoming Chicago motorcycle show.

LONG SIDECAR TRIP

Indiana Family Uses Combination for 1,500-Mile Run

TAMPA, Fla.—M. L. and Mrs. Johnson, with their four-year-old daughter, made a trip from Marion, Ind., to this city with a Harley-Davidson sidecar outfit. The trip covered a distance of more than 1,500 miles. Despite the fact that some very rough roads, with stretches of deep sand, were found, there was no engine trouble. Full camping equipment was carried, consisting of a tent, stove, cooking utensils and provisions, as well as clothes and water. The trip was made by way of Louisville, Atlanta, Huntsville, Live Oak and High Springs to St. Petersburg, thence to this city.

Mr. Johnson has come to Florida to live, and is camping on the outskirts of the city for a few days before settling down in his new home.

ATTLEBORO CLUB FORMED

ATTLEBORO, Mass.—The Attleboro M. C. has recently been formed with 50 members. A meeting will be held shortly for the election of officers. The club's aim is to bring about a better feeling of the public in general toward the motorcycle.

AIDS START OF BIG RACE

SHEEPSHEAD BAY, N. Y.—The sidecar outfit proved its value in another field of automobile endeavor at the Speedway during the holding of the Harkness Gold Trophy race. Manned by J. U. Constant, the racing rider, an Indian sidecar enabled Fred Wagner, the starter, to line the drivers up while at speed and give them the proper send off for a rolling start. Heretofore, au automobile has been used for the purpose in the big races, but the sidecar takes up less room on the track and can maintain the required speed.

MOTOR BOB REQUESTS ARE MANY

MILWAUKEE, Wis.—As the result of an announcement in the *Milwaukee Journal* in the Motorcycle Club column that he could furnish data on the construction and design of motor bobs, Hugh Sharp, secretary of the Milwaukee M. C. is being deluged with requests for suggestions on the same. He has a circulating library of facts and fancies on motor bobs going the rounds of local enthusiasts.

REAL BOOSTERS IN MASON CITY M. C.

New Club Will Strive to Foster Interest of Riders in All Small Towns Within Radius of 60 Miles

MASON CITY, Iowa.—C. W. Seeley, manager of the Mason City Cycle Company, Pope and Cyclemotor agents, announces that the Northern Iowa Motorcycle Club has just been organized, and that plans have been laid to bring in all the riders in small towns within a radius of 60 miles of Mason City.

The aim of the club is to promote a friendly feeling among dealers and riders throughout the whole district and thus to boost the interests of the motorcycle on a systematic basis. Whenever a run is contemplated all the riders of the district, regardless of the makes of machines used, and the good fellowship slogan will be lived up to at all times.

The new club starts its promising career with the following officers: C. W. Seeley, president; Guy Hussey, vice-president; Edward Arquette, secretary-treasurer.

The Mason City M. C. is one of the first in the country, if not the first, to lay definite plans for interesting the riders in all small towns in its district, and the officers state that this progressive policy will be carried through at all times.

SIDECAR FOR FIRE DEPARTMENT

LOUISVILLE, Ky.—This city now has a motorcycle withsidecar outfit in use in the fire department. The machine is fitted with racks for chemicals, axes and other light fire-fighting apparatus and carries a crew of two men.

NEWCOMERS SWELL SHOW LISTS FOR BOTH EXHIBITS

Chicago Exhibit Holds Promise of Much "Newness"

TOLEDO, Ohio, Oct. 31.—With a total of 79 separate exhibitors lined up for the Chicago show and two weeks still to pass before the doors swing wide of the exhibit, Show Manager Coffman is confident that the Windy City affair, which opens on November 13 and will hold the boards for the remainder of the week will be the "biggest ever."

That it will likewise be the "best ever," there is not the slightest doubt, according to the hustling show manager.

Five newcomers have been added to the list of the Chicago show exhibitors during the past week. They are: Superior Metal Products Co., Elyria, O.; Troxel Mfg. Co., Elyria, O.; Hagerstown Shoe & Legging Co., Hagerstown, Md.; Chicago Cycle Supply Co., Chicago and R. J. Leacock Sporting Goods Co., St. Louis, Mo.

Two new firms have been added to the New York Show list in the shape of the Reeps Mfg. Co. and Strauss & Buegeleisen, both of New York.

With the close approach of the Chicago show date, the conviction that the opening will disclose a veritable flood of "newness" from all quarters is spreading throughout the trade. It is rumored for instance, that at least one motorcycle manufacturer—and one of the biggest—is holding something quite startling back to be uncorked with the Chicago show opening; and the Windy City affair will doubtless set at rest all speculation on the form the bicycle power attachment that Joe Merkel is working on is to take for the Merkel Motor Wheel Co. is named as an exhibitor.

The full show list to date follows:

THE 74 EXHIBITORS WHO WILL GRACE THE CHICAGO SHOW

American Motor Vehicle Co., Lafayette, Ind.
American Wood Rim Co., Onaway, Mich.
Arnold, Schwinn & Co., Chicago, Ill.
Askew Saddlery Co., Kansas City, Mo.

HOEG SHOWS BEST IN WINNESHIEK RUN

Makes Highest Score of 984 in 106-Mile Iowa Contest—Thirteen Finish of Fifteen Starters

DECORAH, Ia., Oct. 27.—Christian Hoeg, astride an Indian showed up as the winner of the 106-mile endurance run of the Winneshiek M. C. when the checking sheets were gone over and the final scores announced tonight; the run was staged last Sunday over a course from here to McGregor and return.

Hoeg made a score of 984 points, being penalized 16 points for lateness as one of the two secret controls which was established; his lateness was caused by a blowout which occured as he was crossing the railroad tracks between Castalia and Ossian which netted him a bad fall. He managed to pull himself together, however, in time to ride single handed throughout the remainder of the course carrying his headlight under one arm. The fall had broken his lamp bracket.

Hoeg walked off with a silver cup, an allowance of $50 on the purchase of a new machine and a new Goodyear Bluestreak casing as a reward for his achievement.

Second best was Guy Hathaway on an Excelsior who made a score of 978.5 and thereby earned for himself a new Corbin-Brown speedometer. Third prize, a Stewart-Warner speedometer, went to Alexander Grinna, who also straddled an Indian and who was just one point removed from Hathaway.

Fifteen contestants started out in the run during a drizzling rain which threatened to make the going unpleasant, but the storm was of short duration and the sprinkling sufficed to put the roads in that dustless "pink of perfection" condition which appeals so strongly to the seasoned endurance rider. Two of the riders were eliminated by mishaps which befell their machines. The scores of the 13 finishers are as follows:

Christian Hoeg, Indian	984
Guy Hathaway, Excelsior	978.5
Alex. Grinna, Indian	977.5
Leo Payne, Excelsior	975
Johan Fagerlie, Indian	974
Will Hustvedt, H.-Davidson	972
Geo. Gold, Indian	972
Cyril Shaw, Indian	964
Ingval Haughness, Excelsior	959.5
H. Burnside and wife, Excelsior	953.5
Emmet Gillett, H.-Davidson	952
Cleto Nunes, Excelsior	854
Ed. Evenson, Indian sidecar	713.5

PEHLMAN'S SPEED WORK

In the account of the Springfield, Ill., racemeet which appeared in the Oct. 26 number, George Pehlman was not given full credit for his consistent speed work. Pehlman is credited by Springfield speed fans with being the real star of the program, in view of the fact that he set up a new record for the track in the ten-mile race in which he made the sixth and seventh laps in 49½ seconds each.

IS THIS YOUR STOLEN INDIAN?

Beecroft Bros., of Ossining, N. Y., write that a 1916 Indian motorcycle which they have every reason to believe is a stolen machine has been brought to their attention. The number on the motor has been filed or chipped off. The machine can be seen at Denton's Motorcycle store in Ossining.

MAHLSTEDT WINS TWO AT SONOMA MEET

Vallejo Clubster Captures Open Events at California Track—Leonard Takes Both Club Champ Races

SONOMA, Cal.—Jack Mahlstedt, the Indian rider, took the 10-mile and the five-mile open races at the meet in this city under the auspices of the Vallejo M. C. on October 23. Mahlstedt's time for the five miles was 7:33½, but no time was taken for the longer race. Clarence Leonard won the two club events, a three and a five-mile, his times being respectively 4:18 and 7:22 4/5. H. Fisher covered the half-mile of the track in the best time—0:39 4/5—and also won the three lap open race in 2:06.

Every competitor took turns at spilling on either of the two turns and there was considerable excitement in each race as a result. Leonard and Mahlstedt are members of the Vallejo club, and their victories scored four out of a possible six for that organization.

GILBERT PILING UP MILEAGE

LOS ANGELES.—After a short stay in Los Angeles, A. C. Gilbert, Cleveland sales manager, went to San Francisco to look over the field in Northern California. He is expected back in Los Angeles this week to resume discussion of general distribution plans for the Cleveland lightweight.

WEISHAAR STARS AT ELLSWORTH RACES

Harley-Davidson Speedster Takes Three and Five Mile Events and Covers Mile in 1:00 2/5 in Time Trials

ELLSWORTH, Kan.—Ray Weishaar captured the three and five-mile events and Ralph Hepburn the two-mile race at the meet in this city on October 28. Weishaar's time for the three miles was 3:05 and for the five miles 5:05. Weishaar rode a Harley-Davidson. Hepburn, on an Indian, covered the two miles in 2:05.

In the mile time trials, Weishaar covering the distance in 1:00-2/5, while Hepburn made his mile in 1:01-3/5. Korn, on an Indian, bettered Hepburn's time by one-fifth of a second. The performance of Weishaar for a half-mile track was considered remarkable, and some doubts were expressed as to its correctness, but the time given was the same on several of the officials' watches and so was allowed to stand. The summary:

Two miles—Hepburn, Indian, first; Korn, Indian, second; Weishaar, Harley-Davidson, third. Time, 2:05.

Three miles—Weishaar, Harley-Davidson, first; Hepburn, second; Warner, Indian, third. Time, 3:05.

Five miles—Weishaar, first; Warner, second; Johnston, Harley-Davidson, third. Time, 5:05.

Mile time trials—Weishaar, 1:00⅘; Korn, 1:01⅗; Hepburn, 1:01⅗.

EVAPORATED LIKE SNOW

LOS ANGELES.—"They evaporated like snow in the southern sunshine," is the way Sales Manager E. E. Welborn, of the Appeal Mfg. & Jobbing Co., describes the disposal of their first carload of olive drab machines. Dealers had been camping on his trail asking for delivery until he dodged every telephone call. When the machines arrived the dealers were on hand, and the uncrating proceeded at a rate that broke all records. The next carload is sold already.

THIRTY-TWO SHOW PERFECT IN ELLIS' RUN

(Continued from page 11)

schedule of 22 miles an hour even for the 66 miles between Poughkeepsie and Yonkers.

Although she failed to finish with a perfect score, and was therefore not "in" on the prize drawing, Mrs. Victor Pelezare of the Bronx made a most spectacular ride on her Indian sidecar combination with John Kliperberg as sidecar passenger. She pulled through the greatest portion of the distance with no trouble only to lose enough time to kill her score when she encountered a puncture near the finish.

Joe Nissen, in the prize drawing, had the advantage of first choice and he preferred the diamond set gold cuff links to the gold watch which went to T. Platt; Ruderman walked home with the gold stick pin, the third prize.

The run was such a success that Ellis is encouraged to a marked degree and is bending all efforts to consummate the staging of a racemeet and gymkana.

The following made perfect scores:

C. W. Waughop, Cleveland; H. Heldt, Indian; E. Sterns, Indian; J. Sterns, Indian; R. Sterns, Indian; Frank Sladky, Indian; L. H. Guterman, Reading-Standard; H. Langerman, Indian; A. Muller, Indian; M. Carlesten, Reading-Standard; H. B. Stevick, Reading-Standard; J. Callahan, Thor; Chick Lyons, Thor; Charles Peene, Thor; Herman Romaine, Harley-Davidson; Wallace Stewart, Indian; Calvin Webber, Indian; E. W. McDonald, Indian; L. Cobban, Jr., Henderson; J. Barmore, Indian; T. Platt, Indian; George Rickel, Indian; H. Stulz, Indian; Ben Ruderman, Thor; H. Horvitz, Thor; Joe Wasko, Indian; T. J. Nissen, Indian; J. Henkel, Harley-Davidson; John Schustak, Indian; Ray Queen, Indian; H. Westphal, Indian, and J. Pyne, Indian.

The riders who failed to make perfect scores follow:

H. Raoul, Cleveland; M. Goldman, Cleveland; E. Brennan, Excelsior; C. Hearns, Harley-Davidson; F. Schuch, Indian; Geo. Miller, Thor; Oliver Berckhemer, Indian; Victor Pelezare, Indian; M. Bergheart, Indian; H. Most, Indian; T. Griffin, Indian; J. Fredericks, Harley-Davidson; H. Heiden, Harley-Davidson, Mrs. V. Pelezare, Indian; J. Kelly, Indian.

GOERKE EXPANDS

Newark Wigwam Man Opens Store in Elizabeth

NEWARK, N. J., Oct. 31.—Walter Goerke has taken over the Elizabeth agency for the Indian motorcycle and will open a store at 1117 Elizabeth avenue, where he will stock a full line of Indian motorcycles and bicycles as well as a light line of sporting goods. This new place will be in charge of John G. Haviland.

Harvey Snyder, formerly connected with the New York Sporting Goods Co., has taken a position as manager of Goerke's Newark store.

Chester A. Charles will remain at the Newark store as head of the stock room, while Percy Drummond will continue as repairman.

Goerke has made delivery of two 1917 Powerplus models and has a waiting list of eight more patient would-be riders.

He has, in the absence of a new sidecar, fitted up the new demonstrator with a 1916 sidecar, in which prospects are shown the paces of the new Springfield-made machine.

MAY TAKE FOUR SIDECARS

NEWARK, N. J.—The Essex County Mosquito Extermination Commission is considering the purchase of four sidecar combinations for the field force next season. Wilbur M. Walden, president of the New Jersey M. C., who works as chief inspector for the commission, has used first a Thor and later a Harley-Davidson rig to cover inaccessible portions of the swampy meadows with such wonderful results as to turn the commission away from thoughts of cheap autos entirely.

BUSH DELIVERS TEN

NEWARK, N. J.—The Carl W. Bush Company has delivered 10 khaki-colored Harley-Davidson machines to date, but this does not lessen the demand one bit. A carload, containing 25 motorcycles and 20 sidecars leaves Milwaukee headed for this town on November 4. A new Rogers sidecar finished in khaki, is on display in the show window, and this has caused four purchasers to specify the Chicago make for their 1917 choice so far.

EIGHT FOR HAVERFORD

NEWARK, N. J.—The Haverford Cycle Company, Excelsior distributors in this section of New Jersey, is busy selling the Big X machines, eight of which went last Saturday.

SELLS SIX HENDERSONS

NEWARK, N. J.—Charles Krebs, Henderson man, has sold six of the four-cylinder machines so far. Two have been delivered and four are on the way. Charles has sold three Rogers sidecars finished in Henderson blue with three of the machines.

SPECIAL SALES FOR WESTERN

DENVER, Colo., Oct. 27.—The Western Supplies Company, of 1448-52 Larimer Street, this city, is expecting a large shipment of 1917 Giant Thors to reach them soon. At present the concern is continuing its sale of used machines in order to make room for the incoming new Thors. Max Hayutin is at the head of the Western Supplies Company.

The Western Supplies people are also at this time conducting a special sale on motorcycle tires, inner tubes and supplies. They are urging the motorcycle owners to buy now, as they say the prices on their new stock will be increased 25 per cent.

Trade Jottings from Jamaica

JAMAICA, N. Y.—Sidney Hurvin, the well-known dealer at 447 Fulton street, has taken the agency for the Henderson for this city and vicinity, as well as all unoccupied territory on Long Island. The contract was obtained by Felix Lewin, manager of the Henderson Motorcycle Company, of New York, Eastern representative.

NED MORRIS, of 465 Fulton street, is handling the Indian for the 1917 season, in both the motorcycle and bicycle lines. He is issuing a novel business card, the reverse of which carries the portrait of a moving picture star, the picture being changed each week. Morris states that this card is an excellent advertisement and he can trace a number of sales to it.

KOCH-RUHLE CO., of 18 North Washington street, handling the Harley-Davidson, is giving out a very novel folder entitled "Pick the Winner." This folder has three sections, one containing green celluloid in a window and another red celluloid. The center section has superposed pictures of the two Presidential candidates, one of which appears when the red section is folded over the center and the other when the green section is similarly placed. A line of type proclaims that the Harley-Davidson is the winner. There is a big demand for this folder.

HENDERSON FOR SCHAFFER

BROOKLYN, N. Y.—H. Schaffer has opened a motorcycle shop at 706 Prospect place and has taken a sub-agency for the Henderson. The agency will be run by Jay Schaffer, formerly in charge of W. E. Wandersee's Harley-Davidson agency in Detroit.

HILLYER OUT FOR AGENTS

BROOKLYN, N. Y.—William Hillyer, manager of the Central Motorcycle Company, of 1407 Bedford avenue, is out after sub-agents for the Henderson these days. He recently signed up H. Schaeffer, 706 Prospect place, as a retail handler of the machine in Brooklyn. Hillyer is listing prospects in plenty and expects to make 1917 one of his biggest seasons since entering the cycle business.

KOCH COVERING LONG ISLAND

JAMAICA, N. Y., Oct. 31.—Walter Koch, of the Koch-Ruhle Company, Harley-Davidson distributors, started out this morning for a trip through Long Island to close local agencies. He will be gone three or four days.

BECK IN NEWARK

Rogers Sidecar Man Gets Orders for Ten and Smiles

NEWARK, N. J.—Irving Beck, the sidecar man, who says there isn't anything like the Rogers, blew into town this week and left happy as a lark. Orders for ten new Rogers cars were probably the cause; four of these go to Bush for Harley-Davidsons, two go for Excelsiors, three for Hendersons and one for Indian. Beck says that business never looked better and that an 800 per cent. increase for September, 1916, over the previous year's same period was the basis of his remark.

EARLY DEMONSTRATIONS VALUABLE

HOBART, Okla.—E. W. Strickler, manager of the Hobart Motor & Cycle Company of this city, is fully convinced of the value of demonstrations. "I have more prospects now than at this time of year in any season before," says Strickler. "This is due in part to the fact that I got the 1917 demonstrator early and went to it hard. The prospects came right along."

DOES BETTER WORK THAN AUTO

JOHNSTOWN, Pa.—C. A. Pierce, the local Harley-Davidson dealer, has sold one of the new Harley-Davidson twins to the Oakland Sales Company to be used by the manager in looking up prospects for the sale of automobiles and rendering service to owners. The manager says that the motorcycle is more economical and practical for his work than an automobile of any description.

SYKES EQUIPS SHOP

COLUMBUS, O.—The Sykes Motor Company, central Ohio distributor for the Indian, has started to equip its repair shop at its salesrooms, 37 East Long street with up-to-date machinery. A large consignment of parts has also been received from the factory.

STARTS WITH SIX ORDERS

BROOKDALE, N. J.—William Lyons, sub-agent for the Indian motorcycle, under Walter Goerke, reports an increase of 25 per cent. in his 1916 business, sidecar outfits showing a phenomenal growth in his section.

He has orders for six 1917 Indians, and all the boys had to look at are the catalogs, or take a run down to Newark to see Walter Goerke's new motorcycle. However, Lyons expects his first machine in this week and then go out hard on the trail.

GENERAL GETS DEMONSTRATOR

BOSTON, Mass.—The General Motorcycle Sales Company, of 145 Columbus avenue, has received its 1917 Henderson demonstrator and the salesmen are busy showing off its good points. One of the things that the four-cylinder mount is made to do is to climb steps slowly, and this stunt has resulted in several orders for the new model. A shipment of Hendersons is expected shortly and deliveries will begin as soon as it arrives.

RHODES WINS AUSTRALIAN RELIABILITY

Melbourne Sidecarist Brings Powerplus Outfit Through Severe Run with Perfect Score and Is Only Contestant to Finish on Time—Gets "Winner" Trophy

MELBOURNE, Australia.—Driving his Powerplus sidecar combination over deeply flooded roads, through miles of mud and pelting rain, J. H. Rhodes, of this city, came in first in the "Winner" Cup reliability contest of the Victorian M. C. on Sept. 23. Rhodes was awarded the "Winner" trophy for his performance, which was the more praiseworthy in that he was the only sidecarist to finish with perfect score, and the only starter out of 25 to complete the course of schedule time. Mrs. Rhodes, who accompanied her husband throughout the long grind to Marysville and return, was awarded a wrist watch by the club committee.

In addition to Rhodes' victory in the sidecar class, Indian enthusiasts were elated over the performance of N. Galsworthy, on a 7 h.p. Indian model, who was the only solo rider to finish the course at all. Galsworthy was two hours late, but he finished in good condition for all that.

H. Parsons, driving a Harley-Davidson sidecar outfit, came through the run 60 minutes late. H. Pannach, driving an Excelsior combination, also finished the run, but was two hours behind schedule. The quartet of American-made motorcycles were, in fact, the only ones to finish at all.

Prior to the start of the contest there had been 36 hours of heavy rain, and the roads—none too good in the dry season—were turned into quagmires in many places. At Yarra Glen, on the day of the run, the river had overflowed its banks, forming a lake some two miles across and five miles wide and two feet deep, and through a portion of this the field had to pass. The main route between Marysville and Melbourne was under water for over a mile, to the depth of 20 inches, as was also the road at Research. Notwithstanding the grewsome reports of riding conditions, 25 out of the original 49 entrants were started off, but only a handful reached Marysville. These were Rhodes, Parsons, Pannach and J. Gunn (Indian) in the sidecar class, and Galsworthy and Jack Booth (Indian) in the solo class. Yarra Glen on the back stretch accounted for the disappearance of Booth and Gunn from the run, and slaughtered the scores of Pannach, Galsworthy and Parsons.

In the solo class for motors of under 600 c.c. there were no entrants to reach Marysville at all, and the same was true of the sidecar class for under 600 c.c. With the exception of Rhodes, all entrants suffered from submerged magnetos, water in the carbureter, or transmission troubles. The chain driven machines stood the racket the best and this form of drive was on all the finishing mounts.

PRAISES MOTOR SQUAD

Washington Police Head Commends Work of Branch

WASHINGTON, D. C.—In his annual report to the commissioners, Major Raymond W. Pullman, superintendent of police in the National Capitol, gives due credit to the motorcycle squad in reducing speeding and other forms of traffic violation. He cites the advantages of the motorcycle for such work, and recommends the adoption of officers constituting a special motorcycle branch for the force.

"With the fast motorcycles," says the major, "it has been possible to arrest many drivers who could not have been caught by members of the bicycle squad. Several cases of speed arrests have been made of motorists running from 40 to 55 miles per hour. This speeding is now rapidly being reduced to a minimum."

During the past year the force has increased its motorcycle strength to 18, of which 12 are Indians. The major calls the attention of the commissioners to the need of a traffic captain, lieutenants and sergeants to supervise this branch of the work, and emphasizing the intention of the Washington police to build up the motorcycle squad and make it the most important branch of the service.

THANKSGIVING RUN

Columbia, S. C., Riders to Hold Endurance Contest to Augusta

COLUMBIA, S. C.—There will be a motorcycle endurance run held from this city to Augusta and return on Thanksgiving Day. The distance to be covered is 152 miles, and the speed schedule will be 21 miles per hour. The rider must keep his speed average the whole distance or he will be penalized in points for each minute ahead or behind his schedule at checking or secret controls.

The checking controls will be at Columbia, Batesburg, Aiken and Augusta with secret controls all along the route. Prizes will be awarded to the contestants returning with the greatest number of points to their credit.

IMP CHASER GETS CYGNET

BROOKLYN, N. Y.—Howard Hendricks, local Excelsior agent, has just sold a Cygnet Rear Car to the Imp Carbon Chaser Company, of New York. The car is drawn by a 1917 Excelsior and the back of the car is painted with the Imp trademark.

CONTEST WAXES WARMER WITH EACH PICTURE

Many Contestants Complain that Last Week's Picture Was Too Hard, But All Answers Received Were Correct—Full Scores Will Be Published Next Week

THE hardest part of conducting a Contest column is to figure out the winners when the answers flock in in each mail and throw all calculations to the winds.

Promised last week and also the week before to come through with full standing of the competitors and have been working at a checking system ever since to "dope" it out but it's a hard job.

So all we will say about scores this week is that perfect ones are few and far between; what the Schickel picture didn't do to the Motorcycle Experts, the Dayton picture did. And the Excelsior view put the period on the good work.

Yes that was an Excelsior stand, or a section of it, that we printed last week. It was kind of hard, to be sure; but then you folks know so much about motorcycles that it's too simple and too easy if we print a picture of a section any bigger than a pin head.

Was Picture Too Hard?

Quite a few of the contestants complained that the last picture was too hard—but all those who found it too hard got the right answer just the same.

As a matter of fact the picture was not so hard as the Dayton view which preceded it. That much can be gathered by the fact that all the answers that have come to hand up till press time have been correct. On the other hand this week's mail brought another flock of incorrect answers to the Dayton picture.

Most of the boys, including our friend J. E. Pugsley of Irvington, N. J., thought it was a Harley-Davidson machine that was partially illustrated. That's two we have on you Pugsley! The others who called it a Harley-Davidson are: Emilio Sanchez Marti of Havana, Cuba; J. H. Kirsch and M. Kornfeld, Bronx, N. Y.; Francis Conklin, East Hampton, Conn.; Adam Adams, Nokomis, Ill., and A. Carlisle, David City, Neb.

Lucius E. Smith of Gorham, Kan., identified it as a part of an Indian.

Before we go further, we wish to apologize to W. J. Edwards of Springfield, Mass., who answered correctly on the Harley-Davidson manifold picture published Oct. 12—his answer fell down out of sight in one of the drawers of the Contest Editor's desk. We give you credit for it this week, W. J.

How are the Huylers, Millie and Jennie? They were sent just after the ghost walked last week.

We've Lost a Contestant

George M. Hill, late of Asbury Park, announces that he is out of the contest; he is taking a motor boat trip South and cannot make arrangements to get the paper on time. Sorry, Geo. Give our regards to Cousin Violet.

There now, turn your attention to the little circle above. Looks like a hard one, nix? Certainly should stump a few of the fellows. But you cannot always tell. Get busy on it fellows, and get your answers in as early as possible this week, so that we can publish the full score for the entire contest in the next issue.

WHAT DO YOU KNOW ABOUT MOTORCYCLES ?

WHAT MAKE OF MOTORCYCLE IS THIS TAKEN FROM?

GIVES GOOD SERVICE

Music Company Finds Sidevan Assures Prompt Deliveries

DENVER, Colo.—The Robert D. Sharp Music Co., of this city, is getting most satisfactory service from a Harley-Davidson motorcycle and sidevan. In referring to the matter, Mr. Sharp said to a representative of **Motor Cycle Illustrated:** "Our delivery service has been greatly improved since we added the machine. When a person comes into our store and buys a phonograph or other smaller musical instrument and wants it delivered right away, the sidevan outfit plays an important part. We could not assure our customers that their purchases would have prompt delivery before we added the motorcycle outfit as the men who handled our pianos would probably be engaged in another part of the city at just the time we wanted them.

"Now, we can deliver two Victrolas at one time with the motorcycle rig and also a large number of records. The motorcycle also comes in handy in aiding our collectors to get to different parts of the city."

USED MACHINES IN DEMAND

LOUISVILLE.—J. H. Eteen local Henderson representative, is experiencing an unusually heavy demand for second-hand motorcycles. He states that prices on used machines have dropped in this district until it takes practically a new machine to bring over $100, but the demand remains good.

GASOLINE DROPS ONE CENT

DENVER, Colo.—Gasoline prices are on the decrease in this city, just now. Last week the price dropped one cent. The cause of the drop to 21 cents the gallon is explained as being due to a decrease in consumption, enabling the refiners to catch up with orders.

THIS WEEK'S ANSWERS TO THE CONTEST PICTURES

Dayton

ANNOUNCEMENT FOR 1917

BRIEFLY, simply, without "hurrah" or exaggeration, we present herewith for your earnest consideration the Dayton line of Motorcycles and Motor Bicycles for the coming season.

This will be our twenty-third year in the cycle business; the fifth year that we have manufactured Dayton Motorcycles and the second year for the front-wheel drive Dayton Motor Bicycle.

It has been our determination to make the best. Every year has given us greater knowledge. Every year we have added to our manufacturing facilities—we know that they are excelled by none. With ample facilities, long experience, and a determination to make the best, the Dayton organization offers to live, aggressive business men a **REAL** opportunity. The purpose of this announcement is to bring this fact to your attention. There is a **MONEY-MAKING** business for someone overlooked in every town where the Dayton agency is open. If **YOU** are that Someone, now is the time to get our Agency proposition.

The Dayton One-Price Sales Policy

Of prime importance to the merchant who sells Motorcycles and Motor Bicycles is the manufacturer's merchandising plans. We are pleased to announce what we believe to be the FAIREST AGENCY PROPOSITION ever offered the Cycle Trade—the Dayton One-Price Policy.

There is No Discrimination

There is No Competition

There is No Waste Capital

We will gladly send complete information regarding the Dayton One-Price Sales Policy to any recognized dealer who sincerely desires to consider the Dayton agency. Attach the coupon below to your letterhead, and send full information as to your facilities for handling the Dayton lines.

Immediate Deliveries

We have already received a large number of orders for new models, but we are prepared to fill these and a good many more in November.

The Davis Sewing Machine Co.

Cycle Department ***Dayton, Ohio***

(Cut off this coupon and attach it to your letterhead)

The Davis Sewing Machine Co.,
Cycle Dept., Dayton, Ohio. .....1916.

Dear Sirs:

Please have your salesman call on me with complete information regarding the Dayton One-Price Sales Policy and agency proposition for the lines checked below.

Model E3—Dayton Motor, Three-Speed Transmission (Illustrated above), $275.00.

Model E1—Dayton Motor, Single Speed $250.00
Model E2—Dayton Motor. Two Speed 260.00
Model E3—Dayton Motor, Three Speed 275.00
Model E4—Dayton Motor, Three Speed, Electric Lighting 315.00

MOTOR—Dayton Twin cylinder. Bore 3 5/16 inches (84.1 millimeters). Stroke 3½ inches (88.9 millimeters). Piston displacement 60.32 cubic inches (988.86 cubic centimeters). Rated horse power, 8. Delivered horse power, 12.

IGNITION—Dixie Magneto on Models E1, E2 and E3. Splitdorf Magneto Generator on Model E4.

MAGNETO DRIVE—Train of gears contained in crank case.

TRANSMISSION—Eclipse clutch on Model E1. Chain drive with Dayton Dry Disc clutch, side lever and foot pedal clutch control, on Models E2, E3 and E4. Spring-Dog Two-Speed Gears on Model E2. Auto-type Three-Speed Gears on Models E3 and E4.

WHEEL BASE—Models E1 and E2, 58 inches. Models E3 and E4, 60 inches.

Lower Seat Position for 1917

"THE GREATEST improvement made on any motorcycle this year," is the unanimous verdict of all who have seen the 1917 Dayton Three-Speed models with the new frame design and low seat position.

Those who have ridden the Dayton know full well the strength of its construction, the never-failing power of either the Dayton or Dayton Deluxe motor, and the completeness of its equipment. But a treat is in store for those who have never sat astride the new models. They fit you like a Morris chair.

The new frame design is the only radical change that we felt could improve our 1916 models—and we have made it. There have been a number of minor mechanical improvements in the interest of smoother motor operation, and Troxel Jumbo saddles and Duckworth chains are now regular equipment.

Everyone knows the reputation of the Dayton for power. The Dayton DeLuxe motor is the most powerful motorcycle engine in the world. It will carry you along regardless of the load or the obstacles encountered. It is the ideal sidecar motor. The Dayton motor is a little more flexible and is preferred for solo use.

All of the Dayton models are pleasing in design and handsome in finish. The enameling and nickeling is done with extreme care and under ideal conditions. There is no petty economy in the use of lock washers and cotter pins.

Note well the high standard and completeness of the equipment:

CONTROL—Double grip control with long bends in control cables designed especially for extra strength.

WHEELS—28" C C Type extra heavy rim for 3" tires. Front wheel 36 spokes. Rear wheel 40 spokes.

LUGGAGE CARRIER—Optional. If desired, be sure to specify when ordering.

FOOTBOARDS—Aluminum, pyramid faced, folding type with heel form.

TIRES—United States Chain Tread, Firestone or Goodyear Blue Streak, 28" x 3".

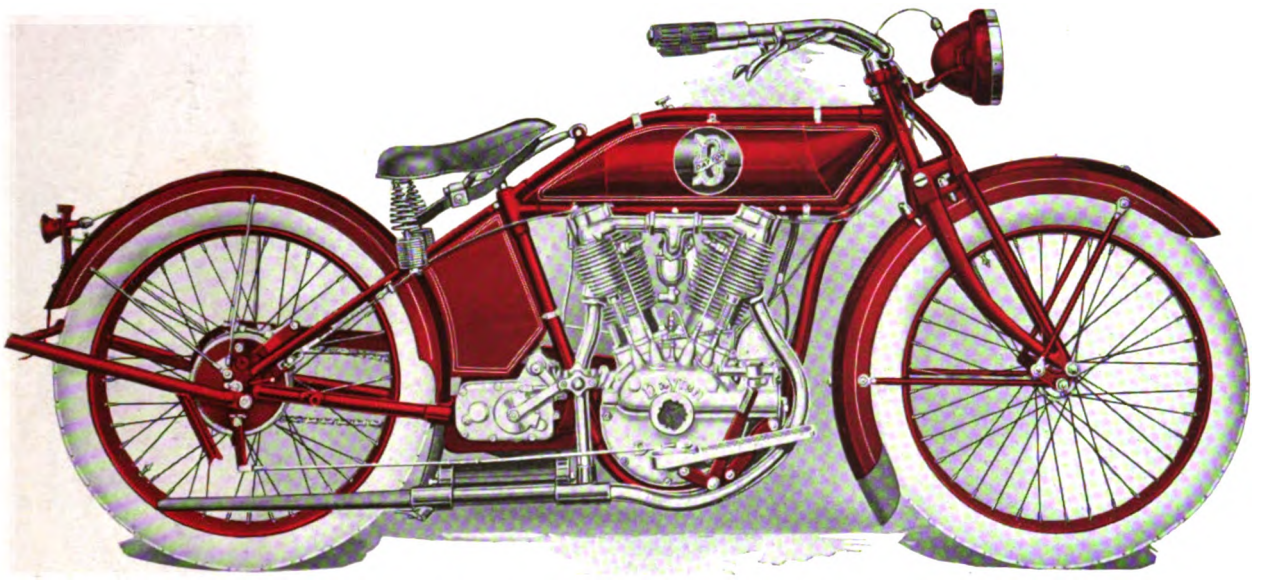
STAND—Fastened to frame independent of rear axle.

TOOLS—Complete set in roll in large metal tool box.

CARBURETOR—Schebler Model H (1 in.)

SADDLE—Troxel Jumbo.

Digitized by Google



Model E8—Dayton DeLuxe Motor, Three-Speed Transmission (Illustrated above), $315.00.

Model E5—Dayton DeLuxe Motor, Single Speed $250.00

Model E6—Dayton DeLuxe Motor, Two Speed 260.00

Model E7—Dayton DeLuxe Motor, Three Speed 275.00

Model E8—Dayton DeLuxe Motor, Three Speed, Electric Lighting 315.00

MOTOR—Dayton DeLuxe Twin Cylinder. Bore 3.50 in. (88.9 millimeters). Stroke 3.67 in. (93.22 millimeters). Piston displacement 70.62 cu. in. (1157.24 cubic centimeters). Rated horse power, 9. Delivered horse power, 14.

IGNITION—Bosch magneto on Models E5, E6 and E7. Splitdorf Magneto-Generator on Model E8.

MAGNETO DRIVE—Single forged shaft, cams integral therewith, rotated by worm gears, actuating all four valves and driving magneto.

TRANSMISSION—Eclipse Clutch on Model E5. Chain drive with Dayton Dry Disc Clutch, side lever and foot pedal clutch control on Models E6, E7 and E8. Spring-Dog two-speed gears on Model E6. Auto-type three-speed gears on Models E7 and E8.

WHEEL BASE—Models E5 and E6, 58 inches. Models E7 and E8, 60 inches.

A Few Dayton Features

NEW FRAME DESIGN—On all three-speed models the 1917 Dayton has a 2 ft. 5 in. seat position. "It fits you like a Morris chair."

AUTO-TYPE THREE-SPEED GEARS—They operate on a spline shaft, each gear being separate from the others. Gears shifted from high to low without stopping at intermediate. Gears cut from chrome nickel steel and housed in aluminum gear case.

INTER-ACTING GEAR LOCKS—The gears are held absolutely in mesh by a double-locking device, so they cannot be shifted while clutch is engaged. Yet the device is so compact that the lock may be released and gears shifted with one motion.

MECHANICAL OILING SYSTEM—An improved mechanical oil pump of the plunger type is operated by a worm drive from the magneto gears and a graduated supply of oil is delivered to the motor under all conditions. In addition, there is a force feed pump for hand operation when desired.

DOUBLE-ACTING BAND BRAKE—This is actually two brakes in one. Either is sufficient in itself, but both are available for emergencies. One is operated from the right foot pedal, the other from a hand lever on the right handle-bar, and their response is instantaneous.

HAND AND FOOT CLUTCH CONTROL—The Dayton Dry Disc clutch is disengaged by simply pressing the foot pedal forward, as in the most approved automobile practice, and releasing the foot lever reengages the clutch. The clutch may also be operated by a hand lever.

SPRING-DOG TWO-SPEED GEARS—The springs compressed behind the driving dogs permit the gears to be shifted while the motorcycle is standing still. They produce an instantaneous meshing of gears.

DAYTON ROCKER SPRING FORK—The three-stem front fork with patented rocker spring construction is nothing new to the Dayton. Yet there is no fork on the market that begins to duplicate it for strength and easy riding qualities. It will absorb jars and jolts from any direction.

TWO-IN-ONE TANK—The oil tank fits neatly into the gasoline tank and can be easily removed from it. The gasoline cock is so constructed as to maintain at all times a reserve supply of gasoline in the tank.

WIDE HANDLE-BARS—The Dayton handle-bars are extra wide. There is the right "feel" about them and they guide easily. They are very strong with reinforcing cross-brace. Long, safe bends in the control cables.

MUFFLER AND TAIL-PIPE—The muffler has an oversize expansion chamber and tail pipe with foot-operated cutout.

Men's or Ladies' Model, $100.00 f. o. b. Dayton

The Dayton Motor Bicycle

the Universal Machine

THE DAYTON Motor Bicycle has been the sensation of the season. It was a radical departure from the usual motor-in-the-frame construction, and it has made good.

It embodies the ideal of the universal machine. It has met with the approval of thousands. It is the World's Lowest Priced Complete Motor Vehicle.

It doesn't have to be "sold"—it sells itself. Think what these features mean:

LIGHTNESS
PERFECT CLEANLINESS
SIMPLICITY OF OPERATION
DIRECT APPLICATION OF POWER
SINGLE-GRIP CONTROL
LOW CENTER OF GRAVITY
ELIMINATION OF VIBRATION
PROPER DISTRIBUTION OF WEIGHT
PULLING—NOT PUSHING—THE LOAD

Improvements on 1917 Models

A number of important improvements have been made on the 1917 models.

Refinements to the intake valve resulting in more flexibility and greater power.

Larger breather tube, decreasing back pressure on crank case and also producing more power.

Decompressing device fitted to intake valve dome.

Priming cap in intake valve dome, superseding priming cock in cylinder head.

Knurled cap and spring attachment for needle valve, facilitating motor adjustments.

Broad base stand of non-tilting type.

Large, comfortable Troxel "Pillow Pad" saddle.

Troxel Jumbo tool bag, with full set of tools.

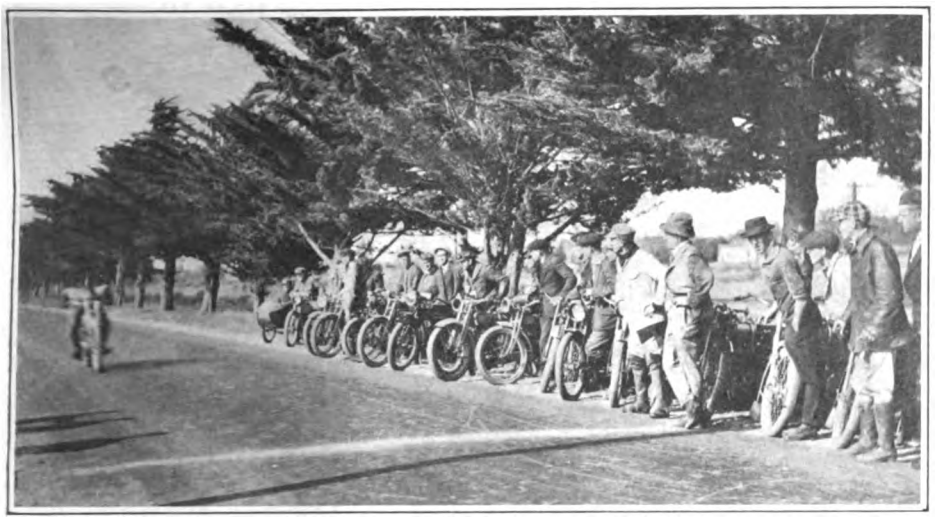
CHAPMAN WINS SPEED CHAMPIONSHIP OF FLEET



The Chief Yeoman Winning His Match at Speed—San Diego Riders at Finish

SAN DIEGO, Cal.—Paul H. Chapman, chief yeoman, U. S. Navy, won a five mile match to decide the championship of the U. S. fleet off the Southwestern coast the other day. The race was held along El Camino Real some 30 miles south of this city, in the presence of some fifty San Diego riders. Chapman finished about 100 yards ahead of his challenger, H. O. Jackson, at high speed. The winner rode a three-speed 1916 electrically equipped Harley-Davidson.

The match was the result of a challenge issued by Jackson, of U. S. S. Preble, about two months ago. Chapman, who is on the U. S. S. Milwaukee, took up Jackson's challenge but it was not until the fleet reached San Diego that it was possible to run off the match. Jackson's mount was an Indian.

PHOTOGRAPH DAY

For Indian Riders Will Be Observed Nov. 12 in Los Angeles

LOS ANGELES.—Plans have been practically completed for Indian Photograph Day, to be observed Nov. 12 in conjunction with the big Los Angeles M. C. hill climb. The riders will assemble in front of the Pacific Motor Supply Company's store at 10 a. m. Nov. 12, and after photographs have been taken the party will proceed to the scene of the hill-climb.

The following prizes will be awarded: For the neatest and best-equipped Indian sidecar combination, a lady's gold watch; second prize, a lady's gold bracelet, for the neatest and best-equipped Indian tandem outfit; third prize, a spotlight, for the best-equipped Indian solo machine; fourth prize, a pair of $5 gloves for the oldest Indian model in the best general condition. The judges will be J. J. O'Connor, of *Pacific Motorcyclist* and *Western Wheelman*, Charles Fuller Gates, and R. Trabant, the latter of the Valvoline Oil Co.

SIX MORE BANNED

Competition Chairman Suspends Additional Competitors

CHICAGO, Ill.—Continuing his recently adopted policy of suspending riders who competed in outlaw events, Competition Chairman John L. Donovan has included in the list of those prohibited from competing in F. A. M. affairs Ray Murray, Leo Rogers, Jene Caldwell and Bob Kenney. These men competed in unsanctioned meets at Plainview, Lubbock, Paris, Amarillo and Matador, Texas, and at Clovis, N. M. The suspensions took effect Oct. 23.

Chairman Donovan also announces the suspension of Jack Green, of Denver, Colo., and R. Hepburn, of Los Angeles, Cal., who competed at Concordia, Kas., when Fillmore was fatally injured.

A BUSY TRAVELER

Manager Ed. Lebell Is Piling Up Big Mileage on Dealer Trips

LOS ANGELES.—Edward Lebell, manager of the Pacific Motor Supply Co., in Southern California, had the most enjoyable and fruitful trip of his life last week. He visited nearly every Indian dealer in the Southern half of the State, and his route covered just about a thousand miles. Lebell reports that he found sales enthusiasm at full tide throughout all of the territory, and he is backed up in this statement by the manner in which the dealers crowded in for their demonstrators when the first new models arrived in Los Angeles.

Billy Gurr, of San Bernardino, was about the first dealer to arrive at the Pacific Motor Supply headquarters for his demonstrator. He got one and hurried home with it. Carriker & Crowl, of Orange, also got one of the new ones and had a race back home with M. G. Anglauf, of Anaheim. These dealers found prospects waiting at their stores when they returned.

After remaining at the store for a short time to catch up with the new business, Manager Lebell finished up a busy week by making a trip to San Francisco. He brought back the news that President A. Freed, of the Pacific Motor Supply Co., was preparing for a visit to Los Angeles on which he will be accompanied by George W. Sherman, the Indian special representative.

AUGUST MOTORCYCLE EXPORTS FALL OFF

Figures Show 9 Per Cent. Drop in Valuation of Shipments, Although Number of Machines Is Greater

NEW YORK, Oct. 31.—That in the number of machines shipped our motorcycle export trade for the month of August last bettered our trade during the corresponding month of last year by 8 per cent.; and that despite this increase in machines the actual valuation of such exports during last August was some 9 per cent. below the valuation of similar exports for the eight months of 1915 are the chief disclosures the monthly summary of commerce and trade just gotten out by the Department of Foreign and Domestic Commerce has for the motorcycle trade.

But whereas the motorcycle export trade for that particular month is nothing to feel boastful of, the figures dealing with the eight-months period terminating with August, 1916, compare very favorably with those dealing with a similar period ending with August, 1915. The number of machines shipped during the periods just past was 12,328, as against 10,176 for the period a year ago, the percentage increase amounting to slightly better than 21. In valuation the figures stand at $2,339,209 and $1,905,389 respectively, and figure out for a percentage increase of 22; the figures indicate an increase, slight to be sure, in the average valuation of the machines shipped during the most recent period over those shipped during the same interval a year ago.

The export figures dealing with our bicycle trade are just an indication of what our factories could do were their hands not tied by the acute situation obtaining in the materials market. During the last August we exported bicycles and parts to the valuation of $102,307, while during August a year ago the valuation was $82,454; the figures represent an increase of 25 per cent.

All out of proportion to this are the figures dealing with the eight-months period. The valuation of such cycle exports for the period ending with August of the present year was $673,345, as against $363,482 for the period ending with August, 1915. The increase is better than 88 per cent.

Our imports for August soared 170 per cent. above those for August a year ago; the figures are $5,642 for the present year, as against $2,053 for the year past. For the eight-months period the increase amounts to 64 per cent., the respective figures being $48,059 and $29,113. The figures are so small, however, as not to cause any uneasiness as to the possibility of a "foreign invasion" of our cycle markets.

The figures dealing with our trade with our non-contiguous territories hold but scant interest. Hawaii took motorcycles, bicycles and parts to an amount representing a 32 per cent. increase during August of this year over the imports of American two-wheelers during August of last year, but lost out by some 7 per cent. on the eight-months period. Both Porto Rico and the Philippine Islands, however, showed marked falling off in the valuation of American cycles imported.

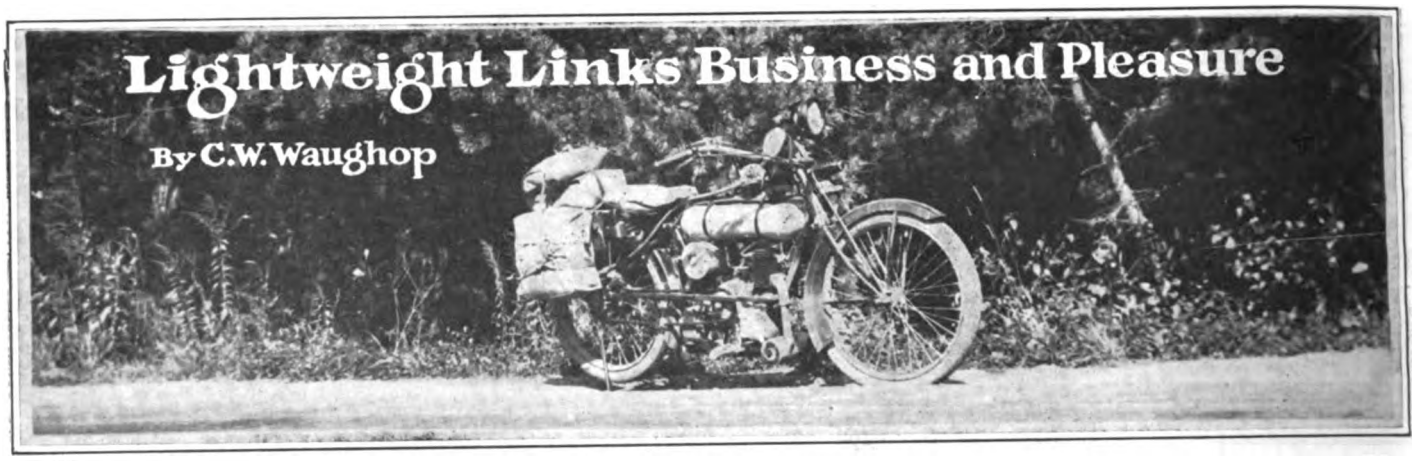
Lightweight Links Business and Pleasure

By C.W. Waughop



THERE are some who hold that, like water and oil, business and pleasure cannot be mixed. I am not of their number, for I have demonstrated to my own satisfaction, at least, that the mixture can be accomplished, and that neither business nor pleasure lose aught of their worth while features in the mixing.

And the little "mixer" that did the trick was a Cleveland light motorcycle.

It happened this way: I was scheduled to travel the New England territory just about the time of the year when my thoughts were bent on enjoying a daily motorcycle spin, a few hours of fishing and swimming, and, occasionally, a night or two in the silent woods under a tented roof. It looked very much as if the sport must needs give way to the business, until the combination idea struck me, and I decided to tackle the trip astride my Cleveland.

At first the thing seemed impossible. I was going over a route replete with mountains and roads in none too good shape, and, while I had every faith in the ability of my machine to carry my 175 pounds of bone and flesh over the route without a falter, when it came to camp equipment, I had my doubts.

Solving Equipment Problem

A visit to the remarkably well-equipped store of the New York Sporting Goods Co., at 17 Warren street, New York, however, set me at ease on that score. There I picked up a little sportsman's tent, with a jointed tent pole and a poncho, which provided every sleeping comfort, yet was quite capable of being packed in a comparatively small space and was, withal, so light as to be readily carried.

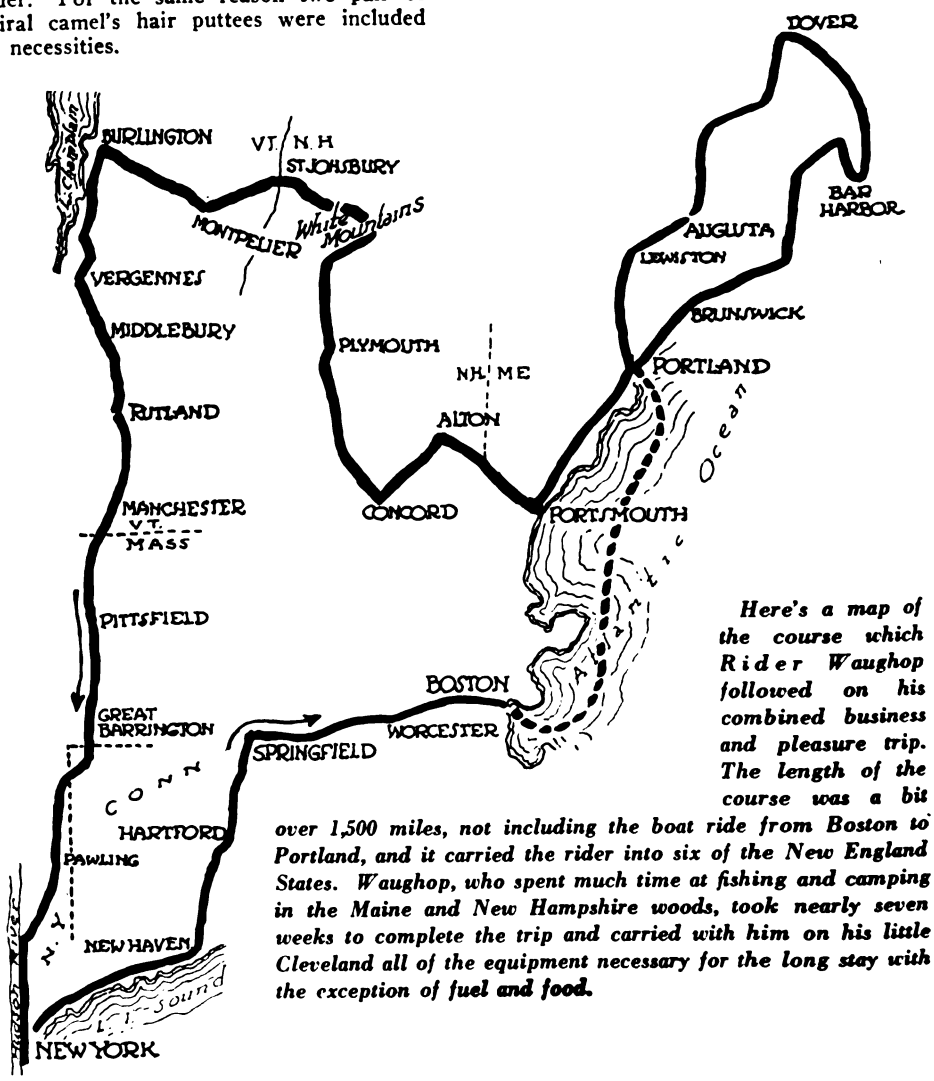
With the purchase of the tent, the biggest load was off my mind; from the same souce I obtained the balance of my camping paraphernalia, listed in the accompanying table. The camp equipment was just as simple as I could make it; not a thing that was not actually needed was included, and I point with much pride to the fact that for once I got under way with an equipment in which there was nothing lacking that I really had call for.

Then I tackled the clothes proposition. Here was a matter for real concern. Of course, I rode in a regulation riding suit of forestry green wool serge; I took an extra suit of the same material along, so that neither accident nor downpour could interfere with my reputation as a neat rider. For the same reason two pair of spiral camel's hair puttees were included as necessities.

For shirts, I chose the United States Army standard khaki-colored wool, with breast pockets, and had no reason to regret

EQUIPMENT THAT WAUGHOP CARRIED FOR CLEVELAND CAMPING TRIP

1 Compac sportsman's Kakette tent
1 Compac poncho Kakette
1 Compac jointed tent pole
1 Steamer Rug, heavy Scotch plaid
1 Aluminum water bottle
Casting rod and tackle
1 Aluminum Boy Scout camp cook
1 Combination axe and fish knife
1 Ever Ready flash lamp
1 Travelers' Toilet set, Autostrop razor
1 Premoette Camera, 2¼ x 3¼
1 32 Caliber Savage revolver
1 First Aid Medical Kit
Extra riding suit, puttees, shirts and underclothes.



Here's a map of the course which Rider Waughop followed on his combined business and pleasure trip. The length of the course was a bit over 1,500 miles, not including the boat ride from Boston to Portland, and it carried the rider into six of the New England States. Waughop, who spent much time at fishing and camping in the Maine and New Hampshire woods, took nearly seven weeks to complete the trip and carried with him on his little Cleveland all of the equipment necessary for the long stay with the exception of fuel and food.

Digitized by Google

Kodak shots at two of Waughop's camps and just a touch of real New Hampshire scenery which he encountered in the quarry district of the marble state.

it; and for comfort's sake, in view of the fact that I anticipated a bit of chilliness, I wore quite heavy summer wool underwear and carried a few extra suits along. A pair of well-oiled, weatherproof leather-soled shoes completed the clothes kit.

Because I had no idea what I might run up against, and feeling that some sort of defensive weapon might come in handy, I carried a 32 calibre Savage with a holster and an extra magazine, and, of course, a camera—a 2¼ x 3¼ Premoette—to preserve picture records of my trip.

When it was all gathered together, the equipment scaled at 75 pounds, and I know, from past experiences, that for the amount of material included, that was very light. It was impossible, of course, to pack everything in a single bundle to be strapped to the luggage carrier. I worried about the packing end of it for some time and finally decided to have a couple of special "panier" kits made up of waterproofed canvas for attachment to the sides of the carrier. In these I stored away the last bit of the camp equipment; the clothes went into a similarly made collapsible bag carried directly on the carrier; woven canvas straps were used instead of leather ones in every case.

Trip to Portland

With my luggage disposed of in this manner, I set out the last week in July, heading north from New York; I made my calls at Stamford, Norwalk, Bridgeport and New Haven, and spent the first night in the Hotel Garde in that Connecticut city. This was according to schedule, for I had not the slightest desire to begin camping until I got up into Maine, although I was glad to have the equipment with me in case events broke so that I could not reach a hotel, or the spirit moved me to pitch tent in some little neck of the woods.

Wallingford, Meriden and Hartford occupied my time until long past the noon hour on the second day, the afternoon being spent in trip to Springfield, and a call on a couple of dealers in that city. From Springfield I headed east for Worcester and Boston, and took the night boat out of Boston for Portland.

Where the Sport Came In

Then the real sport began. So far, except for the clean joy of riding, I had confined my efforts to business, pure and simple. But now it was different; I made the business subservient to the pleasure; pitched my tent when I felt like camping and loafing; fished when I felt like fishing, and tended to business when I reached a town or city of a size to boast of a motorcycle agency.

It took me two weeks to make a loop embracing Portland, Brunswick, Rockland Breakwater, Bar Harbor, Penobscot, Dover, Newport, Augusta, Poland Spring, and back again to Portland, and those two weeks spent out in the open were about the most pleasurable I ever put in.

The Second Loop

From Portland, I again started out, following the jagged Maine coast line as far south as Portsmouth, and then bending westward by a tortuous path to Concord, N. H. From Concord I turned north, striking the trail for the White Mountains, camping out all the time and moving ahead only fast enough to vary the scenic panorama to suit my changing moods.

At Bretton Woods I again changed my direction, turning westward and bending over through St. Johnsbury, Vt., on the road to Burlington. From Burlington the

homeward journey began; but it was a slow and enjoyable one. I came down through the Green Mountains, crossing from Vermont back into Massachusetts again, and from the Bay State into Connecticut, and thence back again into the good old Empire State.

The entire trip took close on to seven weeks; but, of course, I could have covered it in well under two had I been out for that sort of speed work. I do not think that another course could be laid out anywhere in the United States that could surpass this one for scenic beauty, and, while not all of the roads were flawless, and some were far removed from that happy state, I did not encounter one patch that my Cleveland was not fully capable of pulling through, nor a single grade that I could not get up without undue difficulty.

Showing both machine and tent covered down for the night.

CREVISTON TAKES PRO. RACES AT FT. WORTH

Indian Rider From Indianapolis Sets Hot Pace and Bags Six Out of Seven Events on Texas Track

FORT WORTH, Tex.—Ray Creviston, the Indian speedster from Indianapolis, was the star performer at the meet of the Fort Worth M. C. at Fair Park on Oct. 22. "Crevvy" was victor in the two, three, four, 10 and two-mile special events, and also best in the attempt to lower the track record of 1:09. Al Hilliard, on an Excelsior, captured the five-mile race, which came fourth on the card.

In the opening two-mile race Creviston covered the distance in 2:24, with Dave Kinney, of Chicago, also on an Indian, second, and Al. Hilliard, Fort Worth, Excelsior, third. The order of finish of the next event, a three-mile race, was Creviston, Kinney, Hilliard. Time, 3.39½.

In the four-mile event Creviston crossed the tape in the lead, followed by Kinney. The time was 4:55. Sam Correnti, of Dallas, Harley-Davidson, came in third. In the five-mile event which followed Creviston led for four laps, but withdrew by reason of motor trouble. Hilliard, running second, took the lead at this and was never headed. Correnti came in second, with Glen Stokes, Excelsior, third. Time, 6:11.

Creviston next set out to lower the track record made by Louis Disbrow with an automobile. "Crevvy" made the mile in 1:09¾, just three-quarters of a second more than the 1:09 figure of Disbrow. In the two-mile race, which came next, Ray again took first place, with Hilliard second and Correnti third. Time, 2:25.

The 10-mile final saw Creviston as winner, Hilliard second man and Correnti third. Time, 12:06. Several thousand spectators witnessed the events, and the meet was considered the best ever seen in Texas for a long time.

JAMAICA M. C. MEDAL

Is Awarded to H. M. Pember After Long Delay

JAMAICA, N. Y., Oct. 30.—The much-disputed question of the winning of the Jamaica M. C. Spring Run, of May 21, 1916, has at last been settled by the club's competition committee and the award of a bronze medal for a perfect score has been made to Harold M. Pember. Pember, who is from Connecticut, is the only rider to receive his award.

The committee states that the long delay was the fault of the F. A. M., and to date, the club has not heard from the national Competition Committee with regard to the matter of awarding the medal. The referee, J. H. Mahoney, was not able to make a decision following the completion of the affair and referred it to the national body, accordingly. The award to Pember has been made after all results had been carefully gone over in accordance with the rules stated on the official entry blank for the Spring Run.

FOUR FINISH RUN

Quartet Come in Within Limits in McKinley Club Contest

CHICAGO, Ill.—Four of the 13 entrants finished within the time limits in the run to Knox, Ind., of the McKinley M. C. on October 24. They were George Reuther, Herman Reichert and Roy Patterson, all on Harley-Davidsons, and John Reuther, Indian. The finish was in the order given. No perfect scores were obtained by any of the finishers.

SIDECAR CLUB CLOSES SUCCESSFUL SEASON

Short Run and Hallowe'en Party Are Final Events of Windy City Three-Wheeler Organization

CHICAGO, Ill.—The Chicago Sidecar Club held the last run of the 1916 season on October 22, the trip being just a short one into the country. Hot coffee was served free to all participants, the ladies in the club acting as cooks.

The Hallowe'en party held on October 29 was well attended, and all hands enjoyed themselves with the usual sports for that occasion. The club will attend in full force on the Wednesday night of the forthcoming Chicago motorcycle show.

WILSON IS WINNER

In Tucson 50-Mile Race on Eight-Valve Indian

TUCSON, Ariz.—Ellie Wilson, riding an eight-valve Indian, won the 50-mile race at the Southern Arizona Fair on October 26. His time was 48:16. Bill Cox, Harley-Davidson, was second in 53:48, while Frank Barnett, Harley-Davidson, came in third in 55:00. The meet was held by the Tucson M. C.

There were eight entries: Wilson, Barnett, Cox, O. D. Robinson, Harley-Davidson; Frank Lind, Harley-Davidson; Harry Crandall, Indian; L. S. Hedges, Excelsior and Art. Schutz, Henderson. Tires and plug troubles accounted for several during the race.

Don Johns, riding an eight-valve Indian, went out after his own track record, and covered 4.3 miles in 3.22, a speed better than 80 miles per hour.

CURTAINS DRAWN AT NEWARK TRACK

Last Meet of Season Produces Good Racing—Australian Piercey Runs Away in Final Ten-Mile Event, and Wins by Almost a Lap

NEWARK, N. J., Oct. 30.—After the finish of the ten-mile open at the Velodrome yesterday afternoon the curtains at the local track were drawn for the season, which, despite the bad start, was fairly successful as a whole. In all about 40 meets were run and during the last three months not a postponement was registered, but enough meets were called off earlier in the season to discourage almost any promoter. The local promoters, however, continued to run and the good run of weather in the latter part of the season was their reward.

The conditions governing the ten-mile open was that any teaming between two riders was permissible, but that teams of over two riders, or "trains" as they are called in race track lore, was taboo. Rough work of any kind was also out of the order, and stalling was another near crime that could not be used.

Race Finish Spoiled

The race was spoiled of a good finish by the fact that Charles Piercey, the Australian, and Tommy Smith, the localite, stole away and opened up a gap of a half lap. Smith tired toward the end of the race and Piercey went on alone, and with the aid of Lloyd Thomas and Ray Eaton, who dropped back and picked him up, he gained a full lap. The action of Thomas and Eaton was not according to Hoyle and it brought down the wrath of Manager Chapman onto their heads and dire threats from the manager were made against the pair.

The battle for second money was the most interesting part of the race. With Alfred Grenda and Alfred Goullet only two points apart in the contest for the second honors in the all-around championship, and a difference of $100 in second and third places in that contest, the battle was a good one. Grenda copped second place and three points and by so doing beat out Goullet for the $300 that went to second man in the all-around titular contest by the scant margin of one point. Third honors in the title race called for $200 and Goullet collected that. Jake Magin finished third, Fred Hill fourth, Menus Bedell fifth and Frank Corry sixth in the ten-mile.

Riders Take to Teaming

The suspension of the no-teaming rule in the ten-mile race put the teaming bee into the other professional riders earlier in the day. Hans Ohrt, last year's amateur champion, gave Fred Hill, Boston, 80 yards, one of the finest "pulls" in the one-mile handicap for the cash-chasing class and the Boston man won handily. John Bedell, 80 yards; Willie Hanley, 40 yards, and Jake Magin, 20 yards, trailed him home in that order.

The big feature advertised for the final day's racing was a one-mile team match between Reggie McNamara and Bob Spears,

Frank Mihlon, Newark Promoter, Who Retires From Cycle Racing

the Australians, and Frank Kramer, the champion, and Alfred Grenda, another native from Australia. In the first heat Grenda took the lead early in the race and to many it looked as though he went too far, as Kramer weakened when McNamara and Spears tackled him and the Australian team finished first and second, Spears being the winner. Considerable jockeying was indulged in by the riders in the second heat, but when it came sprinting time McNamara led Spears and Kramer over the tape, and cinched the match for his team.

By taking the one-third-mile open for the amateurs Amateur Champion John L. Staehle passed William Spencer, the Toronto rider, now a professional, in the points table for amateurs. Staehle has a total of 71 points to 70 for Spencer. Harry Hoffman, the San Francisco rider, won second honors in the open race, while Chris Dotterweich and Harry Horan, Newarkers, finished third and fourth, respectively, in a close finish.

Steve O'Panowicz, 210 yards, won the two-mile handicap for the amateurs, from Frank Small, Acme Wheelmen, 200 yards; C. V. Markey, Passaic, 220 yards, and Tommy Fitzsimmons, Bay View Wheelmen, 70 yards.

BROOKS BACK FROM SOUTH

NEW YORK, Oct. 31.—Charles Brooks, formerly connected with the 20th Century Mfg. Co., and now working in the interests of the Perlman Cycle Co., of this city, has just returned from an extensive southern trip. Brooks' trip carried him to the stores of most of the cycle dealers located south of the Mason and Dixon line and he brought back a tale of southern cycle prosperity backed up with orders, that augurs well for the coming season.

GT. WESTERN IN PITTSBURGH

PITTSBURGH, Pa., Oct. 31.—The Sportsmen's Supply Company, has taken the exclusive agency for the distribution of Crown bicycles, made by the Great Western Mfg. Co., La Porte, Ind., for this city.

CYCLE PROMOTER FRANK MIHLON RETIRES

Withdraws from Racing to Retire to His Farm—Started in 1909 and Has Built Tracks and Promoted Races in Various Cities

NEWARK, N. J., Oct. 31.—Frank Mihlon, the local cycling promoter, announced his retirement from the cycle-racing game at the finish of the season's final meet at the Velodrome on Sunday last. Mihlon's reasons for retiring are not given, except that he stated that he did not want anything to do with the six-day races that are being planned and that he desired to retire to his farm at Belmar, which he only recently purchased.

Before taking to the cycling game Mihlon was as the proprietor of a big Market street cafe, and he continued to run the business for a few years after he launched into the promoting business in 1909. He began as a cycling promoter at the old Velodrome, across the street from the present structure, he being associated with John M. Chapman, who was the manager and is the present incumbent of that position at the present track.

During 1910 tracks were constructed through Mihlon's support at Lighthouse Point, New Haven, Conn.; at Providence, R. I., and he and the Cycle Racing Association, of which he is president, were associated with Nat Butler, the old rider, in the running of the Revere Beach track, Boston. He and Inglis M. Uppercu control the stock of the Cycle Racing Association, and Mihlon states that Uppercu will have first chance to buy him out should be desire to do so.

BENDI WINS C. R. C. OF A. ROAD RACE

Plenty of Excitement Marks Running of Postponed Race—Marquart Is the Time Prize Winner—Unione Sportiva Italiana Takes the Goodrich Team Honors

NEW YORK, N. Y., Oct. 30.—E. G. Bendi, a member of the Acme Wheelmen, riding from the liberal handicap mark of three minutes, captured the ten-mile handicap road race promoted by the Century Road Club of America, New York division, over the Pelham Parkway course yesterday. His time was 27:01. This race was originally slated for June, but owing to accidents the event was postponed until yesterday.

There was considerable trouble at the start and at the meeting of the Inter-Club handicapping committee. The trouble was over the handicap allowed Bendi, and the ones opposed to allowing him such a liberal mark no doubt were justified in kicking by his showing. There were a few spills as well and in making the turns Louis Hartman, George Laux, Marcel Burger and several other riders suffered the loss of plenty of cuticle.

Seventy-three Start

Seventy-three riders started out of an entry list of 86 riders and the race was a hot one all the way. The long mark men took advantage of their marks and the scratch men came near being beaten out for the time prize by their loafing tactics. The first bunch to come home came in in a blanket, with Bendi beating out Max Halpern, Thomas La Rossa and Richard Olsen, all three minute men, and a big fleet of other long markers.

John J. Marquart, C. R. C. A., defeated the scratch men for the time honors in the sprint. Harry Hoffman, San Francisco, riding his first Eastern road race, won second time prize and Eugene Aickelin, New England Wheelmen, copped third time prize. Nelson Johnson, U. S. I., who met with a painful accident three weeks ago, surprised everyone by starting and finishing back of Aickelin, taking fourth time prize by his efforts. Marquart's time was 26:43 2/5.

U. S. I. Gets Honors

The contest for the Goodrich team honors was a good one and the Unione Sportiva Italiana won with 36 points. Riders from that club finished in third, fifth, seventh, eighth and thirteenth places. Second lowest score was that of the C. R. C. A, which was 44 points, while the Acme Wheelmen scored 81 and the Empire City Wheelmen 157.

The trophy donated by the Westfield Manufacturing Company, for the club having the greatest number of entries, was taken by the Unione Sportiva Italiana with 25 starters. The C. R. C. A. had 14 riders in the race and the Acme Wheelmen entered 11.

FIRST 15 FINISHES IN C. R. C. of A. RACE

Name.	Club.	Hdcp.	Time.
1—C. Bendi,	A. W.	3:00	27:01
2—Max Halpern,	C. R. C. A.	3:00	27:01⅕
3—Thos. La Rossa,	U. S. I.	3:00	27:01⅖
4—Richard Olson,	H. C. W.	3:00	27:01⅗

NEW TRACK FOR 'FRISCO

SAN FRANCISCO, Cal., Oct. 23.—Frank Carroll, local manager for the Goodyear Tire Co., has been making efforts to have a quarter-mile cement bicycle track built in the Golden Gate Park Stadium. The proposition is in the hands of the park commissioners, and it is expected that action on the project will be taken by that body in the near future.

HOT FINISHES IN BAYONNE CONTEST

Chas. Hansen and James Flanagan Show Best in Hudson County Wheelmen's Races—Flanagan Point Man

BAYONNE, N. J., Oct. 30.—Some of the best finishes of the season were seen in yesterday's races of the Hudson County Wheelmen, over the Boulevard course. The first race was a 10-mile handicap, and good speed was shown from beginning to end by the riders.

J. Flanagan riding from scratch, was the star of the event, and rapidly overtook rider after rider, until it appeared that he would lose to John Fargo who was leading him to the tape, but Flanagan made a last desperate plunge and fairly hurled his wheel across the line a few inches ahead of Fargo in 28:53 3/5. J. Fargo with 7 seconds handicap was second with actual time of 29:04 4/5; C. F. Hansen, 20 seconds, was third in 29:14; H. Keatz, 40 seconds, fourth with 29:34 1/5, and H. Klotz, 50 seconds, won fifth place in 29:44 2/5.

The mile open furnished the best finish of the series of races, Charles F. Hansen coming in first with a flat tire in 3:55. J. Flanagan finished second, and J. Fargo, third.

The one mile unpaced was won by J. Flanagan in 2:33, and L. Mahieu, second, in 2:39 2/5.

The point standing of the first nine riders is as follows: J. Flanagan, 100; R. H. Olsen. 75; Arthus Neminsky, 46; Louis Mahieu, 36; T. Flanagan, 35; H. Klotz, 34; C. F. Hansen, 31; J. Carey, Jr., 27; H. Keatz, 22.

BAY VIEWS HOLD RACES AT WOODBRIDGE TRACK

WOODBRIDGE, N. J., Oct. 30.—Members of the Bay View Wheelmen, of Newark, held their weekly race meet at the half-mile track here yesterday morning. Robert Benwell won the one-mile open from William Keller, Larry Smith, Harry Siefert, Bob Henderson and William Weimer in that order. The time was 4:13 1/5. In a three-mile handicap Benwell won from scratch, beating Keller, 5 seconds; Smith, 5 seconds; G. Klugel, 5 seconds, and Eugene O'Mara, scratch, in the order named.

Three match races were also run at the track. Bob Henderson won in straight heats from Alfred Young in a match, while George Brindle defeated Walter Albright in the Brassard race. In the Brassard race of a week ago, which had been postponed on account of the century run, Brindle defeated Eddie Eppinger.

CYCLISTS TO RIDE TO SIX-DAY RACE

NEWARK, N. J., Oct. 31.—Lloyd Thomas, Percy Lawrence and Harry Kaiser, three of the cyclists entered in the coming Boston six-day race, which starts Monday, Nov. 6, left here at 9 a. m. this morning to ride to the scene of the "little grind" on their bicycles. The trio expected to pick up Tom Bello and Clarence Carman in New York City, and their itinarary will probably bring them into Boston Thursday night, Nov. 2.

The other cyclists that are engaged for the Boston race will depart with their trainers for the above city Thursday night. The track will be finished on Friday and they will have an opportunity to have at least two days of training on the new track. Manager John M. Chapman left tonight for Boston, where he will be associated in the management of the race along with Nat Butler and Alex McLean.

At the last minute it was decided to add the Spencer brothers, Arthur and William, of Toronto, to the list of teams. This will make 11 teams in all and a larger field than ordinarily starts in the annual race.

LAST RACE FOR MEET FOR SALT LAKE CITY

SALT LAKE CITY, Utah, Oct. 27.—Last Sunday morning the Wright Cycle Club held its last race meet of the season at the Liberty Park track. The feature of the meet was thefive-mile Intermountain championship, which was run on the so-called Berlin system, with a sprint staged every lap of the big mile and a quarter track.

Herchild Eldrege, a promising young rider, won the first and fourth sprints and piled up a total of 22 points. Lawrence Reed finished second with 19 points, while Elden Schofield finished third with 11 points. William Pfister, 7 points, and Gerald Thatcher, 6 points, ran fourth and fifth, respectively. In a match race at one mile Pfister defeated Eldrege.

CHAMPION KRAMER AT A WEDDING

EVANSVILLE, Ind., Oct. 31.—Frank Kramer, American cycling champion and a native of this city, arrived here last night from Newark, N. J., to attend the wedding of his cousin.

MOTOR BICYCLE AGENCY

COLUMBUS, O.—L. P. Birkenbach & Co., East Long street, Columbus, have signed up to handle the Dayton Motor Bicycle in Franklin county during the coming season.

Digitized by Google

ELEVEN MODELS IN INDIAN BICYCLE LINE

(Continued from page 19)

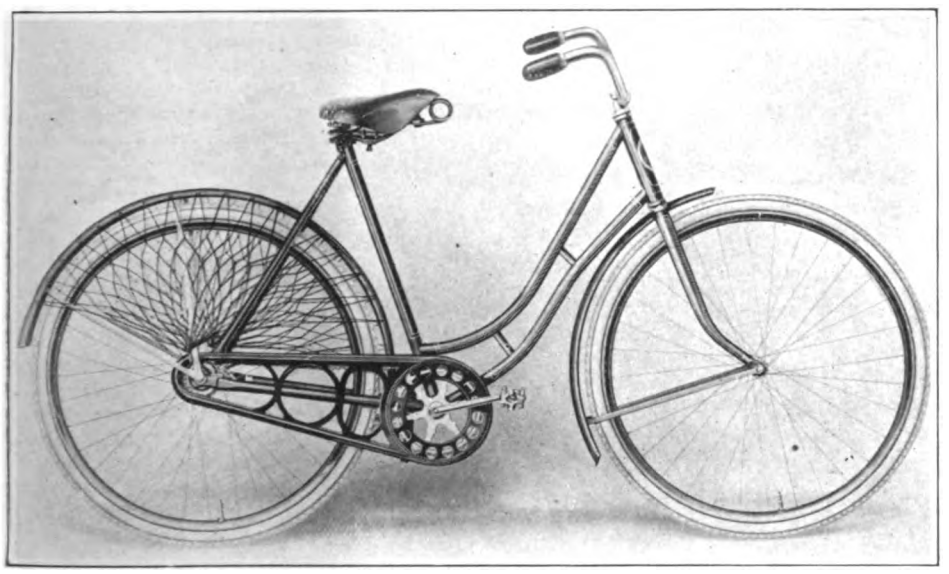
Model 31, the Moto-Bike has a 21-inch frame, Fisk Cord Nonskid tires, Troxel No. 2 Moto-Bike saddle, Standard No. 4 pedals, Austin frame pump and new rear wheel stand. Grips are Rough Rider type. The other equipment is the same as Model 30. List price is $40. Options: 19-inch frame; Goodyear Blue Streak or U. S. Chain Tread tires; 81 gear, Morrow or New Departure brake. Sturmey-Archer three-speed hub at $3.75 and luggage carrier at 45 cents, offered as extras.

Electric Moto Bike

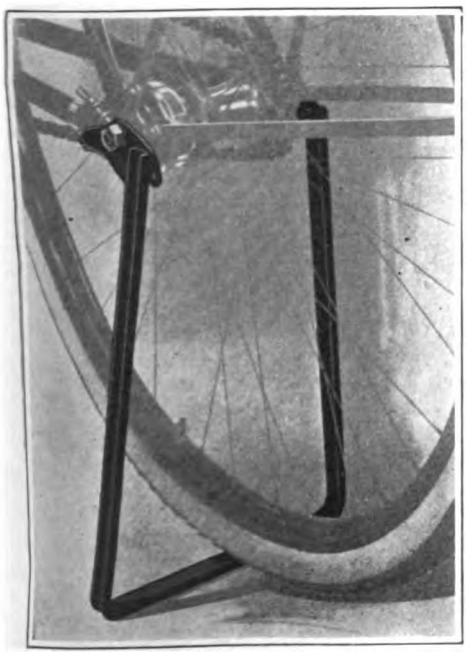
The electrically equipped Moto-Bike Model 32 has the same equipment as Model 31 and in addition has battery tank to carry two No. 6 dry cells; Old Sol No. 6 headlight. Price is $45. The same options and extras are offered as for Model 31. It is to be understood that the dry cells are not furnished with this machine.

Model 33, the Speedway, is a fast machine for the road. The frame is 22-inch, with special Indian fork. Tires are U. S. Road Racer. An 84 gear ratio, 24 tooth front and 8 tooth rear sprockets being fitted. A 3/16-inch pitch roller chain is supplied. The saddle is a Troxel racer. The wheels are built with Diamond E spokes 0.056; rear hub plain racing type with front to match. Special racing bars are fitted, and Star racing pedals and grips. A toolbag is part of the equipment as is also an Austin frame pump. Price is $45. Options: 20-inch frame and Pye-Musselman tires. No extras.

The ladies roadster, Model 34, is black in finish and has a 22-inch frame. It has the regular Indian fork, Fisk Premier Gripfast tires, Corbin coaster brake, Wearwell grips, Troxel suspension saddle, 22-inch reversible handlebars, and an improved one-piece hanger with 6½-inch cranks. The gear ratio is 68, with 22 tooth front and 9 tooth rear sprockets. Standard No. 2 pedals with rubbers are fitted. The toolbag is a Troxel. Price is $35. Options: Indian red with double gold stripe finish; Goodyear Blue Streak tires; New Departure and Morrow coaster brakes. Extras are: Rear wheel stand, 45 cents; luggage carrier, 45 cents; Sturmey-Archer three-speed hub, $3.75 net.



Model 34 Ladies' Roadster Which Is Coaster Brake Equipped for 1917

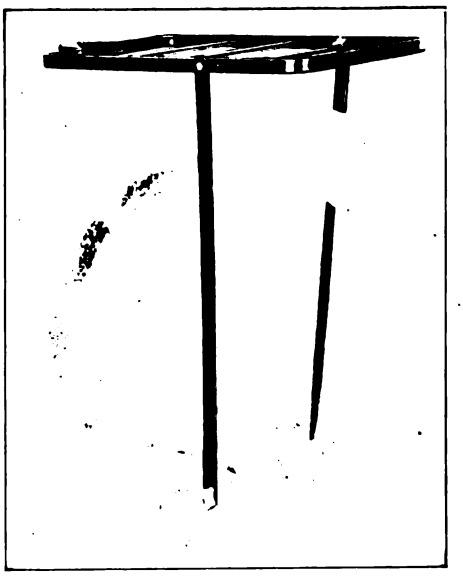


Improved Rear Stand

Juvenile Models

Model 35, boys 15-inch frame and Model 36, girls 15-inch frame have the same specifications as in the corresponding 1916 models, but have coaster brake and are without guards. They list at $26. Models 37, for boys, and 38 for girls, both with 16-inch frames, have similar specifications to models in 1916, but have front and rear guards and coaster brakes. Each model lists at $28.

Model 39, boys 18-inch frame has the same specifications as the same model last season, but has coaster brake and rear and front guards. It lists at $30. The girls' machine with 18-inch frame, Model 40, lists at $30, and has the same specifications and the 18-inch frame girls' model of last season. It, however, has front and rear mudguards and a coaster brake.



Indian Luggage Carrier

A XMAS FOLDER

Offered to Dealers by the Buffalo Metal Goods Company

FOLLOWING out its usual policy of giving the dealer practical co-operation, the Buffalo Metal Goods Company, Buffalo, N. Y., is announcing an attractive folder in colors which tells the story of the bicycle as a Christmas gift, and as a holiday business-builder for the agent. The Buffalo Metal Goods Company believes there is a big opportunity for dealers in the Christmas trade, and is putting out the new folder to back up this belief.

Dealers are invited to make application for the Christmas folders, stating how many they wish to use. The dealer's name will be printed on each folder.

An attractive leaflet issued by the Buffalo Metal Goods Company is now being sent to dealers to introduce the Christmas sales idea. The cover has a holly wreath and other holiday tokens.

BERWICK, PA., STORE REMODELED

BERWICK, Pa., Oct. 30.—Harry Brothers, local cycle dealers, have remodeled the basement of their store. The color scheme is white and the basement is given over to the display of bicycles, parts and sporting goods.

ACTIVE BICYCLE BUSINESS

LOUISVILLE.—The Sutcliff Co. reports an unusually active fall business in bicycles, and states that the summer just passed was the best experienced by the firm on bicycle sales for several years.

DRAPER ON TOUR

SANTA CRUZ, Cal.—L. E. Draper, of this city, is touring Southern California in a little vehicle of his own design, made from motorcycle parts. The powerplant is an Indian motor. After touring the South, he will take a short trip northward before coming back home.

McNAMARA LANDS ALL-AROUND TITLE

Australian Holds Commanding Lead in Contest—Grenda Takes Second and Goullet Third—Staehle Leads the Amateurs in the Final Reckoning

NEWARK, N. J., Oct. 30.—With the finish of the racing season for 1916, which marked the closing of the Velodrome yesterday, the tussle for the all-around championship for the cyclists competing at the local track, was brought to a close. The all-around title brought the winner $500, while second man drew down $300 and third man $200.

Reggie McNamara, the strong Australian, by taking eleven races, a like number of second places, ten thirds and four fourth places carried off the $500 with 112 points. Second place went to Alfred Grenda, another Australian, who had garnered 63 points by finishing first five times, running second seven times, ran third five times and landed seven fourth places. One point back of Grenda was Alfred Goullet, now of Newark, who had won nine races, three seconds, three thirds and two fourths.

Kramer Had Big Lead

Frank Kramer, the National champion, who had a commanding lead earlier in the season, finished fourth with 55 points. Jake Magin was two points back of Kramer, while Bob Spears and John Bedell tied with 32 points. The standing of the first ten is given below:

	1st	2d	3d	4th	Pts.
McNamara	11	11	10	4	—112
Grenda	5	7	5	7	— 63
Goullet	9	3	3	2	— 62
Kramer	10	1	0	2	— 55
Magin	4	6	6	3	— 53
Spears	4	2	3	0	— 32
J. Bedell	1	6	3	3	— 32
Piercey	5	0	2	1	— 30
Madden	2	2	4	1	— 25
Hanley	1	2	4	4	— 23

Staehle's Win Is Close

After holding the lead in the points table all the year William Spencer had his points leader crown taken from him on the last day. Spencer, who is now a professional, had 70 points, which he collected by winning ten races, finishing second three times, third three times and fourth five times. Amateur champion John L. Staehle was four points back of the Toronto rider, but by taking the third-mile open yesterday he assumed the lead by one point. Staehle had won eleven races, finished second in four and third in two.

Tom Bello, the Brooklyn Italian, landed third place with 60 points. Lang was fourth with 48 and Carroll fifth with 39 points. The standing of the first ten riders is as follows:

	1st	2d	3d	4th	Pts.
Staehle	11	4	2	0	— 71
W. Spencer	10	3	3	5	— 70
Bello	8	5	1	3	— 60
Lang	5	5	3	2	— 48
Carroll	4	2	6	1	— 39
Byron	3	4	2	5	— 36
Fitzsimmons	1	6	1	7	— 32
Hoffman	1	4	5	1	— 28
Dotterweich	1	3	5	2	— 26
B. O'Sicky	1	4	2	3	— 24

USES SMITH MOTOR WHEEL FOR MANY PURPOSES

FARGO, N. D., Oct. 26.—Mr. Herbert Emmons and family, of this city, are seen just starting off for the motorcycle picnic given by Fargo Motorcycle boosters recently. The youngsters enjoy riding in the trailor and the motor wheel easily pulls the whole family. This a gala occasion for Mr. Emmons' outfit.

When not on dress parade, you will see it every day delivering parcels for the Emmons laundry. The entire output of the laundry is taken care of by this outfit, and Mr. Emmons says "It is a much cheaper and quicker method of delivery than either horse or auto and I would not be without it for a moment."

PIERCE CYCLE COMPANY ADDS BOYS' RACER

A New Addition to Extensive Line Which Promises to Be Popular with the Younger Lads Is Listed

BUFFALO, N. Y., Nov. 1.—A new model —the Boys' Racer—has been added to the already fine line of Pierce bicycles. Vice-President and Sales Manager Fred L. Brown made the announcement and he says that it will prove to be a most popular model with the younger folks.

The new model is a real boys' racer. It has a good drop at the hanger, with short rear stays and short fork sides and the newest addition to the Pierce line looks the part of a racing bicycle. Art Anakin, of San Diego, Cal., is sponsor for the new model, the idea coming from his long experience in the bicycle business. When Fred Brown was on his last trip to the Coast the plans were turned over to him by Anakin.

That the new model will be in popular demand goes almost without saying. Orders for eight boys' racers have already been received from M. Pette, Denver agent for the Pierce line. While on his trip Brown called on many of the dealers of the West who report plenty of prosperity and many orders for 1917 bicycles.

WANTS BICYCLES FOR PORTUGAL

NEW YORK, N. Y., Oct. 24.—That there is an opening for considerable sale of American bicycles throughout Portugal comes in a communication from Moura & Co., 73 Rua De Liceiras, Oporto, Portugal. This concern names American references and is desirous of getting in touch with American bicycle manufacturers desiring to enter the Portuguese trade.

AFTER UNLIGHTED CYCLES

ATTLEBORO, Mass.—The police of this city have just started a vigorous crusade against the riders of bicycles not provided with lights. In the future, prosecutions are liable to follow if riders have no front and rear lights. The lamps must be lighted 30 minutes before sunset and until a half hour before sunrise.

CYCLE RACING NOTES

CHARLES DERUYTER, the Belgian, won the 130-Kilometer (81¼ miles) road race run from Nice, France, through Cannes and return, which was held Sunday, Oct. 8. Deruyter won from Valentini, the Swiss, in the sprint. Over 50 riders participated and 35 of them finished. The time was 4 hours and 58 minutes.

GEORGE WILEY, the Syracuse cyclist, never did like six-day racing, and at times he has balked at the last minute and refused to ride in some of them. Wiley is booked to ride the Boston six-day race next week and he says that he is surely going to ride. Four riders are reported as ready to go to Boston racing outfits and all ready to take Wiley's place in this one, but "Gloomy Gus," as he is called, says he will fool them.

When you place your next order for Bicycles

The question of brake equipment has been answered for you—

Answered by the experience of those Dealers who for years have specified

THE NEW DEPARTURE COASTER BRAKE

exclusively

And more than that, the New Departure is the brake that these far-sighted Dealers carry in stock for all repairs and replacements.

For beauty of finish, for accurate workmanship, for durability and reliability and freedom from complicated parts and adjustments the New Departure appeals to every cyclist.

These features, plus the long service life and the guarantee that's back of it, has made the New Departure the choice of millions of riders.

More than all that, our Sales and Advertising Departments are constantly at work in your behalf, creating interest in bicycling and upbuilding the bicycle business in general. Here's something to think about.

Ask us for complete details.

Prest-O-Lite

Photographs, courtesy of Harley-Davidson Motor Co.

You Need This Brilliant Dependable Light

Good light is of vital importance to every motorcyclist. The operation of a motor-cycle is such that the rider must have a clear vision of what is directly ahead. In daylight this is easy, but at night it's different. The rider needs a light that is brilliant, penetrating and gives him perfect vision of the road ahead. Prest-O-Lite gives you all this and more. It is very convenient—always dependable—and will never fail you in a "tight" place.

Because of these fundamental points of excellence, Prest-O-Lite is the choice of experienced riders the world over. Thousands of municipalities owning motor-cycles use nothing else in their departmental service.

Easily Attached to Any Motorcycle

On any motor-cycle you may buy you can get Prest-O-Lite. Your dealer can make you up a very attractive equipment combination that includes "Prest-O-Lite, a good lamp and a mechanical horn," at a very conservative price.

See that you get Prest-O-Lite. Its initial cost is small—its upkeep expense is trifling.

Write for our free motor-cycle lighting booklet.

DEALERS—There's a good business for you in handling Prest-O-Lite in your locality. Write for our dealers' proposition today.

Varied Activities of the Dealers

KOEHLER-WAECH HEAD MILWAUKEE SYCLE CO.

Pioneer Motorcycle Firm Makes Changes in Organization—R-S Agent Oversees Repair Department

MILWAUKEE, Wis., Oct. 31.—A decided change in the organization of the Milwaukee Sycle Sales & Supply Company, Seventh street and North avenue, is a surprising bit of news handed out to local motorcyclists. J. J. Koehler, manager of the concern, announces the resignation of W. E. Barnhardt, Ben McGinnis and W. J. Rosey and the installation of Adolph Waech as head of the repair department. Koehler retains charge of the sales department of the concern.

The Milwaukee Sycle Sales is one of the oldest motorcycle firms in town and up to this time has been doing an extensive jobbing business in bicycles and tires. During the last two years it took on the agency for a low priced car, but this has been discontinued and Manager Koehler states that the local concern hereafter will devote its time and efforts exclusively to bicycles and motorcycles.

Just what make will be handled Koehler refused to state, but he said that when he was ready to announce the product to be pushed by his concern it would occasion another surprise. At the present time Waech controls the selling rights of the Reading-Standard which automatically reverts to the Milwaukee Sycle Sales & Supply Company with Waech's joining that concern. On Koehler's negotiations with a certain factory depend whether the R-S will be an orphan temporarily or headliner with Koehler-Waech combination for 1917.

COUGHLIN SELLS 25

Hendersons in Bronx and Orders Some More

BRONX, N. Y., Oct. 30.—Gene Coughlin & Company, of 922 Washington avenue, has just sold their twenty-fifth Henderson since taking the agency two months ago. They have ordered 25 of the 1917 models in addition to the first allotment.

The recent enlargement of the Coughlin place now gives the establishment a frontage of 61 feet. The southern portion of the store is given up to the office and show room, while the original part is the storage and repair section. The Coughlin shop is busy these days with repair work on all models of machines.

"EVERYTHING ON WHEELS"

HUTCHINSON, Kan.—C. N. Brown, of the Hutchinson Novelty Works, and distributor of Excelsior motorcycles, is one man in this section who can boast of selling almost everything that travels on wheels. In addition to handling the Excelsior line Brown sells bicycles, tricycles, pushmobiles and several other varieties of small wheeled vehicles.

Brown recently remodeled his shop and now has more space for repair work. He is getting this work rapidly, which was a prime reason for the enlarging.

TOUR TO SHOW

Glenn Scott, of Marion, Lines Up 19 Riders to Visit Chicago

MARION, IND.—Glenn A. Scott, Harley-Davidson dealer here is arranging a touring party of riders who will pilot their machines to the National Motorcycle, Bicycle and Accessory show at Chicago during the week November 13-18. Scott has already lined up some 19 riders who have signified their intentions of joining the tour and expects to have two dozen at least before the party actually starts.

This is the second Chicago show tour which Scott has organized. Last year he piloted a party of nine to the Windy City exhibit, and subsequently sold seven of the nine new Harley-Davidson machines. Here's a live tip for motorcycle dealers who are located within riding distance of either the (big) Chicago or New York exhibitors.

SELLING 'EM TO THE FARMERS

PRATT, Kan.—William Stranahan, distributor for Harley-Davidson motorcycles in this part of the State, has received his 1917 demonstrator and has already closed several sales with farmers.

Ed Sobba, Indian dealer in Pratt, is laying plans to open a new shop at an early date. He will stock a big supply of parts and handle bicycles, too.

COOK IN NEW HOME

Fort Worth Harley-Davidson Firm in Larger Quarters

FORT WORTH, Tex.—The J. W. Cook Motorcycle Company, handling the Harley-Davidson in this territory, is enjoying such an active trade that it is branching out and is compelled to seek new and larger quarters. The firm has just moved into new salesrooms at 607 Commerce Street, and the new place is said to be the finest on motorcycle row.

A large repair shop in which skilled mechanics are on the job at all hours is operated. President J. W. Cook reports that sales of motorcycles were unusually heavy this summer.

ATTRACTIVE SHOW WINDOWS

DENVER, Colo.—The windows of the Mead Autocycle Company, representing the Excelsior, is attracting lots of notice these days. The first floor windows contain flowers, while on the second story the windows have several Excelsiors amid banks of blossoms.

SHIPMENT FOR KUNCE

DENVER, Colo.—Kunce & Son, representing the Harley-Davidson, have received a shipment of 1917 models from the Milwaukee factory and are busy demonstrating and selling the contents. The Kunce prospect list is getting to be about as much as the firm can handle.

GETS POPE SHIPMENT

DENVER, Colo., Oct. 27.—J. M. Kimbel, Pueblo, Colo., agent for the Pope, has just received a shipment of those machines. Business is reported good at the Pueblo Pope store.

Service a Big Factor In Neal's Business

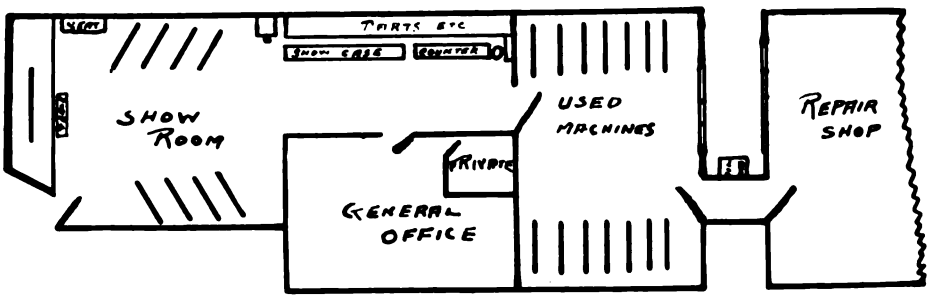
Liberal Work Allowance Makes Customers, While Handling Reputable Goods and Discounting Bills Are Other Success-Making Factors, Says Buffalo Dealer

By GEORGE W. GRUPP

BUFFALO, N. Y.—"Success in handling motorcycles depends upon a number of factors," says Ben Neal, of the firm of Neal, Clark & Neal, Indian representatives in Buffalo. "All these factors co-operate in making the prospect a customer and in keeping him a customer. And in keeping a man's trade, you can make a friend of him and that counts a big lot.

"Our firm, for example, attributes the giving of real service as a vital factor in its success in business," continued Neal, who is a college graduate and noted in Buffalo as a keen business man. "We agree to give the customer ten hours of free labor on each new machine, thus offsetting any arguments as to guarantee. Next, we only handle goods which are backed by companies who have proper financial responsibility, and this is another strong factor.

"We also make it a point to carry a large stock of motorcycles and parts in order to make a proper display and assure prompt deliveries. The service idea is thus further carried out. We discount all our bills, too, and we make our place of business inviting."



Plan of Neal-Clark & Neal's Establishment Showing Arrangement of Departments

Ben Neal, is the "big works" in the motorcycle department of Neal, Clark & Neal. He is typical representative of of the personnel of that house. When you enter the place, Ben is right at hand with a cordial welcome, but that is not all—the store itself has the air of making the visitor at ease, even if Ben were not at hand.

"We believe in light walls and ceilings," says Ben, with regard to the premises, "for one's wares are then better displayed. It gives a more cheerful aspect to the store and incidentally puts the customer in a more cheerful frame of mind. All our floors are maple and as smooth as a dance-hall's. We shellac them frequently to keep them looking nice. Nothing is more undesirable than rough, untidy show-room floors. They scare people away."

Time-Saving Arrangement

The work of filling orders across the counter has been much simplified in this establishment. Neal has had a row of cases built to order for the purpose. In the main case are 1,250 different compartments; in the sub-case are 250 compartments and in a revolving case are 200 compartments. All compartments are labeled, and on each label is the name of the part and its price.

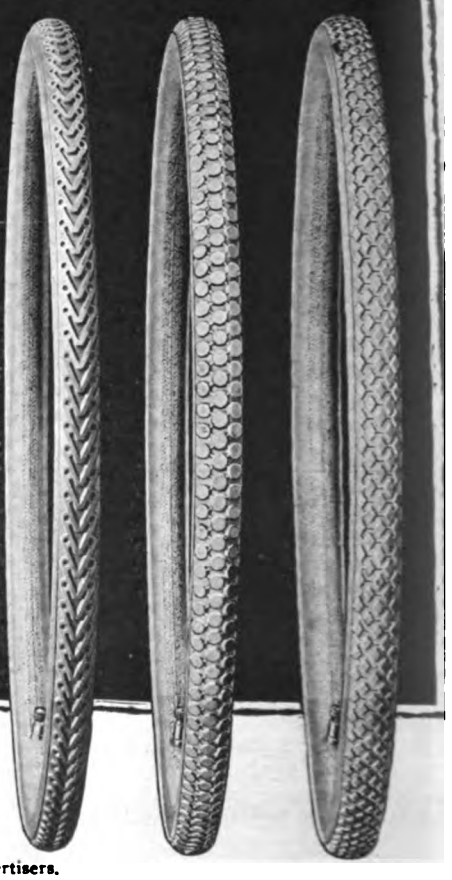
"With this arrangement, when anew man is hired, he automatically learns the names of the parts and their prices," says Neal. "He does not have to wade through a big price book for this information. The parts are arranged alpha-

(Continued on page 44)

3 Strong Leaders —

a complete quality line that meets every demand

VITALIC BRIGADIER ENDURO



ANY DEALER with a stock of these three tires is completely equipped to supply the demand of *every* customer that comes into his store—from the one who wants the *best regardless of price* to the one who wants a *good* tire at a *popular price*.

THE VITALIC

is built throughout of the best tire materials obtainable,—two plies of genuine *motorcycle* fabric frictioned with pure rubber, an inner tube of pure Para rubber so heavy as to eliminate any possibility of leak, an extra heavy non-skid tread of finest quality pure rubber. Will outwear any ordinary bicycle tire *more than two to one*. Once introduced it easily brings a higher price than other tires and always sells over and over again to the same trade because it *never* disappoints.

THE BRIGADIER

The best popular priced tire ever put on the market, far excelling others anywhere near its price. It is a four-ply tire, built with two plies of best Egyptian fabric all around the tire and two extra plies on the tread. A very high grade friction is used.

The extra heavy inner tube is made of a very high quality rubber. The Brigadier is made with gray side walls and a heavy large white studded tread as shown in the illustration.

THE ENDURO

Another excellent popular priced tire that fills a long felt need for a tire of lower price that has genuine quality. It is built with two plies of high grade Egyptian fabric with a very high grade friction, has a heavy inner tube of very good quality and a good substantial diamond studded white tread.

Write us today for sample sections of these three tires and attractive display material and dealer helps.

Your jobber will show you the tires.

Taking the Population off Its Feet

LITERALLY that's what the Cleveland Lightweight is doing. It is putting everybody on wheels. People who have and people who can't have automobiles are riding Cleveland Lightweights. Next year there will be thousands more.

Here is the plant that is building the product. It has both capital and capacity. It is not guessing on prospects—it is making ready to meet a known demand.

The Cleveland Lightweight is not seeking a market—it is being sought by the market.

Dealers who contract now can be assured of getting their quotas. Backed by our carefully worked out advertising and selling plans, they can be just as sure of disposing of the machines with fine profits.

We will be glad to present our plans to first class salesmen of recognized financial ability and broad, progressive ideas.

The Cleveland Motorcycle Manufacturing Co.

7211 Platt Avenue **CLEVELAND**

Digitized by Google

(Continued from page 42)

betically and thus more time is saved in locating them. If a single part is too big for a single compartment in the drawer, we take out the number of compartments necessary to carry it."

Neal, Clark & Neal do business on both the cash and time payment plans. On the installment sales, one-half is required down and $5 per week. A lease contract is made up in triplicate for such sales. One copy is filed at the County Clerk's office, one is given to the customer and the third is kept by Neal, Clark & Neal. "Under this contract, the machine remains our property until entirely paid for," says Neal. "When paid in full, we give the customer a bill of sale. The installment plan applies only to sales of machines."

Repairs and Accessories

The repairs and sundry departments are run mostly on a cash basis. Each sale is recorded in a duplicate sales book, the carbon copy going to the customer and the original to the office. On charge orders, which they have occasionally, the sales slip is posted on the daybook or ledger; if a cash sale, the amount is rung up on the cash register. A bookkeeper and a stenographer form the clerical force.

"But a good bookkeeping system will not keep the dealer out of the hole," says Neal, "if he is not a one-price man. We have one price for everybody. Every dealer knows that it will cost him a certain amount to run his business and also that he is justly entitled to a certain profit. Every time he doesn't get that just profit, he is not dealing honestly with himself.

Knocking Undesirable

"Another way in which a dealer is apt not to treat himself fairly," continued the Indian man, "is when he begins to 'knock' the other fellow's goods. This practice is bad. Every dealer, however, should know the good and bad points of his competitor's machines and he should know his own machine from A to Z and know how to get the best results from it."

Neal says that the dealer must be a rider in order to know how to get the best out of his machine. Being a rider also increases the chances of selling machines, for if the dealer rides he appreciates and understands the difficulties of the riders and creates a common bond of sympathy between them and himself.

The Show Window

"Being a rider and mixing with riders gives the dealer a fair idea of what prospects would like to see in a show window. The window is the eye to the store. Our firm went to considerable expense to make the window display proper for our goods," says Neal.

"Our window is only six inches from the floor; this was made so purposely; as most people are looking down as they walk the streets, and so are attracted to our display. The window platform is of hardwood with fancy inlaid blocks. The lighting is accomplished by five tungsten lights with helmet reflectors.

"Our show window is only one of our methods of advertising goods. We advertise in the daily papers continuously. We specify the baseball page for display ads. Used machines we prefer to have listed in the Want columns. Billboard advertising is done every season and it pays well."

SELLING 'EM FAST AT FORT WORTH

FORT WORTH, Texas.—"Business is good," was the verdict given by the Burton Supply Company, which handles Indian motorcycles and bicycles in Fort Worth. All hands at that minute were busy unloading a rush shipment of Indians, most of them three-speeds. A large shipment of Indian parts was also received at Burton's at that time.

The Burton Supply Company reports heavy sales of Indian motorcycles in the country west of Fort Worth. The boys on the farm are learning to ride, and as they have plenty of money this year they are buying machines.

BACK FROM VACATION TRIP

WHEELING, W. Va.—Motorcycle Officer Walter Worls, Earl Braunlich, local agent for the Harley-Davidson; Frank Smith and Charles Caldwell returned several days ago after spending their vacation in the mountains near Moorefield.

The motorcyclists made the trip on their Harley-Davidson machines and stayed at the camp of Mr. Worls. Braunlich was cook and general utility man, and the boys claim that he is "some cook," for each gained several pounds while on the trip.

THIS MUCH IS CERTAIN

Electric Lamps and an "Exide" Battery furnish the most efficient and reliable light for motor cycle use

"Exide" Battery, Type 3-ZA-5 with cable type terminals

You no doubt realize the numerous advantages of electric light for motor cycle use.

The reliability of an electric lighting system is of course dependent upon the storage battery which furnishes the current.

The "Exide" Battery, type Z, especially designed for this service, is a quality-product, manufactured and backed by the oldest and largest battery maker in the country.

The battery is contained in a one piece, three compartment vulcanite case, having heavy walls and substantially re-enforced.

It is fitted with a one piece cover, having a flange which fits around all sides of each compartment.

The "Exide" Battery is equipped with a flood proof filling plug which overcomes slopping and spilling, and also limits the amount of water that can be poured into a cell to the exact amount needed to replace that lost by evaporation. The result is a clean, dry, and attractive battery.

Motor cycle dealers and users should write us at once and secure the name of the "Exide" Distributor nearest them.

Questions and Answers

WILL NOT HURT MOTOR

I WOULD like to put my 9-horsepower twin motor to sawing wood this winter, but have my doubts as to whether or not it would be harmful for it. The motor has been in the frame and running on the road for a few years. I intend to cool it with a fan. ROY BIGELOW.
Keeseville, N. Y.

We see no reason why such work as sawing wood should hurt the motor in any manner, particularly as you intend to assist cooling by a fan. In fact, you will find that the load on the motor when driving the saw is very much lighter than when driving the motorcycle, provided that you do not use an abnormally large circular saw, such as is found in small mills.

PARTS FOR PIERCE

BEING desirous of purchasing a Pierce four-cylinder motorcycle, I am writing you to find out where I can get parts for the same. GLEASON G. ERB.
Wellsville, N. Y.

Try the New York Sporting Goods Company, 10 Warren street, New York, or the Motorcycle Parts Mfg. Co., 2127 Michigan avenue, Chicago, Ill. The Pierce Cycle Co., of Buffalo, N. Y., will also probably have parts in stock.

PARTS FOR F-N MOTORCYCLE

OWING to the war I am unable to get parts for the F-N motorcycle, made in Belgium, and desire to communicate with some one in the United States handling this machine or stocking the parts.
Guanajuato, Mexico. WEICHERS & GOMEZ.

The F-N motorcycle has not been represented in the United States since 1913 and we know of no place where parts can be obtained. As far as we know, the only F-N parts to be had are in Great Britain now, but we doubt if such parts are allowed to be shipped abroad. Consult the British Consul in the matter.

THEIM MOTOR PARTS

BEING the owner of a Theim single cylinder, motor number prior to 1100, I wish to get motor parts for the same. Please furnish address where such parts can be had.
Charleston, Mo. R. J. STOCKING.

Try the Joerns Motor Company, St. Paul, Minn. This firm is the successor of the Theim Motor Company, but we do not know if they have parts for your model of motor on hand. Write also to the Motorcycle Parts Mfg. Company, 2127 Michigan avenue, Chicago, Ill.

RIDER IS TO BLAME

WE would like to know who is at fault in the following collision: A motorcycle rider finds a trench leading nearly all the way across a road, the only clear way being on the left side of this road. As he goes through this space he meets an automobile and his machine is damaged badly. The rider claims that the driver of the automobile is at fault for not using judgment in watching for oncoming traffic in the narrow space and that the rider was justified in taking the space as if it were a normal roadway—that is, he was within his rights in passing through it as he did.
New York. EDWIN HAMILTON.

We think that the rider is to blame. The automobilist was keeping strictly to his

The Clutch of a Thousand Speeds

The Eclipse Clutch

for either chain or belt drive machine, brings the models of 1911-12-13 up to almost modern control efficiency.

So many and various are the speeds that can be obtained by this high type of free engine control, that it has received from enthusiastic users the name of "the clutch of a thousand speeds."

Only a moderate investment is needed to procure this valuable controlling device.

The Morrow Coaster Brake

The man who rides a bicycle not equipped with the MORROW Coaster Brake is getting but half the value for his money.

He does not realize the remarkable pleasure and safety to be derived by the fitment of the MORROW.

A HINT TO DEALERS:

The MORROW Brake has the largest braking surface within the limits of a bicycle hub, a slipless forward drive, perfect braking, and is the one essential to making one's bicycling joy 100% flawless.

(Continued from page 46)

proper side of the road, whereas the rider was forced by abnormal road conditions to deviate from the right side of the road and cross over to pass through the narrow space. In so doing, he put himself in a position to be struck by oncoming traffic, which is exactly what happened, you state. In case of a suit for damages, this fact would be of weight in making the decision. In deviating from the ordinary rule of the road, the road-user who does so performs the act at his own risk. We cannot determine from your letter whether the automobilist had ample time to avoid a collision in the narrow roadway or not.

NEW CRANKSHAFT FORGING

I WANT to get a crankshaft of larger diameter than that fitted to my 1912 four-cylinder motorcycle. The maker will sell me only the finished shaft. The original shaft has a mark of an F within a D on it. Please give me the name of the maker of this shaft.

Leavenworth, Kan. OTTO E. PARKER.

The shaft is probably made by the Detroit Forge Company, of Detroit, Mich. The chances are that the rough shaft will not permit of machining much larger than the regular shaft for this model, so that very little difference would be obtained in increased strength. We do not know where you can get a rough shaft to fit your crankcase other than at the makers, so suggest that you write the Detroit Forge Company.

ROD ADJUSTMENT NEEDED

IN changing gears on my 1915 twin motorcycle, I find now that I cannot always engage the low speed without a grinding noise and frequently the clutch will not engage properly once the gears are in mesh. Please give me the remedy.

Chicago, Ill. CHARLES EDWARDS.

Shorten the rod leading from the shift lever to the short operating lever on the gearbox controlling the movement of the gears. Then make the clutch adjustment, if necessary, as given in the instruction book for your machine. You will find that this adjustment prevents a further recurrence of the trouble.

Our Canadian News Letter

THREE MORE SIGN

With Andrews for Extensive Ontario Representation.

TORONTO, Ont.—Walter Andrews, of Toronto, Harley-Davidson representative for the Province of Ontario, has closed several desirable contracts for 1917. F. R. Gordon, Niagara Falls, Ontario, has signed to cover the Niagara Peninsular for the Milwaukee product. Included in this territory are several thriving towns, including St. Catherines, Welland, Merritton and Niagara-on-the Lake.

The Wentworth Cycle Works, Hamilton, have again secured Wentworth County, which includes the city of Hamilton, with a population of 105,000. The Milton Carr Hardware Company, Cobalt, have also renewed their agency and have contracted to sell a greater number of machines in the North Mining country.

NEW SEASONAL PLANS

Toronto Association to Ontline Campaign at Meeting

TORONTO, Ont.—The Motorcycle & Bicycle Trade Association, of Toronto, will shortly hold a general meeting for the purpose of making preliminary trade plans for the new season, according to an announcement by Secretary Walter Andrews. The association has not held a business session for several months, as the dealers have been too busy.

"The bicycle week which we held last Spring gave us a wonderful start for the season," declares Secretary Andrews, "and every dealer has been very busy ever since that period."

WANT LIGHT MOUNTS

Kipp Company Finds Strong Demand From Rural Users

TORONTO, Ont.—Contrary to the general dope that lightweight motorcycles are primarily practical for city streets is the demand from rural communities for light models which H. M. Kipp & Co., Toronto, have felt during the past season. The Kipps looked after the sale of the Daytonmotor bicycle in this territory, and it is a fact that every machine of this make which they sold during 1916 went to country residents almost without exception.

Another feature of the situation as found by this firm was that not one complaint was heard all summer from the lightweight users. The Kipp company also represents the Indian and a number of the Indian Featherweights were shipped to out-of-town enthusiasts, while more were sold to city users, of course. One Indian light model was used all summer for military work at Camp Borden with great success in spite of deep sand in and around the encampment.

FULLER IN WINDSOR

Cobalt Rider Takes 520-Mile Trip Across Province to New Job

COBALT, Ont.—The widely-famed silver center of Northern Ontario—Cobalt—has just lost one of its several motorcycling citizens through the departure of Royal Fuller for Windsor, Ontario, where he intends to be occupied with the business of drawing a salary until further notice. Fuller made the journey by motorcycle and, incidentally, his trip was one of the longest direct flights ever recorded in this province. The mileage was approximately 520 miles, and it is impossible to exceed this distance in Ontario unless a mile-eater travels in circles a few times. Fuller made his dash by way of Toronto. Cobalt is slightly more than three hundred miles north of Toronto. Windsor is 215 miles west of Toronto by road.

Fuller was one of the two Harley-Davidsonites of Cobalt and he used his 1916 electrically-equipped model in preference to a train, the common-carrier.

(Continued from page 50)

Although accustomed to life in the open, Fuller never realized how long a road could be until he started out on his ride. Incidentally he did not attempt to establish any speed records along the way.

Over Old Trails

Fuller purchased his mount from the Milton Carr Hardware Company early last summer. This concern sold three British motorcycles — Ariels — in Cobalt before making arrangements to represent the Harley-Davidson in these parts. While in Toronto Fuller paid a visit to Walter Andrews, the Ontario distributor for the Harley-Davidson, in order to tell of motorcycle happenings in Northern Ontario. In his ride to Toronto Fuller passed over old trails and stretches of so-called road which bore strong resemblance to the Sahara on account of sandy conditions. For the final sixty-five miles into Toronto, the highways were a dream to the wanderer.

From Toronto to Windsor, Fuller discovered still better roads and he was in heaven for the time being. Fuller will remain in Windsor for the winter and will return to Cobalt in the spring, according to his present plans. He intends to ride his Harley-Davidson on the return trip to this north country.

CAN'T TAKE MOUNTS TO ENGLAND

OTTAWA, Ont.—The Canadian Militia Department has issued an order prohibiting soldiers of the Canadian overseas army from taking their privately-owned motorcycles to England with them when their units make the voyage to the Old Country. This is partly due to the lack of room on board the troop ships and also owing to the fact that there is a curtailment of the supply of gasoline in the British Isles because of war's needs.

This order will not interfere with the usual shipments of Indian motorcycles from Toronto to the scenes of fighting for use in despatch carrying and for signalling purposes, as there is no restriction on the use of "petrol" at the fronts.

HINGED BAR PATENT

Is Sold by Etwell to American Motorcycle Firm

TORONTO, Ont.—Distinction has come to a mechanical genius of Toronto through the fact that he has just completed the sale of an invention to a prominent motorcycle manufacturing company of the United States. The inventor is Frank Etwell who, as a racer, gained some renown before the outbreak of hostilities in Europe. His creative mind worked out a scheme for a hinged truss bar in the frame of a motorcycle by means of which the engine cylinders can be removed without disturbing any other part of the motor.

After tests it was found that the coupled truss bar had the required rigidity to serve its original purpose as a brace for the frame and to support the gasoline tank. The feature will probably be incorporated in the 1917 model of a well-known American make. It is expected that the Etwell hinged bar will be exhibited on this machine at the Chicago motorcycle exhibition.

RIDING IN DARK

Thrills Nova Scotians Under New Lighting Regulations

HALIFAX, N. S.—The motorcyclists and bicyclists of Halifax are having the experiences of their lives in navigating local thoroughfares at night because of the enshrouding of the city in total darkness. So particular under ordinary circumstances for the display of lights on the two-wheelers, the authorities are now strict in their orders against the illumination.

The result is that very few motorcycles or bicycles are in use in the evenings, except for emergency purposes. Beyond the outskirts of the city the rides can make full use of headlights as the purpose of the order forbidding the employment of lights in the city is to conceal the location of the place from possible naval invaders.

St. John's, the capital of Newfoundland, is also in total darkness at night and the riders of that centre are also handicapped.

LANTZ SELLS A DOZEN

JERSEY CITY, N. J.—Morton D. Lantz, Harley-Davidson dealer for Hudson County, who sold 63 of the Gray Fellows during the past season, says that he will surpass that record during the coming year without a doubt. He has orders for 12 of the Khaki Giants from Milwaukee at present, and four of them are to be hooked up to sidecars.

He has closed the 1916 sales season with but three second hand machines in his store, which alone is proof of his business sagacity.

USE QUALITY OIL

The life of a motorcycle depends largely on how it is lubricated.

Branch: 143 No. Wabash Ave., Chicago, Ill.

WE have a body construction in the Pullman that we defy any other manufacturer to equal. The frame is of Kiln Dried Second Growth Ash. Every joint is tennoned and reinforced with metal plates. The metal cover—though relieved of all strain—is made extra thick to insure against denting.

The finish is made equally durable because we use heavily lead-coated sheet steel. This is absolutely rust-proof. Neither are there seams. Excepting the hood, **the entire body cover is of one piece!**

These are a few of the facts given in our attractive circular. A post card with your name and address will bring it to you.

Get It Today!

JOHNSON'S CARBON REMOVER

WHEN A PLEASED CUSTOMER—

Writes a complimentary letter to a manufacturer—that manufacturer must have done something out of the ordinary to deserve such attention.

The latest achievement of S. C. Johnson & Son in supplying an absolutely guaranteed Carbon Remover—has brought thousands upon thousands of letters from enthusiastic users.

The universal satisfaction which Johnson's Carbon Remover is giving users is most gratifying.

On top of this are the profits which live dealers are making through the extensive demand created. Backed by the most startling results in removing carbon without even soiling the hands, and doing it better than burning it out.

Johnson's Carbon Remover is the quickest selling article the dealer can carry.

We are receiving re-orders on first shipments, by telegraph, telephone and mail.

Just send us your order for our dealer's assortment.

Gets results that are surprising, which they are doing with Johnson's Carbon Remover, it is up to the dealer to be ready for re-orders.

After every 500 miles of riding, motorcyclists are now using Johnson's Carbon Remover—They are experiencing for the first time, the benefits of clean cylinders.

The saving in fuel consumption pays the cost —to say nothing of the increased power and quick response of the motor.

Johnson's Carbon Remover is not a one time sale—it will be kept on hand and used constantly—just like oil and grease—The motorcyclist will not be without it.

There is a large advertising appropriation back of Johnson's Carbon Remover—watch the trade papers and leading weeklies and magazines.

Our guarantee covers both the sale of Johnson's Carbon Remover and the article—So the dealer takes no chances when stocking same.

Johnson's Carbon Remover has revolutionized the Carbon Removing business.

AT THE SEASHORE WITH AN "R-S"

BOSCH EQUIPT MOTORCYCLES DO NOT COST MORE

BOSCH Magnetos are made as good as specially schooled workmen, with special designs and the best of raw materials, can produce. Because of this excellence Bosch Magnetos have become known as the most desirable of all ignition methods. The highest priced motor cars and motorcycles in the world use only Bosch.

Because of the care, because of the selection of the best materials, the Bosch Magneto costs a trifle more than other ignition systems, but, considering its ability to serve long and well and to give efficient and reliable service, irrespective of the knowledge or attention of the user, Bosch is the cheapest ignition system known.

Worth Traveling To Chicago To See

There it is, right at Booths 67-68-69. Look it over. Compare it point for point with any other motorcycle at the Show. Do that and we know you'll surely hand the blue ribbon to the

The 1917 Twin Electric is the most highly developed power and speed producer you'll find on the floor. It embodies no radical changes in Pope construction—they weren't necessary.

But every detail has been refined, tested, and refined again until now this machine has reached a degree of mechanical perfection never before attained in motorcycles.

The record it is making on the road tells the rest.

Electrical Equipment

Each item of electrical equipment on this model is in keeping with the high standard of excellence of the machine itself. It was adopted only after the most rigorous tests of the Westfield engineers had proved it to be efficient in every respect. The equipment includes the Splitdorf Combination Ignition and Generator Unit, the Wico Storage Battery, Hawthorne Electric Hornlite and Tail-light, the Splitdorf Ammeter, and a special Pope type wiring set made by the Splitdorf Electrical Company.

Corbin-Brown Speedometer with special Pope rear drive supplied as extra equipment.

Also the most complete exhibit of Columbia Bicycles ever shown—same time, same booth, same makers.

WHERE CARE COUNTS

Haphazard manufacturing methods have no place in the building of the R-S. From stem to stern the World's Master Motorcycle owes its matchless reputation to the painstaking care with which it is constructed.

And when an R-S rider finds himself facing a stiff grade—a sandy, winding ascent that nearly doubles upon itself—and he makes it with power to spare; or when he bumps and grinds over miles of rocks, dropping into a few chuck-holes and ditches here and there and the R-S emerges without the slightest sign of strain or wear—THEN HE BEGINS TO REALIZE THE TRUE VALUE of that care and precision that go into the make-up of the R-S.

Power-Simplicity-Ease of Control-Safety-Silence

The first R-S was made 12 years ago. Since then the R-S motor has been the most widely copied power-plant of any motorcycle motor made. With its marvelous acceleration, its quick get-away, its smooth, flexible pick-up and its tremendous reserve power the R-S motor might well be imitated.

The total absence of frills and unnecessary fitments first strikes the man who buys an R-S. Yet no essential control factor or comfort feature is neglected. There is the double-breaking control—then the ECLIPSE CLUTCH AND R-S THREE SPEED which make the R-S motor doubly efficient.

The R-S, despite its simplicity, is LUXURIOUS—in power, in the total absence of noise—in comfort—in ease of control—in its steady balance and all-year-'round reliability.

See our display at Booth 41-42, Chicago Show. We know you will be interested in *the world's master motorcycle.*

Dealers are invited to write for our catalog and open territory proposition.

"Proven Far Superior to any other type ever tried"

The Exide Battery for Motor Cycle Use

READING STANDARD COMPANY, INC.

MANUFACTURERS OF

RS MOTOR CYCLES

NOTICE: [redacted] AND NOT TO INDIVIDUALS.

Dictated by VCV/CGR READING, PA., U.S.A. 9/28/16

Electric Storage Battery Company,

Phila., Pa.

Gentlemen:

It is with pleasure that we forward you herewith contract covering our season's requirements for Exide Storage Batteries to be used as part of our standard equipment for 1917.

The season of 1917 will mark the introduction of the Reading Standard Electrical Equipped Motorcycle. We have been experimenting with the various types of electrical apparatus, including storage batteries, for a period covering two years, but not until this year did we arrive at a point where we could offer it to the public knowing it would give absolute satisfaction.

The Bosch Magneto Generator and the Exide Storage Battery is a combination that will overcome all of the past electrical troubles, and has proven far superior to any other type ever tried.

Very truly yours,

READING STANDARD COMPANY.

General Manager.

1917 R-S
will be equipped with ECLIPSE CLUTCHES

The R-S choice is a signal victory for Eclipse Clutches. It proves that Eclipse Clutches have proved satisfactory on the machine that is built and tested in the hills and which has won the title of "King of the Hills." For the conservation of power—for the perfect transmission of it—the Eclipse Clutches are without a peer. They are absolutely original in design and are superior to all others in the attention which is given to quality in material and workmanship in their manufacture. That's why the Reading-Standard Company chose Eclipse Clutches.

READING-STANDARD MOTORCYCLE
ADOPTS
United States Tires
FOR 1917

Another leader has joined the ever-growing army of United States Tire users.

Another famous manufacturer has adopted our tires.

Why? Because they make good for those who ride them —because they give mileage service far beyond the ordinary.

The best motorcycles will be equipped with United States Tires in 1917.

Get ready for the demand.

MESINGER

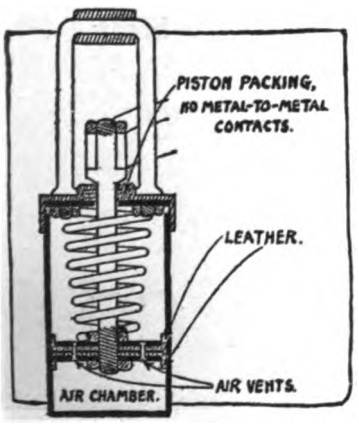
The Ideal Touring Saddle

Now that the riding season is again in full swing the matter of comfort should hold first place in the rider's consideration. If he would gain the maximum—the very last word—in absolute comfort, he should specify the MESINGER AIR CUSHION SADDLE.

With the MESINGER he gets the lowest saddle position by fully an inch. His comfort is assured by the real shock-absorber springs, working in barrels on air. He always sits securely, never sways or tips sideways—the wonderful centre compression of the MESINGER takes care of that. Mesinger is **true** comfort.

Mesinger Air Cushion Saddles have been used on all coast to coast records of the last three years.

Most Factory riders as well as salesmen ride Mesinger Air Cushion Saddles. 1917 Equipment on Excelsior and Reading-Standard Motorcycles.



DEALERS

Consider the comfort of your customers. Recommend the MESINGER AIR CUSHION SADDLE. They will appreciate the value of your suggestion once they try the MESINGER.

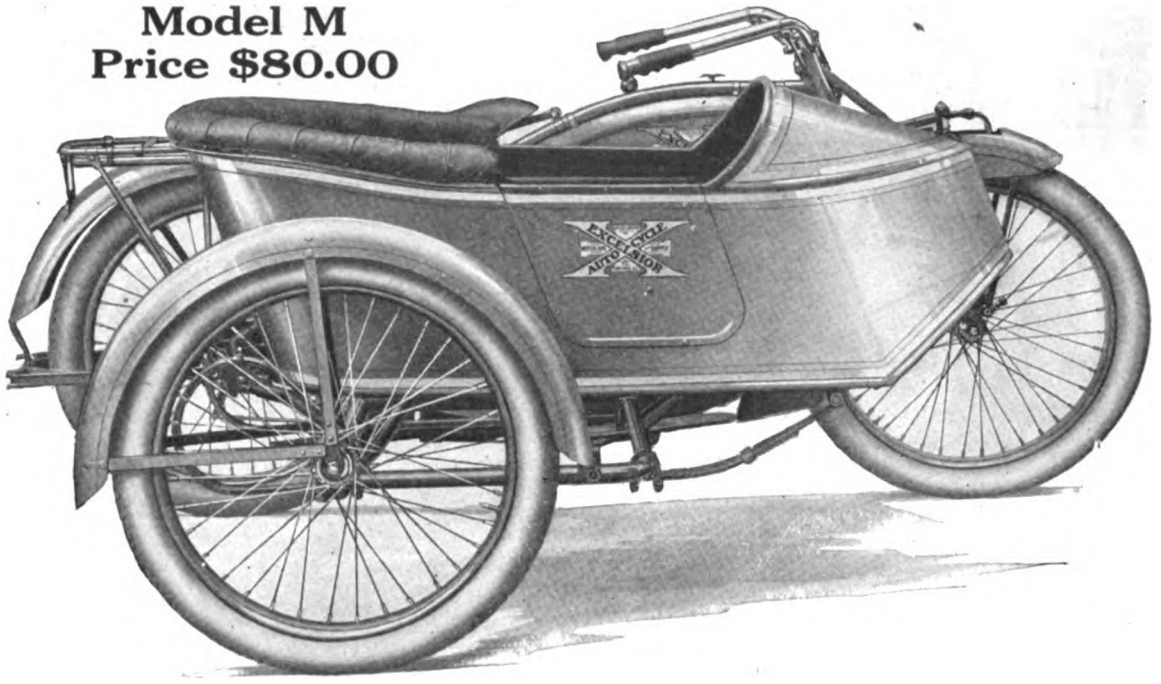
Rogers The ULTIMATE SIDECAR

Model M
Price $80.00



ALL THE WELL KNOWN ROGERS QUALITIES
Such as One Piece All Steel Body,
Nickel Steel Chassis, with Autogenously Welded Connections
PLUS THE FOLLOWING NEW FEATURES
EXTENSION DROP AXLE, the only drop axle giving low body position, ever built into a sidecar.
FORWARD BODY POSITION, placing the passengers side by side.
PERFECT BODY BALANCE, eliminating all tendency to tip forward.
UNIVERSAL BALL JOINT CONNECTIONS, eliminating all twisting strains on the motorcycle and making attachment and detachment a matter of a minute.
EXTRA ELASTIC THREE LEAF SPRINGS that will not set nor break under any load.
OTHER IMPROVEMENTS include Large Side Pocket, Foot Rest, etc.
FINISHED to perfectly match in color all standard motorcycles.

See this and other models at our space, No. 90, Chicago Motorcycle Show, or write for new circular.

The Cleveland Lightweight

The Right Idea

There isn't a guess in the Cleveland Lightweight plan.

From the design of the machine to the final step in the selling campaign, everything has been carefully thought out and worked out.

First we recognized the immense market for a dependable motorcycle that would be light in weight and low in price. That was easy.

Then we had to build a motorcycle to weigh 150 pounds and sell for $160.00. That was hard.

But we built it and priced it and put it on the market and it went.

The Cleveland Lightweight is practically free from competition. Between the bicycle and the low priced motor car, it fills a field all its own.

It is different by its superiority, mechanically and commercially. It is the motorcycle for the millions, and the dealers who take the Cleveland Lightweight now will have before them an untouched and waiting field for sales.

The Right Plant

With the financial ability to employ the best possible engineering service—with the foresight to spend two years in study and experiment in this country and in Europe before deciding upon a model—with a command of materials and a splendid plant equipped with the most modern and efficient machinery—and with ample capacity now and ample room for later growth, The Cleveland Motorcycle Manufacturing Company offers its dealers the advantages of commercial relations with an organization that is preeminent on the three main points—Engineering, Manufacturing and Business.

The Right Machine

When a new Motorcycle goes on the market, makes a hit in a single year and starts its second season with no fundamental changes in design or construction—it must be right.

That's the history of The Cleveland Lightweight. From coast to coast the carload orders are coming in on contracts that are going to revolutionize the motorcycle business, and the dealer's attitude toward the motorcycle as a means of making money.

With an appeal to every class of people—with a reputation of being right in every particular—and with a price that fears no competition, The Cleveland Lightweight is the right machine for the Dealer because it is right for the millions.

The Right Dealer

Think this over:

A motorcycle weighing about 150 pounds; with drop forged frame fittings; two-stroke engine without valves, springs or tappets; two-speed transmission; straight line worm drive; no auxiliary chains or sprockets to magneto or transmission; aluminum castings; spring fork; multiple disc clutch; Bosch magneto; Firestone non-skid tires; Brown & Barlow Carburetor; efficient brake; low center of gravity, Automatic lubrication, and a full tryout under all kinds of severe conditions —selling at $160.00 (or $10 extra for kick starter)—

Are you the right Dealer for a money-making merchandising effort that will be backed up by a selling and advertising campaign that is just as good as the idea, the plant and the machine?

We want to meet you at the Chicago Show, or hear from you at our main office.

An Assurance for You and Your Customers

We make but one Single Tube Bicycle Tire.

Blue Streaks.

We guarantee these tires.

Back of that guaranty is the name of Goodyear.

Were it necessary we would spend thousands upon thousands of dollars in making adjustments rather than have the slightest cloud cast upon that name by even the smallest boy in the world.

Blue Streaks do not often require adjustments but when they do our guaranty is as ironclad as the American Constitution and the adjustment as swift as a mail bag or a wire will allow.

$2.50
Each

Guaranteed

And this assurance you can pass on to your customers.

Don't you think there is great satisfaction in selling a bicycle tire in which you have every confidence?

Don't you think you would feel secure in knowing you were backed up to the limit on every Blue Streak you sell by a name we promise you shall ever remain untarnished?

Don't you think that name —Goodyear—is a good one for you to couple with your own?

Then let the Goodyear Salesman explain the Blue Streak sales plan, when he comes.

FUNDAMENTALS of merchandising vary little, if at all, whether applied to an individual or a nation. In either case the first requirement is to set the product right with its market, to have it judged fully and honestly for what it is. Until that has been accomplished there can be no basis of progressive understanding between salesman and potential buyer.

When the product is strongly featured by economy, by wide adaptability, by a fascinating combination of social and business elements, by facility of service—as is the motorcycle—then those attributes must be made to stand in the public mind for that product, to be ineradicably associated with it in the mental processes of possible purchasers. To slight that obvious necessity is to becloud the product's identity and invite misunderstandings, and their next of kin, prejudices.

A Vital Function of the National Shows

It is of paramount importance then that the motorcycle be given its true perspective as an adjunct to everyday life—and the National Shows must help.

Without in the least belittling the immediate business returns from the big exhibitions in Chicago and New York, it can be said that the Shows perform their most vital function when they educate the general public to the present-day significance of the motorcycle, and of the industry behind it. They are successful, broadly speaking, in proportion to the spirit of appreciation and understanding of the motorcycle which they propagate and send out through the land.

It is doubtful if any product of American engineering has been more generally misjudged by the Man in the Street than the power two-wheeler and it is for that reason that the national educational process, which admittedly receives its chief impetus yearly from the Shows, should have the most earnest consideration of the entire cycle industry at this time.

The opinion of the individual, multiplied sufficiently, becomes the sentiment of the nation. And national sentiment, brought to the 100,000,000th degree, as it is in our United States, is the most potent force under the stars. It is worth cultivating.

One of the most definite and fruitful methods of cultivating this popular sentiment is to insist upon full recognition of the motorcycle's economy, utility and dependability—by way of offsetting the speed idea which now obsesses a great part of the public mind. The motorcycle's ability to whisk the miles behind it is, and always will be, an important factor in salesmaking, but the public conception of mere speed, without appreciation of the utilitarian attributes which are so admirably combined with it in the motorcycle has been a direct and costly hindrance to the nationalization of the vehicle.

When Sales Efforts Are Out of Focus

The mind accustomed to see only the possibility of high speed in the motorcycle cannot be properly receptive of the aspects of economy and utility, although we know that in the final impartial analysis those two qualities are the outstanding ones. Under such conditions salesman and prospect view the product through different lenses. Naturally their dealings are somewhat out of focus.

Visualizing only speed, the prospect argues rightly that it is not an essential in his daily life. The salesman *per contra*, cognizant of the motorcycle's practical appplicability, and knowing from experience its vast potentialities for service, is mystified at finding that his selling arguments do not strike fire. But there is no mystery. The solution of the problem lies simply in the fact that salesman and prospect *do*

Digitized by Google

not see the same vehicle. There's the rub.

So it is our obvious and imperative duty to place the motorcycle before its market in such a way that the Man in the Street will be enabled to perceive in it the same capabilities for service that the manufacturer and the salesman see. That done, we shall be on the high road to the nationalization of the power two-wheeler in America. We are moving in that direction, and rapidly, but we have still before us a good part of the task of proving that the motorcycle is a *practical necessity,* and not *merely an incidental,* in the national scheme of things.

Popular sentiment is traditionally finicky, but in one respect at least it is dependable—it requires that the product offered for the nation's approval justify its permanent existence by some appreciable contribution of service to the life of the people. Products which fail in that may obtain some measure of transient success, but never can feel behind them the encouraging warmth of the country's good will.

The motorcycle is entitled to that precious good will, and is today feeling its stimulus, but only in proportion to the impression of service that it has created throughout the land. High speed demonstrations on tracks have been largely non-productive. The motorcycle has progressed in spite of, not because of them. They have served to attract attention, and that about sums up their value. To the future well-being of the industry they have contributed little or nothing.

America knows today that the motorcycle possesses wonderful speed possibilities. And still it has been reluctant to give the vehicle a place in the national life. Speed, obviously, is not all-convincing. Something more constructive is needed.

That something is Service.

Because of its comparatively low first cost, its economy of operation, its simplicity of handling, its ability to give solo, tandem, sidecar or van transportation with equal facility, the motorcycle is fundamentally a service vehicle. In touring, and in all the thousand and one branches of business and professional life, the motorcycle is proving itself daily. And it is that fact that we must implant in the public mind to replace the purely speed idea.

This work of national education has been started, happily, and the big shows now at hand should advance it. We must enter upon the shows then with the firm determination to have the public see the motorcycle as we see it, in the light of a vehicle which possesses truly revolutionary possibilities as a practical, recreation-giving, health-building, business-stimulating adjunct to the country's life. In that we are fully justified.

Let us forget the item of speed, except as an incidental to actual service. The speed of the motorcycle is settled and accepted. It's a byword. No one questions it. So we are free to devote ourselves at the shows to the pleasant and profitable task of giving the motorcycle its true standing as a utility, its "place in the sun" of national confidence and understanding—*its identity of the future.* The big shows will be all the bigger for this work of education.

We know the motorcycle for what it is, but our duty does not stop there.

It remains for us to tell America.

FINAL PREPARATIONS FOR CHICAGO'S BIG WEEK

Decorators Begin Work of Transforming the Coliseum as Show Committee Allots Space to Late-coming Exhibitors—Full List of Exhibitors and the Program for the Week

CHICAGO, Nov. 8.—Carpenters, electricians and interior decorators began today to put the finishing touches on the plans worked up by the Show Committee for the Fifth Exclusive National Motorcycle, Bicycle and Accessory Show when Show Manager Coffman led the little band of workmen and artisans to the Coliseum and bid them do their best.

Live Show Committee

And if a real live Show Committee is an indication of a show of the same mettle, the cycle affair which opens here on Monday evening next, should be a record breaker. The plans laid out by the committee which is headed by F. J. Weschler, of the Indian, with Arthur Davidson, of the Harley-Davidson, T. W. Henderson, of the Henderson acting for the motorcycle interests, Fred Grubb, of the Union Supply Co., acting for the Jobbers and Frank Chase, of the Buffalo Metal Goods Co., looking after the interests of the Parts Makers, call for show of size and quality never before attempted in the industry. And take it from Show Manager Coffman, the coming show is going to measure up to the committee's plans in every respect and then some.

The thing contributing mostly to the "bigness" of the coming exhibit and which has resulted in its promise of becoming the most comprehensive cycle exhibit that ever has graced the Chicago boards is the fact that the entire trade is united in its management; it has the backing of the motorcycle makers, bicycle makers, parts makers and jobbers; and they are all bending every effort to win for it the title "best ever."

All Ready!

The accompanying article and the illustration on the opposite page are designed to tell the last-minute story of Chicago Show preparedness.

Manager A. B. Coffman and his fellow workers on the Show Committee, Messrs. Arthur Davidson, T. W. Henderson, F. J. Weschler, Frank Chase and Fred Grubb, — who scintillate above the entrance in the illustration — have all done their part. Jump in with a smile and do yours!

The last of the latecomers in the unprecedented line-up of exhibitors has fallen into line, three newcomers being added to the list since Monday. They are the Market Forge Co., Chelsea, Mass.; the Delta Electric Co., Marion, Ind., and Van Cleef Bros., Chicago, Ill.

Big Cycle Week

But aside from the show, it promises to be a "big week" in Chicago for the two-wheeler trade men have laid out a program that will account for every minute they can separate themselves from the show.

The program begins with a meeting of the Motorcycle and Allied Trades Association, Inc. (Motorcycle Manu-

Digitized by Google

Digitized by Google

facturers' Association) which has been called for Wednesday morning, November 15, at the Congress Hotel, which will be the Mecca for the cycle trade men during the week.

This is a formal meeting to finish up the details of the merging of the motorcycle manufacturers with the larger and more comprehensive informal cycle trade body which was formed last June.

On Thursday morning, also at the Congress and also at ten o'clock the Bicycle Manufacturers' Association, the Cycle Jobbers' Association of America and the Cycle Parts and Accessories Association will each hold their separate sessions. At the same time a big "booster" meeting of the informal Motorcycle and Allied Trades Association has been called for the New Southern Hotel at which the members of the informal association will be asked to join hands with the formal body for the good of the industry.

The luncheon and joint session of the cycle trades bodies is scheduled for the Congress ball room at 1:30 o'clock on the same afternoon.

The full list, embracing 71 exhibitors, with the products they will show at the Chicago show is appended.

Signs that Show Trend of 1917 Design

UP-TO-THE-MINUTE MOTORCYCLE TENDENCIES

Motors—Twin gaining favor; medium and lightweight twins increase; opposed twin makes its bow; two-cycle lightweight has made good; refinements in gas passages, bearings and oiling systems make for increased power.

Starters—Segmental direct-acting kick starter becomes standard gearing. Three-speed gear has displaced two-speed on heavyweight twin models; two-speed holds forth on singles and lightweights; single-geared models on wane.

Control—Foot clutch and interlocked gearset and clutch control hold full sway; foot and hand brakes make progress.

Stands—Front wheel stand makes appearance; easy lifting rear stand gains another convert.

Electrical Models—Electrical equipment has won recognition of all save lightweight makers.

Finish—Military drab color makes its appearance.

WELL, here's the beginning of a new season, and once again we have a flock of new models, all housed under the single roof at the Chicago Coliseum for the inspection of the critical, and the edification of the uninitiated.

Of course, they are different from those of last year—that goes without saying. How much different? Well, some differ radically from anything we have seen before; but they, of course, are very much in the minority.

For the most part the changes are more in the way of refinement and improvement than of any alteration of basic principles or the well defined practice that has been adhered to by the various makers for years—the "ear marks," in other words, of the various models, are retained on the 1917 models.

Enter the Opposed Motor

In a year, as the present, when development and improvement have taken so many and so diverse courses, it takes a man with a good deal of fortitude and much egotism to say that this or that tendency is the most pronounced of the season. It is hard even for the fellow well versed in every phase of motorcycle construction correctly to weigh and classify in importance the changes that are found from model to model and make to make.

The year witnesses the introduction, in the shape of the Indian Lightwin, of what practically amounts to a new type of motor insofar as America is concerned; in saying this of the two cylinder opposed motor we are not, even for a moment, losing sight of the fact that such a motor was indeed used on the old Grayhound; but as that model of that particular make made scant headway, and as only a few of the oldest of the oldtimers remember it, we are not overstepping the bounds of truth when we state that to the Indian goes the credit for really introducing this type of motor to the American motorcycle rider.

Lighter Twin Machines

Whether the introduction of the opposed motor with its widely heralded and much lauded perfect balance does in reality constitute a tendency in the full meaning of that term, remains to be found out. As a matter of fact, however, rumor has it that the opening doors of the Chicago show will disclose besides the Indian Lightwin, another opposed motor, the offering of one of the few motorcycle makers who have not as yet announced their next season's models.

Whether or not this second machine of that type will really make its appearance cannot at this time be stated with certainty; it's a rumor, however, that is making its trade rounds and which will not readily down.

But disregarding, for the nonce, all else regarding the Indian Lightwin except the fact that it is a twin and a lightweight, and coupling that fact up with the sole Emblem offering for the coming season and the fact that the Thor also has a medium weight twin, it will not require the services of a Sherlock Holmes to discover a marked tendency toward lighter twin-cylinder machines for solo use—a reaction, perhaps, from the super-heavyweight two-cylinder machine which has had the upper hand for seasons past.

Two-Cycle Loses No Ground

As for the lightweight machine, the continuance of every make save one that was exhibited at the shows of a year ago proves beyond cavil that there is room aplenty for the type. The fact that more of the motorcycle manufacturers have not brought out models falling justly within this category is attributable, no doubt, more to the pinched condition of the raw materials market and our abnormal labor conditions than to any lack of faith in the future of the power-driven two-wheeler of reduced weight and low cost.

Considering the two-cycle lightweight, the dropping of the Indian Featherweight model in favor of the four-cycle twin augurs no lack of faith in the two-cycle principle on the part of the Indian engineers, but rather a feeling that there is a greater call for a twin machine in the lightweight class. And the two-cycle principle does not, without difficulty, fit well into the twin cylinder idea.

Some Motor Refinements

The strict adherence of the Cleveland folk and the Schickel engineers to the single-cylinder two-cycle type, and the lack of any definite word from Excelsior that the lightweight "X" is to be discontinued or offered in the four-cycle type for the coming season, makes it plain that the two-stroke motor has made good in every sense of the word and while it has gained no ground during the past twelve-month, up to the present writing, with the exception of the Indian, it has lost none of the popularity is so suddenly acquired last year just before the show.

Coming to the heavyweight machines, we find the changes many and various. As for the motors the chief tendency seems to be in the way of obtaining a power increase by means of alterations to the manifolds and the other gas passages by means of which a freer flow of gas to the cylinders is provided, and condensation or precipitation of the mixture lessened.

This affects the Harley-Davidson, Indian, Henderson, Pope and one or two others, and in the case of the Harley-Davidson and the Pope at least, something has been done toward obtaining regular firing from the very moment the motor is kicked over, by providing a readily adjustable tension spring arrangement on the auxiliary air inlet valve of the carburetor, whereby the tension for starting can be set at just the proper point to suit the temperature and weather conditions.

The Three-Speed Gains Favor

As for the remainder of the motor, the Indian has made some few slight changes having to do with the arrangement of the reciprocating members, the location of the wrist pin being lowered and the piston lengthened slightly while cooling fins have been fitted to the valve caps; the Harley-Davidson has made some slight improvements in the bearings and other minor changes; the Thor has altered the oiling connections by way of obtaining more nearly perfect lubrication and eliminating all chance of leakage; the Dayton has added a mechanical oiler making the application of this device universal on the American heavyweight, and the Pope has made a couple of minor motor changes. To the casual observer, however, the motors of 1917 are quite similar to those which were offered on the 1916 models.

A noteworthy tendency is the adoption of the three-speed by both the Henderson and the Emblem, the former concentrating on a three-speed four-cylinder model with motor, clutch and gearing built into unit power-plant form; and the latter devoting all its efforts to a medium weight twin of-

The Show's the Place for Final Decision

With Every Make and Every Model Represented, the National Exhibit Is Logical Place for Final Analysis of 1917 Motorcycle Offerings Before Signing the Purchase Contract

THERE are fellows in plenty who will admit that saving up the 200 and some odd dollars necessary as a first step in the purchase of a motorcycle is not the hardest part of the deal, after all. For even with the wherewithal in hand, under ordinary circumstances, it is no easy matter for the average man to make up his mind with any degree of certainty that he is not going wrong, that any one make and model of the many on the market is just what he needs—is, for a fact, the machine that will fill the bill for him in every possible way.

And just there is where the National Motorcycle, Bicycle and Accessory show comes in. It's the logical place for the doubtful to use the fine tooth comb on the motorcycle market, so to speak, and make the final selection.

When all is said and done, in point of close approach to mechanical perfection, in performance and in ability to stand up under the work imposed upon it, there is not a great deal of difference between the various makes on the market at the present time.

Fifteen years of progressive development and intensive study of the features that enter into the making of a really good motorcycle have pointed the direction which all of the makers today have taken, the newer ones following in the footsteps of the old.

With conditions as they are at present, he would be a brave man indeed who, despite years of experience, would go so far as to vouchsafe that any one of the dozen American motorcycles that will be on view at either Chicago or New York is better, everything considered, than all of the others.

To be sure, each make has certain good features that are exclusive; certain little individualities that appeal to one class of rider which, however, might fail wholly of making an impression on another class which uses the motorcycle for a totally different purpose.

And it's just to determine these little points, if nothing more, that the expectant purchaser of a new motorcycle, whether he is an experienced rider or merely a novice should visit the national show, either at Chicago or at New York, if there is the slightest possibility of his getting there.

In the first place, fellows, you have, at

(Continued on page 96)

The Motorcycle Exhibits at a Glance; Summa

CLEVELAND

Cleveland Motorcycle Mfg. Co., Cleveland, Ohio

One two-stroke, two speed lightweight model. Price, $160.

Motor—Two-stroke, three-port type with carefully designed ports eliminating backfiring and missing; bore 2½ inches; stroke 2¾ inches; lubrication by mixing oil with gasoline; ignition by Bosch magneto; B and B carburetor.

Transmission—By special worm to multiple disc clutch and sliding dog type of two-speed; thence by roller chain to rear wheel.

Starter—Segmental type kick starter.

Frame—Special Cleveland type single bar model with drop forged fittings.

Control—Bowden levers for carburetor; frame lever for spark; clutch by hand lever, 2-speed by rocker pedal; brake by foot lever.

Tank—Cylindrical type, capacity 1½ gallons.

Equipment—Firestone tires; Troxel saddle; tool box tools and tire repair kit.

Finish—Black frame with gray rims and tank.

DAYTON

Davis Sewing Machine Co. Dayton, Ohio

Nine models, eight twins and one single.

Model E-4—Twin cylinder, three-speed model, electrically equipped.

Motor—Dayton overhead valves, bore 3 5/16 inches; stroke, 3½ inches; mechanical oiler; Schebler carburetor; Splitdorf mag-dynamo ignition.

Transmission—By roller chain to plate clutch and sliding gear type of three-speed on countershaft; thence by roller chain to rear wheel.

Starter—Dayton pedal starter.

Frame—Loop type providing very low saddle position; heavily reinforced for sidecar work and strengthened with drop forged fittings.

Control—Spark and gas by grips; compression release by grip lever; clutch by interconnected foot and hand lever; three-speed by hand lever interlocked with clutch control; brakes by foot lever and handlebar grip lever.

Tanks—Special Dayton design with oil tank inserted in gasoline tank; capacity 2½ gallons; oil, 8 pints.

Equipment—United States or Goodyear tires; Troxel saddle; Old Sol Hornlite and tail light; tool box, tools and tire repair kit.

Finish—Dayton maroon, beautifully striped.

Model E-1—Twin-cylinder, single-geared model. Specification same as above without three-speed and electric equipment. Price, $250.

Model E-2—Twin-cylinder two-speed model. Same as above with two-speed gear. Price, $260.

Model E-3—Twin-cylinder, three-speed model. Same as Model E-4 without electrical equipment. Price, $275.

Models E-5, E-6, E-7 and E-8 correspond respectively to Models E-1, E-2, E-3 and E-4 except that they are powered with De Luxe motors.

Dayton Motor Bicycle—Self-contained front wheel with four-cycle powerplant built integral and fitted to special Dayton bicycle. Price, $100.

EMBLEM

Emblem Mfg. Co. Angola, N. Y.

Two models, both twins, one with three-speed and the other single-geared.

Five to Seven horsepower three-speed model. Price, $210.

Motor—Overhead inlet valves; bore 2⅝ inches; stroke, 3 inches; piston displacement, 32.44 cubic inches; splash lubrication; special Schebler carburetor; Berling magneto.

Transmission—By roller chain to multiple disc clutch and three-speed gearset on countershaft; thence by roller chain to rear wheel.

Starter—Back-acting segmental type; can be readily operated from the saddle.

Frame—Loop type heavily reinforced and strengthened, with drop forged fittings.

Control—Handlebar control.

Tanks—Molded type, gasoline capacity 2¼ gallons; oil 6 pints.

Equipment—Mesinger saddle; Goodyear tires; tool box tools and tire repair kit.

Finish—Carmine with black panel and gold striping.

Single-geared model. Price, $175. Specifications same as above except three-speed and kick starter are not fitted.

HARLEY-DAVIDSON

Harley-Davidson Motor Co., Milwaukee, Wis.

Five models—Three twins and two singles.

Model 17-J—Sixteen horsepower, three-speed electrically equipped. Price, $310 f. o. b. Milwaukee.

Motor—Bore 3 5/16 inches, stroke 3½ inches; piston displacement 60.34 cubic inches. Lubrication by automatic mechanical oiler; Schebler special carburetor; ignition by Remy lighting and ignition set.

Transmission—By roller chain to multiple disc clutch on countershaft; thence through three-speed sliding type gearset by roller chain to rear wheel.

Starter—Back-acting kick starter forming unit with three-speed gear.

Frame—Double-bar loop with die molded steel or high carbon drop forged fittings; ample strength to take sidecar or van.

Control—Grip control of throttle, spark and compression release; interconnected foot and hand lever clutch control interlocked with three-speed lever control on left of tank; service brake by foot lever, emergency brake by grip lever on handlebar.

Tanks—Streamline twin tanks, no exposed seams; gasoline capacity 22 pints; oil 8 pints.

Wheelbase—59 inches. Wheels 28 inches, CC rims.

Equipment—Firestone, Goodyear or United States tires; Troxel saddle; steel luggage carrier; front and rear

Proper Equipment Gives Best Service

In Order to Select It a Close Inspection of Accessories Is Essential and This Will Pay Both the Prospective and Present Rider at the Coliseum During the Next Week

SINCE the motorcycle or the bicycle is the maget that draws you to the show at the Coliseum, you quite naturally want to find out all there is to be learned about the two-wheeler. But don't imagine for a moment that you have learned everything about the new season's offerings when you have religiously concluded a visit to each of the motorcycle and bicycle booths and indulged in a minute inspection of the details of the various models.

There are lots of details in the 1917 offerings which cannot be seen at the booths of the two-wheelers. There are good and sufficient reasons why they are not to be seen there too. But these details can be seen at the booths in the accessory section, and it will pay any and every rider or prospective rider to make a careful tour of this part of the show. So go right to it.

It doesn't make any difference where you ride or expect to ride, there are certain accessories that you need, and, like the Texan's revolver, when you need them you need them badly. These accessories go to make up what is actually a fully-equipped motorcycle, and to get this to your taste, and to what your experience or that of others points out as most desirable, make a close study of the accessory exhibits.

The first absolutely essential accessory is a horn. You get one, either combined with the headlight or distinct from it, when you purchase an electrically-equipped motorcycle, but the horn is not included in the price of other models. You need some sort of a signal to warn other road users of your presence, and there are mighty few places you can ride in which a horn is not absolutely required by law.

The Coliseum exhibits give you a wide range of choice. You can examine many varieties of mechanical horn, operated by pushing on a plunger, by moving a short lever or by pressing a button; these horns come all ready to fasten on in any desired position. If you like electric horns, here they are, right to hand. If you prefer the tone of the exhaust whistle, several makers offer you a choice, either foot or hand operated. And if you like to press the rubber bulb and get a bull-frog note, why go right to any or all of several booths and take your pick.

Lamps are another necessity. You may think that you will never ride at night, but

(Continued on page 98)

1917 Specifications For Busy Show Visitors

stands; gasoline strainer; tool box with tool and tire repair kit and tire pump; Remy generator, storage battery, two-bulb headlight, tail light and horn.

Finish—Military drab with Brewster green striping.

Model 17-F—Sixteen-horsepower, three-speed model. Specifications same as Model 17-J except that high tension magneto replaces Remy lighting and ignition system. Price, $275 f. o. b. Milwaukee.

Model 17-C—Six-horsepower, three-speed model, single cylinder. Specifications same as Model 17-F save that stroke is 4 inches. Price, $240 f. o. b. Milwaukee.

Model 17-E—Sixteen-horsepower, twin, single-geared. Specifications same as Model 17-F except that clutch is on rear hub, and a direct-acting pedal starter is used instead of the back-acting kick starter. Price, $255.

Model 17-B—Six-horsepower, single-cylinder, single-geared model. Specifications same as Model 17-E except for motor specifications, which are same as Model 17-C. Price, $215.

INDIAN

Hendee Mfg. Co. Springfield, Mass.

Five models, all twins.

Model NE—Powerplus twin, spring-frame, three-speed, electrically-equipped model. Price, $315.

Motor—Side-by-side valves; bore, 3⅛ inches; stroke, 3 31/32 inches; piston displacement, 60.88 cubic inches; mechanical oiler; Splitdorf ignition and electric lighting system; Schebler or Indian special carbureter.

Transmission—Roller chain to dry plate clutch and sliding gear type of three-speed on countershaft; roller chain to rear wheel.

Starter—Segmental back-acting type on left side; can be operated from saddle.

Frame—Double-bar loop type with drop forged fittings throughout, ample strength provided to carry sidecar and lugs for sidecar attachment fitted.

Control—Double-grip control of throttle and spark; clutch by interconnected hand and foot levers; three-speed by hand lever interlocked with clutch control; brakes by foot lever and handlebar lever.

Tanks—Moulded streamline type; gasoline capacity, 3¼ gallons; oil, 8 pints.

Equipment—Goodyear, United States or Firestone tires; Troxel saddles; Old Sol hornlite and tail light; substantial rear stand; tool box, tools and tire repair kit; frame pump.

Finish—Indian red, handsomely striped in black.

Model N—Powerplus twin, spring-frame, three-speed model. Price, $275. Specifications same as Model NE except that Dixie magneto replaces electric lighting system.

Model P—Powerplus twin police model, spring-frame, single-geared. Price, $250. Specifications same as Model N except three-speed is not fitted.

Model R—Powerplus twin, three-speed, military model. Price, $265. Specifications same as Model N except that rigid frame is fitted, and tandem seat and auxiliary oil tank are included; color is military drab.

Model O—Lightwin opposed motor model, 2¾ horsepower. Price, $165.

Motor—Opposed-cylinder type; bore, 2 inches; stroke, 2½ inches; splash lubrication; Dixie magneto; special Indian carburetor.

HENDERSON

Henderson Motorcycle Co., Detroit, Mich.

One eight-horsepower, three-speed, four-cylinder model. Price, $325.

Motor—Four-cylinder, 8-12 horsepower; automobile type; bore, 2 17/32 inches; stroke, 3 inches; piston displacement, 60.40 cubic inches; lubrication by mechanical oiler; ignition by Berling magneto; Schebler carburetor.

Transmission—Three-speed gear built as unit with multiple disc clutch and motor; from gearset drive is by roller chain to rear wheel.

Starter—Back-acting type on left side with mechanism fully enclosed; can be operated from saddle.

Frame—Special Henderson type heavily reinforced and with drop forged fittings.

Control—Double grip for throttle and spark; interconnected foot and hand levers for clutch; hand lever interlocked with clutch control for three-speed; brake by foot lever.

Tanks—Special Henderson type; gasoline capacity 3½ gallons; oil 8 pints.

Equipment—United States tires; Person's saddle; electric lighting at $40 additional; tool box, tools and tire repair kit.

Finish—Dark blue with gold striping.

POPE

Westfield Mfg. Co. Westfield, Mass.

Seven models—Four twins and three singles.

Model T-17—Three-speed electrically equipped twin model. Price, $275.

Motor—Pope overhead valve type; bore, 3.25 inches; stroke, 3.67 inches; piston displacement, 61 cubic inches; mechanical oiler; Schebler carburetor; Splitdorf Mag-generator ignition.

Transmission—By roller chain to countershaft disc clutch and sliding gear type of three-speed; thence by roller chain to rear wheel, chain on right of machine.

Starter—Segmental type of kick starter on left of machine operated from saddle.

Frame—Open type, double bars, heavily reinforced for sidecar work, drop forged fittings, rear sprung type.

Control—Double grip controls spark, throttle and compression release; interconnected foot and hand lever clutch control; three-speed by hand lever interlocked with clutch control; brake by foot lever.

Tanks—Double paneled gasoline tanks, capacity 3 gallons; oil capacity 6 pints.

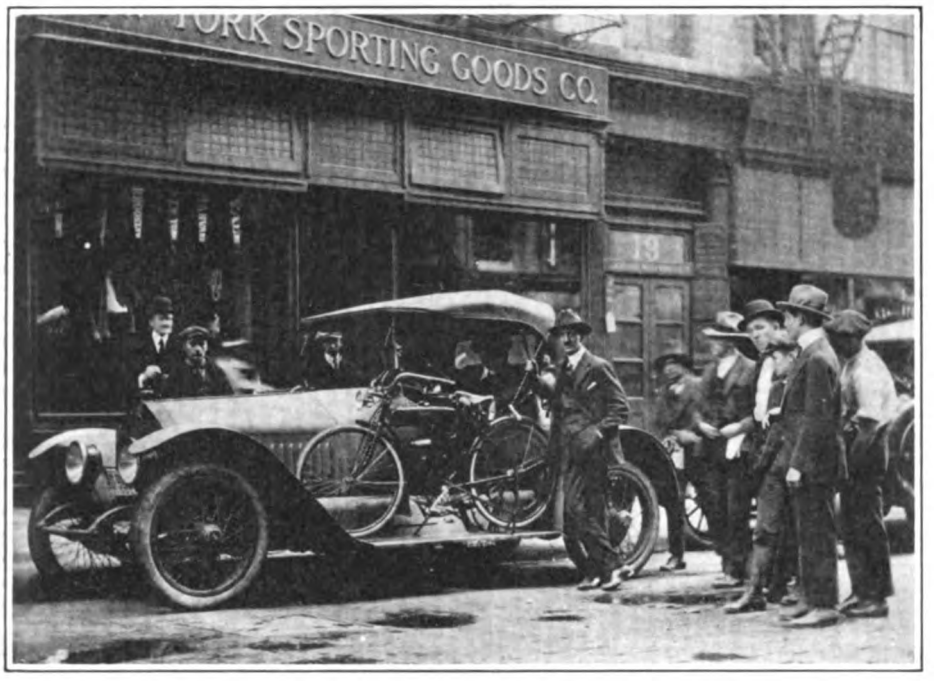
N. Y. SPORTING GOODS TAKES ON CYCLEMOTOR

Metropolitan Distributing Firm to Handle Bicycle Attachment in Large Empire State Territory and Western Connecticut—67 Dealers Appointed



Motorcar With Cyclemotors on Running Boards Used to Demonstrate to Long Island Customers—Cyclemotor Sales Manager O. A. Adams Alongside Car

NEW YORK, Nov. 8.—The New York Sporting Goods, 10 Warren street, has taken over the distribution of the Cyclemotor for the greater part of New York State and western Connecticut.

The matter has been hanging fire for some little time and O. A. Adams, sales manager for the Cyclemotor Corp. has been stationed at the New York Sporting Goods store demonstrating the newest models that have come through from the Rochester manufacturer. The deal was finally consummated with D. G. Anderson, president of the Cyclemotor Corp., came to New York and closed the matter with President F. A. Baker of the Sporting Goods company.

Messrs. Baker and Webber are giving their personal time and attention to the Cyclemotor and have made it one of their important lines. It will be handled individually through an independent department, and they anticipated an excellent year's business.

Has Large Territory

The New York Sporting Goods company's activities will be confined in New York State, south and east of a perpendicular line drawn between Wayne and Cayuga counties, and in western Connecticut. Sixty-seven dealers have already been appointed in New York territory and 14 dealers in western Connecticut have signified their desire to handle the Cyclemotor next season.

Sales Manager Adams, accompanied by E. W. MacDonald of the New York Sporting Goods company's sales force, have made a trip through a portion of Long Island, and report that orders were picked up for 75 machines.

The following dealers are among those who will represent the Cyclemotor on Long Island:

Messrs. Ward, Rockville Center; Smith, Freeport; J. de St. Legier, Hicksville; Van Ostrand, Amityville; H. Smith, Babylon; Crown Motor Co., Bay Shore; Mayer, Sayville; Satterley, Patchogue; Lillywhite, S. Hampton; Holsey, E. Hampton; Young, Sag Harbor; Osborn & Co., Greenport; Strong & Gale, Port Jefferson; O. B. Samis & Co., Huntington; Morgan, Glen Cove; R. Belidoro, Roslyn; N. Morris, Jamaica.

CYGNET TO SHOW RAIN TOP AND LIMOUSINE

Rear Car Exhibit to Have Cover for Commercial Models and De Luxe Closed Body at Coliseum

BUFFALO, N. Y.—One of the new things from the Cygnet Rear Car Co., maker of Cygnet Rear Cars, which will appear at the Chicago Show will be a rain top, to be fitted to commercial models of this make. It will afford the driver of a business Cygnet outfit complete protection from the elements, being exceptionally well made and easily rigged or dismounted. It lists at $15 complete.

A second feature of the Cygnet exhibit will be the "De Luxe Limousine," and enclosed body model, with front and side lights of glass, upholstered in cretonne and provided with electric dome lamp and other de luxe car fitments. This will be shown attached to an Indian twin motorcycle Several of these cars are now in use for advertising purposes, and in each case has been the means of increasing sales.

Sales Manager Leadley Ogden, in speaking of the new rain top, said: "The Cygnet Rear Car Company feels that the introduction of this top satisfactorily answers and clears the one big objection that has been raised by merchants of this country—that the rider of a motorcycle is not protected from bad weather.

"This top was introduced into Boston, recently, in connection with the Cygnets for the Boston Post Office," continued Mr. Ogden, "and created quite a sensation. In fact, I might say, that dealers who heard of it became strong Cygnet devotees and stated that they were now able to 'talk turkey' to commercial prospects."

NEW FEDERAL TIRE

Cudahy Company Will Display "Traffik" Tread Shoe

CUDAHY, Wis., Nov. 6.—The Federal Rubber Co. announces that it will have on view for the first time at the Chicago show a new type of motorcycle tire, known as the "Traffik" tread tire.

The new tire is distinguished by a deeply patterned non-skid tread of more or less fantastic design which the Federal company has been using with the best of results on one of its many automobile tire lines; the tread is black the sidewalls of the tire being gray.

In construction, the tire is said to be identical with the Traffik tread automobile tire insuring long wear and freedom from blowout and punctures.

MERKEL NOT READY

Plans Not In Shape for Him to Exhibit at Chicago

NEW YORK, Nov. 7.—Visitors to the Chicago show who go there with the expectation of getting a glimpse of Joe Merkel's new motor wheel which is still so deeply shrouded in mystery are to be disappointed.

Merkel explains that although plans are rapidly approaching a state of perfection —indeed, as for the new machine itself, that has long since been whipped into final shape—the time will not be ripe for his announcement until just prior to the New York show.

He is rapidly rounding out the organization which is to undertake the manufacture and sale of the device and is positive that in another couple of weeks he will be in a position to disclose full details both as to the model and the company.

DAYTON PLANS

National Advertising Campaign To Be Launched

INDIANAPOLIS, Ind.—The Sidener-Van Riper Advertising Company of this city has been retained by The Davis Sewing Machine Company, of Dayton, Ohio, to assist in the preparation of an extensive advertising campaign on Dayton bicycles during the coming season.

Messrs. Sidener and Van Riper have had several conferences with General Manager H. M. Huffman and Advertising Manager S. H. Ankeney of the Davis plant during the past two or three weeks, and announce that the Dayton bicycle campaign is based solely on the idea of rendering real help to the Dayton dealers throughout the country in creating for them a wider market for Dayton bicycles.

A. O. SMITH CO. PLANS A STOCK INCREASE

Maker of Motor Wheel to Offer Preferred and Common Shares in New Corporation—Big Earnings

MILWAUKEE, Wis.—In order to effect operations on a scale commensurate with business of the present and future, the A. O. Smith Co., maker of Smith Motor Wheels and pressed steel products, is offering stock in preferred and common shares in the A. O. Smith Corporation. This latter organization is to take over the business of the A. O. Smith Co.

The new company will have $3,000,000 in 7 per cent. cumulative preferred stock and 100,000 shares of common stock. Preferred shares are offered at $98, and with them subscription rights to the common stock at $35, to the amount of 40 per cent. of the amount of preferred taken.

Net earnings of the A. O. Smith Co. for the year ending July 31, 1916 were $1,505,-162 and a net earning of fully $1,800,000 is expected for the year ending July 31, 1917. Unfilled orders and open contracts on hand July 31 last totaled more than the gross sales of the entire previous year. One of the charter provisions of the new company will be a prohibition of more than $6 per share per year dividends on common stock until the preferred has been reduced to at least $1,500,000 by redemption from the present sinking fund.

"GRIFF" IN A TYPICAL POSE

Griffith, of New Departure Mfg. Co., Now Traveling in California

FIRESTONE CHANGE

R. J. Firestone Becomes Vice-President of Tire Company

AKRON, O., Nov. 8.—Following closely the announcement of various important decisions reached by the stockholders of the Firestone Tire & Rubber Co. at their meeting last week, a brief report of which is printed elsewhere in this number, comes the news that an equally important change has just been made in the executive staff of the company.

R. J. Firestone, formerly general sales manager, has become vice-president of the company, and A. G. Partridge succeeds Mr. Firestone in the position of general sales manager.

SCHICKEL MODELS

Lightweight Two-Speed Models to Make Bow at Chicago

STAMFORD, Conn., Nov. 8.—Several new models are coming from Schickel and will be on display at the Chicago show. While the Schickel folk are reticent on the subject, preferring to hold the matter as a show surprise, it is known that the Schickel lightweight will be offered in both single-geared and two-speed models at sprice from $109 up.

It is also understood that Schickel models, especially adapted for commercial use, are among the offerings of the Schickel Motor Co.

MORE CAPITAL FOR BEAN

BEREA, Ohio.—The Bean Tool & Sales Co., successor to the Bean Co., has recently increased its capital and is now in a position to manufacture the well-known Bean products on a much larger scale than heretofore. New machinery has been added for the purpose.

NEW USCO TIRE FEATURES STRENGTH

Latest Motorcycle Product From United States Tire Co. Combines Non-Skid Qualities with Exceptional Wearability

IT has been quite generally understood for some time past that the United States Tire Co. was preparing to bring out a new motorcycle tire in its popular Usco tread design, but the company has deferred making any formal announcement until this time, for the simple reason that it could not procure sufficient mold equipment to fill orders, outside of a limited number of orders which it was able to supply to manufacturer.

The company now states that it is prepared to supply the new Usco tread motorcycle tire to the trade and public in the 28 by 3 size. The United States Tire representatives insist that it is impossible to form a proper conception of the new tire without seeing it complete and in section, and for that reason a great number of sample sections have been sent to the branches throughout the country for distribution. These sections will go to both salesmen and dealers.

One of the first impressions gained from an inspection of the new Usco tread product is that it looks a good deal like an automobile tire, being unusually big and strong. It has white sidewalls and black tread. The Usco tread design is particularly well adapted to all weather motorcycle riding because it has a non-skid feature and plenty of stock on the tread, where the heavy wear comes. The carcass is made of four-ply heavy automobile fabric, also with a breaker strip, and with cushion stock between the main ply and the breaker strip. The fabric is bound together by the best quality friction, and the complete casing weighs approximately 12 pounds.

Section of Usco Tire

One of the main features of the Usco tire is that it is an over-size tire by about a quarter of an inch, so that it comes as near being an automobile tire for a motorcycle as is possible.

THORS GOING FAST

Holland Representatives Take 100; Big Increase for 1916

CHICAGO, Ill.—From the Aurora Automatic Machinery Co. comes the announcement that 100 Thor motorcycles have been sold to M. Adler & Co., of Amsterdam, Holland. This order is for immediate shipment, and the Amsterdam representatives state that it will no more than satisfy the prospects which have already been lined up.

Another Thor bulletin is to the effect that Ben Ruderman, of Brooklyn, N. Y., has doubled his contract for 1917. Ruderman is the Thor representative in Brooklyn and Greater New York. He has received 27 of the 1917 Thors up to the present time.

The business in Thor machines up to Nov. 1 was 257 per cent. higher than for any previous year up to Dec. 1.

SIGN UP AGAIN

Former Dealers Renew with Larger Orders, Says Huffman

DAYTON, O.—"Every dealer who really handled the Dayton Motor Bicycle this past summer—that is, sold a worthwhile number of machines—has signed up with us already for a larger number for 1917" says Horace M. Huffman, general manager of the Cycle Department of the Davis Sewing Machine Co. "This is the best way I can tell of the success these little machines have met with."

The Davis company is pushing the motor bicycle in earnest this season and expects to put on a fourth road man in the near future. The three salesmen now out, says Manager Huffman, are averaging a contract in three out of every four towns they make, and are unable to cover the territory fast enough to care for all agency inquiries received at the factory.

FIRESTONE FUND

Stockholders Set Aside $1,000,000 to Promote Employees' Welfare

AKRON, Ohio.—The stockholders of the Firestone Tire & Rubber Company, at their meeting a few days ago, decided to set aside $1,000,000 for an employees' fund instead of declaring the usual stock dividend. It was decided at the same meeting to fix the authorized capitalization of the company at $15,000,000, and to reduce the nominal value of the shares from $100 to $10. Approval was also given to a proposal to sell $500,000 worth of common stock to employees and officers of the company, and the Board of Directors was increased from five to seven members.

Half of the million dollar fund for the benefit of Firestone employees is to be invested in Firestone stock, and the balance in other good security, the income to be used for the promotion of the employees' welfare.

FOREIGN MOTOR BICYCLE ORDER

DAYTON, O.—An order for 100 motor bicycles, half to be ladies models, was recently received at the Davis Sewing Machine Company factory from abroad. An initial shipment of motor bicycles had been made to this customer last summer and on receipt of it he ordered the 100 machines mentioned above.

CANADIAN SHOW

To Be Held in Montreal January 20-27; 26,000 Ft. of Space

MONTREAL, Que.—The structure secured for the "National Show of Eastern Canada" is the Almy building, Montreal, which will provide a floor space of 26,000 square feet. Manager T. C. Kirby is already allotting exhibit spaces to applicants and many enquiries have been received from the United States as the Montreal display will be the only motor and cycle exhibition in the whole Dominion until next August. The show is to be held from January 20 to 27. The address of the manager is the Windsor Hotel, Montreal. Among the features will be displays of motorcycles, motor wheels, bicycles, accessories and motor boats.

ATTRACTIVE CATALOG

Latest From Harley-Davidson Is Artistic and Comprehensive

MILWAUKEE, Wis.—A catalog of high quality describing a product of the same standard is that just issued by the Harley-Davidson Motor Company, of this city, for the 1917 season. The covers present an attractive autumn scene in several colors, eloquent of the delights of solo and sidecar motorcycling.

Within, the description of the new models is most comprehensive and the illustrations neat and all-embracing. The machines are shown with attractive backgrounds typical of the season. The center pages show a solo rider beside the three-speed electric twin model, the leader for the new season.

SPLIT RAISES FIRESTONE STOCK

NEW YORK.—As a result of the Firestone Tire & Rubber Company's decision to split present shares of stock, the par value of which is $1,000 into ten shares of $100 par value each, the price of the stock has gone up ten points. When the announcement of the decision was made, stock listed at $1,155. Shortly after the news of the company's action reached the exchange the stock jumped to $1,165.

CARLSTROM USED SPLITDORF PLUGS

NEW YORK,—The motor which carried Victor Carlstrom in his aeroplane flight from Chicago to New York a few days ago had for its ignition equipment 16 Splitdorf spark plugs. Carlstrom's actual flying time was 8 hours, 28 minutes, 30 seconds. The Splitdorf plugs, two of them to each of the eight cylinders in his motor, gave the airman perfect service throughout, although the strain due to the altitude, the length of the flight and the high r.p.m. of the big motor was enough to try the stamina of any plug.

UNITED STATES TIRES ON DAYTON

It should have been stated in connection with the 1917 Dayton announcement in the Nov. 2 number that the Dayton line for the coming season will be equipped with United States tires. Owing to a misunderstanding, it was stated that another make of tires would be used.

Digitized by Google

COLUMBIA THE 1917 POPE-MADE LEADER

Westfield Mfg. Co. Brings Out Two New Models in That Line—Cleveland, Tribune, Crescent and Rambler Lines Also Emphasized—Columbia Models Priced From $26 to $60

WESTFIELD, Mass., Nov. 7.—There are so many high spots in the 1917 bicycle offerings of the Westfield Manufacturing Company—that is, Pope-made bicycles—that it is difficult, even for the experienced cycle man, to tell just where the beginning should be made in the announcement. The Westfield folk themselves, however, are this year putting slightly more emphasis on the well known Columbia line than on either the Cleveland, Tribune, Crescent or Rambler lines, which are among the best known of the numerous Pope-made and Pope name-plated machines.

In the Columbia line, for instance, two new models have made their appearance. The first, and perhaps the more important, since it represents a development of a type first conceived by the Westfield folk, is the Columbia Motobike. The second is a new men's model, the Columbia Arch Bar model, which is offered for those desiring an unusually strong frame of attractive design.

Cleveland Roadster

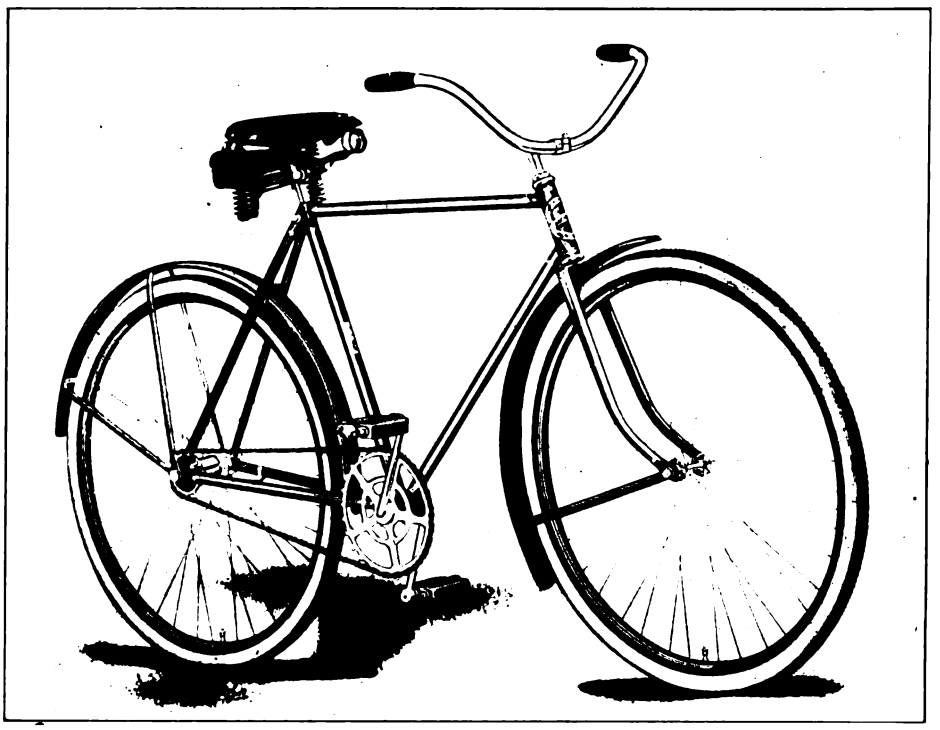
In the Cleveland line emphasis is being placed on the Roadster model, which is distinguished by the Cleveland type of two-piece crank and the hanger construction. It is equipped with extension handlebars, Pope rubber pedals, Eagle Easy saddle, United States single tube tires, New Departure brake and Diamond E. spokes.

The women's Roadster, with the exception of the saddle, which is a Troxel Universal, and the straight adjustable handlebars, is identical.

In the Tribune line the Blue Streak model stands out in front. It is finished in robin's egg blue and striped with black and is equipped with United States tires, Eagle Easy saddle and Corbin brake.

The Roadster model heads the Crescent offerings for the 1917 season. Its distinguishing feature is the Crescent two-piece crank hanger, which has always been a Crescent feature. Messenger Superba saddle, Fisk Gripfast tires, New Departure brake and Diamond E spokes comprise the equipment.

The Rambler line is also distinguished by an out-of-the-ordinary crank hanger construction. The two-piece crank and dished sprocket permits of the strain being centered on the bearings. The line is fitted with Eagle Easy saddles on the men's models, and Troxels on the ladies' Fisk tires and Morrow coaster brakes.



Men's Columbia Roadster, Model 716, Chain Driven and Fitted with Guards

Model 710, the Daily Service, Fitted with Front Basket and Rear Carrier

Pope Head and Frame Details

In the Columbia line, which comprises twelve models varying from $60 down to $26 in price, the Columbia chainless is, as ever, the leader. Its specifications are as follows:

Frame height of men's 20, 22 and 24-inch, of women's 20 and 22-inch, finished in black enamel with double white stripes. Extra large head sets with 3-16-inch balls. Eagle Easy Special saddle on men's and Troxel No. 1 on women's. Pope high grade rubber motorcycle type, and Pope 3 1-4-inch pedals. Men's gear 74-inch, women's 67-inch .092 Diamond E spokes. Extension handlebars on men's, plain adjustable on women's with white corrugated

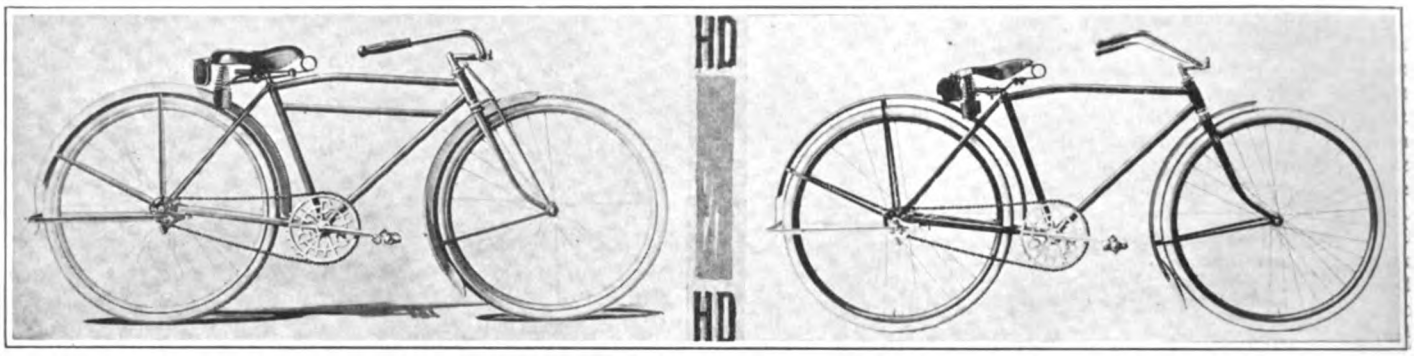
SEPTET OF HARLEY-DAVIDSON BICYCLES

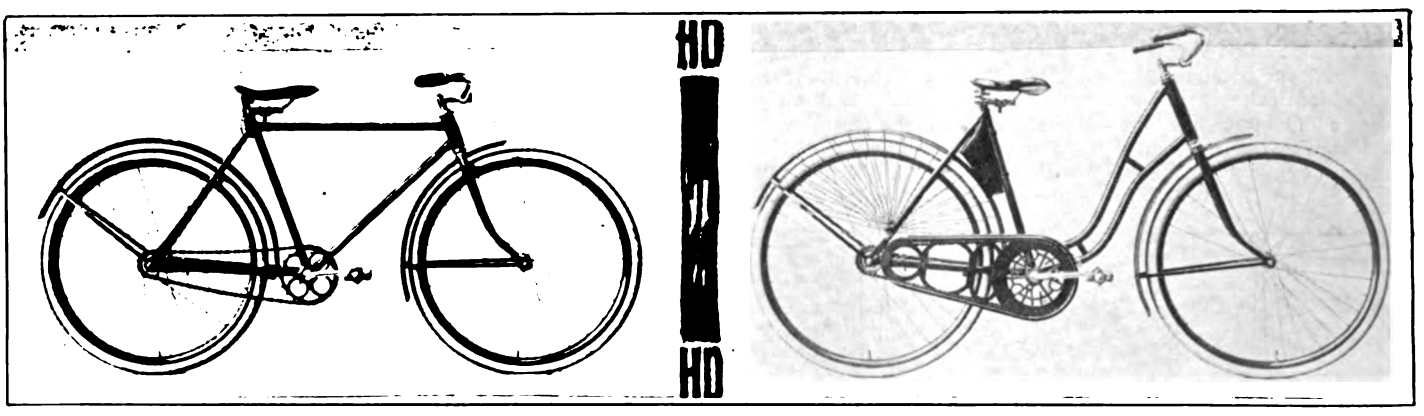
Milwaukee Firm Enters Pedal-Cycle Market With Wheels to Suit All Classes of Riders—Interchangeability of Parts a Feature—Coaster Brakes in Regular Specification—High Class Equipment Throughout



Left, the Motorcycke, Model 4-17, with Extra Truss Bar and Motorcycle Handlebars; Right, the 7-17 Special with Curved Top Bar

MILWAUKEE, Wis., Nov. 8.—Another Harley-Davidson line will make its bow to the cycling world at the Chicago show. Its coming was heralded in the pages of **Motor Cycle Illustrated** on September 28. It is the line of Harley-Davidson bicycles—two-wheelers of the pedal-driven type, which have been gotten out in a style to match the Harley-Davidson motorcycle in quality as well as in color.

For several seasons the Harley-Davidson Motor Co. has been under pressure from dealers who handled bicycles and from others who would handle them if they were made in the Harley-Davidson factory. The



Left, the Boy Scout, 4-17, a Juvenile Model; Right, 3-17, Ladies Standard—Both Have Coaster Brakes as Regular Equipment

officials in the big Milwaukee factory gave this demand much serious thought and decided to accede to their representatives' calls for the 1917 season. The result is a complete line with interchangeability of principal parts on all models.

Seven models are listed by the Harley-Davidson Motor Co. They are: Model 1-17, Rookie, $30; 2-17, Standard, $35; Model 3-17, Ladies Standard, $37; 4-17, Motorcyke, $45; Model 5-17, Boy Scout, $30; 6-17, Girls' Juvenile; Model 7-17, Special, $35. The adult models include all but 5-17 and 6-17, which are juveniles.

Interchangeable Feature

One of the chief features of the Harley-Davidson line of bicycles is an interchangeability of principal parts on all of the seven models, including those for ladies and for juveniles. The head fittings, made extra large, are the same on all machines, the two cups, cones, ball retainers, lock nut and washers all being interchangeable. The same is true of the crank hangers and their components.

Wheels on Harley-Davidson adult models have 36 spokes front and rear. The cones, ball-retainers, axles, nuts and washers are interchangeable. Only one style of rim need be stocked by the dealer. Handlebar stems are all the same size—⅞-inch. All seat posts are 13/16-inch.

All machines are fitted with the New Departure coaster brake as regular equipment. American wood rims, No. 71 Diamond roller chains, Harley-Davidson pedals with substantial rubbers, Troxel waterproof top saddle and Fisk or Firestone tires are provided.

Olive Drab Finish

The Harley-Davidson bicycles are neat in appearance, resembling the firm's motorcycle product in this respect, and also in the finish—the military olive drab. From name plate to rear wheel, the bicycles harmonize well with their big brothers, the motorcycles.

Brewster green is used for paneling. The top bar is paneled in this green with gold edging, with a white center strip and double Brewster green stripe on each side. This striping appears on frame and fork and the panel is applied to the rims and mudguards. Harley-Davidson transfers are used on the Standard, Motorcyke, 7-17 Special and Boy Scout models. All models are finished with three coats of enamel, oven dried, and a varnish coat.

Frame Construction

Frames are of one-inch tubing, 18 gauge. Joints are lapped with great care, the inner and outer members being machined to fit within close limits. They are press-fitted before brazing, in fact. Two reinforcements are used for each frame joint, the first being a fish-tail type with a backing reinforcement within it. Great care is exercised in heat-treating the frames and brazing them to assure a certain flow of flux to all joints and obtain homogeneity of the whole and a maximum of strength.

The one-piece method is used in the construction of the frame head, seat post cluster and crank hanger bracket. These are built of pressed steel and reinforced to assure absolute rigidity and correct alignment of the frame and provide the greatest possible amount of strength without undue weigth at points of greatest stress.

Motorcycle and 7-17 Special

Motorcycle design is evident in the Motorcyke, and the 7-17 Special. Each of those models has a gracefully-curved top bar. The top bar has a drop of two inches slightly

MINOR CHANGES IMPROVE THE 1917 MOTOR WHEEL

Policy of the Smith Co. to Add Improvements as They Are Developed Eliminates Radical Changes —New Control Arrangement and Inlet Valve Construction—Price Remains at $60

MILWAUKEE, Wis., Nov. 6.—To the casual observer at the Chicago show, the Smith Motor Wheel that is to be offered under the 1917 nameplate will appear, to all intents and purposes, identical with the product that has made a name in the cycle world for the A. O. Smith Co. almost as famous as the big Milwaukee concern has earned for itself in the automobile field.

There are changes in the Motor Wheel, however. Not all of them have been made at this time, for it is a distinct Smith policy to incorporate such changes and improvements as are found expedient at any time of the year, shows and announcements regardless. Thus, for instance, if some carefully conducted series of experiments yields the fact that an improvement can be made, the Smith folk get busy without thought as to the time of the year and incorporate the improvement in the next shipment of Motor Wheels to leave the factory.

Recently Added Features

During the last season, for instance, such features as a self-cleaning exhaust, an improved oil pump making for positive automatic and thorough lubrication and an automatic shut off on the carbureter were incorporated in the Motor Wheel and the new features they incorporated in the shipments just as soon as they were developed instead of holding them off to be sprung now.

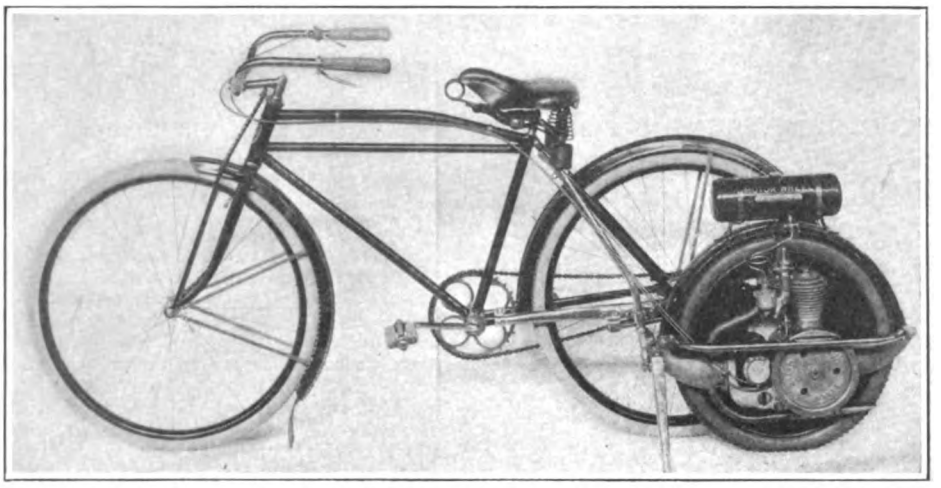
Every Motor Wheel rider, therefore, has had a wheel which at the time of purchase has been right up to the minute, so to speak—the "last word" in motor wheel construction.

There are several improvements which have just been developed however, and which will be disclosed to the interested observer at the Windy City Show for the first time.

New Control System

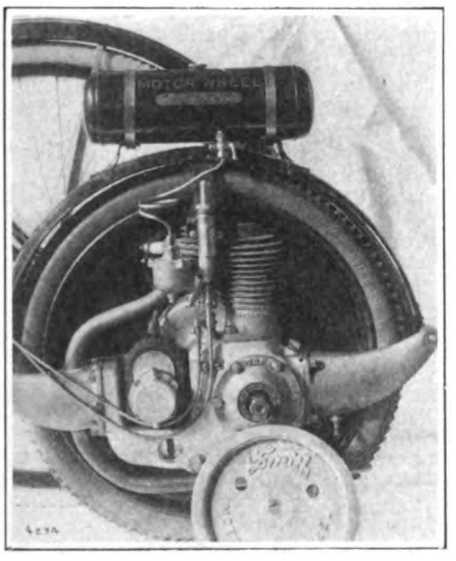
Chief among these is a redesigned control system which makes for greater facility in handling the little vehicle and at the same time makes for greater safety in case the control wire to the carbureter should break.

The new control system comprises a thumb lever attaching to the right grip of the handlebar which actuates the carbureter throttle only, and not the compression release and throttle together as with the old arrangement. As heretofore, the lever movement is transmitted to the throttle through the intermediary of Bowden wire transmission.



New Model of Smith Motor Wheel Attached to Bicycle—Note Double Lever Control

For realeasing the compression when it comes to starting the motor, a separate control lever is positioned on the left lever, also acting through Bowden wire transmission. This mechanism acts on the exhaust valve spring, which in turn serves to raise the exhaust valve slightly and release the compression.



View with Flywheel Removed

It is pointed out that with the new control arrangement, it is possible to start the motor with the throttle far enough opened to supply a goodly amount of mixture to ensure ready starting; with the old arrangement, the throttle had to be fully closed to release the compression and suddenly snapped open when the motor was set in rapid motion by pedaling the machine along.

Emphasis is laid on the fact that with but a few moments' work and negligible expense, the new control system can be fitted to existing Motor Wheel models and that the conversion is well worth while since it forestalls all chance of the machine running away in case the throttle control should break with the throttle open; in such a case the motor can readily be stopped by releasing the compression.

New Intake Valve Construction Showing Peaned End on Valve Stem

PREST-O-LITE SUITS

Gas Tank Firm Gets Decision in Two Refilling Cases

INDIANAPOLIS, Ind.—The injunction obtained early this year by the Prest-O-Lite Co. against the Sun-Lite Gas Co., of this city, has been made permanent, and the latter firm has been perpetually restrained from refilling Prest-O-Lite tanks without removing the Prest-O-Lite label and replacing it with the Sun-Lite label. The U. S. District Court for the Indiana District issued both injunctions.

The other decision obtained by the Prest-O-Lite firm is against the Power City Sun-Lite Gas Co., of Sioux Falls, S. D. The usual form of injunction was issued.

FIRST AD. BY AEROPLANE MAIL

NEW YORK, Nov. 4.—The first advertising order to be carried through the mails by aeroplane came from the B. F. Goodrich Company to the New York *Times* in the form of a contract for 50,000 lines of space. The mail was carried by Victor Carlstrom, the aviator who came from Chicago to New York yesterday.

Pennsylvania Rubber Co., Jeannette, Pa.
Polson Rubber Co., 331 S. W. blvd., Kansas City, Mo.; "Bull Dog" tire boots.
Rutherford Rubber Co., Rutherford, N. J.; "Sterling."
Saufley Supply Co., 1519 McGee st., Kansas City, Mo.; "Sycomo."
Swinehart Tire & Rubber Co., Akron, O.
United States Tire Co., 1790 Broadway, New York; "United States" tires and tire accessories.
Voorhees Rubber Co., Jersey City, N. J.; puncture proof inner tube.

TIRE CHAINS

American Chain Co., Bridgeport, Conn.; "Weed" chains.

TRICARS AND REAR CARS

Reading Standard Co., Inc., 340 Water st., Reading, Pa. "R-S" commercial tricar.
Cygnet Rear Car Co., Buffalo, N. Y. "Cygnet Rear Cars."

TOOLS AND TOOL BOXES

Acorn Brass Mfg. Co., Aurora, Ill.; tool boxes.
American Tire & Rubber Co., 1229 Michigan ave., Chicago, Ill.; "Three-In-One" valve tools.
Armstrong Brothers Tool Co., 339 West Francisco ave., Chicago, Ill.
Atlas Specialty Mfg. Co., 219-21 North Michigan ave., Chicago, Ill.; tool bags and rolls.
Auto Specialty Co., West Haven, Conn.; miscellaneous small tools.
Bean Co., Berea, O.; "Bean" chain repair tool.
Billings & Spencer Co., Hartford, Conn.; wrenches and other tools.
Bonney Vise & Tool Works, Inc., Allentown, Pa.
Caillet Bros., Wellington, Colo.; "Peerless" chain tool.
Cronk & Carrier Mfg. Co., 150 Lake st., Elmira, N. Y.; wrenches, etc.
Frasse, Peter A., & Co., Inc., 410 Canal st., New York; "Renold" chain tools.
Globe Machine & Stamping Co., The, 1249 West 76th st., Cleveland, O.; tool boxes.
International Stamping Co., 400 North Leavitt st., Chicago, Ill.; tool boxes and combination Prest-O-lite tank and tool box.
Mesinger Mfg. Co., H. & F., 144th st., and Austin pl., New York; tool bags.
Motorcycle Tire Jimmy Co., St. Mary's, O.; tire jimmy.
Nathan Novelty Mfg. Co., 83 Reade st., New York; tool bags.
Persons Mfg. Co., Worcester, Mass.; tool bags.
Reading Cycle Mfg. Co., Reading, Pa.; tire repair tools, nipple grips, etc.
Stevens & Co., 375 Broadway, New York.
Superior Metal Products Co., Elyria, O.; tool bags.
Troxel Mfg. Co., The, Mill st., Elyria, O.; tool boxes and bags.
Wolverine Leather Goods Co., 61 Jefferson ave., Detroit, Mich.; tool bags.

TUBING

Breeze Carbureter Co., 252 South st., Newark, N. J.; flexible tubing.
Crerar, Adams & Co., 107 North Canal st., Chicago, Ill.
Elyria Iron & Steel Co., Cleveland, O.; welded steel tubing.
Frasse, Peter A., & Co., Inc., 421 Canal st.; seamless steel tubing.
New York Wire & Spring Co., 586 Washington st., New York; flexible tubing.
Pittsburgh Steel Products Co., Pittsburgh, Pa.; seamless steel tubing.
Standard Welding Co., Cleveland, O.; frame tubing, rims, seat posts, etc.

VALVES

Andrews, W. D., 632-4 Main st., Buffalo, N. Y.; auxiliary air for carbureters.
Angsten-Koch Co., 215 Englewood ave., Chicago, Ill.; "A-K" air valves.
Auto & Machine Spring Co., 106 East 11th st., New York.
Barco Brass & Joint Co., Chicago, Ill.
Hibbard Engineering Co., 1036 Majestic Bldg., Detroit, Mich.
Imperial Brass Mfg. Co., 1200 West Harrison st., Chicago, Ill.; needle valves, shut-off and drain cocks, etc.
Lewis Electric Welding & Mfg. Co., 4080 Detroit, ave., West Toledo, O.
Rich Tool Co., 410 Railway Exchange, Chicago, Ill.; "Rich Tungsten Valves."
Steel Products Co., Toledo, O.

VALVE GRINDING COMPOUNDS

Hollingshead, The R. M., Co., Camden, N. J.; "Whiz."
International Mfg. & Sales Co., 6304 Wallace st., Chicago, Ill.; "Peerless" and "E-Z."
Stewart & Co., 171 Broadway, New York; "Gryndyn."
Van Cleef Bros., 7709 Woodlawn ave., Chicago, Ill.; "Dutch brand."

VARIABLE GEARS

Corbin Screw Corporation, New Britain, Conn. "Corbin" two-speed hub for bicycles.
Cycle Mfg. & Supply Co., 180 North Dearborn st., Chicago, Ill. "Sturmey-Archer" three-speed hubs for bicycles.
Eclipse Machine Co., Elmira, N. Y. "Eclipse" two-speed for motorcycles.

Summary of 1917 Motorcycle Specifications

(Continued from page 37)

Equipment—United States tires; Troxel saddle; luggage carrier; jack type of rear stand; front stand; tool box, tools and tire repair kit.
Finish—Pope gray with handsome striping.
Model T-17—Three-speed, twin-cylinder, spring-frame model, specifications same as above, with exception of Dixie magneto which replaces lighting system. Price, $275.
Model TM-17—Three-speed, spring-frame, single-cylinder model, specifications same as T-17. Price, $240.
Model L-17—Single-geared, spring-frame, twin-cylinder model, specifications same as Model T-17 with exception of starter and three-speed, neither of which are fitted. Price, $240.
Model L-17 Special—Specifications same as Model T-17 except three-speed is not fitted. Price, $250.
Model M-17—Single-geared, single-cylinder model. Specifications same as Model TM-17 except that three-speed is not fitted.
Model H-17—Four-horsepower, single-cylinder, lightweight model, belt drive, loop type frame, 26-inch wheels. Price, $140.

READING-STANDARD

Reading Standard Co. Reading, Pa.
Three models—Two twins and one single; all three-speed.
Model 17-TE—Twelve-horsepower twin, electrically equipped. Price, $315.
Motor—Side-by-side valves, bore 3⅛ inches; stroke, 3¼ inches; piston displacement, 67 cubic inches. Lubrication by automatic mechanical oiler; Schebler carburetor; ignition by Bosch lighting and ignition dynamo.
Transmission—By roller chain to multiple disc clutch on countershaft three-speed of sliding gear type; thence by roller chain to rear wheel.
Starter—Back-acting segmental type kick starter acting on countershaft.
Frame—Keystone double-bar type with drop forged fittings throughout; sidecar lugs provided.
Control—Grip control of spark, throttle and compression release; clutch by interconnected foot and hand levers; three-speed by hand lever interlocked with clutch control; service brake by foot lever; emergency brake by grip lever.
Equipment—Goodyear, Firestone or United States tires; Mesinger Air Cushion saddle; heavy rear stand; tool box with tools and tire repair kit.
Finish—Reading brown.
Model 17-T—Twelve-horsepower twin, three-speed model. Specifications same as Model 17-TE except that Bosch magneto is used instead of ignition and lighting system. Price, $275.
Model 17-S—Six-horsepower, single, three-speed model. Specifications same as Model 17-T except for single-cylinder motor. Price, $240.

THOR

Aurora Automatic Machinery Co., Chicago, Ill.

Six models—Five twins and one single.
Model 17-AE—Fifteen-horsepower twin, three-speed, electrically equipped. Price, $325.
Motor—Bore 3.57 inches, stroke 3.80 inches; piston displacement 76 cubic inches. Overhead inlet valves inclosed in cylinder pockets. Lubrication by mechanical oiler supplemented by hand pump. Schebler carburetor. Ignition by Splitdorf Mag-dynamo.
Starter—Segmental back-acting kick starter on left side of machine, can be operated from saddle.
Frame—Open type of double-bar frame amply reinforced to carry sidecar load with drop forged fittings and sidecar lugs.
Equipment—Firestone, Goodyear or United States tires, steel luggage carrier; front and rear stands, rear stand of easy lifting type; tool box with tool kit and tire repair kit; electric two-bulb headlight and horn and electric tail light.
Finish—Two-shade blue handsomely paneled and striped.
Model 17-A—Fifteen-horsepower, twin, three-speed model. Specifications same as Model 17-AE except that magneto replaces lighting and ignition system. Price, $285.
Model 17-UE—Twelve-horsepower, twin, three-speed, electrically equipped. Specifications same as Model 17-AE except motor dimensions, which are: bore, 3.25 inches, and stroke, 3.60 cubic inches; piston displacement, 61 cubic inches. Price, $315.
Model 17-U—Twelve-horsepower twin, three-speed model. Specifications same as Model 17-UE except that magneto replaces electric lighting and ignition system. Price, $275.
Model 17-V—Six-horsepower twin, three-speed model. Price, $250. Inlet valves overhead and not enclosed; bore, 2.75 inches; stroke, 3.25 inches; piston displacement, 38.6 cubic inches. Mechanical oiler; Schebler carburetor; magneto ignition. Other specifications follow closely those of the larger models.
Model 17-Y—Four-horsepower single, two-speed service model. Price, $200. Motor features similar to twin models; bore, 3.25 inches; stroke, 3.60; piston displacement, 31.50 cubic inches. Mechanical oiler, Schebler carburetor; magneto ignition.

EXCELSIOR

Excelsior Motor Mfg. & Supply Co., Chicago, Ill.

Excelsior models for the coming season have not as yet been announced but they are promised for the opening of the Chicago show.

SCHICKEL

Schickel Motor Co. Stamford, Conn.
The new Schickel models have not been announced.

MORE COMFORT BUILT INTO 1917 PULLMANS

Triangular Frame, Special Front and Rear Connections and Coach Built Body Retained—Roomier Body, Flexible Seat Post Connection and Alterable Spring Arrangement Make for Luxury

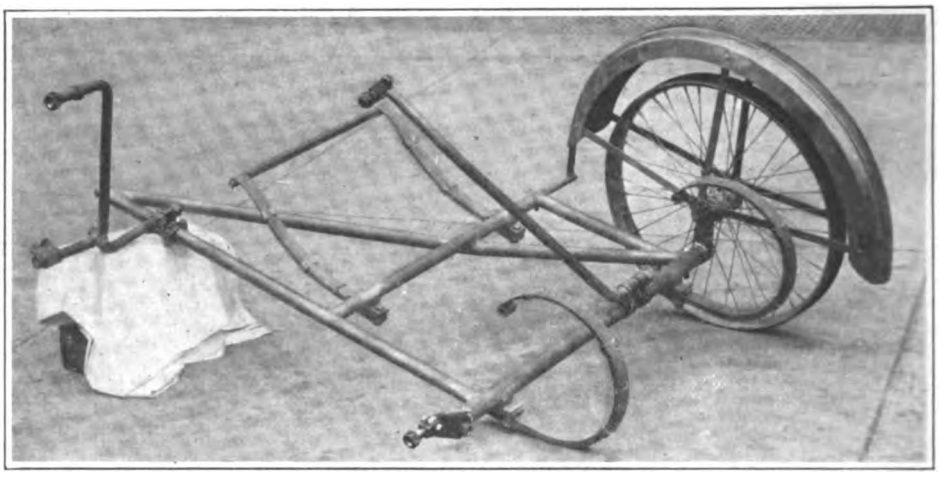
DETROIT, Mich. — Some minor improvements in the means of attaching the car to the motorcycle, a slightly altered spring arrangement whereby the spring specifications can be altered in a couple of moments to suit the individual weights of the users, a slightly wider and longer body giving that added inch or so of leg room that means real comfort—these are the biggest of quite a fund of detail changes which characterize the 1917 Pullman sidecar from the 1916 models.

In its main features, however—the underlying constructional principles upon which the Pullman has made its success—the Pullman line remains unchanged. The straight line type of chassis diagonally braced by a truss tube running the entire length of the frame, a construction which provides the utmost in strength and rigidity by dividing the frame into a series of triangles, is retained. The engineering principles upon which the construction is based are correct, and in practice the construction has been found to render the best possible sort of service.

The wonderful front triangular brace—the brace which, by distributing the strain

Coach-Built Body with Classy Lines

of the sidecar over the entire length of the drop tube of the motorcycle frame, did away with frame breakage entirely, has been retained substantially intact; likewise, the rear-hinged joint is again found in the 1917 construction. A double coil spring has been added to the seat post brace at the rear axle clamp, providing just the proper



Pullman Chassis Showing Triangular Front Brace and Sturdy Frame Construction

degree of resiliency to relieve the motorcycle of all vibration due to the travel of the sidecar wheel over rough stuff.

It is pointed out that with these connections after the sidecar has once been properly lined up with the motorcycle, detachment and subsequent attachment is merely a matter of the removal and replacement of three bolts—the matter of but ten minutes at the outside and very little trouble.

Coach-Built Body

The third Pullman feature that has gone a long way in contributing to its success is the coach-built body, and this is continued substantially as in former models with the exception of the slight enlargement heretofore noted, and the fitment of a foot rest at just the proper angle for the maximum of comfort.

In the springing arrangement some real novelty is found. Individual front and rear C springs of special analysis steel are mounted on drop-forged spring perches which are solidly welded to the chassis members.

By this arrangement it is a simple matter to add a new leaf to the spring in case a spring of greater tension is desired or to remove one in the case greater resiliency is desired.

Ordinarily unless otherwise specified, the springs comprise three leaves both front and rear, but upon specification the four-leaf spring will be supplied.

The adjustable feature of the rear axle remains the same, although details have been improved. The axle-spindle is now securely bolted to a drop forged arm, making removal and replacing of the axle-spindle an extremely simple matter.

The mudguard is firmly held in place with a trio of "U"-shaped straps joined to stampings on each end of the axle-spindle, and is also strap-fastened at front to a telescoping rod adjustable for trackage width.

The Pullman factory at Ionia, Mich., is the largest and only sidecar factory in the world making its own drop-forgings, stampings, and springs.

Preparations are being made to care for the manufacture and marketing of from 5,000 to 6,000 Pullmans for the coming season which indicates in itself just what the Harry Svensgaard Sales Corp. thinks of the coming year's demand for side cars.

BOSCH SERVICE

Ten New Service Stations Established in Various Localities

NEW YORK, Nov. 6.—The Bosch Magneto Co. has extended its far reaching line of Bosch Magneto service stations by the addition of ten new individuals and companies to take care of the needs of Bosch users in various parts of the country.

It is pointed out that the new service folk are fully equipped with complete sets of special tools and testing apparatus adequately to take care of any sort of repair and adjustment work on the Bosch mechanism, and each of them employs at least one specially trained magneto man, a graduate of the Bosch Magneto School. The new service stations are as follows: Bangor, Me., A. L. Ebbeson; Bridgeport, Conn., Auto Service Co.; Jacksonville, Fla., Wilson Electric Co.; Mobile, Ala.; Harrington Motor Co.; New London, Conn., Garlock & Haynes; San Jose, Cal., Auto Ignition Co.; St. Paul, Minn., Essanell Electric Co.; Tonopah, Nev., Tonopah Electric & Tire Co.; Uniontown, Pa., Tri-State Garage Co.; Wilmington, Del., Tourist Garage & Motor Repair Co.

LOCAL FIRESTONE PRESTIGE

AKRON, O., Nov. 1.—The recent convention of the sales representatives of the Firestone Tire & Rubber Co. made a sufficient impression on Akron affairs for the *Sunday Leader*, the leading rubber city news medium, to devote a full page to it in the rotogravure section. All the various phases of the convention and quite a number of the best known folks in the Firestone organization were pictured in the layout.

BLAKE WITH AUBURN

Former Bosch Salesman Takes District for Auburn Plug Maker

AUBURN, N. Y., Nov. 6.—George F. Blake sometime ago with the Bosch Magneto Co., and more lately with the John MacGregor Co., has joined the forces of the Auburn Ignition Co., maker of the "A. I. M. Auburn" and Blazer spark plugs.

Blake will act as district sales manager for that portion of the United States north and east of, but not including, Indiana, Kentucky, Virginia and Maryland.

INDIAN FOR ORIOLE POLICE

BALTIMORE, Md.—Another Indian for police service has been ordered by the city officials. The machine will be used for general traffic police work. It is of a 1917 Powerplus model.

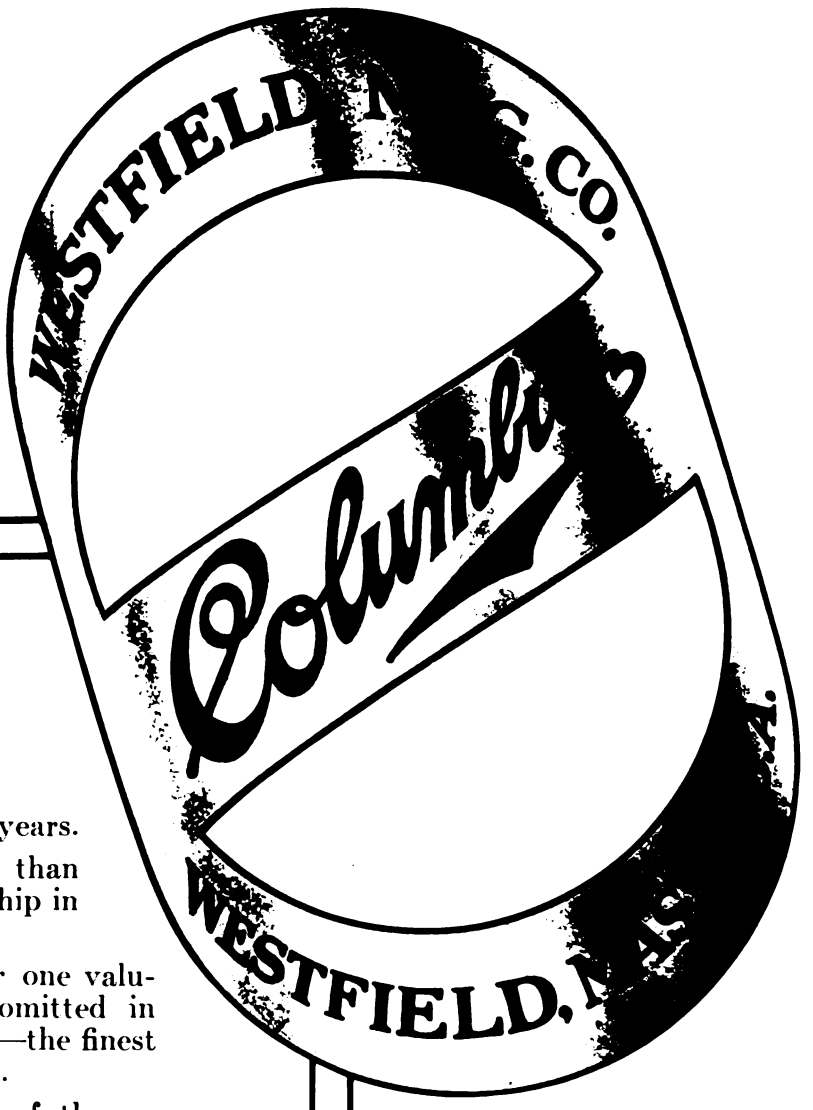
Standard of the World



COLUMBIA is the name that has led the bicycle world for thirty-nine years.

The name that to-day, more than ever before, stands for leadership in bicycle development.

Not one refinement of detail nor one valuable improvement has been omitted in making the Columbia what it is—the finest example of bicycle construction.

The manufacturing reputation of the company behind it is placed in the Columbia.

It was the first bicycle to be manufactured in this country.

And it has not only led the bicycle industry but has developed it.

The popularity of bicycling to-day can be directly traced to the originators of the Columbia thirty-nine years ago. It has shown the way. It is the pioneer.

Its name and nameplate are known and respected wherever bicycles are ridden.

The Columbia line is now more complete than ever. In the following pages the 1917 models are illustrated and briefly described. Study them here. Then ask your dealer to show them to you.

Look for the Columbia nameplate.

Columbia CHAINLESS

The Chainless type is the utmost development of the modern bicycle. It incorporates an efficiency and a directness of operation that cannot be equaled by the chain-drive construction. It eliminates the back lash so commonly experienced with a loose chain and, by the nature of its construction, is consistently easy-riding at all times and under all conditions. With the driving mechanism fully housed, it is unaffected by mud, dust or water, and is therefore always clean. Protected in this way, and running constantly immersed in lubricant, it defies wear as no exposed mechanism can.

The 1917 Columbia Chainless is a refined product of long experience and laborious experiment combined with unusual facilities. The thousands of this type that are on the road to-day, with their clean, graceful lines, demonstrate the strength, ease of riding and durability of these models. Examination of the driving mechanism, the very heart of the chainless bicycle, shows no appreciable wear after ten or fifteen years of service.

Combined with all the other advantages of the Columbia Chainless bicycle, it is a predominant fact that the absence of a chain to catch or soil one's clothing adds materially to the comfort and cleanliness of riding. This, particularly, is appreciated by the woman rider.

Made in 20″, 22″, and 24″ frame heights, the Men's Model Columbia Chainless is regularly finished in the finest black enamel and double white stripes, and with all metal fittings heavily nickel plated on copper. The gear is 74″. Spokes are Diamond E.

Regular equipment on this model consists of forward extension handlebars with corrugated rubber grips; a strong, comfortable Eagle Easy Special saddle; Pope Motorcycle type rubber pedals; Fisk No. 66, 1½″ road tires; Corbin coaster brake; front and rear Pope heavy mudguards with braces riveted to guard; grain leather block end 15-1 tool bag, complete set of tools, and nickeled hand pump.

The Women's Model is similar to the men's in all respects, except for the distinctive frame construction, and equipment consisting of a Troxel Ladies' No. 1 saddle, plain adjustable handlebars, 3¼″ Pope rubber pedals, and skirt guard. This model is geared to 67″. Frame heights, 20″ and 22″.

PRICE: Men's Columbia Chainless, Model 704; or Women's Columbia Chainless, Model 705; with regular equipment, $60.00.

Digitized by Google

Columbia ARCH BAR

IN the Columbia Arch Bar Bicycle is incorporated one of the soundest mechanical principles; that of the arch construction to perfectly distribute strain. This model should appeal to riders who desire a bicycle combining all the advantages of Columbia quality with unusual sturdiness.

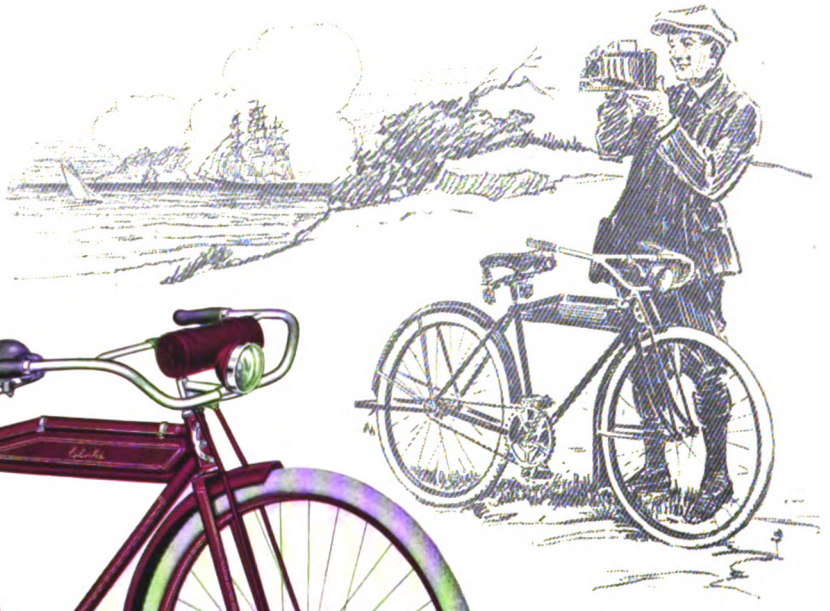
Finished in the usual Columbia black and double white stripe, this model is made in 20″, 22″ and 24″ frame heights. It is regularly equipped with forward extension handlebars fitted with long rubber motorcycle type grips, heavy Pope rubber pedals, the comfortable Messenger U-Superb No. 6 saddle, Morrow coaster brake, Fisk Premier Gripfast tires, Pope heavy mudguards, front and rear, with braces riveted to frame, tool bag, tools and hand pump.

The two-piece cranks are of the same type as found in the Columbia Roadster. Spokes Standard No. 2, .092. If desired, this model can be finished in Westfield red with double white stripes.

PRICE: Columbia Arch Bar, Model 71-A, with regular equipment, **$40.00.**

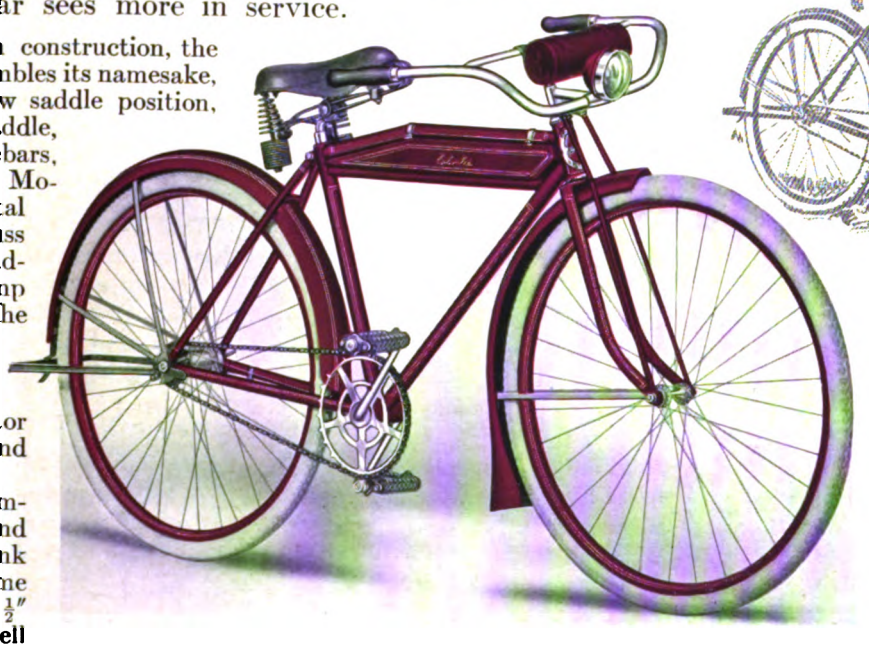
Columbia MOTOBIKE

One of the most popular and practical types of bicycle now made. It was originated by this company. Each year sees more in service.



Rakish in line, sturdy in construction, the Columbia Motobike resembles its namesake, the motorcycle, in the low saddle position, Troxel Motobike No. 2 saddle, long reinforced handlebars, long leather grips, Pope Motorcycle pedals, a metal storage tank, the Pope truss forks, heavy drop side mudguards, Delta electric lamp with battery case, and the new Pope stand. Spokes Standard No. 2, .092. Equipped with Morrow coaster brake, Fisk Victor Thorn Proof tires, tools and hand pump.

Same finishes as the Columbia Arch Bar model, and the same two-piece crank construction. Frame heights of 19″ and 21½″ adapt it to young as well as older riders.



PRICE: Columbia Motobike, Model 706, with regular equipment, **$45.00.**

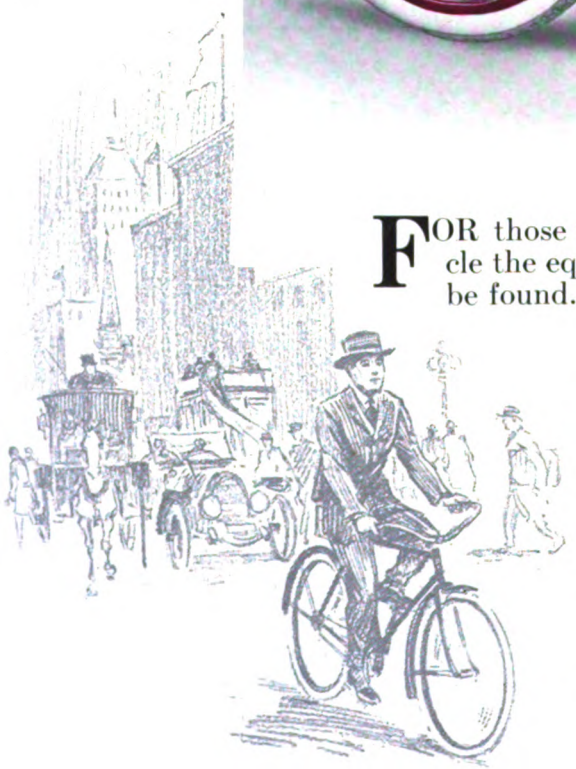
Digitized by Google

Columbia

THE Men's Model Columbia Superb is supplied in 20″, 22″, and 24″ frames, and is regularly finished in durable black enamel with double white stripes. Gear 81″. Spokes Diamond E. As an option, the Men's Model Columbia Superb is supplied in Westfield red with double white stripes.

The regular equipment is all of the highest grade: Eagle Easy Special saddle; forward extension adjustable handlebars; rubber grips; Pope Motorcycle type rubber pedals; Morrow coaster brake; Pope heavy front and rear mudguards; Fisk No. 66, 1½″ white tires with attractive red tread; high grade roller chain; Troxel block end type tool bag with complete set of tools, and a nickeled hand pump.

PRICE: Men's Superb Columbia, Model 712, with regular equipment, **$45.00.**



FOR those who wish to ride with the knowledge that beneath them is a bicycle the equal of which in construction, material and beauty of line cannot be found. The very last word in the development of the chain bicycle.

All the experience, skill and scientific knowledge gained through thirty-nine years of continuous manufacture of high-grade bicycles find their expression in the Columbia Superb.

One feature that gives to the Columbia Superb and the Columbia Racer their individuality and sets them apart from every other bicycle made, is the Superb crank hanger construction. Most exhaustive tests made when it was first brought out, many years ago, proved its unusual efficiency and excellence. With but few refinements, it has held its place of leadership to this day. It is probably the most expensive type of construction found on any

Digitized by Google

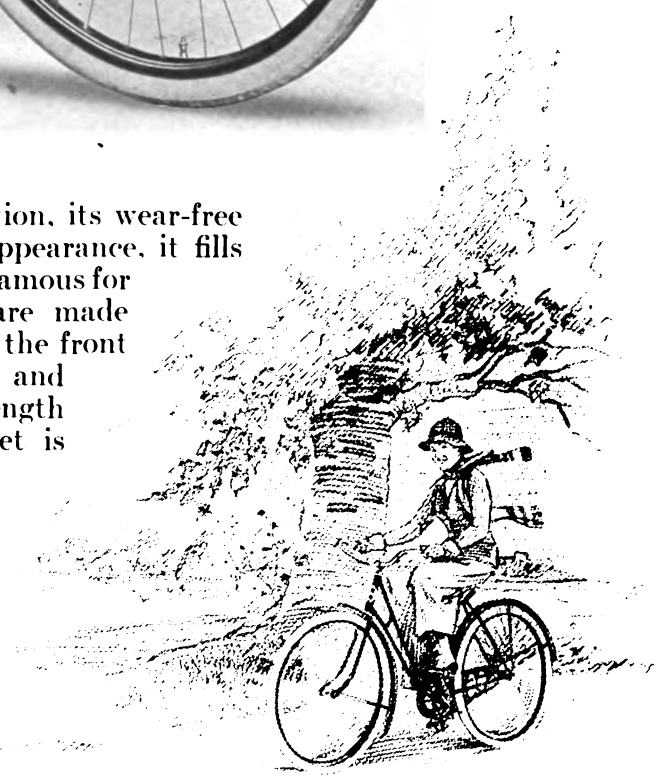
SUPERB

PRICE: Women's Superb Columbia Model 713, with regular equipment, **$45.00.**

THE Women's Model Columbia Superb is similar to the men's except for the distinctive frame construction, which is regularly 22″ in height, but can be supplied in 20″; Troxel Ladies' No. 1 saddle, Pope 3½″ rubber pedals; a regular gear of 68″; plain adjustable handlebars, and the addition of a high grade chain and skirt guard.

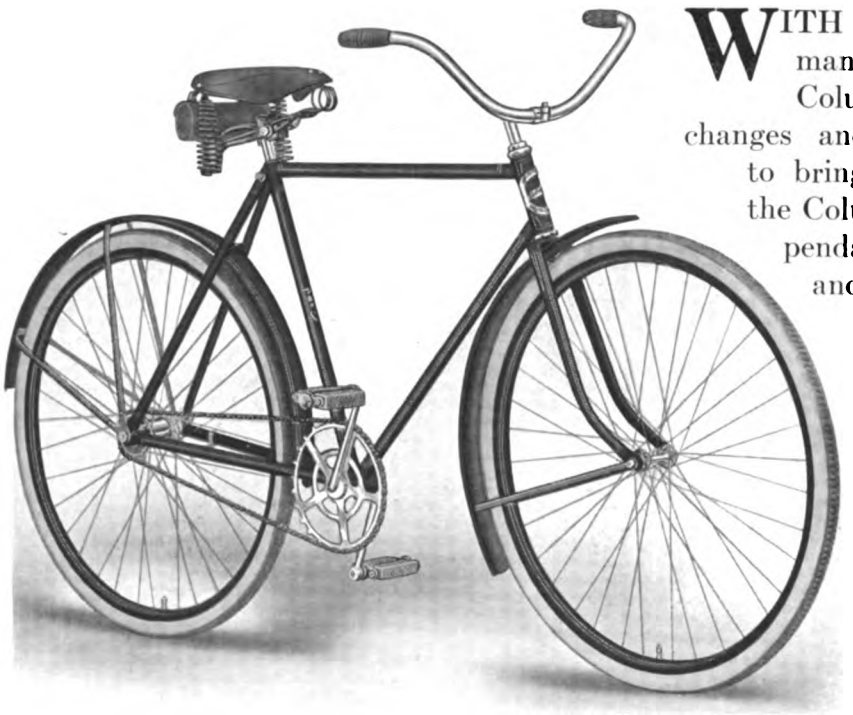
Fitted with a Sturmey-Archer Three Speed Gear, a Columbia bicycle is ready to be adjusted to meet every condition of wind or grade. This three speed or the For Sure lock, which prevents theft, are made a part of the equipment of any chain model at a reasonable extra charge.

chain bicycle built. With its remarkable ease of operation, its wear-free durability, its great convenience and attractiveness of appearance, it fills a very definite requirement in the bicycle which is world-famous for quality. Main tubes of the Columbia Superb frame are made from seamless steel tubing one inch in diameter, while the front and rear fork tubes, of smaller diameter, are made oval and tapered in such a way as to combine the greatest strength with the most pleasing appearance. The crank bracket is dropped two and one-half inches below the wheel centers so as to give good driving leverage and perfect balance. The cups and cones in the steering head, which so greatly affect perfect riding, are turned out to exact size from a solid bar of steel, instead of being merely stamped out from the sheet. By a scientific process of heat treatment they are given a hard, shell-like casing on the bearing surface, which is backed by a comparatively soft, tough core of metal.



Digitized by Google

Columbia ROADSTER



WITH the same quality of material, workmanship and design as found in the Columbia Superb, but with such slight changes and moderate-priced equipment as to bring it within the reach of every one, the Columbia Roadster is a thoroughly dependable bicycle for all-around utility and pleasure use.

The frame is made in 20″, 22″ and 24″ heights, and finished in black with double white stripes, and rims and guards to match. Spokes Standard No. 2, .092.

The cranks are made in two pieces, locked in a sleeve which takes the bearing strain, and designed for simplicity and an ease of riding and adjustment, which, together with the small, neat bracket that this construction permits, make it immeasurably superior to any type of one-piece hanger. The Columbia Roadster is regularly equipped with a Messenger U-Superb No. 6 saddle; adjustable forward extension handlebars; corrugated rubber grips; Pope Motorcycle type rubber pedals; Morrow coaster brake; front and rear Pope heavy mudguards with brace riveted to guards; Fisk 1¾″ Premier Gripfast tires and high grade roller chain. Each bicycle is supplied with a tool bag, complete set of tools and a nickeled hand pump.

As an option to the above, the Men's Model may be obtained in Westfield red finish, double white stripes, with rims and guards enameled to match.

The Women's Model is regularly supplied in 22″ frame, but can be obtained in 20″. It is equipped with a No. 21 Troxel Universal saddle; plain adjustable handlebars; dress and chain guards; and is geared to 68 inches.

All Columbia bicycles embody the Pope patented frame head construction. This method of internal reinforcement binds together the frame head and frame tubes just as solidly and strongly as though they were made in one piece.

Columbia bicycles, also, are constructed from seamless steel tubing; and these two features make the Columbia a bicycle that lasts a lifetime.

PRICE: Columbia Men's Roadster Model 716, or Columbia Women's Roadster Model 716W, with regular equipment, **$37.50.**

Columbia

DAILY SERVICE

Designed to meet the need for an especially strong, well-made bicycle, equipped for carrying parcels and packages.

The frame is made of one inch heavy gauge, seamless steel tubing. Especially large cups, cones and ball bearings are used in the frame head. Extra large and strong hubs; heavy Diamond E tandem spokes. Steel lined rims. Made in 20″, 22″ and 24″ frame heights. The two-piece crank construction and the finishes are the same as found on the Columbia Roadster. Regular equipment on this model is as follows:

A special box type adjustable extension handlebars; with corrugated rubber grips. Strong metal package carrier on bars. Metal luggage carrier attached to the rear forks. New rear stand, white nickeled. Large easy-riding Messenger U-Superb No. 6. saddle. High grade roller chain, Pope Motorcycle type pedals, 1½″ United States Giant Stud Traction tires. Morrow coaster brake, heavy Pope guards, tool bag, tools and hand pump.

PRICE: Columbia Daily Service, Model 710 with regular equipment, **$45.00.**

Columbia RACER

As light as it is humanly possible to build a bicycle consistent with strength to meet the demands of racing service. This model embodies all the distinctive features of construction found in the Columbia Superb. It has a special short racing frame 21″ in height. The main tubes are 1″ in diameter, made from 22″ gauge nickel steel. Finished in black with full nickeled head and forks. Spokes Diamond E .056-.072. Chain 3-16″ Renold, 1″ block. Cranks 6½″ long. Equipped with Shelby racing bars, or can be supplied with Lawson racing bars; racing saddle; stitched leather grips; 3⅝″ Star racing pedals. Geared to 88″ or 92″. Rims of French laminated wood. natural finish, 1¼″ Pye-Musselman Bare Side No. 30, or 1″ and 1⅛″ No. 20, tires. Supplied with tool bag and tools.

PRICE: Columbia Racer, Model 711, with regular equipment, **$55.00.**

Columbia

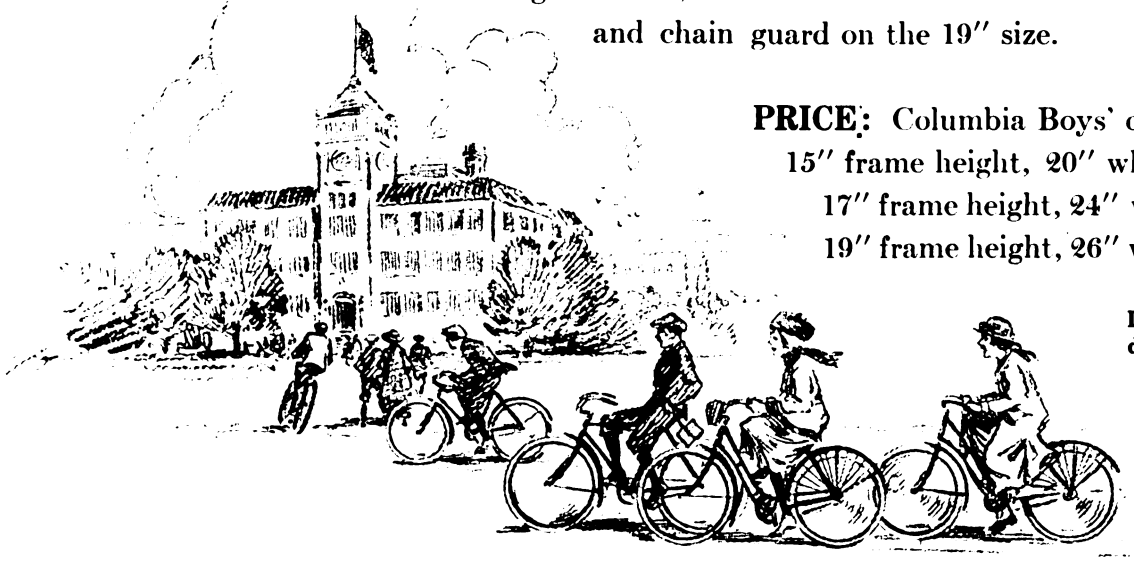
JUVENILES

THE Columbia bicycle for boys and girls is made with the same care and skill that has built up the reputation of the entire Columbia line.

A safer, stronger or more dependable bicycle for young people cannot be found. Simple in line and decoration, yet graceful and rich in appearance.

Finished in permanent glossy enamel, either black or Westfield red, with a single white stripe. Completely equipped with a Musselman coaster brake, or a New Departure brake when specified; front and rear mudguards on larger models, with braces riveted to guards; tool bag, tools and hand pump. Standard No. 2 spokes.

Regularly furnished with adjustable handlebars, indestructible leather grips, Pirate rat-trap pedals, high grade stretched leather Messenger Junior saddle, and Fisk Victor tires, gray with an attractive white tread. Combination rubber pedals on girls' models, skirt guard on the two larger sizes, and chain guard on the 19″ size.



PRICE: Columbia Boys' or Girls':—

15″ frame height, 20″ wheels	**$26.00**
17″ frame height, 24″ wheels	**28.00**
19″ frame height, 26″ wheels	**30.00**

PENNA. RUBBER CO.

Organizes Districts and Appoints Managers; Branches Retained

JEANETTE, Pa.—In order to give more personal attention to its business in various sections of the country, the Pennsylvania Rubber Co., maker of Vacuum Cup tires, has divided the country into districts and placed managers in each.

Eastern territory will hereafter be handled by G. C. McCullogh, while D. D. F. Yard will manage the southern district. James Q. Goudie is to handle the Central States section and James F. Madden that for the Pacific Coast. The Pennsylvania district will continue to be in direct charge of Vice-President Charles M. DuPuy.

The new arrangement will not alter the company's present branch system except to place the branches under the direction of the new district men. The latter will be under the supervision of the home office in Jeanette.

DEAN CREDITORS

To Have Claims Settled on Cash and Note Basis

ELYRIA, O.—Creditors of the Dean Electric Co. are having their claims settled, part being in cash and part in notes of the Garford Mfg. Co., which took over the Dean business. The plan is practically that submitted to the creditors and adopted by them on February 10, 1914, but which was held up by a suit, now settled.

The plan divides creditors into two classes: those who furnished labor and material during September, October and November, 1913, when the company was supposed to be operating on a cash basis, and those whose claims are dated prior to that period. The first claims are secured and will be paid in full, half in cash and half in notes maturing March 12, 1917. The holders of the second class of claims will get 77 per cent. in cash and checks.

This is the final step in the acceptance of A. L. Garford's offer for the property, by which he agreed to organize a new company, giving common and preferred stock and 6 per cent. notes in exchange for Dean assets and liabilities.

NEW JOHNS-MANVILLE BRANCH

GREAT FALLS, Mont.—The H. W. Johns-Manville Co., of New York, has opened a branch in this city. J. H. Roe is manager. The firm handles the 'J-M" speedometer and other motorcycle accessories.

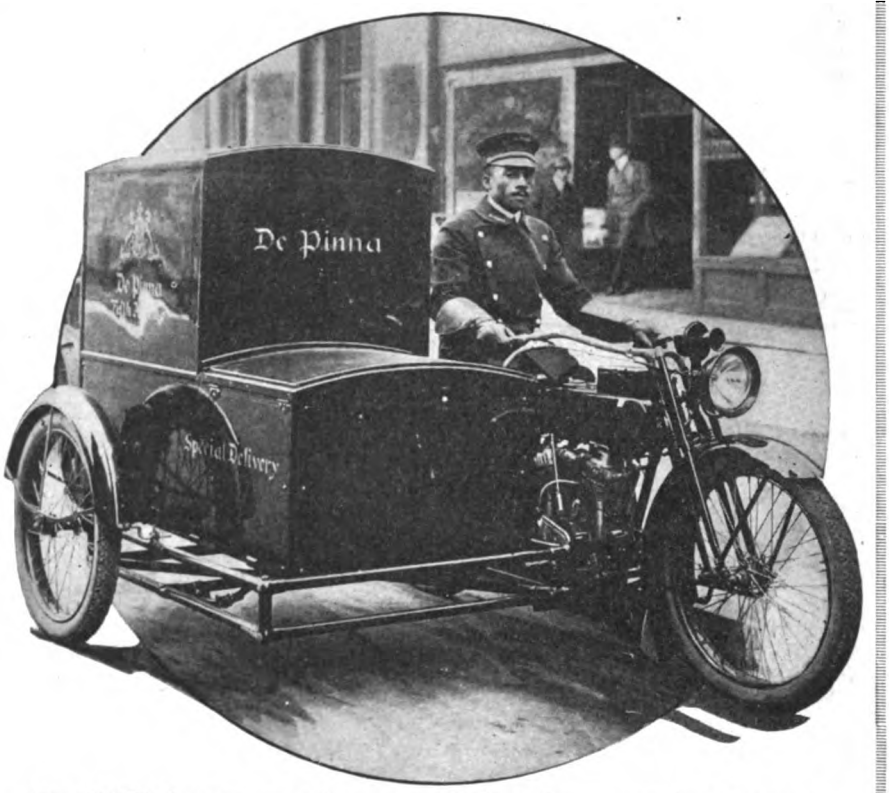
STOCK INCREASE TO BE MADE

HARTFORD, Conn.—An issue of 10,000 shares of stock has been authorized by the stockholders of the Billings & Spencer Co., maker of tools and drop-forgings in this city. Holders of record October 28 will be offered the privilege of subscribing to the new stock at $25 a share par value, on or before November 18, at the rate of one new share for each two shares of old.

BERNARD'S NEW MODEL

BALTIMORE, Md.—Harvey Bernard, Pennsylvania traveler for the Hendee Manufacturing Co., became the father of a seven-pound son on Oct. 31.

"Class?" Why, Certainly! Here's a Van Outfit That Travels in the Most Exclusive Company, on Fifth Avenue, New York.



THAT the motorcycle van outfit is quite as much at home in the rarified atmosphere of Fifth avenue, New York, as it is in less exclusive surroundings is indicated by the photograph above, which depicts a Harley-Davidson combination in use by the De Pinna Company, a house of international reputation dealing in children's clothing.

This photograph is especially significant because it disposes of the absurd idea entertained in some quarters that the motorcycle van could not be popularized with merchants of the highest class, to whom upkeep and running expense are relatively negligible.

It has been argued, along this line, that the huge establishments of the big cities could not maintain the "tone" of their delivery service without employing the most expensive motor trucks, but the combination of "class" with economy is so strikingly evident in the accompanying picture that even the most aristocratically-inclined $3,000 motor delivery truck could not object to associating with the outfit. Absolutely, old chap!

The van combination shown represents an outlay of $450, complete, and the De Pinna Company is convinced that it never spent $450 to better advantage. The van, it will be noted, is of special construction and is adapted to the requirements of clothing delivery. Garments can be carried either folded in packages or suspended from hangers, the high section at the back being set aside for hangers. The van is enameled in a rich maroon and the company's name and insignia are in gold.

Have you been confining your sales efforts to small and middle-class merchants, Mr. Dealer, in the belief that the "big fellows" didn't want anything but costly trucks? If you have, let the story of the De Pinna Company sink in. Take this copy of **Motor Cycle Illustrated** with you when you go to talk van sales to your local merchants.

1,000-MILE CONTEST

On Two-Day Schedule Planned by Dealers of San Francisco

SAN FRANCISCO.—A 1,000-mile, two-day endurance run is being planned by the dealers of this city. The contest will be open to all motorcyclists and promises to be the biggest affair of the kind ever held on the Pacific Coast.

A representative of the San Francisco dealers is in Los Angeles in an effort to interest the dealers there in the event, which will probably be held around Thanksgiving. If the plans for the big run go through the cash and merchandise prizes will represent the greatest value ever offered for an endurance contest, say the boosters.

NEW MIDCO MAKERS

Motor Ignition & Devices Taken Over by Teagle Co.

CLEVELAND, O.—On October 1 a consolidation was made of the business and interests of The Motor Ignition & Devices Company, of Detroit, Mich., with The Teagle Company of Cleveland, O. The business of the two companies will be carried on in the future under the name of The Teagle Company. A new factory has been secured in Cleveland at 1125 Oregon avenue.

The Teagle Company has been carrying on some very extensive development work on ignition apparatus, and it is expected that the new company, in addition to continuing the manufacture of the Midco Ignition Generator, will shortly place upon the market several new types of Ignition as adapted to all forms of internal combustion engines.

URQUHART HAS A WAITING LIST

SAN DIEGO—James Urquhart, San Diego Indian agent, reports a fine bunch of prospects awaiting delivery of the 1917 Indian. Urquhart says that business is still being influenced for the Indian by the reputation created by Baker's Three Flag ride, terminating at the Mexican border a few miles out of San Diego. The Indian campaign for 1917 is now in full swing, after visits from Manager E. Lebell, of the Pacific Motor Supply Co., State distributors, and Roy Artley, who is now demonstrating the 1917 model for the distributors.

OMAHA CLUB

Holds Election and Plans Chicken Dinner Nov. 5

OMAHA, Neb.—The regular meeting of the Omaha M. C. was held on Oct. 31, and its former president, Harry Stryker was unanimously re-elected. A short talk on club affairs was made by James Van Avery, and Edwin Palm told of incidents that happened when a bunch of motorcyclists went on a hunt along the Platte River recently. Three new members were initiated at this meeting also and ten others are expected shortly.

On Sunday, Nov. 5, the club has planned a run to Blair, Neb., which will be celebrated with a chicken dinner and rabbit hunt. According to advance notices, the small army of enthusiasts who will make the run, armed as they will be with shotguns, rifles, and other warlike equipment, are liable to make our country cousins think Villa has taken another sniff of tobacco and the United States boys ordered to cool him off again.

ATTRACTIVE DISPLAY FEATURING FIRESTONE GOODS

Standard Layout from Firestone Tire & Rubber Co., Which Is Being Installed in Branches

KERN COUNTY WINNER

Ed. Tice Is Victor in 25-Mile Road Race

BAKERSFIELD, Cal., Nov. 3.—Ed Tice, Harley-Davidson, captured the 25-mile race at the Kern County Fair, the event being the biggest motorcycle contest ever pulled off in this section. Tice's time was 21:32. The second man was Maurice Tice, brother to the winner, riding an Excelsior. The finish was a very close one.

The race was a three-cornered affair toward the finish, between the two Tices and Fred Ludlow on an Indian. There were two other riders, but the pace of the three leaders was too hot for this pair. Ludlow finally struck a hole and tumbled, but remounted. The spill caused him to trail M. Tice in, taking third money in the event.

FRASER MOVES HIS OFFICES

SAN FRANCISCO.—Manager Fraser, of the Appeal Mfg. & Jobbing Co., has moved his offices from the second to the ground floor of his building on Market street. The change gives more room. The company has received a carload of Harley-Davidson motorcycles and expects another in five or six days.

GOODYEAR CONVENTION

Fifty Western Branch Managers Get Together in Denver

DENVER, Colo., Nov. 2.—Last week fifty branch managers and salesmen of the Western district of the Goodyear Tire and Rubber Co., comprising five branches, held their annual conference at the Savoy Hotel, in this city. The conference lasted three days and plans for the selling campaign of 1917 were made. The visitors were entertained by the local branch of the company at a banquet in the Savoy Hotel and a theater box party.

The Western district has five selling branches at Denver, Salt Lake City, Butte, Mont.; Phoenix, Ariz., and El Paso, Tex. M. D. Montgomery, the district manager, presided over the conference, and the branch managers who took part were: R. W. Carter, of Denver; P. W. Senour, of Salt Lake; P. A. Kearns, of Butte; H. T. Roseland, of Phoenix, and I. J. Fitzgerald, of El Paso. A delegation of branch managers from the Goodyear factory in Akron, Ohio, was also present. The factory representatives were: A. F. Ostloh, sales manager; L. C. Rockhill, tire department manager; C. W. Martin, Jr., T. R. Bailey, manager of the mechanical goods department; H. B. Hamlen, manager of the credits and accounts; and R. S. Wilson, service department manager.

BIG AUSTIN SALES

Direct-Connection Pump Is a Labor-Saver with Cyclists

BOSTON, Mass., Nov. 8.—From the Homer F. Livermore Co., 85 Pearl street, comes the statement that the demand for Austin pumps is breaking records and that the factory is operating at capacity in order to keep abreast of the market.

The distinctive feature of the Austin pump, which is made in both motorcycle and bicycle sizes, is that the pump proper and the tire valve connection are a unit. The pump barrel fits directly over the valve stem an offset in the barrel at the connection end making it possible to hold the pump at the necessary angle for inflating the tire. The fact that the air passes directly from the pump barrel into the tire cuts out the friction incidental to the use of the ordinary rubber tubing and also eliminates the danger of leakage.

The Austin pumps are distributed by jobbers the country over and have been adopted by a number of prominent cycle manufacturers.

ETTINGER WINS

Takes Second and Final Heats in Mansfield Road Race

MANSFIELD, O., Nov. 1.—Clayton Ettinger, astride a Henderson, cleaned up in the annual road race of the Mansfield M. C. from this city to Ashland on Sunday last.

The contest was run in three heats. Lloyd Armstrong, astride a big valve Excelsior, took the first. Ettinger managed to beat both Armstrong and Earl Carver on a Harley-Davidson in the second and final heats, winning handily.

The events were not timed officially but each of the 200 spectators claim that they were the speediest of any of the annual road races of the Mansfield M. C.

PUFFER JOINS U. S.

Will Act as Special Representative Traveling Out of Chicago

NEW YORK, Nov. 6.—C. W. Puffer has joined the staff of the United States Tire Co. and will make his headquarters in Chicago. Puffer will act as special representative for the cycle tire department, calling on motorcycle and bicycle dealers throughout the middle west in the interest of the United States company.

Puffer has had a long and varied experience in the rubber business both at the production and the selling end and comes to

C. W. Puffer

the United States company fully versed on the subject of tires. For the past several years the better part of his time and attention has been devoted to a study of the conditions existing in the cycle tire trade and his work along this line has fitted him ideally for the work he is to accomplish in his new berth.

DEDICATE WILLIAM PENN HIGHWAY

EASTON, Pa.—The formal opening of the first permanent link in the William Penn Highway, from New York to Pittsburgh, Pa., was celebrated in this city on Nov. 2, by dedication ceremonies in which representative men from Pennsylvania, New Jersey and New York participated. The governors of Pennsylvania and New Jersey delivered addresses at the dedication of the highway.

The William Penn Highway is destined to become one of the scenic and commercial routes across New Jersey and the Keystone State. It will form the Pennsylvania division of the Pikes Peak Ocean-to-Ocean Highway.

OLIVER'S SOCIABILITY

Plans Call for Run to Danbury and Back on Dec. 3

NEW YORK, Nov. 6.—Sunday, December 3, has been chosen by Oliver Berckhemer as the date of his sociability run to Danbury, Conn., and return. The total distance figures out at 140 miles and it is planned to leave from in front of Berckhemer's Indian agency, at 993 Washington avenue, at 8:30 A. M. The prizes have not as yet been announced, but something attractive in the way of bait is certain to be hung up.

STOP THIEF!

Los Angeles Rider Adopts Novel Plan for Curing the Culprit

LOS ANGELES, Cal.—O. L. Steffens has settled with the thief who stole his motorcycle in a most novel and effective manner.

He gave the man, whose name was Compton, his choice of being prosecuted for the theft or of paying for the damages to the machine and the cost of locating it, and then joining the navy.

The thief accepted the latter alternative, paid $18.60 damages and enlisted for four years in the navy.

MON AUTO CO. ORGANIZED

NEW YORK—Hugo C. Gibson, inventor of the Gibson Mon Auto and other two-wheeled motor vehicles, has just organized the Gibson Mon Auto Co., with offices at 156 Broadway, this city. The company has been incorporated under the laws of the State of New Jersey with $1,000,000 in common stock. The directors are Gibson and several automobile men.

GUARDSMEN IN ACTION

OMAHA, Nebr.—An interesting feature at some of the local movie houses is a picture of the Wisconsin National Guards in action. The film is attracting quite a bit of attention because it affords the opportunity of seeing Uncle Sam's boys with their new motorcycle machine guns; it also shows them at some fast work on dirt tracks in motorcycle races.

OFFICIAL COLLECTORS FOR F. A. M.

WESTBORO, Mass.—According to figures given out by Secretary-Treasurer Gibson of the F. A. M., 492, Official Collector certificates have been issued up to and including October 31. And even at that the membership prizes for the past three weeks have gone begging since no one sent in the requisite five membership applications in a bunch.

OCTOBER F. A. M. STATISTICS

WESTBORO, Mass.—There were just 72 new members who came into the F. A. M. fold during October, according to the report of Secretary-Treasurer Gibson; of the number, 29 were unaffiliated with motorcycle clubs and the remaining were affiliated.

During the same interval some 81 renewals were received.

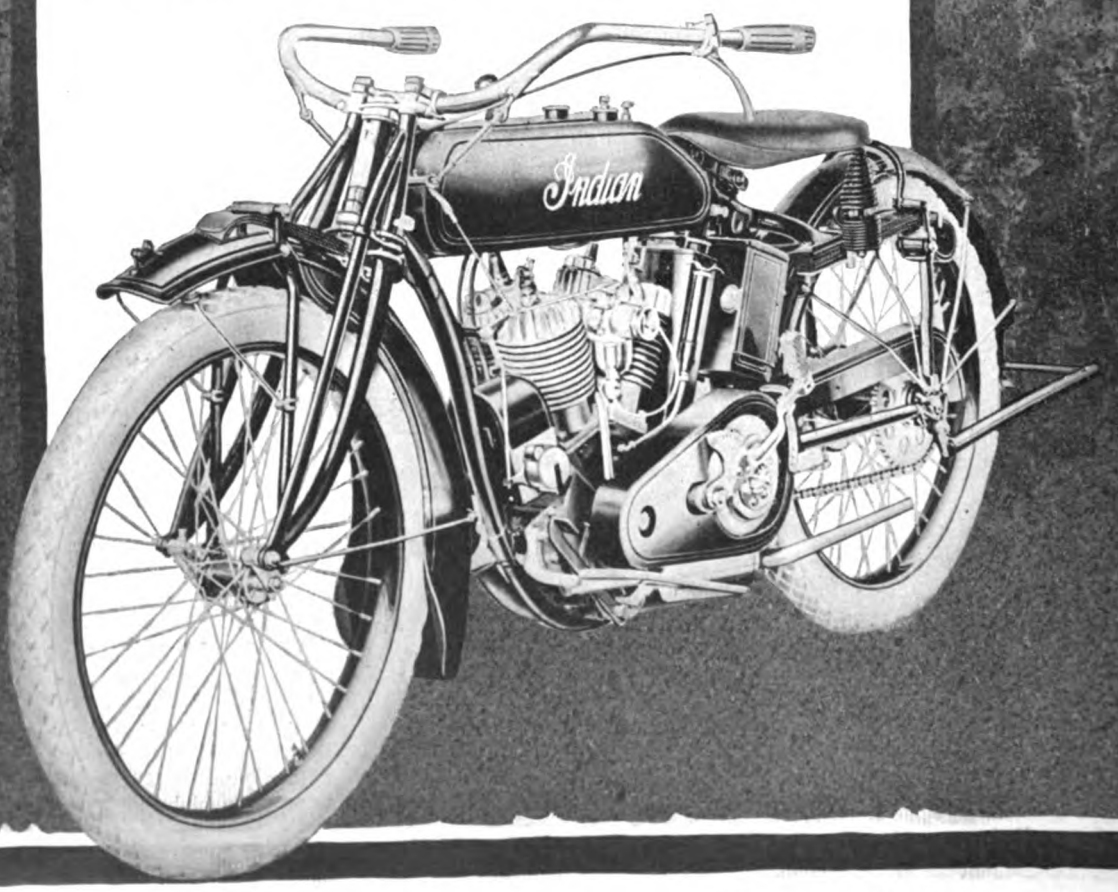
The Center of Interest at the Big Shows

The Indian exhibit at the Motorcycle Shows this year is bound to be the storm center of attraction.

For here alone will be grouped *under one nameplate* all that is big, new, and practical in the 1917 motorcycle and bicycle world.

The Indian Big Twin with its refined *Powerplus Motor, New Triple Stem Forks with Adjustable Handlebars,* enlarged *Gasoline Tank,* large *Gear Shift Lever,* and the patented *Cradle Spring Frame,* is sure to be a tremendous drawing card.



Digitized by Google

Then the lightweight innovation, the *Indian Light Twin* with *Four Cycle Opposed Motor* and *Double Loop Frame*—an absolute Departure from all conventions in light model construction—will prove a cyclonic sensation.

The *Electrically Equipped Indian Bicycle* also will be one of the popular features of the Indian 1917 showing, as will the complete line of *Indian Bicycles, Indian Side Car, Indian Parcel Delivery Car*, and the perfected *Indian Machine Gun Outfit.*

In attendance will be men who are qualified by long years of training to give you a thorough demonstration of the whole 1917 Indian line—show you why it is *best* to ride and *best* to sell.

Every facility for the comfort and convenience of our friends among riders and dealers will be provided. Riders will be given every opportunity of studying their favorite type of machine—dealers will be privileged to get in full touch with our unusually broad and generous 1917 Selling Plan.

We would be glad to have you make the Indian exhibit your headquarters while in Chicago and New York.

If you want to enjoy the utmost in motorcycle *riding*—if you want the utmost profit from motorcycle *selling*—visit the Indian exhibit.

CHICAGO DEALERS FIND BUSINESS BRISK

Both City and County Trade Is Active, New Models Are Enjoying Record-Breaking Demand and Commercial Outfits Are Popular—Change in Crist Sales Policy for 1917

CHICAGO, Nov. 7.—Good weather, combined with a generally optimistic outlook by the trade, has enabled Chicago dealers to make the present Fall and early Winter season one of the busiest that has been known in years. The national prosperity wave hit Chicago long ago and has made itself felt in motorcycle as well as all other circles.

R. C. Crist, Excelsior representative for Cook County, has announced that beginning with the 1917 season no sub-agents will be used. This change is in line with the policy of the firm, which is now operating three branches, with from three to five more in prospect. The advantage of the branch over the sub-agent, according to Mr. Crist, is that standardized service can be rendered by the branch and that conditions affecting the taking in of second-hand machines, etc., can be more satisfactorily controlled.

100 Per Cent. Increase in 1916 Sales

The Crist concern closed its fiscal year October 31 with a record of a 100 per cent. increase in business. Every new machine in the company's hands had been sold before the end of October, and sales of parts, supplies and accessories were correspondingly high. The installment business for the year was successful and owing to systematic methods of handling the time payment business employed by the Crist company the losses were trifling. Mr. Crist feels that the installment idea has justified itself.

Organization of the territory which was recently contracted for in connection with the Henderson, including four States, is proceeding rapidly, Mr. Crist reports. Three men are on the road in Illinois, Indiana, Iowa and Wisconsin to line up the dealers for 1917, and there are indications that the 300 quota of the Crist firm will quickly be absorbed.

Harley-Davidson Activity

At the headquarters of C. H. Lang, Harley-Davidson representative in Chicago, it was stated that the new olive drab models are arriving in the Windy City at the rate of about 30 to 40 a week. There are at least 100 of the 1917 Harley-Davidsons already on the road in this territory, and it is stated that the anxiety of riders to get their mounts in action without delay is greater this year than ever before.

One of the most interesting features of the activity at the Harley-Davidson headquarters is the heavy demand for commercial outfits. Twelve commercial combinations have been sold since the 1917 line was announced, all with sidevans. The Chicago Telephone Co. took two, and the others went to paper houses, musical instrument dealers and other merchants in various lines. According to the data obtainable at this store, the commercial motorcycle situation is brighter than ever.

Interest Runs High in 1917 Thor

H. F. Fuerst, retail sales manager for the Thor, has just made a scouting expedition over Cook County during which he found general sales conditions excellent and interest in the 1917 Thors running high. A number of new agencies have been closed for the Thor throughout the county during the last two weeks.

R. E. Buell, whose South Side motorcycle store at 916 West Seventy-first street is one of the most successful in that part of Chicago, has just signed up to handle the Thor for another year, 1916 having been his fifth successful season with that make.

Openings for Commercial Sales

A well-known motorcycle dealer in Chicago, whose location has given him an opportunity to get at the facts, argues that motorcycle agents will do well to get after the motor car trade on a commercial basis. He points out that many of the automobile agencies are now using motorcycle van outfits, as service and trouble cars, these including the Mitchell, Maxwell, Chalmers, Winton, Studebaker, Hudson and Ford.

The big tire houses are also excellent prospects for commercial motorcycle combinations, says this dealer. Such outfits are now in use by the Fisk tire agency, the Racine Rubber Co., the Goodyear and Goodrich agencies, the United States Tire Co., the Tire Company of America, the Quick Service Tire Co. and the United States Vulcanizing Co. Vans are used principally by the tire people, as they are used mostly for delivery purposes.

INVITATION BEARERS BACK TO PITTSBURG

Crist and Bishop, Who Carried Message from Smoky City to President Wilson, Complete Their Trip

PITTSBURGH, Pa., Oct. 30.—Their mission fulfilled "in toto," Lewis G. Crist and Jacob G. Bishop, the motorcycle dispatch bearers who were sent by Mayor Joseph G. Armstrong with an invitation to the President to attend the City Charter Centennial Week celebration, rode back into Pittsburgh last night at 10 o'clock on their Harley-Davidson machines. They left Pittsburgh, bound for Shadow Lawn, just outside of Long Branch, N. J., at 7:30 o'clock on Saturday morning last and reached the President's summer residence that evening.

Early the next morning, bearing the President's answer which contained his regrets at his inability to attend the celebration, they again headed for Pittsburgh, but stopped over at Philadelphia to deliver a similar invitation to Mayor Thomas B. Smith.

They lost several hours in Philadelphia, which accounts for their non-arrival back in the smoky city until the late hour of 10 p. m. on Sunday night.

Performance Was Watched

Their performance, which had the sanction of the State military authorities, was watched with the greatest enthusiasm by motorcyclists and military officials of the East. Crist's Harley-Davidson was equipped with a Dixie magneto, while Bishop's machine was fitted with a Remy electric generator and ignition set. Both machines were shod with Goodyear nonskid tires and fitted with Troxel saddles.

The total distance covered was 783 miles and the time was 26 1-2 hours almost to the minute.

SCORE OF INDIAN DEALERS IN BIG CAMPAIGN

Southern California Wigwam Men, Led by Sherman and Freed, Lay Plans for Gigantic Sales Drive for 1917 Season—Informal Talks Feature Meeting

Top, Southern California Dealers at Banquet; Lower Left, Roy Artley Ready to Give A. Freed a Sidecar Jaunt—Lebell, Derkum (in Cap) and Sherman (at Right) Look On; Right, Dealers Face the Camera Man

LOS ANGELES, Cal.—"We are making a better motorcycle in the big machine than ever before. Our new twin lightweight can absolutely be depended upon to deliver the goods. The Indian bicycle will sell to any man who appreciates bicycle value. We are manufacturing these three lines, and you gentlemen are the outlet to the consumer. What do you say?"

It was by a talk along this line that George W. Sherman, of the Hendee organization, and A. Freed, president of the Pacific Motor Supply Co., California distributor for the Indian, started a line of thought in the minds of dealers representing all of Southern California. This thought developed into an attitude of enthusiasm and confidence in the 1917 campaign that promises to start every participant at the noonday banquet of over twenty trade men, on the sure road to bigger merchandising and bigger profits.

Many Attend

The banquet and meeting were held at the Los Angeles Athletic Club, the banquet being an elaborate affair. Those present included Jimmy Urquhart, of San Diego; Guy Urquhart, of El Centro; George Sherman, Hendee Mfg. Co.; A. Freed, Pacific Motor Supply Co.; E. Lebell, Southern California manager of the same company; Paul J. C. Derkum, M. G. Anlauf, Pedro Gonzales, F. C. Clutterbuck, W. R. Anderson, Chas. Moist, Harry Hixson, J. Carriker and L. C. Crowl, F. G. Margadant, Chas. Johnston, H. W. Gowland, B. F. Nelligan, A. H. Small, Willis A. Rowe, Roy Creighton, Ted Plank, C. O. Nordin, Lester Miles, Sam Kuroda, Joe Watershed, and J. J. O'Connor, *Pacific Motorcyclist;* Charels Fuller Gates, *Motorcycling;* Frank Reed, **Motor Cycle Illustrated.**

A. Freed opened the meeting after luncheon. Lebell spoke first on the dealer building up his bank account by getting after prospects and sticking to them, and by thorough demonstrations. Lebell was followed by George Sherman, who pointed out that when a dealer thought he wanted to take up some other line of business he should look at his neighbor in the hardware, baking or other lines. He would find that the motorcycle and bicycle business is a good, safe one and safer than most of the others. He pointed out the desire of the young man in general toward a bicycle, motorcycle, etc., and then becoming a good prospect for the lightweight machine.

Sherman pointed out that dealers in the East had made the mistake of selecting lightweight prospects from among the youngest men, and for that reason they had not had the success with these machines that the Coast trade men had. He emphasized that older men were the buyers of lightweights and that they were better customers also. He spoke of not hanging on to old prospects, but getting out after new ones, for the new ones counted in the growth of a business.

The big success of the meeting was in the informal talks that let every dealer put in his word to show the rest that there is ground for enthusiasm over the outlook, and that this puts courage and fighting energy into every fellow in the field. Charles Johnston, of Pomona, who has been an Indian dealer since 1905, said that he saw a big future ahead. Jimmy Urquhart, of San Diego, motorcycle dealer since 1906, said that the twin lightweight, in addition to the big twin and bicycles, broadens the line so that the dealer can get a big business.

Willis A. Rowe, handling motorcycles, bicycles and automobiles, stated that the automobile line was the only one which did not pay and that bicycles were the dealer's meal ticket. He figures prospects as follows: the youngest for roller skates, then for bicycles, then motorcycles as they grow up. As to the light car hurting the motorcycle, Rowe found people are learning how much it costs to purchase tires in sets of four. He spoke also of the value of the dealer being able to present figures on upkeep, etc., in competing with other forms of vehicles in commercial sales.

Crowl's Address

L. C. Crowl, who was formerly in the automobile business, said that motorcycle dealers could afford to forget the cheap automobile. By doing this they would sell more motorcycles. M. G. Anlauf, of Anaheim, said that he trebled his sales since the middle of 1916, when he took on the Indian. Charles Moist, of Long Beach, declared that he is boosting for bicycles and roller skates in addition to motorcycles, and is getting good business in all these lines.

George Sherman spoke again, relating a story of how he kidded a New York dealer into putting in velocipedes because he turned down an inquiry for one. He said that the dealer averaged eight sales a month for two years, and that the three-wheeled machines were feeders for his motorcycle business. Roy Creighton, of Uplands, said he was well satisfied with his business in motorcycles. F. G. Margadant, of Pasadena, spoke on improving his sales output. He related how after selling a Featherweight to a meat man, the latter bought a big machine and a van in a few weeks. The boy who rode the little machine in delivering was seen so much at work that people came into the store to inquire about machines.

Commercial Field Big

Freed and others spoke on the commercial field and proved that it was worth pushing hard. By educating them to motorcycle efficiency, big orders had been secured form Northern California corporations, and the same could be done in this section of the State. A telephone company had bought 147 machines and power and gas companies over a hundred more. Accessories for these machines made a good business. He showed that where a year ago the big corporations were buying automobiles, they now used motorcycles. He spoke of commercial sales being good boosters for pleasure sales.

Margadant spoke again of sales of lightweight machines to owners of big automobiles, who keep the cars for family service but use the motorcycle when going alone.

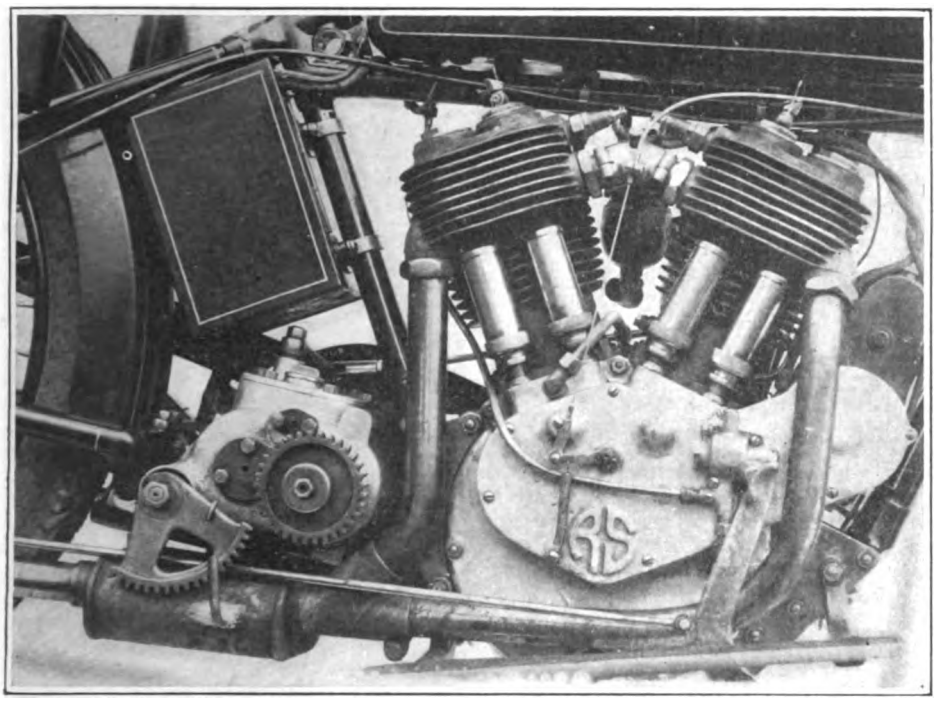
LAYING STRESS ON R-S IMPROVEMENTS

Features of 1917 Construction Which Include Double Brakes, New Front Fork, Improved Muffler and Electric Lighting System are Emphasized



Right Side of Reading Standard Powerplant, Showing Straight Exhaust Pipes, New Muffler and Battery Casing. New Bearer Plates Are Seen Just Above Footboard and Exhaust Union

READING, Pa., Nov. 3.—In order to call particular attention to the special features on the 1917 Reading Standard models, the Reading Standard Company, Inc., of 344 Water street, this city, has issued a supplementary announcement. This announcement follows that describing the 1917 R-S products, which first appeared in **Motor Cycle Illustrated** in the September 7 issue.

Emphasis is laid on the large and effective automobile type of brake, the re-designed front forks, the muffler of increased size, the new form of motor bearers, enclosed valve springs, and deep-winged mudguards. Stress is also placed upon the electric equipment, fitted to the Model 17 T-E, which is listed at $315.

New Rear Hub

The rear hub on the Reading Standard is new and is constructed to carry internal and external brakes of large surface and great power. Each brake is independent of the other. Both operate on a drum on the right end of the hub, the external by a pedal close to the right footboard, while the internal is actuated from a hand lever on the left handlebar. The anchorage for the brake carrier is unusually sturdy, ensuring perfect service even under the severest conditions.

The same action which marked the Reading Standard forks in 1916 and preceding seasons is continued in the re-designed front forks. The rear portion is curved forward, with links in a new form. Large grease cups are fitted at the joints. The frame is also reinforced throughout, the tubing in the sides being of larger gauge than before, while solid reinforcements are inserted and brazed within. This general fork construction is heavier throughconstruction gives ample strength for sidecar work. The coil springs have been changed in design, vanadium steel being used for their composition.

Reinforced Frame

The frame has been increased in strength for sidecar service. Not only is the tubing heavier, but reinforcements have been fitted throughout, particularly in the diagonal tube. The slider forks have closed ends to give greater strength, this being made possible by the use of a knockout rear axle. The front hub is new and has larger balls and retainers. The flanges are wider also. The knockout axle feature is, of course, incorporated in this hub.

The muffler for 1917 is of the cylinder type with shell of large capacity, replacing the model of 1916. The exhaust pipes are made straighter than in the previous models to give a freer passage of the gases from the cylinders to the muffler. This has been obtained by changing the design of the cylinders with regard to the position of the exhaust outlets.

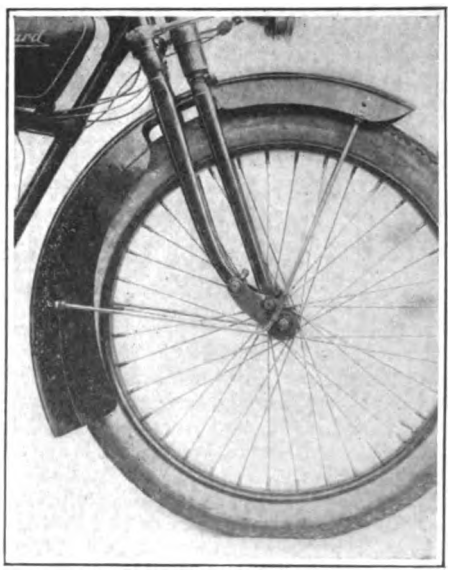
There are slight but important changes in the form of the motor bearers, these tending to give greater strength, and, at the same time, greater ease in mounting and dismounting the power plant. The mudguards have deep side wings, to ensure cleanliness to the rider and machine.

Electric Equipment

The electric equipment on Model 17 T-E has the Bosch generator, Exide battery and Hawthorne Hornlite, as well as a tail light of Hawthorne make. The headlight has a 15 c.p. main bulb and a 2 c.p. pilot or dimmer bulb, these being controlled by a simple switch at the rear of the lamp body, within easy reach of the rider. The horn is incorporated in the lamp body and is operated by a press switch on the left grip. The tail light and license bracket are built as a unit.

The Bosch generator furnishes current to the storage battery, thus assuring a supply of lighting current at all times. The ignition side of the generator takes care of the ignition current. With the Bosch generator it is possible to furnish light with a dead battery.

Both the Bosch generator and the magneto are located in front of the motor instead of being in rear, as in all formed R-S models. This has been done to give more room to the generator. The new position gives a magneto drive train of one less gear than in 1916. The Exide battery is carried in a casing at the right side below the seat post cluster.



New Front Fork with Large Grease Cups on Joints; the Rockers Are Redesigned to Give Greater Strength

WILKINS AND FORTIER BACK IN TORONTO

Former Motorcyclist in Overseas Forces Return to Rest and Convalesce—Were Despatch Riders

TORONTO, Ont.—Two Canadian war heroes have just returned to their native city after months of turmoil in France and Flanders. Both were prominent motorcyclists of Toronto before their enlistment in the overseas army and both acted as despatch carriers for a considerable period. The two warriors are Flight sub-Lieutenant Steve Wilkins and Private Louis Fortier.

Lieutenant Wilkins was only a private when he left Canada in the fall of 1914 and after serving as a motorcycle rider for a year he secured his transfer to the Royal Flying Corps. He is home for a rest.

Private Fortier enlisted as a private with the 58th Overseas Battalion and was a despatch rider behind the firing lines until he was struck with shrapnel. He was in the hospital—or, at least, in hospitals—for five months because of the dangerous nature of his wounds. He took his first ride on a motorcycle since became a casualty on Saturday, October 28, in Toronto, when he borrowed a friend's mount.

Information has been received that a Toronto cyclist, Lance-Corporal J. I. McCormack, has been severely gassed and shell-shocked. He had been fourteen months at the front with the Divisional Cyclists.

WHY GAS PRICES WENT DOWN

HUTCHINSON, Kan.—Kansas riders of motorcycles can credit the discovery of oil and gas in the new Augusta fields near Wichita for the lowering of prices by the Standard Oil Company in this section of the State on gasoline and oil. Gasoline is now retailing here at sixteen cents per gallon, with one, two, three and four-tenths of a cent added, according to the freightage necessary. This is a drop of three cents per gallon from the price which prevailed throughout the summer.

These Came from Old Kentucky

LAST RUN OF SEASON

OWENSBORO.—The final run of the season of the Owensboro Motorcycle Club to Morgansfield, Ky., which was slated for October 22 was postponed on account of bad roads. The club is now preparing to open its winter headquarters.

NOBLE WANTS MATCH RACE

HENDERSON.—Jimmy Noble, who has been in charge of the Indian store of Henry Pardon in this city has returned to Owensboro and issued a challenge to any rider in the city for a match race on the fair grounds track.

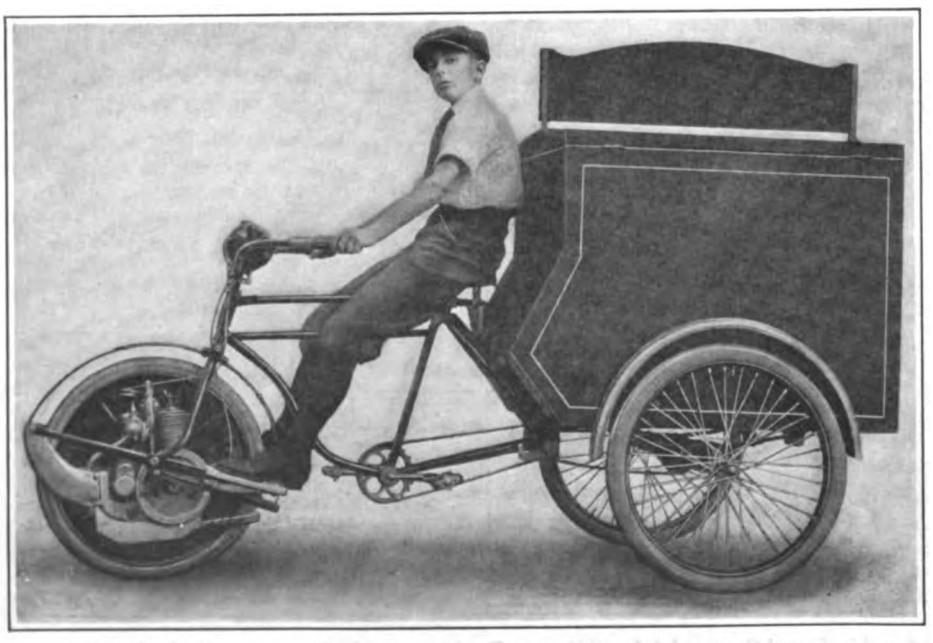
BRIGHTENING THE WINDOWS

LOUISVILLE.—Bicycle dealers of this city are participating in the national campaign for brighter window displays, and within the past few weeks various improvements have been made in the agencies, all tending to make them more attractive to fall customers.

A MERKEL ENTHUSIAST

LOUISVILLE.—A. E. Kappa, an expert on linotype machines, employed by the Louisville *Courier Journal*, uses a 1916 Flying Merkel in traveling to and from the office and states that he is prepared to prove the motorcycle is the most efficient and economical vehicle on wheels.

DAYTON MOTOR BICYCLE IN VAN SERVICE



The Neat Delivery Outfit Pictured Above Is Being Used in New York City With Excellent Results, the Van Being of the Worksman Type

EFFECT GREAT SAVING, SAYS DALLAS OFFICIAL

Department Accountant in Texas City Reports Motorcycles Invaluable in Conducting Affairs Economically

DALLAS, Tex.—In a statement just prepared by Departmental Accountant J. W. Shull, of Dallas, the fourteen motorcycles used by the city are mentioned as invaluable in the economical and efficient conduct of its affairs. The statement says that the machines have effected a great saving both in actual outlay of money and in time.

Ten motorcycles are kept constantly in service by the police department, and in addition several privately-owned machines ridden by motorcycle-mounted officers. These ten machines are used mainly by those police officers assigned to enforcement of the traffic laws and the regulation of speeding on the city streets. The others are kept at the various police stations for emergency use in response to emergency calls.

The motorcycle has been found invaluable in regulating speeding, and by its use only has the city been able to keep accidents to a minimum. For answering emergency calls, the motorcycle is more serviceable than automobiles in many cases, especially in out-of-the-way places where automobiles would find streets and paths almost impassable. The motorcycle has also been found quicker than the automobile for emergency calls.

In addition to the motorcycles in the Police Department, the City Inspector's office also maintains two machines, on which sanitary inspectors are mounted. It is estimated that these two inspectors are now able to do the work in less time than was formerly required for six men, and do it more efficiently.

The Board of Education also maintains one motorcycle in its service and the City Engineer's department has one machine. These are available for carrying messages, or orders, or even making delivery of small packages to remote parts of the city, and have been found of incalculable service by the heads of these departments.

HONEYMOONERS AT THE SHOW

HUTCHINSON, Kan.—Earl Gardner, a well-known local motorcyclist, has just taken as his bride Miss Cecil Brown, daughter of C. N. Brown, the Hutchinson Excelsior dealer, and the couple will visit the Chicago Show during the honeymoon trip. They will be gone for several weeks.

MINISTER RIDES IN LOUISVILLE

LOUISVILLE.—The motorcycle is nothing if not a versatile vehicle in Louisville and vicinity, and by way of proving this the Rev. Arthur Garter, an Episcopal minister, is a full-fledged Flying Merkel enthusiast. He has been using his machine for several seasons, and states that he could not very well dispense with it in his city and out of town parochial duties.

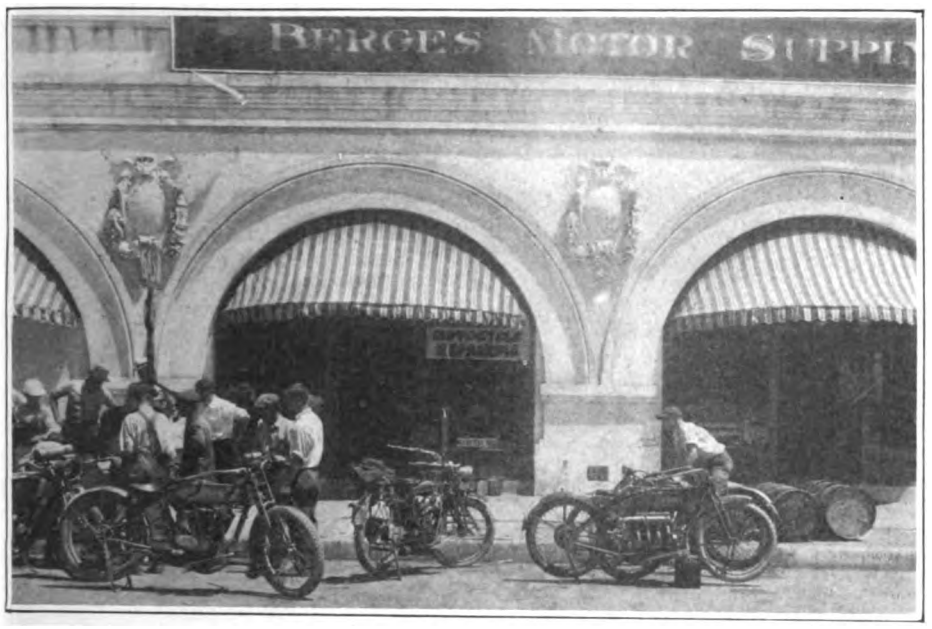
NEW HENDERSON HEADQUARTERS IN BAKERSFIELD, CAL.



Up-to-Date Store of Jules Berges; Berges Took Deposits on Six 1917 Hendersons the Same Night He Received His Demonstrator

News Flashes at Frisco Doings

SAN FRANCISCO.—George W. Sherman, special representative for the Hendee Mfg. Company, is in this city for a short time. He will return East via Los Angeles, arriving in Chicago in time for the motorcycle show.

SAN FRANCISCO.—All Indian agents in this section will attend a get-together meeting next Wednesday night. A. Freed, the California distributor, is holding the affair and expects that all agents in his territory will be present. Plans for the new year will be discussed.

SAN FRANCISCO.—George Brennen, of Seattle, Wash., who holds most of the records for that section, rode a 1917 Henderson up to the flag pole on Twin Peaks the other day. This ride is considered a very difficult feat and it is the first time that it has ever been accomplished. Brennen will remain in this city for some time.

SAN FRANCISCO.—Fred H. Bente, handling the Excelsior, reports the sale of two of the 1917 models last week, as well as a number of used machine sales. He is doing a good repair business and has three men at work in the shop on full time, with several days' work ahead.

SAN FRANCISCO.—Manager Z. Barton, of the Thor branch, is away on a four weeks' trip lining up dealers for the new season.

SAN FRANCISCO.—Maggini & Perkins, representing the Harley-Davidson, report selling 21 of the 1917 models since also sold three sidecars and four delivery receiving their demonstrator. They have vans. The demand for used machines is big, they report.

SAN FRANCISCO.—About 20 jobbers from Los Angeles are in 'Frisco this week as guests of the local jobbers. They are having banquets, motor trips, and theater parties among other enjoyments. A meeting was held the first of the week when plans for the coming season were discussed.

Terse Tidings from Tacomaites

TACOMA, Wash.—Tacoma dealers and motorcyclists during the past week have been more than busy welcoming the new 1917 machines. The first to arrive was the Henderson at the Fuller Cycle & Supply Company, and the force were compelled to put in a number of extra hours in order to demonstrate the silent blue boy to the admiring fans.

In addition to welcoming the new two-wheeler, the boys were pleased to meet T. W. Henderson himself, who was pleased to include the "City of Destiny" on his Pacific Coast tour, all of which will help to stimulate Henderson sales in the Northwest.

ALTHOUGH the regular touring season to Mount Tacoma has ended, Northwest motorcyclists are enjoying the ideal fall weather and are still taking their week-end trips on the various roads to the beaches and up the adjacent valleys. A number of riders have also used their machines to bring in a number of pheasants and grouse.

EVERY motorcyclist in Pierce County has been forwarded an engraved invitation by Ray Day to visit the Powerplus shop and inspect the 1917 Indian beauty, which proved a stellar attraction in Tacoma during the past fortnight.

CONGRESSMAN LAUDS

Army Motorcycle Following Visit to the Mexican Border

SPRINGFIELD, Mass. — Congressman Allen Treadway, of the First Massachusetts district, expresses himself highly impressed with the work of the motorcycle in army service. The congressman spent several days on the border this summer, inspecting the troops and their welfare. While there he was given the services of Sergeant Drake, of the Second Massachusetts Infantry, and an Indian sidecar outfit, to convey him from place to place.

"I watched the motorcycles and the machine gun cars at work," said Mr. Treadwell, "and was impressed with their serviceability in army work. They showed up wonderfully well in traveling over rough roads, thus proving their durability and strength."

The machine gun company is equipped with Indian gun outfits, donated by residents of this district.

NEW ZEALAND TARIFF

WELLINGTON, N. Z.—Among recent decisions relating to cycle goods imports into this commonwealth under the Customs Duties Act are the following: Clutch nuts for cycles, 20 per cent. foreign and 10 per cent. on British made; cycle axles, free; motor tool bags, tool boxes and tool rolls, including oil can and brushes, 20 per cent. foreign and 10 per cent. British made. These duties are ad valorem. A primage duty of one per cent. ad valorem is also levied, whether the goods are duty free or not.

TWO SIDECAR HONEYMOONS

PATERSON, N. J., Oct. 28.—Two of the officials of the W. Edw. MacDougall Company, local Harley-Davidson representative, have gone on sidecar honeymoons today. They are Elmer Havenstrite, the manager, and Edward D. Mutter, assistant manager. Mutter and Miss Essie Vanderbeek were married last night, while the Havenstrites were wedded the day before. Each couple started off following the Mutter wedding with the blushing brides in the sidecars and the grooms driving. The quartet will be gone for two weeks, the destination being Bangor, Me.

ORDER MORE TAGS FOR 1917

DENVER, Colo.—The Motor Vehicle Department of the State of Colorado has just ordered 50,000 automobile and motorcycle license tags for use in 1917. Last year there were only 45,000 tags ordered. Of this number, 11,670 were used in Denver in 1916.

ON WAY TO PACIFIC COAST

ALBANY, N. Y.—Four Albany motorcyclists, Dan Wright, Fred Tegler, Fred Zeihm and John Henry, left Albany recently for a trip to San Francisco, Cal. They are using two Harley-Davidson sidecar combinations and carry complete camping equipment. They intend to make the trip a leisurely one, and the latest reports state that they are making their way over bad roads in Missouri. The tourists will remain on the Pacific Coast during the cold weather.

NEW STOLL CATALOG

DENVER, Col.—The Stoll Mfg. Co. has just issued an attractive catalog showing the 1917 line of Stoll tandems. No radical changes have been made in the company's products for the coming season, but close attention has been given to refinements wherever they were found possible.

Owing to the increased costs of material and labor, and the fact that the Stoll tandems have always been marketed on a small margin of profit, the company was compelled to advance its prices on Nov. 1.

FIELD TIED IN BOSTON SIX-DAY RACE

After Two Days of Racing the Eleven Teams are Still on Even Terms —Grenda and Goullet and McNamara and Spears are Favorites

BOSTON, Mass., Nov. 8.—When the field in the six-day race, which is now being run at the Arena, finished the second ten-hour shift at 5:30 o'clock this morning, they finished on even terms, Alfred Grenda of the Goullet and Grenda team winning the final sprint. In the two days of riding the field covered 466 miles and 4 laps (the track is ten laps to the mile), as against the local record of 489 miles and 7 laps for this kind of competition.

The First Good "Jam"

During the early hours of the second day's racing, and while the Arena was crowded with Election Day enthusiasts, the Jake Magin and Frank Corry and Eddie Madden and Willie Hanley teams made a break and opened up a gap of a half-lap, which they managed to keep for some time. The ensuing "jam," the best one so far in the race, had the riders and also the trainers busy while it lasted. Big Grenda finally went out and closed the gap and the field remained intact, with the exception of intermittent sprints, for the rest of the night.

William Spencer, of the Spencer brothers, and Ray Eaton, of the Sullivan-Eaton team, won the only "primes" offered during the day. The teams of Grenda and Goullet and McNamara and Spears are the favorites with the crowd, but there are plenty of supporters for the Hanley and Madden and the Magin and Corry combinations.

THE FIRST DAY AT BOSTON

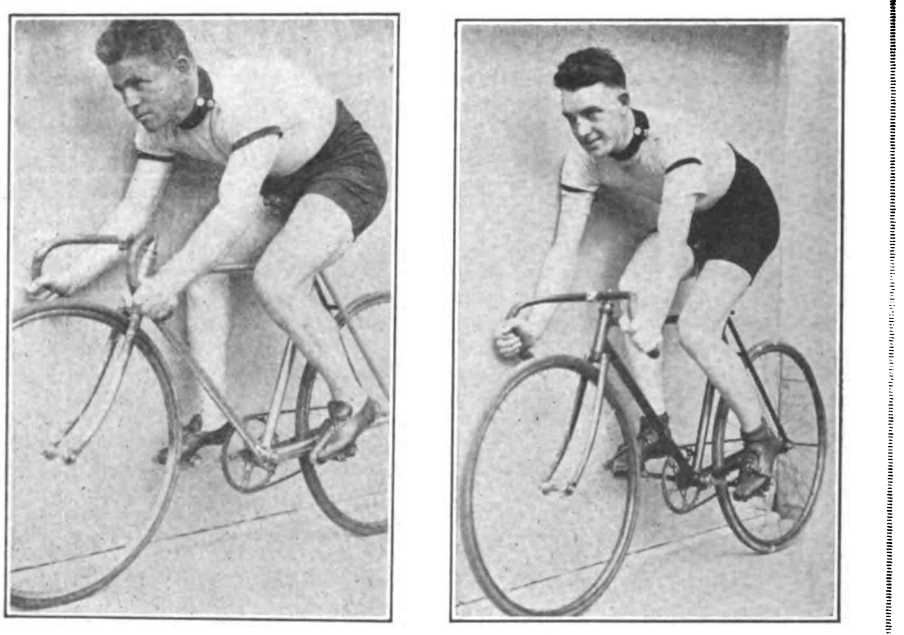
BOSTON, Mass., Nov. 7.—Eleven teams got away promptly at 4 o'clock yesterday afternoon in the annual six-day ten-hours-a-day race at the Arena. The riders are to ride from 4 o'clock in the afternoon until 2 o'clock the following morning on all nights except Tuesday, Thursday and Saturday. On Tuesday and Thursday they will ride from 7:30 at night until 5:30 the following morning. On Saturday they will start about noon and finish as near 10 o'clock as possible.

Those Who Started

The following teams started: Alfred Goullet and Alfred Grenda, Bob Spears and Reggie McNamara, Eddie Madden and Willie Hanley, Jake Magin and Frank Corry, Clarence Carman and George Wiley, Iver Lawson and Eddie Root, Tim Sullivan and Ray Eaton, Arthur and Willie Spencer, Tom Bello and Vincent Madonna, Percy Lawrence and Lloyd Thomas and Harry Kaiser and Marcel Dupuy.

The race on the first day lacked the usual "pep" and excitement that usually goes with this grind. The weather was cold and raw and the building was about the same. There were many sprints by the riders. In all ten sprints were indulged in without serious damage to any of the teams, and the crowd was delighted.

Bob Spears, still suffering from his fall of Saturday night, and his partner, McNamara, were not as aggressive as usual, due partly to McNamara nursing Spears along. Arthur Spencer won a 'prime" from Marcel Dupuy, and in the final sprint Frank Corry won from Lloyd Thomas and Alfred Goullet. The riders were tired when they finished their first day's riding, with 239 miles and 9 laps to their credit, they being 11 miles and 8 laps back of the record.



Willie Hanley, on left, and Eddie Madden, One of the Favorite Teams in the Boston Six-Day Race

NOTES OF THE "GRIND"

The Spencer brothers, hired a stranger for a trainer, which is a rash thing to do. They discovered their rashness and the loss of their watches and their bank roll shortly after the race started. It was said that Arthur went after the first "prime" in desperation and he won it.

After Bobby Walthour and Mrs. Walthour, who are doing a home trainer act at a local theatre, finish their act they visit the track to see the boys go around. Ernest Ohrt, who quit his job in Newark to go with Walthour, is a nightly visitor also. Ernest may yet join a circus, which apparently is his one desire.

Charley Turville and Jimmy Hunter, who is called "Dare Devil," enliven matters by giving motorcycle races during the evening hours.

George Wiley surprised the natives and himself by actually starting. George does hate these races, but he says that he might as well ride them as the coin will be welcome Saturday night. Some logic that.

GRENDA WINS NOVEL EVENT

NEWARK, N. J., Nov. 6.—Walter Grenda won the "hare and hound" chase of the Bay View Wheelmen. The race was ridden in a rain and the "hares" rode for about 26 miles before being overtaken by the "hounds." At one place in the chase the "hounds" were forced to carry their bicycles on their shoulders for about six miles through the woods. The winner covered the course in 2 hours and 15 minutes.

NEW CATALOG COMING SOON

CHICAGO, Ill.—The Chicago Cycle Supply Co. is now working on a new catalog which promises to be one of the most comprehensive books of the kind every published to cover the motorcycle and bicycle trades. It will be ready for mailing about the middle of December.

BOSTON'S RACING CARNIVAL STARTED

Alfred Goullet Wins "Alternance" Match—McNamara Captures 10-Mile Open—Paced Champion Carman Beats Wiley and Madonna—Eaton Takes Handicap

BOSTON, Mass., Nov. 5.—Boston's annual indoor carnival of bicycle racing opened at the Arena last night. A program of four classy races for the professionals was arranged by the management for the "curtain raiser," and that cycle racing is one of the favorite sports of local sport lovers was amply demonstrated by the large turnout, it being estimated that nearly 6,000 people crowded into the building.

The feature of the night's racing from the standpoint of the sprint-racing devotees was an "Alternance" match at a mile, in which Alfred Goullet, the former Australian; Iver Lawson, the Salt Lake Swede; Marcel Dupuy, from Sunny France, and Reggie McNamara, the "Iron Man" from Australia, met in four matches, one rider staying out of each heat.

Mac Takes First

McNamara won the first heat from Dupuy and Lawson, while in the second heat Goullet led Lawson and Dupuy over the line in that order. This heat was run twice, Dupuy winning on the first try, but as Goullet punctured the heat was run over. Goullet also won the third heat, this time McNamara being second and Dupuy third. The fourth heat also went to the credit of Goullet, McNamara being the second man and Lawson third. Goullet won with three points to seven for McNamara. Lawson and Dupuy each had 13 points.

A stirring finish marked the ten-mile open for the professionals, in which 16 riders started. Bob Spears punctured and fell in the first mile and half-mile prizes livened up matters so that at start of the last mile only ten riders were left. A half-mile from home Alfred Grenda went to the front with the field hot on his trail. Grenda gave way on the following lap to Jake Magin, who had Willie Hanley in tow. Hanley shot out at two laps to go and looked like a winner, but McNamara, coming strong, just nipped him at the tape. Goullet finished third, Eddie Root fourth, Grenda fifth and Jake Magin sixth. The time was 21:31 1/5.

Clarence Carman, the paced champion, had rather easy going in the paced race, which was run in five-mile heats, and in which he was opposed by George Wiley and Vincent Madonna. In the first heat Carman beat Wiley, and in the second Wiley triumphed over Madonna. In the third Carman again showed in front of Wiley. The times were 8:11⅘, 8:09⅘ and 8:10⅘, respectively.

A half-mile handicap went to Ray Eaton, the Newarker, from the 45-yard mark. Percy Lawrence, 50 yards, finished second; Frank Corry, 30 yards, third, and William Spencer, 35 yards, fourth. The time was 54⅖ seconds.

SLADKIN PLACING AGENCIES

PHILADELPHIA, Pa.—The Haverford Cycle Co. is placing Dayton bicycle agencies throughout the State of Pennsylvania now, and Proprietor Max Sladkin is satisfied that in the course of two or three months, every town that has a bicycle shop will be proud of its Dayton agency.

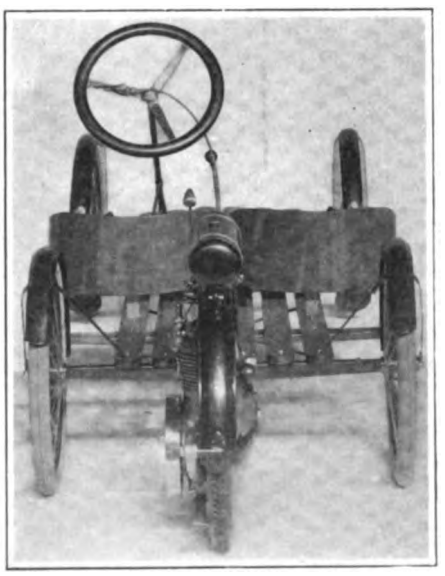
Two men are on the road seeing agents about Dayton bicycle representation. More than 100 Daytons were sold and delivered last week.

RACING CYCLISTS TOUR TO SIX-DAY RACE

One from Chicago, Two from Toronto, and Five from Newark, Hit the Trail to St. Botolph's Town

BOSTON, Mass., Nov. 8.—A number of the cyclists who are competing in the six-day race, which is now being ridden at the Arena, came to Boston over the roads by bicycle. Iver Lawson, tthe famous Swede, came on from Chicago, Lawson doing 1,100 miles in eleven days, while the Spencer brothers, Arthur and William, came on from Toronto.

THE POWER FOR THE FLYER



A Rear View of the Smith Flyer, Which Will Be on Exhibit at Chicago

By far the largest party was that which came from Newark. In the party that arrived here Thursday afternoon from the New Jersey metropolis were Lloyd Thomas and Percy Lawrence, the San Franciscans; Tom Bello, the Brooklyn Italian, and Harry Kaiser, the New Yorker. Clarence Carman, who left New York with the party, came on from Worcester by train, as he was desirous of saving himself for the paced race of last Saturday night.

Riders En Route

Thomas, Lawrence and Kaiser left the Newark Velodrome at 9 a. m., Tuesday, Oct. 31, and picked up Bello and Carman in New York. Considerable trouble on account of wet streets handicapped the party while going through New York City. Dinner was taken at New Rochelle, and New Haven, Conn., was reached at 5:30 p. m., the party stopping there for the night. Tim Sullivan, the New Haven rider, met them ten miles out on the road and escorted them into the city. Ninety-five miles was the first day's mileage.

At 9:30 a. m. the following morning the party departed from New Haven, rain causing a late start.

Eat at Hartford

Dinner was taken at Hartford and then they continued on through Springfield to Palmer, this state, where they arrived at 5:30 p. m., and they decided to stay there for the night. Eighty miles was the day's score. The final day's riding started from Palmer at 8 o'clock in the morning. They continued on to Worcester, where Carman left them, and thence to Northboro, where they stopped for lunch. The city limits were reached at 2:30 p. m. on the third day and the Arena, where they are now grinding away, at 3:30, having covered 80 miles, or 255 miles for the trip. And they say that if the weather is not too cold after the race they will return to Newark by their bicycles.

MORE TERRITORY FOR N. Y. SPORTING GOODS

Big Metropolitan Company Now Handles Pierce Cycles in Most of the Empire State for 1917 Season

NEW YORK, N. Y., Nov. 8.—The Pierce territory now covered by the New York Sporting Goods Co. has been further increased by the allotment of all the State of New York west of the 77th degree—that is west of a line drawn through the city of Lyons. The present territory in which this firm handles Pierce bicycles includes all of New Jersey, Long Island, Connecticut (west of Connecticut River) and Eastern Pennsylvania.

Travels Fifteen Men

With fifteen men on the road and with a bicycle division, which is a distinct big business in itself, Mr. F. A. Baker, the president, has perfected plans for an increase in bicycle and bicycle supplies sales of at least 30 per cent. The fact that the New York Sporting Goods Co. has enough machines and its allied lines actually purchased to cover this increase, means that deliveries can be made in spite of disturbed manufacturing and selling conditions.

Has Goods on Hand

"We believe in having the goods in hand before we take orders for them," said President Baker. "This policy entails the tying up of a great deal of capital—but our customers get the benefit of lowest prices and prompt execution of orders. We give them the goods *when they want them*, not when we can get them."

In a recent announcement sent to the trade attention was called to the fact that 1917 prices have not been advanced. On one model the dealer's cost is even less than last year.

COLUMBIA THE 1917 POPE-MADE LEADER

(Continued from page 41)

rubber grips. Fisk No. 66, 1 1-2-inch tires, white with fancy red tread. Corbin coaster brake.

Next in line is the Columbia Cushion Frame model which is a chain driven Pope wheel fitted with the original Columbia type of two-piece cranks, front extension handlebars, front and rear mud guards, Morrow coaster brake and Eagle Easy saddle. Its distinguishing feature is, of course, the cushion frame which provides for easy riding. It lists at $52.50.

The Columbia Superb model made in both men's and ladies' types is identical with the Cushion Frame in specifications except that it is fitted with a rigid frame. It lists at $45.

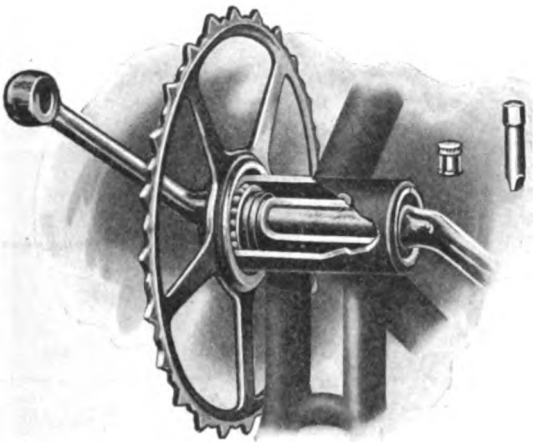
The Columbia Daily Service model meets the need for a high grade delivery bicycle combining easy riding qualities with strength and durability. The box type extension hadlebars support a metal parcel carrier and a luggage carrier is fitted over the rear wheel. The wheels are laced with Diamond E tandem spokes and a substantial stand is fitted. It likewise sells for $45.

The Columbia Roadster model is a high grade bicycle made in both men's and ladies' types and sells for $37.50. Messenger saddles are fitted on the men's models and Troxels on the ladies'. Fisk ripfast tires, Morrow Coaster brake and both front and rear mud guards are standard throughout.

The new Columbia Arch Bar model is identical with the Roadster, except for the truss frame design.

As for the rest of it the Columbia line comprises the Racer model, which quite naturally is made as light as is consistent with strength and as speedy as the Pope folk can turn out a bicycle after 30 years of experience. It sells at $55. There is also a line of Columbia Juveniles which embrace, in abridged form, of course, all the well known Columbia features. The juveniles are priced at $26 to $30, according to the size.

One of the Leaders of the Columbia Line, the Ladies' Roadster Model, Which Sells for $37.50 With Coaster Brake; It Is Well Guarded

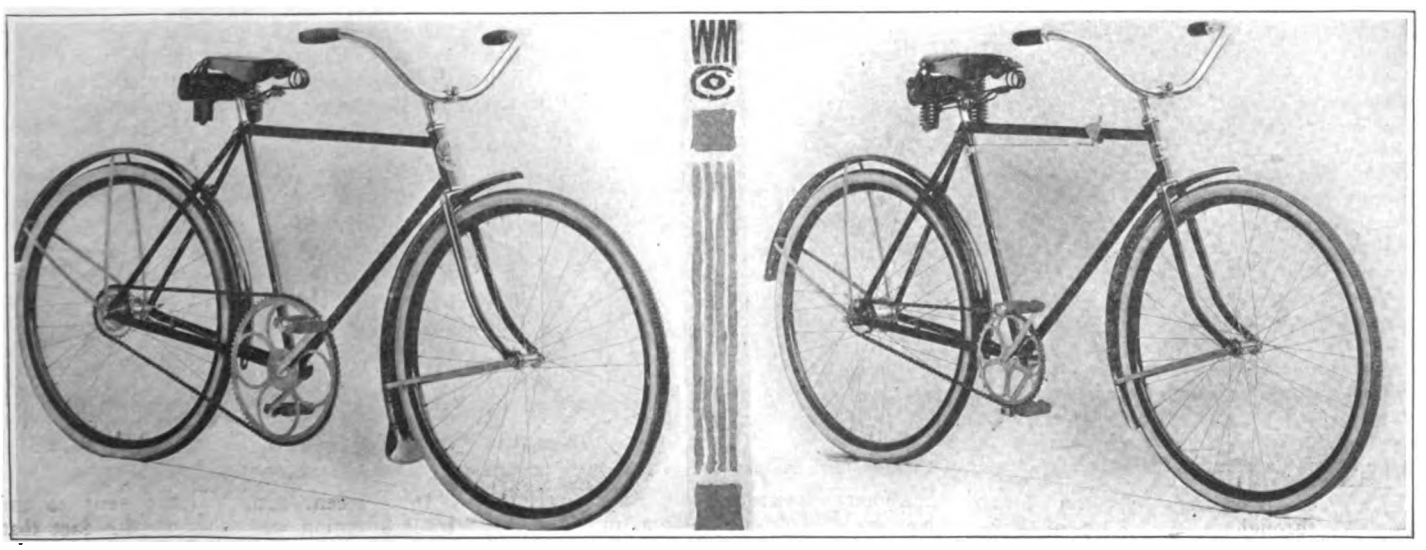


Making Clear the Unique Construction of the Pope-Made Crankhanger on Columbia Models

CRESCENT TEN MILE

BALTIMORE, Md., Nov. 6.—Visiting cyclists from the Century Road Club Association, New York Division, captured most of the leading prizes in the ten-mile road race promoted by the Crescent Bicycle Club yesterday. Willard Knecht, a three-minute man, won in 26:33, while Louis P. Sattler, 1½ minutes, finished second; Max Halpern, 1½ minutes, third, and John J. Marquart, scratch, fourth, all being from this club. Marquart captured the time prize in 25:20.

In the Goodrich trophy the Century Road Club Association won with 17 points, the lowest score in that competition scored this year.



Two of the Feature Members of the Comprehensive Pope-Made Bicycle Line. The Pope Special, Which Lists at $42.50, and the Crescent Roadster, Priced at $50; Three-Speed Hub on Pope Special Is an Extra

SEPTET OF HARLEY-DAVIDSON BICYCLES

(Continued from page 42)

ahead of the seat post cluster, which gives it the snappy appearance that has been associated with the Harley-Davidson name since the bringing out of that style of top bar in 1911 on Harley-Davidson motorcycles. The Motorcyke has an extra truss bar designed to make that model especially adaptable for hard service. The same graceful lines are seen in the 7-17 Special, which is a light model with extremely low saddle position obtained by using an 18-inch seat post mast with the standard frame head for a 20-inch frame. In other words, this model provides a saddle position consistent with an 18-inch frame.

The rear fork and the rear fork stays are also of 18-gauge tubing with heavy rear fork ends designed for push-back chain adjustment. In the designing and manufacture of the rear fork the same care has been exercised that is evidenced throughout the frame construction, the fork ends extending well into the frame tubing, being fitted tightly and dip brazed to assure absolute rigidity.

Fork Details

Models 1-17, 2-17, 3-17 and 7-17 have a triple plate fork crown, the fork plates being carefully spaced and pinned and then aligned before brazing. The fork sides, which are 18-gauge, are forced through three of the crown plates to the top of the finish plate, and there is a similar operation for the fork stem. To add greater strength to the construction a reinforcement is forced to the bottom of the stem well above the three crown plates. The juvenile models, known as 6-17 and 5-17, have a drop-forged crown with reinforced stem, the crown and fork ends being heavily nickeled.

The Motorcyke has a truss fork of unusually rigid construction. The truss runs from the fork ends through the crown plates, where it is firmly anchored and brazed. The two members of the truss combine at the top where they are anchored to a heavy truss plate fitting around the fork stem. The truss member tips are drop-forgings.

The Harley-Davidson crank is a one-piece drop-forging of high duty steel which is carefully machined to assure having the main bearing cones of the hanger absolutely parallel; this operation adds materially to the easy running quality of the new bicycles. The crank forgings are carefully heat-treated to obtain maximum strength. Except on Model 1-17, which has round pedal cranks, all the pedal cranks are diamond bayonet style. A neat refinement is the use of a flush type lock-nut on all crank hangers, this being interchangeable on all models.

Sprocket Design

The sprockets on all models, except those for juveniles, are of new design, the spider being built up of the letters "H-D," and are unusually attractive as well as light and strong. The highest quality of steel is used in the sprockets and the machining operations are done carefully to assure accurate chain alignment. In tooling up for the manufacture of this new sprocket care has been exercised to assure perfect teeth so there will be perfect chain-fit, a point that is appreciated by all riders who admire quiet running and maximum service from chains and sprockets. The outer face of the sprocket is recessed, consistent with the strength required, to obtain lightness as well as to add to its appearance.

In the front hub the ball races and cones are given an especially glass-hard surface, thus ensuring long life and the minimum of wear. Two-point bearings are used in the hubs. The rear hubs are of New Departure make, incorporating a coaster brake. This brake is fitted on all Harley-Davidson models. Diamond chains, of one inch pitch and 3/16-inch width are fitted.

Mudguard Construction

Mudguards are of pressed steel, 22 gauge, with raised center and rolled edges. The Motorcyke model has guards with drop sides to assure even better protection to the rider. Guard braces are substantial, being of the single type for the front wheel and double for the rear wheel. The braces are fastened to the guard and nickeled round head screws and lock washers. Braces are enameled in black. The chain guard on the ladies' model is enameled olive drab with Brewster green panel. A laced rear guard is fitted to this and the girls' model.

Rims are of rock maple, made by the American Wood Rim Co. Standard spokes are used on all wheels.

The Motorcyke and 7-17 Special are fitted with a rear wheel stand of channel iron, in new design. The stand is non-rattling and extra strong. It is finished in dull nickel. Troxel waterproof top saddles are standard on all models, the Tip Top being used on the 1-17 and 7-17. Model 3-17 has the Eagle Easy saddle, while 3-17 has the ladies' Comfort Cushion. This saddle has been especially designed by the Troxel firm for ladies' use. The saddle for the Motorcyke is the Troxel No. 2 Motorbike model, and is fitted with a universal clamp to give any desired saddle position, the same as on a motorcycle.

The youngsters have been given a great amount of consideration in the selection of a saddle for the Boy Scout bicycle, known as 5-17, and for the Girls' Juvenile. On these two models the Harley-Davidson company furnished the Troxel Juvenile Comfort Cushion, which is a size smaller than that furnished on the adult models, but considerably larger than the ordinary juvenile saddle, and is fitted with more ample springs.

Handlebars

Models 1-17, 5-17 and 6-17 are fitted with Schineer handlebars having a 2½ inch extension stem. Maximum riding comfort is assured by equipping the bars with leather wound grips. Model 2-17 is equipped with English box handlebars, 22 inch wide, with 6 inch drop and 2½ inch extension stem. These handlebars are unusually wide, and fitted with Enduro red rubber grips.

For the ladies' model, No. 4 Chicago handlebars are provided, 20 inch wide, with a 3½ inch drop, 2½ inch extension stem and Enduro red rubber grips. This is a stylish bar for a ladies' wheel and harmonizes well with the complete design. The Motorcyke comes fitted with Shelby braced motorbike bars, 21½ inches wide and with a 4½ inch drop forged extension stem. The clamp of the extension and the center of the bars are serrated to hold the bars firmly in any position regardless of the weight of the rider and the service to which he puts his bicycle. The grips on the Motorcyke model are long and flexible and steel reinforced. Motorbike No. 4½ bars with red rubber grips are used on the 7-17 Special, the long rakish handlebars being selected because they harmonize well with the general design and neat appearance of this feature model of the Harley-Davidson line of bicycles.

Fisk Victor 28 x 1½ inch tires with white tread and gray side wall, are used on Model 1-17. The Boy Scout model and the "Girls' Juvenile" are equipped with Fish Premier motorcycle type tires, 24 inch or 26 x 1¾ inch, black tread with white side wall. This is a very classy tire and one that is especially popular with the youngsters. Firestone red Non-Skid tread with white side wall 28 x 1½ inch, are used on Models 2-17, 3-17 and the 7-17 Special.

CONTINENTAL PRODUCTS FOR THE BICYCLE

Enduro and Brigadier Tires for Riders Wanting Medium Priced Tires —The Enduro Grip Takes the Place of the Old Style Grips

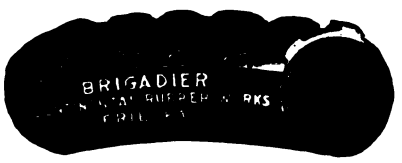
ERIE, Pa., Nov. 7.—Two additions to the Vitalic line of single tube tires, made by the Continental Rubber Works, of this city, are the Enduro and the Brigadier, and they are calculated to meet the demands of the riders wishing a popular priced bicycle tire.

The Enduro is built with two plies of

"Enduro" Diamond-Studded

high grade Egyptian fabric with very high grade friction. The Enduro is supplied with a heavier inner tube of very good quality and a good substantial diamond studded white tread.

The Brigadier is a four-ply tire, built with two plies of best Egyptian fabric built all around the tire and two extra plies on



The "Brigadier" Tire

the tread. The inner tube is extra heavy and is made of a high quality rubber. The Brigadier is made up of gray side walls and heavy white studded tread.

Another new Continental-Erie product is their Enduro grip, a grip designed to

The "Enduro" Grip

take the place of the old style, wooden and leather wound grip for the bicycle. They are made of high grade rubber, reinforced with fabric, along the same designs as that of the motorcycle type, and come in black, red or white.

TAKES ON DIAMOND

MUSCATINE, Iowa.—Edward Volger, vulcanizing specialist, has taken the agency for the Diamond bicycle tire line for this city.

U. S. TIRES IN MUSCATINE

MUSCATINE, Iowa.—Howard & Deems and G. Glatstein & Sons Co., have taken on the United States bicycle tire line of 1917.

GREAT MOTOR WHEEL RUN

PHILADELPHIA, Pa.—A remarkable run from Asbury Park, N. J., to Philadelphia, Pa., 96 miles, was made by Frank F. Morton, of 242 South Sixtieth street, West Philadelphia, Pa.

The entire trip was over roads covered with four inches of crushed stone and sand, and was made without the slightest motor trouble, with one gallon of gas and one-half pint of oil. At best the roads were just ordinarily bad—at their worst they were awful.

BIGGER DEMAND

For 1917 Indian Bicycles, with Motorbike Model as Best Seller

SPRINGFIELD, Mass., Nov. 8.—With the opening of its second year in the bicycle field the Hendee Mfg. Co. finds that its business in the pedal machines is growing even beyond expectations, and that the most energetic efforts of its bicycle organization will be needed to keep up with the demand. Arrangements have been made to increase the 1917 bicycle output considerably over the output for last year.

An interesting feature of the increasing demand for Indian bicycles is the fact that the best seller in the line is the electrically equipped Motorbike model, which heads the list also as regards price. The Motorbike has enjoyed the biggest demand since the introduction of the line.

MANY SALES BY EBSEN

CLINTON, Iowa.—Martin Ebsen, the oldest bicycle dealer in this city, sold over 75 wheels this season, these being new models. He also disposed of 50 used bicycles. Ebsen handles Hearsey tires for Clinton, and is retail agent for Goodyear and Fisk tires.

SOLD 250 BICYCLES IN MOLINE

MOLINE, Ill.—Streed & Scheppers, handling the Excelsior, have delivered 12 machines so far this season. Their bicycle business was the largest they ever had, amounting to 250 wheels in all. United States tires are featured by the partners.

ELGIN PROSPECTS IN DENVER

DENVER, Col., Nov. 5.—The Western Supplies Co. has received a large shipment of Elgin bicycles. These bicycles are attracting much attention and good business is looked for between now and the opening of the spring season.

MINOR IMPROVEMENTS IN 1917 MOTOR WHEEL

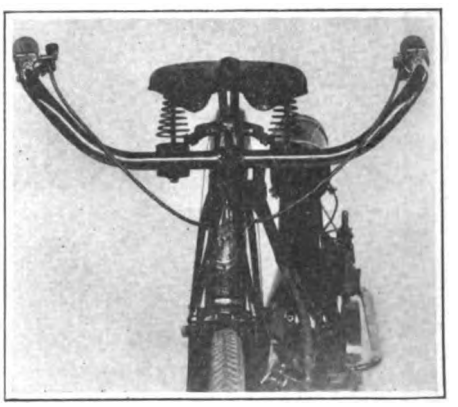
(Continued from page 43)

The other big improvement that will be found in the Motor Wheel at the Chicago show has to do with the inlet valve. The older form of conical valve with tapered face and seat, has given way to the true mushroom type with flat face and seat which is claimed to eliminate all chance of the valve sticking closed when the motor is cold; at the same time it opens easier and makes for easy starting and smoother operation.

By way of eliminating the wear at that point and thereby doing away with the necessity of frequent adjustment, the washer and cotter arrangement which formerly was used for the purpose of holding the inlet valve spring in place on the valve stem, in the newest model the end of the valve stem has been peaned over on the washer, permanently fastening the latter in place.

One thing that is pointed to with pride in the case of the Motor Wheel announcement, is the fact that all of the changes, everything considered, are slight in character, no alteration being made that can be even remotely construed as approaching the radical. It is pointed out that the Smith folk spent many months on development work before the Motor Wheel was finally launched on the American market a little over two years ago, and that its high state of development at that time has admitted of only a mere handful of detail changes during the two years it has been in the hands of the public.

Another feature of the Smith policy on which emphasis is laid is that ideas and suggestions from both dealers and riders of Motor Wheels for the improvement of the little "Bicycle Booster" are desired and that such suggestions will have the full consideration of the Smith engineering department. It is these suggestions, coupled with a close watch which is kept constantly on the performance of the Motor Wheels in actual service the country over, and constant experimentation in the engineering department, that have resulted in the de-



velopments that have made the wheel an even more satisfactory bicycle motor attachment today than it was when introduced.

One important fact that will interest the trade deeply concerns the price of the Motor Wheel. Despite increased manufacturing costs due to shortage of material and the demands of labor for higher wages and shorter hours, the price of the Motor Wheel remains at $60 for the present, at least. If conditions remain substantially as they are at the present time, there is scant doubt but what the price will hold throughout the season, but should manufacturing costs take another jump skywards, the Smith folk make it plain that a corresponding increase in price can be expected.

"WATCH US SELL MOTOR WHEELS NOW"

said a leading New York state dealer, when he saw the Smith Motor Wheel improvements.

You, too, will say Motor Wheel sales can again be doubled when you see the new control, new inlet valve, improved piston and—but you'll see them yourself at our big Chicago and New York Show exhibits. See also the Smith Flyer—it will be the real sensation of the Shows.

Think of it!—just two years ago there wasn't one Smith Motor Wheel dealer—now there are over 2000. The reason? It's *profitable!* Last season's sales exactly doubled the first season's. And "Double the Business" is the slogan for next season.

You'll spot the Smith exhibit on the main aisle, Coliseum, spaces 126 and 147—drop around for the "glad hand," even if you don't belong to the big Smith family. We'll have something interesting to show you and can offer you a mighty good dealer's proposition.

SIGNS THAT INDICATE TREND OF 1917 DESIGN

(Continued from page 35)

fered both in single-geared and three-speed models. The Emblem three-speed is of the sliding gear type positioned on the countershaft.

The electrically-equipped model fitted with combined generator and magneto and storage battery has won new converts in the Thor, the Pope and the Reading-Standard and such models now are offered by every manufacturer with the exception of those whose exclusive product is lightweight machines. And, speaking of electrical equipment, there is a great tendency to combine the horn and the headlight in a single instrument, six of the machines on the floor being fitted with a combination instrument of this sort. This makes at once for economy of space where space is at a premium, and for simplicity in the wiring arrangements.

Kick Starter Universal

The direct-acting kick starter has come close to winning the entire motorcycle field. The Harley-Davidson, which last year offered the "step starter" as optional equipment, has discontinued that option in favor of the segmental kick starter and the Pope has further embraced its use by supplying it on the singly-geared twin as well as the three-speed model. At the same time the Emblem comes through with a segmental starter and the Cleveland also enters the lists with a kick starter of this most popular type.

There has been some progress made in the last twelvemonth toward a simplification of the interlocking system between the clutch and the three-speed so that the gears cannot be meshed unless the clutch is first disengaged. This tendency is exhibited on both the Dayton and Indian as well as the Pope and Henderson, and results in a reduction in the number of points at which wear can occur to throw the mechanism out of "kilter" in days to come.

Control Systems

Coming down to clutches, with the exception of the adoption of the wet plate type of multiple-disk clutch by the Henderson, there is little that has been done; for the most part the manufacturers prefer to pin their faith to the dry plate type, although the R-S, Excelsior and Emblem, as well as the Pope, use clutches with lubricated friction surfaces.

Perhaps of all the changes or tendencies none is more important than those bearing on the arrangement of the controls. As ever, there is very little to indicate the coming of the day when the controls will be standardized; there is, however, a very noticeable leaning toward the foot operated clutch, the clutch lever being positioned on the left foot board. The automobile type of control, with the clutch engaged upon the release of the clutch lever is this year being used on the Indian, Henderson, Dayton, Reading-Standard and Thor. All of these makes stick to the brake operated by right foot lever.

There is not the slightest sign of an attempt made to standardize the gearshift arrangements, the shift lever, as heretofore, being positioned to suit the individual whims or ideas of the designer rather than with a view to emulating the automobile system and thereby tending toward a universal control system for all motor vehicles. So also with the throttle, spark and compression release elements. For the most part these functions are vested in the handle bar grips, but the elements serve different purposes with the different makes of motorcycles.

Double Brake Gains

There are many tendencies that will be noticed at the Chicago show which are laudable to the last degree. Not the least of these is the fitment of double brakes patterned after the automobile, combined external contracting and internal expanding brakes. The Dayton, Thor and R-S are so fitted for the first time this year, while the Harley-Davidson is now fitting this type as regular equipment instead of as an extra. In most cases the operation of the second brake is vested in a small handle bar lever.

In frame design there has been some marked progress. Perhaps the most striking example is seen on the Dayton which now is designed to provide the extremely low saddle position of 27½ inches, while with the Indian and the R-S the head fitting designs have been recast somewhat and made stronger. In several instances provision in the way of sidecar attachment lugs has been made in the frame design to convert the motorcycle and sidecar combination into a compact integral unit still preserving the ability of readily detaching the sidecar when desirable or expedient.

Move for Silence

The movement toward a more nearly silent machine which has resulted in a redesigned and padded muffler and also the adoption of padded chain guards on the Thor is not to be overlooked. It is a step ahead in the right direction and one that no doubt will win converts in every quarter of the United States.

Noteworthy also is the adoption of front-wheel stands on the Harley-Davidson, Thor and Pope models and the fitment of rear stands specially designed to facilitate the lifting of the machines onto the stands on the two last named. Both make for greater convenience and because of that must win favor with the rider who has an eye to comfort and convenience.

One marked tendency which must not be overlooked or overshadowed is toward the elimination of the single cylinder machines. The Indian line, for example, is now made up of twin-cylinder machines exclusively, while the Emblem is concentrating on just one model, a medium-weight twin machine.

Small Details

We could say that the adoption of the neatly-rounded two unit ank by the Indian marks another important gain for that construction—also a gain for tanks of larger capacity—we could also see in the adoption of the 29-inch tire for the Thor service model a step toward the use of the oversize shoe to offset rapid tire wear, and with the adoption of the caster type of front fork providing easier steering by the Henderson, we might be able to see a tendency toward that desirable end. However, these are but isolated instances and as such, must be taken for what they are worth rather than as distinct tendencies.

There is one big movement, however, that affects nearly every manufacturer and which no doubt will be the first to catch the eye of the observer at the Chicago show. That is the adoption of the olive drab military color—something that must be "blamed on the war." The Harley-Davidson only has gone in for this color as standard on all models, but it is understood that the other manufacturers, or most of them, will be glad to supply it on demand.

THIRTY RIDERS ON OUTING

BOSTON, Mass., Nov. 6.—Seventeen motorcycles, carrying 30 people, figured in a trip to Forge Village and Forge Lake on Sunday, Nov. 5. The run was started at Wakefield, Mass., and was conducted by Charles J. Martin, the local Harley-Davidson dealer.

Quite a few enthusiasts of the fair sex were included in the party, occupying the tandems and sidecars. Captain Preston was in charge of the squad and brought it through in good shape. The tourists were joined at Reading by a number of the Reading M. C. Riders. The outing was one of a series that has been conducted with success by Mr. Martin.

SUGGESTION SYSTEM VALUABLE

AKRON, O.—The Goodyear Tire & Rubber Co., of this city, has found its suggestion system of great value in increasing output, adding to sales and improving manufacturing processes. In fact, quite a number of big ideas have been obtained by this system, and in each case, these ideas were substantially rewarded. The Goodyear officials state that since the adoption of the system the quality and efficiency of the Goodyear product has been advanced, as the employees know that their ideas may be turned to their benefit, both financial and in the line of promotion.

CROUT ENTERTAINS RIDERS

MATTAPAN, Mass.—Claude E. Crout, of the Crout Motor Co., and Mr. Crout, entertained about 30 couples, including many motorcyclists, at a Hallowe'en party in their home. Among those who contributed to the merriment of the evening were William Charlton, the local motorcycle comedian; "Prim" the club violinist; "Speck" Maker, "Laughing Mac" Grimley, "Comical" Sherman, "Weary" Williams, George Nelson, John Brown, John W. Shaw, M. J. Laylor, H. D. Fletcher, J. W. Crawford, H. A. McKenny, and Harold Olson. Among the tandem and sidecar girls were Georgina Stewart, Cladys Fletcher, Ella McClennan, Carry Holway, Anna Meagher, Christina Sherman, Margaret Daly, and Hilda Lagerbord.

After the refreshments and entertainment program the party was escorted to the store of Mr. Crout where the newly-arrived 1917 Indian was formally inspected.

"SPACE 119"

Remember the number—119. Look for it. No dealer or jobber with an eye to 1917 business can afford to miss it. It will be easy to find. When in Chicago attending the National Motorcycle, Bicycle and Accessory Show visit space 119 and let our representative explain to you the advantages of selling the Corbin lines. Here you will find a full and complete line of Corbin-Brown Speedometers and Corbin Duplex Coaster Brakes. Look them over and secure terms on your 1917 stock.

The CORBIN-BROWN SPEEDOMETER

is the choice of the motorcycle field. It's the one motorcycle speedometer that can be depended upon to sell big all the time. Look at the speedometer equipped motorcycles and you will know why. This year is going to be a bigger motorcycle year and consequently better for the Corbin-Brown. You will need a number of these speedometers in stock and now is the time to place your order. Do so.

The CORBIN DUPLEX COASTER BRAKE

It no longer remains to convince dealers and jobbers of the advantage of carrying this standard brake equipment. The question is how many can they conveniently carry. Experience shows that each year sees more of these famous brakes in service and this year is going to be no exception. We're wrong. This year is going to be an exception—exceptionally good for the Corbin-Duplex. With the great jump ahead that the sale of bicycles has taken comes a stronger demand for coaster brakes. And people are going to buy the brake that has proved itself—the Corbin-Duplex.

"OLD SOL" Hornlite

Standard Equipment on Indian, Henderson, Layton, Pope, R-S and Thor

The man who meets the rider face to face and lands the sale is the man who knows what the rider wants. It is a safe bet that when a device has the universal endorsement of the dealers, it has earned the endorsement of the riders.

Read what these six dealers have to say about the merits of the OLD SOL HORNLITE. Their opinions are authoritative because they are selling machines equipped with HORNLITES every day and they know its value as a selling point.

Oliver Berckhemer, the hustling Bronx Indian dealer, says in part: "The dealer who presents it properly can make of the Hornlite a big asset in the way of increased Indian interest and increased sales."

Gus Rotholz, who has been doing big R-S business, says: "When I point out the Old Sol Hornlite, there is a word of approval from every rider."

Ben Ruderman, the dynamic Thor dealer of Brooklyn, remarks: "It's a big thing to give the rider a two-in-one instrument of this sort. Your efforts toward fewer and better fitments are fully appreciated by me."

Gene Coughlin, who sells a lot of Hendersons in the Bronx, tells of his approval by saying: "It is a feature that is well calculated to catch the eye and please the prospect, and I am very glad to have it added to the long list of 1917 Henderson selling points."

R. Weaver, of Weaver-Ebling Co., Pope dealers, says: "We find that this handy and efficient combination of headlight and horn answers a distinct demand and relieves the handlebars of all congestion."

Jeanroy, of Driscoll & Jeanroy, Dayton sales agents, tells the Hornlite story like this: "I've looked long and far for a device like the Hornlite, and I believe it makes a great step toward compact efficiency in lighting and warning."

THE BEST DRIVE SPARTAN FOR LIGHTWEIGHTS

Your Watchword for Success

SIMPLICITY

THE big market which you must seek for 1917 will be made up largely of new recruits.

To these new fellows, simplicity will appeal strongly—they must not be lost to you because of any fear that the motorcycle is too big or too complicated; they must be sold a Lightweight, a simple Lightweight.

This big new class will be interested in Simplicity—and that is your watchword, Mr. Dealer, SIMPLICITY; look for it, get it, insist upon getting it.

When you select your Lightweight, eliminate one mass of complications by selecting a belt drive Lightweight—pick belt drive, request belt drive, insist upon belt drive—your success depends upon the very simplicity which a belt drive Lightweight suggests; but don't forget the belt—that must be good—the best, to be specific, it must be a

Varied Activities of the Dealers

WHITING'S NEW PLACE

Arrangements Completed in Denver Distributor's New Home

DENVER, Colo., Nov. 6.—Walter W. Whiting, Harley-Davidson distributor for Colorado, with headquarters in Denver, has just about completed fixing up his new headquarters at 1309-11 Broadway.

Whiting is located in a brand new building with the lower floor devoted to sales rooms for new machines exclusively, the upper floors being given over to a well-equipped repair shop and second-hand machine department.

Despite the fact that two-thirds of Colorado is enveloped in a sheet of snow at the present time, Whiting reports that calls for the 1917 Harley-Davidson are coming in with no let up. To date 25 sub-agencies throughout the Colorado district have been signed up.

SCHROEDER TAKES CLEVELAND

DAVENPORT, Iowa.—George Schroeder has taken the agency for the Cleveland lightweight and has opened an up-to-date repair shop at 307 Brady street. He was formerly located at 1105 West Third street. Schroeder handles the Dayton and Yale bicycles as well as his own nameplate—the Schroeder Special. He features Firestone bicycle tires.

SMULEKOFF'S COMMERCIAL SALES

CEDAR RAPIDS, Iowa. — Robert Smulekoff, local Excelsior agent, has just sold a twin model to the local police department and another to the Iowa Railway & Light Company. To date he has sold over twenty twins in his territory. He will handle Kokomo tires for 1917. Bicycle sales for Smulekoff total 210 wheels for the 1916 season.

SWENSON BACK ON JOB

PROVIDENCE, R. I., Nov. 4.—B. A. Swenson has just returned from a visit to New York and Philadelphia, where he has been buying new stock for his sporting goods department. Mr. Swenson said today that he would place an exhibit at the automobile show to be held in the armory late this month.

LOUISVILLE GETS AN INDIAN

LOUISVILLE, Ky.—The Century Cycle Co., of Louisville, Ky., has sold to the City of Louisville a 1917 model Powerplus Indian. The machine will be used by the city for general department work in the municipality.

BARR TO OPEN NEW STORE

ROCK ISLAND, Ill.—Fred J. Barr, who distributes the Harley-Davidson in the Tri-Cities (Rock Island, Moline and Davenport, Ia.), will shortly open a new store at 308 East Second street, where he will carry a complete stock of machines and accessories. This store will supplement his present quarters at 119 East Third street. He has sold three 1917 models to date.

OLIVER TO MOVE

Bronx Indian Man to Occupy Larger Quarters in December

BRONX, N. Y., Nov. 4.—"Oliver," otherwise Ollie Berckhemer, local Indian man, has just closed a most successful season and found it hard to do business in his old quarters. He will move, on December 1, to a new station at Brooke avenue and 163rd street where there is double the space of his present place at 993 Washington avenue.

The new tepee has two floors and an elevator. The upper part will be given over to a show room, while the repair section will be on the lower floor. Close to 150 machines can be stored in the new place.

SAYERS IN NEW HOME

Cedar Rapids Agent in Larger Place—Takes On Bikes

CEDAR RAPIDS, Iowa.—G. A. Sayers, Harley-Davidson agent, has just moved into a new store at 414 Third street, where he has double the space of his old location on North Third street. Sayers sold 30 machines and three sidecars. He has opened a bicycle department in his new store, and will sell Indian and Harley-Davidson bicycles. Firestone and Vacuum cup tires are handled.

ABBEY & IMBRIE MOVE

To New Quarters in N. Y. Sporting Goods Structure

NEW YORK, Nov. 6.—The final step in the consolidation of Abbey & Imbrie, sporting goods dealers, with the New York Sporting Goods Co., has been effected by Abbey & Imbrie moving their entire organization to 15-17 Warren street, the headquarters of the Sporting Goods Company. The manufacturing, clerical and retail departments occupy separate floors.

The fishing tackle business of Abbey & Imbrie will continue to be conducted under that firm name as a distinct operating division of the New York Sporting Goods Co. The identity of the original company will be retained, and no change will be made in the personnel.

THREE FOR ASHBOURNE

BURLINGTON. Iowa.—The Ashbourne Motorcycle Co., distributing the Indian, has received its 1917 demonstrator and has booked three orders to date. The firm is handling Indian and Perfection bicycles for the new season.

WALKER A JOBBER

Boston Harley-Davidson Man Enters Wholesale Field

BOSTON, Mass., Nov. 6.—Having tried his hand at the mail order business and found it profitable, W. J. Walker, Harley-Davidson dealer, has branched out and entered the cycle jobbing trade.

He has for the past year jobbed certain accessory lines and is now making preparations in the way of a remodeled and enlarged store to go into the jobbing end for all there is in it.

In this connection he has leased a storeroom at 174 Columbus avenue, right next door to his present headquarters, and is having it remodeled to suit his anticipated needs for the coming year.

COMMERCIAL SALES FOR MEYERS

DAVENPORT, Iowa.—G. R. Meyers, Indian distributor, has delivered twin-cylinder machines to the Franc Furniture Co., the Tri-City Cheese Co. and several collectors in this section. He features Firestone motorcycle tires. Meyers also handles Indian and National bicycles.

LOWELL GETS HENDERSON

LOWELL, Mass.—The Lowell Cycle Shop, of this city, has just signed a contract for the sale of Henderson motorcycles in this territory. The Lowell people have ordered a demonstrating machine from the factory and it will be placed on display at their salesrooms at 98 Gorham street.

THOR FOR BOND BROTHERS

MUSCATINE, Iowa.—Bond Brothers have taken the agency for the Thor for this city and surrounding territory. They will handle Excelsior, Pope and Dayton bicycles and Pennsylvania and Firestone tires for both bicycles and motorcycles.

SAN DIEGO CELEBRATES

SAN DIEGO.—The San Diego Motorcycle Shop got its first two Harley-Davidson 1917 models Oct. 20, and there were big doings for the balance of the week. C. F. Bruschi had nearly the whole U. S. Navy at his shop to look over the olive drab machine. On Sunday the new machines were in evidence at the Navy road race on the Highway north of Encinitas, and their riders took the famous Biological and Torrey Pines Grades.

In the afternoon the crowd gathered at Mission Beach for a barbecue. The San Diego Motorcycle Shop set up refreshments for the crowd, and there was a happy bunch of riders on hand at the "regular camping place." This is where Bruschi learned the trick of sand riding, and after the riders had satisfied the appetite acquired in a 70-mile ride along the Coast highway, Bruschi and Rufus Grenfell proceeded to do a few stunts that would give pointers even to the boys who have been dispatch riding along the Mexican border.

GOTHAM AND NEARBY DEALERS ORGANIZE

Form Motorcycle Dealers' Co-operative Association and Plan for Big Things in Future—To Strike at Trade Evils

NEW YORK, Nov. 2.—Having tasted of the fruits of organization and found them sweet, and feeling that much more could be done provided the scope of the association were broadened to include all motorcycle dealers within gunshot, so to speak, of Gotham, those Metropolitan representatives of the Harley-Davidson who a couple of weeks ago got together on a co-operative basis, have extended an invitation to other dealers to join them and cement a close-grained retail trade body that it is expected will have far reaching effects on the local trade.

The first meeting of the enlarged body was held at the office of **Motor Cycle Illustrated,** 21 Park Row, last night and was well attended by not only New York and Brooklyn dealers, but also brought trade representatives in from Jamaica, Newark, Bound Brook, and Plainfield and gave positive indication that the organization germ has taken root.

Get Together Plan

It was pointed out at the meeting, at which Carl Bush of Newark acted as temporary chairman, that if the local and nearby dealers were to get together with every dealer represented and to adopt a fixed schedule of allowances to be made for traded-in machines, to stick religiously to the determination not to buy goods from those manufacturers who supply cut rate houses, and to do at least a measure of co-operative buying whereby all the members would profit by the quantity prices, that the lot of the motorcycle dealer hereabouts would be a far happier one.

It was made plain that an association of this sort, representing the entire local trade, would be a factor to be reckoned with by the manufacturers and that they would think twice before jeopardizing their business with the dealers represented in the organization by selling to the price cutters.

It was decided to draw up a tentative list of the rules governing the members for full and free discussion at the next meeting; in the meantime each of the folks in attendance was instructed to go out among the dealers in their respective districts and bring them all in for the next meeting which is scheduled for Thursday evening, Nov. 23, at 8 o'clock at the offices of MOTORCYCLE ILLUSTRATED.

Because of the unanimous feeling that before proceeding to the election of officers it would be well to have an even bigger representation, that matter was put over until the next meeting with the exception that E. F. Hallock of **Motor Cycle Illustrated's** staff, was chosen as temporary secretary. The name Motorcycle Dealers' Co-operative Association was adopted for the new body.

Dealers, large and small, representing any and all makes of machines are invited to be present at the next meeting and take part in the discussion and plans for the final consummation of the organization.

KOCH'S 25TH YEAR

In Business Celebrated by Increase in Premises at Rock Island

ROCK ISLAND, Ill.—John Koch, handling the Thor and a number of lines of bicycles, is celebrating his twenty-fifth anniversary as a dealer. Koch has been a quarter of a century at 218 Seventeenth street, and has just bought the store and building next his shop in which he will build an up-to-date salesroom and service department.

Firestone motorcycle tires, and Vitalic, Goodyear and Hearsey bicycle tires are handled. His bicycle lines include the Racycle, Yale, Dayton and Great Western offerings.

HANDLE DAYTON MOTOR BICYCLE

YOUNGSTOWN, O.—The Steel City Welding Co., which has bought out the Motorcycle Exchange in this city, will handle the Dayton motor bicycle in addition to an extensive line of motorcycle accessories.

William P. Griffith is managing the new concern.

NOVEL VAN FOR OYSTER FIRM

OAKLAND, Cal.—E. T. Rose, local Indian agent, has fitted up a novel combination of delivery van and sign for the Western Oyster Co. A special sidecar in the shape of a boat has been constructed, with two masts from which hangs the advertisement of the firm. The boat carries the packages to be delivered.

3 Strong Leaders –

a complete quality line that meets every demand

ANY DEALER with a stock of these three tires is completely equipped to supply the demand of *every* customer that comes into his store—from the one who wants the *best regardless of price* to the one who wants a *good* tire at a *popular price.*

THE VITALIC

is built throughout of the best tire materials obtainable,—two plies of genuine *motorcycle* fabric frictioned with pure rubber, an inner tube of pure Para rubber so heavy as to eliminate any possibility of leak, an extra heavy non-skid tread of finest quality pure rubber. Will outwear any ordinary bicycle tire *more than two to one.* Once introduced it easily brings a higher price than other tires and always sells over and over again to the same trade because it *never* disappoints.

THE BRIGADIER

The best popular priced tire ever put on the market, far excelling others anywhere near its price. It is a four-ply tire, built with two plies of best Egyptian fabric all around the tire and two extra plies on the tread. A very high grade friction is used.

The extra heavy inner tube is made of a very high quality rubber. The Brigadier is made with gray side walls and a heavy large white studded tread as shown in the illustration.

THE ENDURO

Another excellent popular priced tire that fills a long felt need for a tire of lower price that has genuine quality. It is built with two plies of high grade Egyptian fabric with a very high grade friction, has a heavy inner tube of very good quality and a good substantial diamond studded white tread.

Write us today for sample sections of these three tires and attractive display material and dealer helps.

Your jobber will show you the tires.

New 1917 Models---Chicago Show

Coliseum—Main Floor—November 13-18

Three important items demand your special attention to the CYGNET Car display at the New York and Chicago Shows. Make particular note of these items:

IMPROVED PLEASURE CARS
Refinements of design, meaning much for added comfort and safety.

UNIQUE TOP for COMMERCIAL VANS
An advent—guaranteeing full protection for operator of delivery car.

TWO NEW DELIVERY MODELS
Low cost delivery for two new and important businesses.

CYGNET REAR CAR CO.

Dept. 4

1200 Niagara St. Buffalo, N. Y.

THE MILLENS MOVE

Big Handlers of American Motor Accessories in New Quarters

TORONTO, Ont.—One of the most important moves in Toronto trade circles for several moons has been the transfer of the Toronto branch of John Millen & Son, Canadian representatives for many American-made accessories, to the remodeled premises at 53-57 Adelaide Street West, Toronto, from No. 90 on the same thoroughfare. The Millen people distribute Stewart speedometers, Champion plugs, Mossberg tools, Prest-O-Lite tanks and fittings, Stevens accessories, Shaler vulcanizers, Weed chains, Veedol, Globe metal boxes and other equipment for motorcycles.

A Canadian branch for A. Schrader's Son, Inc., has been established at 20-22 Hayter Street, Toronto.

The A. R. Mosler & Company is now represented in Toronto by the Canada Sales Company, 165 Church Street.

WILKINS HAS SHORT VISIT

TORONTO, Ont.—The home-coming visit of Flight Lieutenant Steve Wilkins, Royal Flying Corps, the former Toronto motorcycle enthusiast, was somewhat spectacular. After more than two years of life as a soldier, half of which time was spent as a motorcycle despatch carrier for the First Canadian Division in France, Lieutenant Wilkins obtained a furlough of twenty-eight days. He decided to see home and folks at least once more, and therefore started out on a truly flying trip across the Atlantic. On account of necessary military delays he was able to spend only two days at home, and after this short stay he departed again for the "flying line."

NEW HARLEY-DAVIDSON AGENTS

HALIFAX, N. S.—Newly appointed distributors in Eastern Canada for the Harley-Davidson include the following: Halifax—Eastern Bicycle and Motorcycle Company. St. John, New Brunswick—New Brunswick Motor Car Company. Quebec City, Que.—A. E. Faucher.

CIRCLED LAKE ONTARIO

MONTREAL, Que.—Two French-Canadian motorcyclists, Ernest Gagne, of St. Adolphe, and E. Nadeau, of Sherbrooke, Que., strayed far from home when they made a circle of 1,638 miles around Lake Ontario in thirteen days on an Indian Powerplus model of 1916 birth. Their daily mileage depended largely upon the condition of the roads, and their best dash was made over the highways of New York State when they covered 246 miles in nine hours, riding tandem.

NOVEL MOTOR WHEEL TANDEM

VANCOUVER, Wash.—C. F. Maguire, local Smith Motor Wheel dealer, has a novel tandem which attracts much interest and proves as a good advertisement for him. By means of cross bars bolted to the frames and front forks the two bicycles are held rigid and parallel and they steer simultaneously. In the rear a large wire basket mounted on the cross frame work carries parcels.

CAN YOU BEAT IT?

Prince Edward Island Confines Motor Vehicles to Two Roads

CHARLOTTETOWN, P. E. I.—Canada's tiny Province, Prince Edward Island, which could be almost tucked away in a corner of Rhode Island or Delaware, is still fighting the invasion of motor transportation media. Petition canvassers have again been on the job seeking signatures to a protest against any amendment of the law which prohibits the use of either motorcycles or automobiles on any but two designated highways and only on three days each week. This antiquated statute is a pet to many natives of the Island. The population of the whole Province is only 103,000.

PIONEER MAKES A CHANGE

LONDON, Ont.—One of the pioneers of the bicycle trade in London, Ont., has made his departure from this center after disposing of his business by sale. This development was reached when Fred Kerr, 665 Dundas Street, sold out to Arthur T. Tanner, formerly of Edmonton, Ont. Kerr has moved to the Southern States, where he intends to make another start in the bicycle field.

HEAVY LOAD FOR THIS SIDECAR

TRENTON, N. J.—R. S. Wood, Harley-Davidson agent in this city, has just delivered a 1917 sidecar outfit which will carry four passengers, two adults and two children.

READING STANDARD COMPANY, INC.
MANUFACTURERS OF
RS MOTOR CYCLES

NOTICE: Address all communications etc. to The Reading Standard Company and not to individuals.
Dictated by VCV/CGR READING, PA., U.S.A. 9/15/16

Hawthorne Mfg. Company,
Bridgeport, Conn.

Gentlemen:

We are enclosing herewith our contract covering our 1917 Season's requirements for "OLD SOL" Hornlite Electric Lighting equipment.

We were somewhat delayed in signing the contract due to the fact that we wanted to put the outfit through some final tests. We are pleased to state that the results obtained on all tests have been most gratifying, and have every reason to believe that through its adoption we can offer to the public Electric Lighting System that is up to the highest standards of material used in the construction of our motorcycle.

Very truly yours,
Reading Standard Company.
O. Chas. Vogel
Purchasing Department.

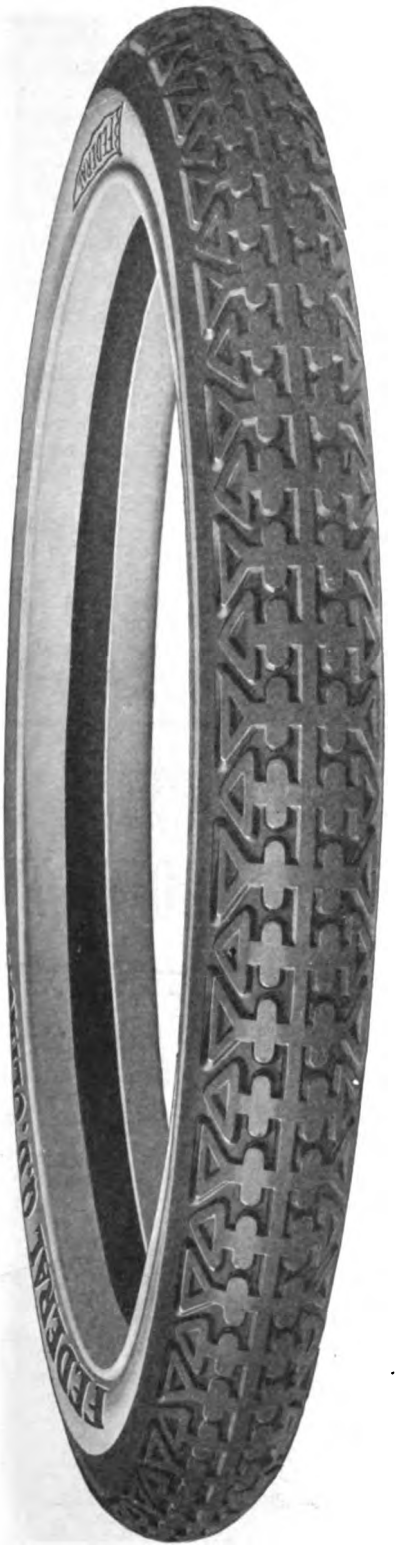
FEDERAL "TRAFFIK" TREAD



A new FEDERAL Motorcycle Tire, with Black Tread and Gray Side-walls

Strong, sturdy and attractive, it is built of the same high-grade materials as our famous "Traffik" Tread automobile tire, so deservedly popular everywhere.

TRADE MARK FEDERAL REG. U.S. PAT. OFF.

Note the handsome design of the tread—its height which ensures long wear—its extra width which prevents side-slip on wet pavements or on muddy or rutty roads.

FEDERAL "TRAFFIK" TREAD—the tire for hard service. Write for our proposition to the trade.

THE FEDERAL RUBBER COMPANY
of Illinois

Factories **Cudahy, Wisconsin**

Manufacturers of Federal Automobile Tires, Tubes and Sundries, Motorcycle, Bicycle and Carriage Tires, Rubber Heels, Horse Shoe Pads, Rubber Matting and Mechanical Rubber Goods.

TRAVERSO IS HOUR ARGENTINE CHAMPION

Harley-Davidson Crack Covers 58 Miles in Big Race at Buenos Aires — Aragnon and Blanco Win

BUENOS AIRES, Argentina.—Angel Traverso, riding a Harley-Davidson close-coupled machine, won the 1916 Hour Championship of Argentina, held on Oct. 1 by the Club Motociclista Nacional. Traverso covered 93.45 kilometers (58 miles) in the hour. Pedro Comino, on a similar machine, was second with 89.75 kilometers (56¾ miles). Third place was obtained by Juan Hourdebaight, Indian, with 89.15 kilometers (56.36 miles), and fourth by Sabio Diaz, Harley-Davidson, 87.95 kilometers (54.6 miles). The fifth man was Carlos Santiago, on a Henderson, his distance being 82.50 kilometers (50.24 miles).

There were 12 starters, the cream of the Argentina speedsters. At the start Raul Riganti, Harley-Davidson, led, but was shortly headed by Carlos Santiago. The latter lost his lead by a puncture, giving place to Traverso and Comino. The field soon narrowed down to six, with Traverso ahead and Comino second. Riganti, who was later disqualified, covered 52 kilometers (33.3 miles) in the first 30 minutes.

Traverso used a Bosch magneto and Firestone tires on his machine. The 1915 Hour Championship was won by Carlos Santiago, Indian, with 86.25 kilometers (53½ miles) amid very severe competition.

Preceding the Hour Championship were three races—two for sidecars and one for 30½ cubic inch solo machines. In the 11 kilometer (6¾ miles) sidecar event, P. Aragnon, Indian, came first in 9:44 with H. Detrois, Indian second. In the 22 kilometer (13.6 miles) sidecar event, F. Blanco, Harley-Davidson, won in 18:27, with A. Pescarmona, Indian, second. The solo race, for 11 kilometers, was won by P. Sabbatini, Triumph, with D. Colliver, Triumph, second. Time, 8:25 2/5.

COMMERCIAL USES IN OMAHA

OMAHA.—The Ford Motor Company, is using two motorcycles for service work. This is the only motorcar firm at present which uses the power two-wheeler. The Omaha Gas Company has 15 Indian machines and three Harley-Davidsons for trouble and inspection work. Three Harley-Davidsons are used by the Water Board for similar purposes.

MISSIONARY USES MACHINE

OMAHA.—The Reverend Mr. Taylor, of the Presbyterian church in this city, is using an Indian motorcycle for missionary work. He has traveled all over the country since 1905 conducting meetings, etc., in all cases using his motorcycle as transportation.

HENDERSON IN CORNING

CORNING, Cal.—M. G. Ramer has taken the agency for the Henderson for this city and vicinity.

MORE NEWS FROM TACOMA

TACOMA, Wash.—Nov. 1 marked the opening of the new Reading Standard headquarters in this city. This business is under the direction of J. S. Johnson and Ben F. Gabriel. Johnson was formerly with Ray Day, Indian agent, while Gabriel was formerly with the Henderson agency.

Johnson and Gabriel have purchased the complete stock of R-S parts from Ellis Brothers in Seattle, and moved it to 1104 Tacoma avenue, the new headquarters. A carload of Reading Standard motorcycles and a line of bicycles will soon arrive for the partners.

J. E. BUNKER CO. has opened a new stock room and office at 724 Broadway, in which will be housed a large stock of Miami bicycles. The firm is Washington distributors for this make. Prest-O-Lite tanks will be handled for Tacoma and vicinity as well as bicycle and motorcycle supplies at wholesale.

W. MILLER and E. Ellison, linemen of the Pacific Telephone & Telegraph Co., have been using Thor motorcycles in their work for the past two years. They state that the machines are indispensable, their work being installing phones in various parts of the city.

FRANK P. FENTRESS, formerly with the Fentress-Newton Mfg. Co., of Indianapolis, Ind., is now a permanent resident of this city. He has gone into the automobile business for 1917.

Pullman
THE HARRY SVENSGAARD SALES CORP. DETROIT.

COACH BUILT
NEW KNOCK-DOWN TYPE

In addition to its supreme luxury and comfort, the Pullman for 1917 has one distinctly individual feature that no other side-car can ever attain—that of being so constructed as to permit of its being instantly disassembled and shipped at considerably less cost and in **five times the quantity,** for space needed than any other side-car. Consider this important point—and see us at the show.

F-N has been "showing them" for Five Years!

Since 1911 the F-N tandem, and other F-N products have been showing the way for other manufacturers. Every manufacturing detail of note that has added to tandem comfort and tandem reliability during those five years has been developed by F-N.

And for five whole years the F-N tandem has shown the true meaning of the word "comfort" to the passenger; it has pointed out the way to real motorcycle sociability to the motorcycle rider.

It is a big profit maker to dealers. It means quick sales—quick turnovers. See our line and apply for special dealers' proposition at Space No. 134, Coliseum.

San Francisco News Bulletins

GILBERT ANALYZES LIGHTWEIGHT SALES

Determines, from Coast Experience, That There Is One Lightweight Sale for Ev- 200 of Population

SAN FRANCISCO, Oct. 30.—C. A. Gilbert, sales manager for the Cleveland, who has just completed a coast trip with a view of studying the motorcycle selling conditions and possibilities, and is now on his way back east, has learned, so he says, something anent the relation of lightweight sales to population.

Speaking on this important subject to a **Motor Cycle Illustrated** correspondent, Mr. Gilbert said:

"The most important thing I have learned on my California trip is the relation of possible lightweight sales to population. It is logical to estimate that under ordinary business conditions a city should permit a dealer to dispose of at least one lightweight to every 200 population. California in the first year of Cleveland sales is stepping right along toward this mark. In Los Angeles C. Will Risden sold over 500 Clevelands at retail in his first nine months. Out in the San Fernando valley, a purely agricultural district, Willis A. Rowe won his laurels as producer of the most intensive development of Cleveland sales anywhere in the whole United States. Rowe, with a population of 1,700 to work on rolled up 17 sales in 6 months. Every machine should find an owner, under the law of averages, in a list of 200 names."

The announcement of a definite policy with regard to the Western States for the 1917 Cleveland will be made from the factory at the close of the Chicago show, according to Gilbert.

SELL 18 HARLEY-DAVIDSONS

SAN FRANCISCO.—Maginni & Perkins have sold 18 Harley-Davidsons of the 1917 vintage to date, besides four sidecars and two delivery vans. Two of the 1917 machines made the run to Alum Rock Park on Sunday, Dudley Perkins bestriding one with a sidecar and three passengers, while C. Jacka rode tandem.

VALLEJO M. C. RACES

SAN FRANCISCO.—The motorcycle race on the half-mile track at Sonoma, under the auspices of the Vallejo M. C. was well attended. There was some keen competition although the poor condition of the track resulted in numerous spills.

Fisher won the half-mile time trials, in 39 4/5, with Mahlstedt second in 40 1/5. In the 5-mile club race Fisher and Blairsdale were riding ahead of Mahlstedt when they fell. Mahlstedt ran over Blairsdale's machine and won in 7:33½. The Australian pursuit race was called off. Leonard won the 3 and 5-mile club races and Mahlstedt took the 10-mile open. The time on this race was not taken.

MEMBERSHIP FIGURES READY

SAN FRANCISCO.—At the next social of the San Francisco M. C. the result of the membership contest will be made known. To date, the contest has netted the club 63 new members. The club is arranging for a clambake to be held some time in November.

TRADESMEN VISIT FRISCO

SAN FRANCISCO.—R. W. Sawyer, general manager, and E. E. Welborn, purchasing agent of the Los Angeles Harley-Davidson agency, were in town last week on business.

T. PARRA, Harley-Davidson agent at Gilroy, and Art Swanson, of Turlock, were at the local Harley-Davidson agency a few days ago.

J. CAMERON, Indian representative at Sacramento, made a trip to this city on business last week. He made his headquarters at the local tepee.

C. L. SMITH, jobber for the Pope Motorcycle Co., Palo Alto, is at present in San Francisco on business. He will leave tomorrow after a stay of five days.

THE SHOW'S THE PLACE FOR FINAL DECISION

(Continued from page 36)

the show, stretched out before you every blessed model of every make; and under such conditions it's a cinch to make comparisons. You can hop in the saddle of each machine, for instance, and determine for yourself which make and model conforms most nearly to your idea of solid comfort.

If, for example, you are long and lanky, it's certain that a machine which boasts of exceptionally low saddle position is not going to make a very strong appeal to you; while, on the other hand, if your legs are short, that very point, other things being equal, is going a long ways towards being the deciding factor in your choice of a motorcycle.

Matter of Controls

The matter of controls is also a moot point and one which leaves ample latitude for the exercise of the individual preferences. If you drop in on the show, you can try them all out and determine at first hand which particular type conforms most closely to your ideal.

Then there's saddle springing, footboard comfort, handlebar shape and other comfort features which demand your attention every bit as much as the mechanical fitness of the mount before you finally decide on the machine you are going to invest in.

Perhaps at present you have only one idea—the thought that you want a motorcycle. Whether you want a big powerful twin, a medium weight twin, or a lightweight machine, may not have occurred to you yet. As a matter of fact, you may not know the fields and the limitations of each of the three types as yet. All that you know is that you want a motorcycle, and that you want it for either pleasure or business or an intermingling of both.

Full Discussion

Again the show comes into play. You can see all the various types there and find out all about them; and after a full and frank discussion of the uses to which you intend to put the machine with those in charge of the various booths can readily determine the best mount for your particular purposes—the machine or type of machine that best fits into your scheme of things.

And mention of the booth attendants brings to mind the fact that it's a very good thing for the fellow who is in the market for a motorcycle to talk the thing over with the various salesmen and to go into the details of the machine from a mechanical standpoint with the members of the engineering force of the various makers who are always on hand ready and willing to give the "whys" of their particular makes to the interested.

Without a doubt a fellow at the show does not even have to be inquisitive to learn more things about a motorcycle in ten minutes than he ever dreamed of.

The means of presenting the mechanical features are unique, interesting and instructive. Cut away motors, and sections show the "insides" of the machines as well as the outside, and there are men there ready to explain every little detail of the mechanism. And parts boards, with the various members of the motor and other vital parts of the machine neatly laid out in logical order do much to disseminate a fuller knowledge of the finer points of motorcycle construction.

And then again, there's another angle to the situation which is certain to appeal to new rider and old-timer alike. That is the fact that practically every accessory maker in the trade will be represented at the motorcycle show, and will be glad of the opportunity of showing you, after you finally have determined on the make of machine you intend riding, just how his sidecar or speedometer or warning signal is adapted to fit the make of machine you have pinned your faith to. It's a case of stop, look and listen.

Show of Value to All

Yes, sir, whether you are an experienced road burner, or just a fellow who would like to get a vehicle to carry you at moderate pace—to keep you out in the air; whether you intend to use the machine for simple pleasure, for business pure and simple, or for an admixture of the two; whether you desire a machine for your own selfish self or a family vehicle to carry one or two passengers, you can get all the information you want quicker, and with full certainty that it is authoritative at the national shows than you can in any other manner.

PROPER EQUIPMENT GIVES BEST SERVICE

(Continued from page 37)

the time will surely come when that lamp you didn't get will be wished for with a big W. Ranging from the little oil lamp with its ruby rear lens to be clamped to the handlebar up to the big headlights which show up the road like a battleship's searchlight, there will be seen lamps to suit every desire and every pocketbook. Go 'round and look them over; they will fit any machine and will look and act splendidly on any motorcycle. Oil, acetylene, or electricity; the show houses them all.

Then there are the acetylene tanks and the generators. In the one you get the gas by opening a valve, which makes it mighty handy; you may prefer the generator for a number of reasons, on the other hand. At the booth where the tanks are exhibited you may find something new in the use of acetylene which you can use in your business as well as in riding, so it's worth a close examination.

Speedometer an Essential

Some riders, when they start to use the motorcycle, figure that a speedometer is a sort of luxury. Don't fall into this error. A speedometer is a necessity. If you tour, well, you will know this without my telling you, and you surely will tour if you have red blood in your veins. If you go out to clean up the other fellow who thinks he has got the "fastest ever," you have to have a speedometer to show how much faster you went than he did. If you fall foul of some grouchy cop who claims you were exceeding the speed limit, the speedometer will act as evidence in your favor. It's nice to know just how far you go each day and at the end of the season, and to prove it when somebody thinks you are stretching things a trifle.

At the speedometer stands you will see the latest in speed and mileage recording devices and find something that surely will fill the bill, whether you tour for pleasure or like to hit it up on the track.

Look Over Tires

Perhaps you may have heard that such and such a kind of tire tread acts better in your section of the country than another one. You will find that tread at some tire stand, and lots of other treads which will work finely on any kind of road. There are inner tubes, both butt-end and continuous, and you will have a wide variety to pick from. And there are reliners, gaiters, patches and other devices for repairing the old tires when you have bad luck in the form of blow-outs or punctures. Go through the tire section and keep your eyes open.

Gloves and clothing. A book could be written on them. They can be seen in all styles and at all prices. The choice of gloves, for Winter and Summer, is huge. They will protect your hands in the coldest weather and keep from raising blisters in the Summer. You can get them washable, so that grease will come off in a bath of gasoline without injuring the feel of the glove; they come with ventilated backs, with straps to keep out the wind, and lots of other ways. You must be awful finicky if you can't find something to suit you in this line.

Clothing, either in full suits or just the coats and trousers, are well worth looking at. You want to be neat and comfortable at the same time. You want to be a credit to your club or to your crowd of fellow riders. The clothing booths are the ones to visit and the goods examined. If you don't make a decision right away, you have seen the cream of the offerings in this line, and you will know what to get later on.

The Coliseum Show will offer for your inspection every form of legging that you could possibly desire to use, and at just the price you want to pay. The same with regard to caps. Don't forget your head protection for winter, especially if you live where the mercury shoots down into the thermometer bulb and stays there for a long time each season.

Big Choice in Goggles

If you like goggles with colored lenses when the sun is shining brightly on the snow or on a white and hard road, visit the men who are showing these articles. You may like to carry them in your pocket, so seek out the folding type with the neat case. The chances are that you will find one pair that will suit you better than the ones you now have, so it's worth while making the rounds and seeing for yourself.

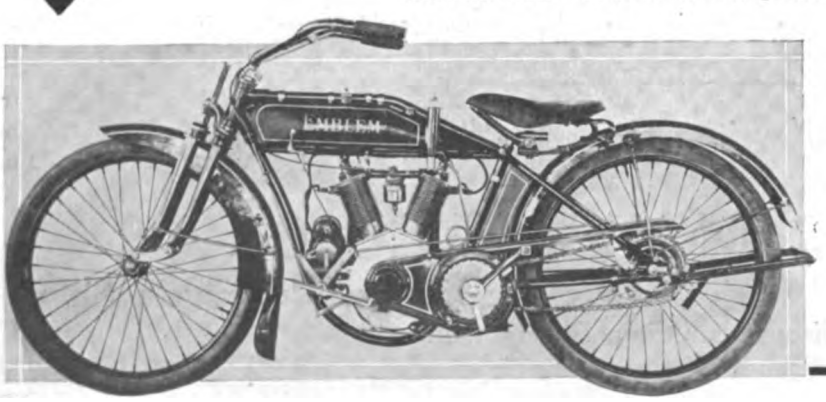
MODERATE IN WEIGHT IN POWER IN PRICE

EMBLEM

One Model Only.

The EMBLEM for 1917 is the most satisfactory investment for either dealer or rider, ever put before the motorcycle public.

Medium in weight, powered sufficiently to meet any need—5-7 H.P.—sold at the hitherto unheard-of price of $175—complete in every minute detail, with every improvement, refinement and comfort—assuring feature of the heavier and more expensive mounts, the EMBLEM Medium Weight Motorcycle is absolutely a revelation in what can be accomplished in MODERATE motorcycle construction.



If you visit the SHOW, bear in mind it is of paramount importance that you visit our booth.

STILL GROWING

New England Dealers' Ass'n Takes in New Members

BOSTON, Mass.—The New England Motorcycle Dealers' Association, recently formed, held another business meeting at the rooms of the Bay State M. C. at Huntington avenue, on Thursday, Nov. 2. Two new members, Peter Prew, of Nashau, N. H., and J. E. Forest, of Manchester, N. H., were taken into the association. The new by-laws, which have just been printed, were passed around for inspection and are to be voted on at the next meeting of the association on Thursday, Nov. 16.

The membership is growing steadily and there is a movement to bring into the ranks every dealer in New England. It is the intention of the association to send a representative to the Chicago Show to confer with the Motorcycle and Allied Trades' Association with a view of co-operating for the general upbuilding of the trade.

SCHEID OPENS A STORE

DETROIT, Mich.—H. D. Scheid, formerly with W. B. Wandersee, has gone into business for himself and has taken the agency for Thor motorcycles.

INCREASED ORIGINAL ORDER

BALTIMORE, Md.—Merryman & Robinson, who have handled the Dayton line in Baltimore for several seasons, have just increased their original 1917 order. Recently, two students dropped into their store and wanted Dayton motor bicycles at once. As there was only the demonstrator at hand, Manager Jack Robinson wired the factory and the young men got their machines within two days.

DOAK BUYS OUT MILLER

BURLINGTON, Iowa.—K. C. Doak has purchased the business of Joe Miller, the veteran cycle dealer in this city. Miller, who has been in the cycle trade for 25 years, is going into the motion picture business. Doak has taken the agency for the Harley-Davidson for this city and vicinity and has received his 1917 demonstrator. He handles Pennsylvania and Fisk tires.

SYKES NAMES ANOTHER

TRENTON, N. J., Nov. 6.—John Sykes, Jr., Indian agent, has just appointed Charles Williamson, of Hopewell, N. J., a subagent for the Indian.

TAKES ON EXCELSIOR

LINCOLN, Nebr.—The Frazier Cycle Co., 231 South Eleventh street, this city, has taken on the Excelsior motorcycle agency for Lincoln and adjacent territory. The company will have its 1917 demonstrator about November 15.

HUNSAKER BACK ON THE JOB

POMONA.—S. P. Hunsaker, Pomona agent for the Harely-Davidson, and one of the veteran motorcyclists of Southern California, is back at his store. His leg, broken in a mountain road accident reported in **Motor Cycle Illustrated,** is still in a plaster cast, but is recovering nicely.

VETTIN JOINS HAFER AUTO CO.

JOPLIN, Mo.—Herman Vettin, for a number of years associated with Schmelzer Arms & Company, of Kansas City, Mo., as manager of the bicycle and sporting goods department, has resigned from that company to take charge of the wholesale department of the Hafer Auto Company of Joplin.

Mr. Vettin has long been a familiar figure in bicycle and sporting goods circles, and is recognized as an authority on market conditions.

WHITING ON LONG TOUR

DENVER, Colo., Nov. 6.—Walter W. Whiting, Harley-Davidson distributor for Colorado, has just returned from a tour of the State. The trip was made on a 1917 model Harley-Davidson with the new sidecar, and in all something like 1,000 miles was covered. Mrs. Whiting accompanied her husband. Along his route Mr. Whiting visited the trade and everywhere found the motorcycle business in a good condition.

HOYE TAKES ON DAYTON

NEWCASTLE, Pa.—V. W. Hoye has taken on the Dayton motor bicycle in addition to the Indian and Thor for 1917. He signed up with R. K. Larsh, Dayton traveller.

Did you miss the Contest Page? Show News forced us to hold it over until next week.

FISK FIRST QUALITY TIRES AT LESS THAN USUAL DEALER'S DISCOUNTS!

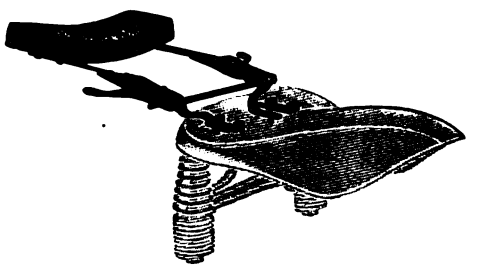
"WEED"

Folding Backrest

$4.50



The "WEED" Folding Backrest is the great COMFORT accessory for motorcycles, and adds materially to the pleasures of motorcycling. If you have never used one do so and be convinced.

The soft leather upholstering and the two flat springs absorb the vibration and road shocks, and lend support to the back, thereby enabling you to ride considerably farther without tiring.

Ask the man who has a "WEED" backrest and he will tell you he would not be without it.

The patented folding feature operated by a slight touch of the finger allows the backrest to be folded so that the rider may mount or dismount without interference.

Visit us at the Chicago and New York Shows and see our new model that will fit a Troxel Jumbo or Mesinger Air Cushion saddle on any machine. Our space at the Chicago show is No. 112.

REEPS MANUFACTURING COMPANY, Inc.

50 CHURCH STREET, NEW YORK

M-100 Motorcycle Pump. Price $1.50 with Clamps.

B-20 Bicycle Pump. Price 75c. with 1 Clamp.

More Powerful---Much Simpler---Troubleless

—that, briefly, is the comparative superiority of the Austin Motorcycle and Bicycle Pumps over all others.

By reason of those pronounced qualities, the Austin has been selected as standard pump-equipment by some of the largest motorcycle and bicycle manufacturers of the world:—Proof of its high quality and efficiency is shown, too, by the large volume of orders and repeats, received daily.

AUSTIN

The Perfect Pump

NO Tube Connections Leaky Joints

The self-contained rubber connection does away with tubes and outside connections which "troubleize" the ordinary tire pump. That's the keynote to Austin superiority. Make it also the keynote to greater prosperity for yourself, Mr. Dealer: Cash in on this pump proposition—your jobber can supply you.

Mr. Rider: If your dealer cannot supply you with the AUSTIN pump, we will send to any address in the U. S., charges paid, upon receipt of price.

CUBAN HIGHWAYS

To Be Reconstructed and Motorcyclists Rejoice Over Outlook

WRITING about the outlook for better motorcycle business in Cuba, B. Carbo, of Cienfuegos, one of the pioneer cycle dealers on the Island, announces that a great movement is under way to improve Cuban roads, particularly in the Cienfuegos district. It is expected that the boosting campaign will bring about the paving of the streets of Cienfuegos and the reconstruction of all the roads in the province.

Mr. Carbo states that he has been spending a few weeks in the hills and that he found it impossible to use his Pope machine owing to the execrable condition of the roads. Motorcyclists of Cuba are backing the good roads campaign in every way possible, and it is predicted that the coming improvements will result in a heavy increase in the demand there for American-made motorcycles.

USE BLUE STREAK TIRES

THE U. S. GOVERNMENT at Camp Bliss, Ft. Worth, Texas, has just received 10 Thor motorcycles with sidecars to be used in border patrol service. These machines are fitted with Goodyear Blue Streak tires.

LAST 1916 HUTCHINSON OUTING

HUTCHINSON, Kan., Nov. 6.—Eight riders, piloted by Frank Stallman, the Indian dealer, participated in the run from Hutchinson to Great Bend on Sunday. At Lyons they picked up Ray Metcalf and M. D. Mealey, the Excelsior and Harley-Davidson dealers and then proceeded to Great Bend over the Santa Fe trail. This is the last outing that will be held by the Hutchinson riders this season.

SOCIABILITY RUN

Oliver, Bronx Indian Agent, to Hold One on December 3

BRONX, N. Y.—To celebrate the opening of his new store at Brook avenue and 163d street, Oliver The Indian Man will hold a sociability run on Sunday, Dec. 3. The event will be open to all riders and there will be no entry fee. The start will be made at his new store at 8:30 a. m.

The route will be through New Rochelle, Port Chester, Stamford, to Bridgeport and Danbury, Conn. Noon control will be at Danbury. Return will be via Brewster, Lake Mahopac, Briarcliff and Yonkers. All those checking in within 15 minutes of the schedule time at Danbury and Bronx controls will be eligible to draw for the prizes offered. A general invitation is given to riders.

BRENNEN CLIMBS TWIN PEAKS

SAN FRANCISCO.—George Brennen, of Seattle, Wash., while on a recent trip to this city, successfully climbed Twin Peaks to the flag pole on his machine, a 1917 Henderson. His performance is considered quite remarkable by many in this section.

WILCOX'S DAY

Spartanburg Lad Takes All the "Pro" Events on Half-Mile Track

SPARTANBURG, S. C., Nov. 3.—A local lad, Wilcox by name, gathered in just about all the "pro" glory there was to be gathered at the race meet staged on the half mile track here today under F. A. M. sanction.

Wilcox, who straddled an Indian single, won all three of the professional events distanced at 5, 15 and 20 miles. Layton, also on an Indian, won the five mile amateur.

In the 20-mile event, which was the feature of the day. Wilcox completed the course in 24:02, leading home Glenn, on an Indian, and Cassell, on a Harley-Davidson, in the order named.

In the 15-mile event his time was 17:46. Clayton managed to pull ahead of Glenn before the finish. The five-mile "pro" Wilcox took in 5:55, with Clayton second and Glenn third.

Two spills marred the race meet but neither of the riders was seriously hurt.

SIXTY RIDERS ON CLUB RUN

SAN FRANCISCO, CAL.—Thirty-five machines, carrying 60 members of the San Francisco M. C., left the club rooms last Sunday for the official run to Alum Rock Park, San Jose, making one of the largest parties of the season. A considerable party of Oakland members went down the other side of the bay and met the local contingent at San Jose.

Diamond Chains
FOR
Motorcycles

Diamond No. 149 is an unexcelled motorcycle chain for every motorcycle service.

Every part is accurate, the wearing parts are heat treated by the same scientific process as those of our heavy truck chains, the rollers DO NOT BREAK.

Put DIAMOND to the test on your machine.

You'll be a DIAMOND booster ever after.

EVERY CAN IS A SILENT SALESMAN

The absolute satisfaction that motorcycle owners get from the use of

HARRIS
TRADE MARK REG. U.S. PAT. OFF.
OILS AND GREASES

does more to sell these motorcycle lubricants than all the sales talk in the world.

Why don't more of you Motorcycle Dealers reap the rewards of this reputation? Why not sell your customers the lubricating oil they need? Write us for details.

HARRIS OILS are made of the finest Pennsylvania Premium Crude refined by careful processes—based on our thirty years' experience in the oil business. They give **real lubrication** because there are practically no soot-deposit forming ingredients—no injurious substances—no waste. These qualities make for a sweet, smooth-running motor—no flagrant smoking—economy—and highest engine efficiency.

HARRIS MOTORCYCLE OILS are put out in the following grades: Extra Heavy Motorcycle Cylinder Oil (especially designed for high speed, air-cooled motors), Heavy, Medium and Light.

"A Little Goes a Long Way And Every Drop Counts."

DUCKWORTH
Chains on the
R - S

Another representative motorcycle will be Duckworth-equipped—which means permanently made proof against chain troubles—for the coming season.

In selecting Duckworth Chains, the makers chose quality regardless of price, for, though more expensive than the ordinary, Duckworth Chains have proven themselves time after time, the lowest priced chain on the market. It's the service that counts!

Duckworth Chain & Mfg. Co.
Springfield, Mass.

FROM COLUMBUS

Central Ohio Distributors Look Forward to Big Season

COLUMBUS, Ohio.—W. S. Sherwood, manager of the motorcycle department of the Franklin Rubber Co., central Ohio agents for the Excelsior, says the outlook for the coming season is very promising. The new models will arrive in about 10 days, and will be placed on exhibition. The arrival of the new machines is being looked forward to with more than ordinary interest.

Manager Barbee, of the Columbus branch of the Skyes Motor Co., central Ohio distributor for the Indian, reports the arrival of a large consignment of parts, which will be placed in stock to supply riders and sub-agents in this territory.

RODE TO CAMP MEETING

CHARLESTON, S. C.—M. S. Toomer, with J. N. Buterhorn as sidecar passenger, and M. S. Webb rode their Harley-Davidson machines to a camp meeting at Cypress recently. The party took a complete camping outfit and cooked their meals on the camping grounds.

EIGHT-HOUR DAY FOR GOODYEAR

AKRON, O.—An eight-hour day schedule became operative at the plants of the Goodyear Tire & Rubber Co. on Nov. 1. For nearly two years the company has been working toward this end, during which time some of the departments have been on the eight hour basis.

WILLIAMS RESIGNS FROM MOTT

UTICA, N. Y.—Clarence E. Williams, long identified with the Mott Wheel Works of this city, has resigned.

D. H. Wetzel has assumed full charge of the rim end of the Mott Wheel Works.

CLEAN-UP FOR BRAVES

Indian Riders Capture All the First Places at Lowell

LOWELL, Mass.—Indian riders had things pretty much to themselves at the Golden Cove Park motorcycle races, held in Lowell, Oct. 28, capturing all the firsts. The five-mile amateur event was taken by Doherty, of Woburn, Mass., in 6:40. The ten-mile amateur went to the same rider in 11:56. Winship, of Lowell, also mounting an Indian, took the one-mile time trial in 1:11. The five-mile match for amateurs was won by Joe Johski, his opponent being Arthur Carl, who used an Excelsior. Johski's time was 6:13. The ten-mile free-for-all was won by Doherty in 13:06. Forest and Clough, also on Indians, were the second and third men in the order named.

TWO CANADIAN CONTRACTS

TORONTO, Ont.—F. H. Norris, manager of the Davis Sewing Machine Company's Canadian office in this city, has received a contract from Ellis Brothers of Hamilton for motor bicycles and Dayton motorcycles, and from Herbert Byshe & Co. of Ottawa for motor bicycles.

MAKE TRIP TO MOUNT LASSEN

SAN FRANCISCO.—David O. Crummy recently made a three-day trip to Mount Lassen, the active volcano of California. He rides a Henderson.

"Here Are the Specifications. Only SEISS HORNS Will Do"

In giving out specifications for ten motorcycles, the other day, the United States Government specified three articles of equipment as absolutely necessary.

One of These Three Was
SEISS HORNS!

The Thor was awarded the contract, and the machines are now en route to Fort Worth, Texas. They carry Seiss Horns.

Uncle Sam is mighty particular. When his soldier must call to his comrades, he wants the signal to be powerful and certain; he wants everything of the best, regardless of any particular reasons. He chose Seiss.

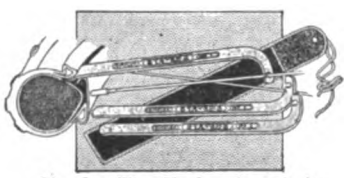
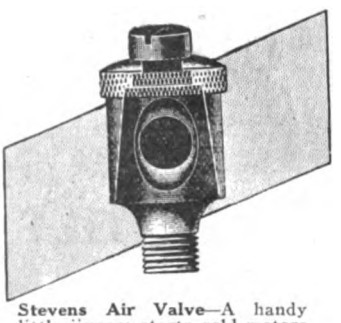
A Show in Itself

Practical—the keynote to the popularity of Stevens Cycle Accessories lies in that one word. That's why Show Visitors were unanimous in pronouncing the Stevens Line the most **valuable**—the most **complete**—the **best calculated to aid in the sale and use of bicycles and motorcycles.** There's a Stevens product for every **proven** demand, every **real** need of the cycle rider and dealer.

Stevens Speedometer Lamp—illumines dial at night—an ideal trouble lamp.
List price, $1.50



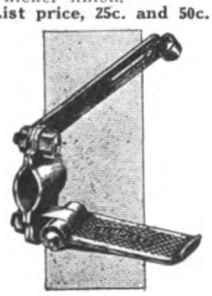
Simplex Tire Tools—three hefty tire-removers made of carbon steel-nickel finish.
List price, 25c. and 50c.



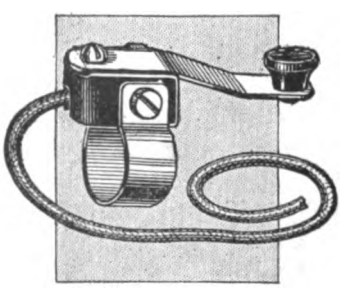
Stevens Air Valve—A handy little jigger; starts cold motors instantly.
List price, 20c.

To build a product better than the best thus far, to give a little more service and co-operation to the jobber and dealer than they have gotten before, to be of the most GENUINE service to the bicycle industry—that is my creed and the creed of my house.

Louis Schwab



Simplex Foot Rests—Fit any machine. Just the thing for tandem attachments. Strong, rust-proof, nickel finish.
List price, per pair, rigid, 75c.; folding, $1.25



Simplex Magneto Cutout—Grounds magneto at touch of finger. Allows compression to act as instant brake.
List price, 50c.

The Electrically Equipped Harley-Davidson Model 17-J

The sales of this model are greater than that of any previous Harley-Davidson model, and greater in fact than that of all other present Harley-Davidson models combined.

That, briefly, is the story of the reception the latest electrically equipped Harley-Davidson has had.

Nearly three years' service in almost every civilized country in the world has demonstrated the many desirable features and the unmatched convenience of the electrically equipped type.

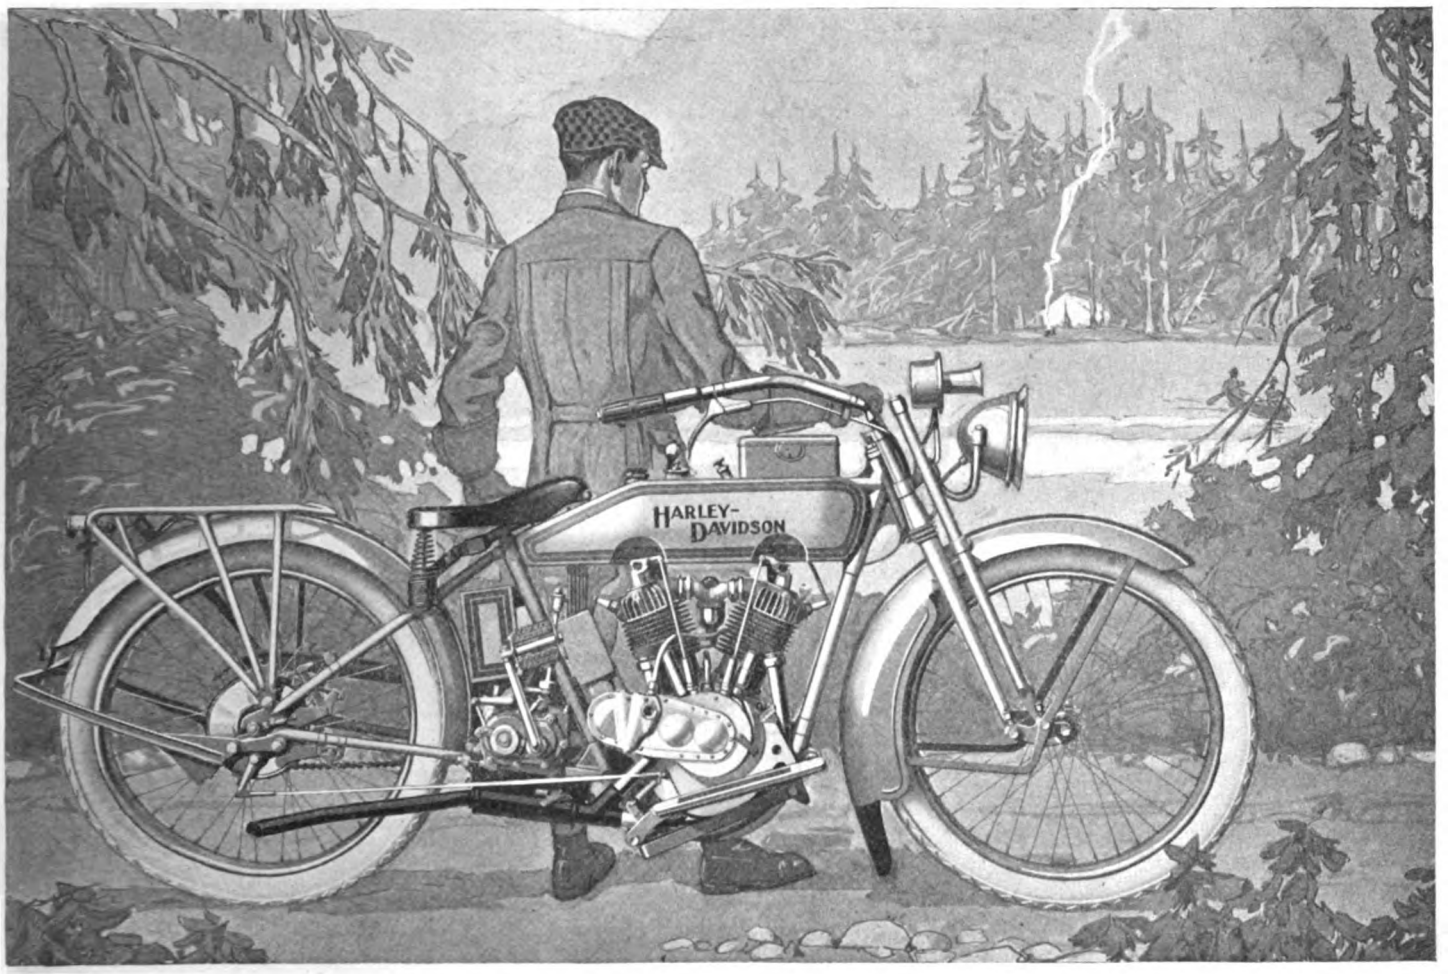
Many of the most successful Harley-Davidson dealers are selling electrically equipped models this year almost to the exclusion of all other types.

Experienced motorcycle riders prefer the electrically equipped Harley-Davidson model because it incorporates several extremely desirable features, including

Harley-Davidson Motor Co.
Milwaukee, Wis., U. S. A.

You get quick results from advertisers when you mention MOTOR CYCLE ILLUSTRATED.

Digitized by Google



a substantial, efficient electric signal, the most powerful road lighting obtainable, and hot, snappy ignition which insures remarkably easy starting of the motor.

Experience has shown that about all the attention the electric equipment requires is the maintenance of the proper level in the storage battery and an occasional battery test — the rest of the system can be almost forgotten. This is indeed a tribute to the remarkable efficiency of the Model 17-J.

A Masterpiece

For sheer beauty of line, for compactness of design, for comfort and for all-around efficiency, the 1917 Pullman is indeed a masterpiece in everything the word implies.

The wonderful coach-built body which made the 1916 Pullman success possible, is retained in the 1917 model. In addition, there is the knock-down feature that permits of shipping in large quantities.

The body has been lengthened somewhat, affording even more leg-room and comfort than before. The same chassis and the front triangular brace—the brace, which, by distributing the strain of the sidecar over the entire length of the drop tube of the motorcycle frame, does away with frame breakage and bending entirely, has been kept intact.

There are other very strong Pullman features which impressed Show visitors and resulted in the closing of several important distribution centres for the Pullman.

Write for further details of the Masterpiece of Sidecars.

CROWDS

Not curiosity seekers alone, but interested, business-talking visitors. From the time the Chicago show threw open its doors until they were closed again, the displays of both Columbia bicycles and Pope motorcycles were the scenes of satisfying activity. The result:

More Columbia and Pope dealers were lined up on the spot than at any previous Chicago show.

The reason for this is plain. Dealers saw the more-complete-than-ever 1917 lines of Columbia bicycles and Pope motorcycles, and what they saw was enough to convince them that these were decidedly profitable lines to handle. They backed their conviction with orders.

There are Columbia models for every taste and requirement. The same holds true of the Pope. It is a perfectly balanced line, from the powerful Twin Electric to the neat, little upstanding Lightweight. Get aboard with them both for 1917.

Prest-O-Lite For Motorcycles

Adds to Your Pleasure and Safety

Night riding has neither safety nor pleasure with poor lighting equipment. Most accidents happen to motorcyclists after dark, and are largely due to the rider's inability to see what is directly ahead.

Put **your** safety first—get a lighting system that gives you efficient service at all times—get Prest-O-Lite. It will give you "daylight" for night riding. Every bump or turn in the road will be clearly seen long before you get to it.

Prest-O-Lite is the truly efficient light. It is simple and trouble-proof—costs little to buy and little to use—and is an unfailing source of brilliant light.

See Your Dealer About Prest-O-Lite

Any motorcycle dealer can equip your machine with Prest-O-Lite. If you wish, he can make you up a very useful equipment combination, including "Prest-O-Lite, a high grade lamp and horn" at a price you can afford. Ask him about it.

Send for free copy of our special motorcycle lighting booklet. It's yours for the asking.

M & A. T. A. IS FORMALLY LAUNCHED AND BOOSTING CAMPAIGN STARTS

Interests of Former Motorcycle Manufacturers' Association and the Motorcycle and Allied Trades Association Are Fully Consolidated Under Latter Name; T. W. Henderson, Elected President, Is Backed Up By Capable Board of Directors and Live-Wire Committees; Balance in Treasury of M. M. A. and Returns From Chicago Show Will Permit of Carrying on Important Plans Which Have Been Held Up

(*By Telegraph to* Motor Cycle Illustrated.)

CHICAGO, Nov. 15.—The last barrier standing between the informal Motorcycle and Allied Trades Association, launched last June at Milwaukee, and the formal body of the same name which grew out of the old motorcycle organization, was disposed of at a joint meeting held in the Congress Hotel this morning, when a new constitution and by-laws were adopted by the amalgamated association, and a new Board of Directors was chosen.

Incidentally, broad-gauge plans were put in motion to further the real purposes for which the new association was created. Immediately following the meeting of the members, the newly-elected Board of Directors got together and organized on a permanent basis by electing T. W. Henderson to the presidency, with H. S. Quine as vice-president, Arthur Davidson as treasurer, and E. F. Hallock as secretary. These officers will serve until the annual meeting of the association in New York, during the second week of January.

The Board of Directors comprises George T. Briggs, of Wheeler-Schebler; G. Fairbanks, Firestone Tire & Rubber Co.; Dan R. Walls, Splitdorf Electrical Co.; A. H. Bartch, Bosch Magneto Co.; H. S. Quine, Goodyear Tire & Rubber Co.; Frank J. Weschler, Hendee Mfg. Co.; Arthur Davidson, Harley-Davidson Motor Co.; E. Theurer, Reading Standard Co.; T. W. Henderson, Henderson Motorcycle Co. This board also will serve until the annual meeting of the association.

To Meet During New York Show

Twenty-seven trade men attended the meeting, but aside from the adoption of the constitution and by-laws and the election of the Board of Directors nothing further was done by the large gathering along formal lines. It was suggested, however, that the trade boosters get together once more before the annual meeting to be held in January, and arrangements were made for a session at the Prince George Hotel, New York, Thursday, December 7, at 2 o'clock. As this will bring the meeting in the New York Show week, it is taken for granted that there will be a full attendance of the association's members.

The real work of the day was accomplished when the Board of Directors got together after the general meeting and rolled up their sleeves, so to speak, for some rapid-fire action. It was pointed out that the M. M. A. had a balance on hand of $700, to which the new body would fall heir; also that the Chicago Show will net the new association very nearly, if not quite, $6,000. With these funds in immediate sight, the directors decided that the time to start things moving was right now, and they began by considering the needs of the dealers.

Charles E. Speaks, of the Firestone Tire & Rubber Co., who headed the special Dealer Betterment Committee, has now taken up broader duties on the Firestone staff, and as a result found it necessary to relinquish the chair. The directors selected H. A. Haws, of the Firestone staff, to succeed Mr. Speaks as chairman of the Dealers' Committee. Mr. Haws has been closely in touch with the dealers' educational work from the beginning, and there will be no lost motion as he takes up the duties of the office. The work of the Dealers' Betterment Committee had been halted for some time by a lack of funds, but a comprehensive campaign had been planned and it is now the intention to put this through without further unnecessary delay.

After selecting Mr. Haws to head the Dealers' Committee, the Board of Directors named his lieutenants as

M. & A. T. A. IS FORMALLY LAUNCHED

(*Continued from page* 13.)

follows: T. R. Thomas, Goodyear Tire & Rubber Co.; Frank R. Rodger, Harley-Davidson Motor Co.; J. J. McNaughton, Hendee Mfg. Co.; H. L. Corey, Champion Spark Plug Co., and M. E. Topel, Splitdorf Electrical Co.

S. Lacy Crolius was re-elected chairman of the Educational Committee of the association, with the following co-workers: L. L. King, Goodyear Tire & Rubber Co.; Edward S. Babcox, Firestone Tire & Rubber Co.; J. A. Priest, Hendee Mfg. Co.; R. K. Ashcroft, United States Tire Co.; Dan R. Walls, Splitdorf Electrical Co.; A. H. Bartsch, Bosch Magneto Co.; H. L. Corey, Champion Spark Plug Co.; Dr. Reed, Electric Storage Battery Co. This committee was likewise authorized to proceed to put into operation without delay the campaign which was outlined at the informal meeting during the recent Atlantic City convention.

The Membership Committee

A strong Membership Committee was elected with George Briggs, of Wheeler-Schebler, as chairman. The other members of this committee are H. S. Quine, F. J. Weschler, Bert Quayle, and L. M. Wainwright. The committee was authorized to get out an application blank at once, and a form for such blanks was decided upon and copy was sent to a printer for immediate issue.

A committee comprising Messrs. Fairbanks and Quine was appointed to prepare letterheads suitable for the various purposes of the association, and to have them printed forthwith in sufficient quantities to meet the needs of the committees and officers.

It was decided to hold a meeting of the Board of Directors over the luncheon table at the Prince George Hotel, New York, on the day of the next meeting of the association.

CYCLE DIRECTORATE O. K.'S RACING CAMPAIGN; PLANS DEALERS' CONVENTION

Latter Program Will Be Put Through December 7, During New York Show, and Dealers All Over the East Will Receive Invitations and Free Show Coupons; to Open Central Headquarters in New York City, With Sales Expert in Charge; Other Plans for Co-operating with Dealers Throughout the Country

CHICAGO, Nov. 15.—The United Cycle Trades Directorate met at 5 o'clock this afternoon at its Show booth in the Coliseum and listened to an interesting report by H. S. Quine, of the Racing Committee, on the importance of promoting cycle races all over the country. Recommendations were submitted by Mr. Quine providing for broad-gauge plans to promote as many cycle races as possible during 1917, and these recommendations were enthusiastically approved by the Directorate.

The members of the Directorate were of one mind in stating that the National Shows exert powerful influences for the upbuilding of the industries, and for the advancement of the dealers, and as a means of stimulating dealer interest in the exhibitions it was decided to hold a dealers' convention in connection with the coming New York Show. The convention, for which Messrs. Fred Baker and Louis Schwab are working out the details, will be held in the Concert Hall of Madison Square Garden on Thursday, December 7.

It is the further intention of the Directorate to arrange a highly interesting and helpful programme, with a special view to co-operating with the dealers, and also to provide for special hotel rates. Invitations, accompanied by free show admission coupons, will be sent out immediately to all the dealers in the East.

The Directorate voted to establish a central headquarters at 375 Fifth avenue, New York, and Walter Rink, formerly in the advertising and sales department of a large Newark manufacturing house, has been engaged to take up the secretarial duties under Directorate guidance.

Mr. Rink is a graduate of Columbia University and has had wide advertising and correspondence experience, along lines which will assist him directly in the work which he now undertakes. He will spend next week at Bristol, Conn., going over the details of the proposition with C. F. Olin, of the Directorate.

"MAC'S" NEW JOB

J. B. McNaughton Is Placed in Charge of New Indian Dept.

CHICAGO, Nov. 15.—J. B. McNaughton, who has been assistant sales manager for the Hendee Manufacturing Company, has been selected to head a new department for the Indian folk. It will be known as the Dealers' Aid Department, and McNaughton will co-operate with Indian dealers all over the country on matters pertaining to the exploitation of the Wigwam products. McNaughton has gone deeply into the situation and is making a point of talking things over with the dealers attending the show.

CYGNET LIMOUSINE FOR PETROGRAD

CHICAGO, Nov. 15.—Leadley B. Ogden, of the Cygnet Rear Car Company, announced to-night that the Cygnet de luxe limousine which has attracted much attention since the opening of the show, has been sold to Playm-Ochs, Ltd., of Petrograd, Russia. The car will not be shipped, however, until after the New York show.

HERRINGTON TO TRAVEL

CHICAGO, Nov. 15.—Art Herrington, formerly in the special sales department of the Harley-Davidson Motor Company, and recently transferred to the foreign division, as told elsewhere in this issue, is scheduled to leave for an extended trip abroad about Feb. 1. His tentative route includes Australia, Dutch East Indies, Hawaii and the Philippines.

JACKSON'S CHANGE

General Manager of Smith Motor Wheel Division Joins Briscoe

MILWAUKEE, Wis., Nov. 14.—W. V. C. Jackson, general manager of the Motor Wheel Division of the A. O. Smith Company, and whose initiative had a great deal to do with bring the motor wheel to national notice, has resigned his position with the Smith company, effective Dec. 1.

Mr. Jackson goes to the Briscoe Motor Corporation, of Jackson, Mich., with the title of assistant to the president. The Briscoe concern stands well to the fore in the light car field.

NEW HONORS FOR HENDERSON

CHICAGO, Nov. 15.—That the Henderson four cylinder motorcycle is the lightweight of the 61-cubic inch division was discovered to-night when a couple of enthusiasts got into a friendly argument and had the machine weighed. The funny part of it is that no one, not even T. W. Henderson himself, suspected that the Henderson "four" was in line for lightweight honors. The Henderson was found to scale at 300 pounds, as against 325 for the nearest competitor among the "big fellows."

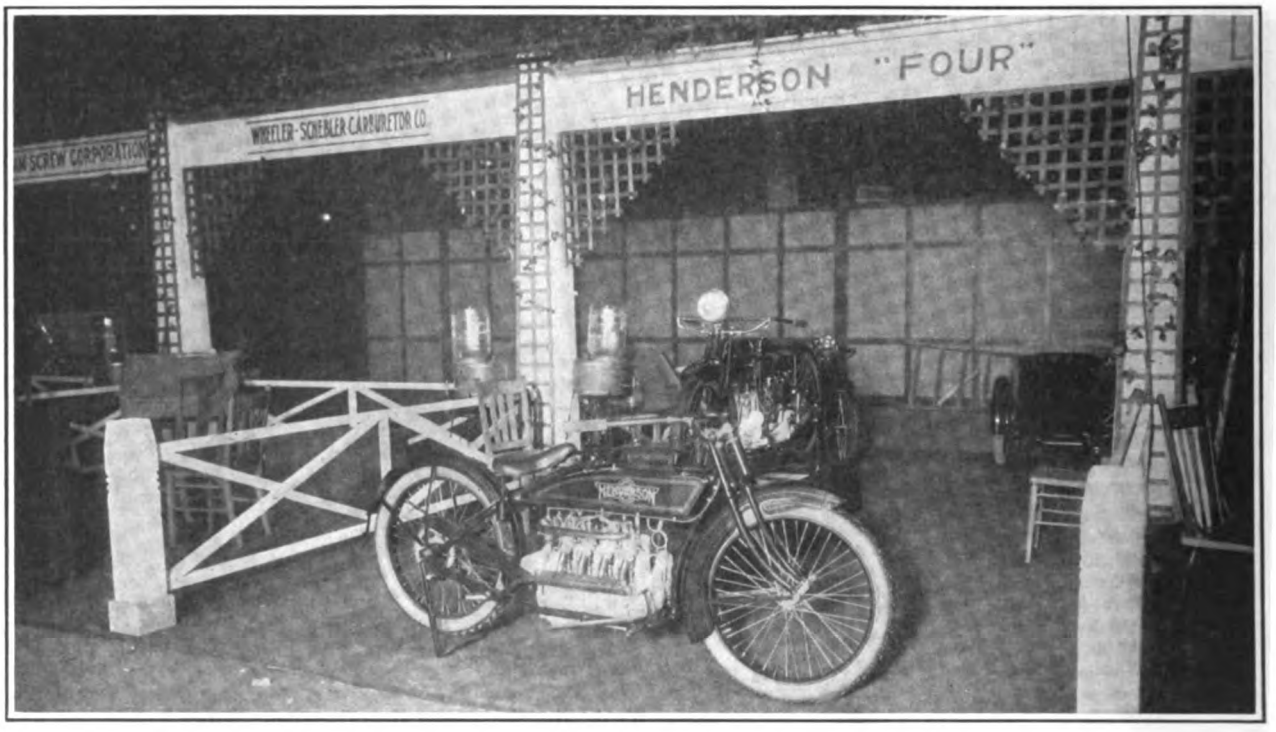
HENDERSON BOOTH WHERE THRONGS INSPECTED THE ONLY AMERICAN "FOUR"



SHOW SETS NEW MARK FOR ATTRACTIVENESS

Motorcycle Models in Full Nickel and in White Enamel Finishes Are Among the Artistic Highlights; Ingenuity Is Combined with Picturesqueness in Arrangement of Products

COLISEUM, Chicago, Nov. 15.—It was the unusually high standard attained by manufacturers of cycles and accessories in the artistic presentation of their products that most impressed visitors to the Coliseum during the opening days of the present National Show—although the number of new offerings from the trade and the size of the crowd were points of considerable interest.

Primarily, this is a "Show Beautiful." It is businesslike also—unprecedentedly so, judging by the reports of many exhibitors—but first and last it is pleasing to the eye. Never have the products of the American motorcycle, bicycle and accessory fields been set before the public more attractively.

Many Elaborate Settings

The exhibitors have vied with one another in making the displays striking, and highly polished full-nickel machines and specially-named Show models are the rule rather than the exception. The products themselves have been made as attractive as engineering skill and factory ingenuity would permit, and the whole layout of the Show is topped off by elaborate settings and a general atmosphere of elegance that admittedly set a new mark for the big annual exhibitions, of which this is the fifth for motorcycles, bicycles and the allied lines.

Nickel and White Finishes

The Excelsior exhibit, with a three-speed model finished in full nickel, and another model in pure white enamel, both enclosed in glass cases, and the Indian display, including one of the new Lightwins finished in translucent red and set in a gold frame against a black plush background—with special lighting to eliminate the last possible shadow—are especially noteworthy.

A Camping Scene

Emphasis is placed on the pleasurable side of the motorcycle at the Harley-Davidson booth by means of a camping scene setting in which a Harley-Davidson sidecar plays an important part.

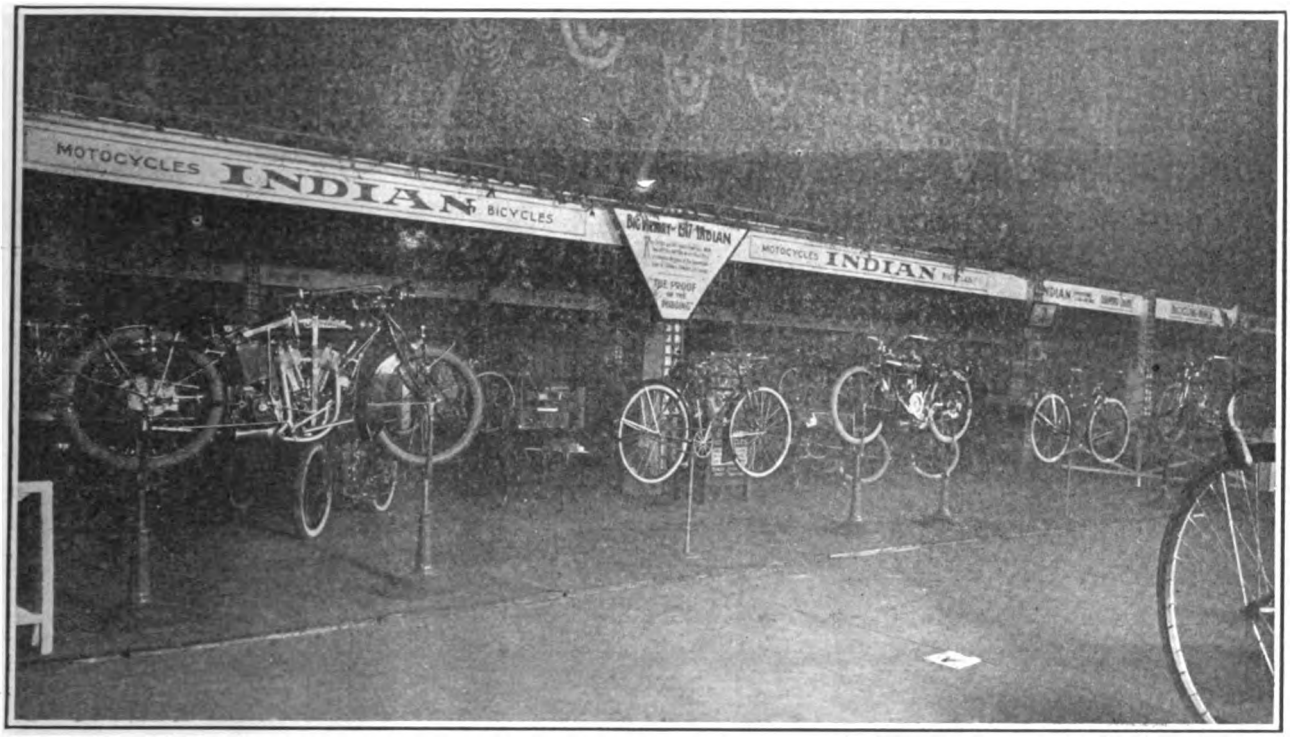
Impressive Cleveland Display

The Cleveland lightweight exhibit is also impressive, the piece de resistance being a Cleveland model finished in nickel and copper and railed in with a brass chain rail that adds materially to the effectiveness of the layout. A special lighting arrangement causes the model to stand out prominently

DEMONSTRATING MOTOR WHEEL AND ITS ADAPTABILITY TO ANY BICYCLE

Digitized by Google

WHERE THE BIG AND VARIED TRIBE OF 1917 INDIANS HELD FORTH



and it is the first of the numerous exhibits to catch the eye of the visitor entering the Coliseum.

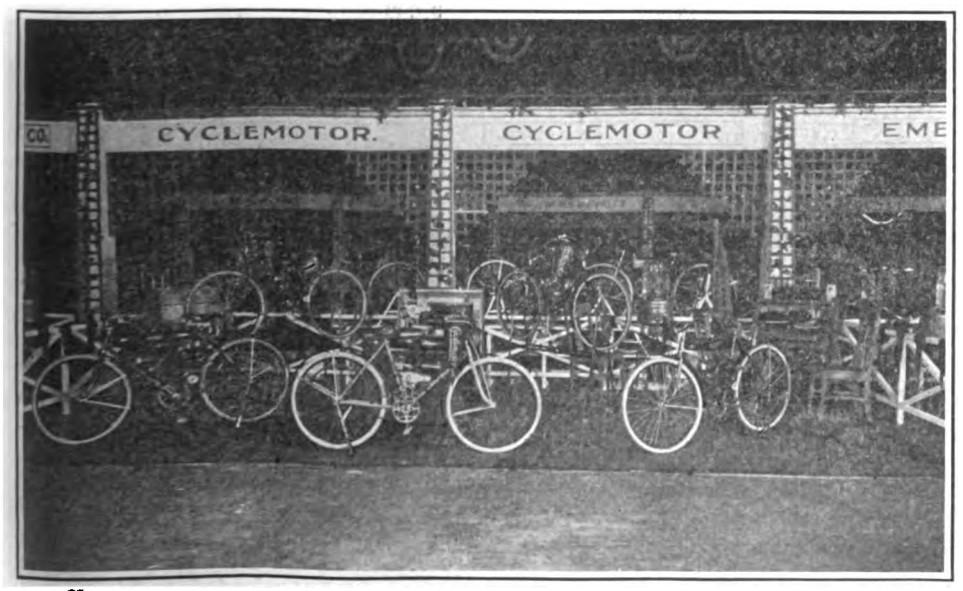
Cygnet and R-S

The Cygnet display, with a handsome limousine body de luxe and several special commercial models, and the Reading Standard booth, where a full white enamelled model compels the admiration of the passerby, also contribute much to the general effectiveness of the exhibition. The interest in the Reading Standard display is increased by the fact that the specially-finished model is elevated on a stand so that each of its mechanical details can be minutely inspected without trouble. Both exhibits draw an interested crowd of spectators, both in the afternoon and evening.

The "New Baby" Is Weighed

Situated next to the Reading Standard booth is the Okay motor exhibit, and there Lee Woodruff has presented the little bicycle power attachment in a most novel and striking manner. The "new baby" is displayed in a gold frame, the motor being placed on the platform of a spotlessly white scale to impress the visitor with its extremely light weight. The whole layout is thrown against a background of black plush, and is most attractive.

HEADQUARTERS OF CYCLEMOTOR, TWO-STROKE BICYCLE ATTACHMENT



Extensive Bicycle Lines

The Edwards-Crist booth and the stand of the Great Western Mfg. Co. are among the most striking in the bicycle section. The former gives a complete lineup of the Edwards-Crist cycle offerings, on a stepped platform reaching up against the wall. The platform is covered with green baize and the niches here and there are filled with parts and fitments chosen from the extensive jobbing line which the Chicago firm handles. The Great Western booth is attractively set off by palms and is made doubly enticing to the Show visitor by the use of settees and other comfort features. Practically all visitors take full advantage of these facilities.

The Dutch Girl Is Busy

The Van Cleef booth is decorated with a color scheme of orange and blue and the Van Cleef Dutch Girl and a typical windmill in motion call attention in most picturesque fashion to the layout of Dutch Brand products which the company is showing. Attention, in many cases, seems to be divided between admiration of the booth and its products.

Instructive "Stanweld" Exhibit

It is a difficult matter to display effectively such articles as bent parts and steel tubing, but at the headquarters of the Standard Welding Company a touch of unusual interest is given these ordinarily prosaic offerings by classifying the parts of each of six distinct motorcycles and mounting them on a "multiplex" fixture after the manner of a picture display in an art store. Various motorcycle makers are glad to bring visitors over to the Standard Welding booth and show them just what enters into the construction of their machines.

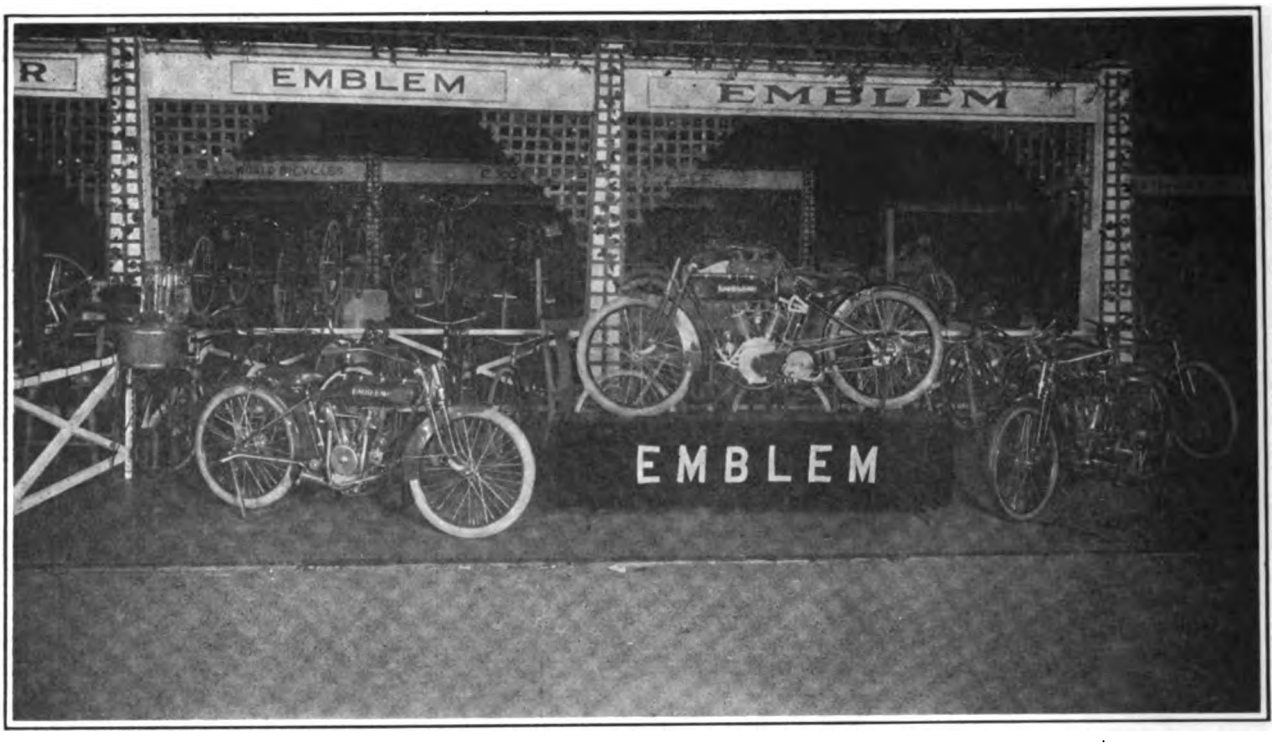
EMBLEM EXHIBIT WHICH FEATURED THE THREE-SPEED LIGHTWEIGHT TWIN



SHOWING THE GREAT WESTERN STAND WITH PALM DECORATIONS

TWO NEW TROXELS

Wizard Saddle for Big Twins and Pillow-Pad for Lightweights

CHICAGO, Nov. 14.—H. T. Roberts and Jack Brandt are doing the honors for the Troxel Mfg. Co. The Troxel folk are so busy keeping ahead of demands on their Elyria saddle plant that they have but scant time to devote to the development of new things according to Roberts; but despite the rush a new Wizard motorcycle saddle for heavyweight machines and a new Pillow pad type for lightweights are being presented at the Troxel booth.

Both are of the padded suspension type, and embrace all the well-known features in the Troxel saddle line.

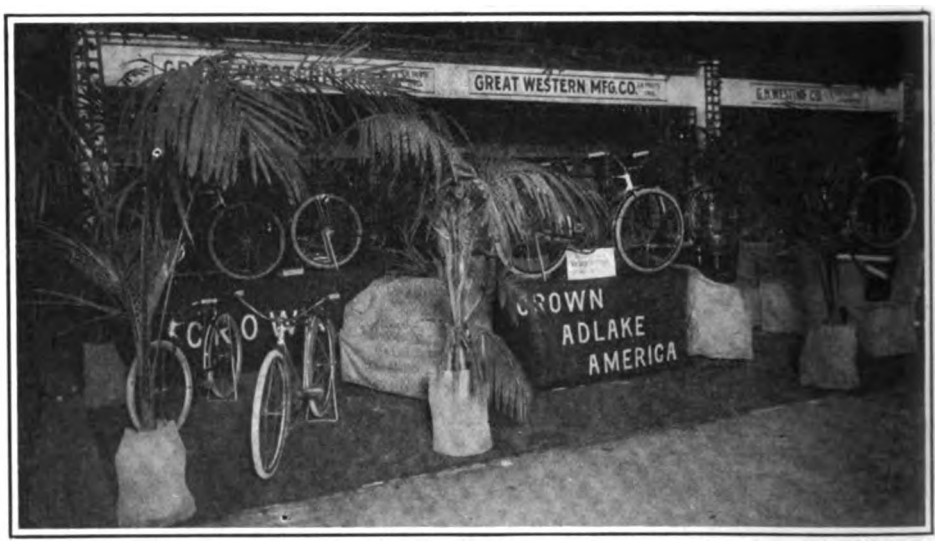
HOW LANG HELPED

Chicago Dealer Loaned Sidevan Outfit to Rush Photo Work

CHICAGO, Nov. 14.—If it had not been for a Harley-Davidson with sidevan, **Motor Cycle Illustrated** would have been unable to present its readers with the accompanying photographs of the Show until the next issue.

The photographers, Jahn & Ollier, snapped all the photos after the close of the Show on the opening night and rushed the plates off to the studio for development, as quickly as they were snapped, on the sidevan combination, which was loaned by C. H. Lang, the local dealer.

Emphasizing the need for speed is the fact that a special police permit granting the operator full permission to "open her up" between the Coliseum and the studio was taken out and found handy. He did the trick, all right, and travelled at a smart clip.



NEW BACK-REST

Improved Universal Model of Weed Product Is Shown by Reeps Co.

CHICAGO, Nov. 14.—A new universal model of the Weed folding backrest, so designed that it will fit any Troxel Jumbo saddle, or any of the various types of Mesinger Air-Chusion saddles, is being pointed to with pride by C. S. Shuman at the booth of the Reeps Mfg. Co., New York.

Aside from its great versatility, the new model has other novel features, in that it is designed to attach to the under side of the saddle in every case, the whole top of the saddle being left unobstructed; at the same time the back is made adjustable so as to tilt in any desired position to suit the individual taste of the user.

The new model lists at $4.50. It is somewhat larger and broader than the old Weed type.

BEAN VULCANIZER

Of Pocket Size Is Latest Addition to Line of Well-Known Toolmakers

CHICAGO, Nov. 14.—Aside from its well known line of Bean Chain tools and valve seating tools, the Bean Tool & Sales Co., of Berea, Ohio, offers a new pocket vulcanizer of novelty. The little device, which is intended for tube repair-

Digitized by Google

BIG TWINS PREDOMINATED AT THE SHOW STAND OF THE THOR MAKERS

MANY MIAMI CYCLE LINES ARE HERE; ALSO THE NOVEL TESTING FRAME

ing only, and which can readily be carried in the tool box of the motorcycle, makes use of a "cap" of special non-fluid fuel to complete the vulcanizing process.

The device which weighs only a couple of ounces, sells for $1.

A NEAT SQUAD

All the Harley-Davidson Boys Wear Suits of Forest Green

CHICAGO, Nov. 14.—The alertness of the Harley-Davidson folk to give a good movement, a good hard shove in the right direction, is nowhere better emphasized than at the present Show.

Believing that the appearance of a number of folk in neat riding clothes will do much to lessen the prejudice entertained against the motorcycle, and will at the same time go a great way toward bringing the slack rider into the ranks of the neat ones, all of the Harley-Davidson boys have come down from Milwaukee neatly clad in Forestry Green riding suits and brand new puttees. Their uniforms are the hit of the Show and the talk of the hotel.

BOSCH SYSTEM ATTRACTS

The Bosch lighting and ignition system is the center of interest at the fine exhibit of the Bosch Magneto Company. Magnetos and sparkplugs are of course included. The lighting and ignition generator with its independent units is shown attached to a motor, as are several magnetos.

FLXIBLE REAR CAR

Will Be Added to Flxible Sidecar Line About April 1

CHICAGO, Nov. 14.—The Flexible Sidecar booth is tenanted by Sales Manager Hugo B. Young, ably assisted in pointing out the Flxible changes by Messrs. Timenus, Schittke, Smith and Coulton of the factory forces.

When the boys get all through telling you about the improved sidecar models they begin to talk of a new rear-car to come from Loudonville before the opening of the next riding season. Nothing concerning the new Flxible offering is vouchsafed save that it will embrace some flexible features and will be ready about April 1.

GRETCHEN A HIT

Dutch Girl in Picturesque Setting Tells Story of Van Cleef Line

CHICAGO, Nov. 14.—Always on the alert to stage an impressive exhibit, that trio of Van Cleef brothers—Noah, Maxim and Paul—have done themselves proud at the present Show. The Dutch girl is there as usual; also the Dutch windmill; the Dutch orange and blue colors and the Dutch tulips. It's a regular Dutch affair, to speak the truth, and remarkably striking and well calculated to display to full advantage the full line of Dutch Brand products and there are plenty of visitors gathered there at all times.

If they were not in reality the first exhibitors to land an order during the Show, Van Cleef Bros. were at least way up on the line, booking a substantial order for cements just after the doors opened.

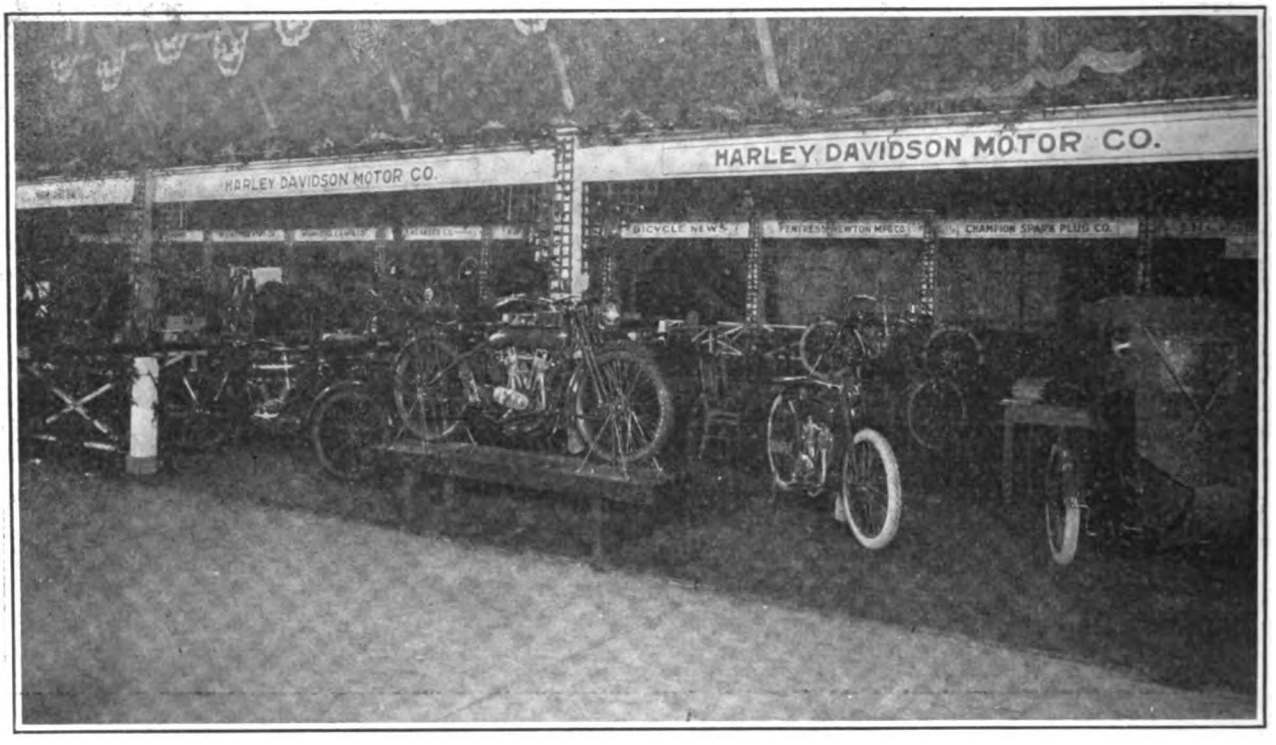
HARLEY-DAVIDSONS IN OLIVE DRAB FINISH MADE AN IMFRESSIVE DISPLAY



A NEW CHAMPION

Improved Motorcycle Spark Plug with Novel Features

CHICAGO, Nov. 14.—G. A. Kraus, engineer, and W. J. Shay, Chicago branch manager, held down the Champion Spark Plug booth on the opening night. F. A. Stranahan, president, and F. B. Caswell, sales manager, are due later in the week.

A full line of Champion plugs were on view; and under cover, and mentioned only to the "elite," was a brand new motorcycle plug said to have some very novel features coupled up with the well-known Champion quality and stamnia.

NEW TIRES FOR LEACOCK

Among those offering new bicycle tires is the R. J. Leacock Sporting Goods Company, of St. Louis. There are also rubber bicycle grips, made along the lines of motorcycle grips in various colors, as well as cycles and fitments in a large variety. R. J. Leacock heads a group of attendants, assisted by J. E. Muhs.

HAS FLYWHEEL MAGNETO

The Quick Action Ignition Company, of South Bend, Ind., is showing a line of magnetos, coils and switches. The feature is a flywheel magneto, which makes its bow at the Coliseum. R. A. Oglesby, of the factory, is in charge of the stand.

NEW TIRE FOR HEARSEY

Special emphasis is being placed on a new large button tread single tube tire at the booth of the H. T. Hearsey Co., Indianapolis. The Hearsey line is replete with both bicycles and cycle fitments and is ably shown by H. T. Hearsey, J. H. Kinney, Wm. Catlett and F. M. Donaldson.

MANY AT CHICAGO SPACE

H. P. Hansen, with fifteen able male assistants, also "Miss Chicyco," was at the Chicago Cycle Supply Company's exhibit. There was a crowd at the booth all the time, outside and inside. The Chicyco folks have taken the agency for Yale bicycles, and this particular line is featured at the stand. A. Redack, representing the Bethlehem spark-plug, makes his headquarters at this booth.

STEVENS CABINET

For Ball Retainers Featured at Stevens & Company Exhibit

CHICAGO, ILL.—Stevens & Company, of 375 Broadway, New York, are showing a new ball retainer cabinet fitted with hooks so that dealers can keep straight and in order the stock of ball retainers. Each hook has a number under it which corresponds with a table in the box lid, giving sizes, number of balls, etc., as well as make of machine. Heller cabinets for small parts are also on view.

A spoke nipple screwdriver with collar, also shown, prevents the tool slipping off the nipple when screwing up.

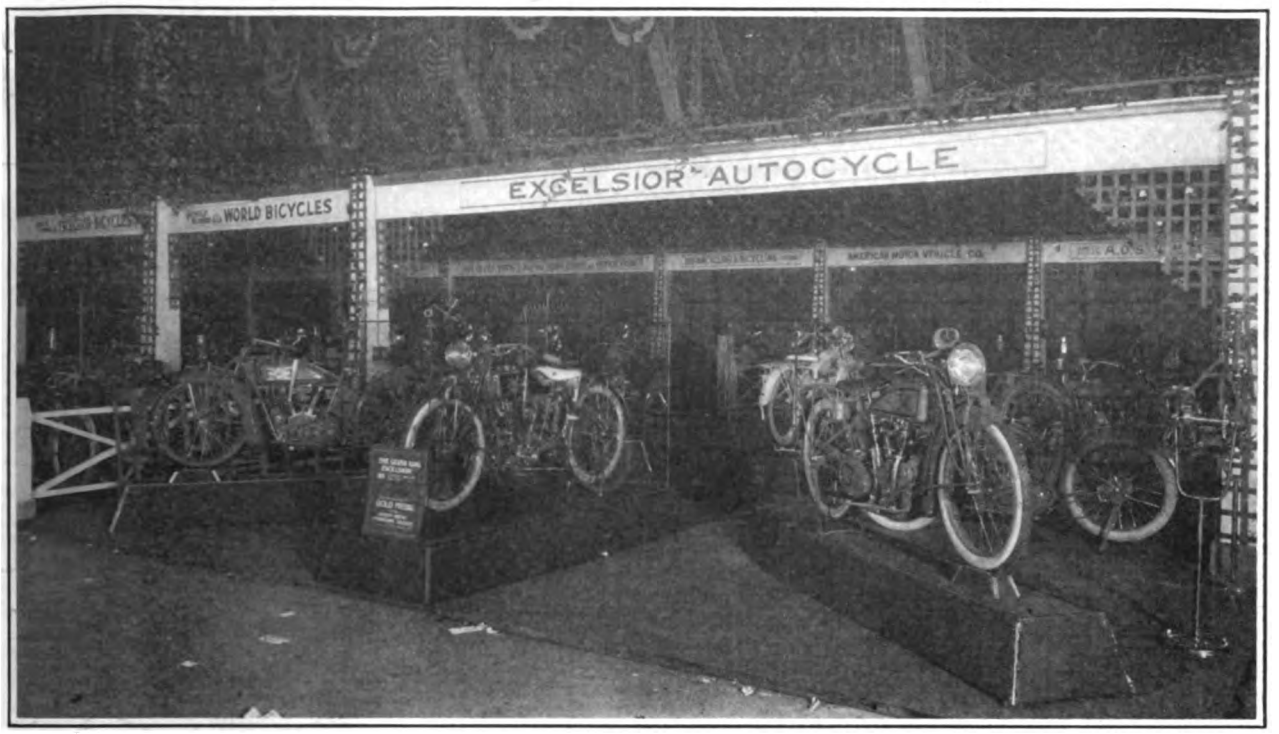
THIS IS HOW THE SERIES 18 EXCELSIORS MADE THEIR DEBUT



Personal Gleanings at the Show

SHACK SETS PACE

Emblem Manufacturer Had the Honor of Closing First Contract

CHICAGO, Nov. 13.—W. G. Schack, of the Emblem, had the honor of making the first motorcycle sale at the Show. Soon after the doors opened Mr. Schack took a deposit on one hundred of the lightweight Emblems for shipment to Holland; eighty are to be three-speed models and the remainder are to be single geared.

The machines were purchased by A. G. Koldwind, who has taken the agency for the Emblem in the Netherlands; Mr. Koldwind also connected up with the Cyclemotor folk and left a deposit on 1,500 of the little bicycle attachments.

OGDEN GIVES GREETINGS

Sales Manager Leadley Ogden is meeting show visitors at the Cygnet Rear Car exhibit and is telling them all about that attachment. He is assisted by H. E. McKay and E. C. McDonald.

DOING DUCKWORTH HONORS

O. L. Barger and G. G. Brandenburg, of Brandenburg & Company, are displaying Duckworth chains at the stand of the Duckworth Chain & Manufacturing Company. The line includes four different models of motorcycle chain in addition to the racing type.

GENIAL ECLIPSE SEXTET

Boosting for Eclipse are President E. J. Dunn, General Manager J. C. Ferguson, Sales Manager A. C. Rice, T. N. Biddle, H. P. Fanning and L. S. Pugh. The Eclipse Machine Company is showing Morrow coaster brakes, Eclipse hubs and clutches.

HERSHEY TALKS LEGGINGS

Secretary R. C. Hershey is welcoming visitors at the stand of the Hagerstown Shoe & Legging Company. The booth displays a complete line of canvas and leather leggings, including puttees in oxblood, tan and black.

JONES & NOYES BOOSTERS

President Howard Jones and Norman Fyffe are doing the honors at the Jones & Noyes booth, telling about the Silver King and the commercial line of bicycles.

R-S MEN ACTIVE

General Manager E. W. Theurer, Sales Manager G. E. Atkins and Chief Engineer J. M. Rothermel are on hand at the booth of the Reading Standard Motor Company. They are assisted by a number of R-S dealers in presenting the details of the brown machine to show visitors.

MON-AUTO AT 156 BROADWAY

Word has been received from the Gibson Mon-Auto Company, Inc., that its address is 156 Broadway, New York, and not 30 Church street, as mentioned in our issue of November 9. The firm makes the two-wheeled motor vehicle.

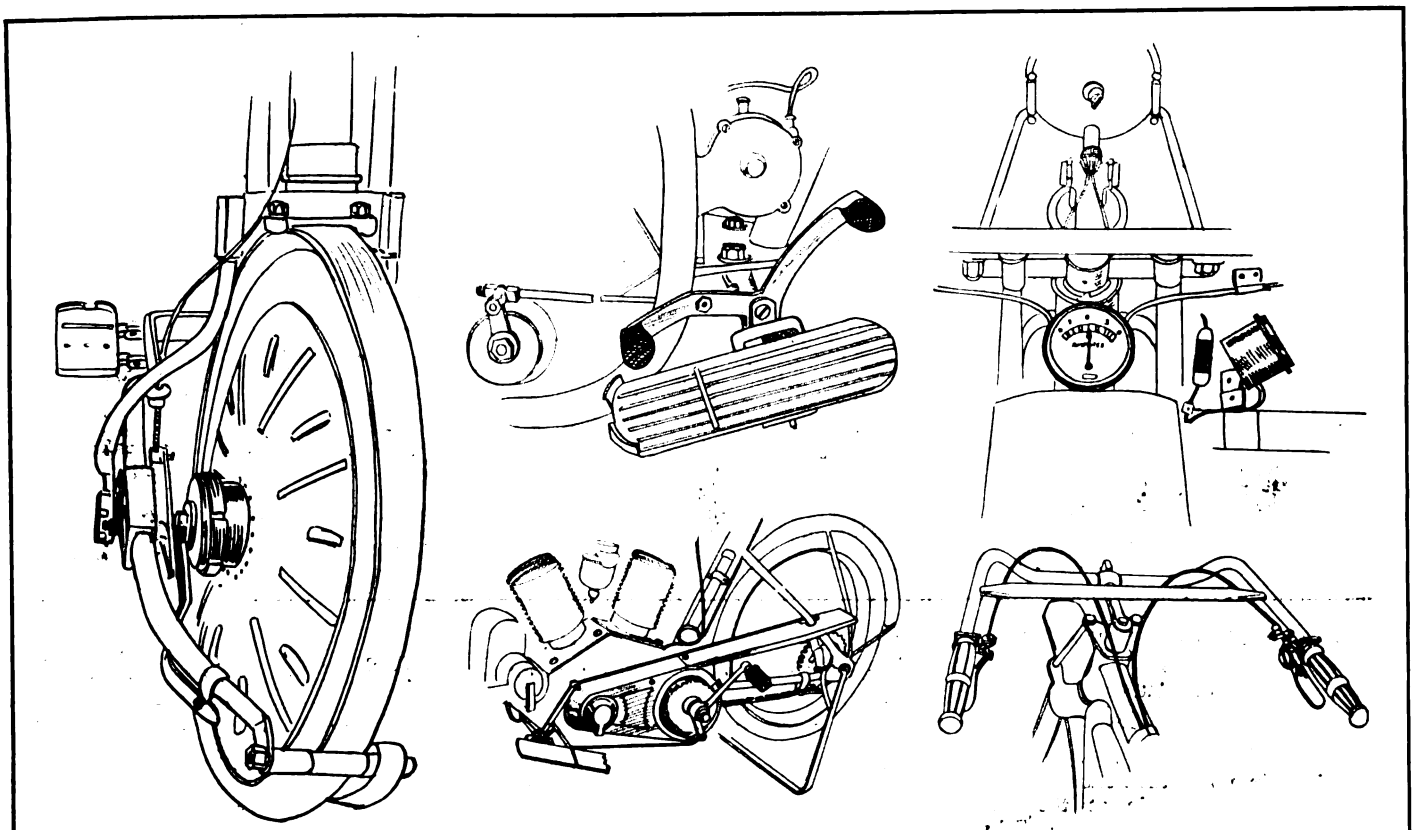
MECHANICAL HIGHLIGHTS ON MOTORCYCLE ROW

Dayton Motor Bicycle With Disc Clutch Is Only New Model Developed Since 1917 Factory Announcements Were Made, But Other Lines Show Some Brand New Refinements; Military Drab Grows in Popularity as a Finish



Left, Clutch Control Details on Dayton Motor Bicycle; Top Center, Rocker Pedal Actuation of Emblem Three-Speed Gear; Below, Emblem Chain Guard; Top Right, Ammeter Mounting on Henderson; Below, Control Levers for Smith Motor Wheel

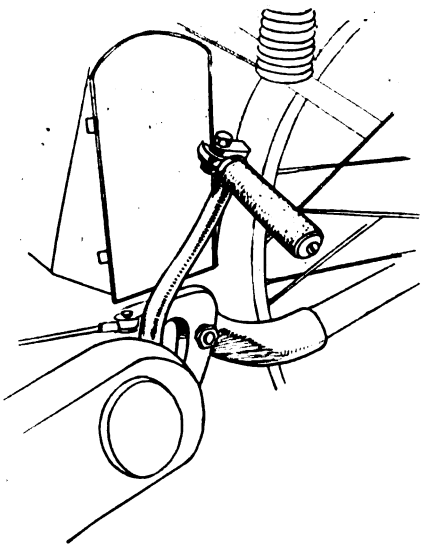
COLISEUM, Chicago, Nov. 14.—As might logically be expected, with the National Show following as it does so closely after the trade announcements for the new season, the changes in the motorcycle offerings at the Coliseum exhibit from the announced models are few and far between. Only in the Dayton line is an additional model found, in the shape of a motor bicycle model, fitted with a disc clutch and a somewhat improved stand, which is listed at $110, as against $100 for the clutchless model.

NEW DAYTON CLUTCH

The Dayton clutch arrangement is ingeniously worked out. The disc clutch is housed in the hub of the dished wheel, control being effected through the intermediary of a Bowden wire transmission, operated by twisting the left handlebar grip; the right grip serves to operate the throttle control as heretofore. The stand has been increased in width somewhat, giving the mount a better "footing," so to speak, and has been strengthened at the same time. Indeed, the addition of the clutch, which replaces the compensator on the simpler model, has increased the width of the power wheel appreciably, a fact which, however, in no wise detracts from its appearance or working qualities.

THREE-SPEED EMBLEM

The Emblem three-speed model in finished form made its bow at the show. The plans as formulated in the preliminary announcement have been carried through to a happy completion by the Emblem engineering staff and have resulted in a model that should make a distinct appeal. Unlike the single-speed model, the clutch control has been taken from the left handlebar grip and vested in a rocker pedal situated on the right footboard, the gearshift control being effected through the intermediary of a neat quadrant lever positioned just below the saddle to the seatpost mast and direct connected to the gearset. There is no gearset interlocking device with the clutch control, it being explained that on a model of this size such a device is wholly unnecessary and merely means added complication without proportionate gain.



Kick Starter on Excelsior Lightweight

NEW HENDERSON MANIFOLD

Once again the Henderson appears with a new manifold, which differs somewhat from the type offered when the announcement was made. The new manifold is quite similar in appearance to the 1916 brand, but it is explained that it is considerably larger, permitting a freer flow of the incoming gases, and, moreover, is fitted with a neat little priming device that facilitates starting in cold weather.

Other Henderson changes are the fitment of an exceptionally small and neat ammeter on the electrically-equipped models—at additional cost, of course. The ammeter is positioned way forward on the top tube just in front of the tool box and set at an angle, which facilitates reading. It is explained that the added complication in-

Digitized by Google

cidental to the use of the ammeter is well worth while in time and trouble saved when it comes to locating faults or determining that the electrical system is at fault.

For use on the Henderson models not equipped with the electric generator and storage battery system, the Henderson designers have brought out a neat little dry cell electric lighting device that fits well into the Henderson scheme of things. It is explained that the system is intended for the use of the fellow who uses his machine occasionally at night and not for the tourist, who must needs have a generous supply of current, which is not part and parcel of the dry cell system.

The dry cell system comprises a couple of substantially built pressed steel battery cases, cylindrical in form to accommodate any standard size dry cell. They are attached to the seat mast tube at the rear of the motor by means of a suitable bracket. A neat little headlight suitable for city riding is fitted by means of a special bracket, as well as an orthodox tail light. The additional price of this equipment has not yet been determined by the factory folk.

LIGHTWIN INLET CHANGES

The Harley-Davidson line has been continued without alteration since the announcement, as has the Indian Powerplus line, with the exception of strengthening the exhaust valve stock. The Lightwin has been altered only by the use of a slightly different manifold than was originally announced, which makes at once for a more convenient carburetor location and a freer flow of gas to the cylinders. In other particulars the Indian line remains unchanged.

CLEVELAND KICK STARTER

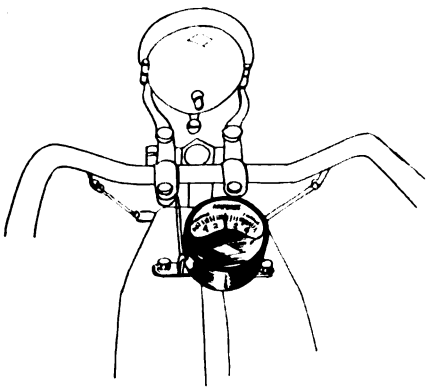
The Cleveland kick starter, which was heralded but not really brought out when the new models were announced, made its bow when the show doors swung open last night. It is of the segmental type with every operating part, with the exception of the lever itself housed within the countershaft casing, making at once for neatness, silence and reduced wear. The starter is so geared that it gives the little motor several sharp turnovers each time the lever is depressed. The kick starter model lists at $170.

S. M. C. BRAKE AND GEARSET

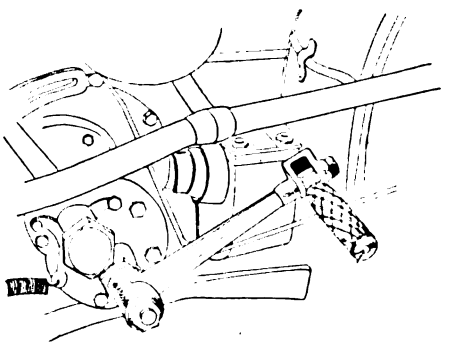
The S. M. C. line, which is the Schickel under a new nameplate, can always be counted on for a display of real novelty. And in the present case it lives up to its reputation. The brake arrangement on the two-speed model is quite novel and unlike anything that has ever been seen before, either here or across the water. The brake comprises a sort of metal clamp, which grips the metal hubshell when the brake lever is depressed. The clamp, which looks for all the world like a clamp used in grinding in bearings and similar work, is held open and out of engagement with the hub by means of a spring. The brake is simple and undoubtedly effective and never needs relining. On the other models the rim brake is continued.

The Schickel two-speed, which is of the planetary hub type, is also novel. It is so arranged that it forms the hub for the belt rim, which is laced right to it by means of spokes, so that the two-speed and the rim form in reality a separate wire wheel.

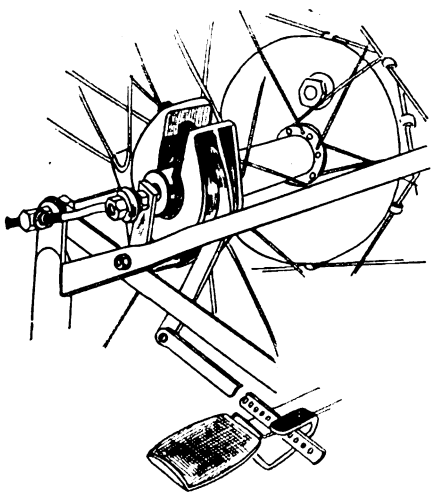
MORE DETAILS OF 1917 SHOW MODELS



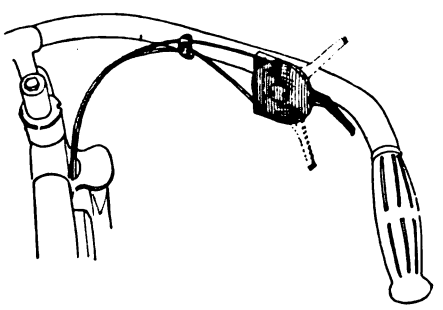
Ammeter and Bracket on Indian



Cleveland Lightweight Kick Starter



Novel Clamp Brake on S. M. C. Models



Two-Wire Control on Two-Stroke S. M. C.

The two-speed can be removed from the hub very simply and can be used on any of the other S. M. C. models with no alterations other than those necessary to effect the control.

The control of the machine has been altered somewhat over that formerly used, in that while a single lever does all the work, except the two-speed operation, there are in reality two control wires reaching from the lever to the machine. One serves to operate the compression release when the lever is depressed all the way, at the same time shutting the throttle. Movement in the other direction closes the compression release valve and opens the throttle.

THOR LUBRICATION CHANGE

A single change only has been made in the Thor line since the announcement. This has to do with the main clutch bearing, a simpler and more direct means of effecting lubrication being devised and fitted which, at the same time, facilitates adjustment of the correlated parts for the removal of end play when the parts become worn after continuous usage.

OKAY OUTFIT INTRODUCED

While not distinctly in the motorcycle line, it might be as well to state here that the Okay bicycle motor attachment made its bow in final form at the Coliseum exhibit. The biggest change from the model as originally announced is found in the addition of a free engine arrangement which permits the disengagement of the power plant from the wheel when desired, simply by touching a toe lever, which permits the motor to be carried out of engagement with the tire through the agency of a couple of strong springs. When it is desired to reengage the device, depressing another toe lever does the trick in a jiffy. The details of this device have been well worked out and convenience of being able to detach the motor and pedal the cycle along without interference when the traffic is heavy will no doubt appeal to many. The fitting of a well designed muffler and a neat little priming cup complete the detail changes which have been wrought in the "new baby" since it made its bow at the Atlantic City convention.

FLXIBLE FITMENTS

A touch of real luxury is added to the Flxible sidecar models by the addition of a cowl dash, following closely automobile practice. The dash mounts a clock, a two gang switch for the operation of the sidecar light and the dash light; a dash light positioned where it throws its gleam on the clock and a trouble lamp, which attaches to the dash lamp socket when the latter is removed. When desired, a neat little mirrorscope can also be fitted, adding greatly to the effectiveness of the whole.

In principle, the Flxible sidecar is unaltered for the coming season; there are detail changes galore however. The rocker bearings have all been substantially increased in size, and bronze sleeves fitted to reduce wear at these points to a minimum. The frame design and the axle have been materially strengthened and a combination shock absorber and rebound-snubber spring added. A full steel body amply braced replaces the wood frame construction formerly used. The mudguard bracing has been altered somewhat, providing a ready means of getting at the tire in case of punc-

Top Left, Okay Powerplant; Center, Pope Kick Starter and Three-Speed Interlock; Upper Right, Harley-Davidson Brake Lever; Center Left, Reading-Standard Brake Grip Lever; Lower Left, Rim Brake on Excelsior Lightweight; Center, Harley-Davidson Manifold; Lower Right, Okay Clutch Control—C, Contact; R, Release; Above, Indian Tail Light and Bracket

ture or blowout and at the same time eliminating breakage of the mudguard stays.

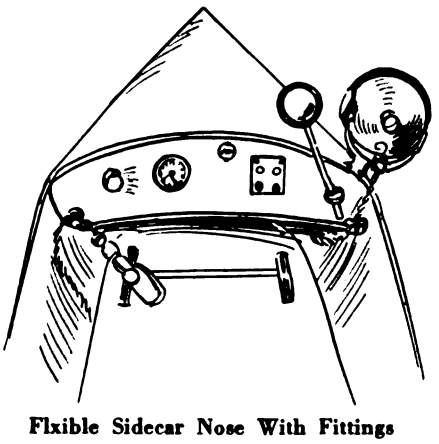
Emphasizing the trend toward the luxurious in the Flxible offerings are the fully sprung seat and backrest, deep upholstery springs being provided to increase the comfort of the rider. A quickly adjustable footrest has also been added, which adds materially to both the car's appearance and comfort.

PULLMAN AND CYGNET

The Pullman newness as well as the Cygnet Rear Car offerings in the way of new models and fitments were fully described in the last number of **Motor Cycle Illustrated** and the show brought forth nothing newer from either of these live wire concerns.

MILITARY DRAB COLOR

The jump, so to speak, of the Excelsior from the gray to the military drab color, and the appearance of the emblem—one model at least—in the military hue, makes it practically unanimous, for nearly every manufacturer is offering either the full line or a couple of models in the "low visibility" finish. And the peculiar part of the situation is that no two of the manufacturers are in even a close approximation of agreement on the shade of what they describe as "military drab." It seems to range from a decided olive green—a beautiful green—as shown on the Excelsior models, through every shade of green and brown admixture down to the decided brown of the Harley-Davidson models. Nevertheless, they all are "military drab," or words to that effect.



Flxible Sidecar Nose With Fittings

SILK CORD RACING TIRES

While on the subject of bicycle tires, attention should be called to the Pye-Musselman exhibit of silk cord racing tires, which is staged by the Indiana Rubber and Insulated Wire Co. This line of speed tires attracted special notice from bicycle folk, as it has an international racing reputation. Most American cycle championships have been won on these tires, and a number of French and German titles, also.

NEW PRESTO BRACKET

Among the novelties for the motorcycle is a new Presto bracket offered by the Edwards-Crist Company for attachment to the 1917 Indian and Henderson models. This bracket is designed to carry both tank and headlight and is notable for its compactness.

Digitized by Google

F-N REFINEMENTS

New Button-Studded Cushion and Improved Springing

CHICAGO, Nov. 14.—General Manager J. C. Sage held the F-N fort, ably assisted betwixt and between times by Irving Beck, of New York.

Sage was busy pointing out a multiplicity of detail improvements in the Fentress Newton tandem line, chief among which are a new button bestudded cushion, an improved spring action making for greater comfort and a slightly altered aluminum footrest.

BUSY MIAMI CREW

Emphasize Dealer Co-operation with Sam Fetter as Chief Emphasizer

CHICAGO, Nov. 14.—Sam Fetter, who became advertising and publicity manager for the Miami Cycle & Mfg. Co. a few months ago was veritably standing out in the aisle and escorting the bicycle dealers into the Miami private office to give them first hand evidence of the sort of dealer co-operation which the Middletown cycle makers are extending the retailer.

The office is replete with sample ads culled from the national weeklies sharing in the Miami $40,000 national advertising campaign, as well as special placards, posters and other service features for the dealer.

Holding down the booth with Fetter are W. M. Sheets, F. P. Lee, and C. F. Pineau, of the sales force; Messrs. Ash, Wise and Miller will be down before the doors close on the exhibit. Also stationed at the Miami booth to talk over the advertising proposition with the dealers, is K. Moritz, of the Lord & Thomas advertising staff.

Special emphasis is being placed on the new Hercules frame construction, a special frame-testing machine having been set up in the booth to visualize the strength of this new frame in comparison with the older frame type.

The new ivory and black color scheme and a new Racycle crankhanger embracing the use of fewer parts and a line of light Hudson racing models are the things the Miami booth folk are talking about most.

SCHWINN COMES EARLY

Ignaz Schwinn, of the Excelsior, was on hand on Sunday superintending the installation of the Excelsior exhibit. Mr. Schwinn put on his overalls, buckled right down to work and made things hum about the Excelsior headquarters.

SCHICKEL QUARTET

S. W. Treat, of the Schickel came to the show fresh from three months of Border duty; the new S. M. C. models were as much of a surprise to him as to any of the show visitors.

Also at the Schickel booth were L. A. Hopkins, Sales Manager M. E. Gale and Joseph Clapes.

NUMEROUS TIRE NOVELTIES

Nearly every tiremaker exhibiting, and practically all of the cycle jobbers, are offering new bicycle tires in a variety of forms. The Kokomo line has three new styles, the Chicago Cycle Supply Co. has several, H. T. Hearsey presents a whole new series, the Edwards-Crist company offers several new and novel types and G. H. Westing is also in line with a number of bicycle tire novelties.

THEY LINED UP

To See Cutaway Thor Motor and Hear Sales Manager O'Hare

CHICAGO, Nov. 14.—Sales Manager C. B. O'Hare, designer A. A. Anderson, assistant sales manager J. M. Brechbiel and Messrs. Wells, Hayes and Fuerst, of the sales staff of the Thor, are taking turns at dusting off a neat little glass case which adds a decorative touch as well as an intensely interesting feature to the Thor line.

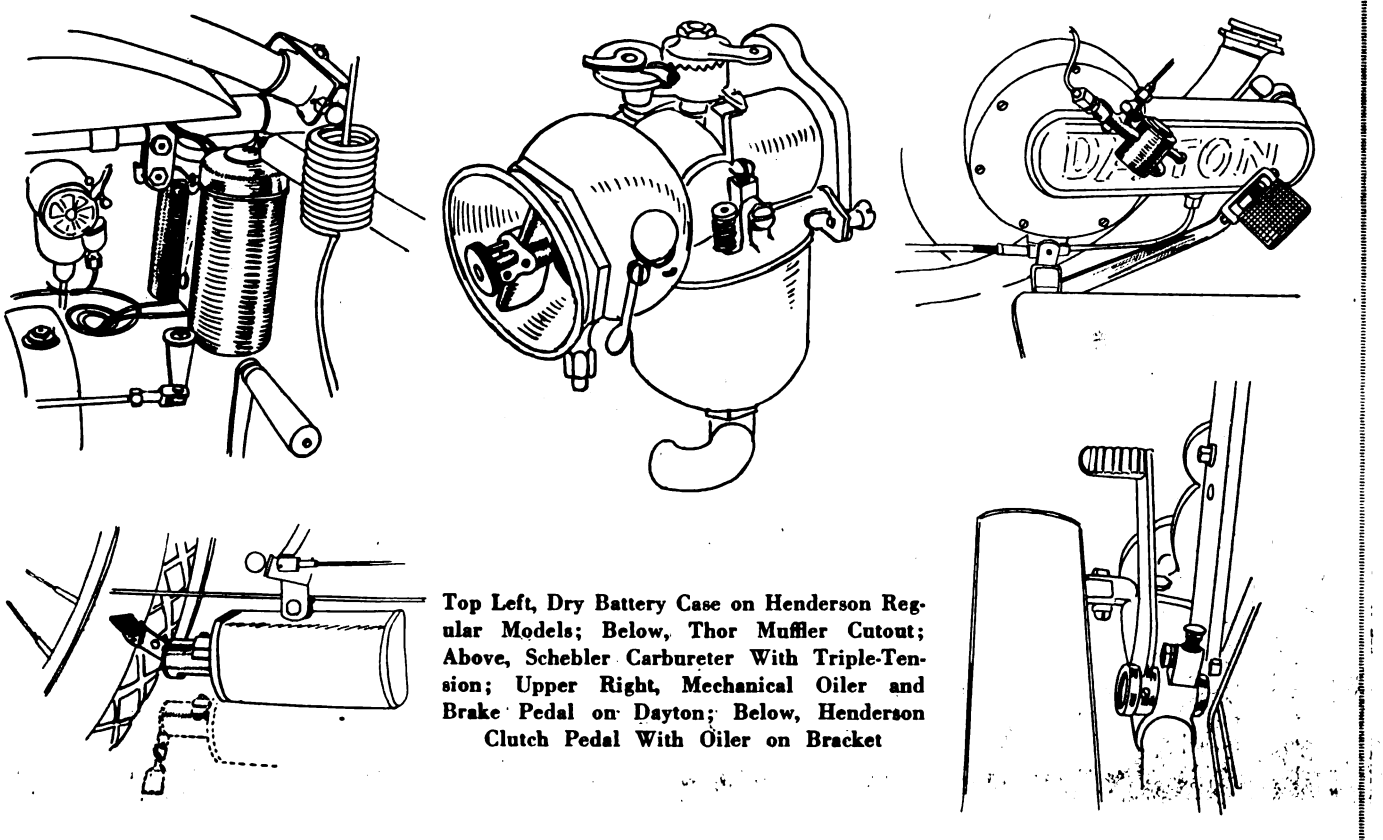
In the case is a finely finished cutaway section of the Thor three-speed mechanism, and it aroused so much interest for the first few hours after the opening that the fellows were standing in line to get a peek at it between inspections of the various models of the Thor line.

STRONG POPE LINEUP

Not a Show visitor gets past the stand of the Westfield Mfg. Co. without the Pope family, comprising General Manager J. P. Fogarty and Sales Manager L. D. Harden, and Messrs. Porzer, Edgar, Littlefield, Swayne, Cutter and others, calling attention to the new Columbia 21½-lb. racing model. The Westfield exhibit, including all of the Pope motorcycle models, with emphasis on the new three-speed electrically-equipped twin, and supplemented by the full lineup of Pope-built bicycles—with the Columbia predominating—is set off in a most attractive manner.

EIGHTY-FOUR EXHIBITORS

In all there are 84 exhibitors of motorcycles, bicycles parts and accessories who occupy 17,114 square feet of floor space. Last year only 16,470 square feet of space were sold.



Top Left, Dry Battery Case on Henderson Regular Models; Below, Thor Muffler Cutout; Above, Schebler Carbureter With Triple-Tension; Upper Right, Mechanical Oiler and Brake Pedal on Dayton; Below, Henderson Clutch Pedal With Oiler on Bracket

WHERE THE SHOW CROWDS ADMIRED THE NEW READING STANDARD MODELS

PERSONALS

(Continued from page 21)

RASTETTER REPRESENTATIVES

R. W. Dick, of Louis Rastetter & Sons Company, is in charge at that booth, assisted by E. W. Scott and H. Kirk, the latter being Chicago representatives. Bicycle wood rims are shown.

GOULT AT ASKEW STAND

A. H. Goult is in charge at the stand of the Askew Saddlery Company and is showing all comers the firm's new puttee leggings.

THE WESTING AGGREGATION

Headed by G. H. Westing, a considerable delegation of firm and road men are on hand to talk business at the booth of the G. H. Westing Company. The bunch includes R. H. Sturm, F. S. Hasler, C. R. Sheets and Carl Fredericks.

ROGERS' LIVE WIRES

President R. F. Rogers, assisted by W. H. Fox and G. N. Voigt talked Rogers sidecars to all comers. Irving Beck, the genial Eastern representative was on hand at intervals.

AT CYCLEMOTOR BOOTH

Cyclemotor interests are well looked after by President D. G. Anderson, sales manager O. W. Adams and Publicity Manager E. W. Perrin. Both models of the Cyclemotor attached to various makes of bicycles are included in the exhibit.

TELLING CLEVELAND STORY

Sales Manager C. A. Gilbert assisted by Messrs. C. W. Waughop, McDonald, Ball and Mullaney, is busy at the Cleveland exhibit pointing out the merits of the new kick starter and showing just why the Cleveland two-stroke lightweight has made so remarkably good during the past season. Treasurer G. H. Alexander is expected to be in before the week is much older.

BUSY NEW DEPARTURITES

C. F. Olin, M. J. Horton and E. W. Mink are the trio who represent New Departure interests at the Show. While there is nothing new in this line, mechanically speaking, several new ideas for aiding the bicycle dealer and co-operating with him in sales-promoting work are shown to visitors.

AMID GREAT WESTERN PALMS

E. J. Lonn, A. E. Lonn, C. A. Lonn, J. G. Wright, H. J. Tucker and George Coventry are singing the praises for the Great Western bicycle line, surrounded by the wall of palms that adorns this booth. The line of wheels shown has been sold to local firm of Von Lengerke & Antoine.

THREE AT PULLMAN STAND

President Harry Svensgaard headed a wideawake trio consisting of himself, W. D. Ramsey and J. F. Field at the Pullman exhibit.

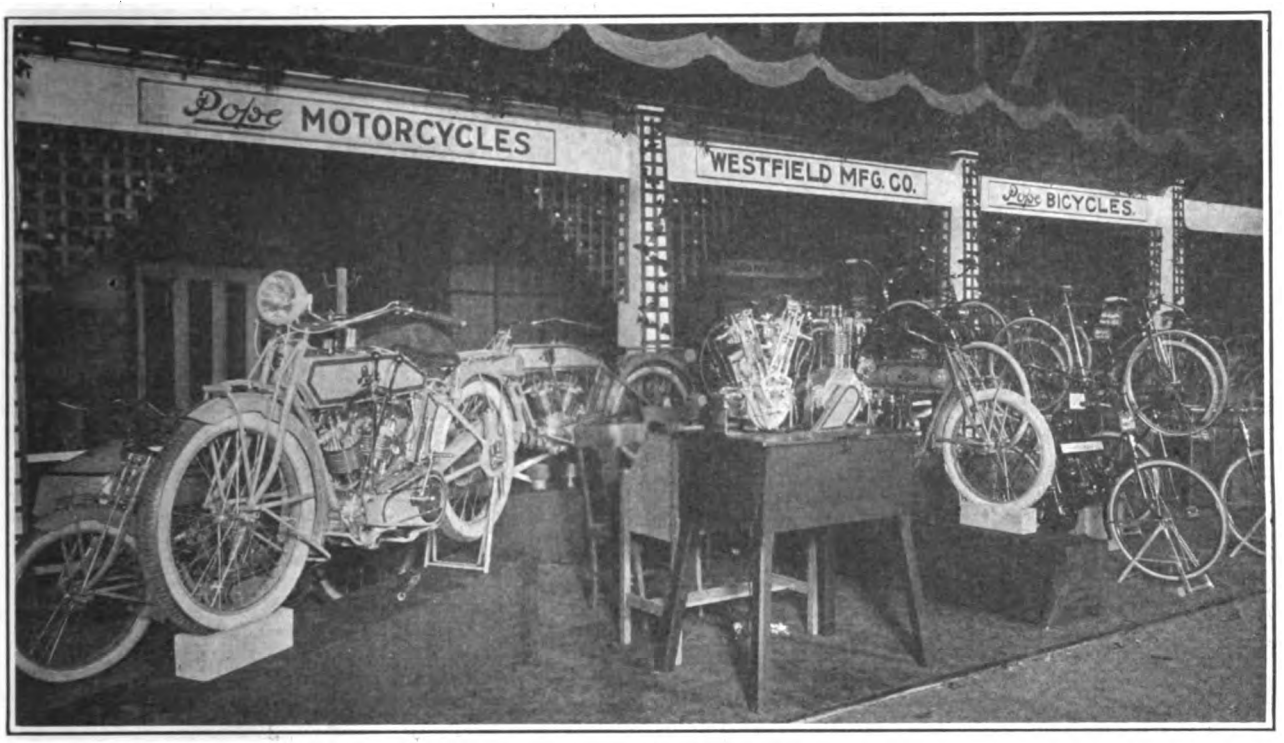
SHOWING CORBIN PRODUCTS

At the opening of the Coliseum, R. A. Sundvahl, manager of the Chicago branch, was in charge of the stand of the Corbin

BICYCLES ARE CENTER OF ATTRACTION AT EDWARDS-CRIST EXHIBIT

Digitized by Google

POPE HEADQUARTERS WITH A COMPREHENSIVE LINEUP OF NEW MODELS



Screw Corporation. The display is an attractive one of Corbin coaster brakes, hubs and speedometers.

CABANA IN CHARGE

President Martin J. Cabana heads the picked staff at the booth of the Buffalo Specialties Company, consisting of R. L. Hughes, W. E. Brown and E. T. Brown.

SHOWING SOLAR GOODS

Solar goods are demonstrated by L. J. Keck and W. A. Bell from the Badger Brass Mfg. Company headquarters, and by Harry G. Haft, of the New York Branch.

COFFMAN IN CHARGE

A. B. Coffman is in charge of the forces at the American Wood Rim Company's attractive booth. General Superintendent O. K. Snyder is also on hand. The Caminade type of French racing rim is the center of interest.

BROWN ON THE JOB

Sales Manager Fred Brown is assisted by H. G. Pauer of the Pierce sales force at the exhibit of the Pierce Cycle Co.

A BUSY QUARTET

R. W. Sieberling and H. Watring are doing the honors for the Indiana Rubber & Insulated Wire Company, while right next door are C. R. Wagner and J. E. Makowka, who are presenting the Sturmey-Archer three speed hub for bicycles for the Cycle Manufacturing & Supply Company.

DEMONSTRATING FOR BOSCH

Advertising Manager Al. S. Bartsch, with Messrs. Brown, Norman, Gruener, Furrer and Swanstrom are demonstrating the Bosch line of apparatus to show visitors for the Bosch Magneto Company.

TALKING CHAINOLENE

D. A. Quinn and C. G. Wirick are showing something new in the way of a chain lubricant at the booth of the Chainolene Company, of Chicago. The lubricant is especially adapted for roller chains.

SHOWING EXIDE BATTERIES

J. T. Peyton and T. F. Clarke are holding down the job of question answerers for the Electric Storage Battery Company's display of Exide accumulators.

LIVE SCHRADER STAFF

Maximilian C. Schweinert and H. Tisné of A. Schrader's Son, Inc., did not arrive until Tuesday afternoon, the exhibit in the meantime being in charge of J. Baihim and M. D. Bendel. Schrader and Twitchell tire gauges and Schrader valves are shown.

STEVENS FORCE

Louis Schwab, E. C. Huntington, Paul Rink and W. H. Kyte are doing the honors for Stevens & Company, of New York. Special interest attaches to the display of Stevens parts, assortments for dealers and the 20th Century line of lamps.

CHAIN TOOL FOR CAILLET

A revised edition of the Peerless chain tool is shown by Clyde C. Caillet at the booth of Caillet Brothers. The new implement is considerably stronger than before and has great leverage to facilitate removal of chain rivets. It's price remains at $1.

FEATURING CHAINOLENE, NEW LUBRICANT AND SUPERIOR SADDLES

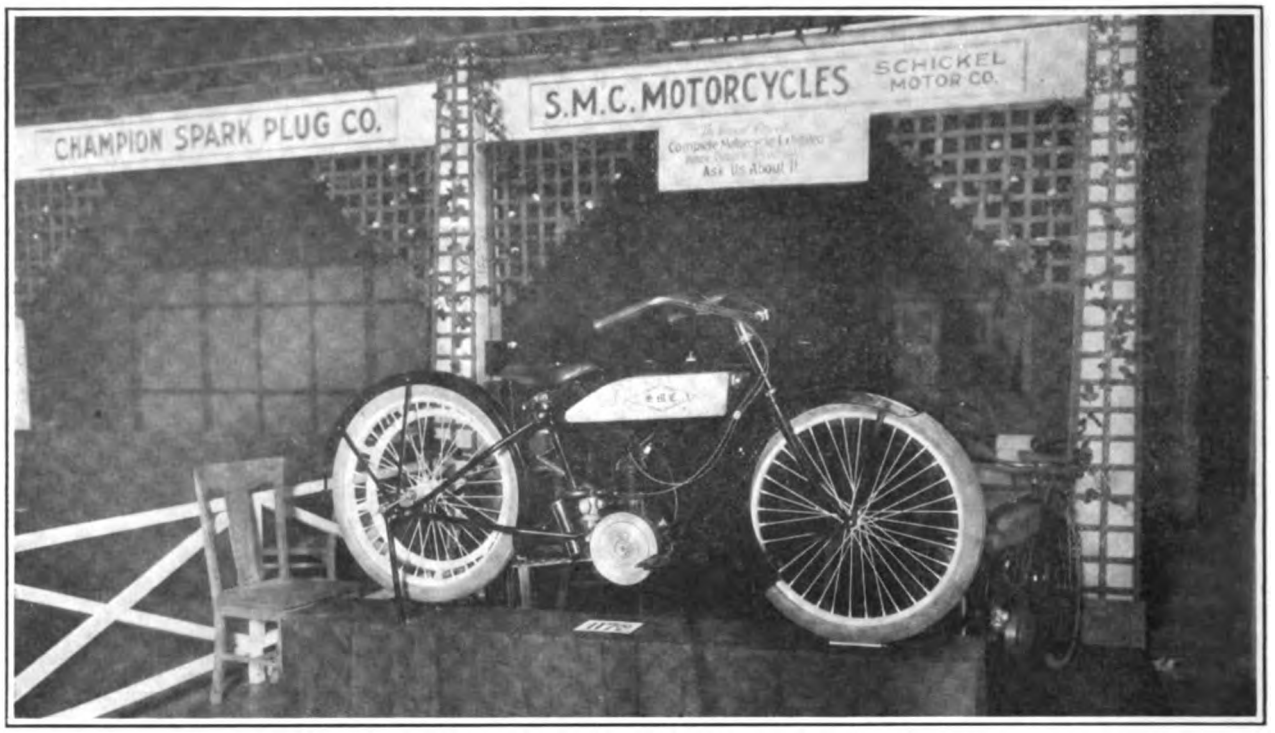
HOW THE SPOTLIGHT WAS FOCUSSED ON THE SCHICKEL BOOTH



ELWOOD AT REMY STAND

Remy Electric Company products are explained by J. L. Elwood, assisted by several of the firm's electrical sharps.

CROWDS AT EMBLEM STAND

Fred P. Ames and R. F. Cunleff are assisting Manager W. G. Schack in pointing out the good points and exclusive features of the Emblem lightweight motorcycle and the full line of bicycles at the stand of the Emblem Manufacturing Company. This stand is the first to catch the eye of the visitor entering the Coliseum and the crowd that collects is keeping the Angola trio busy—and then some.

MICALITE EXHIBIT

Joseph V. Buegeleisen, of the firm of Strauss & Buegeleisen, New York, is displaying all the newness of the Micalite goggle line. Micalite goggles of non-inflammable material are now made in folding models, while the line has been increased by the addition of a combination pyralin and glass goggle that effectively protects the eyes.

MOSSBERG SHOWS TOOLS

E. W. Scott, of Hastings & Anderson,, Chicago representatives, is looking after matters at the stand of the Frank Mossberg Company. Mossberg wrenches and tools occupy most of the space.

WANT EMERSON'S APPLES

Considerable interest was aroused by the announcement that apples from W. F. Emerson's farm would be distributed at the booth of the Buffalo Metal Goods Company, and as soon as the many friends of the genial "Bill" got the news they hustled around and placed their names on the "apple list."

CHASE'S CONTEST INTERESTS

A contest started by Frank Chase, who has just joined the Atherton brake forces, is the cause of much enthusiasm. Each exhibitor is given a chance to guess the total number of miles registered at the end of the week by cyclometers attached to three bicycle wheels free to be spun by show visitors. Messrs. Kittle, McKennett and Lawson are helping President Emerson and Chase to point out features of contest and Atherton brake, also the broad gauge dealers' policy.

INDIAN TRIBE NUMEROUS

Powerplus and Lightwin features and virtues are being ably set forth by General Manager F. J. Weschler, Sales Manager E. M. Jackson and Advertising Manager John Priest of the Indian staff. George Sherman, Howard O'Brien, J. McNaughton, Z. Godin, M. Seidell, Iwin Jacobs, Gilbertson, Bernard, Reichert and McFadden, as well as a score of Indian dealers are assisting them. Chief Engineer Oscar Hedstrom is expected to attend later in the week.

DISPLAYING OKAY MOTOR ATTACHMENTS AND STURMEY-ARCHER HUB

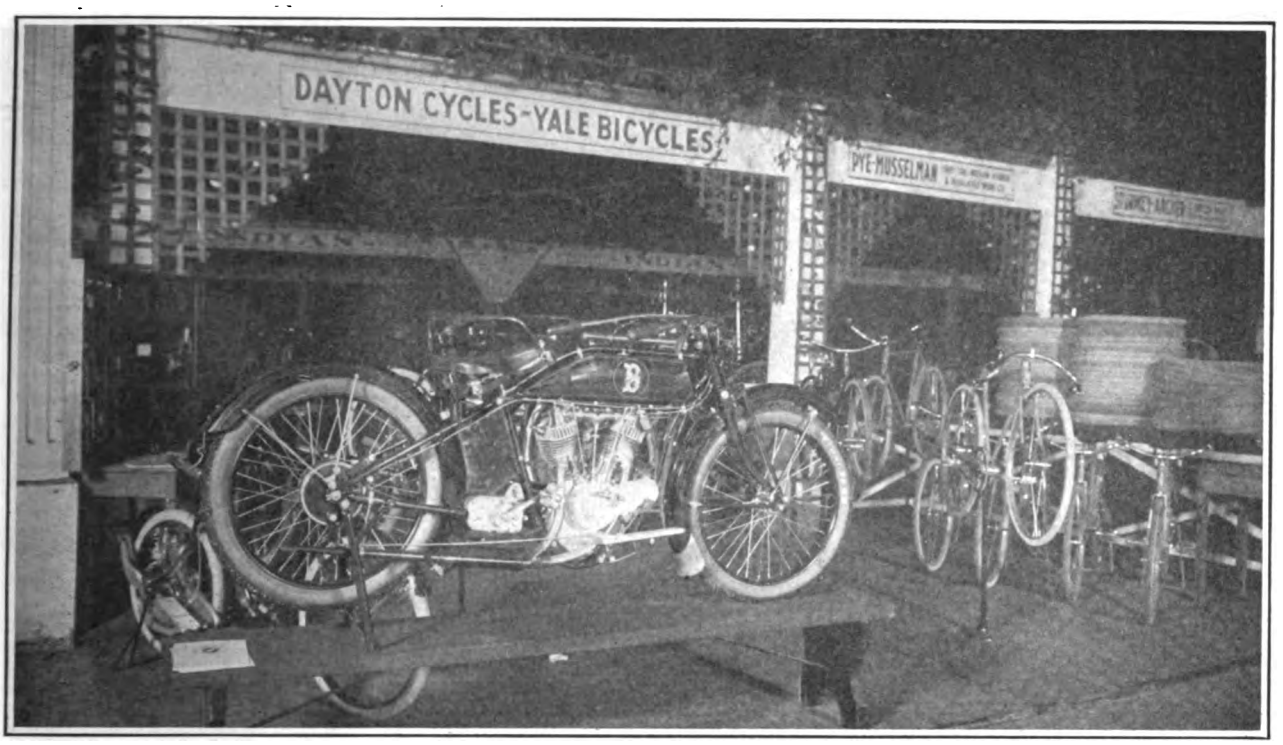
A COMPLETE LINEUP OF THE DAYTON OFFERINGS FOR THE NEW SEASON



BOOSTING FOR STANWELD

At the Standard Welding Company's exhibit are "Stanweld" Andy Stengle, Jack Manternach, B. W. Gilbert, Bert Quayle and Ben Dodge. Despite the increase in the production way in excess of the anticipated demand, the Stanweld people are pointing with pride to the fact that they have satisfied every customer during the past season.

WARM WELCOME AT DAYTON

Dayton handshakes are being bestowed on visitors to the Davis Sewing Machine Company's space by Sales Manager H. M. Huffman, Advertising Manager S. H. Ankeney, R. K. Larsh, W. A. Harland, S. H. Lamb and C. W. Zeley. Mr. Huffman did not get into Chicago until Tuesday morning, but he made up in characteristic style for the time lost by going his rounds and meeting the trade folks.

AT EDWARDS-CRIST STAND

H. N. Kirk of the Edwards-Crist Mfg. Co. was busy all this morning "dolling up" an impressive exhibit embracing a full line of Edwards-Crist bicycles and bicycle and motorcycle fitments. The wheels shown range in price from $30 to $45, and for the most part are finished in black and white.

Kirk is ably assisted at the booth by H. G. Pruett, C. E. Wilson, L. C. Davis and F. J. Kimper.

HENDERSON PRESIDES

T. W. Henderson just back from his coast trip, was the most prominent figure at the Henderson booth when the show opened. T. W. had much to say regarding his trip with but little time to say it for when the Henderson booth visitors were not holding his attention, Mrs. Henderson was.

Others at the Henderson booth on the opening night were A. O. Lemon and Paul Bailey; W. G. Henderson, designer, is expected later in the week.

SHOWING SCHEBLER FEATURES

George T. Briggs and Mechanical Expert Okey are doing the honors at the booth of the Wheeler-Schebler Carbureter Co. The new model Schebler with readily adustable tension device on the auxilary air inlet is what they are showing to the inquisitive ones. This takes the name of the model H, the same as in 1916 and previous seasons.

POWSAT PRESIDES FOR WALD

E. W. Powsat entertains visitors at the booth of the Wald Mfg. Co., Sheboygan, Wis. Only in the minutest details is the Wald tandem line different from the designs of last year although quite a few new mudguards for bicycles are offered. The changes are in the shapes and colors chiefly.

SUPERIOR EXHIBIT

Motorcycle and bicycle saddles, toolbags and like goods are on view at the stand of the Superior Metal Products Company, H. G. Davison overseeing matters there.

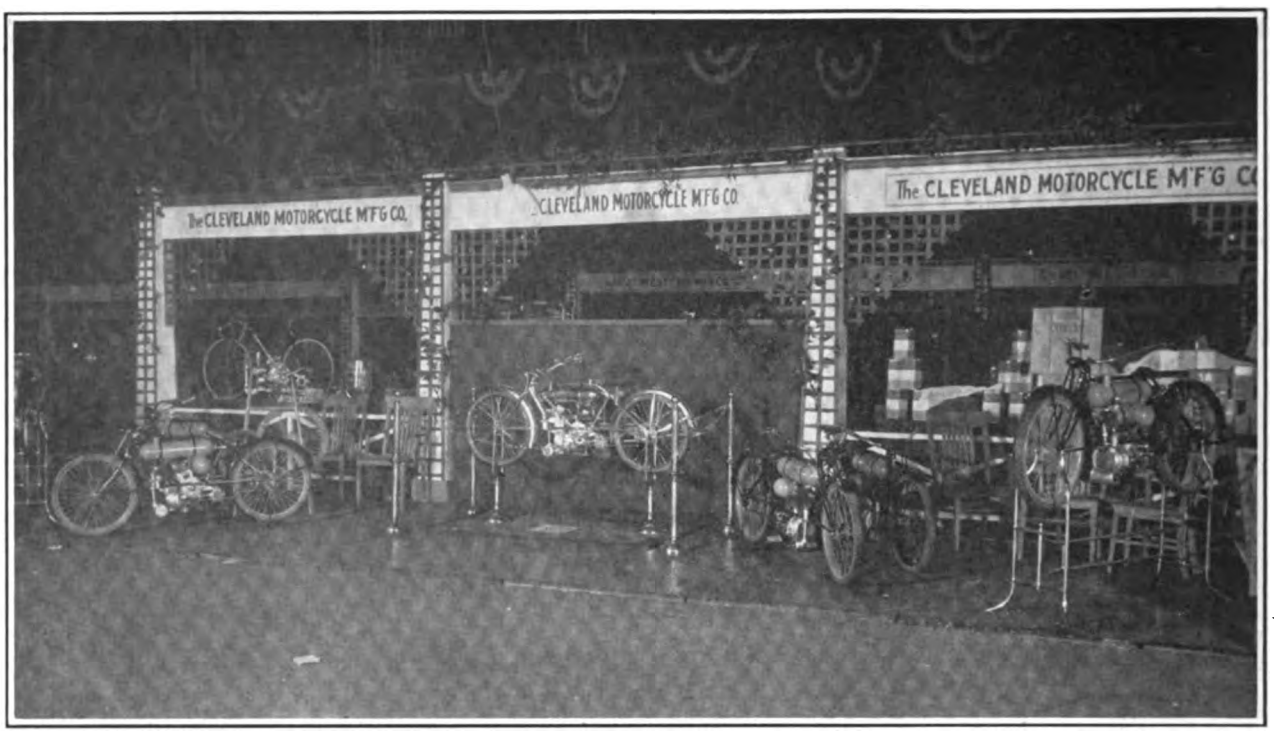
THE NEAT FLOCK OF CLEVELAND LIGHTWEIGHTS THAT GREETED SHOW VISITORS



SPLITDORF SPEED

Dan Walls and His Lieutenants First to Complete Their Booth

CHICAGO, Nov. 14.—The Splitdorf booth was the first one ready. Dan Walls, ably assisted by H. W. Scholl, got in early on Sunday morning and bent right to the task and had the exhibit finished up in style in no time.

Others at the Splitdorf booth are M. E. Toepel, W. E. Finch, W. J. St. Onge, W. J. Carroll and E. A. Curtis.

The exhibit comprises the full Splitdorf line with emphasis on the Dixie magneto and the Magdynamo. Its novelty consists of a whole series of the different makes of motors to which the Splitdorf products are applied, showing the installation.

NOVELTIES FROM MESINGER

New Mesinger saddle offerings include a new Auto-Cushion model for motorbike wheels and a trio of export types, which Fred Mesinger explained to all and sundry. The fact that the Air-Cushion model has been adapted to fit all 1917 models, including the Indian motorcycle, and that all Mesinger suspension models are now fitted with specially tanned red leather are facts which the lone representative of the H. & F. Mesinger Mfg. Co. speaks of with pride. Henry Mesinger will be on hand later in the week.

HARLEY-DAVIDSON STAFF

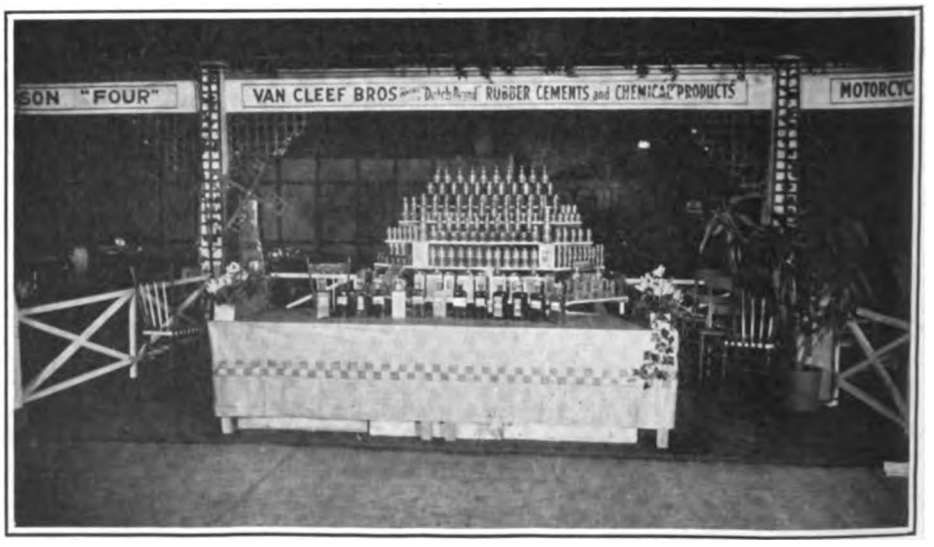
Headed by Sales Manager Arthur Davidson, an extensive aggregation representing all factory departments held forth at the stand of the Harley-Davidson Motor Company. Assistant Sales Manager E. J. Mueller; F. B. Rodger, head of Dealers' Service Bureau; Joseph Kilbert, service department; W. E. Kleimenhagen, Western sales correspondent; T. A. Miller, Eastern sales correspondent; Arthur Herrington, special sales correspondent; H. W. Hascall, parts department; William Ottoway, engineering department; Miss Lillian Hauerwas and Miss Fanny Miller are on hand from the Milwaukee works. Stand attendants are Hap. Scherer, I. W. Schroeder, Frank Egloff, F. H. Simon, Austin W. Burges, R. F. Ray and E. R. Durkee.

In the course of the week President Walter Davidson, Chief Engineer W. S. Harley, Works Manager William A. Davidson, Shop Superintendent George Nortman, and Production Manager J. J. Balsom will be on hand, as well as August Frey, purchasing agent; Advertising Manager S. Lacy Crolius; Hugh Sharp, assistant advertising manager; Jes Campbell, Boston branch manager; Gus Castle, Atlanta branch manager; O. P. T. Daenitz and Fred Steirhoff, salesmen.

PERSONS AND MAJESTIC SHARE

C. A. Sawyer, sales manager for the Persons Mfg. Co., and O. A. Jones, who holds the same title with the Majestic Mfg. Co., shared a booth and between them offered for approval a comprehensive line of both motorcycle and bicycle saddles, tool bags, pedals, carriers and other fitments.

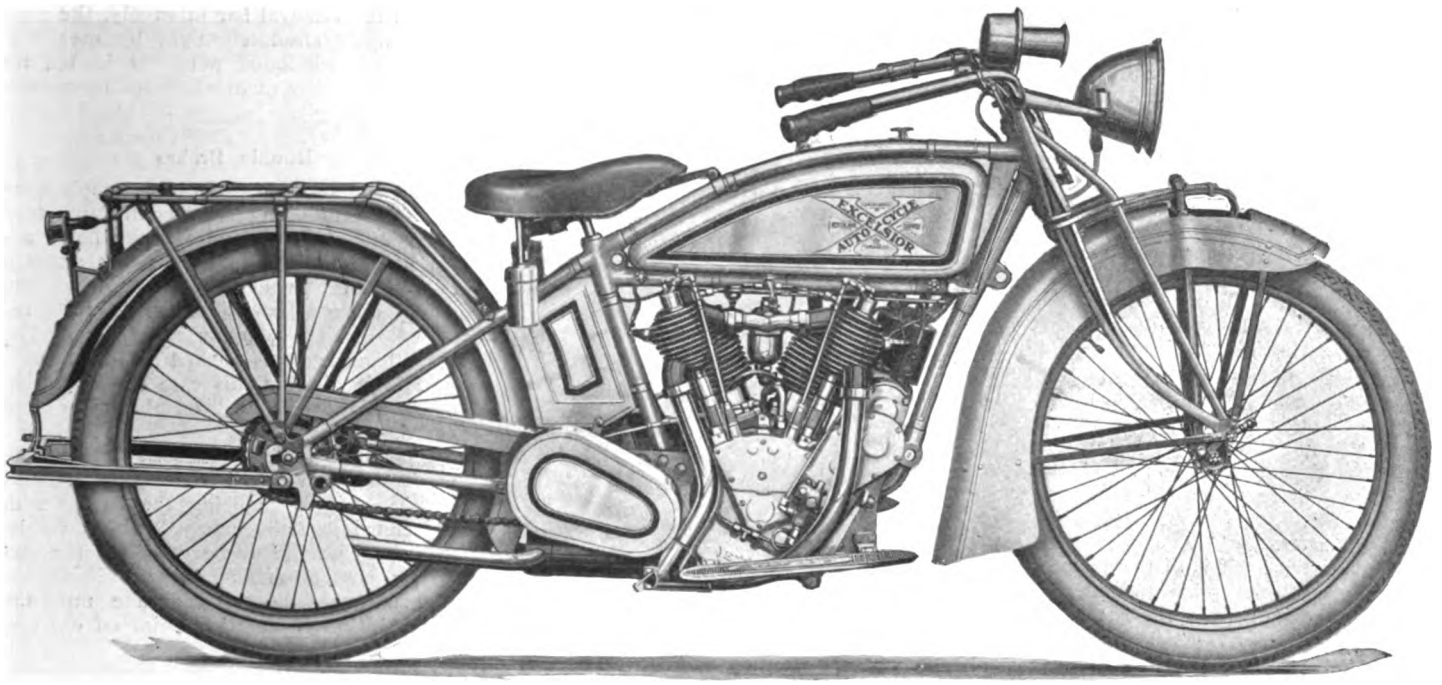
ATTRACTIVE DISPLAY OF DUTCH BRAND PRODUCTS—THE VAN CLEEF STAND



Digitized by Google

REMOVABLE FRAME BAR ON EXCELSIOR

Three-Speed Twin Heading New Series Is Fitted with Improved Mudguard Brace Arrangement, Modified Cam Gear, and New Sidecar Lug — Lightweight Has Kick Starter and Folding Footboards—Olive Drab Finish



Right Side of Model 18-3E Electrically-Equipped Twin Fitted With Big Valve Motor and Flange-Connected Carbureter—Note Ample Guards

CHICAGO, Nov. 13.—A revised three-speed twin model selling for $275 in the regular form and $310 in the electrically equipped style, and a brand new edition of the Excelsior two-cycle lightweight selling at $140 make up the "newness" of the Excelsior motorcycle line offered for approval when the doors opened on the fifth annual motorcycle, bicycle and accessory show at the Coliseum tonight.

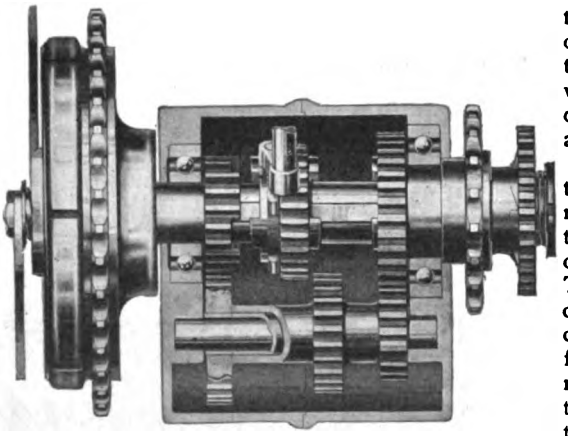
The most prominent features of the new heavyweight twin Excelsior model are the new military color of olive drab; the use of a removable brace-bar on the frame, permitting the removal of the cylinders of the motor without disturbing the motor in the frame of the machine; the fitment of a new sidecar lug on the lower end of the drop tube facilitating the attachment of the passenger-carrying equipment, the use of a new rear mudguard stay system permitting ready removal of the rear wheel; and the fitment of "padded" mudguards as a means of obtaining a closer approximation of perfect silence.

Big Valve Motor

Practically all of the well known features that have characterized the good old "X" in the past have been retained on the new model. The same big valve motor, with only such minor improvements as are calculated to make it even smoother and sweeter in action and more powerful than it has been heretofore is the unit around which the Model 18 machines have been built.

One feature worthy of special note on the Excelsior motor is the cam arrangement, both intake and exhaust cams being built in a single piece on opposite sides of a cam gear, thereby doing away with any possible shift and consequental alteration in the timing of the motor.

The cam gear is mounted over the main shaft and driven from it by means of a pinion. A single rocker arm of drop-forged nickel steel suffices for the operation of both inlet and exhaust valves without the necessity of intervening small parts such as pawls and jumpers. This construction not only makes for simplicity and silence, but reduces wear to a point that is negligible. Silence is further assured by the full enclosure of both inlet and exhaust valve tappets.



Section of Three-Speed Gearset

On the regular model, ignition is effected, by means of a high tension magneto as a matter of course, Bosch, Dixie and Berling magnetos being used by the Excelsior folk. On the electrically-equipped model both the lighting current and the ignition current is furnished by the Midco lighting and ignition system with which the Excelsior models are fitted, the system having proven itself right up to the mark in every respect during the past year.

Mechanical Oiling

Lubrication is effected through the intermediary of a gear driven mechanical oiler driven from the magneto drive train. The pump is of the plunger type with variable stroke for the regulation of the oil supply to suit weather, oil and motor conditions.

The pump delivers a supply of oil that is increased in proportion to the motor speed, so that the motor at all times receives just the proper amount of lubrication for the work it is doing. The oil is delivered half to the front cylinder and the remainder to the crankcase insuring perfect distribution to the friction surfaces without flooding the rear cylinder. The crankcase oil is distributed by the splash system to all of the motor bearings the breather carrying over a supply which is directed on the short motor chain insuring its perfect lubrication at all times.

Flanged Connection

The Schebler carburetor is no longer screwed to the inlet manifold as heretofore, but following automobile practice, attaches by means of a triangular flange connection with three screws and an asbestos gasket between the two flanges. This method insures its ready removal and replacement when need be and facilitates the maintainance of a gas-tight joint between the manifold and the carburetor.

Digitized by Google

The automatic compression release, so interconnected with the kick starter that the compression is released instantly the starter pedal is given a downward kick, has been found so gratifying to Excelsior riders during the past season that it is continued practically as first offered on the new models. This device insures the dropping of the exhaust valves just at the proper time in the stroke of the starter to insure ready starting.

Starting Device

The arrangement consists of a properly shaped cam attaching to the motor starter shaft. Bearing on the cam is a jumper pivoted at the other end and attaching to a tie rod which reaches back and effects the opening and closing of the compression release mechanism. Just when the starter begins to bite, the cam comes into play and releases the compression. As the starter nears the end of its stroke and the motor has obtained its maximum rotary speed, the cam releases the jumper and the compression is thrown on again just at the proper instant. It requires not the slightest thought on the part of the operator; no knack is needed to insure starting of the Excelsior motor at every kick of the starter.

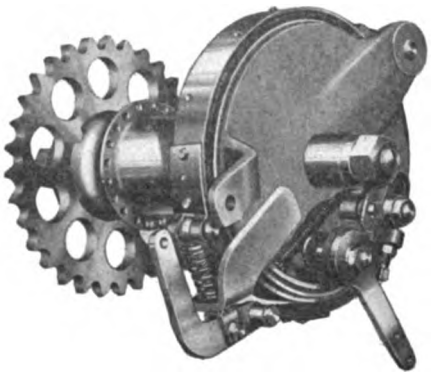
The starter itself is of the gear and segment type, the lever being of the back-acting type positioned on the left side of the machine and readily reached for operation from the saddle. It is fitted with a neat little pedal which folds out of the way when not in actual use. The clutch is of the multiple-disc type carried on the countershaft in unit form with the three-speed gear. There are two distinct means of clutch control. There is a pedal actuated release, the pedal being situated on the left footboard while the handlebar release with the left grip serving for the clutch control which has long been a distinctive Excelsior feature is retained on the new models.

Three-Speed Gear

The three speed gear of the automobile type is continued in the new models without a single change, none having been found necessary. The motor drive to the countershaft is on the left side, but from the three speed to the rear wheel it is on the right side, the arrangement having some advantage in that it brings the driver chain in closer to the large ball bearings on the main shaft of the gearset and eliminates many strains that would otherwise be set up.

Gear Shift Control

The gear shift control is by means of a tank lever positioned handy to the operator at the left and operating in an index quadrant of generous proportions. The control connections are made direct with as few joints and points of wear as it is possible to have and is so interlocked with the clutch control that it is impossible to shift the gears with the clutch engaged. Thus all chance of the new rider ruining his gears by a bad shift is eliminated.



Double Brake Equipment on 18-3 Twin

Removable Brace-Bar

The new Excelsior frame construction is being specially emphasized by the factory folk. No matter how careful a rider is the motor is sure to carbonize in time, and then nothing suffices for the thorough cleansing of the motor interior save the removal of the cylinders and scraping. With the old type of frame it was necessary to remove the motor from the frame before either cylinder could be taken off.

In the new frame arrangement the brace bar of the frame, instead of being continuous all the way across, is held securely in place by a lug arrangement so that it is readily removable, giving free access to the cylinders. There are split lugs on the frame into which the tension lugs on the end of the removal bar fit snugly, the joint being made absolutely tight by means of bolts and castellated nuts. It is but the matter of a few moments work to remove the bar entirely.

Double Brakes

The double brakes of the automobile internal expanding, external contracting type are continued, the service brake being actuated by the same foot lever that actuates the clutch; further depression of the clutch lever after the clutch is fully released, serving to apply the brake. The outer band brake is applied by means of a foot lever also, in this case the operating pedal being positioned on the right foot board.

By the use of the service brake, the mechanism is relieved of the great strains which come of applying the brake with the clutch partially engaged which results in damage sooner or later. With the Excelsior control arrangement it is impossible to apply the service brake until the clutch is fully released, a point of extreme importance.

Mudguard Stays

A detail that has been worked out to a nicety by the Excelsior engineers and one which will appeal strongly to the rider is the rear mudguard stay arrangement. The stays have been moved forward to such a position that when the machine is on the stand, the rear wheel can be rolled out without the slightest interference either by the mudguard or the stays. At the same time, the rear end of the mudguard is well braced against vibration.

The new Excelsior color is a military olive drab just far enough removed from the ordinary drab color to add materially

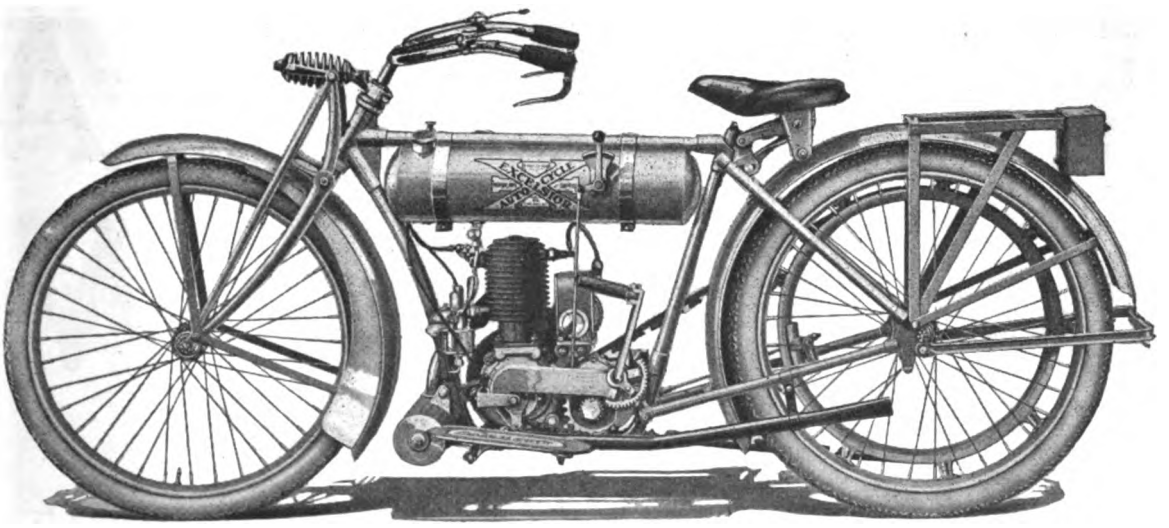
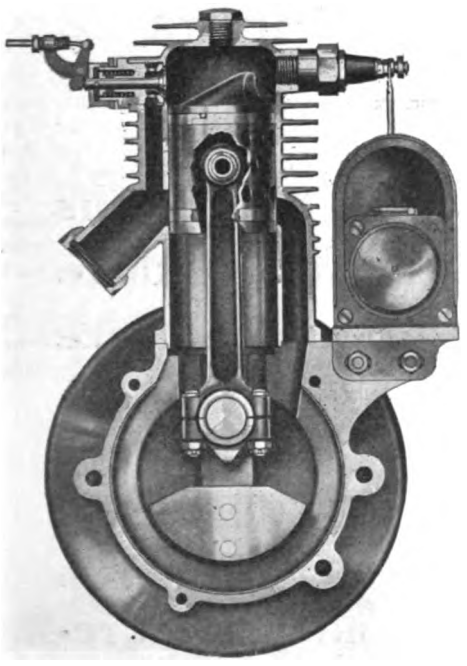
Digitized by Google



Excelsior Two-Stroke Lightweight Which Is Now Fitted With Kick Starter. Two-Speed Gear and Combination Drive Standard Equipment, With Disc Clutch. Note Gear-shift Lever on Tank

to the distinctive appearance of the machine. The machine is given a high finish and its appearance greatly enhanced by a deep green striping which blends perfectly with the olive drab color.

Making for greater silence is the three-ply clutch housing and chain guard, a layer of asbestos being inserted between two metal shells to eliminate the last trace of booming or rattle. Another minor point is found in the addition of a fourth side car lug so that the sidecar in the case of



Sectional View of Excelsior Two-Stroke Motor of Three-Port Type

the Excelsior when once attached becomes in reality part and parcel of the machine and not a mere attachment. At the same time it can be removed quickly and without half the trouble entailed by the old attachment method whereby clamps were used to establish the connection.

It is on the lightweight model, however, that the biggest of the Excelsior changes is found. The two-stroke valveless motor is continued without alteration. Ignition is by means of an armored magneto and the mixture is supplied through the intermediary of a specially designed Schebler carburetor. The muffler is an aluminum expansion chamber so designed as to effectively silence the exhaust without, however, adding appreciably to the back pressure which, with a two-stroke motor, is a matter of considerable importance.

Two-Speed Lightweight

The lightweight is a two-speed model, the gearset being of the sliding dog clutch type, the control being vested this year in a direct connected gear-lever on the left side of the machine instead of the ramshorn handlebar lever as was used last year.

The greatest changes in the lightweight design are the fitment of a disc clutch directly on the motorshaft and the addition of a kick-starter of the gear and segment type. This is to all intents and purposes identical save as to size with the starter applied to the heavyweight Excelsior offerings. Clutch operation is by means of a grip lever on the left handlebar.

The model has been made even more comfortable than heretofore by the addition of long footboards in place of the simple foot-rests formerly used and like the larger Excelsior models has been finished in the military drab color that characterized the Excelsior line for the coming season.

The new light model sells at $140 as against $135 for the model offered last. The series 17 lightweight, exactly the same as the last year's model except for the military drab color is now offered at $125.

The Excelsior line is shod with Pennsylvania Vacuum cup tires, Firestone Non Skids or Goodyear Blue Streaks; Midco lighting and ignition system and Bosch, Berling and Dixie magnetos are used; Benford spark plugs; Solar lamps; Schebler carburetor and Mesinger air cushion saddles.

FIRESTONE CHANGES

Haws Heads Cycle Tire and Speaks Truck Sales—Lindeman Moved

AKRON, O., Nov. 14.—Henry E. Haws has been appointed manager of the cycle tire department of the Firestone Tire & Rubber Company. He succeeds Charles E. Speaks, who will manage truck tire sales.

C. B. Lindeman is now in charge of the creative division of the Firestone advertising department. He will take up the work of L. G. Fairbanks, who is now Eastern district manager.

More Brevities from the Show

KRAMER'S WHEEL AT PIERCE

The identical wheel on which Champion Frank Kramer clinched his title last season is the piece de resistance at the stand of the Pierce Cycle Company. The full line of Pierce bicycles is to be seen, stress being laid on the new Boy's Racer model and on the Kramer racer with new form of forksides.

NEW BAR FOR KELLY

Charles E. Weaver, the veteran, with Fred Dangler is showing Kelly adjustable handlebars, as well as the new No. 7 stem-combined adjustable and reversible bar. The Kelly Handlebar Company exhibit is a popular one and draws much favorable comment.

A-K SHOWS NEW BIKE SIGNAL

A new bicycle warning signal made its bow at the booth of the Angsten-Koch Company when the doors of the show opened. In addition to the new one, the full line of A-K horns, tandems and bicycle lighting systems are on display, with H. W. Angsten, N. H. Oliver and N. A. Young greeting the visitors who gave the booth a call.

HAS LIQUID VENEER

For the fellow who wants a clean machine at all times the Buffalo Specialty Company is showing a liquid veneer. This is to be sprayed on the enameled surfaces of the machine and removes the dirt, leaving a high polish. Neverleak tire fluid and other specialties made by this company are also on display.

EXTENSIVE DIAMOND LINE

Motorcycle and bicycle chains in a complete line are featured at the booth of the Diamond Chain & Manufacturing Company, the line ranging from that for a racing bicycle to that for the heaviest motorcycle service. S. C. Hurley, the Chicago representative is in charge of the booth.

ood Names Are Staked

EVERY part of the Excelsior Autocycle must do its share in upholding the good name of the manufacturers.

When the Excelsior Motor Mfg. & Supply Co. decided to equip the Excelsior with Goodyear Blue Streak Tires they selected tires they *knew* would never cast the smallest lingering doubt upon the Excelsior or the judgment of its manufacturers.

They staked their good name upon Goodyear Blue Streaks.

Just as the Goodyear Tire & Rubber Company have pledged their word that these tires will live up to the reputation enjoyed by the Excelsior Autocycle—that they will wear well, look well and act well at all times—that they will never betray the confidence placed in them—that they will serve faithfully under all conditions.

And so are two good names staked upon the ability of Goodyear Blue Streaks to render you satisfactory service—at all times, in all places.

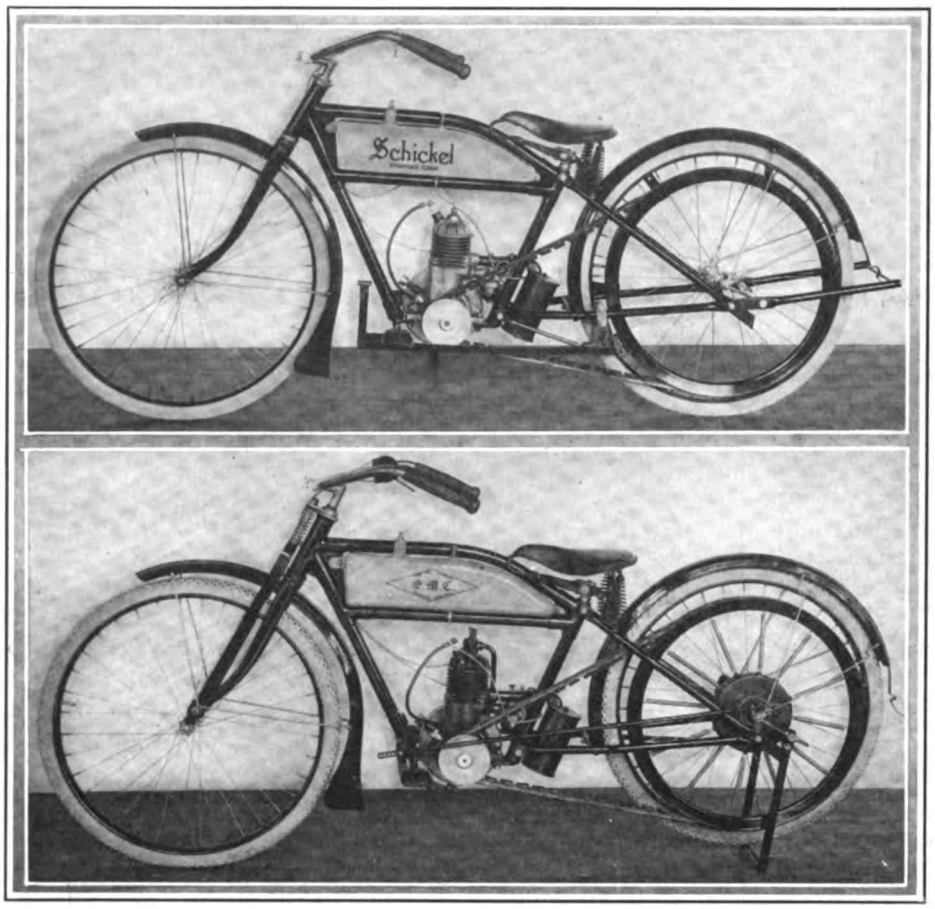
SCHICKEL INCREASES CAPITAL TO $100,000

Pioneer Manufacturer of Two-Stroke in this Country Obtains Big Additional Resources for 1917—Barzaghi Becomes Treasurer—Four Models for New Season Include Complete Commer-Speed Machine, Which Will Be Produced in Quantity



Top, Schickel Single Speed; Below, Two-Speed S. M. C. Model with Spring Fork —Planetary Gearset Is in Rear Hub

STAMFORD, Conn., Nov. 9.—Papers have just been filed with the Secretary of State in Hartford for the increase of the capital of the Schickel Motor Company from $10,000 to $100,000. The $90,000 increase in stock has all been subscribed and paid for in full.

Following the increased capitalization of the company, an election of officers was held, the results being as follows: Norbert H. Schickel, president; Bruno Benziger, secretary, and Arthur J. Barzaghi, treasurer. Mr. Barzaghi assumes the office formerly held by Mr. Schickel.

Barzaghi's Experience

In assuming charge of the finances of the Schickel Motor Company the new treasurer brings to the organization an experience of several years in construction equipment work, and in purchasing as head of the firm of Barzaghi-Vought, Inc., of New York. He has severed his connection with the latter company to devote all his attention to the Schickel interests.

With the advent of Mr. Barzaghi the Schickel Motor Company has a trio of enthusiasts in the lightweight, both at present and for the future. Mr. Barzaghi, who is a graduate of Cornell in Civil Engineering, only affiliated himself with the firm after a careful and thorough investigation of the proposition from the engineering as well as from the sales viewpoints.

Arrangements have just been completed to take on additional land and erect buildings to care for the increased production which has been planned. It is the intention of the company to be running on a production schedule of 3,500 machines per annum by January 1, 1917.

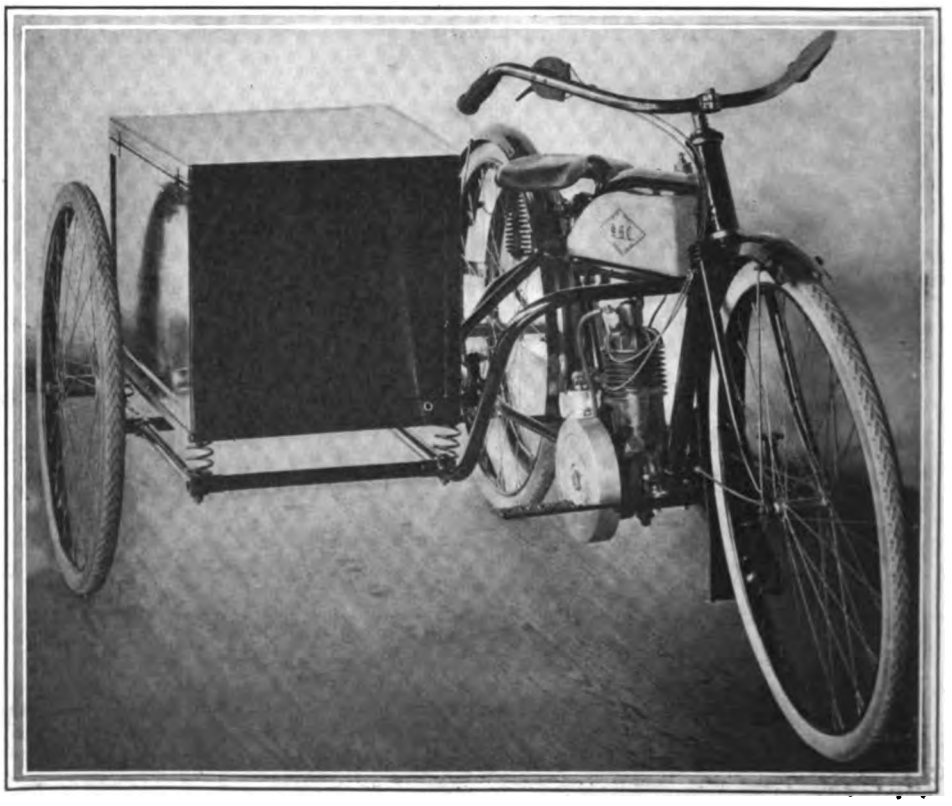
For the 1917 season, the Schickel Motor Company announces four models: S. M. C. Lightweight with two-speed gear and spring fork, $129; S. M. C. Lightweight, single speed, with 26-inch wheels, $114; S. M. C. Commercial, a light-weight with two-speed gear and spring fork, side delivery van attached, $154; Schickel single speed, $109.

New Name Is S. M. C.

The company states that in the future its machines will be known as the "S. M. C." instead of "Schickel" as heretofore.

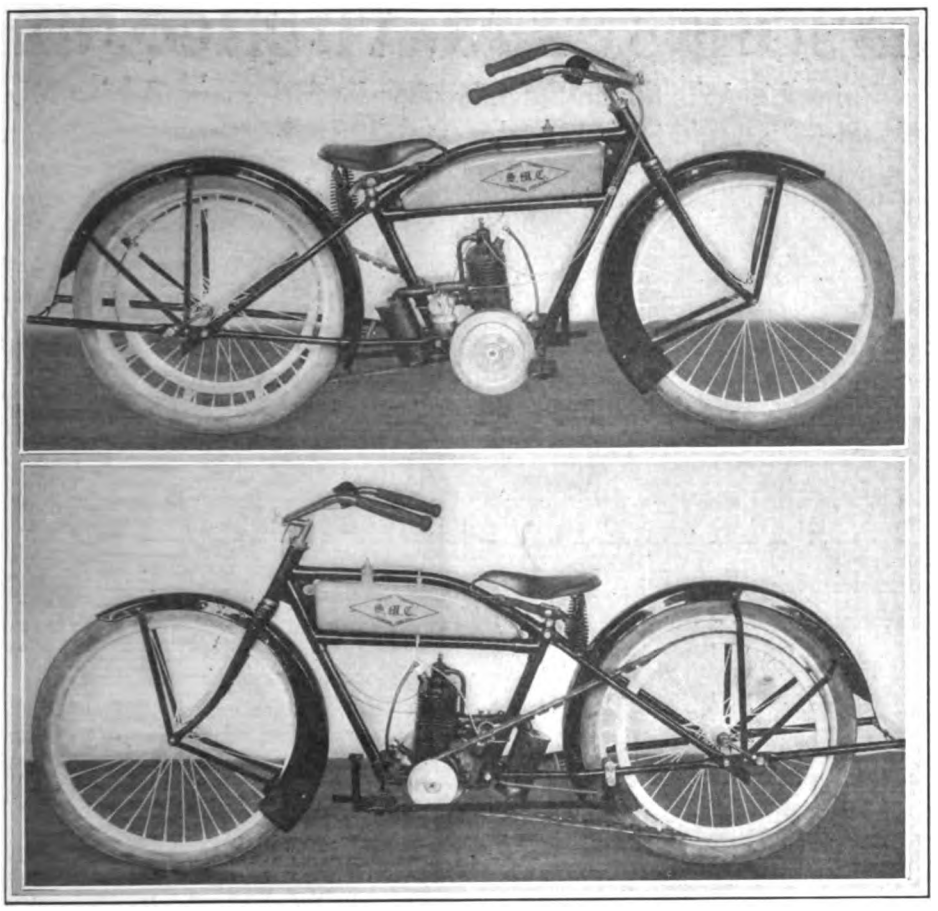
The S. M. C. Lightweight with two-speed gear and spring fork is changed in many respects from its single-speed predecessor of 1916. The two-speed gear is of the hub type, actuated by a rocker pedal close to the left footrest. The spring fork is similar to that used on Schickel lightweights in the past season. It is of the direct-acting type with spiral springs absorbing shock and recoil.

The control on this model is by double-acting wire mechanism, one lever being



Schickel Commercial Model with Sidevan Having Sprung Body and New Control

Digitized by Google



Top, Right Side of S. M. C. Lightweight With 26 Inch Wheels and Handlebar Control; Below, the Same Machine Seen From the Left, Depicting V-Belt Drive

fitted. This lever controls the compression release when moved in one direction, and the throttle when moved in the opposite one. The drive on this machine is direct, V-belt being used. The belt rim is suspended by a series of coil springs from the shell of the two-speed hub, so that a flexible drive is obtained. The price is $129.

The S. M. C. Lightweight with single speed is similar to the 1916 Schickel in many respects. It has the magneto-in-flywheel construction, induction lubrication and block brake features of this line, among others the double-acting wire control is fitted. The wheels are 26 inches in diameter with 2¼ inch tires. The finish on this model will be white enamel rims, spokes and hubs, the guards, frame and fork being black. No spring fork is fitted to this model. The price is $114.

Commercial Outfit

The S. M. C. Commercial outfit, listing at $154, consists of a two-speed model with spring fork, having a delivery van attached at the side. The van wheel is shod with the same size of tire as the motorcycle, the body being carried by four spiral springs, one at each corner. The cover of the body is hinged at the top right. The body is made water-proof throughout. Three-point connection is used for the chassis. The van is finished to correspond with the motorcycle.

The regular single speed $109 model at present bears the "Schickel" name plate. This is the direct successor of the Schickel Lightweight of the past season and incorporates all the characteristic features of that model. It carries 28x1⅜-inch tires.

General Sales Manager Hopkins, who took charge of Schickel sales some six months ago, anticipates a record showing for the new S. M. C. line for 1917. "If the results of the past few months, under the rather adverse conditions as to limited production and lack of deliveries, are any criterion," says the genial head of the sales end, "the 1917 season will be a record-breaker."

Since opening the export office at 47 Broadway, New York, in charge of J. E. Sitterley, the Schickel folks have found foreign business most gratifying. Shipments have gone out to practically every foreign country where motorcycles are used.

SNAPPY ISSUE

From Firestone Treats of Sales Convention at Akron

UNDOUBTEDLY the snappiest and largest issue of *The Firestone* is that dealing with the tenth annual sales convention of the Firestone Tire & Rubber Company at Akron. This issue, dated November, 1916, has an attractive cover in the Firestone colors, red and black, depicting the stage and the hall and various other scenes at the convention.

The entire staff of sales representatives are shown on the center pages. The Van Buren Sisters who recently completed a transcontinental trip on Firestone tires are given a well illustrated page. The rest of the issue is given up to convention and trade activities.

WILCOX VICTOR AT MECKLENBURG FAIR

Indian Rider Bags All First Places in Fast Meet—Wilson and Castles Each Get Second Places

CHARLOTTE, N. C., Nov. 10.—Ed. Wilcox, of Atlanta, riding a four-valve Indian, accounted for all four of the races held on the local half-mile track today. His time for the five-mile event was 5:57, while for the 10 miles, which followed, it was 12:47. Wilcox covered the 15 miles of the next race in 18:55, while the feature 20 mile race was won by him in 25:27.

Earl Castles, Harley-Davidson, came second in the five-mile opening event, and John Wilson, Indian, was third. Both Castles and Wilson piloted four-valve mounts. In the 10-mile race, Wilson came second and Castles third. In the 15-mile event Wilson again took second place, with Harry Glenn, four-valve Indian, third. Wilson took second money in the 20-mile feature, with Glenn again third. The meet was held in connection with the annual Mecklenburg fair.

EXPLAINING LACY'S SMILE

MILWAUKEE, Wis.—The very newest attraction in Milwaukee motorcycle circles is Janet Edna Crolius. She arrived on election day and is the daughter of Mr. and Mrs. Lacy Crolius. She tipped the scales at 7½ pounds and is the first Crolius baby. In addition to being the proud father of Janet Edna, Mr. Crolius is advertising manager of the Harley-Davidson Motor Co., and president of the Advertisers' Club of Milwaukee.

CREVISTON AND JOHNS STAR AT PHOENIX

"Crevvy" Wins F. A. M. Hour Championship While Don Sets New Marks for One and Five Miles at State Fair Meet—Both on Indians—Kinney Is Third

PHOENIX, Ariz., Nov. 14.—Ray Creviston on his Indian won the F. A. M. hour professional championship by covering 73¼ miles in the 60 minutes at the Arizona State Fair meet yesterday. The former record was 69¼ miles, made by Glenn Stokes at Bakersfield, Cal. Morty Graves, Indian, was second, with 72 miles, while Dave Kinney was third, scarcely three feet behind Graves. Fourth position went to Glen Stokes, Excelsior.

Don Johns, riding his Indian, set a new mark for five miles in the open event, covering the distance in 3:58. In the mile time trials, Johns made the lap in 57 2/5 seconds on the first attempt, but cut this to 47 seconds flat on the next try. Creviston's time in the trials was 57 1/5. Johns' figure for the mile constitutes a new record for a mile horse track—47 seconds.

Creviston took second place to Johns' winning position in the five-mile open, which started the meet. Kinney was third. In the ten-mile open race, Johns won, with Kinney second and Stokes, Excelsior, third. Time, 8:12 3/5.

In the hour championship, Creviston got $250, also the F. A. M. medal going to the winner of this event. His machine was fitted with Bosch magneto, Mesinger saddle, Goodyear Blue Streak tires and Duckworth chains. Don Johns' Indian was similarly equipped, as was Stokes' Excelsior.

ARTLEY WINS SPRINGERVILLE-PHOENIX

San Diego Indian Rider Comes Home First in Two-Day Desert Journey—Bedell, on Indian, Second and Wolter, Excelsior, Third—Troubles En Route

PHOENIX, Ariz., Nov. 12.—The Springerville-Phoenix road race, 441 miles in two days, mostly over desert route, was won by Roy Artley, on an Indian, in 13 hours 2 minutes 2 seconds. Alan T. Bedell, also on an Indian, took second place, and Joe Wolter, Excelsior, was in third position. Jack Dodds, Indian, was fourth.

Artley, on his Powerplus, left Springerville at 8 a. m. Two minutes later, Harry Crandall, Indian, set off on the journey toward Phoenix. Jack Dodd went next after another two-minute interval, using an Indian. Wolter on the Excelsior followed and R. J. Orput, of Phoenix, on a Harley-Davidson, was despatched at 8:08. In succession came Alan T. Bedell, of Flagstaff, Indian; Arguile Davis, Phoenix, Excelsior; E. G. Baker, Indianapolis, Indian, and A. Meacham, Excelsior.

Artley Reaches Flagstaff

Artley arrived at Flagstaff, the first control at 1:38, followed by Bedell at 1:40 and Crandall at 2 p. m. Dodds came in at 3:34. Wolters checked in at 3:50 p. m., being delayed by punctures. Orput broke his forks shortly after the start and was forced to withdraw.

A spill by Crandall near Winslow resulted in Baker locking his back wheel and twisting his frame in trying to avoid the fallen Phoenix rider. Baker suffered an injury to his leg, and withdrew from the contest. Crandall's frame was broken by this fall and he abandoned the run.

Artley left Flagstaff at 7:02 a. m. on the second day and reached Phoenix at 2:24½ p. m. His time was 12:02:02, averaging 34 miles per hour. Bedell, leaving Flagstaff two minutes after Artley, arrived in Phoenix at 3:31, taking 14:03 for the run. He had a bad spill, resulting in a cut requiring six stitches to close it, but continued and took second position.

Wolter left Flagstaff at 7:10 p. m. and reached Phoenix at 4:34. His time was 17:08. The punctures of the previous day cut his score badly. Davis had tire and spoke trouble, but finshed, although very late. Meacham was out at Winslow, having wrecked his machine in a desperate effort to catch the leaders.

The road conditions were bad, especially between Prescott and Phoenix, a distance of 101 miles. The total distance of the run was close to 424 miles.

Roy Artley used a Powerplus twin Indian, shod with Goodyear Blue Streaks. He used Duckworth chains, Mesinger Air-Cushion saddle. Bedell's Indian had the same equipment. Joe Wolter's Excelsior was likewise fitted with Goodyear Blue Streak tires, Duckworth chains and Mesinger saddle.

WELL-KNOWN HOUSE CHANGES ITS NAME

New York Sporting Goods Co. Will Hereafter Be Known as Baker, Murray & Imbrie, Inc.; New Selling Policy

NEW YORK, Nov. 14.—A report that the New York Sporting Goods Co. was to change its name was confirmed yesterday by President F. A. Baker, who stated that steps are now being taken to reincorporate under the name of Baker, Murray and Imbrie, Inc.

"We all of us feel," said Mr. Baker, "that we want our firm designated in a way that will individualize it more and carry to a greater degree the feeling of human personalities.

"Now that Abbey & Imbrie have joined with us, we have three men working closely together and our business procedure has been so arranged that each man is identified with the line which best represents his knowledge and experience."

Three Divisions

Three distinct operating divisions will be maintained—F. A. Baker and Co., New York Sporting Goods Co. and Abbey & Imbrie.

The men most closely identified with these organizations when they were separate enterprises in the past are, respectively, F. A. Baker, James E. Murray and Andrew Imbrie. The Abbey & Imbrie personnel has not been affected by the recent consolidation, as the total force has been kept intact.

One of the first things that has resulted from the change is a more firmly defined selling policy which has eliminated the mail-order business.

"It will cost us an appreciable sum to cut away from our mail-order business," explained Treasurer Murray. "This phase of our selling was expanding all the time and could have, undoubtedly, been developed into big volume. Besides, the added value of having our name known to mail-order purchasers throughout the United States meant a great deal from the point of view of national advertising. Nevertheless, we think that we will eventually be better off by protecting our dealers. We have no desire to sell them goods, only to turn around and then sell their customers by mail. In other words we want our dealers to have all the retail profits to which their own localities entitles them. Baker, Murray and Imbrie, Inc., will retail at their New York store only."

Big Road Force

Fifteen men are now on the road selling the extensive Baker, Murray and Imbrie, Inc., lines.

The growth of this concern has been a truly remarkable one. Each year for the past three or four years has seen some big step made ahead, similar to the last one which involved the taking over of the old and well-established Abbey & Imbrie fishing tackle business.

From Mr. Murray's office, where the interviewer sat, a view could be had of the new motorcycle and bicycle store across Warren street at No. 10. A new, shiny Baker, Murray and Imbrie, Inc., sign had just been swung into place.

"I've thought in terms of the New York Sporting Goods Co. for twenty years," said Mr. Murray, smiling reminiscently, "and of course the old name is bound to stir some pretty deep feelings in me. But the new name carries a tremendous significance, too. It is, I believe, the forerunner of absolute leadership in the American distributing trade. And on top of that you cannot grow without—without—well, without growing!"

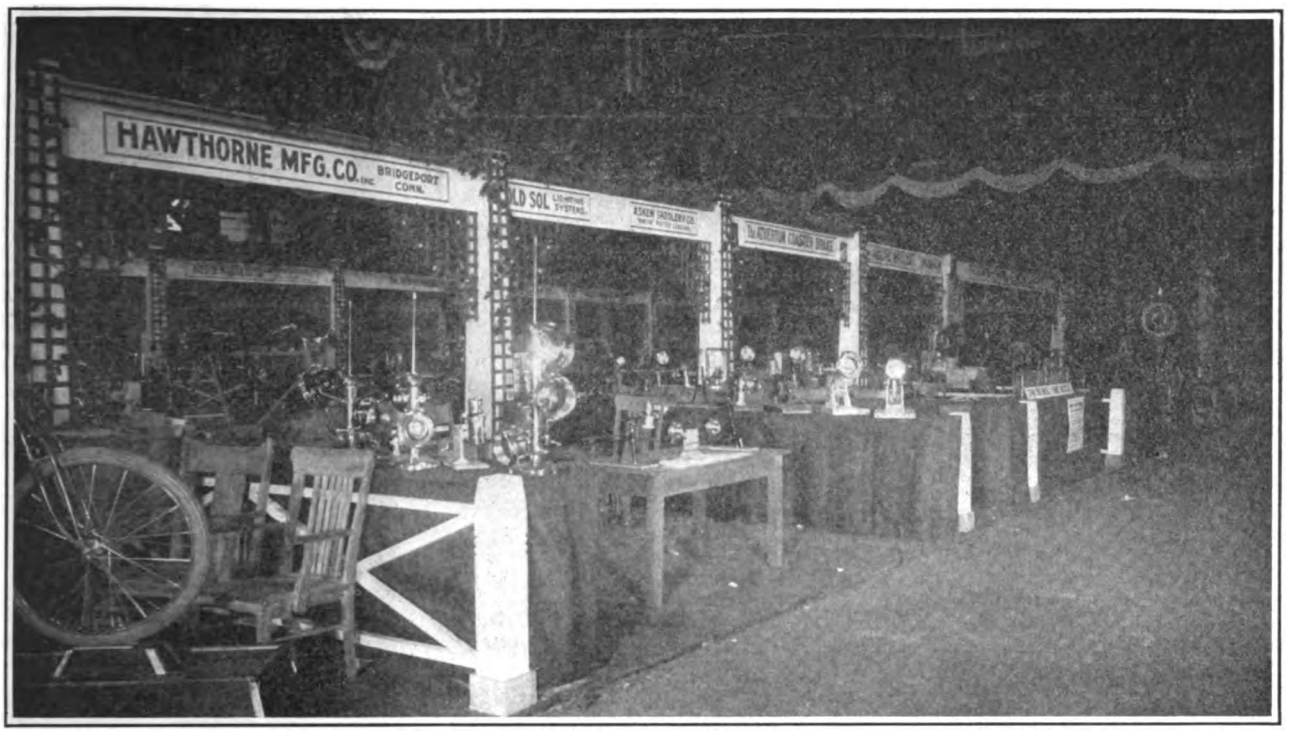
HAWTHORNE, BUFFALO METAL GOODS AND REEPS MFG. CO. STANDS



STOLL CHANGES FEW

There are so few changes in the well known Stoll line of tandems that M. Walter Stoll, representing the Denver firm of the Stoll Manufacturing Company, has a difficult time finding them. Such minor improvements as have been made are in the way of detail changes making for greater comfort and durability. The principles on which the Stoll line and reputation have been built in past seasons have not been changed in the slightest.

VIM AND FORSYTHE FORCES

H. W. Georger and F. J. Goodman are taking care of affairs at the booth of the Vim Cycle Hardware Company until the arrival later in the week of President John Henry. H. N. Rose, of the Forsythe Metal Goods Company, is in charge of the exhibit of that firm which is housed at the same stand. Mr. Rose is showing some new bicycle tires and fitments of a very attractive kind.

WHERE BOSCH, NEW DEPARTURE AND KELLY PRODUCTS ATTRACTED SHOW CROWDS

LINE UP DEALERS FOR SERVICE CENTERS

In Three-Day Conference at Factory Harley-Davidson Motor Co. Presents Plan to Give Special Co-operation Through Agents in Forty Strategically-Located Cities

MILWAUKEE, Wis., Nov. 13.—The most important announcement along business-building lines that has been made by the Harley-Davidson Motor Co. preliminary to the formal opening of the 1917 campaign has just been given in a three-day convention attended by dealers from forty geographical locations which have been selected by the company for service centers.

The new service policy has for its purpose a wider and at the same time more intensive distribution of the parts and repair business of the Harley-Davidson company, and the dealers throughout the country who are presiding over the service centers will have the active co-operation of the Service Department at the factory.

What Idea Is

In outlining the object of the convention Assistant Sales Manager E. J. Mueller, who had charge of the successful institution of the service center plan, said: "The service center idea is simply the latest and most significant development of the Harley-Davidson policy to give top-notch co-operation on a national basis to both dealer and rider. Our branches have given excellent results, but in such a vast territory as the United States it is necessary to have a still broader service system if the best possible returns are to be obtained.

"It was after long and careful study of the situation that we decided upon the service center plan. Then we selected the cities in which the system is to be operated, with painstaking regard for geographical and other conditions, and when that point was reached we were ready to hold our conference with the dealers."

Those Who Attended

A clear idea of the scope of the present movement will be gained from the list of dealers in attendance at the convention. They lined up as follows: W. Morrison and Walter Andrews, Toronto, Ont.; Bob Sayre, Appeal Mfg. & Jobbing Company, Los Angeles and San Francisco, Cal.; Carl Aurich, Aurich & Curtis, Billings, Mont.; Carl W. Bush and wife, Carl W. Bush Company, Newark, N. J.; H. L. Dipple, Indianapolis, Ind.; E. F. Drouhard and August Drouhard, Drouhard Motor Company, Danville, Kans.; G. H. Taylor, Enterprise Motor & Cycle Company, Oklahoma City, Okla.; Chas. W. Miller, Falls City Cycle Company, Spokane, Wash.; S. C. Hamilton, Pittsburgh, Pa.; C. K. McClanahan, Harley-Davidson Sales Company, Dallas, Tex.; Geo. E. Wood, Harley-Davidson Sales Company, New York City; P. I. Haynes, P. I. Haynes & Company, Columbus, Ohio; Roy and Harvey Heagy, Heagy Bros., Harrisburg, Pa.; Bert Heinz, Heinz Motor Company, Baltimore, Md.; Norman Hopper and wife, House of Hopper, Salt Lake City, Utah; Alexander Klein, Philadelphia, Pa.; H. G. and P. H. Kline, Kline Bros. Motor Company, Louisville, Ky.; C. H. Lang, Chicago, Ill.; Bill Lister, Lister Motorcycle Company, Cleveland, Ohio; P. L. Abbott, Motorcycle & Supply Company, Portland, Ore.; A. R. Oberwegner, Oberwegner Motor Company, Toledo, Ohio; G. H. Schmidt, Oliver Cycle & Motor Company, St. Louis, Mo.; Otto Peters, H. L. Peters Company, Buffalo, N. Y.; Geo. Pot-

Dealers Face the Camera Outside Harley-Davidson Factory Preparatory to Meeting

ter, Potter Company, Syracuse, N. Y.; Victor H. Roos, Omaha, Nebr.; Irwin Keller, Shawnee Cycle Company, Topeka, Kans.; Chas. H. Siems, Fargo, N. D.; A. P. Tyler, Boise, Idaho; Geo. Helwig, W. E. Wandersee Company, Detroit, Mich.; Guy W. Webb, Minneapolis, Minn.; W. W. Whiting, Denver, Colo.; Chas. E. Wilcox and wife, Sioux City, Iowa; J. L. Murray, Western Motorcycle Company, Kansas City, Mo.; August Zimmerman, Washington, D. C.; Chas. Schnepfe, Delaware Cycle Company, Wilmington, Del.; Geo. Wagner, Wagner-Dolph Company, Inc., Rochester, N. Y.

"Get Acquainted" Day

The first day of the conference with the dealers was called "Get Acquainted Day." After the formal address of welcome by President Walter Davidson, and the introduction of the various heads of departments, special Harley-Davidson motion picture films were shown. Later there was music by the Harley-Davidson orchestra.

"Down to Business" was the slogan for the second day. The details and purposes of the new service center plan were fully explained by Hiram W. Hascall, head of the parts and accessory department, and the "Relation of the repair and adjustment divisions to the special service centers" was discussed by Joseph Kilbert, head of the service division.

W. D. Isham, credit manager, had for his topic "The relation of the credit department to special service centers," and E. B. Elsner, office manager, talked on "Accounting and other systems for service centers." "The relation of the dealer department to special service centers" furnished the basis for an instructive talk by Frank B. Rodger, of the dealer department, and "Modern salesmanship" was the theme of an address by W. F. Dunlap, of Klau-Von Pietersom-Dunlap, Inc.

Interesting Lectures

Advertising Manager Lacy Crolius discussed the "1917 advertising campaign"; O. Grigg, of the supply department, had for his topic "What to do with our advertising literature"; W. E. Kleimenhagen, western correspondent, talked on "Preparedness"; Art Herrington, now of the foreign division, gave some pointers on "Commercial business," and H. W. Hascall spoke interestingly of the policy and scope of the company's accessory department.

One of the significant features of the conference was a talk by T. A. Miller, eastern correspondent, concerning the sidecar as an asset for increased motorcycle sales by the dealer. He pointed out that Harley-Davidson sidecar sales showed a 315 per cent. increase in 1916 over the previous two years' time.

Davidson on Sales

The third day of the conference brought a continuation of the business sessions and had as one of its features an interesting talk by Sales Manager Arthur Davidson in which he outlined the policy to be followed in marketing the new Harley-Davidson bicycle line. Later Hal Miller, the company's bicycle correspondent, talked on detailed specifications of construction and equipment of the bicycle line, and Credit Manager Isham discussed the terms to be observed in handling the new pedal products.

Other addresses on the third day were made by Lacy Crolius, "Advertising from the dealer's viewpoint"; William Ottaway, of the engineering department, "Motorcycle oil"; Arthur Davidson, "Reminiscences of the industry." The evening's session was given up to talks on the Splitdorf magneto, by M. Toepel, of the Splitdorf Electrical Co.; the Exide battery, by H. M. Beck, of the Electric Storage Battery Co., and the Remy generator, by Edward Kieckbusch, of the Harley-Davidson engineering staff.

The convention closed with a bowling party. Most of the dealers in attendance at the convention stayed over in Milwaukee on Sunday and left for Chicago on Monday morning to attend the National Show.

FABRIC PLANT

In Connecticut Taken Over by Goodyear-New Co. Formed

AKRON, O.—The Goodyear Tire & Rubber Company has taken over the plant and business of the Killingly Mfg. Co., Killingly, Conn., maker of cotton tire fabrics, and has incorporated that firm as the Goodyear Cotton Mills, Inc. The incorporators are Francis Seiberling, Fred Miller and Harold Hutchins, the capital stock being $5,000,000.

By this move, the Goodyear folks get control over one of the sources of cotton tire fabric. The plant, which has been operated as a fabric mill for several years, will have its output doubled for 1917.

1917 HENDERSON IN DENVER

DENVER, Colo., Nov. 14.—The 1917 Henderson motorcycle has appeared on the Denver streets. The Rocky Mountain Motor Company, agent for the Henderson, is busy at the present time demonstrating the latest model of their machines.

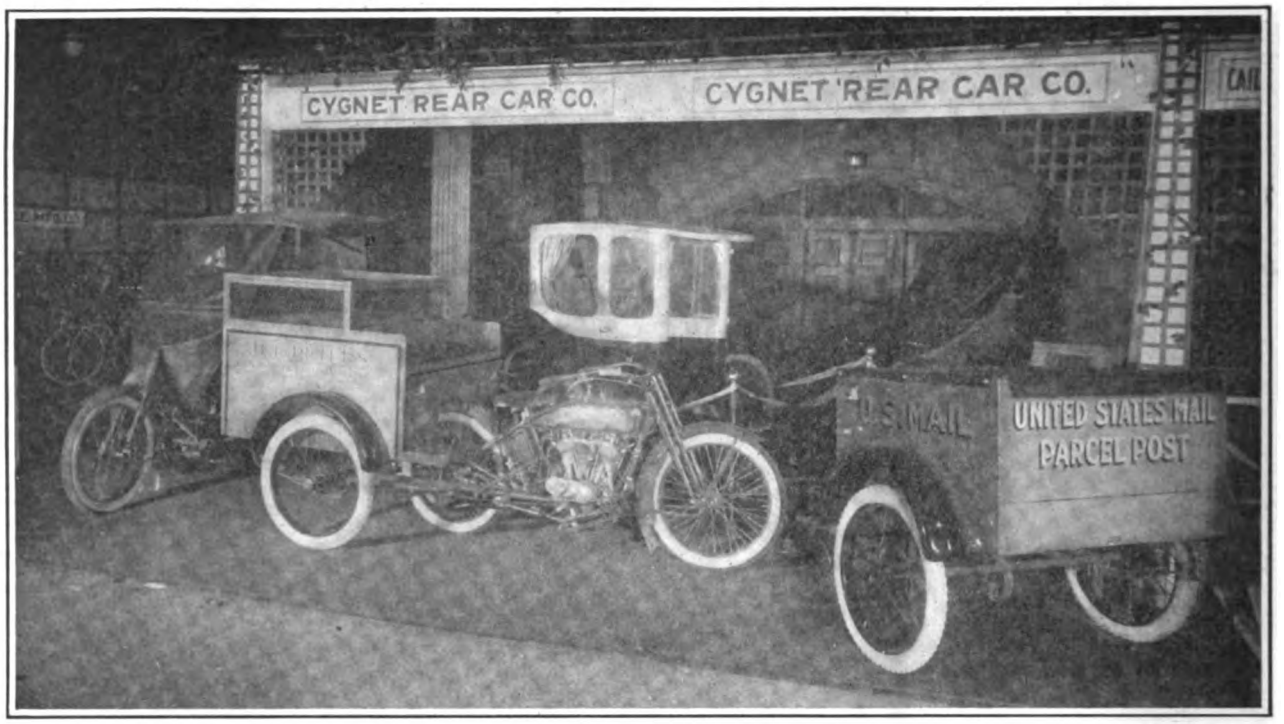
DEPICTING RANGE OF CYGNET REAR CAR MODELS—LIMOUSINE IN CENTER



OLD SOL MEN HAPPY

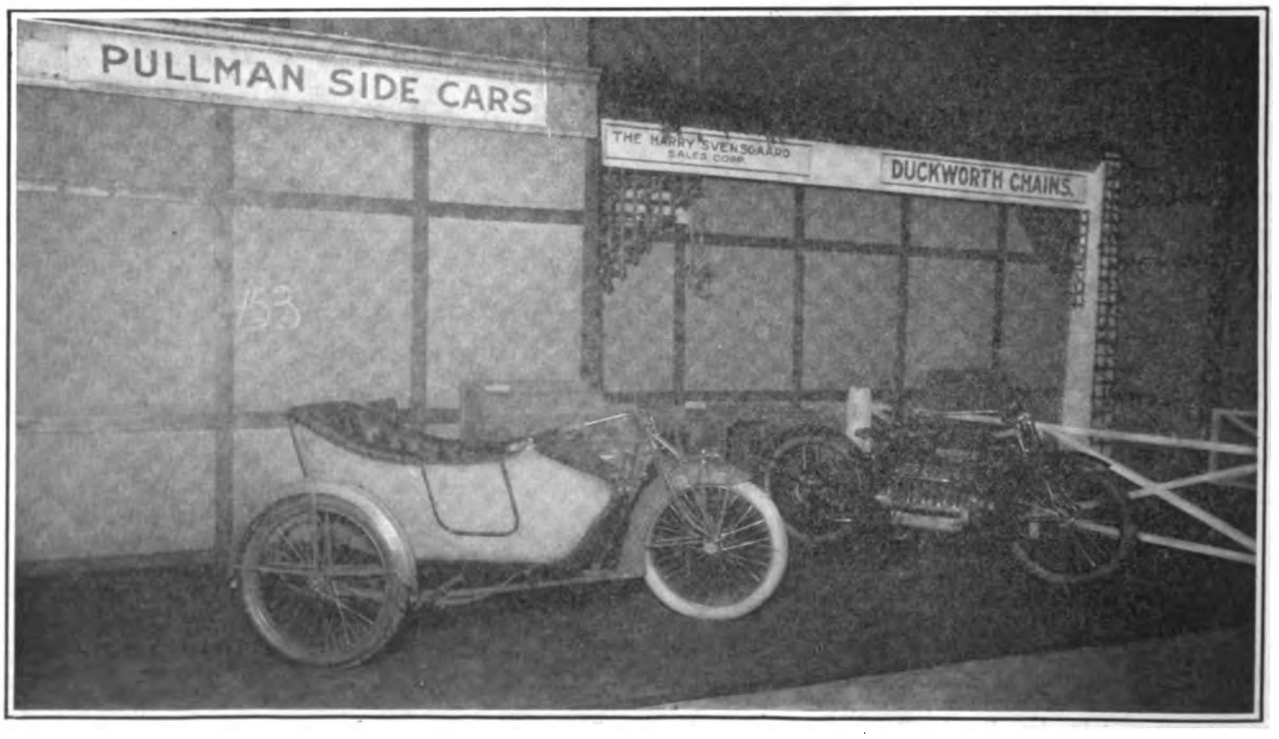
It's a stout, smiling happy trio that stands behind the Old Sol counter and beams on the interested observer. With many of the largest motorcycle makers supplying the Old Sol, Hornlite Salesmanager E. Horace's always buoyant disposition has been augmented, if possible, and his happy frame of mind is reflected in his coworkers, W. A. Prince and Floyd West. There are several new models of Old Sol battery bicycle lighting systems on view varying in price from $1 75 to $3.25 as well as the complete Old Sol line of both motorcycle and bicycle lighting fitments and apparatus.

KOKOMO CHANGES FEW

Such newness as characterizes the Kokomo tire line is ably pointed out to the interested one by Lon Spraker and F. H. Brown.

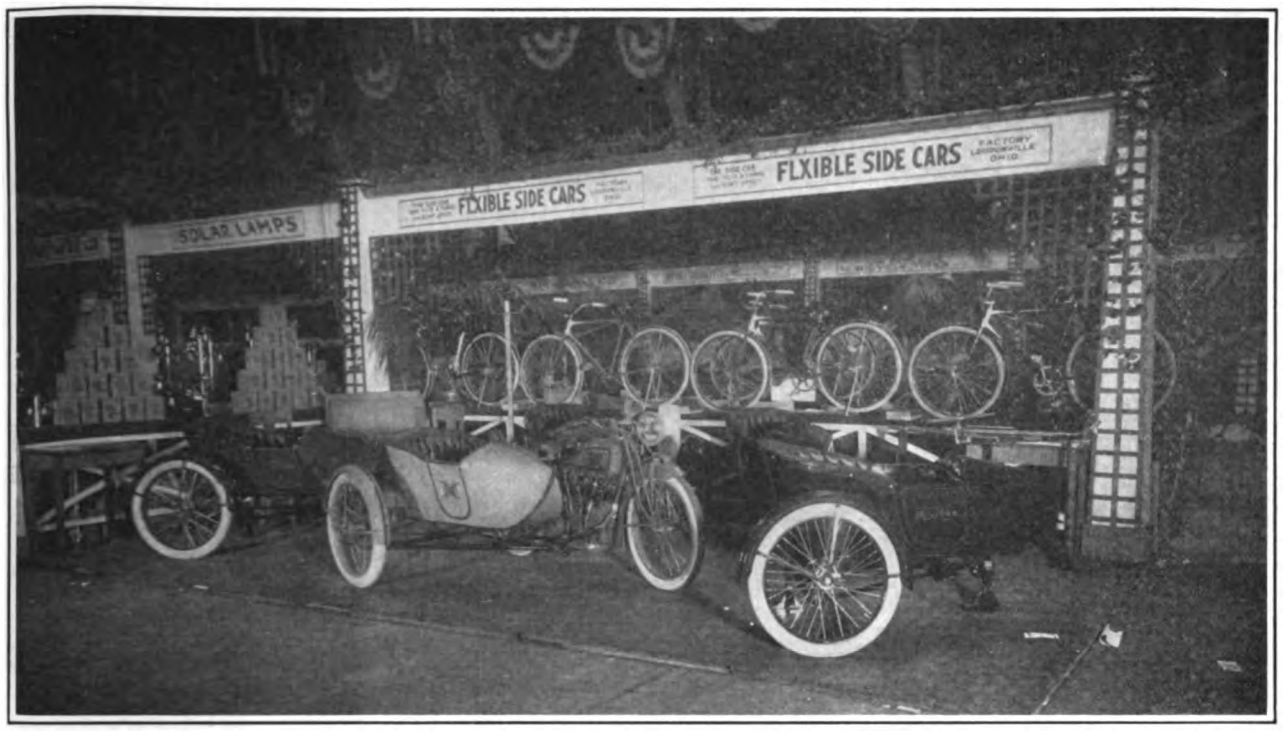
It is made plain, however, by this able duo, that the Kokomo line remains substantially the same as last year and that it is in the merest details only that it has been found possible to improve the famous brands of tires.

COACH-BUILT SIDECARS OF HIGH QUALITY SHOWN AT PULLMAN BOOTH



Digitized by Google

THE NEW FLXIBLE SIDECARS WERE SHOWN IN VARIOUS ATTRACTIVE FINISHES



CHARTER OAK MEET NOV. 30

HARTFORD, Conn.—A professional motorcycle race meet will be held at Charter Oak Park on Nov. 30, Thanksgiving day. There are four motorcycle races scheduled for the event, 25, 10, 5 and 2 miles. William Leahy will ride a motorcycle against an automobile, as an added feature.

Entry blanks can be had from Joe Larkin, 4 Hamilton street, Hartford.

VISITS HARLEY-DAVIDSON

MILWAUKEE, Wis.—Carlos Alberto Sommaruga of the firm of Alberto Sommaruga, Trujillo, Peru, S. A., was a visitor at the Harley-Davidson factory recently. The principal object of his visit was to secure the sales rights for the Harley-Davidson motorcycle for Peru.

HILAMAN ORDERS TWENTY

CAMDEN, N. J.—A. L. Hilaman, handling the Dayton motor bicycle and Thor, put in an order for 20 of the front-driven little machines a few days ago. He sold nine of this model last season.

ROGERS SIDECAR STAND; THE NEW MODEL IS DESCRIBED ELSEWHERE IN THIS ISSUE

SELL C. & E. GOODS

Fulton Co. to Handle Products in Jobbing Trade

MILWAUKEE, Wis.—The Fulton Company, of 726 National avenue, this city, has taken over the selling rights for the entire output of the C. & E. Mfg. Co., of Marshalltown, Ia. This line, consisting of cut-outs and bearings, among other goods, will be distributed to the jobbing trade in Canada and the United States.

The Fulton Company will, of course, continue to market the Aermore exhaust horn, Eklips sparkplug and other of its well known products.

WOODRUFF SELLS RETAIL BUSINESS

BROOKLYN, N. Y.—Lee Woodruff announces that he has sold his sporting goods business and that hereafter all his time will be devoted to the Okay Motor Mfg. Co. The store has been taken over by the Seawanhaka Sporting Goods Co., with George H. Fischer as president.

GOODYEAR SALES $64,000,000

AKRON, O.—At the end of the fiscal year on October 31, it was estimated that the total of sales for the year made by the Goodyear Tire & Rubber Company would be close to $64,000,000. The plant has been closed for the inventory needed in preparing the annual report, to be presented December 4.

SMITH FLYER BUSINESS IS DIRECT

MILWAUKEE, Wis., Nov. 11.—The A. O. Smith Co., makers of the Smith Motor Wheel and the Smith Flyer, announce that the Flyer is being marketed through the Smith Company's motor wheel division sales department. Arrangements for a temporary Chicago office in charge of Carl Marshall had almost been completed, but the company discontinued the matter and all dealers are requested to address the A. O. Smith Co. direct.

A PROGRESSIVE TEAM

At the left appears R. J. Firestone, who has just been made vice-president of the Firestone Tire & Rubber Co., as announced in the November 9 issue of Motor Cycle Illustrated. He was formerly general sales manager. The photo at the right shows A. G. Partridge, who has succeeded Mr. Firestone as general manager of sales.

THANKSGIVING RUN

Annual Turkey Program of Providence Riders Is Arousing Interest

PROVIDENCE, R. I.—B. A. Swenson has just announced the plans for the annual Turkey Run of Providence riders, to be held November 30. The event will be staged over a 102-mile course, to Westerly and return. There will be several checking points en route. It is expected that about 50 motorcyclists will participate.

The rider returning to Providence with the highest score will receive a 25-pound live New England turkey, and there will be other awards for other high-score men. Ducks, chickens, vegetables and even lemon pies will be among the prizes. The start of the run will be made from Swenson's headquarters, 522 Broad street, at 9:30 a. m. on November 30, and an entry fee of 50 cents will be charged.

FULTON ON ANNUAL TRIP

MILWAUKEE, Wis.—S. A. Fulton, president of the Fulton Company, of 726 National avenue, this city, has just started on his annual Western trip calling on the jobbing trade in California.

HENDERSON IN CEYLON

Four-Cylinder Machine Ridden by British Army Officer on Duty in Asian Island

COAST BUSINESS

Will Be Big, Says President of Henderson Co.

LOS ANGELES, Cal.—T. W. Henderson, head of the Henderson Motorcycle Co., of Detroit, Mich., has finished his tour of the Pacific Coast in this city. He is on his way back to Chicago for the motorcycle show, covering Denver and other cities en route. Mr. Henderson put in several days in San Francisco, Portland and Seattle, and states that he never saw business conditions better there or more favorable for a big motorcycle season.

He considers general conditions are better than at any time since 1913. As for California conditions, he is more than pleased with the way Henderson distributors have lined up for the coming season. Their agency policy and missionary activity has assured the Henderson a fine representation, and initial sales indicate a big vogue for this machine in the Golden State.

INTRODUCING INDIANA TIRES

SAN FRANCISCO.—A. Freed, of the Pacific Motorcycle Supply Co., is now in Northern California, following his visit to the Los Angeles branch. He is introducing Indiana tires, the representation for which he took on his recent Eastern trip. Freed has the agency for Rogers sidecars and has a carload on the way from Chicago now. He will stock these cars for all makes of motorcycle. A big Indian shipment has just arrived.

TRAFFIC LAWS ENFORCED

COLUMBUS, O.—The new traffic ordinance, adopted by the City of Columbus a month ago, went into effect Nov. 9 Glaring headlights are now forbidden and there is a severe penalty against the use of spotlights. Safety zones are located at all prominent crossings and pedestrians are prohibited from "jay walking." Policemen are enforcing the provisions of the ordinance.

Bicycle Section

ROUGH RIDING AT BOSTON SIX-DAY FINISH

Goullet and Grenda Win Strenuous Race in the Hub—Iver Lawson Painfully Injured in Spectacular Spill—Six Riders Fall, Four Into Box Seats.

BOSTON, Mass., Nov. 12.—There have been many rough bicycle races seen in this city, but it is doubtful whether any has been as rough as the six-day race that finished at the Arena last night. The race ended with a last hour of sprints on the so-called Berlin style of finish, and there was more blood spilled than in any previous race run in this city, and there has been much gore spilled in past races.

Nine teams were tied when the last finishing sprints were started, the field practically remaining tied since the race was started.

Alfred Goullet, Who Showed Great Form in Boston Six-Day Race

On the fourth day three teams, Carman-Wiley, Sullivan-Eaton and the Lawrence Thomas pairs suffered the loss of a lap, but the referee refused to allow the lap on account of poor reliefs by the other teams. The field from that time on remained intact to the finish, although it looked as though other teams had suffered a loss of the valuable circuit, but the officials failed to take the laps away.

A sprint was staged every mile in the last hour and the big crowd that packed the building will never forget that delirious sixty minutes. Just before the start of the session of sprinting the 18 riders were all dolled up in their best racing togs, but after the fourth sprint the majority of the riders looked as though they had been through a threshing machine, and when the sprinting finished a number of the riders were looking as though they had been doing trench duty in Europe.

HOW THE TEAMS FINISHED.

	Points.
1—Goullet-Grenda	42
2—Magin-Corry	73
3—Thomas-Lawrence	82
4—Madden-Hanley	90
5—Dupuy-Kaiser	120
6—Eaton-Sullivan	137
7—Lawson-Root	164
8—Spencer-Spencer	228
9—Carman-Wiley	230

Alfred Goullet and Alfred Grenda, the ultimate winners of the race, won the first sprint, Goullet doing the sprinting, Jake Magin, of the Magin-Corry team finished second; Eddie Madden, of the Madden-Hanley team ran third and Iver Lawson, who was teamed with Root, finished fourth. Dupuy-Kaiser, Thomas-Lawrence, Spencer brothers, Sullivan-Eaton and Carman and Wiley won the other places. Grenda, Corry, Lawrence, Hanley and Lawson is the way the leaders ran in the second sprint.

Six in Big Spill

Goullet won the third sprint and Eaton rushed around to the front for the fourth when his wheel went from in under him. He brought down five other riders with him, four of them being catapulted into the boxes along the track. Grenda and Corry had the flesh on the right side of their faces torn away; Iver Lawson was torn and bruised about the face and at first it was thought he would lose his right eye, but later developments proved otherwise. Dupuy, Wiley and Hanley were cut and bruised, but with the exception of Lawson, who was rushed to the City Hospital, and Wiley, who quit the race, all others continued in the "battle."

Eight riders responded for the fifth sprint, which was won by Goullet, with Dupuy second and Root third. The sixth sprint saw Dupuy and Sullivan get knocked down. Goullet won with Corry, Thomas and Hanley following. A. Spencer won the next sprint from Eaton, Hanley and Corry. Grenda, with his right eye almost closed and blood covering most of his face, competed in this sprint. Goullet then came on and won the following sprint.

With Goullet and Grenda having a big lead in points it was apparent that they could not lose, barring an accident that would cripple the team and force them out of the race. Kaiser and Dupuy, in a desperate effort to keep in front and avoid spills, started a "jam" at the finish of the twelfth sprint, but were caught before the finish of the next sprint. The referee ordered the Spencer brothers and Madden and Hanley penalized a lap for poor pick-ups, but the penalty was later removed.

On the 14th mile Dupuy and Kaiser started another "jam" and from that mark on the race was one long continuous "jam." Goullet won all the 24 sprints that he competed in with the exception of the last when he was boxed in and finished fourth. Goullet rode a remarkable race and he was almost invincible, winning sprints from in front or any other position.

How Points Were Scored

Points were scored in the sprints from one to nine according to position, and the team scoring the lowest number of points being the winner. In the 24 sprints Goullet and Grenda scored 42 points. Magin and Corry finished second with 73, while Thomas and Lawrence scored 82 points and carried off third honors. Fourth place went to Madden and Hanley with 90 points and Dupuy and Kaiser had 120 points. Sullivan and Eaton with 137 points finished sixth and Root and Lawson finished seventh, their score being 164 points. The Spencer brothers had 228 points and the Wiley and Carman team had 230.

The race from a financial standpoint ran a little short of last year, the difference being on the fifth day. The riders fared well for their week's work.

Alfred Grenda, Goullet's Winning Mate in the Hub "Grind"

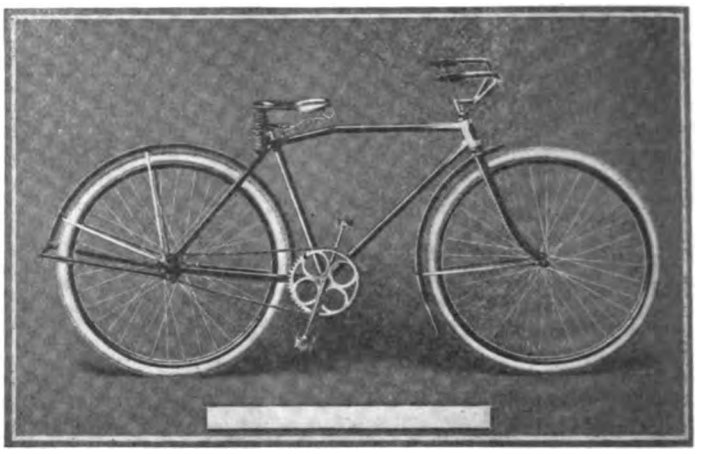
TWENTY IN ARNOLD, SCHWINN LINE

World and Excelsior Bicycles, with Usual High Grade Construction and Fine Finish, Make Up the Offering—Prices Range from $30 to $45—Two in Each Line for the Young Folks—Autobike a Feature

Excelsior Bicycle, Model 1711. Price, $42



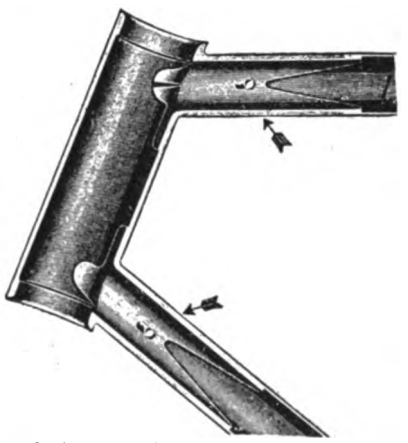
Excelsior, Model 1704. Price, $35

CHICAGO, Ill., Nov. 13.—Twenty models, comprising a line of bicycles that will be found suitable for almost any need, are offered for 1917 by Arnold, Schwinn & Co. The bicycles are the celebrated Excelsior and World, and they range in price from $30 to $45. Two juvenile models are included in each line, the price being $30.

1917 Line Has Variations

In the 1917 line there are variations to meet different requirements, but the same general construction is carried out. The best steel tubing is used, the gauge being 20 for frames and 16 for fork stems and similar parts. The heads are drawn steel and fishmouth reinforcements and flush joints are used. All joints are carefully pinned and brazed by the most improved methods. Crank brackets, seat post cluster and rear fork ends are of heavy drawn steel.

Standard diamond frame, with single and double bar, single and double curved top and arched truss are offered in the various models. There are four styles of forks, three with drop forged and one with a three-plate crown. The three-plate crown is formed with long drawn sockets, giving a holding space on the fork sides three times the thickness of the crown plate. The trussed fork is built with a one-piece forged crown with the truss struts made integral with the crown. A bayonet type with a reinforced ridge extending almost the full length of the fork, and a standard type of oval fork are supplied.



Arnold, Schwin Head and Frame Construction, Showing Fish-Tails

The crank hangers are the one-piece type with diamond drop forged crank of high grade carbon spring steel, which is guaranteed not to bend or break. The cups and cones are of the best grade of steel, hardened, ground and polished. There are a variety of sprockets of various designs. The 60-tooth sprocket is reinforced by lateral flanges. Wheels are built of one-piece wood rims, high grade spokes and light front hubs and standard type of coaster brake. Chains, block and roller type, 3/16-inch by ½-inch pitch, are specified in all models.

Best Equipment Selected

The tires, saddles and handlebars specified with the various models have been carefully selected. Handlebars are the high grade seamless steel tubing, and the grips include rubber and leather wound. The colors include a variety of combinations, the enameling including four coats, which are carefully put on and hand rubbed. Color combinations have been carefully selected. The nickel plating has been given careful attention also, which insures a fine lustre of great durability. The other details of both lines are taken care of in the usual painstaking manner.

Ladies' Model Excelsior. Price, $38.50

World Autobike, Model 1710. Price, $45

BAY VIEW WHEELMEN HOLD TEAM RACE

Fifteen Teams Start in 25-Mile Team Race at the Woodbridge, N. J., Half-Mile Trotting Track

WOODBRIDGE, N. J., Nov. 13.—In order to harden their riders for the two-hour team race, which they will promote on Thanksgiving Day, the Bay View Wheelmen, of Newark, staged a 25-mile team race on the half-mile trotting track yesterday. Fifteen teams started and 13 finished.

John L. Staehle, the amateur champion, and his partner Ed Byron won the race with 12 points, they gaining their points by winning the five and 25-mile sprints, finishing third in the ten and 15-mile dashes and fourth on the 20-mile tussle. William Keller and William Schneider finished second with 19 points and Gus Lang and Charles Rimmele finished third with 26. Two spills marred the race somewhat, but no riders were injured.

George Brindle, known as the "Brassard King," retained the club armlet in two races yesterday. He beat Patsy Kline and Alfred Andres in rather easy style. Brindle has held the Brassard for eight weeks straight. The order of finishes at each five-mile mark in the team race and the points scored by each team is as follows:

	Miles					
Team	5	10	15	20	25	Pts.
Staehle-Byron	1	3	3	4	1	12
Keller-Schneider	3	8	1	3	4	19
Lang-Rimmele	8	6	4	5	3	26
White-Paetz	5	1	8	8	8	30
Martin-Fitzsimmons	4	5	5	8	8	30
O'Mara-Benwell	6	8	6	6	5	31
Horvarth-Trahmer	8	8	8	1	8	33
Dreher-Grenda	8	4	8	8	6	34

All finishers outside of sixth place were credited with eight points.

MADISON SQUARE GARDEN MAY BE AUCTIONED

NEW YORK, N. Y., Nov. 14.—Historic Madison Square Garden, the scene of many cycle shows, sporting events and the home of the New York six-day race, may be put on the auction block before the end of the year. The F. & D. Co., owners of the property, yesterday filed a voluntary petition in bankruptcy in the United States District Court. The liabilities are given as $3,035,879 and the assets as $2,753,141.

The famous building has been in the hands of a receiver since June 1. Counsel for the receivers stated last night that the new developments would have no affect on the Garden for a year at least, as it is leased for the cycle show early in December, the six-day race two weeks later, and for a number of other events.

CALIFORNIANS AFTER RECORD

SAN FRANCISCO, Cal., Nov. 10.—Ralph Welch, Harry Spence and Milton Costello, three members of the New Century Wheelmen, will attempt to break the 100-mile record to San Jose and return on Sunday, November 19. The record is held jointly by Frank Murray and Walter Hammit and stands at 5 hours and 42 minutes, and the record has stood since 1912. The trio will start at Mission street corner of 22d, and will check at Belmont and Mountain View each way.

BEN BOYES MAKES NEW YORK-BOSTON MARK

NEW YORK, N. Y., Nov. 14.—Ben Boyes, a member of the New England Wheelmen, broke the record between New York and Boston on Election Day. Boyes covered the distance between the two cities in 17 hours and 49 minutes as against the old record of V. Cestone of 18 hours and 36 minutes.

The schedule of Boyes' ride is as follows: Left New York City Hall, Nov. 7, at 12:01 a. m.; New Rochelle, N. Y., 1:21;

Ben Boyes, Who Broke Cestone's New York-Boston Record

Portchester, N. Y., 1:55; Stamford, Ct., 2:25; Bridgeport, Ct., 4:05; New Haven, Ct., 5:11; Meriden, Ct., 6:21; Hartford, Ct., 7:39; Springfield, Mass., 9:39; Palmer, Mass., 10:41; Warren, Mass., 11:42; East Brookfield, Mass., 12:50; South Framingham, Mass., 3:55; Boston, 5:50. Boyes rode a Bastide bicycle fitted with Palmer-Armstrong tires. Upon hearing of the record ride Cestone, the former holder, announced that he would again attempt to bring the mark back to his credit.

LAST N. E. W. RACES HELD

NEW YORK, N. Y., Nov. 13.—W. Sluyter won the third and last consolation race of the New England Wheelmen, which was held yesterday. Sixteen riders competed in the race and Sluyter with 12 points beat T. Urbach, C. Eiler, W. Sprauer, Sr., in the order named. A one-hour team race with 12 teams was also run. Aickelin and Eiler, 32 points; Palmier and Maas, 18 points; Schindler and Bader, 10 points, was the way the first three finished.

SALT LAKE DEALER RETIRES

SALT LAKE CITY, Utah, Nov. 8.—William Brewer, of the Bicycle Supply Co., has sold out his interests. It is not known what he contemplates doing at present.

RABBINO AND NUNZIATA TAKE U. S. I. EVENTS

Italian Club Runs Two Races, Non-Winners and Ten-Mile Handicap—Team Race Next on List

NEW YORK, N. Y., Nov. 13.—Two races were staged by the Unione Sportiva Italiana yesterday over the Pelham Parkway course. The first, the four-mile, was reserved for riders that had not been placed better than third in open road and championship races held this season, while the second was a ten-mile handicap.

Charles Rabbino won the four-mile race from a field of 18 riders. Amerigo Ferrero finished second; Charles Jensen, third; Charles Hanson, fourth, and Thomas La Rossa, fifth, Rabbino was timed for the course in 13:13⅕.

Harry Hoffman looked like a winner of the ten-mile handicap race nearing the tape, but his seat post became loose and his chances were spoiled. Jerry Nunziata won the race with Hoffman second and Nelson Johnson third. All three started from scratch and Nunziata was timed in 28:11 2/5. Amerigo Ferrero, 50 seconds, finished fourth and Charles Rabbino, 30 seconds, landed fifth place. Twenty-four riders started.

On Sunday, November 19, the club will stage a 30-mile team race over the same course. The so-called Berlin style of finish will be employed in deciding the winners. A sprint will be staged at each three miles, and the winners will be given a point, second team two points and so on. The team scoring the lowest number of points in the ten sprints will be the winners.

JENSEN WINS C. R. C. RACE FROM THE HONOR MARK

NEW YORK, N. Y., Nov. 13.—Edwin Jensen, riding from scratch, won the weekly point race of the Century Road Club Association, which was run yesterday over the Pelham Parkway course. The distance was 6½ miles and Jensen rode it in 16:32. Louis Zemo, 2 min.; H. V. Carroll, 2 min.; J. J. Marquart, scratch, and Willard Knecht, finished as named.

Beginning next Sunday the last of the seasons point races, three in number, will be run. No member who has not competed in at least three will be allowed to start. On Sunday, Nov. 26, the association will hold a two-hour team race over the same course. An effort to better the mileage of 39.3 miles made in the 1914 race will be made.

THREE RACES—THREE WINNERS

BAYONNE, N. J., Nov. 13.—George Kaetz, Arthur Neminsky and James Flanagan won the three races staged by the Hudson County Wheelmen yesterday. Kaetz, 30 seconds, won the ten-mile handicap in 27:34 1/5; Neminsky accounted for the four-mile open and Flanagan took first honors in miss-and-out race, which went five miles. In a Brassard race John Carey defeated Kaetz.

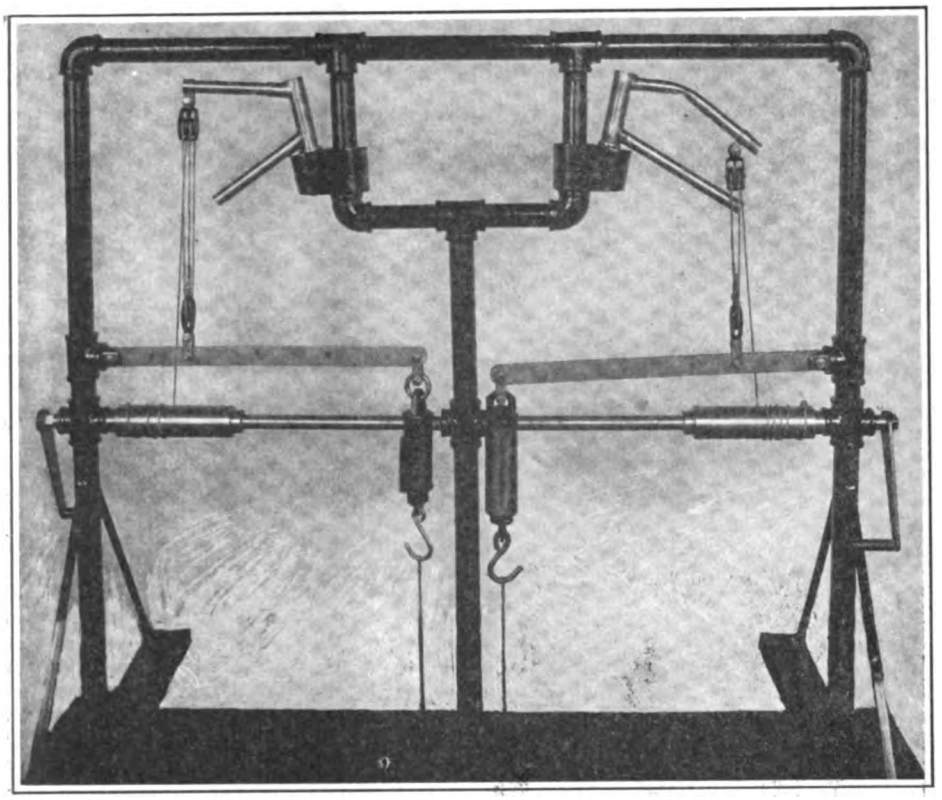
MIAMI'S FRAME TESTING APPARATUS AT THE SHOW



MIDDLETOWN, O.—In order to demonstrate the strength of the four-ply Hercules frame construction on bicycles made by the company, the Miami Cycle & Manufacturing Company has developed the testing apparatus shown in the illustration. This apparatus, now being shown at the Coliseum in Chicago, consists of a pair each of levers with spring balances, blocks and tackle and a main axle with handles for exerting the necessary force in making the tests. These components are mounted on an iron pipe frame fitted to a broad and sturdy base.

The carriers take a Hercules and any other stock frame head on the market. On being connected up and the cranks turned, the spring balances show the pull necessary to cause deflection. The pressure needed to effect this is found by multiplying the reading of the balances by four, as that is the ratio of the apparatus. There is a dead weight of 80 pounds for the scale lever, etc.

The Hercules frame construction, shown at the left, gives a scale reading of 160 pounds, corresponding to 720 pounds actual. That for an old style head, shown on the right carrier, is badly deflected at 40 pounds on the balance, equal to 240 pounds actual. It will be seen from this that the Hercules construction is four times as sturdy against deflection as the other head on the machine.

The Miami Cycle & Manufacturing Company will also exhibit this apparatus at the Madison Square Garden, New York, on December 4 to 9.

MOTORCYCLISTS TAKE TO CYCLING

SACRAMENTO, Cal., Nov. 8.—Members of the Sacramento Motorcycle Club have taken to long distance cycling, and a number of them have shown class in that style of riding. Eugene Hepting late in October made an individual record trip to Merced and return, a distance of 238 miles, which he covered in 13 hours and 35 minutes actual riding time. He left at 4:05 a. m. and reached Merced at 12:05 noon. After taking lunch as the guest of the Merced Cycling Club, he started back 40 minutes later and reached this city promptly at 7:50 p. m.

NEW MOTOR WHEEL DEALERS

MILWAUKEE, Wis., Nov. 11.—The following dealers have recently been added to the long list of dealers who sell the Smith Motor Wheel and Smith Flyer:

Claude A. Purcell, Parker, S. Dak.; Seick Tent & Awning Co., Des Moines, Ia.; Scruggs-Vandervoort-Barney Co., St. Louis, Mo.; Douglas Park Motorcycle Works, 3208-10 Ogden avenue, Chicago, Ill.; Halle Bros. Co., Cleveland, O.; J. P. Edwards, Knightstown, Ind.; Bryan Holcomb, Whitewright, Tex.; Montgomery & Scudder, Ft. Worth, Tex.; Bellaire Motorcycle Exchange, Bellaire, O.; Carl Griffith, Mt. Sterling, Ill.; Don Anderson, Washington, Ia., and J. & M. Auto Supply Co., 3565 Grant Boulevard, Pittsburg, Pa.

BIG POPE INCREASE

CLINTON, Iowa.—Carroll Armstrong, manager of the bicycle department of C. E. Armstrong & Sons, reports a big increase in the sale of Pope bicycles in his territory, as compared with sales for the 1916 season. The firm has fitted these wheels with Three Star Sturdy Stud Pennsylvania tires. The Armstrongs are selling wheels at $5 down and $5 a month, as well as for cash.

CYCLE TRACK PLANNED FOR PROVIDENCE

Boston Parties May Take Over Tract of Land and Build Modern Racing Plant Near Rocky Point.

PROVIDENCE, R. I., Nov. 13.—Within the next three weeks Boston bicycle promoters will come here to take over a large park on the Rocky Point car line, if plans now being made do not miscarry.

B. A. Swenson and his family attended the end of the six-day cycle race in Boston Saturday night and upon his return here made the following statement:

"Bicycle promoters in Boston have secured an option on a large tract of land just outside the city limits here, and are planning to build a bicycle track to open early next spring. I have been asked to co-operate with them and I am so thoroughly convinced that there is a big field for bicycle racing here that I shall enter into the project body and soul. Bicycle racing in a measure has been on the boom here for some time and recently many have approached me to get the ball going.

"I am informed that the Boston people will come here within the next three weeks to take up the proposition, and by the 1st of December we will know for sure whether the project will go through or not. For my part I hope it does. Should a track be built on the site selected, we will have one of the best cycle racing plants in the country."

BIG MOTOR WHEEL SALES

MILWAUKEE, Wis., Nov. 13.—Sales of Smith Motor Wheels during September and October have been an agreeable surprise to the makers, the A. O. Smith Co., of this city. Many of the sales have been to high school and college students, while others have been purchased for service work and by farmers, the latter class being large. The A. O. Smith Co. say that their shipments for November will be greatly in excess of last year.

PRIZES FOR TEAM RACE

NEWARK, N. J., Nov. 13.—Over 30 prizes have already been donated for the two-hour team race of the Bay View Wheelmen, which will be staged at the Weequahic Park track on Thanksgiving Day, Nov. 30. All teams that desire to ride this race are urged to send in their entries.

AIDS FOR CHRISTMAS SALES

BUFFALO, N. Y., Nov. 13.—Attractive Christmas pamphlets and window signs in four colors have been printed by the Buffalo Metal Goods Co., makers of the Atherton coaster brake. The signs and pamphlets will be supplied to bicycle dealers in quantities. A banner is also being prepared for dealers.

VOLLERTSEN SELLS 125

DAVENPORT, Iowa.—John Vollertsen has a bicycle store and shop at 325 Brady street, this city. His sales to date amount to 125 wheels, most of which were Iver Johnson and De Luxe models.

Digitized by Google

FEATURES OF SPLITDORF SERVICE

How the Wonderful Growth of Splitdorf Organization and Plant Affects the Interests of the Motorcycle Rider Who Uses Dixie Products—How Branch Service Has Been Developed

FROM the foundation of the Splitdorf organization up to the present itme, great strides have been made, not only in the growth of the organization and factory facilities, but in the number of its products and in their perfection in mechanical efficiency.

From Civil War days the name of Splitdorf has been associated with electrical devices and from small beginnings through the days of development of the Roentgen rays, the name and firm slowly developed until the inception of the automobile and motorcycle industries. Then Splitdorf progress was remarkable. From a small shop in lower New York to the Bronx, the demand taxed the ingenuity and resources of the firm heads, adding new buildings, developing new manufacturing processes on a huge scale and bringing the output up to the tremendous demand.

Remarkable Progress

That has been its perpetual task in the last decade. The taking over of the company by new financial interests and the branching out into wider fields of electrical ignition saw the transition of the company's manufacturing plant from several buildings in the Bronx to its present quarters. That was in 1913.

Bigger and broader in every sense their present factory facilities include two large buildings, one of which has been recently erected, constructed on the most modern plan of factory design. This new plant adds 115,000 square feet of space to the old factory, making a total of 240,000 square feet.

The Splitdorf organization bases its great and rapid progress on the high efficiency of the personnel of the organization, the extensive research and successful scientific development of new electrical devices and appliances, the intense efficiency of its manufacturing methods, the closeness to mechanical perfection of its products, and its service to the consumer or user. The present official staff of the Splitdorf electrical Company is as follows: John F. Alvord, president; Charles F. Splitdorf, vice-president; C. W. Curtiss, general manager; R. S. Preble, treasurer; M. W. Bartlett, secretary, and Dan R. Walls, advertising manager.

Controlled by Headquarters

The Splitdorf branch service stations, probably unlike any service station systems, are under the complete control of the company. This feature makes for an absolute conformity with the policies of the organization.

The motorcycle dealer is a forceful factor in this arrangement, for generally it is through him that the aid is given the user and in this way he can establish exceedingly close relationships with his customers, and by this means, increase the volume of his business.

Benefit the Dealer

Considered in another way, these service arrangements make it possible for the motorcycle dealer to obtain adjustments, repairs and replacements of the highest quality at the minimum of cost and delay. Splitdorf maintains 25 branch service stations throughout the United States, and abroad, located in strategic centers, in order to render service to its widely distributed patrons. Each branch has its little army of expert workmen, supervised by a branch manager, which is constantly inspecting, testing and repairing. Besides this, each branch keeps men continually traveling throughout its territory, calling on garages and repair men, to take care of the Splitdorf distributing interests. Nothing, in fact, is left undone to make Splitdorf service real service.

Each branch is completely equipped with facilities to give the same quality of service as could be obtained at the factory. In the sales department, a motorcycle owner or repairman can purchase complete new Dixie ignition and Splitdorf lighting systems as well as Green Jacket spark plugs, and have them instantly installed. New parts can be obtained from stock or old parts can be restored to perfect working conditions without appreciable loss of time.

Broad Warranty

The free service offered by the company embraces the work done on systems that are inoperative through defective workmanship or material and a reasonable charge, of course, is made for repairing a system that is faulty through abuse by the operator. Service of this kind is in force during the life of the warranty, issued by the Splitdorf Company, which is one year from date of manufacture.

When equipment is received by a branch station for repair, it is dismantled and cleansed of dirt and grease. Then it goes to the special repair department, where it is thoroughly overhauled and restored to perfect working condition. Before it is considered satisfactory it must pass a rigid test by a special testing apparatus as well as an inspection by experts.

Effective Protection

Customers are afforded full protection in the matter of charges, time of delivery, etc., through a perfected system of tagging. Each repair job is tagged with full particulars as to owner's name and address, details as to repairing to be done, etc. As the repair job travels through the various sub-departments of the repair department, the work done by each sub-department and the materials used for making the repair is detailed on the tag.

The scope of work done includes every repair and adjustment that may be needed. Not only do these service stations unify the company's interest with that of the user, but they are of inestimable value to the user from the viewpoints of real economy and efficiency.

WINNING PAIR IN RECENT MELBOURNE RUN

GOODYEARITES IN ACTION

MEMBERS of the Ohio National Guard who are employees of the Goodyear Tire & Rubber Company, have been fortunate enough to get into action near El Paso, Texas. Recently, a band of Mexicans crossed the border and came into contact with an outpost. In the skirmish which followed the Goodyear boys showed the stuff they were made of and drove off the attacking party.

Announcing—A Real Se
The Bicycl

A Line You Can Control

For years bicycle tire advertising and bicycle tire selling has been in a most chaotic condition. No dealer knew where he stood from season to season.

We have long recognized this and have been at work on a solution. Many plans were worked out, tested and found wanting. At last we hit it, and are not putting it too strongly when we call it a decided improvement on anything so far offered the dealer.

The Infallible Selling Plan offers dealers the opportunity of doing business on the following basis:

AN EXCLUSIVE TERRITORIAL AGENCY

Infallible Tire Business will not be dealt out to everybody with a store. One dealer in a territory will get it all.

A TIRE BUSINESS UNDER YOUR CONTROL

The Infallible Agency will be under your control just as the rest of your business is. The work you do will be work in your own interest.

THE ELIMINATION OF PRICE COMPETITION

As no other dealer in your territory will have Infallible Tires, there will be no price competition. The Infalli-

Digitized by Google

ng Plan For Tire Dealer

ble Selling Plan eliminates that bugaboo of the tire business—price-cutting.

A COMPLETE LINE OF TIRES UNDER ONE TRADE MARK

The Infallible Line covers the field completely—a tire for every bicycle purpose—all under one name; one house to do business with; one house to request service from.

UNUSUAL DISCOUNTS TO THE TRADE

Infallible Tires carry a profit to the trade that is worth while. There's a good profit in every number. You make money no matter what tire a customer selects—there's money in them all.

THE TIME IS NOW

If you are going to get some of the tire business that "a million bicycles" will develop, you want to hook up with the Infallible Tire Selling Plan and do business the new Infallible Way.

YOU MUST HURRY

When our plan is known, territory will be taken up fast. So don't lay this aside with your morning paper, but get a letter off to us now. Tell us all about yourself and your business.

We are going to be a little bit particular. First class dealers can have all the territory they will take good care of. And it's a franchise that will pay big.

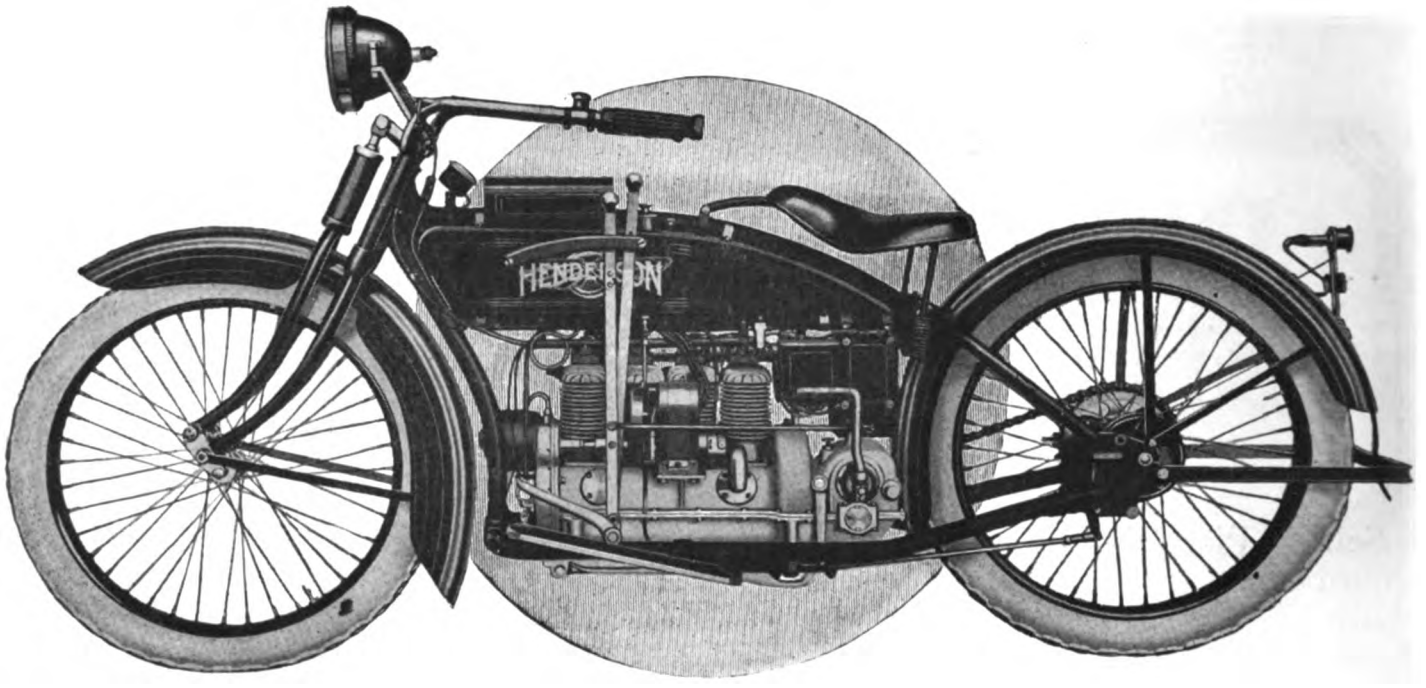
ELECTRICALLY-EQUIPPED HENDERSON MAKES BOW

Has Lighting Dynamo Separate From Ignition Apparatus and Exide Storage Battery



Left Side of Henderson with Electrical Equipment, Generator Just Ahead of Motor on Right, Battery and Controller Above Gearset

CHICAGO, Ill., Nov. 13.—One of the centers of attraction of the Show at the Coliseum today was the 1917 electrically-equipped Henderson, which made its debut when the covers were taken off this afternoon. This model has been in course of development for some time and a few items had leaked out, so that riders steered toward the Henderson exhibit ready to look over the machine from front to rear.

The electrically-equipped Henderson is fitted with a generator driven from the distribution train, this generator being the product of the General Electric Co., of Schenectady, N. Y. It is separate from the high-tension magneto, not only mechanically, but electrically. The arrangement insures against motor trouble due to defects in wiring or light connections.

Simple Construction

The new generator is built especially to the requirements of the Henderson machine, and embodies the experience of the General Electric and Henderson designers. It is very simple and durable as well as efficient in operation. All parts are made interchangeable and uniform.

The generator is of the bipolar type, with laminated armature and field. The commutator is mounted on a ⅜-inch shaft carried on ball-bearings. It is easily accessible and can be removed by taking out two screws. The brushes are of large surface and made of a special composition to give long wearing qualities and at the same time preserve the form of the commutator. Current passes through a "pigtail" instead of through the brush spring, thus preventing a drawing of the temper of the spring. The generator drive gear is hardened and is held by a Woodruff key. The shaft itself is very large and strong to insure long life and dependability.

The front cap is packed with grease when the generator leaves the factory and the machine is self-oiling, so that no attention is required from the rider. All that is needed is to replenish the grease in the front cap about once a year.

Ward-Leonard Controller

The output of the generator is regulated by a Ward-Leonard controller, which operates quite independently. The controller is mounted at the rear beside the battery case, where it is well protected, yet readily accessible. The controller prevents overcharging and will prevent counterflow of current from battery to generator. It is entirely automatic in its action and insures a steady light at all speeds of the motor.

The Ward-Leonard controller is another General Electric product which has been developed to a high degree of perfection. It never needs the attention of the rider.

The storage battery used is the Exide, which has proved successful in several seasons past for motorcycle work. It is fitted with non-leaking plugs and vents and practically unbreakable jars. The headlight fitted is the "Old Sol" Hornlite, having a main and pilot bulbs, and electric horn contained within the shell of the lamp. The horn is operated by a press button on the handlebar.

Further Details

The battery is carried in a neat and substantial case back of the motor. A sliding door at the side allows of easy access to the battery.

The tail light is substantially made and neat in appearance, with red rear signal and white upper lens to illuminate license plate.

The price of the complete Henderson electrical equipment, which includes shaft-driven generator, storage battery, controller, Hornlite, tail light and all wiring and connections, built in and installed on the motorcycle is $45.

A big advantage to the rider of an electrically-equipped Henderson lies in the thoroughly-established service organization of the Exide firm, which makes it easy for users to obtain expert help whenever needed. The company has 15 sales offices, 13 Exide depots and dozens of service stations at various advantageous points in the United States as well as in Canada.

WINDOW DISPLAY

Featured at Denver Goodrich Branch —Two Sections to Store

DENVER, Colo., Nov. 13.—The B. F. Goodrich Company have a motorcycle and bicycle tire department at 1414 Court Place this city, and at the present time they are featuring an attractive window display of motorcycle tires. The tires are shown off to good advantage in the window by a background of different colored papers.

The Goodrich store is divided into two sections here—one for automobile tires and the other for motorcycle and bicycle tires. This move was made necessary on account of the large volume of business experienced in the three lines.

A HELPFUL SERIES

Hendee Mfg. Co. Is Sending Sales-Building Letters to Dealers

SPRINGFIELD, Mass.—One of the latest and most interesting features of the co-operative campaign being waged by the Hendee Mfg. Co. with its dealers is a series of loose-leaf suggestion sheets, which are to be kept in a neat binder. Letter number one, which is now being distributed, discusses the 1917 Indian models and tells of the warm reception they have received throughout the country, and sheet number two offers a number of timely suggestions, among them plans for parts cabinets.

THE COUNSEL OF THE DEALER—

The counsel of the dealer is important. Your trade depends upon your judgment. Your stock of goods must at all times be complete. The Vitalic-Brigadier-Enduro tire line enables you to supply the demands of every customer that comes into your store -- from the one who wants the best regardless of price to the one who wants a good tire at a popular price. This "Tire Preparedness" should interest you.

BRIGADIER

VITALIC

ENDURO

For years the Vitalic tire has been known to the trade as the highest quality bicycle tire possible to produce. It has proved its supremacy over all other bicycle tires wherever comparison has been made. And now in introducing the Brigadier and the Enduro, two popular priced tires built with the same regard for utmost quality possible at their prices, we offer the dealer the most attractive proposition to be had - - - -

A COMPLETE QUALITY LINE OF SUFFICIENT RANGE TO MEET EVERY DEMAND.

THE VITALIC is built throughout of the best tire materials obtainable,-- two plies of genuine motorcycle fabric frictioned with pure rubber, an inner tube of pure Para rubber so heavy as to eliminate any possibility of leak, an extra heavy non-skid tread of finest quality pure rubber. Will outwear any ordinary bicycle tire more than two to one. Once introduced it easily brings a higher price than other tires, always sells over and over again to the same trade because it never disappoints.

THE BRIGADIER The best popular priced tire ever put on the market far excelling others anywhere near its price. It is a four ply tire, built with two plies of best Egyptian fabric all around the tire and two extra plies on tread A very high grade friction is used. The extra heavy inner tube is made of a very high quality rubber. The Brigadier is made with gray side walls and a heavy large white studded tread as shown in the illustration.

THE ENDURO Another excellent popular priced tire that fills a long felt need for a tire of lower price that has genuine quality. It is built with two plies of high grade Egyptian fabric with a very high grade friction, has a heavy inner tube of very good quality and a good substantial diamond studded white tread.

Write us today for sample sections of these three tires and attractive display material and dealer helps. Your jobber will show you the tires

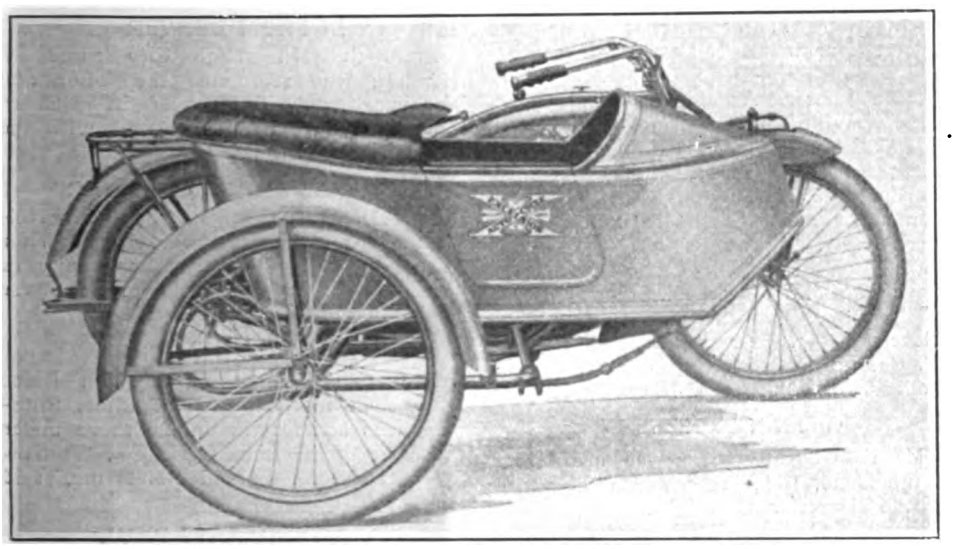
EXTENSION AXLE ON ROGERS SIDECAR

New Season's Product Has Special Device for Regulating Tread from 42 to 56 Inches—Forward Position of Passenger and Altered Spring Construction Other Features



Model H Rogers Car for Attachment to Excelsior 18-3—It Has Special Fittings

THE exclusive sidecar manufacturers have been going "great guns," so to speak, in the development of their products. The Rogers Mfg. Co. has reached a point where its production is large enough to permit of the manufacture of a "tailor made" Rogers model for each and every motorcycle now on the American market, doing away with the feeling that the sidecar is after all merely an attachment and making of the motorcycle and sidecar an integral unit that adds materially not only to its durability and safety, but also to its appearance.

The new Rogers model, which is known as Model M and lists at $80, embraces all of the well-known features that have made the Rogers reputation. The streamline one-piece welded steel body is continued, with some slight improvements in the shape of a larger sidecar pocket and the addition of a pressed steel footrest and inside floor trimming that adds materially to its appearance.

The chassis design has been altered somewhat. A special frame is built for every make of machine; but in every case the Rogers special drop-type of extension axle—which is an exclusive feature—is used, as well as the ball and socket attachment joints, which not only facilitate attachment and detachment of the car to the motorcycle but also tend to eliminate vibration and bending stresses and strains. As with the regular model H Rogers, the frame is built on the triangle principle, giving the utmost strength and rigidity with the least possible weight. Indeed it is the Rogers boast that the Chicago built sidecar is fully 60 pounds lighter than any other make on the market, most of the saving resulting from the use of the single piece steel body.

Another important new feature is found in the new forward position of the Rogers attachment; this permits of the passengers sitting right beside the rider in the saddle, but the center of gravity has been so carefully worked out that this forward position does not entail the slightest tendency on the part of the sidecar to turn turtle.

Emphasizing the "tailor made" feature of this new Rogers model is the fact that the enamels of the various motorcycle models are matched exactly, as well as the finish, even to the black wheels on those machines which supply the "all weather" rim and spoke finish. The chassis of this new model, instead of being finished in black, as heretofore, is finished to match any machine.

The Model H Rogers is, of course, to be continued at the standard price of $75; the only changes are found in altered fittings for facilitating the attachment to the new models as well as to older models in some instances.

In the line of new fitments Rogers offers a new type of top-iron, which can be applied to the sidecar without the necessity of ripping all of the upholstery off the back of the seat and a child's seat of novel design. The seat, which is well and comfortably upholstered, is made to attach to either side of the sidecar, the weight of the occupant not being carried by the side, but by the floor of the sidecar body. The seat is made collapsible for storage under the seat when not in use; it sells for $3. There is also a new luggage carrier of novel design among the Rogers offerings.

INDIAN DEALERS IN BIG POW-WOW

Hundreds of Wigwam Representatives Confer on Sales Policies and Talk 1917 Business at Meetings Incidental to Show

CHICAGO, Nov. 15.—Great preparations were made for the big pow-wow of Indian dealers held here in connection with the show. The first session was held today, and the conference will be continued into Thursday. The Wigwam dealers gathered at the Indian Building on Michigan avenue, where Chieftain Jesse Edwards was waiting to welcome them. About 350 Indian representatives had registered at the Edwards headquarters up to the time of this writing.

Many important questions bearing upon the national merchandising of the Indian lines were discussed, and dealers from all parts of the country participated in the conference this morning. Part of this morning's session was devoted to the detailed explanation of the installment sales plan, as it has been operated during the past year by the Indian Motorcycle Guaranty Co. This plan has proved highly successful, and it is the intention to enable dealers in other sections of the country to put it into effect. At noon the dealers gathered for luncheon at the New Southern Hotel.

A good deal of the time at this afternoon's session of the dealers was devoted to exchanging experiences, and many constructive suggestions were offered.

The meeting on Thursday morning will be given over to talks by the various department heads of the Hendee Mfg. Co., among them General Manager Frank J. Weschler, Chief Engineer Oscar Hedstrom, Sales Manager E. M. Jackson, Advertising Manager J. A. Priest, and W. P. McNaughton, manager of the dealers' aid department.

CREVVY IS VICTOR

Indian Man Sets New Track Record at San Angelo, Tex.

SAN ANGELO, Tex.—Ray Creviston set a new track record for the oval at the San Angelo Fair in the final day's meet held on November 4 under the auspices of the San Angelo M. C. Creviston sent his Indian around the track in 50 seconds, bettering that of Leslie Parkhurst, Harley-Davidson, by 2 2-5 seconds. "Crevvy" also rode off with the 10 mile Class A race, his time being 8:55. Rural Murray, of this city, won the Class B race for this day, a five mile event, in 4:25. Murray rode a Harley-Davidson.

Noah Smith, local Indian man, won the initial race of the five day meet on November 1, taking the five mile Class B event in 4:32. Smith used an 8-valve Indian. The ten mile event which followed went to Rural Murray, Harley-Davidson, in 9:10 Both races were exciting and resulted in close finishes.

The second day's meet included a five mile for Class B riders and a 25 mile event for Class A contestants. Noah Smith again distinguished himself by capturing the Class B race on his 8-valve Indian, his time being 4:25. Jim Davis, of Columbus, on an Indian, was a victor in the 25 mile event, his average for the distance being better than 70 miles per hour.

In the first race on Friday, a five mile for Class B, it was a contest between Murray and Smith, and the former finally won.

DEALERS GATHER FROM NEAR AND FAR

Strong Attendance of Retail Tradesmen Marks Opening of Show—See Big 1917 Season in All Lines—Foreign Visitors From Holland and Canada

CHICAGO, Ill., Nov. 15.—C. A. Merkel of Merkel and Spacher, Rochester agents for the Excelsior and Henderson outfits, have found that owing to the increased business that larger quarters were necessary, hence their removal to 162 North Clinton avenue, where they will be found in a new three-story brick building. The new place will have two entrances, one on Bristol street and one on Clinton avenue. They were formerly located at 183 North Clinton avenue.

ROOSEVELT SAYS HOWDY

Mr. Roosevelt of the Roosevelt Cycle Supply of Chicago, Ill., was interviewing all the accessory people and renewing old acquaintances.

A BUNCH OF R-S BOOSTERS

Art Mechanoc of the Woodland Cycle Co., of Cleveland, L. A. Yost, Kansas City, Mo.; Mr. H. L. Dale of Fort Wayne, Ind.; J. B. Trossell, Detroit, Mich. and R. L. Davis of Louisville, Ky., were all found together in the Reading Standard headquarters admiring the new product from Reading. They were overjoyed with the new models and certainly expect some very good business for 1917.

EXCELSIORITES APLENTY

Yes, all Excelsiorites, were found in the booth and they were in plenty. Business is wonderful, they all chorused. The following were in the chorus: Walz and Sliger, Hammond, Ind.; Frank Andrew and Son of South Bend, Ind.; F. B. Miller, Marion, Ind.; Ed Arnold, Logansport, Ind.; E. H. Whitman, Goodland, Kas.; Bob Bills, Wichita, Kas.; Jerry Tweed, Wichita, Kas.; Bill Tucker, representing the J. C. Harding Co., of Topeka, Kas.; A. E. De Commer, Grand Rapids, Mich.; Floyd Clymer, Greely, Colo.; Aug Siewert, Wheeler, Ind.; Ray Peck, Salt Lake City, Utah; Dave Marholin of the Eastern Cycle Co., of Hartford, Conn.; Finn Huttinger, of Cleveland, O.; C. A. Merkel, Rochester, N. Y., George Wagner, Rochester, N. Y. and Yoder Bros., Nappanee, Ind.

GILMAN BREEZES IN

M. E. Gilman, the bicycle man from South Bend, Ind., breezed into the booth of the Excelsior Cycle Co., and paid his respects and immediately made for the rendezvous of the Dayton wheels, where he was continually shaking hands with his many friends.

SEARS AND POTTER ON HAND

Paducah, Ky., and Syracuse, N. Y., were found near to each other in the persons of E. J. Sears, who handles the Harley Davidson and Cleveland in the Green River State and Geo. Potter of the Potter Co., of Syracuse, N. Y. Nothing but enthusiasm was found with these dealers.

IN FROM DENVER

From the Mile High City came M. Hayutin, who represents the Thor and Reading Standard interests in Denver, Colo. Hayutin is highly elated with the prospects for next year.

RUARUS LOOKS 'EM OVER

D. G. Ruarus, the Thor agent for Holland at Amsterdam, was a silent visitor at the show. Mr. Ruarus has many of the American-made products for next year to be distributed in Holland.

THEY SUIT ROUSCULP

The Indian representative from Lima, Ohio, came in the person of Chas. Rousculp, who handles the Indian there under the name of the Lima Cycle Co., "Indians are fine where I am, and it suits me," said Rousculp.

BIG YEAR, SAYS PAUL

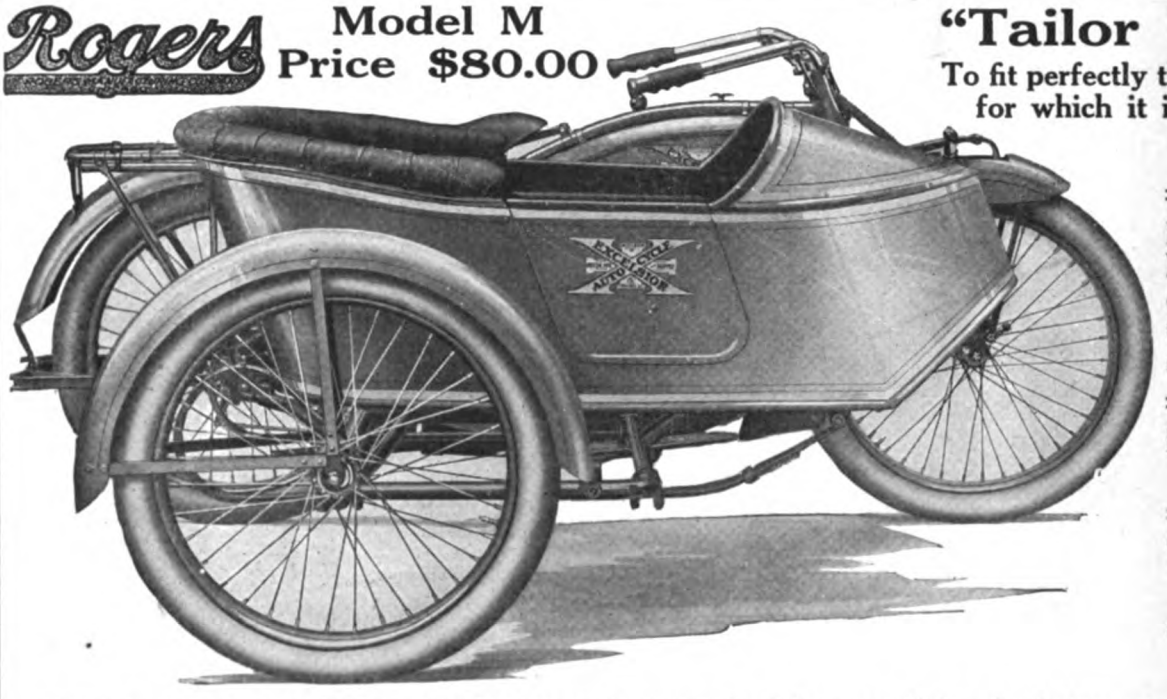
Paul Monroe, the Indian man from Sidney, Ohio, appeared upon the scene and was found in the Hendee booth. "I know I will have a big year," was all we could get out of Paul.

PETERS COMES FROM BUFFALO

H. L. Peters, the Harley Davidson and Cleveland wizard from the Bison City, was on hand giving greetings to all. He handles the Bison bracket for Prest-O-Lite tanks in Buffalo.

Rogers Model M Price $80.00

"Tailor Made"
To fit perfectly the motorcycle for which it is designed.



Note the low-hung body due to drop type extension axle.

Forward position

Three-leaf springs

This new Model M is the last word in sidecar elegance and efficiency combining the features of extension axle and the low body position attained only through the drop axle; Forward Body Position, Perfect Balance by means of the forward position of the wheel and Comfort and Durability from the new design three leaf springs.
The well known Model H, on which has been built the ROGERS reputation is continued with valuable improvements in detail. Price $75.00. Both are described in our new circular. Write for it today.

METZGER MAKES ROUNDS

E. L. Metzger, of the Lafayette Welding Works, Lafayette, Ind., where they handle the Indian, was promenading around the Coliseum and renewing acquaintances of last year.

BELL SIGNS UP

The Pope and Cleveland interests will be looked after hereafter in Kansas City, Mo., by Mr. Bell, who has signed contracts for the above named machines.

KOLWEIN A FOREIGN VISITOR

From far away Holland came A. G. Kolwein, the new Emblem Light-weight and Cyclemotor representative in Appledorn, Holland. It is said that Mr. Kolwein has signed some pretty big contracts.

BUSINESS O. K., SAYS DROUHARD

Drouhard Motor Co., Danville, Kas., was represented at the show and the man from the prairies is flitting around the Harley-Davidson booth. "Business is O. K." said Drouhard, "and the big season already on."

McCARTNEY ON THE JOB

From Rockford, Ill., our J. W. McCartney arrived and went right to the booth of the Excelsior. He is just as enthusiastic as ever. "The new Excelsiors are certainly winners," was his comment.

BOISE BIKE MAN

A. P. Tyler, of Boise City, Idaho, was located at the exhibit of the Great Western Co. Mr. Tyler handles the Great Western line.

WANDERSEE CAME PROMPTLY

In from the Motor City, arrived the genial W. E. Wandersee, the Harley-Davidson representative. Detroit may make motors, but Wandersee likes the kind that are made in Milwaukee. Wandersee was radiating with enthusiasm. He brought Mrs. Wandersee along with him.

A ROSE CITY REPRESENTATIVE

Yes, all the way from Portland, Oregon, came P. A. Abbott, and the first place that his eyes feasted on, was the Harley-Davidson display. When last seen Abbott was carefully sizing up the Harley-Davidson products.

INDIANITE FROM BOISE

Boise City way out in Idaho, was represented by Chris Morler, who looks after the interest of the Springfield-made product. Mr. Morler was a silent visitor, but all knew that he was there.

TWO MEN FROM BREMER

The Bremer Cycle Co., of Milwaukee, was looked after by C. D. Bremer and F. Boelter. They represent the De Luxe line in Milwaukee.

COFFEYVILLE LIVE WIRE

E. F. Case, Coffeyville, Kas., the Harley-Davidson man, who hands out the funny little cards, was there shaking hands with all of the boys. Case certainly made a hit with his card.

LIVE ONE FROM PITTSBURGH

"Curly" Hamilton, the Harley-Davidson dealer from Pittsburgh, Pa., came over to the Windy City to see the full line of the "Silent Olive Drab Fellows" and the new Harley-Davidson sidecars. Hamilton is going to sell the new line of Harley-Davidson bicycles in the Smoky City.

WOOD AND BUSH ON THE SPOT

George Wood, of the Harley-Davidson Sales Co., of New York, and Carl Bush, of the Newark, N. J. the "Famous Duo from Down East," are full of smiles at the Harley-Davidson booth. They are after new sales records for 1917. Wood has already orders for over 100 machines.

RACERS LIKE LIGHTWIN

Speck Warner, Ellsworth, Kas., and Lon Claflin, Salt Lake City, Utah, were caught gazing at the show model of the new Indian Lightwin. The racing boys were hypnotized by the new models.

JES GIVES GLAD HAND

Jes "F. A. M." Campbell, the Harley-Davidson missionary from Boston, Mass., was there to welcome his host of friends from the West. Jes makes his headquarters at the booth of the Milwaukee-made product and will be glad to meet you.

SECOY MAKING FRIENDS

From Alexandria, Minn., A. R. Secoy, the Indian man, came to see the new surprises. He is sure that the trip has been repaid in coming to the Windy City. Mr. Secoy is making friends at the booths.

GALE WITH SCHICKEL

The old reliable M. E. Gale, the man who put Angola, N. Y., on the map was there giving out advice at the Schickel booth.

PIKES PEAKER GREETS FRIENDS

Floyd Kunce, of Loveland, Colo., the man of the Famous Pikes Peak Climb, was there with the Harley-Davidson aggregation.

That feeling of security that comes of KNOWING, not HOPING, that the essential parts of the mount are built to best the worst of bumps is fostered by the use of STANDARD pedals, DIAMOND E spokes and nipples and STANDARD toe clips.

To do full justice to your product and make dealer and rider alike know that it is a quality product, you must specify STANDARD pedals—in a variety of types—DIAMOND E spokes and nipples, and STANDARD toe clips.

Standard pedals

We specialize on pedals, toe clips, spokes and nipples for cycles and other vehicles. That's why STANDARD products are QUALITY products.

"Morrow" More Than A Brake

In its capacity of the highest example of braking control that can be applied to a bicycle, the MORROW COASTER BRAKE performs a very important duty.

By its presence on a bicycle it injects into the sales argument of the dealer an element of certainty, of surety, that reacts with strong emphasis upon the prospective buyer.

MORROW control means safety. Safety is what the buyer demands first, last and all the time in his mount. And NO brake can so strongly emphasize the smoothness, ease of handling and absolute safety of the bicycle as can the MORROW.

Thus the MORROW is more than a brake. It is the compelling force that sells the bicycle—that says "You are sure, you are safe while I, the reliable coaster brake, am on your machine."

Write for MORROW literature. It will interest you.

SAUFLEY IS OPTIMISTIC

E. P. Saufley, the versatile agent from Kansas City, Mo., was telling of the wonderful business in Missouri last year. Saufley knows that his 1917 year will be great.

WILL SELL PLENTY, THEY SAY

George Wagner, Rochester Excelsiorite and Stanley Kellogg, the big noise from Bridgeport, Conn., were found together at the Excelsior establishment. All that George could say was "Fair and Warmer," and "we will sell plenty of machines." Kellogg said that his only worry was to get enough machines. "I have enough orders now to keep me going for quiet a while," says Stanley.

DOWN FROM WINNIPEG

Winnipeg, Canada, on deck. The Dominion Cycle Co., of Winnipeg, Indian and Excelsior dealers, was represented by J. A. Hudson.

SASKATCHEWAN MAN ON HAND

H. Crabtree, Regina, Sask., Canada, the Indian dealer from the central part of the land of the Maple Leaf came in with his greetings and smiles. "Canada is doing her share, considering the circumstances," said Crabtree. "All we want is deliveries."

SALESMEN DISCUSS 1917 BUSINESS

Traveling Staff and Branch Managers Compare Prosperity Notes in Three-Day Convention at Harley-Davidson Factory

MILWAUKEE, Wis.—Preceding the three-day convention of dealers at the Harley-Davidson factory there was a conference of the same duration by members of the company's traveling force and branch managers with heads of the factory departments.

E. J. Mueller, assistant sales manager, actively supervised the conference program, and the following were in attendance: Awrey Cohoe, H. C. Scherer, A. W. Burges, F. H. Simon, H. G. Manthey, E. R. Durkee, Fred Stierhoff, O. P. T. Daenitz, R. F. Ray, I. W. Schroeder, J. O. Engel, and Frank Egloff, salesmen; Gus Castle and Jes Campbell, managers of the southern and New England branches, respectively; Arthur Davidson, sales manager; E. J. Mueller, assistant sales manager; T. A. Miller, eastern correspondent; W. E. Kleimenhagen, western correspondent; A. W. Herrington, special sales correspondent; together with the heads of varoius departments who took part in the discussions of the convention.

Davidson Gives Greeting

Walter Davidson gave the address of welcome, and expressed the satisfaction of the firm in the business conditions of the season, as far as it has gone. Mr. Davidson urged the salesmen to cultivate competition in their territories, stating that good, active and clean competition was the life of the motorcycle business and that they could not go too far in their efforts to encourage the competitive feature of the retail trade.

Arthur Davidson outlined the policy of the company in regard to the new line of bicycles which will be marketed beginning with the 1917 season.

Talks Bicycle Terms

Mr. Davidson was followed by W. D. Isham, credit manager, who outlined the terms under which the bicycle line will be handled.

In explaining the purpose of the newly organized dealer department of the Harley-Davidson organization, Frank B. Rodger, formerly publicity manager and now in charge of the dealer bureau, outlined a few of the important things in the motorcycle industry in which the Harley-Davidson Motor Company took an early initiative.

"Sidecar business, its importance and benefit to the motorcycle industry," was the subject of a talk by T. A. Miller, eastern correspondent.

W. E. Kleimenhagen, western sales correspondent, in speaking of conditions in his

territory stated that the light car bugaboo had just about been dissipated and dealers no longer were regarding that class of competition worthy of serious consideration.

Due to the absence of Advertising Manager Crolius, on account of an urgent session with Mr. Stork at the Crolius home, Hugh Sharp, assistant advertising manager, outlined the plans of his department for the 1917 season and stated that closer co-operation would be exercised with newspaper men, salesmen, and dealers, in the effort to secure greatest efficiency in Harley-Davidson publicity.

The details of a $50,000 direct newspaper campaign in the course of preparation were explained, with a graphic chart prepared for the occasion.

Service Manager Joseh Kilbert collaborated with Mr. Hascall in outlining Harley-Davidson plans for service to dealers and riders. "Twenty-four hour service is our aim," he said.

CONCERNING THREE LIVE WIRES

MILWAUKEE, Wis.,—Frank Rodger, formerly publicity manager of the Harley-Davidson Motor Co., has been placed in charge of the new Dealer Department just instituted by the company.

Arthur W. Herrington, who for some time past has been connected with the company as special sales correspondent, has been transferred to the Foreign Division.

The company's publicity department will be merged with the Advertising Department and will be under the jurisdiction of Hugh Sharp, assistant advertising manager.

PERKINS AND HITE WIN ON HIPPODROME

Frisco Man Wins Pro. and Pomonan Amateur Class in Los Angeles Climb — Perkins' Time, 22 4/5

LOS ANGELES, Cal., Nov. 13.—Dudley Perkins, of San Francisco, Harley-Davidson, made the best time in the professional class in the climb up Hippodrome Hill yesterday. He rode from base to crest in 22 4/5 seconds. Wells Bennett, on a big valve Excelsior, was second with 23 1/5 seconds. Third place in the pro. class was taken by Sam Hamilton, Flying Merkel, 24 seconds.

Benny Hite, Indian rider, shot up the fastest in the simon pure class, his time being 26 2/5. Charles Wreide, Harley-Davidson, climbed in 27 2/5, taking second position. Ed. Baque, a Pomonan, riding an Indian, was third in the amateurs, taking 27 3/5 seconds to ascend. In all, 28 out of 33 starters reached the crest.

Hippodrome Hill is 750 feet long with an average grade of 40 per cent. There is a tricky, winding turn at the foot, a hump midway up and a steep pitch at the top. This combination took all that machines and riders had to complete the climb.

The surprise of the day was the performance of Hite and Baque, two amateurs, who came with Charles Johnson, Indian man from Pomona. Hite got first and Baque third in their class. Perkins' climb was well up to expectations, while the favorite of the large crowd of riders and sports who lined the hill was Wreide, by reason of his fine riding. Wells Bennett had the highest average of all three tries in the climb, and was pleased that all Excelsior entrants had reached the summit.

HILL CLIMB

For Thanksgiving Day in Yonkers Organized by Ellis

YONKERS, N. Y., Nov. 15.—F. A. M. Commissioner George Ellis will hold a hill-climb on one of the steepest inclines in this city on Thanksgiving Day, November 30, starting at 2 p. m. There will be three classes: No. 1, lightweights of 35 cubic inches and under; No. 2, twins up to 61 cubic inches; No. 3, twins of over 61 cubic inches. The winner will be the rider who makes the ascent in the best time for his class.

There will be a prize offered for the best performance in each class. Entry fee is 25 cents. All entries must be in the hands of Mr. Ellis, 10 Warren St., New York, on or before 6 p. m., November 29. For blanks communicate with Mr. Ellis at that address.

NEW EQUIPMENT FOR CROCKER

KANSAS CITY, Mo.—Al. Crocker, manager of the Indian Motorcycle Sales Co., local Indian distributor, has made only a few changes since taking over the business of the late Charles Hanson. He has installed a new office equipment which is practically double in capacity of that formerly fitted.

DUCKWORTH Achievements
Tell the tale of DUCKWORTH Quality

Coast to Coast Record (San Diego, Cal., to New York, N. Y.), 3,378 9/10 miles, made by Erwin G. Baker on a DUCKWORTH CHAIN equipped Indian. Time, 11 Dys. 12 Hrs. 10 Min.

300 Mile Savannah Road Race, won by Lee Taylor on DUCKWORTH CHAIN equipped Indian. Time, 5 Hrs. 2 Min. 30 Sec.

300 Mile Tacoma Race, won by Earl Armstrong on DUCKWORTH CHAIN equipped Indian. Time, 3 Hrs. 45 Min. 27 9/10 Sec.

Three Flag Record (from Canada to Mexico), 1,655½ miles, made by Erwin G. Baker on DUCKWORTH CHAIN equipped Indian. Time, 3 Dys. 9 Hrs. 15 Min., a daily average of 475 miles.

Hundreds of other minor and major achievements the past season go further to strengthen the Duckworth hold on the trust of the motorcycle industry.

DUTCH AGENCIES

For Reading-Standard and Thor Taken by M. Adler

AMSTERDAM, Holland.—Representation for the Reading-Standard and Thor motorcycles, the former for Holland and the Dutch East Indies, and the latter for the Netherlands only, has been taken by M. Adler, Handel u. Industrie Maatschappj v/H. Arrangements to this end were made by New York Manager D. G. Ruarus a short time ago.

The firm of M. Adler desires to obtain representation for a few special accessories for the Netherlands. Offers to this end should be addressed to M. Adler, 32 Union Square East, New York.

68 MILES PER HOUR

Shown by Henderson in Police Test Over Hamilton Highway

TORONTO, Ont.—Speeders on the new Toronto-Hamilton model highway of forty miles will have to go some in future in order to beat out the motorcycle-mounted constables on this boulevard, judging by tests recently made on the roadway with a Henderson motorcycle. Constable Ed. Hunter decided to place an order with Percy McBride for a Henderson and one of the 1917 models was taken to the inter-city highway for a trial as for speed. The Henderson had been in use with sidecar attached, but this was removed for the test which was conducted with Ed. Brand in the saddle. The cop did the timing and when it came to figures it was found that the two wheeler had flown a mile at the rate of sixty-eight miles per hour.

Incidentally, the Toronto Police Department has purchased a 1917 three speed Henderson to replace a machine which was tread upon by an automobile.

TAKES HARLEY-DAVIDSON

ALAMOSA, Col.—The Harley-Davidson motorcycle agency of this city has been taken over by George W. Spriesterbach, who will combine it with his Indian agency.

KUNCE TO MOVE

Into Larger Building Near Cleveland Avenue Before Winter

DENVER, Colo., Nov. 13.—J. F. Kunce & Son, Harley-Davidson dealers at Loveland, Colo., are to have a new building. In fact, active work has already started and it is planned to have it completed before real winter weather sets in.

The new Harley-Davidson home at Loveland will have a frontage of 25 feet and will be 80 feet deep and will be constructed of brick. The new establishment is being built on a lot adjoining the present location of the Kunce people on the alley between Railroad avenue and Cleveland. The new place of business will be modern in every way and will be a credit to the enterprising firm.

WHITING GETTING AGENTS

DENVER, Colo., Nov. 13.—Walter W. Whiting, Harley-Davidson agent here, has just recently appointed a number of new sub-agents in different parts of the State. He has been pretty busy of late shipping machines to his agents in Colorado. Last week he shipped a number to Sterling, Fort Collins, Loveland, and several other northern Colorado towns.

TAKE McGRAW AGENCY

MADERA, Cal.—Bozeman & Vogeler, of the Madera Cyclery, have received their Harley-Davidson demonstrator. They have taken the agency for McGraw tires for the coming season.

IN LARGER PLACE

Columbus Agent for Dayton Now Located at East Long St.

COLUMBUS, OHIO.—The Columbus Cycle & Supply Co., dealer in motorcycle parts and bicycles, has moved from its old location at 23 East Long street into larger quarters at 73-75 East Long street, in the heart of the motorcycle section of the Buckeye Capital. J. Schottenstein is manager of the concern.

The new quarters are now being fitted up and a modern repair department will be installed. The concern handles a full line of parts for all makes of motorcycles as well as bicycles. It is Central Ohio agent for the Dayton.

SYKES PARTS ORDER ARRIVES

COLUMBUS, OHIO.—The large order for parts from the Hendee Manufacturing Co., has arrived at the Columbus branch of the Sykes Motor Co., Central Ohio agents for the Indian. These are being placed in racks to supply riders in the central part of the State.

ENCOURAGING THE PROSPECTS

WAKEFIELD, Mass., Nov. 13.—Charles J. Martin, local Harley-Davidson man, has a somewhat novel method of encouraging his prospects. Every Sunday he holds an informal run to a point 25 or 30 miles distant, and makes arrangements to carry as many prospects as possible in the sidecars. The trips are alway made in a leisurely way, mufflers are kept closed and the prospects are brought back happy. Martin also makes a point of encouraging riders to use neat costumes on these trips.

KEEPS HIM BUSY

KANSAS CITY, Nov. 9.—W. Bell, agent for the Pope and Cleveland lightweights, has been doing a mighty good business during the week. Bell says that while his bicycle business almost keeps him constantly humping, combining it with the lightweight business gives him but a minimum of leisure.

QUICK WORK BY MARTIN

WAKEFIELD, Mass. — Twenty - four hours after the first 1917 Harley-Davidson model arrived here Charles J. Martin, the local agent, had lined up orders for six, with sidecars. In addition to handling motorcycles, Martin carries a line of bicycles and accessories.

1917 INDIAN IN GRAND RAPIDS

GRAND RAPIDS, Mich.—Howard Ferguson, recently appointed Indian dealer for this section, has the 1917 demonstrator on display at his store, 421 Division avenue, South. R. E. Heth has charge of the service department, which is equipped to give prompt and efficient service to all repair and overhauling work. Ferguson's territory comprises Kent, Ottawa, Ionia, Allegan and Montcalm counties.

OPENS SPORTING GOODS STORE

ALTOONA, Pa.—"Abe" Cohen, one of the best known motorcyclists in this State, particularly in track competition, has just opened a store on the east side of the city with a general line of sporting goods.

RIDE 'EM AWAY

That's How Most Kansas City Customers Take Deliveries Now

KANSAS CITY, Mo.—Sales of motorcycles by dealers in this city are mostly of new models, although used machines are going well. Nearly all the new mounts purchased have been ridden by their owners away from the agencies. But few orders have been received for future deliveries.

Weather conditions in this part of the country have aided the dealers considerably and it is quite likely that good weather will continue until Christmas.

DOING LARGE FALL BUSINESS

KANSAS CITY, Mo.—R. A. Weed, of the Saufley Supply Co., handling the Excelsior in this section, has just returned from a business trip through Kansas. He says that dealers throughout the State are doing a much larger Fall business in both motorcycle and bicycle lines than usual by reason of the increase in grain prices.

MARR TO DRIVE AMBULANCE

TORONTO, Ont.—Private William Marr, formerly president of the Toronto Bicycle Riders' Association and an ardent cycling enthusiast, has been transferred from the 180th Sportsmen's Battalion to the Army Medical Corps of the Canadian Expeditionary Force and has been placed in charge of a Red Cross motor ambulance. This change comes as a surprise to local wheelmen as Marr never rode or drove anything but a bicycle before his enlistment.

Benton Service

You can't get blood out of a stone—likewise, it's impossible to get more out of a spark plug than is put into it by the manufacturer.

That's why you should specify Benton spark plugs. No spark plug made contains the high quality materials that go into the BENTON. The case-hardened construction of this plug is a guarantee of unflinching service for the life of your motor.

This is the Way the Cycle Show Looked to Visitors

THE Thor exhibit, from the start to the finish, was one of the most thickly peopled spaces at the exhibit. There were no frills in the Thor booth — but instead, the solid, substantial air of conservatism that is so characteristic of the House of Thor. There was one booth where real, and not artificial interest prevailed. It was at the sign of the Thor.

To this we attribute that the first dealer to sign an agency of any sort at the Show was a dealer taking on the big blue Thor. Where the Thor goes, Confidence follows!

Children the Country Over

are reading the attached advertisement today—tomorrow they will be asking their parents to give them a Columbia bicycle. Many of these requests will be granted, for this is the season for granting requests.

In your town there are dozens of children who will be given bicycles this Christmas. Are you in a position to fill their needs? Are you in a position to supply them with Columbia bicycles?

When a man purchases a bicycle for his boy or girl he generally purchases a bicycle he knows something about and this is invariably the Columbia. He rode one himself and the old familiar name will make the sale just that much more possible.

This advertisement and others like it is being read and will be read by boys and girls and grownups everywhere. The influence that they exert, together with the already established demand for the Columbia bicycles, is going to react directly in favor of the dealers that carry them.

Make your arrangements now. A Columbia model in your window is a magnet for Christmas trade.

BLUE STREAKS

Goodyear Blue Streaks Score Again!

Roy Artley Rides an Indian to Victory in 441-Mile Desert Road Race

Once more Goodyear Blue Streak Motorcycle Tires figured in a victory, when Roy Artley, on Nov. 10, astride his new Indian Powerplus, led the field in a 441-mile race over the desert roads of Arizona.

From Springerville to Phoenix, Goodyear Blue Streaks carried Artley and his Indian in 13 hours, 2 minutes, 2½ seconds, adding another laurel to the four inter-city records made by Artley in as many starts.

Once again Goodyear Blue Streaks have justified the faith placed in them by the rider.

Once more Goodyear Blue Streaks have been put to the test and have not been found wanting.

Goodyear Blue Streaks have again demonstrated their ability to come through with flying colors where skid or sudden swerve would spell disaster—where tire trouble would take its toll of valuable time

No wonder the speed kings choose Goodyear Blue Streaks.

JERSEYITES SET 24-HOUR SIDECAR RECORD

Werner and Holton, Using 1916 Harley-Davidson Outfit, Cover 545 Miles Over New Jersey Roads; Tire Troubles and Stops For Fuel and Food Prove Costly

By ELLIOTT B. HOLTON

Left, Taking on Fuel at Beachwood, 190 Miles Out; Center, Joseph B. Werner; Right, Holton in Sidecar and Werner Driving at Wading River Just After a Tire Repair

NEWARK, N. J., Nov. 20.—Joseph B. Werner, of Passaic, driving his 1916 Harley-Davidson sidecar outfit, with the writer as passenger, observer, etc., rolled up 545 miles between 6:05 p. m. Thursday, Nov. 16, and the same time Friday night, thus creating a 24-hour amateur sidecar record, the event being F.A.M. sanctioned.

The actual riding time though, was but 19 hours 32 minutes, for we wasted some 28 minutes in tire troubles and incidental stops for fuel and food.

A Quiet Start

Little was said of the attempt beforehand, for the local authorities frown on record-making dashes over Jersey roads; so we slipped out of Newark a few minutes past six, from the Carl W. Bush agency, like gray ghosts, drifting silently along until we had passed the Amboys—then Joe kicked old "Hap" Lytle in the shins and from then on our approach was heralded by the deep bass drone of the open cut-out.

A moment's stop in Freehold for gas, 43 miles out at 7:44, and we were again on our way. Reaching Tom's River at 8:32 p. m., we swung the corner into the course we had mapped out, a big circle measuring 122 miles around, over gravel roads with long straightaways, with no gear work necessary, and but few built-up towns along the way.

Burning the Wind

Steadily we tore a hole through the biting cold darkness, and when we raised the lights of Mt. Holly at 9:58, just 103 miles out, we welcomed a chance to take a swig from the Thermos bottle while filling up on fuel. After a stop of 11 minutes we slipped away, promising the garageman that we would be back around 2 a. m.; but we, like others, were too optimistic. We burned the wind for the next 47 miles, and then, just two hours out of Mt. Holly, while crossing the long wooden bridge at Wading River, we noticed a softness in the sidecar shoe.

All hands overboard and to work replacing the defective tube, but it was slow work. On a raw November night, when the frost is falling heavily and ice is coating puddles along the roadside, your hands are too numb to respond nimbly and your knees quake so that you are unsteady on your feet; so we used up 39 precious minutes before we were under way once more. The time was 12:46 a. m., and the mileage 150.

We resumed our ride and Joe moved the pace up a bit to catch up some of that lost mileage. For the next 23 miles all was serene and we reeled them off in 45 minutes; then, as we were passing through Barnegat, BANG! went the sidecar shoe and out came the repair kit, for we had no more good tubes. Well, believe it or not, when we got the cement out, the stuff was so stiff from the cold that it acted like taffy and frying it on the headlight didn't improve it much so we made a poor job of the patch; it leaked slowly but we got away again at 1:58 a. m.

Not long after that Joe made the alarming discovery that we were way low on gas. Well, here was a situation! Where could we expect to get fuel at the ungodly hour of 2:30 a. m., especially in these jerkwater towns down this way? Then we came up to a garage that had a light burning over a sign that read "Wake the man." Did we? Well I should smile.

We pulled into the garage, fixed that patch all over again and tanked up on fuel. This at Beachwood, just below Tom's River, 190 miles out and from 2:40 to 3:05 a. m.

The Jinx Once More

Off again, we clocked 19 miles before we had another tap on the shoulder from Old Man Jinx; then he snatched off a sideplate on the connecting link of the long drive chain and we remained stationary for 10 minutes fixing it up.

At 4:37 a. m. we returned to Mt. Holly, woke up the man in the garage and wasted 25 minutes in thawing out inside and eating breakfast; then we returned to the grind again.

ARMY RIDERS START 2700-MILE TRIP

Motorcycle Couriers Leave McAllen at Midnight, November 21, for Dash Under Military Conditions to Albany; Carry Message from Gen. O'Ryan to Governor Whitman

McALLEN, Tex., Nov. 22.—Dan LeR. Dresser and Harvey Edwards left at 12 o'clock last night on their dash from Camp McAllen to Albany, N. Y., with a Harley-Davidson motorcycle and sidecar. They carry a message from Major General John F. O'Ryan, of the New York National Guard, to Governor Charles Whitman, of New York, and will make the entire trip under strict military field conditions.

As was exclusively announced in **Motor Cycle Illustrated** recently, the trip is planned to impress Army officials still further with the importance of the motorcycle as an adjunct to the military organization of the country, and the riders carry their full field kits, excepting their rifles.

Stock Model Used

A 1917 Harley-Davidson and sidecar, both stock models, arrived at Camp McAllen a few days ago from the factory, and Dresser and his partner immediately took the outfit out for a trial spin over some of the roughest roads in the vicinity. They found the motor to be in perfect condition for the 2,700-mile trial, and as a result no further time was lost in obtaining official sanction for the start.

Dresser, who was a member of the motorcycle company of the Seventy-First New York when that unit was sent to Camp McAllen, has of late been on special detail for Major General O'Ryan, while Edwards has also had plenty of experience as a motorcycle dispatch rider at the border. The team will take turns at driving the motorcycle day and night on the long northward trip.

No Fixed Schedule

Owing to the poor condition of many of the roads to be traversed, it has been impossible to work out a very definite running schedule, but with fair luck it is expected that the military riders will reach Albany in a week.

The route to be followed by the motorcycle couriers on the trip is as follows: From Camp McAllen to Rio Grande (a run of about 40 miles over uncharted trails), to Laredo, to Cactus, to Cotulla, to Pearsall, to Devine and thence to San Antonio, Tex. From San Antonio the route leads to Austin, to Waco, to Dallas, to McKinney, to Denison and to Oklahoma City, Okla. They will then strike through Guthrie and on northward to Wichita, Kan. At Florence, Kan., they will head eastward and proceed through Emporia, Kansas City, Higginsville, Mexico, Louisiana, Jacksonville and finally reach Springfield, Ill.

The Eastward Route

From Springfield the route leads through Decatur, Indianapolis, Cambridge and Richmond, Ind., to Springfield, Ohio, and through Columbus and Zanesville, Ohio, to Wheeling, W. Va. Striking into Pennsylvania, the couriers will go through Washington, pass to the south of Pittsburgh and then touch at Uniontown on the way to Cumberland, W. Va. They will then proceed through Hagerstown, Gettysburg, York, Lancaster and Philadelphia, en route to Trenton, N. J. From Trenton the route leads through New Brunswick, Elizabeth, Newark, New York, Poughkeepsie and Hudson to Albany, the final destination.

As has already been stated in these columns, Dresser and Edwards will use a 1917 Harley-Davidson and sidecar, of stock type throughout. They will carry 110 pounds of equipment between them and will be prepared to camp along the route, although they will not be barred from sleeping in a hotel when one happens to be handy.

BANQUET OF SALESMEN

CHICAGO, Nov. 18.—A banquet and get-together meeting of salesmen of the Chicago Cycle Supply Co. was held at the Railroad Club, in the Karpen Building, Saturday noon. Short talks were given by H. P. Hanson, president of the company, Horace Huffman, of the Davis Sewing Machine Co., Mr. Bean, of the Bean Company, and Messrs. Staff and Reddick, of the Silvex Company.

BOSTON AGENTS RIDE TO DETROIT

Pair of Hub Henderson Representatives Make Trip to Home of Four-Cylinder Model; Encounter Much Mud

Left, Harry Hubbard Near Utica; Right, Henry Andrews in Batavia Mud

BOSTON, Mass.—Harry A. Hubbard and Henry E. Andrews, of the General Motorcycle Sales Company, of this city and Providence, have just returned from a trip to Detroit. Leaving this city on November 2, they rode their Henderson to Utica, N. Y., over the 1,000-mile endurance run course, meeting good weather all the way. From Utica to Buffalo, however, they had two days of wet weather.

The boat was taken from Buffalo to Cleveland, at which latter place the road was again resumed. There were 45 miles of poor riding, but the surfaces grew better as Detroit was neared. While in the latter city the pair visited the Henderson factory, as well as going sightseeing.

The return trip was made by boat to Buffalo, followed by a run of 14 hours on the road to Boston. The only trouble experienced was two punctures to Andrews' machine.

ROBERTS AVENUE HILL FOR YONKERS CLIMB

Ellis Announces a Change of Location for Thanksgiving Day Competition—Three Trials for Each Man

YONKERS, N. Y., Nov. 20.—F. A. M. Commissioner George Ellis, who is promoting the hill climb in this city for Thanksgiving Day, Nov. 30, announces that the Roberts avenue hill will be the scene of the climb instead of Elm street hill, which was orginally chosen. The climb will start at 2 p. m. Each competitor will have three trials. The entry fee will be 50 cents instead of 25 cents.

Mr. Ellis calls attention to the best method of getting to the hill. Palisade avenue should be traversed from Getty Square to the end of the Park avenue trolley line, on Palisade avenue. Here a turn east is to be made to Nepperhan avenue. Caution should be observed descending to Nepperhan avenue by reason of the sharp turn on it. By following this route delays will be avoided.

NEW CLEVELAND DISTRIBUTORS

Weinstock-Nichols Co., Big Motor Accessory Dealers, Will Sell the Lightweight in California, Arizona and Nevada

CHICAGO, Nov. 18.—One of the surprises of Show Week came in an announcement by General Sales Manager Gilbert, of the Cleveland Motorcycle Co., that the Cleveland distributing agency for California, Arizona and Nevada has been placed with the Weinstock-Nichols Co., which operates one of the largest automobile accessory businesses on the Pacific Coast, with stores in San Francisco, Oakland and Los Angeles.

The Cleveland has been handled heretofore in the territory referred to by C. Will Risden, of Los Angeles.

It is stated that the Weinstock-Nichols Co. will organize a separate department to take care of the Cleveland interests, under the direction of Sales Manager H. J. Banta, who was formerly with the Iver Johnson Arms & Cycle Works, of Fitchburg, Mass. The company has a road force of 14 men and a retail staff of 20 men, who will sell the Cleveland to the trade.

Paul J. C. Derkum will have charge of Cleveland sales for the new distributors in Southern California, with headquarters in Los Angeles. Derkum will devote all his time to the Cleveland campaign.

Sales Manager Gilbert, of the Cleveland company, also stated at the show that his company has closed contracts for representation in Australia, New Zealand, Java, Holland, Denmark, Norway, Sweden, Russia and the Philippines.

ITALIAN R-S AGENT

Berardo Has Rights for Italy and Switzerland—Sold 350 Last Season

NEW YORK.—Luigi Berardo, who is making his headqaurters in this city, has contracted with the Reading Standard Company. of Reading, Pa., for from 500 to 1,000 R-S motorcycles to be shipped to his headquarters at Torino, Italy, at the rate of 25 per week. Mr. Berardo takes care of the shipments in New York, while his partners attend to the Italian and Swiss distribution, the firm having the selling rights for Italy and Switzerland.

For the six months just passed, Mr. Berardo has shipped 350 Reading-Standards to Italy. His 1917 shipments will commence within a few days.

CLOSE SEASON

With Benefit Smoker After Series of Successful Race Meets

READING, Mass.—George W. Davis, local Indian agent, and Charles J. Martin, selling the Harley-Davidson at Wakefield, Mass., combined to finish up the 1916 season by giving a smoker and entertainment on the evening of November 13. The proceeds are to be given to "Wild Bill" Williams, the rider who was injured in practice before the last race meet run off by Davis and Martin.

Both Reading and Wakefield saw some lively races this season under the promotion of these two dealers, and so successful were the events that a bigger series is planned for 1917.

A PIONEER MOTORCYCLE

CHICAGO.—One of the interesting private motorcycle exhibits during the Show was a Harley-Davidson motor of the vintage of 1903, which was displayed at the salesroom of C. H. Lang. The machine had been ridden about 83,000 miles, according to the records of its various owners, before it came into the possession of Mr. Lang. The motor, which was one of the first produced by the Davidsons, is of 3¼ horsepower with piston displacement of 26.94 cubic inches.

THE CONTEST

Owing to the heavy pressure of Chicago Show news in the November 9th and 16th issues it was found necessary to omit the Motorcycle Identity Contest, but it is continued in this number.

The contest will be found on page 41, with full scores to date and the percentages of the leading competitors.

PHOTOGRAPH DAY

Indian Celebration in Los Angeles Well Attended—Prizes Are Awarded

LOS ANGELES, Cal.—Indian riders from all parts of Southern California assembled at the headquarters of the Pacific Motor Supply Company, Indian distributor, last Sunday to participate in the Indian Photograph Day celebration. Motion pictures of the affair were taken, following which an inspection was made of the machines.

The judges in the prize awards gave the ladies gold watch for the best equipped sidecar outfit to L. C. & Mrs. Crowl, of Orange. The prize for the neatest and best florally-decorated tandem went to Raymond Sturges, with Floyd Lusher as passenger. G. H. Tunler won the prize for the neatest and best equipped machine, a spotlight. The prize for the oldest and best appearing Indian was given to Mrs. Daisy Meyers, who had a 1907 battery model.

Manager E. Lebell, of the Pacific Motor Supply Company, said that this event brought out a far bigger crowd than was expected. It created a great deal of interest, he stated, especially in sidecaring.

HAWS IS A SEASONED FIRESTONIAN

New Manager of Cycle Tire Department of Firestone Company Has Worked Up Through Several Other Branches

AKRON, O.—Henry E. Haws, who has just been appointed manager of the cycle tire department of the Firestone Tire & Rubber Co., as told in last week's issue, has been with the Firestone people since August 1, 1915, having formerly been with the firm of George A. Haws, of New York City, as manager of the automobile oil department.

Henry E. Haws

During his time with the Firestone company, Mr. Haws has been connected with the pneumatic tire and sales promotion departments, in addition to the cycle department, and therefore enters upon his new work with a thorough knowledge of Firestone policies.

As was reported in the original item referred to Mr. Haws succeeds Charles E. Speaks as manager of the cycle tire department, Mr. Speaks having been transferred to the truck tire department. In the transfer of Mr. Speaks to another phase of Firestone activities the cycle field loses a tireless and capable worker.

MEYEROWS EXPAND

Take Adjoining Store to House Used Machines for Special Sale

BOSTON, Mass.—Meyerow Brothers have taken the premises adjoining their store at 149 Berkley street, to care for the used machines. They are making a special drive in these mounts and have stocked up close to the century mark in second hands.

This is the second expansion for the Meyerows within a year, the first being a move from 9 Cooper street.

STOCKING THE "BRILLIANT" BURNER

SPENCER, O.—From the Monosmith Brothers Co. comes the announcement that a large number of jobbers of motorcycle accessories throughout the United States are now including in their stock the "Brilliant" burner, manufactured by the firm. Having obtained excellent results in tests of trial sets, the jobbers have not hesitated to place substantial orders. The "Brilliant" burners are sold under a "one price to dealer" and "one price to jobber" arrangement, and the discounts to both are liberal.

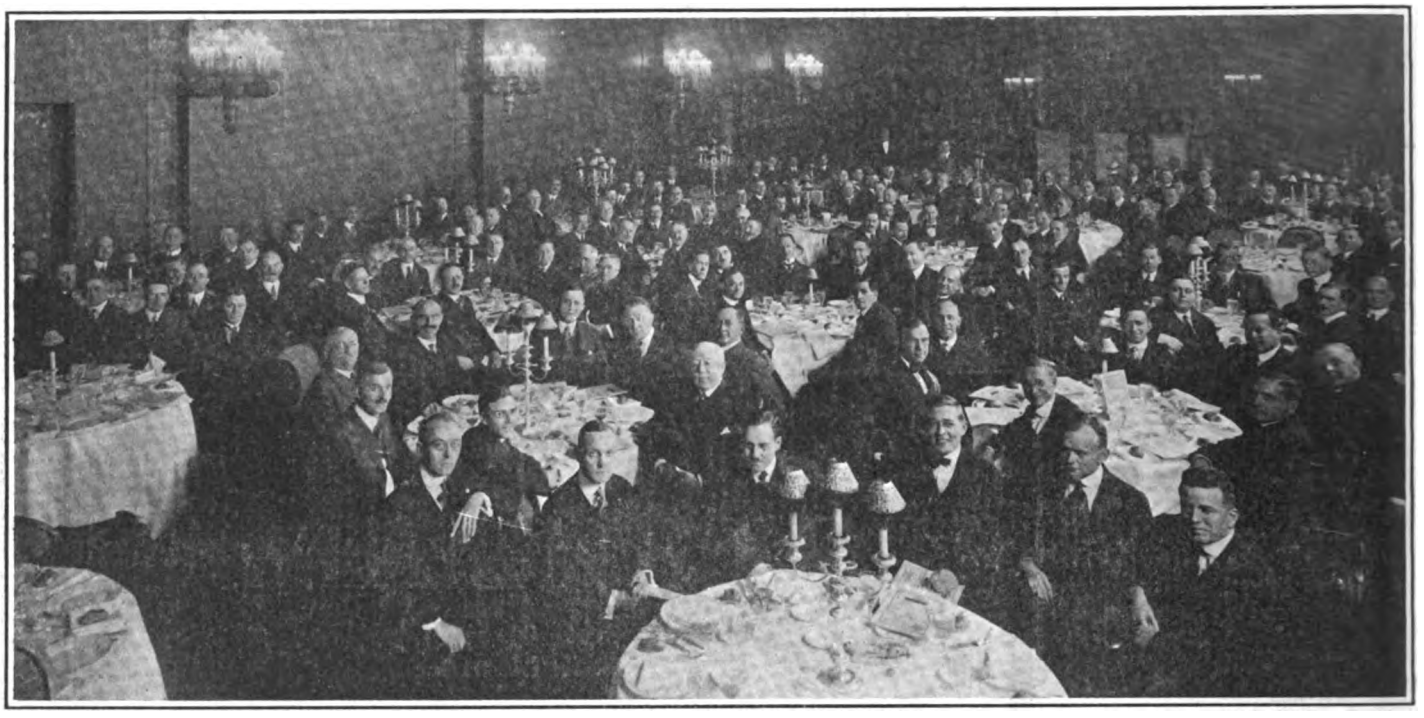
CYCLE MEN DINE AND DISCUSS OUTLOOK

Two Hundred Trade Representatives Are Guests of Parts Makers at Hotel Congress; Speakers Laud Million Bicycles Campaign; Similar Movement Coming for the Motorcycle



Parts Makers and Their Guests at Luncheon Which Preceded Joint Meeting of Trades Bodies

CHICAGO, Nov. 16.—More than 200 cycle trade men, representing the Cycle Parts & Accessories Association, the Motorcycle & Allied Trades Association, the Cycle Jobbers' Association of America, and the Bicycle Manufacturers' Association, partook of a luncheon as guests of the Parts Makers in the main dining room of the Hotel Congress this afternoon. Following the luncheon there was a joint meeting of the Cycle Trades bodies at which members of the various associations and a few outside visitors spoke on various phases of the cycle industry.

The first speaker was Lou M. Wainwright, of the Diamond Chain & Mfg. Co., who told of the big things accomplished last year by the Million Bicycles Committee, and the bigger things to grow out of the United Cycle Trade Directorate movement. Mr. Wainwright made a plea for a whole-hearted spirit on the part of all of the two-wheeler trade folk, both from a financial and moral standpoint.

Grady Urges Co-operation

J. W. Grady, of the J. W. Grady Co., and a member of the Cycle Trade Directorate, was the second speaker. He urged upon the members of the Cycle Trades the advisability of forgetting petty jealousies and of contributing to the Directorate fund the amounts needed, and held forth a promise of the directors' ability to raise the necessary funds in years to come without the necessity of resorting to further collections.

H. S. Quine, who was one of the members of the Million Bicycles Committee, and a leading spirit in establishing the movement, told the assembled delegates that they owe it to themselves not to forget the Cycle Trade Directorate and the boosting movement the minute they have contributed to the fund. Even more important than the contribution, according to Mr. Quine, are the constructive criticism and valuable suggestions coming from the cycle folk who are chiefly interested in the exploitation of the bicycle.

The Jobber's Viewpoint

Mr. Quine was followed by Messrs. Hyslop and Gibson, representing the Canadian cycle trade, while R. J. Leacock, of the R. J. Leacock Sporting Goods Company, gave a little talk on the movement from the viewpoint of the jobber. T. W. Henderson, of the Henderson Motorcycle Co., brought forth the fact that the motorcycle folk were so impressed by the accomplishments of the Million Bicycles Committee that the M. & A. T. A. is this year launching a campaign of the same sort for the motorcycle. M. C. Stokes, of the United States Tire Co., told interestingly of how the Parts Makers view the situation as it exists today.

Other Addresses

Colonel Pope, directing secretary of the Bicycle Manufacturers' Association, gave a few words of encouragement; C. F. Olin, of the Directorate staff, spoke of the possibilities of concerted action, while Louis Schwab, also of the Directorate staff, and head of the committee which is collecting the necessary funds to carry on the movement, made a plea for unselfish financial support for the Directorate's work during the coming year.

MORE HELP FOR THE DEALER

Dealers' Betterment Committee of M. & A. T. A. Will Estimate Funds Needed and Report to Board of Directors in New York, Dec. 5.

CHICAGO, Nov. 18.—The newly-appointed Dealers' Betterment Committee of the Motorcycle and Allied Trades Association, headed by H. A. Haws, of the Firestone, got together yesterday for a little discussion on the ways and means of putting into action their campaign which was approved at the Atlantic City meeting of the association.

The committee, which comprises Chairman Haws, T. R. Thomas, of Goodyear; Frank B. Rodger, of the Harley-Davidson; J. B. McNaughton, of the Indian; H. L. Corey, Champion Spark Plug Co., and M. E. Topel, of the Splitdorf, appointed Thomas as secretary.

After some discussion, all bearing on the work in hand, it was decided to submit to the Board of Directors of the M. & A. T. A. an estimate of the cost of carrying on the campaign and a request for the appropriation of sufficient funds for the purpose.

Chairman Haws and T. R. Thomas undertook to determine, within the course of

Digitized by Google

the next week or ten days, the approximate cost of printing and postage incidental to carrying on the work of the committee, and to submit these costs at a meeting which has been called for Tuesday, December 5, at the Hotel Astor, New York, just prior to the Directorate meeting of the M. & A. T. A.

At this meeting the full and final committee plans will be drawn up for presentation, with the estimated cost to the Board of Directors for action at their meeting, which takes place at the Prince George Hotel, on Thursday December 7, at 12:30 p. m. It is believed the outlay can be kept within moderate limits.

CHASE ON C. P. & A. A. COMMITTEE

Succeeds W. J. Surre as Chairman of the Association's Entertainment Committee; Surre Too Busy to Serve; Moorehouse Remains

CHICAGO, Nov. 16.—Frank Chase, newly-identified with the Atherton coaster brake, was elected to head the Entertainment Committee of the Cycle Parts & Accessories Association at the meeting of that body at the Hotel Congress today; acting with Chase on the committee is C. E. Moorehouse, of the Standard Company.

W. J. Surre, who for years past has headed the Entertainment Committee, and who has put both the mid-summer convention at Atlantic City and the annual winter get-together meeting through with a snap and a zest that won him praise from all sides, asked to be relieved of the work owing to the press of Continental business.

After a consultation through the intermediary of a committee comprising Messrs. Wainwright and Stokes, it was decided to go to Atlantic City again for the mid-summer convention of the Cycle Trades, at which the Parts Association acts as host. The dates, of course, have not yet been finally decided upon; but, conditions permitting, it was expressed as the desire of the association that the convention he held during the first week in August.

The next meeting of the association was called for Thursday morning, December 7, at the Hotel Astor, New York, to be followed by a luncheon, to which members of the other Cycle Trades Associations are invited, and a joint meeting of the associations in the afternoon.

TO MEET IN NEW YORK

Bicycle Manufacturers' Association Will Hold Session December 6

CHICAGO, Nov. 16.—Aside from the decision to hold its next meeting in New York, at the Hotel Astor, on Wednesday, Dec. 16, during the running of the New York Show, there was only a general discussion of plans at the Tuesday night meeting of the Bicycle Manufacturers' Association, at the Hotel Congress.

Those present were: F. S. Wise, Miami Cycle & Mfg. Co.; J. P. Fogarty, Westfield Mfg. Co.; E. J. Lonn, Great Western Mfg. Co.; W. G. Schack, Emblem Mfg. Co.; Ignaz Schwin, Arnold Schwin & Co.; H. Huffman, Davis Sewing Machine Co.; Pete O'Horo, Excelsior Cycle Co.; D. P. Harris, Rollfast; Fred L. Brown, Pierce Cycle Co., and Colonel Pope, secretary of the association.

TOURED TO THE SHOW

S. L. Clarke and W. J. Teubner drove to the Show from Dayton, O., on an Indian sidecar combination. They made the 403 miles in 24 hours, with roads in bad condition at that. Teubner says that 1917 is going to break all records for motorcycle touring, particularly in the West.

VISITOR FROM HOLLAND

A. G. Koldewin Closes Cyclemotor and Emblem Contracts at Show

CHICAGO, Nov. 18.—Perhaps the Chicago Show visitor who traveled the greatest distance is found in the person of A. G. Koldewin, of Apeldorn, Holland, who came to obtain a new Cyclemotor contract for the Netherlands for the coming season.

Koldewin sold 500 Cyclemotors during 1916, and being convinced that the new two-bar model will greatly increase interest in the little bicycle powerplant in the lowlands of Europe, he signed up for 1,500 of the machines at the Show.

Koldewin also made connections with the Emblem folk and with several of the accessory people, and left Chicago highly satisfied both with the Show itself and with the business transacted.

INDIAN IN HARLEM

Is Handled by Gus Rotholz, the Veteran Dealer, for the 1917 Season

NEW YORK, Nov. 20.—Gus Rotholz, the veteran dealer, has taken the agency for the Indian for this city in the Harlem section, as far north as 155th street. His headquarters are at 1691 Park avenue. Rotholz formerly handled the Reading Standard for the metropolitan district, and is a pioneer New York agent.

JACK PURDY DROPS IN

CHICAGO, Nov. 18.—Jack Purdy, formerly of Purdy Bros., and well known to the cycle trade, dropped in at the Show. Jack has just returned from a sojourn of two years in South America where he has been employed by the Swift Packing Co. He believes there is a great field for the American motorcycle in South American countries.

CYCLE JOBBERS TO HAVE BULLETIN

Association Will Issue It Monthly to Further Educational Work; Another Innovation Promised Is a Cycle Jobbers' Directory

CHICAGO, Nov. 16.—The most informal meeting that the Cycle Jobbers' Association of America has had in some time took place at the Hotel Congress today.

From start to finish, almost without interruption, there was lively discussion, and the talk and the venting of views brought out many valuable points and suggestions.

Two matters were decided upon which are of prime importance to the bicycle trade. The first was the decision of the Jobbers' Association to issue a monthly bulletin to the cycle dealers whom they serve, and the second was the decision to publish a cycle jobbers' directory, in which will be listed all of those types of bicycles and parts coming within the province of the legitimate cycle jobber, as defined by the Cycle Jobbers' Association.

Strong Representation

Those present at the meeting, at which Keyser Fry, of Reading, presided, were as follows:

Fred I. Willis, Central Rubber & Supply Co., Indianapolis; Hans Johnsen, Hans Johnsen, Dallas, Tex.; C. A. Hall, Hall, Williams Co., Minneapolis; H. Greenberg, Detroit Cycle Supply Co., Detroit (visitor); D. A. McNeill, Chicago Cycle Supply Co., Chicago; H. P. Hansen, Chicago Cycle Supply Co., Chicago; H. Perlman, Perlman Cycle & Auto Supply Co., New York; L. J. Hood, Walthour & Hood Co., Atlanta, Ga.; J. W. Grady, J. W. Grady & Co., Worcester, Mass.; Keyser Fry, of Keyser Fry, Reading, Pa.; L. J. Kellner, Haverford Cycle Co., Cleveland, O.; E. B. Sauffley, Sauffley Supply Co., Kansas City; F. W. Grubb, Union Supply Co., Toledo, O.; G. H. Westing, G. H. Westing & Co., Indianapolis; H. A. Bremer, Lockwood-Luelkemeyer-Henry Co., Cleveland, O.; T. C. Larter, Collister & Sayle Co., Cleveland, O.; William Foerstner, Amana Society, High, Iowa; Pete Cummings, Cummings & Co., Galveston, Tex.; F. A. Alford, Toledo Rubber Co., Toledo, O.; R. J. Leacock, R. J. Leacock Sporting Goods Co., St. Louis; Charles J. Schmelzer, Schmelzer Arms Co., Kansas City; F. J. Goodman, Vim Cycle Hardware Co., Buffalo. N. Y.; Max M. Sladkin, Haverford Cycle Co., Philadelphia; C. J. Smith, C. J. Smith & Co., St. Paul, Minn.

WELLS TO MAKE TRIP FOR THOR

CHICAGO, Nov. 18.—C. A. Wells, special factory representative for the Thor, made arrangements to leave right after the Show for a flying business trip to Minneapolis and St. Paul, thence down to Omaha, Lincoln and Kansas City. He counts on being back in time to attend the New York Show in the interest of the Thor.

WALKER WAS BUSY AT CHICAGO

BOSTON, Mass.—W. J. Walker, the local Harley-Davidson man, has just returned from a trip to Chicago where he took in the motorcycle show last week. He represented the New England Motorcycle Dealers' Association at the meetings of the Allied Trades Association in the Illinois capital.

WOODS IN A NEW LOCATION

TRENTON, N. J.—R. S. Woods, local Harley-Davidson agent, has moved his headquarters to 115 E. Hanover street, where he occupies a newly-built store.

SHE SEES BIG BUSINESS!

The Chicyco Girl Who Helped to Welcome Visitors at the Show Booth of the Chicago Cycle Supply Co.

SIX LIGHTWINS FOR FRANKEL

SHREVEPORT, La.—V. L. Frankel, handling the Indian, is all smiles these days as the 1917 demonstrator has arrived. He has orders for six of the Lightwins, which were taken sight unseen. He has all the repair business that the shop can handle at present.

HAMMER VISITS MILWAUKEE

MILWAUKEE, Wis., Nov. 20.—Elmer H. Hammer, Smith Motor Wheel dealer in Bristol, Tenn., journeyed here from the Coliseum show last week to visit both the Harley-Davidson and the A. O. Smith plants. The Schmelzer Arms Co., Kansas City, Mo., and the Omaha Bicycle Co., Omaha, Neb., will sell the Smith Motor Wheel next season.

GETS INDIAN DEMONSTRATOR

SHREVEPORT, La.—The Frankel Motorcycle Garage, of 120 Milam street, local Indian dealers, has received its 1917 demonstrator. The two wheeler has been on display since its arrival and has attracted quite a bit of attention.

1917 HENDERSON IN LOWELL

LOWELL, Mass.—The Lowell Cycle Shop, local Henderson representatives, have just received their 1917 demonstrator.

YOUTHFUL VISITORS APLENTY

Souvenirs at Eclipse and Atherton Show Booths Were in Great Demand; Free Tickets Brought Hundreds of School Children

CHICAGO, Nov. 18.—Souvenir donors were few and far between at the Chicago Show; and that's one of the reasons why the booth of the Eclipse Machine Company was so popular, especially with the younger visitors. From the juvenile standpoint at least the Eclipse booth was the real piece de resistance of the Show, for the full Eclipse staff, headed by E. J. Dunn himself, was kept busily engaged in handing out balloons, pennants and other souvenirs.

More Youngsters on Deck

The number of young people who visited the Show, by the way, was much larger than heretofore. The influx of youngsters began early in the week, and doubtless the beginning came as a result of the increased interest in the cycle brought about by the efforts of the Million Bicycles Committee. During the last few days of the Show, however, the management decided to donate a number of tickets to the schools and high schools. These brought in great numbers of youngsters who were deeply impressed by what they saw, and each of whom went home to beg a bicycle or Cyclemotor, or even a motorcycle, as a Christmas gift from some doting parent.

Not less appealing to the youngster than the Eclipse booth was the Atherton coaster brake stand, where W. F. Emerson, Frank T. Chase and Bob Lawson, assisted by Messrs. Kittle and McKennet, were giving out apples, pennants and attractive buttons.

Smith Attractions

While there were no souvenirs to be gathered at the booth of the A. O. Smith Company, the Smith Flyer, as well as the Smith Motor Wheel, proved a strong magnet for the younger generation and also for many a cycle and motorcycle dealer. The Smith company had one of the little Flyers in front of the Coliseum all week for demonstrating purposes, and it was kept busy from the time the Show opened until it closed. The Smith stand was in charge of Sales Manager J. A. Benson, who was assisted by J. E. Van Toor, A. H. Beckman, O. T. Thompson, W. Liedenbach, Frank Zuerney, George Gauger and S. N. Hope. R. Stanley Smith, the engineer who developed the Motor Wheel, dropped in several times during the Show week to look on.

The Show has fully convinced the Smith Company that the new Flyer is destined to be every bit as popular as the motor wheel has become.

MAY USE PARK ROAD

City Permits Motorcyclists to Ride Incline Up Mount Royal

MONTREAL, Que.—The City Council of Montreal has decided at last to permit motorcyclists to use the park road by means of which the ascent of Mount Royal can be accomplished. This is a steep and winding incline more than two miles long and the highway will undoubtedly become a popular testing ground for the riders.

The only motor vehicle which has ever reached the top of the local mountain was an automobile in which Mayor Martin of Montreal was the occupant. He made the ascent in defiance of the ordnance which prohibited the use of motor vehicles on the park property.

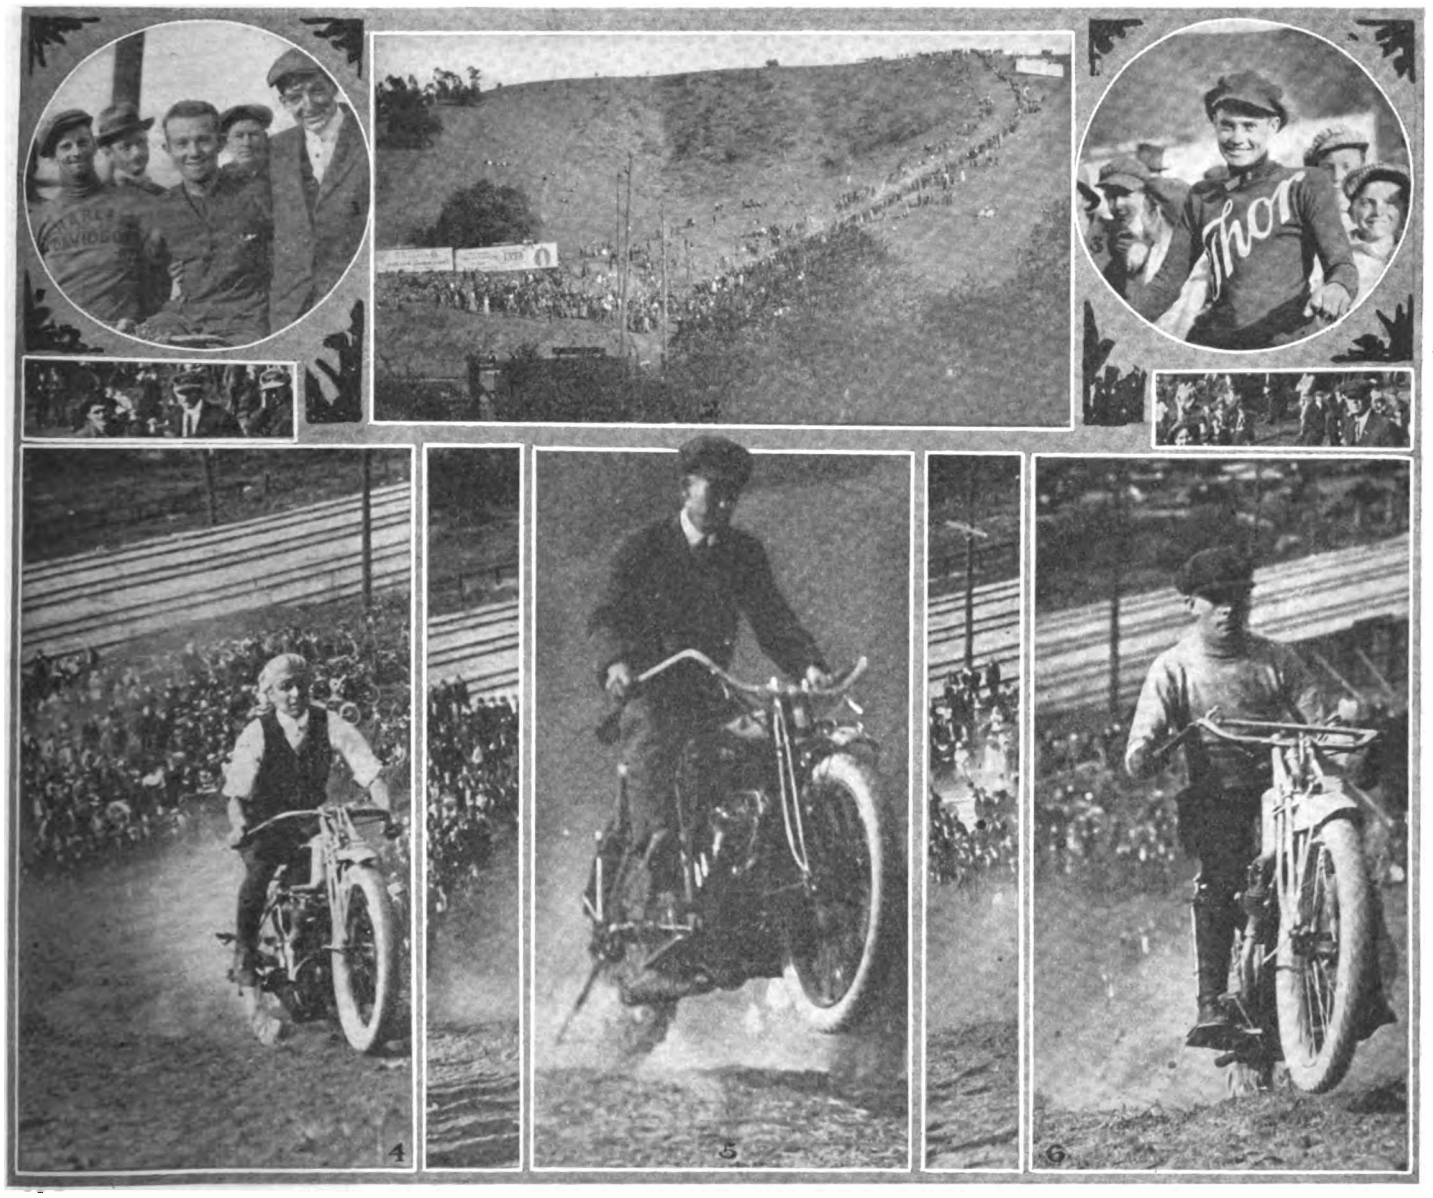
FINAL SCORES IN L. A. HILL-CLIMB

Club Adjudges Perkins' Third Trial Best Time of Day; Official Rating in Each Class; How Entrants Performed on Hippodrome Hill in Spirited Competition



1, Dudley Perkins, Harley-Davidson Pro. Who Made Ascent in 22 4/5 Seconds; 2, View of Course on Hill Showing Crowd of Spectators; 3, Sam Hamilton, Flying Merkel Rider, Who Wore Thor Jersey During Climb; 4, Wells Bennett, Excelsior, Second in Pro. Class; 5, George Rubsch, Indian, Going Over the Crest; 6, L. E. Reed, with Excelsior Taken Out of Crate for Event

LOS ANGELES, Cal., Nov. 17.—Final reports on the Hippodrome Hill climb held by the Los Angeles M. C. on Nov. 12 give the following official times for the various competitors. In the professional class, Dudley Perkins, Harley-Davidson, ascended in 22⅘ seconds, making the best time of the day; Wells Bennett, Excelsior, 23⅕ seconds, and Sam Hamilton, Flying Merkel, 24 seconds. This gives a speed of a mile in 2:53, based on Perkins' time.

In the amateur class, first place goes to Benny Hite, Indian, 26⅖ seconds; second place to Charles Wride, Harley-Davidson, 27⅗ seconds, and third place to Ed Baque, Indian, 27⅗ seconds. Hite and Baque come from Pomona.

The performances of the 31 competitors in the climb are given below, the successive numbers indicating the times on the three trials given each man. Where a competitor did not complete the climb in a trial the fact is indicated by an X:

L. E. Reed, Excelsior, X—37⅖—38; Harold Frank, Excelsior, 35⅗—30⅗—29⅖; C. E. Young, Indian, 35—40—36; Al Rhoades, Harley-Davidson, 34⅕—33⅕—31⅗; Charles Moist, Indian, 28⅘—30⅕—29⅕; Kenneth Day, Excelsior, 37⅘—34⅗—39⅗; Lem Sahagin, Harley-Davidson, 30⅕—30⅘—30; Wells Bennett, Excelsior, 25—23⅕—24⅕.

Ben Hite, Indian, 28⅘—29⅖—26⅖; Ed Baque, Indian, 31⅘—33⅘—27⅗; Jimmy Leonette, Excelsior, 39⅕—36—39⅕; A. Stetler, Indian, X—38⅖—38⅘; Earl Martin, Harley-Davidson, 30⅘—31⅖—X; Shorty Meyers, Henderson, X—X—37⅘; Newton More, Harley-Davidson, 33⅘—X—34⅗; Roy Du Granute, Thor, X—X—X; Jake Vetter, Indian, 32⅕—X—32⅗.

Charles Rowland, Indian, 43—X—40⅕; Roy Ivans, Indian, 36—34—32⅕; Dudley Perkins, Harley-Davidson, X—23—22⅘; Blick Wolters, Henderson, X—X—X; Frank Clayton, Harley-Davidson, X—X—X; Harry Wright, Indian, X—41⅕—35⅘; J. Nelligan, Indian, X—X—X; Charles Wride, Harley-Davidson, 28⅖—27⅖—31⅕; Fred Ludlow, Henderson, X—X—X; Jack Saint, Henderson, X—X—47⅗; Sam Hamilton, Flying Merkel, 24⅗—24—25⅗; Roy Breiter, Thor, 35⅘—36—30⅗; George Rubsch, Indian, 32—34⅕—34; Bert Gilmore, Excelsior, 40⅘—41⅗—43.

CARSLAKE FOR COAST

BROWNIE CARSLAKE, of the Firestone Tire & Rubber Company's traveling staff, has been given the Pacific Coast territory formerly traveled by Stewart Slosson. Slosson has been transferred East at his own request.

REORGANIZATION OF GROSSMAN CO.

Red Head Spark Plug Maker Now Emil Grossman Mfg. Corporation —Capitalization $320,000—Facilities to Be Increased

BROOKLYN, N. Y., Nov. 16.—The Emil Grossman Manufacturing Co., Inc., has been reorganized as the Emil Grossman Manufacturing Corporation, with a capitalization of $320,000. The capital stock is divided as follows: $150,000 of first preferred, $160,000 of second preferred and $10,000 of common stock. The entire capital has been paid in.

The officers of the new corporation are: Emil Grossman, president and general manager; L. M. Schwartz, vice-president; Harmon August, treasurer; C. L. Hemphill, secretary and assistant treasurer.

The reorganization of the company is a part of a plan for the enlargement of its business. The productive efforts of the concern will be concentrated upon Red Head sparkplugs and certain motorcar specialties. The manufacturing facilities in the present quarters, Bush Terminal No. 20, are being increased, while a lease has been taken on Building No. 95 in the big Terminal structure.

This building will be devoted to the rust proof process which the Grossman firm is applying to all metal goods. The production capacity in the grinding, polishing, plating and black enamelling departments will be trebled.

LECTURES FOR DEALERS

Harley-Davidson Experts Give Pointers to Trade Visitors During the Show

MILWAUKEE, Wis.—A special educational lecture course featured the visit of Harley-Davidson dealers to the factory at Milwaukee during the week preceding the Chicago Show, Show Week itself, and the following week.

In the morning the visitors were shown through the several factory buildings, and the afternoon was devoted to lectures in charge of Rudolph Pietsch, head of the new Harley-Davidson service center plan.

Dealers and repairmen were given a thorough course in repair work by talk and demonstration from Emil Sauler, head of the repair department, who specialized on motor and allied repair work, and by H. E. Jamison, on electrical work.

The lectures were concluded by a talk by E. B. Elsner, office manager, who outlined in thoroughly applicable style the Harley-Davidson system of accounting.

WILLARD ADDITION

Storage Battery Firm Starts Another to House Offices and Shop

CLEVELAND, O.—The first of the additions erected by the Willard Storage Battery Company to take care of its rapidly expanding business is now completed. The building will be occupied by the forming rooms, the floor space being 90,000 square feet.

A second new building, upon which work has been commenced, will have two stories and 75,000 square feet of floor space. It will be used for offices, machine shop and storage purposes.

INTERESTING ISSUE

Dayton House Organ Tells of Cycle Construction and Shows Dutch Views

DAYTON, O.—The construction of Dayton bicycles is the chief feature in the November issue of *Daytonagrams*, the house organ of the Davis Sewing Machine Company of this city. Over one-quarter of the issue is devoted to the purpose. On the front cover is a quartet of interesting pictures of Dayton motorcycles in The Netherlands, these having been sent by the Holland representative.

There is an excellent article on advertised goods and a story on the success of a Dayton dealer, as well as short items of value to the Dayton representative.

DOEHLER TO BUILD

Seven-Story Addition to Die Casting Plant in Brooklyn

BROOKLYN, N. Y.—The Doehler Die-Casting Company has let a contract to the Turner Construction Company for the erection of a steel and concrete addition to the present plant at Ninth and Court streets, this city.

The addition is to be 50 x 100 feet, seven stories high, and will cost approximately $150,000.

A SAILOR PROTESTS

Takes Exception to Item Concerning Motorcycle Thief Forced to Join Navy

A. P. BECKER, of the U. S. S. New York takes exception to an item published recently in these columns in which it was stated that a man who had stolen a motorcycle and damaged it escaped jail on his promise to foot the repair bill and join the U. S. Navy. Becker argues rightly that Uncle Sam's Navy is not to be regarded as a dumping ground for thieves, and that the motorcycle purloiner referred to will be summarily ejected as soon as he is located.

It was not the purpose of the item to place the Navy in an unfavorable light, but simply to show that the thief had been forced to enlist in a service that would enable him to become a worth while citizen instead of a public menace. The odds are 100 to one that a man of thieving tendencies who enters the Navy will develop into an upright citizen, or a hospital case, in short order. That's a tribute to the Navy and the boys in it—not a reflection upon them.

OMAHA CLUB

Holds Chicken Dinner and Plans Activities for New Season

OMAHA, Neb.—Members of the Omaha M. C. are looking back with great pleasure to their run of Nov. 4 to Blair and De Soto. Twenty riders participated, the piece de resistance being an old fashioned chicken dinner.

A special meeting of the club will be held on Nov. 13 in the new rooms opposite the post office, when future plans will be gone over.

TUBE COMPANY INCORPORATES

DETROIT, Mich.—Incorporation papers have recently been issued to the Michigan Steel Tube Products Company of Detroit, with a capital of $300,000, for the manufacture of steel tubing and tubular products.

EMPIRE TIRE TO EXPAND

TRENTON, N. J.—The Empire Rubber & Tire Company is to be reorganized and refinanced, in order to obtain the necessary cash to expand its output and fill the many orders now on hand. Final arrangements are still to be made.

JERSEY CLUB TO HOLD HILL-CLIMB

Newark Organization Selects Bed of Cable Road on Orange Mountains as Incline on December 3

NEWARK, N. J., Nov. 18.—The New Jersey M. C. will promote a hill-climb up the Orange Mountains on December 3 at 1 p. m., weather permitting. The location of the hill is about six miles from the club house. Solo and sidecar classes are scheduled, with silver and bronze medals for first and second.

The hill chosen is about four-tenths of a mile long with a rise of 200 feet. The surface is an abandoned right of way for a cable road, the ties and rails being still in place in spots, making the going rough. There will be no restriction as to gearing for the climb. Entry fee is 50 cents per man.

FIRST SHIPMENT

For Merry Now on Way—Big Year Is Looked For

SAN FRANCISCO, Cal.—Edwin F. Merry, California distributor for the Excelsior, is awaiting his first shipment of new machines, which is expected in a few days. He says the advance in prices seems to have no effect whatsoever either on the dealers or on the riders themselves.

LEE ON TOUR

Through Northern California in Company with Treasurer Monks

SAN FRANCISCO, Cal.—Tennant Lee, head of the Henderson Motorcycle Sales Company of Los Angeles, recently stopped in at the Motorcycle Sales Company in this city, on the way to the northern part of the State. He is accompanied by A. B. Monks, treasurer of the company.

Both Lee and Monks are astride new Hendersons. Lee states that money is much easier than it has been in the south

RENEW CONTRACTS

For Harley-Davidson in Northern California with Appeal Company

SAN FRANCISCO, Cal.—Northern and Central California agents who signed up in 1916 have to a man renewed their contracts for the new season with the Appeal Manufacturing & Jobbing Company, distributors for this make. Manager J. D. Fraser for the Appeal company in this city cleaned up a carload of motorcycles within a week after its reception.

A RABBIT DINNER

Motorcyclists of Washington Crossing M. C. Enjoy a Seasonable Feast

TRENTON, N. J.—Members of the Washington Crossing M. C. recently enjoyed a rabbit dinner. The riders who went out with their guns bagged 35 rabbits, and 29 of the boys participated in the feast. Arrangements for the feed were made by President Parker Sweet.

Those in attendance: Milton Briest, Leo O. Hasbrouck, R. W. Helsel, Samuel Pegg, James Umstead, Charles Green, Joe Holmes, J. Swope, J. Hillman, R. Swartz, Olden Combs, Morris Kerns, W. Kerns, H. Trout, John P. Hooper, M. T. Reikosky, P. Cook, C. Meyer, Ray Frost, James Brenan, A. Comfort, Parker Sweet, T. Castle, E. Applegate, John Lindsay, F. Ruelius, F. Shelton, C. O. Shea and B. Roth.

The club has made arrangements for a pig roast to be held New Year's Eve, and this event will be one of the best attended yet, beyond doubt.

HARLEY-DAVIDSON CLUB DANCE

PITTSBURGH, Pa.—The first of a series of dances for the winter was held on Nov. 17 by the Harley-Davidson M. C. of this city. The attendance was close to 500, including members and their friends. The club has benefited both financially and socially by the affair. There are nearly 100 members on the rolls now and the recently-launched campaign for new ones is showing good results.

THANKSGIVING HILL-CLIMB FOR WHEELING

Motorcycle Club in West Virginia Capital to Run Off Five Events on Grade Near City on November 30

WHEELING, W. Va., Nov. 20.—A climb over Wheeling Hill is to be held under the auspices of the Wheeling M. C. on the afternoon of Thanksgiving Day, starting at 2:15. Electric timing will be used.

The program calls for sidecar events for 76 cubic inch motors, 61 cubic inch motors open to club members and to visitors. Other events will be for racing machines and single cylinder mounts, followed by a free for all and a climb for machines with intermediate gear sealed.

Permission to use the hill has been obtained from the city authorities and the course will be closed during the afternoon to all traffic other than the competitors on their machines.

MICHAELS IS WINNER

In Long Race at Steubenville Meet—Neidengard Takes 5 Mile

STEUBENVILLE, O.—Dave Michaels, of Wheeling, won the 10 mile race at the recent meet in this city, his time being 13 minutes flat. George Neidengard, of this city, captured the five mile event in 6:18. Owing to the muddy condition of the track, further competition was called off. There were 4,000 spectators present.

This meet was considered so successful that plans are now under way to form a permanent racing association.

SYKES OPENS NEW STORE

TRENTON, N. J.—John Sykes, Jr., Indian agent, has opened new and larger quarters at 145 N. Broad street. In the new establishment Sykes will have a bigger repair department and will also have better facilities for salesroom displays. Sykes will continue to do business at his old store until Jan. 1, and will thus have two places in operation until that time.

TENNESSEE GETS PRIVILEGES

TORONTO, Ont.—The reciprocal relations with regard to motorcycle touring privileges which have been arranged between the Province of Ontario and about sixteen States of the American Union have been extended to include Tennessee. Riders of the latter State are now free to tour twenty-one days on Ontario roads, while Ontario tourists may ride all over Tennessee for a similar period without a local license.

GELLATELY WITH HAVOLINE

NEW YORK—E. S. Gellately, formerly president of the Sears-Cross Company, Brooklyn, N. Y., has joined the Indian Refining Company, maker of Havoline oils and greases, in an executive capacity.

NIGHT RIDE TO MODESTO WAS COOL ONE

San Franciscoans Forced to Dismount to Warm Up on Recent Moonlight Run—Parade at Destination

SAN FRANCISCO, Cal.—After the heat of the recent membership campaign members of the San Francisco M. C. had a chance to cool off on the run to Modesto, held on the night of November 12. Following several days of dry north wind, the roads were in fine shape and the first real visit of Jack Frost helped make things interesting.

Most of the crowd left Frisco at 1 a. m., meeting the Oakland members at that place, and the ride through Alameda County and up Niles canyon was made in bright moonlight. Tracy was reached at dawn and all hands took on a good hot breakfast. At Manteca the riders were obliged to dismount and walk to keep warm. Modesto was reached at 9 a. m. and the 45 riders present took part in a walking parade about town, followed by a motorcycle parade. They were greeted by a number of local riders, who joined with them in the parade.

The return trip was uneventful, no accident having been experienced in the whole 196 miles out and back.

NEW PARTS LIST

From Harley-Davidson Covers All Models from 1910 to Present

MILWAUKEE, Wis.—The Harley-Davidson Motor Company has just issued a comprehensive motorcycle parts list including all models from 1910 to 1917. Following the arrangement of former Harley-Davidson parts lists, the new one gives the factory number, photograph identification number, official part name and model on which part is used, by this means eliminating all chances of misunderstanding in ordering. The book has 92 pages of list and illustrations and contains an excellent table for classiying any machine by means of its motor number.

VALLEJO CLUB IN NEW QUARTERS

VALLEJO, Cal.—The Vallejo M. C. has opened a new club house at 500 Capital street and held its first meeting there on Nov. 3. A banquet was held on this occasion, 35 members attending. Ten new members were initiated.

DAYTON MEN ON LONG RIDES

SAN FRANCISCO—Roy Gustafson, with W. E. & W. H. Jackson, Dayton distributors, has left for a ride to Eureka with Fred Simons, Dayton agent at Fortuna. Kenneth Stephenson, of the Jackson forces, has just returned from an outing to San Diego and Tia Juana via the Valley Route.

HOLMES WITH STANDARD TUBE

DETROIT, Mich.—A. L. Holmes is manager of sales for the Standard Steel Tube Company of Toledo, O. He is making his headquarters at 1625 Dime Bank Building, this city. He was formerly with the Detroit sales forces of the Steel Products Company of Cleveland, O.

READING SMOKER SLATED

READING, Pa.—The Reading M. C. will hold a smoker on the evening of Nov. 23. George Mack, Raymond Fritz and George Stoyer are in charge.

FEDERAL RUBBER DIVIDEND

CUDAHY, Wis.—A meeting of the Board of Directors of the Federal Rubber Company was held in the general offices of the company at Cudahy, November 10, at which meeting the regular dividend of $1.75 per share on the second preferred stock was declared, payable November 25, 1916.

PEER RETURNS

From Tour Through Lake States with Valuable Suggestions for Dealers

TORONTO, Ont.—E. M. Peer, assistant sales manager for the Canada Cycle & Motor Company, Limited, recently returned from a motor tour through the States which skirt the south shores of the Great Lakes. He reports that he found American bicycle dealers in prosperous shape and that practically all bicycle stores in the larger cities had well-dressed windows and business-like repair departments.

He intends to supply Canadian dealers with a number of store-keeping suggestions which he picked up on his trip.

SEVEN SALES FOR SYKES

COLUMBUS, Ohio.—The Columbus branch of the Sykes Motor Co., located at 37 East Long St., distributor for the Indian, reports the sale of seven of the 1917 models with prospects bright for still further business this fall. A shipment of Indians is on its way from the factory now. The parts business with this concern has been exceptionally good.

Terse Tidings from the Northwest

SCORED A BEAT

By Using Motorcycles to Get Election Returns at La Grande

LA GRANDE, Ore.—The *La Grande Observer,* one of the most enterprising of the local newspapers, scored a beat on its rivals on Election night by utilizing motorcycles to gather the returns. The machines were furnished by George Ruby, local Excelsior man. While other publications employed automobiles for the purpose, Ruby's Excelsiorites were getting by in fine shape. The muddy streets that night offered no impediment to the fast work of the two-wheelers.

TACOMA DEALERS

Try Out New Machines and Demonstrate on Trip to Portland

TACOMA.—Fred Amblade and an assistant recently made a trip from this city to Portland, Ore., to test two of the new Excelsiors and at the same time to exhibit the two-wheeler to residents of towns that had never seen this make. The trip was made over the Pacific Highway to the Rose City and from there through the Nahalem Valley to Astoria, 160 miles. A boat ride was then taken to Chinook; then followed 20 miles of good roads to Lakota. From Raymond to Tacoma the pair rode by easy stages, rounding out a pleasurable and profitable week's trip.

WINDOW BROUGHT SALES

TACOMA.—W. P. Glasgow, local Harley-Davidson representative, lays a big increase in accessories sales to a novelly-decorated window which he installed last week. The window drew attention to the desirability of Glasgow's supplies and motorcycle attachments, and it certainly drew the business. Since the advent of the 1917 demonstrator, Glasgow says that his sales have averaged 50 per cent. higher than during the previous two months.

WASHINGTON REGISTRATION

TACOMA.—Registration of the 1917 series for motorcyclists will open in Oregon, November 15. One item in the new application has been added, answering the question whether the machine is new or has been used. The fee is $3 for 1917.

McKAY AND MURRAY OPEN

TACOMA.—R. D. McKay and D. J. Murray have opened the McKay-Murray Motor Accessory Store at 767 Broadway, this city. A full line of bicycle and motorcycle accessories will be handled and an agency for two wheelers is in prospect.

A LITTLE GINGER NEEDED

TRENTON, N. J.—The Trenton M. C., owing to the poor attendance of members at meetings, has found it necessary to disband. The club furniture and other fittings of the clubrooms will be sold.

PHILIPPINE ABORIGINES ADMIRE THE INDIAN

ELEVEN EXHIBITORS AT MONTREAL

National Show of Eastern Canada, Which Opens January 20, to Include Two-Wheelers, Tires and Accessories

MONTREAL, Que.—There will be at least eleven motorcycle, bicycle and accessory exhibits at the National Show of Eastern Canada, to be held in the Almy building, Montreal, Jan. 20-27. The list of exhibitors shows the following:

Arlington Company—Indian motorcycles and bicycles; Art Ross—Harley-Davidson; A. E. Bregent—Smith Motor Wheels and Pope bicycles; Goodyear Tire & Rubber Company; Dunlop Tire & Rubber Goods Company; Higgins & Lee—Firestone tires; Canada Cycle & Motor Company—accessories; Hyslop Bros., Limited—bicycles and accessories; John Millen & Son—accessories; Dominion Chain Company—Weed Chains; Buffalo Specialty Company—Neverleak products.

News Briefs from Wheeling

WHEELING.—The Ladies Aid Society of the Wheeling M. C. met recently at the home of Miss Emma Kline and planned a series of social affairs. Those who participated included Mrs. J. Landon Bier, Misses Mary Haskins, Edna Chaplin and Rose Rothermund.

WHEELING.—C. L. Cheshire, mechanic for the C. F. Braunlich Company, Harley-Davidson representative, has completed his course at the Harley-Davidson factory in Milwaukee and is now on his way home. He is riding his three-speed machine on the trip.

WHEELING.—James Dwyer, president of the Hazlewood M. C. of Hazlewood, Pa., has left for home after an extended visit to friends in this city.

CLEARING OUT SECONDS

DENVER, Colo., Nov. 17.—The Western Supplies Company, of 1448-52 Larimer street, is reducing its stock of used motorcycles. There are quite a number on hand, however. This stock is being sold at from $25 up, cash or terms.

The Western Supplies people want to clean out their used stock to make room for new machines. The new stock of 1917 Thors recently received at the store is meeting with favorable approval here.

SUTPHEN A BENEDICT

SAN FRANCISCO, Cal.—F. A. Sutphen, secretary and sales manager for the Henderson Motor Cycle Sales Company of Los Angeles, came up from the Angel City a few days ago and was married on Monday. He left with his bride for his home city after the ceremony.

ON SIDECAR HONEYMOON

HOLLISTER, Cal.—Mike Meginness, of Griffin & Meginness, local Harley-Davidson representatives, and his bride are just finishing a honeymoon trip through California, using a sidecar combination. The wedding was performed two weeks ago in this city.

BARTON BACK FROM NORTH

SAN FRANCISCO, Cal.—Z. Barton, Coast manager for the Thor, has just returned from a month's tour of trade in the Northwest. He called on agents and lined up the territory in general for the new season.

PROVENZA TAKES POPE

SHREVEPORT, La.—Joe Provenza has taken the agency for Pope motorcycles in this section. He has issued a challenge open to all local riders for a mile race at the fair grounds track at any time, to prove the speed of the Pope. Joe is going out strongly after prospects, too.

Why I am a Motorcyclist

First Article in a Series Dealing with Specific Advantages of the Power Two-Wheeler Which Have Brought Riders into the Ranks—A Strong Sales Talk for Motorcycle Dealers.

BY SAMUEL J. B. MALDEN

I BECAME a motorcyclist because I needed a quick and dependable means of transportation between my home and the factory office in which I am employed (the distance is three and a quarter miles), and I have remained one because the satisfaction of getting to a given point *when I want to*, and without fuss or excitement, has grown to be so precious that I could not give it up

I had been married four years, and was nearing the end of my second year's employment in the factory office referred to, when it began to dawn upon me that quite a few of my daily worries, a goodly number of my grouches and practically all of my office strain could be attributed to the unsatisfactory conditions under which I was obliged to travel to and from work. Trolley travel twice a day over a long and tedious route was eating into my life and making me a raspy and disagreeable malcontent. That sentence means a good deal more than may appear on the surface.

It was customary for me to tumble out of bed about 6:30 in the morning and hustle into a garment or two preparatory to shaving. The people higher up in our office were fussy about the matter of daily shaving, so I could not avoid my morning session with the razor. I had to devote half an hour or more to shaving and dressing.

A Hurried Breakfast

Then there were always a few little chores to be done around the house (my married friends will admit there are dozens of 'em cropping up when a chap is in a hurry), and it was very seldom that I found myself at the breakfast table before 7:15.

"Quite Often I Was Late"

For breakfast I used to allow myself about fifteen minutes. They tell me that some seasoned commuters can eat a seven-course dinner in that time, but I never had such training and it was pretty hard for me to do justice to my morning meal in a quarter of an hour. As a result I almost invariably finished breakfast with the makings of a grouch coming on me. As I was gulping the last of my coffee my wife would stand at a parlor window and watch for the trolley car.

The Morning Dash for the Car

Then came the dash for the car and the unpleasant task of settling down in the ill-smelling, jerky, rattle-box of a conveyance for the three-miles-and-a-quarter journey to the factory. There was a switch about a mile below where I lived, at which point my car was supposed to meet and pass another one. Very often the other car was late and we would stand on the siding for many precious minutes. When the tardy car arrived, our car would groan on its way once more.

Finally I would arrive at the factory office—grouchy and beginning to feel tired before I had even started my day's work. Quite frequently I was late. Nothing was said about it when I was only five or ten minutes behind time, but on numerous occasions the score against me was worse than that and I had to make unpleasant and threadbare excuses. Those excuses kept me somewhat worried and did not impress my superiors favorably.

We were allowed three-quarters of an hour for lunch. I carried mine, of course, because there was not enough time to go home for it. Cold sandwiches, cold coffee and other cold eatables don't improve a fellow's disposition, so I usually entered upon the afternoon work with a continuation of my grouch.

The Close of the Tiresome Day

I left the office at 5:30 and arrived home after more jolting, crowding and delay, and very often I had no more appetite than a sparrow. I began to suffer from headaches, loss of sleep and general nervousness. I never felt like making a trip to town or visiting a neighbor in the evening, because I had had all the travel I could stand for one day.

That displeased my wife and finally she became convinced that the job at the office was "killing me." She advised me to get other work, but I saw a chance for advancement and wanted to stick. We were both very much dissatisfied, and the folks at the office were the same. So I faced a crisis.

A Timely Suggestion

I have a younger brother, of a mechanical turn of mind, who visited us several times a month and on one of his calls he listened to my tale of woe and then asked why I hadn't thought of using a motorcycle. Strange as it may seem, the idea had never entered my head.

Even when I began to think about it, I had misgivings. First I thought of expense. My brother gave me figures that opened my eyes. Then I disclaimed all knowledge of motors. I couldn't even ride a bicycle, so how could I hope to handle a motorcycle.

My brother offered to act as instructor, and on a certain memorable evening he accompanied me to the store of a dealer in town. There I acquired more information, inspected the motorcycles and received a cata-

(Continued on page 56)

WHY ARE YOU A MOTORCYCLIST?

The purpose of this series of articles is to obtain specific experiences of riders which can be used by dealers as sales arguments, and for every letter answering the above question that is found suitable for publication Motor Cycle Illustrated will pay five dollars.

Tell your story in 500 to 800 words and make it complete and straight to the point. Address all letters to the Editor.

NEW CO-OPERATIVE DEALER CAMPAIGNS

Messrs. McNaughton and Rodger, of Indian and Harley-Davidson Factories, Tell of Broad-Gauge Plans to Give Retailers Practical Assistance Along Many Lines

CHICAGO, Nov. 18.—J. B. McNaughton, of the Indian, and Frank B. Rodger, of the Harley-Davidson, both of whom have assumed the work, at their respective plants, of formulating and putting into operation plans for co-operating to the fullest extent with motorcycle dealers, are so full of enthusiasm for their new duties that the co-operation spirit permeated the whole Chicago Show. As explained by this pair of enthusiastic co-operators, their plans are first to educate the dealer; second, to enthuse and keep up the interest of the riders who already have invested in motorcycles; third, to stimulate interest among folks who have not yet tasted of motorcycle joys and thereby to create new business.

General Purposes Are Similar

The aims of both companies are the same, and in some ways the means of achieving them are identical. Both the Indian dealers' department and the Harley-Davidson dealers' department will, in reality, constitute clearing houses for business-promoting ideas. A dealer, perhaps a Harley-Davidson dealer, somewhere in Iowa, for instance, will find that some little scheme works out materially to his advantage. Either he or the traveler covering his territory will pass the idea on to the Dealers' Department at the Harley-Davidson factory, and from there it will be syndicated to Harley-Davidson dealers who logically can profit from its adoption.

Having been thoroughly proved in this manner, it will be passed along to the Indian clearing house for the use of Indian dealers who can profit from it, and also to the dealers at large, other than those representing these two makes, through the Dealers' Betterment Committee of the Motorcycle & Allied Trades Association.

Likewise, when the Indian dealer or any member of the Indian staff hits upon something well worth while it will be syndicated from the Indian clearing house or Dealers' Department, first to Indian dealers for a thorough try-out, and later to the Harley-Davidson folk, and the dealers at large on the M. & A. T. A. lists.

A Broad Trade Outlook

In adopting this broad-gauge policy, whereby the good things which are developed or discovered are not confined for the exclusive benefit either of the Harley-Davidson people, or the Indian folk, but are passed along for the benefit of the whole two-wheeler trade, both McNaughton and Rodger, and the factories they represent, feel that they are serving their own best interests; they argue that everything that is done to improve the conditions under which any motorcycle dealer is operating will be reflected directly in increased general motorcycle business.

In outlining his accomplishments to date, and he admits that he has only made a start, McNaughton says that in the way of dealer educational work the Indian house organ "Honest Injun," which now is supplied in loose leaf form, will play perhaps the most important part. Each issue now hits upon one subject only, but covers that thoroughly. A binder is supplied for filing away these "Honest Injun" bulletins, and also, for the use of the dealer, McNaughton has prepared a series of 40 newspaper electrotypes for advertising purposes.

Sales Manual Ready Soon

The Indian Sales Manual, which is in reality a compilation of all of the selling points of the 1917 Powerplus and Lightwin, will be off the press within the next week or two and ready for distribution to Indian dealers everywhere.

To stimulate and maintain enthusiasm in the rider of the Indian machine, the Indian folk have in prospect a new riders' house organ which will not be issued at any specified periods, but will be gotten out from time to time as occasion arises; six, or perhaps eight, of the issues will be gotten out in the course of a year.

By way of creating new business and making prospects out of people who heretofore have given the motorcycle scant, if any, thought at all, McNaughton has hit upon the scheme of supplying Indian dealers the country over with pictorial news posters for their windows, which tell a story either of motorcycle pleasure or motorcycle utility.

Encouraging the Prospect

As a means of developing the man who has displayed enough interest in the motorcycle to send an inquiry into a full-fledged prospect, McNaughton has got up a series of four letters beautifully illustrated in three colors. These letters are sent out not as form letters—each has a personal salutation. They will not only be sent to the ones who send inquiries to the factory, but also to lists of prospects supplied by dealers. It is expected that they will be the means of bringing many interested folks in line for the purchase of motorcycles, who would otherwise put off buying.

The Harley-Davidson plan naturally divides itself into the same three headings as the Indian plan. In the way of dealer educational work, there is the plan for inducing the Harley-Davidson dealers to give six hours of free service with each machine sold. A series of bulletins to dealers bearing on various features, on maintenance, repair and selling methods, and booklets and bulletins having to do with such important topics as credits, insurance, forms of guarantee and forms for time sales in every State in the Union, and consignment forms for many of the States, with special letters bringing home the possibilities and the methods of using both bills of lading and warehouse receipts as legal tender, are fully developed.

Special Paper for the Rider

A greatly simplified accounting system for the motorcycle dealer, as well as advertising electrotypes, moving picture films, lantern slides and other Harley-Davidson advertising matter have also been prepared.

By way of stimulating and keeping up rider enthusiasm, the Harley-Davidson Enthusiast is published "every once in a while," and, as Rodger puts it, its joint aim is to make the motorcycle rider "fussy," to stimulate in him the desire to keep his machine in perfect condition and himself always neat. In this connection, the Harley-Davidson rider registry system, whereby every Harley-Davidson purchaser is registered at the factory with the number of his machine, comes into play.

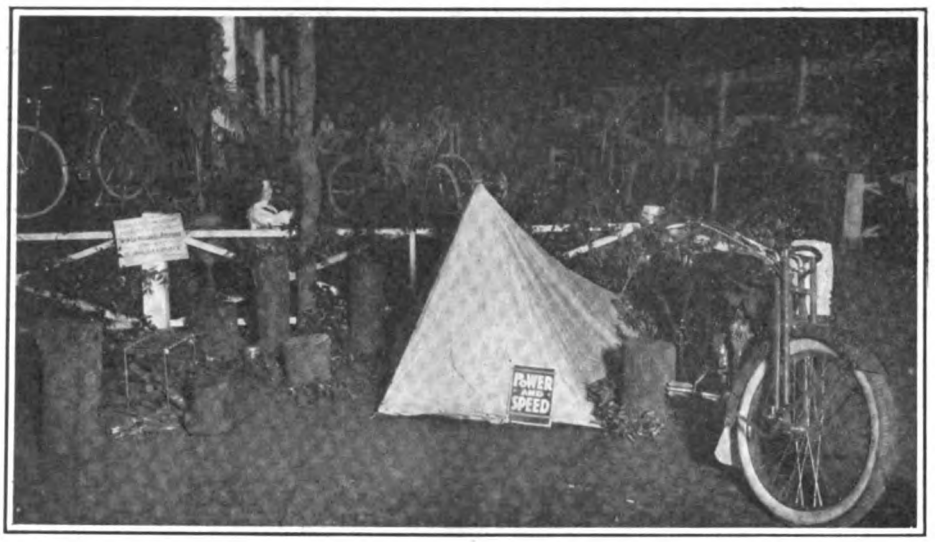
DEPICTING PLEASURES OF MOTORCYCLE CAMPING



Rustic Scene with Tent and Machine Displayed by Harley-Davidson Motor Company at the Show—It Formed Center of Attraction Every Day of the Exhibition

More Show Notes About Dealers

WALTER WHITING, Harley-Davidson distributor for Colorado, with headquarters in Denver, reports that he has used up five carloads of machines in his territory for 1916. He counts upon selling at least 250 Harley-Davidsons during 1916, and has also taken on the company's bicycle line.

H. L. Peters, Harley-Davidson distributor at Buffalo, has decided to add a bicycle department to his business for 1916, and is remodeling his salesroom to accommodate it.

Tom Withrow, manager for Ross Kenney, Harley-Davidson distributor at Lafayette, Ind., said that Russell Kenney had taken over his brother's interest in the Lafayette agency and would enlarge the shop and salesroom before January. Withrow made his headquarters at the Harley-Davidson booth.

Pennoto Brothers, at Joliet, Ill., reported at the show that they have placed 45 Dayton bicycles so far for 1916.

John L. Miller, one of the oldest cycle dealers in Dubuque, Iowa, announced at the show that he will devote his time exclusively to bicycles. Miller features Fisk and Kokomo tires.

B. A. Anderson, a veteran bicycle dealer of Beloit, Mich., reports lively sales of Excelsior and Pope bicycles in his city, having delivered about 50 wheels so far this season.

The Hawkeye Steam Vulcanizing Co., of Dubuque, Iowa, has taken the agency for Harley-Davidson motorcycles.

Higginbotham & Douglas, Lake County agents for the Indian, with headquarters at Waukegan, Ill., have delivered 35 twins so far this season. They have also placed 25 Indian bicycles.

W. G. Ware, of Huntington, Ind., signed up at the Show to handle Pope bicycles and also closed for the Great Western line for next season.

JERSEYITES SET NEW SIDECAR RECORD

(Continued from page 9)

Things went well this time, the only incident being a narrow shave from hitting an unlighted hay wagon. It loomed up out of the darkness, near Atsion, and we squeezed round the wagon and with a roar were on our way, long before the sleepy Rube had come to life.

On our way up the coast this time we stopped at the Mayetta Harley-Davidson agent's and bought a shoe, and at Beachwood we changed sidecar tires, 46 minutes ticking off during the operation. We were then 312 miles out.

Daylight had come on this round, it being unnecessary to have lights after 6:20 a. m., and as a result Joe opened the throttle a few notches and the roar of the exhaust became sharper.

Somehow with the darkness our worst troubles had departed, and leaving Beachwood at 8:53 we made 32 miles before another chain failure caused a ten-minute stop, near Pemberton at 9:48. Again we got rolling and now things were going good for further orders and we breezed into Beachwood at 12:48 p. m., 436 miles out, having made a 122-mile round in 3 hours 55 minutes, including all stops. This round was at better than a 30-mile per hour gait. It sure does take the daylight to ramble along very fast.

We felt so good after this, that we celebrated by eating a HOT dinner in Tom's River, this costing us 32 minutes of the best riding time of the day.

From Tom's River to Brown's Mills-in-the Pines we percolated along, and it was while taking on gas in this town that we noticed a droop in the sidecar shoe again. Resolving to put an end to tube troubles, we had it vulcanized, a safe but slow method which lost us 46 more minutes, and we had gone 462 miles, too.

It was five minutes past three when we left the "Pines" resort, too late for another complete round, so we headed for Newark by way of Pemberton, New Egypt, Lakewood, Freehold and Englishtown. It was a long way round, but over good roads, and as we had little time left, Joe stepped on the old Harley's tail and away we flew, making things hum while the daylight hung on. Eight minutes for gas and a drink in Freehold at 5:22, and then we lit up in Old Bridge at 5:15. On we went, unwinding the ribbon of road, and as we passed through Rahway the hands of the watch pointed to six. Then as we reached Wood avenue, Linden, the time read 6:05, the speedometer showed 545 miles—and there's your sidecar record and a running tale of how it was done.

That mileage is not the absolute limit, but any rider who makes more than 650 miles in this gentle art will know that he has been out on a fast long ride—and, take it from us, to tackle it on a cold, long, frosty November night is something else again.

The Harley-Davidson motorcycle used is a 15,000-mile old veteran, winner of the sidecar trophy, amateur class, in the New Jersey 400-mile endurance run last May, and has been through a fast three-day ride from Passaic to Chicago. It never gave the slightest bit of trouble nor made a fuss at the task, and it sure was a big one, taking those long straight-of-ways wide open for miles. By the way, we weighed the outfit in Brown's Mills and it scaled 1130 pounds all aboard, some load.

The equipment: Bosch magneto, Duckworth chains, Troxel saddle, Monarch plugs and Prest-O-Lite.

The motorcycle tires were Empire and never troubled us at all, but that sidecar shoe, nuff said, if you are keen to know its brand look behind the 55th tree as you leave Tom's River for Lakehurst.

PROGRESS!

A New Name—A New Selling Policy—A New Period of Expansion Ahead.

YESTERDAY—You knew us as the New York Sporting Goods Co.

TODAY—The signs above our three buildings on Warren Street, New York City, read: Baker, Murray & Imbrie, Inc.

TOMORROW—You will benefit by the growth and perfected service to customers that our new name represents.

What has brought about this change?

The spirit of the men who have given their own names to the firm of Baker, Murray & Imbrie, Inc.

The desire of these men to have dealings that are more intimate transactions than would result if they composed themselves as a mere company.

The determination of these men to stand out in the forefront of their business as individuals and to serve their patronage with a feeling of personal responsibility.

Frederic A. Baker, President, Baker, Murray & Imbrie, Inc.

Three able, well-known men—each having a reputation in his own particular line — have joined their respective strengths together into a working power that is not exceeded anywhere in the American distributing trade.

You have known Mr. Baker through F. A. Baker & Co. for years past. Likewise Mr. Murray and his 20 years' connection with the New York Sporting Goods Co. Mr. Imbrie, through Abbey & Imbrie, has made legions of friends among the devotees of rod and line.

Three Distinct Operating Divisions

F. A. Baker & Co., New York Sporting Goods Co. and Abbey & Imbrie will still maintain separate identities as operating divisions of the firm which they comprise. The same personnel that served you in the past will take care of you in the future, with the added efficiency of more finely organized methods of conducting business.

Indian Motorcycles and Pierce Bicycles and their supplies now occupy a building all to themselves—nine floors stocked to the last word of completeness, in charge of men of ability and experience.

Abbey & Imbrie have moved from Vesey Street to 15 Warren Street, where their various departments have adequate space and improved accessibility. The working organization remains intact and is completing its 96th year in business with a bigger future than it has ever dreamed of before.

James E. Murray, Treasurer, Baker, Murray & Imbrie, Inc.

New Lines for 1917

1917 expansion is apparent not only in the acquisition of Abbey & Imbrie but in the taking on as well of such lines as Cyclemotor, Firestone Tires, Infallible Tires, Infallible Saddles, Infallible Motorcycle Lamps, Infallible Golf Clubs and Infallible Tennis Racquets.

Growth of a quality character is inseparable from the ascendancy of the Baker, Murray & Imbrie, Inc., regime.

An ever increasing buying power allows us to pick and choose the BEST merchandise —and to sell to the dealer at prices which do not have to bow down to any competition whatever.

Andrew C. Imbrie, Vice President, Baker, Murray & Imbrie, Inc.

America's Representative Distributors

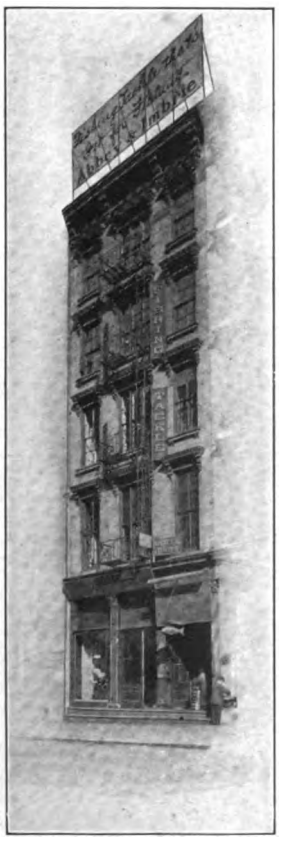
It has now become a matter of universal recognition that the Baker, Murray & Imbrie, Inc., price lists are standard quotations. When price comparisons are made Baker, Murray & Imbrie figures act as the measurers of value. And beyond this, Baker, Murray & Imbrie business methods deliver an honest satisfaction that cannot be invoiced in mere dollars and cents.

No foolish claims to perfection are herein made. But we know of no other house of our kind which is today giving so much thought to the convenience and to the obtaining of the final confidence of the customer as ours.

15 and 17 Warren St., Main Offices, Abbey & Imbrie and New York Sporting Goods Co. Divisions

One Important Change In Selling Policy

An instance in point is our giving up absolutely mail order retailing.



The Abbey & Imbrie Building on Vesey St. Occupied for 32 Years by This Firm

We want our dealers to have all the retail profits accruing from the lines we sell them. We want our dealers to grow as we strive to grow ourselves. Therefore we believe that it is not consistent for us to sell their local customers by mail. When a dealer has our goods in his store, we believe that he should be protected in the sale of those goods — and Baker, Murray & Imbrie, Inc., will not sell over his head by using the mails to get in contact with business that rightfully belongs to him.

Let's Get in Touch with Each Other

On the basis of past experiences we shall probably put 4,000 new dealers on our books in 1917.

Be one of them. We can serve you—serve you earnestly to your own good—serve you so well that you will feel that you cannot afford to do else than form a permanent business relation with us.

The following pages are but a selection of the immense number of things in the Baker, Murray & Imbrie, Inc., showrooms at 10, 15 and 17 Warren Street.

You can learn all about us through our catalogs, price lists and by personal correspondence if you so desire. Or better still—one of our 15 salesmen will call upon you at any time you say. He won't want to sell you half so much as he'll want to TELL you. Make him welcome. He represents a lot of things that are to your advantage as much as ours.

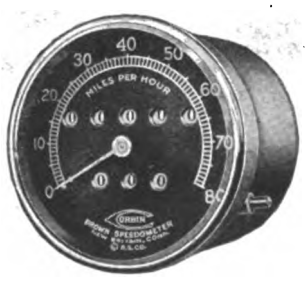
These Two Accessories Have Proved Themselves Worthy of the Rider's Confidence and the Sales Show It

The CORBIN-BROWN SPEEDOMETER

This instrument's reputation is backed by many seasons of exceptionally satisfactory service. No speedometer on the market has recorded as many miles for motorcyclists as has the Corbin-Brown. In spite of the fact that there are thousands of them now in use the demand becomes greater every year. This would not be the case had not the Corbin-Brown made good.

Dealers that carry the Corbin-Brown have every reason to be satisfied. And they are satisfied. Every year proves that they are right in carrying it in stock.

Are you one? If not, get in touch with us at once. We can fill your orders now.



The CORBIN DUPLEX COASTER BRAKE

Few riders go very far in bicycling before they come to the Corbin Coaster Brake. And once they have found the Corbin they stick to it. A brake has yet to be made that enjoys the nation-wide reputation and popularity of the Corbin Duplex. It is not a question of selling this famous coaster brake but one of meeting an already established and constantly growing demand. Its past record means future friends. Its presence on a bicycle is an added attraction.

The dealer that sells the Corbin Duplex is selling a standard article. The name, the brake and its record are all in his favor.

Get your orders in at once. Write for price lists, catalogs and discounts.

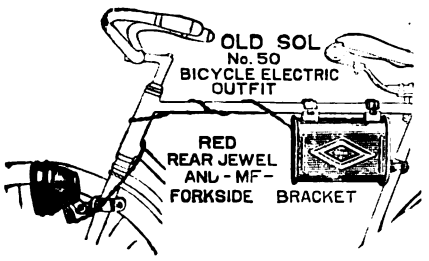
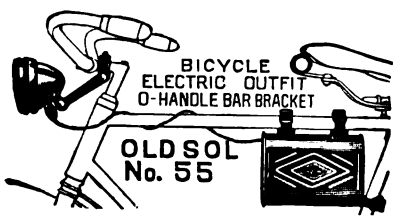
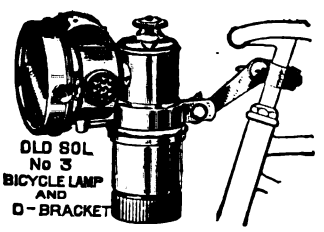
OLD SOL Bicycle Lamps

The Standard of Lighting Excellence







When you see that name on a lamp, be it gas or electric—you know that its owner is satisfied with his lighting service.

"Old Sol" has been a name to conjure with since the sport of cycle riding began.

It means solid construction—scientific construction—enduring construction. It means the highest form of lighting efficiency—it means QUALITY.

Therefore, whatever be your needs in the lighting line—whether you require a steady, glowing electric lamp for your bicycle, or a powerful searchlight for your motorcycle—"OLD SOL" has *just* the lamp, with *just* the lighting power that you want—selling at the price you feel you ought to pay.

Hence, if you need anything in the lamp line—go to your dealer and ask to be shown the "OLD SOL" stock. You'll be satisfied.

Cyclemotor Corporation,
Rochester, N. Y.

Gentlemen:-

It may interest you to know that in laying out our 1917 plans we have made arrangements to put a great deal of emphasis upon Cyclemotor throughout the entire territory given to us as its distributor. Not only on account of its mechanical excellence which we have demonstrated to our own satisfaction, but also because we believe it will be instrumental in developing bicycle sales.

The Cyclemotor and the bicycle logically must succeed hand in hand, and with the big interests we have in the bicycle trade we wish to overlook nothing that works for its utmost expansion and prosperity.

Wishing you success,

Very truly yours,

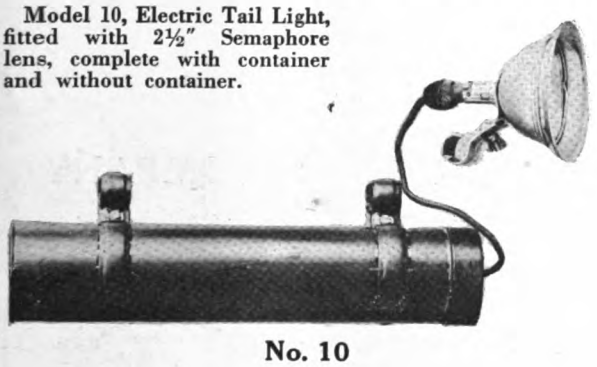
THE SIGN OF QUALITY

The Popularity of Smith Bicycle Lamps

—has rapidly increased through the recognition of their efficiency and simplicity, two qualities that stand out in spite of their low price.

Our experience with Smith Lamps has resulted in a universal dealer-satisfaction —a satisfaction which in turn has added to our reputation for distributing goods that represent high consumer-value and at the same time provide generous discounts for the merchant.

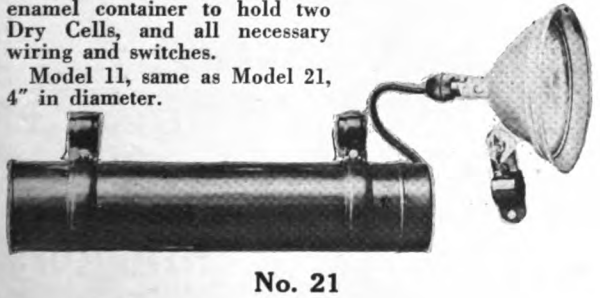
Model 10, Electric Tail Light, fitted with 2½″ Semaphore lens, complete with container and without container.



No. 10

Model 21, Electric Bicycle Lamp, 5″ in diameter, special head clamp, fully nickel plated. Furnished complete with black enamel container to hold two Dry Cells, and all necessary wiring and switches.

Model 11, same as Model 21, 4″ in diameter.



No. 21

Baker, Murray & Imbrie, Inc., Distributors

No. 20, Gasaver, 4¾″ lens, red rear light, adjustable clamp, complete with all necessary wiring and switches and container for 2 No. 6 Dry Cells.

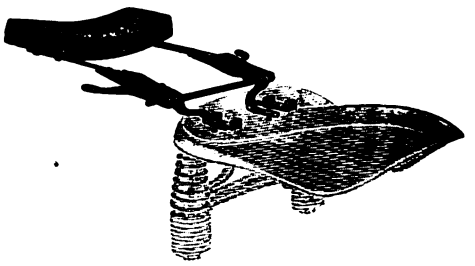
"WEED"

Folding Backrest



$4.50

The "WEED" Folding Backrest is the great COMFORT accessory for motorcycles, and adds wonderfully to the pleasures of motorcycling. If you have never used one, do so and be convinced.

The soft leather upholstering and the two flat springs absorb the vibration and road shocks, and lend support to your back, thereby enabling you to ride considerably farther without tiring.

Ask the man who has a "WEED" backrest, and he will tell you he would not be without it.

The patented folding feature, operated by a slight touch of the finger, allows the backrest to be folded so the rider may mount or dismount without interference.

Made to fit different saddles. In ordering specify make of machine and saddle.

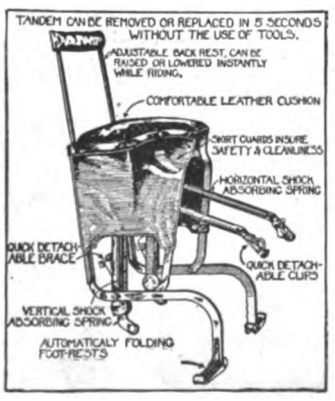
over the previous season on

STOLL TANDEMS

is the record of THE NEW YORK SPORTING GOODS COMPANY

Such an increase shows the results of a progressive firm-dealer co-operation and a quality article. It is further proof that Eastern dealers and riders are more and more demanding greater tandem comfort and service.



For 1917 there are no radical changes—but a number of refinements and re-enforcing throughout—and closer attention to details, combining with the comfort qualities always built into Stoll tandems, makes this the greatest value on the tandem market.

THREE PERFECT SCORES IN CONTEST

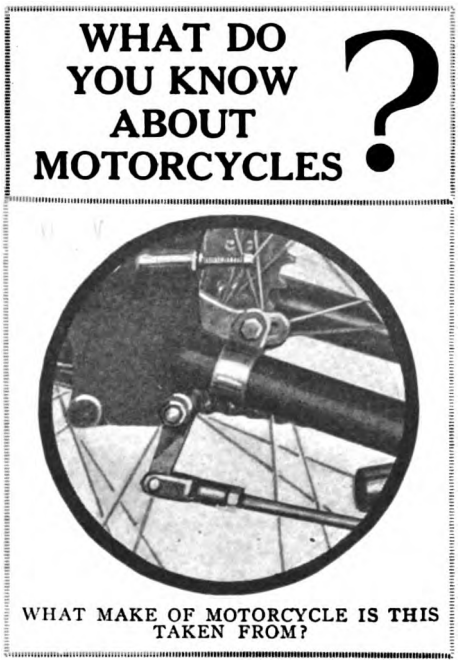
Returns Up Until Last Saturday Night Put Six Men in the 900 Per Cent. Column and Eight in 800 Per Cent. Class—Last Picture Was From Thor and 59 Contestants Were Sure of It

TALK about waiting for the election returns to come in! That's nothing to what the Contest Editor is up against every week awaiting the arrival of the last contest answer before going to press; then counting and recounting before making the tabulations.

And careful as he is, or tries to be, every once and a while his foot slips and someone "hollers." This week it is W. R. Spear, of Newark, who claims credit for a Dayton answer he did not get. And sure enough, friend Spear is right; his Dayton answer is here and we are giving him credit in the "batting averages."

Up to last Saturday night, with most of the answer for the last picture—which, by the way, was a Thor—in the Contest Editor's hands, there were just three contestants with perfect scores. Six managed to come through correct on nine of the ten pictures that have been published to date, while eight got all but two.

The scores of all those who have batted 500 per cent. or over are given herewith. While that may be a high batting average, speaking of baseball, nothing less than a 500 per cent. score will satisfy the Contest Editor. So come along, you "experts" who are below that mark. There are a few pictures still coming; you have a chance to pull your score up somewhat before the contest closes.



WHAT MAKE OF MOTORCYCLE IS THIS TAKEN FROM?

There were 59 contestants who were quick enough to perceive that the last picture was taken from the good old Thor; and another 54 came through with the correct answer on the Excelsior stand picture that preceded it. On the Dayton answer three answers came in that were allowable this week.

There were also some incorrect answers. Fred Beatty, of Center Point, Tex., for instance, would have been willing to bet his life that stand picture was snapped from a Harley-Davidson; and with every bit as much enthusiasm and loyalty for the machine he rides, Earl Klingman, of Dayton, Ohio, claimed it as part of a Dayton.

Walter Jones, of Morrisville, Vt., was sure that stand picture was from a Pope lightweight, while W. Leathe, of Larchmont, N. Y., figures it a Miami. Now go after this one; it's easy, of course.

Well, the Big Show is Over.

We've got a minute's breathing spell for summing up results.

Was the show a success? So far as the Indian exhibit went—unfortunately we didn't have time to get around much to see how the other fellows were doing—it was a ripsnorter.

We'd expected a crowd, but nothing like the swarms of enthusiastic riders and dealers who taxed our goodly space from reveille to taps to look at and handle the 1917 *Big Twin with refined Powerplus Motor.*

And right down the line the same spontaneous enthusiasm ran riot. *The Light Twin* made motorcycle converts of many boys—young, middle aged, and just beyond the meridian—who'd never expected to become riders.

The *Electrically Equipped Indian Bicycle,* too, together with its flock of sturdy little brothers, gave bicycling the biggest boost it's had in years.

Dealers—lots of 'em—didn't just *admire* the Indians—they sat down, talked over things a bit, and *ordered*—climbed right on the *big* business caliope and got into the profit procession.

To those dealers we didn't have a chance to TALK with, we want to WRITE—if they'll show their interest by asking us to send particulars covering 1917 Selling Plan and territorial arrangements. Takes only a minute to shoot us a note.

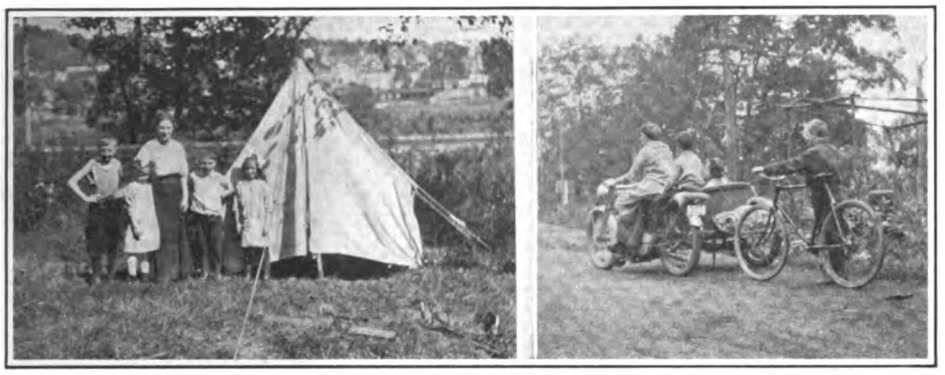
MRS. LANG MAKES FAMILY TOURS

Waterbury's Only Lady Sidecarist Takes Many Trips with Children —Advocates Riding to Enjoy Scenery—Helps Other Riders



Left, Mrs. Lang and Family in Camp; Right, the Langs Starting Off on Long Journey

WATERBURY, Conn.—One of the motorcycle attractions of this section of Connecticut is Mrs. J. Lang, of 268 Watertown avenue, this city. Mrs. Lang is an ardent sidecarist, using a Harley-Davidson combination to make long trips. The sidecar is occupied by two of her children on these trips, while another—a boy—accompanies the outfit on a bicycle.

"I belong to the class of riders who are out to enjoy the scenery and who come from a trip refreshed and helped," says Mrs. Lang. "There is nothing quite so interesting to me as nature's wonders. From time to time while I am on the road, I stop to assist riders who are in trouble—riders who, as a rule, have purchased a 'bargain'—for $50—and who have reason to regret the same by the service they are getting from their machines. I always pity such riders.

"One such case I met with, the other day, had a puncture and was putting the patch on the casing instead of the inner tube. It took some persuasion that the patch on the tube was the right way," continued Mrs. Lang. "Then, frequently, I meet riders with broken chains and no spare links or tools. Some of them have been riding for years, yet like the beginners, they are glad of my aid."

Mrs. Lang is the only woman driver in this section. She has run up a mileage with her sidecar, which many a solo rider would be proud of. In addition to riding, she takes an active part in the management of the agency, Lang's Motorcyclery, handling the Harley-Davidson lines for Waterbury.

BILL'S HOME AGAIN

Goat Mascot of Goodyear Forces Completes Two-Year Trip

AKRON, O.—The far-famed and much-traveled Goodyear Goat which has been awarded monthly to the leading district of the Goodyear Tire & Rubber Co. in the matter of sales, has returned to Akron after a two-year period of wanderings, national in scope. After his strenuous "Seeing America First" campaign the goat has settled down to quiet life on the magnificent estate of President Seiberling of the Goodyear.

The goat's successor in the way of a district prize is an elegant silver cup, known as the Goat Cup. It will become the property of the district winning it five times. The cup stands about twenty inches high and is a splendid specimen of the silversmith's art. On it is engraved a likeness of the goat and a brief history of his career as a Goodyear institution.

NO MOTORCYCLES SHOWN

PROVIDENCE, R. I., Nov. 17.—No motorcycles were displayed at the Providence Automobile Show, which opened here last Friday. However, a few dealers in accessories are showing motorcycle articles. Local motorcycle dealers assert that they have not received fair treatment from the show authorities, and when several of them discussed the matter of space with the management this year they were informed that they could make their displays in the basement.

SEEING AMERICA FIRST

HUNTINGTON, Pa.—Cecil Kenyon has answered the patriotic call of "See America First" by touring the United States on his Indian machine. Kenyon, who is now on his way to the Panama Canal Zone, has covered 8,000 miles on his motorcycle, which is shod with Goodyear Blue Streak tires.

HARDEN TO VISIT

Trade in 'Frisco; Pope Bicycle Sales Are Active, Says Manager Phelps

SAN FRANCISCO.—Branch Manager W. M. Phelps for the Pope in this city, is expecting a visit from L. H. Harden, sales manager for the Westfield Mfg. Co. Mr. Harden will spend a week in this city and vicinity, calling on dealers and will then leave for Los Angeles.

Phelps reports having had a good season, particularly in the bicycle department.

Denver Trade Notes

GETS FIRST SHIPMENT

DENVER, Colo., Nov. 17.—The Victor Motorcycle Garage of Victor, Colo., has just received a shipment of 1917 Harley-Davidson machines. The concern is selling its new machines as well as used ones at one-half down and the balance in easy payments. The Victor people find this plan works very nicely in their territory.

REBUILT MACHINE SALE ON

DENVER, Colo., November 17.—A pre-inventory clearance sale of rebuilt motorcycles is now in progress at the Western Supplies Company, 1448-52 Larimer street, this city. It is the plan of the company to sell out its present stock of rebuilt motorcycles before taking inventory and have reduced prices 25 per cent. to accomplish this. The Western Supplies people have quite a large stock of all makes of machines in their rebuilt department.

BUYS BOULDER TIRE WORKS

DENVER, Colo., Nov. 17.—W. R. Moore has purchased the Boulder Rubber Tire Works, 1434 Pearl street, Boulder, Colo. That concern is agent for the Firestone tires in Boulder and vicinity.

DENVER TRAFFIC LAW

Mile-High City Adopts New Ordinance Calling for Quiet Zones

DENVER, Colo., Nov. 17.—Denver has a new traffic ordinance which will shortly go into effect. One part that will effect motorcycle riders in this city is as follows: The Manager of Safety is empowered to establish quiet zones in the vicinity of hospitals and to regulate the speed of vehicles in the vicinity of schools.

The new measure placed no limit on speed, but specifically states that speed in excess of fifteen miles an hour in the congested districts in the main part of the city will not be considered within the bounds of prudent driving.

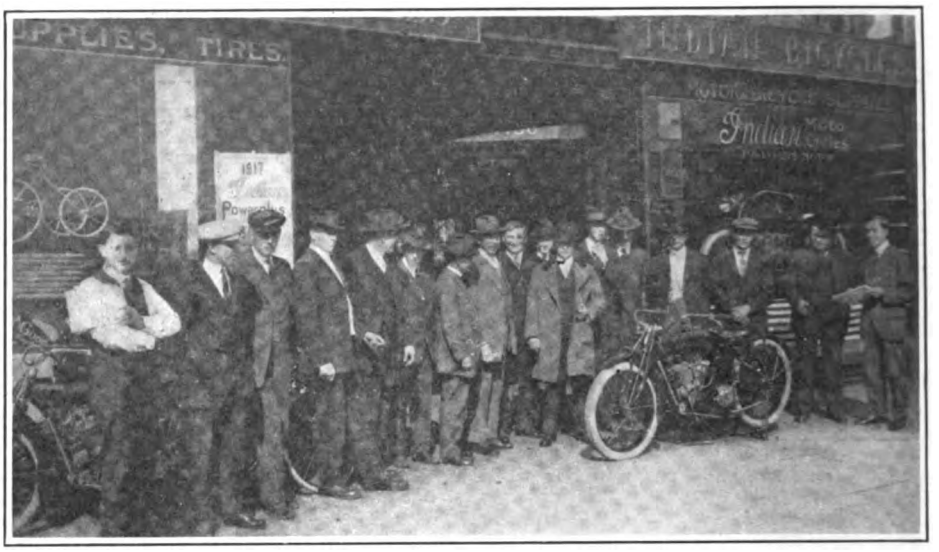
It is specifically declared in the new ordinance that in case of accident, motorcycle riders shall give their names and addresses to injured persons or anyone else asking for them.

Regarding light, it is provided that headlights shall project light 150 feet ahead, and that no portion of the beam shall be more than forty-two inches above the ground. Rear lights shall be red and shall be visible 300 feet. In this connection, it is also provided that it shall be unlawful for dealers to sell motorcycles not equipped so that the lights can be adjusted to meet the provisions of the ordinance.

JONES SELLS SIX POPES

BEVERLY, Mass.—F. S. Jones, local Pope dealer, has received his 1917 demonstrator, which is a three-speed model with twin cylinders. Jones has taken orders for six of the new machines so far, and has a goodly list of prospects in addition. He has represented the Pope since the first motorcycle was put out at Westfield.

INDIAN AGENTS ASSEMBLE AT SAN FRANCISCO



Northern California Wigwam Representatives in Front of Freed's Establishment

SAN FRANCISCO, Cal.—All kinds of enthusiasm were developed at the roundup of Northern California Indian agents in this city recently, the occasion being a conference called by A. Freed, distributor for this territory. The conference was called to discuss the 1917 campaign and an elaborate banquet was a feature of the meeting.

The photograph shown above was taken in front of the Pacific Motorcycle Supply Co.'s store. The group includes A. Freed, George Sherman, of the Hendee Mfg. Co.; H. Pfeiffer, H. Broad, A. Harrell, O. C. Bemish, of the local store; H. Cameron, Sacramento; W. Johnson, Modesto; H. Brock and W. Horr, Stockton; S. C. Edwards, Haywards; J. A. Wilson and A. Berthelson, Berkeley; Charles Showalter, San Jose; F. D. Amaral, Salinas; A. Meginness, Hollister, and J. H. Baumgardner, of San Francisco.

AWAITING ELECTRIC R-S

SHREVEPORT, La.—F. L. Zimmerman, Jr., the Reading Standard agent, has sold a number of twins so far. He is awaiting the electrically-equipped model, for which he has several prospects.

NELSON TAKES INDIAN

NEW YORK, Nov. 20.—Gus Rotholz, the Harlem Indian distributor, has signed up Nels Nelson, at Seventh avenue and 132d street, as sub-agent for the Hendee products. Nelson has got his demonstrator, and is out gunning for prospects.

EMPHASIZING "SAFETY FIRST" AT CHICAGO SHOW

Booth Featuring New Commission Membership and Depicting Means of Obtaining Security in Travel—Note Goodrich Guide Posts as Leading Aids to Movement

NEW CO-OPERATIVE DEALER CAMPAIGNS

(Continued from page 23)

Not only are little mechanical details and tips syndicated out to riders on this list, but also the registration of the numbers of machines purchased has been found of the greatest value in the location of stolen machines.

Scope of Plan is Unlimited

The co-operative spirit of Harley-Davidson dealers has been so intensified during the past twelve months that it takes Frank Rodger, who has just been appointed to carry on the good work, well through an hour even to go roughly over the plans that have been put into operation and those that are to be given a try-out.

Even at that, Rodger claims that they have only made a beginning and that each time they look at it they come to a fuller realization of the fact that the movement is so big that it will take volumes to cover it and do it full justice. Every time he goes over the plans with a dealer or some other interested party the thing looms larger in his eyes, and his enthusiasm is stimulated in proportion.

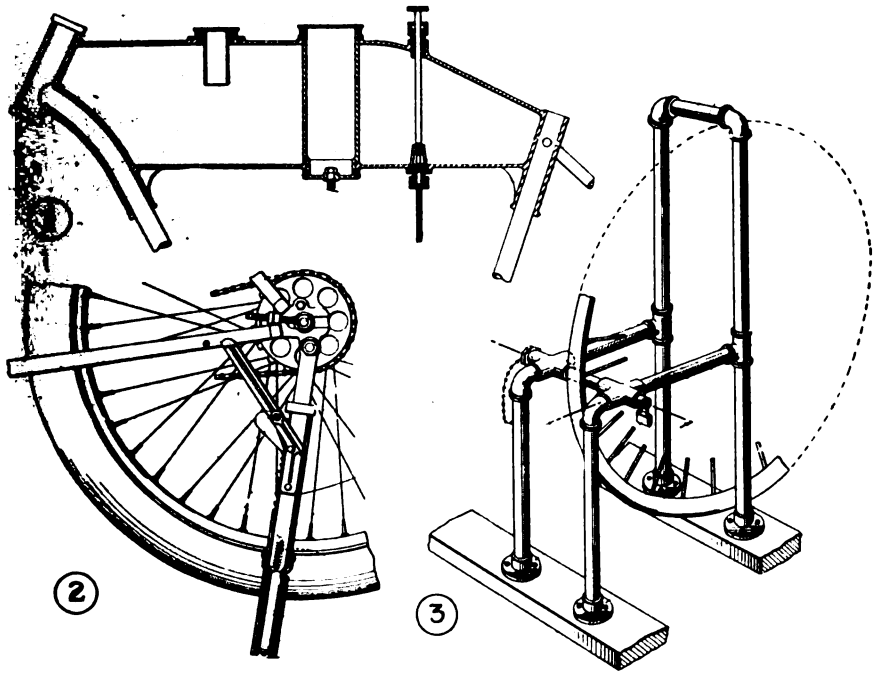
RECENT PATENTS IN THE CYCLE FIELD



1, Schickel Tank Frame Showing Tool Compartment and Integral Clusters; 2, Scott Adjustable Stand; 3, Soleau Rack and Lock with Bicycle Secured in Position

SCHICKEL TANK-FRAME

THOSE familiar with Schickel construction will recognize in Patent No. 1,200,141 the characteristic frame of the Schickel "Big Six" and other two-stroke motorcycles. Although the application for a patent on this construction was made by Norbert H. Schickel in 1912, the patent was not granted until October 3 of this year. The construction incorporates a hollow shell or tank forming the top tube of the frame, this shell being formed with steering head and seat post tube integral. The greatest cross-section of the shell or tank is at its center, the form tapering toward the extremities. Filling hole, cylindrical tool compartment contained within but not communicating with the tank and an outlet valve are provided.

SCOTT ADJUSTABLE STAND

AMONG recent patents relating to stands is that of Harry C. Scott, of Los Angeles, Cal. This stand permits of easily raising the machine thereon and at the same time has provision for keeping the machine upright on uneven ground. To the side members are fitted sliding pieces to which is attached the base of the stand. Each sliding piece carries a hinged pawl arm, the upper end of which strikes the rear fork of the motorcycle as the stand swings toward the operative position. The stand arms are provided with ratchet teeth. The construction is so arranged that the sliding pieces will move outwards as the machine is raised on the stand and thus assist the lifting as well as compensate for irregularities in ground. The patent is No. 1,195,404.

SOLEAU STAND AND LOCK

C. J. SOLEAU, of Montclair, N. J., has been granted Patent No. 1,202,444 for a combined bicycle stand and lock. The stand consists of a rectangular upright member to which is attached a horizontal member with cross-fitting near each extremity. There are other short uprights at the ends of these horizontal members, the whole forming a sort of chair. The wheel of the bicycle is placed within the arch of the upright member and is locked by a tube passing through the cross-fittings and between the spokes, this tube being locked in place by suitable means. Being of pipe fitting throughout, it is cheap to construct.

SCHWINN FRAME DESIGN

IGNAZ SCHWINN, president of the Excelsior Motor Mfg. & Supply Co., of Chicago, Ill., has been granted Patent No. 1,198,669 for a motorcycle frame. This is the frame of the Excelsior motorcycle, incorporating a supporting member at the lower section of the tubular construction, this supporting member taking the motor and gearset in countershaft position. The supporting member is removably mounted to permit of taking out and putting in the motor and gearset. The rear portion connects to the rear forks and seat post tube and to the crankcase at the rear. When the motor and other units are removed from position, the frame is in no way weakened by this construction.

PAGE HUB CONSTRUCTION

A CONSTRUCTION within a hub permitting of cranking the motor or applying resistance to it by means of the pedals without affecting the driving, is one feature of the mechanism invented by V. W. Page, of Bristol, Conn., and assigned to the New Departure Mfg. Co., of that city. The machine may also be braked without affecting the motor, while a free engine position is possible. The construction consists of two multiple-disc clutches operated by back-pedaling and by rod connection, also an expanding band brake.

BIG PROSPECT LISTS

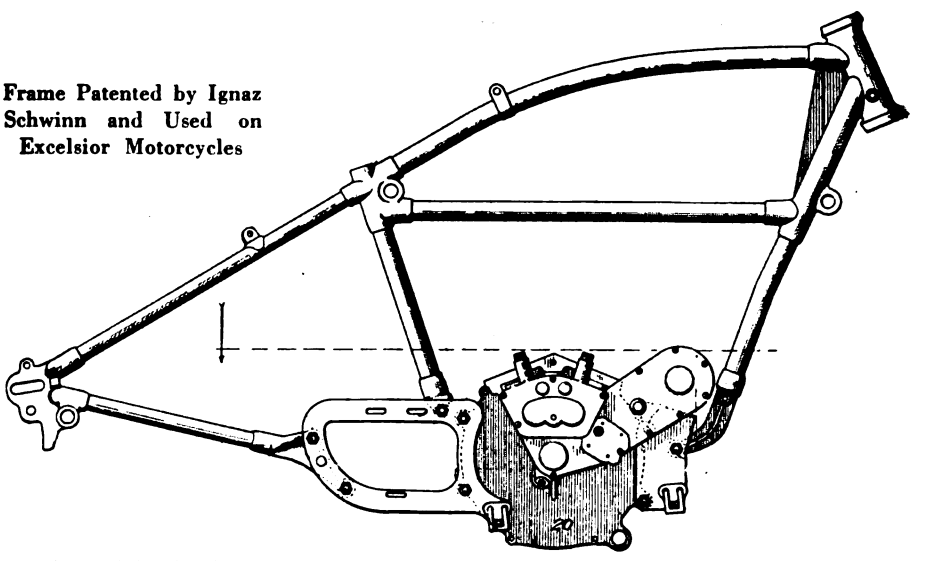
Providence Dealers Say Outlook for Motorcycle Sales Was Never Better

PROVIDENCE, R. I., Nov. 21.—Sales indications in this city are the best the dealers have ever known. Orders are being placed rapidly for the new models, used machines and 1916 models are going fast and every local agent has a record-breaking list of live prospects.

B. A. Swenson sold seven Indian twins last week, four of them with sidecars, and also sent out three Indian Featherweights. During the same period he sold a dozen bicycles and 11 used motorcycles.

W. F. Halliday, Henderson agent, reports that his sales of the four-cylinder mount are higher than ever before. He has disposed of 51 machines so far, 47 being to new Henderson users. He has taken in trade 46 machines of other makes. Halliday made 46 of his sales from one catalog, and he has had this book framed. It now hangs conspicuously above his desk.

W. N. Burnett, local Harley-Davidson man, has been away for several days drumming up new prospects, so it has been impossible to obtain sales figures from him. His assistant, however, summed up the situation by saying that it is "corking."



Frame Patented by Ignaz Schwinn and Used on Excelsior Motorcycles

Comfort-Giving and Dressy Togs for the Cold-Weather Rider

JUST about this time of the year, Fellows, when we are considering shedding our B. V. D.'s for something a trifle warmer, we begin to wonder how in the name of kingdom come we are going to manage to keep comfortable when the thermometer does really take a drop on itself, so to speak, and old Jack Frost comes around in earnest. Gosh, and for a cold-blooded fellow that's some little thing to think about.

It's not wholly a matter of keeping warm, however. There are other considerations—keeping dry, for instance, despite the slush, and at the same time keping neat, or at least confining the wetness and dirt to some easily shed outer garments.

Granted that we've donned the "all wools," and the heavy winter weight wool army shirt, the next consideration is to keep the lower extremities warm and comfortable. The best plan is to invest in a pair of wool bicycle stockings which draw up well over the knee. There are some of us, however, stout about the limbs who prefer to suffer slightly from the cold rather than to accent this stoutness by bundling up with puttees over the bicycle stockings. To these folk I would recommend all wool half hose.

The Winter Suit

For dry weather use, in the shape of a riding suit, there is nothing to be preferred to heavy forestry wool serge, which is heavy enough to provide the necessary comfort, without, however, giving the "bundled up" impression that comes of wrapping one's self up in heavy winter clothing. It holds its shape well, and does not spot nor show the dust as readily as khaki, and it is considerably warmer than the latter. It is about the neatest riding suit that can be had, and I would recommend it above all others.

Then there's the puttees. For real solid comfort, the British spiral camel's hair leg coverings can hardly be beat, although the leather puttee is quite a warm covering if it is strapped tight enough to keep out the cold draughts; it must not be strapped too tightly, however, so as to interfere with the circulation, else all the clothing in the world will not keep the feet and legs warm.

When there is the slightest slush about, it is best to use the full length leather trouser leg covering to keep the legs warm and to keep the riding suit clean and the appearance neat.

It's a toss-up whether the best plan is to invest in a mackinaw to keep the body warm, or to rely on a good warm sweater worn under the riding coat. As for looks, there is no doubt but what the mackinaw is to be preferred, although a neat sweater with a roll collar is by no means displeasing to the eye of even the most critical observer. But for solid comfort, I think that most riders will agree with me that mackinaw is well worth the difference in price, for if it is not actually warmer it certainly feels less bulky when worn.

Where Economy Falls Short

And while on the subject of mackinaws, it might be well to point out that a cheap mackinaw is hardly a profitable investment, for it soon loses its shape, is not particularly warm, and feels like a veritable salt bag after a month or two of use. And in choosing a mackinaw, be sure and get one with a collar that can be buttoned up snugly around the neck, for that means much for winter comfort.

The cap will offer little trouble. Of course, you want a good warm one, and most riders prefer the kind with "integral" ear flaps to the ordinary cap, for with the former there is less chance of the headgear blowing off when the ear flaps are in place; at the same time, the separate ear flaps or muffs are a constant source of annoyance. While the peak cap is no doubt the best appearing, there is a lot to be said in favor of the plain round "Russian" type for winter wear. This latter type can be had with a complete face hood which leaves only the eyes and nose of the rider exposed, if so desired; the absence of a peak, of course, acts to prevent the cap from being whisked away on some playful winter breeze.

There is a great deal of latitude for the exhibition of personal judgment and taste in the selection of a good pair of riding gloves for winter use. For myself, I prefer a good heavy pair of well-lined gauntlets made without individual finger pockets, more after the fashion of mittens. These I find are warmer by far than the fingered variety, but they are short on appearance, and moreover they must needs be removed when it becomes necessary to "tinker" with the machine or make some slight adjustment.

The Cuff a Necessity

Whatever kind of glove is used, the gauntlet cuff should be insisted upon, unless the rider has attached to his handle bars the conical "hand shields" which serve to protect the hands and arms from the chilling wind.

Of course, the choice of winter riding togs will depend on the sort of riding you indulge in and the weather. The fellow who goes out for an hour or two a day, and that's all, and only goes out when the sun is out full and the streets and roads are free from snow and slush, obviously need not be so careful to wrap up good and warm as the rider who rides all day and every day throughout the winter months. The best advice that can be extended to the latter is to go the limit in preparation against both cold and wet weather.

As for the latter, there is nothing better for the winter rider to carry than a good old poncho with which he can cover down from head to foot, so to speak, when need be and save both his clothes and his machine from the splashing slush and mud that is sure to prevail throughout the winter months. The poncho is readily carried on the luggage carrier when not needed and will be found well worth the trouble of lugging it along when the time comes to use it. It comes in handy as a seat, also.

MORE SHOW NOTES ABOUT DEALERS

(Continued from page 24)

E. Miller, a well-known Milwaukee bicycle dealer, was on hand at the Show and announced the opening of a new bicycle store at 505 Chestnut street, Milwaukee, with his brother Walter in charge. They sold over 100 bicycles during 1916 from the present store at 514 Twelfth street.

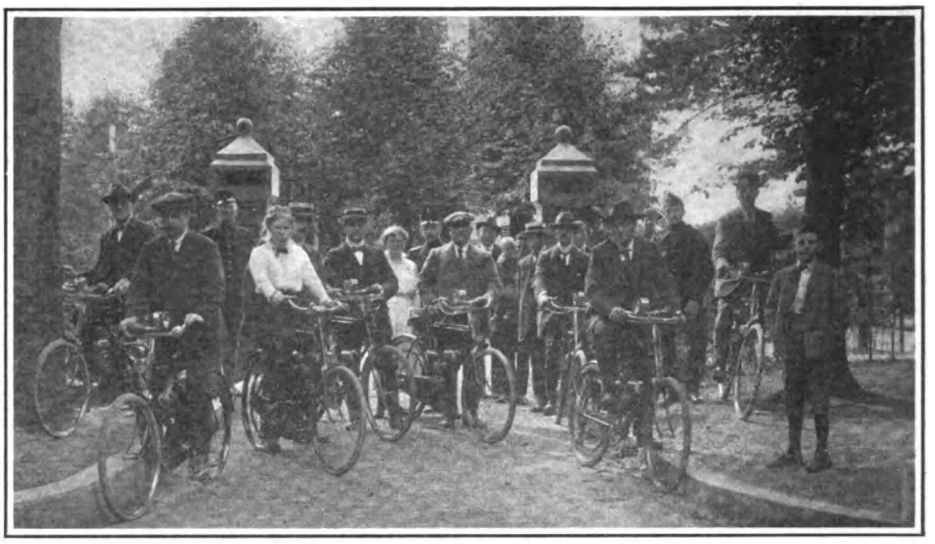
H. D. F. Ingram, of Florence, Wis., renewed his contract to handle the Excelsior during his visit to the Show.

The only woman dealer to call on the trade at the Show was Miss Rosa M. Rust, of the R. M. Rust Co., of Nashville, Tenn. She has been manager of the company for years past and has built up a substantial business in both motorcycle and bicycle sales.

John Hurck, of the Hurck Motor & Cycle Co., St. Louis, Mo., closed contracts at the Show to sell the Indian bicycles in 1917. He expects to remodel his store this winter and will put in a new front and add a separate department for bicycles and accessories.

W. E. Wandersee, Harley-Davidson distributor at Detroit, Mich., told his friends at the Show about the new headquarters he is building on Woodward avenue near Grand boulevard. This building, which will be ready for use about the middle of January, will be 40 x 200 feet, one story high, with glazed brick front. The shop will have a separate entrance through an 18-foot alley. George Hellwig will manage the new store. Harley-Davidson bicycles have been added to the present lines.

CYCLEMOTOR HAS TAKEN HOLD ON HOLLANDERS



Party of Netherlands Cycling Devotees at a Park in Amsterdam Ready for a Run Along Pleasant Dutch Highways—Bicycles Are of Holland Make

Fred McCormick, Harley-Davidson agent at Cadillac, Mich., was the guest of "Hap" Scherer, State traveler for the company, during the week of the Show.

E. E. Kern and W. E. Umber, of Jackson, Mich., Harley-Davidson representatives, made the trip to the Show with their sidecar combination. Part of the run was made in a snowstorm.

The following dealers registered at the Excelsior booth during the early part of the Show: E. W. Whiteman, Goodland; F. A. Scheetz, Clayton; Bill Tucker, Topeka, and Robert Bills, Wichita, all from Kansas. Ira Enmark, Minneapolis, Minn.; Walter Braden, Mankato, Minn.; J. P. Freely, Salt Lake City; Pete Case, Coffeyville, Kan.; Ralph Eberle, Coffeyville; Jerry Tweed, Beloit, Wis.

Charles Weatherhead, the veteran dealer from Elkhart, Ind., came in on his Harley-Davidson early in the week. He was pleased with the new models.

H. L. Daler, new representative for the Harley-Davidson at Fort Wayne, Ind., assisted at the Harley-Davidson exhibit, taking the Hoosier visitors under his wing.

Jake Meyer of Johnson and Meyer, Memphis, Tenn., assisted at the Smith Motor Wheel booth during the week. He also closed a new contract for the bicycle attachment for most of the South.

M. B. Crocker, of the Kansas City Indian branch, was on hand at the Hendee exhibit, welcoming Indian dealers from Kansas and Nebraska.

Hagerdorn & Webster, Harley-Davidson motorcycle dealers at South Bend, Ind., signed up to handle the company's complete bicycle line also.

Jack E. Muhs, of the Leacock Sporting Goods Co., of St. Louis, left after the Show for a quick trip through Southwestern territory for his company.

Glass & Morrisey, Excelsior dealers at Joliet, Ill., report that they had a good year for motorcycle sales, and that they have also delivered 45 bicycles to date. Helm Glass has just returned from a 900-mile motorcycle trip to Lexington, Ky.

Fred C. Hoffer, of the Goudy-Hoffer Company, Excelsior dealer at Los Angeles, contracted for the Excelsior bicycle representation for Southern California. He has had a carload of bikes sent him already, as well as a car of Series 18 Excelsior motorcycles.

Maple Leaf motorcycle men attended the Show, particularly the bunch from

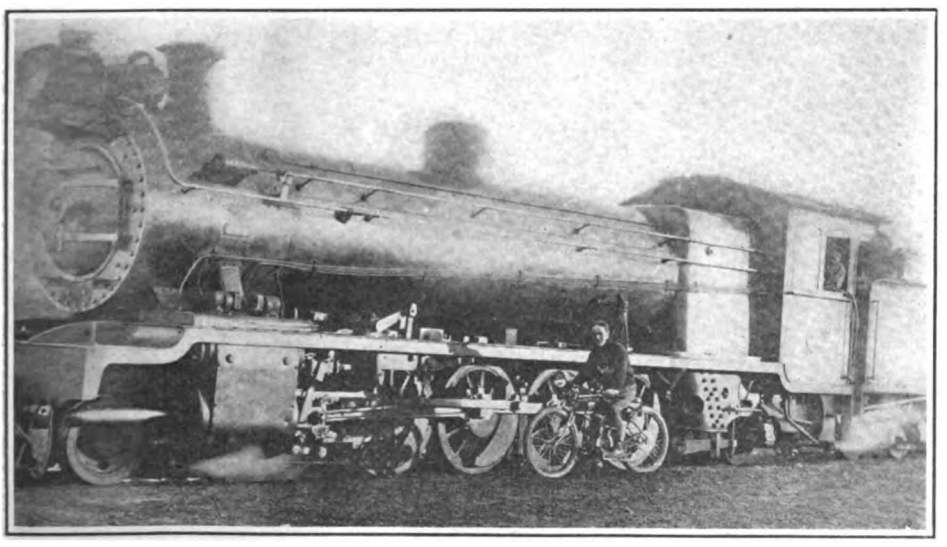
SOUTH AFRICAN RIDER BEATS MAIL TRAIN



Jordan on His Indian Featherweight Alongside Train at Finish in Durban

TO win a race of 423 miles against a mail train is a noteworthy achievement for a two-stroke, 2½ horsepower Indian, but one which was accomplished by Tony Jordan, a prominent Indian road racer of South Africa.

Jordan's race was against the Royal Mail, the crack train of South Africa, and the course was from Johannesburg to Durban. To some extent the train had the advantage of course, as it could stick to its rails, while Jordan was obliged to follow a parallel course over the wagon roads of the country. Jordan won, however, with a time of 22 hours 1 minute, against a flat 24 hours by the mail train, and this was over roads with deep ruts and pot holes, at that.

By E. B. HOLTON

When the Crisp Fall Air Calls Out the Mackinaws

FRIEND O' MINE, a tire salesman, says that we motorcyclists are fiends on casings, and cited for example a lad on a sidecar outfit making a short turn, in low, leaving the agency. On the level, that lad was scrubbing the pavement with his rear shoe, and the canvas inside must have been subjected to an awful twisting strain at the time. Like as not the motorcyclist in question will wonder why that "darned shoe" gave out after 1,800 miles, and never think that he was at fault at all. We sure are one great bunch to handle, and that's no poet's daydream either!

Those English spiral puttees, those bands of woven camel's hair or woolen cloth, that you wrap round and round your leg, are the real goods, fellows. They are neat, conform to the shape of your leg, and are as comfortable as a big woolen sock. No matter how long you wear them, or how much kneeling you have to do over a repair or adjustment, the spiral puttees never cut into the leg and stop the circulation, as is the case with leather leggins. By the way, this type is the real "puttee," for in its native tongue the word means "wrapping"; and you'll find that out well enough when you get a pair. They are easily put on after you get the knack, and it don't take an English accent to acquire it either.

When you are climbing a grade and have need of retarding your spark, you do so gradually, don't you? Well, when you've hit the top and are on the level again, why not gradually advance the spark instead of slamming it on with a flip of the wrist. Of course, you and I don't do it, but there are so many of our friends who are careless who do. Let's caution them about pulling up on the "fire" from retard too quickly—it doesn't make the motor run better for the practise.

Gee, it sure is great how a motorcycle makes you talk in terms of distance as though one hundred miles more or less is a mere trifle! Here's a case: Yesterday I was eavesdropping on a sales talk to a prospect and the conversation ran to speed. The prospect was told that the motor was stiff yet and not broken in, for it had only been through a "little" club run of 200 miles the Sunday before. The prospect gasped. Reminds me of the week before I got my first motorcycle. Friend who is responsible for my entrance into this fascinating sport blew round and said that he was out for a spin to Somerville that afternoon, a matter of 60 miles return.

To me then that town was on the outer walls of the civilized world, but now—"Huh!"

And now is the time for bon-fire runs with the bunch. None of your listless summer days now, with no appetite because of the heat. What you bring doesn't seem half enough. Roasting potatoes in the fire till they are half charred through and those smoking creamy centers, makes you think of the dim kid days. Or roasting the succulent frankfurter on a stick over the blaze till he bursts his jacket; then down with him. Do you wonder why that auto party looked so longingly at you? You are getting 100 per cent pleasure out of your day. That's why.

Met up with a lad yesterday who had a shield of tin over his rear exhaust pipe cause he burned his leg on the pipe otherwise. Seems that he is "knock kneed." Well, all I have to say is that there are some advantages in being "bowed" a little in the nether extremities.

Charley Weiland sure can get away with things that another motorcyclist would be asked to see the judge about.

Here's his latest: The traffic cop had his hand out indicating "Stop." But Charley went right on, passed it, and it was only the imperative triple blast of the whistle that brought him back to the policeman.

"Didn't you see me hand?" asked the copper, sternly.

"No, sir, the sun was in my eyes," answered Charley by way of an excuse.

"That's a new one all right," replied the cop, as he struggled with a smile. "Gwan, beat it, or I'll run you in."

And Charley did.

Try it on your own police next time you get in wrong.

TRAVIS TALKS ON CANADIAN BUSINESS

Harley-Davidson Foreign Correspondent Finds Sales Conditions Satisfactory in Trip Through Dominion

MILWAUKEE, Wis.—E. A. Travis, foreign correspondent in the Harley-Davidson sales department, who has just returned from an extended trip through the western part of the Dominion of Canada, expresses himself as well pleased with conditions as he found them.

"The war has undoubtedly had its heaviest effect in the western provinces of the Dominion," says Travis. "From my observations, practically all the young men are going to the front and the others are expecting to be called under a new registration act, so are careful about buying motorcycles.

"At Vancouver, B. C., where I signed up M. Scovill to handle the Harley-Davidson selling rights again in that city for 1917, I found the general sentiment extremely optimistic. British Columbia is the wealthiest province in the Dominion.

"At Vancouver I signed up with the West End Bicycle & Motor Co., our dealers there last year. I found motorcycling enjoying a healthy existence, in spite of the absence of many young men who formerly contributed to the sport of the motorcycle organizations.

"At Saskatoon, the Walters Cycle Co. has renewed its contract with our firm," continued the genial traveler. "Other dealers signed up are A. Buckham at Edmonton and the Reliance Motorcycle Co., at Calgary.

"In the latter city I found extensive road improvements were being effected with interned German prisoners of war forming the greater portion of the labor forces. A new highway is being constructed from Calgary to Field, B. C., 300 miles in length and straight across the Rocky Mountains. In some places west of Calgary, the road is chiseled out of the side of the mountain. When completed the Calgary-Field highway will be one of the finest and longest stretches of good roadway on the American continent.

"The feeling in Western Canada," went on Travis, "seems to be that after the war immigration will pour into Canada as never before, and that the bulk of immigration will settle in this section."

PLANS RACE SERIES

For Kansas City on Local Track—One Meet a Month Proposed

KANSAS CITY, Mo., Nov. 14.—Casimar J. Welsh, a justice of the peace at Kansas City and a man long identified as a sport promoter, is now working on a plan to promote a series of motorcycle race meets at Kansas City.

Mr. Welsh is making arrangements to use the new race track recently constructed here for that purpose, but says, "if I cannot secure that track for the races which I expect to conduct each month, I will build an oval of suitable size for the purpose, and open perhaps in April."

HOFFMAN-HARVEY TEAM THE VICTORS

San Franciscan and New Yorker Take First Honors in Italian Club's 30-Mile Team Race—Ten Sprints on Berlin Finish Style Run During the Event

NEW YORK, N. Y., Nov. 20.—Harry Hoffman, the San Francisco cyclist, and George Harvey, the New Yorker, accounted for the first honors in the 30-mile team race of the Unione Sportiva Italiana Club, which was held over the famous Pelham Parkway course yesterday morning. Second honors went to the Jerry Nunziata-Alban Demandes team and third place was accounted for by Nelson Johnson and James Alfonso.

The race was run with the so-called Berlin style of finish. A sprint was staged every three miles and points were scored as follows: Winner, 1; second, 2; third, 3; fourth, 4, and so on to seventh place. All of the teams finishing outside of seventh place were credited with ten points. Sixteen teams participated in the race and all of them finished. The 30 miles was finished in 1 hour and 44 minutes.

Hoffman in All Sprints

Hoffman, of the winning team, competed in all of the ten sprints. He won the first, second and fifth sprints; finished second in third, fourth, seventh, eighth and ninth, and sixth in the sixth and final sprints. The Hoffman-Harvey team had the low score of 25 points. The team of Nunziata and Demandes scored 45 points and that of Johnson and Alfonso accounted for 47 points.

Charles Hansen and Thomas La Rossa finished fourth with 49 points, while Charles Rabbino and Robert Salvi, accounted for 56 points and took down fifth place prize. The last named teams were the "Broccos" of the race and they continued to start "jams" throughout the race with the object of gaining a substantial advantage. At the seven-mile mark a big sprint was started and the field was divided, but by terrific sprinting the back field caught the others and from that mark to the finish there was no change.

A spill during the final sprint in which Sossi, of the Sossi-Agkietti team, and Jensen, of the Jensen-Kain combination, went down, marred the race somewhat, but both riders escaped luckily. Hoffman surprised everyone by his ability and showed that he is a heady, strong and speedy rider.

The 30-mile team race marked the closing of the racing season of this popular club. Riders from this club have shared well in the various races they have competed in throughout the season.

A composite score of each of the ten sprints in the race follows:

Team.	Miles 3	6	9	12	15	18	21	24	27	30	Pts.
Hoffman } Harvey }	1	1	2	2	1	6	2	2	2	6	25
Nunziata } Demandes }	5	5	5	3	3	10	1	3	3	7	45
Johnson } Alfonso }	3	4	4	7	2	10	10	1	1	5	47
Hansen } La Rossa }	6	3	1	1	10	1	4	7	6	10	49
Rabbion } Salvi }	2	10	10	4	4	7	6	5	4	4	56
Fontana } Potto }	7	10	10	10	6	3	3	6	5	3	63
Desimone } Simpson }	10	10	10	5	10	5	5	4	10	1	70
Ferrero } Zoccola }	4	6	7	10	5	10	7	10	10	2	71
Aglietti } Sossi }	10	2	3	10	10	2	10	10	7	10	74
Jensen } Kain }	10	7	6	6	7	4	10	10	10	10	80

Okay Motor Outfit Mounted on Bicycle Especially Adapted to Service of Young Warriors

EILER THE WINNER

Takes Weekly Point Race of the New England Wheelmen

NEW YORK, N. Y., Nov. 20.—C. Eiler won the weekly point race of the New England Wheelmen, which was run over the Pelham Parkway course yesterday. T. Urbach, G. Polacsy and J. Palmier finished back of Eiler in the order named. Eugene Aickelin won the one-mile Tonjes trophy race from Palmier, Polacsy and Urbach in that order.

In a one-mile unpaced trial for the Pelham trophy, which was won by Aickelin with Palmier second; Eiler, third, and Polacsy fourth, the winner's time was 2:25. The unpaced trial at six miles for the President's trophy was accounted for by Palmier.

MOTOR WHEEL BUSINESS

Edwards-Crist Co. to Handle Smith Products in Chicago

MILWAUKEE, Wis., Nov. 20.—The Edwards-Crist Co., Chicago, has closed a contract to handle the Smith Motor Wheel and Smith Flyer in that city. An initial order of 20 motor wheels and several Smith Flyers has been received from the Chicago firm. The Oberwegner Motor Co., Toledo, O., has been doing a good business on Smith Flyers, according to reports received by the A. O. Smith Co., makers of the Flyer.

Many Smith Motor Wheel dealers called at the Chicago show last week. M. O'Connor, of the Franklin Cycle Co., Columbus, O., called early in the week and signed a good contract for next season. Other dealers who closed contracts were E. A. Nelson, Rockford, Ill., and Chris Morler, Boise, Idaho.

GARDEN'S NEW REGIME

NEW YORK, N. Y., Nov 20.—Madison Square Garden has changed hands again. The building itself will still remain in the control of the F. & D. Company, the owners, but the Show Corporation, a promoting company of which James J. Johnston was manager, has been superseded by the Madison National Show Co., Inc. The new company will conduct trade shows, amusements and exhibitions.

H-D BICYCLES IN ATLANTA

ATLANTA, Ga., Nov. 18.—An exhibit of the first Harley-Davidson bicycles was one of the features of the Southeastern fair recently. The local sales for the Harley-Davidson bicycles will be handled by the Storey-Pettus Motor Co., 90 Edgewood avenue.

SCHOOL HAS CYCLE GARAGE

LORAIN, O., Nov. 18.—A cycle garage that will accommodate 100 bicycles has been built in the rear of the high school. The school commissioners recently decided to build a roof over the cement court and erect racks to take care of the students' bicycles.

EVENING CYCLING POPULAR

MONTREAL, Que.—Weekly evening bicycle runs have become popular events in Montreal, owing to the energy of James M. Smyth, a local dealer. For the first ride through the city's streets more than forty cyclists turned up and thirty-five finished the seven-mile roll.

Digitized by Google

MEURGER WINS IN PARIS

New Star Captures "Prix de Overture" at Parisian Indoor Track

PARIS, France, Nov. 6.—Charles Meurger, although not figured as having much of a chance, captured first honors in the "Prix de Overture" at the Velodrome d'Hiver (indoor track) here yesterday. The race was run in three heats with the winners meeting in the final. Second men in the heats met in another final as did the third men.

In the first heat Thorwald Ellegaard, the Dane, defeated Fournous and Devoissoux, the latter falling. The second heat went to Meurger with Masson second and Charles Van den Born, the Belgian, third. Julian Pouchois won the third heat from Deschamps and Thuau. In the final Meurger won with Pouchois in second and Ellegaard in third place.

Meurger, teamed with Pouchois, won the tandem race from Ellegaard and Van den Born and Chocque and Evrard. A one hour paced race called the "Prix Stephane" was won by Henry Contenext, who covered 67.76 kilometers (42.1 miles) in the hour. Jules Miquel finished second and Eugene Bruni third.

CYCLE RACING NOTES

Marcel Berthet, the French rider, won and lost at the opening of the Velodrome d'Hiver (Winter track), Paris, Sunday, Oct. 29. Berthet won the "Prix Lartigue," a 50-kilometer (31¼ miles) race back of tandems. Paul Suter, the Swiss, finished second and Philip Thys, the Belgian, who won the last "Tour of Francex," finished third. Berthet lost in the pursuit match with Charles Deruyter.

Charles Van den Born, the old Belgian sprinter, who retired a few years ago, is planning a "come back," and was due to perform at the second meet at the indooor track in Paris, Nov. 5. Van den Born was due to start in the sprint race along with Ellegaard and the other sprint stars.

When the cyclists returned to Newark from the Boston six-day race each one of them spoke of the wonderful form shown by Alfred Goullet, who with Grenda, won the race. Goullet was able to win from any position it seemed.

B. V. W. ON LONG RUN

NEWARK, N. J., Nov. 20.—Thirty members of the Bay View Wheelmen took a trip to Tarrytown, N. Y., yesterday. The journey to Tarrytown was taken via New Jersey, while the return trip was made by way of New York. Robert Benwell, John Martin, William Eager and Nick Hovarth toured to Philadelphia on Saturday. George Brindle won the weekly Brassard race from Arthur Staehle on the way to Tarrytown.

WORKMEN BUYING BIKES

COLUMBUS, Ohio.—One of the features of the bicycle business in Columbus during the fall is the large number being sold to workingmen. All of the local agents report a good demand from workingmen and that they are buying the two-wheelers faster than any other class. Of course, there is a good demand from collectors, solicitors and delivery companies also.

NEW PHILADELPHIA CLUB

PHILADELPHIA, Pa., Nov. 20.—Edward Reed is the president of the newly organized Quaker City Wheelmen, which has 50 members. George W. Harey is vice-president; Maurice Price, financial secretary; Samuel J. Morton, first lieutenant, and Phil Kelly, second lieutenant. The house committee is made up of John Shrake, George Harris and Harry Behrens.

MOTOR WHEEL DEALERS

Several Call at Show Booth and Renew Their Contracts

CHICAGO, Ill., Nov. 20.—Charles F. Martin, of the Martin Motor & Supply Co., Cheyenne, Wyo., Smith Motor Wheel dealer, paid a visit to the Coliseum show. He was loud in praise of the motor wheel

A UTAH COMER

Herchild Eldrege, Who Won Intermountain Championship

performances in spite of the heavy clay country which he lives in.

J. K. Cameron, of the T. Eaton Co., Ltd., Winnipeg, Canada, closed a contract to handle Smith Motor Wheels and Smith Flyers. The Haverford Cycle Co. will also handle both products in all its stores, and J. W. Grady & Co., Worcester, will continue to handle Smith Motor Wheels during the coming season.

BIG CALIFORNIA RUN

SAN FRANCISCO, Cal., Nov. 18.—A great joint club will in all probability be staged early in December by members of the New Century Wheelmen, of this city, and the Garden City Wheelmen, of San Jose. It is planned to have about 75 members of each club leave their respective cities early in the morning and meet at Redwood, which is about the half-way mark.

CYCLISTS MAY GO HOME

NEWARK, N. J., Nov. 20.—Unless Marcel Dupuy, the French rider, and Oscar Egg, the Swiss unpaced champion, come to terms shortly with the management of the six-day race in Madison Square Garden, which is scheduled for the week of December 18-23, they will sail for France on the steamer *Rochambeau*, Saturday, December 2.

OLSEN TAKES NOVELTY

Hudson County Wheelmen's Feature Calls for Running and Riding

BAYONNE, N. J., Nov. 20.—One of the features of the races of the Hudson County Wheelmen, held yesterday, was the novelty race. The contestants were compelled to run with their bicycles for a distance of 500 feet and then mount and finish at the tape. R. Olsen was the best at combining running and riding and T. Flanagan finished second. Arthur Neminsky won the five-mile handicap from the ten-second mark. His time was 12:31 3/5.

James Flanagan won the five-mile open from R. Olsen and T. Flanagan. The Brassard race went to John Carey, who defeated James Flanagan. The points table shows James Flanagan leading on the season's races. The first eight riders in the table have scored as follows: James Flanagan, 118 points; R. Olsen, 91; A. Nemo, 65; L. Mahieu, 45; T. Flanagan, 42; H. Klotz, 40; C. F. Hansen, 34, and John Carey, 31.

MOTOR WHEEL SERVICE

CHICAGO, Ill., Nov. 20.—One of the visitors at the Smith Motor Wheel booth at the Coliseum show last week was Bert Grahn, who is the owner of a Smith Motor Wheel. Grahn has covered 3,500 miles at an upkeep cost of 44 cents. He claims an average of 120 miles on a gallon of gasoline and he plans to equip his machine with the new control.

SIX-DAY RACE FOR FRISCO

SAN FRANCISCO, Cal., Nov. 18.—Application for the use of the Exposition Auditorium for a six-day bicycle race was made a few days ago. Frank J. Carroll, manager of the Goodyear Tire & Rubber Co., and Eastern racing promoters, will be associated in the project. It is planned to run the race early in January.

P. O. CARRIERS USE THE BICYCLE

SALT LAKE CITY, Utah, Nov. 18.—Local letter carriers are using 50 bicycles, which were ordered by the postmaster last spring. The local police are also using the bicycle more this year than ever before. There are three shifts on the bicycle squad of the local police department.

BURNETT TAKES ON BICYCLES

PROVIDENCE, R. I., Nov. 17.—W. N. Burnett, local agent for Harley-Davidson motorcycles, announces that he has also taken on the Harley-Davidson bicycle line. He will make a special play for Boy Scout trade and plans the early formation of a bicycle club.

A CONFERENCE OF SALESMEN

SAN FRANCISCO, Cal.—A conference of their salesmen was recently held by W. E. and W. H. Jackson, local Dayton bicycle distributors. After a discussion on conditions for next year the road men were entertained at a dinner, after which they attended a local theatre, as the guests of their employers.

The Wonderful Record of BOSCH MAGNETOS

The 10 Best Victories of 1915 Are 10 Bosch Victories Too

1. 300 mile race, Chicago, Ill., Carl Goudy, Excelsior, 3:29:51⅗, 86 m.p.h., Bosch Magneto used.
2. 300 miles, Dodge City, Kans., Otto Walker, Harley-Davidson, 3:55:45, average 76.2 m.p.h., Bosch Magneto used.
3. 300 miles, Venice, Cal., Otto Walker, Harley-Davidson, 4:24:17⅕, average 69 m.p.h., Bosch Magneto used.
4. 200 miles, Phoenix, Ariz., Joe Wolter, Harley-Davidson, 3:07:27⅕, 64 m.p.h., Bosch Magneto used.
5. 200 miles, La Grande, Ore., Wolter, Harley-Davidson, 3:36:58, 55.3 m.p.h., Bosch Magneto used.
6. 150 miles, Oklahoma City, Okla., Red Parkhurst, Harley-Davidson, 2:20:50, average 64 m.p.h., Bosch Magneto used.
7. 100 miles, Peoria, Ill., 82:30⅕, average 72.7 m.p.h., Carl Goudy, Excelsior, Bosch Magneto used.
8. One-hour F. A. M. Championship, Chicago, Ill., Bob Perry, Excelsior, 64¼ miles, Bosch Magneto used.
9. 300 mile relay race, Readville, Mass., Bob Perry and Carl Goudy, Excelsior, time 4:24:00⅕, average 68.1 m.p.h., Bosch magneto used.
10. 200 mile relay, Columbus, O., winners Bob Perry and Carl Goudy, Excelsior, time 25:8, average 67.4 m.p.h., Bosch Magneto used.

The 10 Best Victories of 1916 Are 10 Bosch Victories Too

1. 300 mile race, Dodge City, Kans., Irving Janke, Harley-Davidson, 3:45:36, 79.65 m.p.h., Bosch Magneto used.
2. 100 mile race, Sheepshead Bay, N. Y., Red Parkhurst, Harley-Davidson, 68:13⅖, 87.94 m.p.h., Bosch Magneto used.
3. 100 mile race, La Grande, Ore., Otto Walker, Harley-Davidson, 85:42⅘, 70 m.p.h., Bosch Magneto used.
4. 100 mile race, Detroit, Mich., Ray Weishaar, Harley-Davidson, 89.00, 67.41 m.p.h., Bosch Magneto used.
5. Pikes Peak Hillclimb, Floyd Clymer, Excelsior, 21:58, Bosch Magneto used.
6. 50 mile race, Denver, Colo., Bob Perry, Excelsior, 43:44⅕, 68.59 m.p.h., Bosch Magneto used.
7. 100 mile race, Detroit, Mich., Bob Perry, Excelsior, 86:27⅖, 69.39 m.p.h., Bosch Magneto used.
8. 50 mile race, Columbus, O., John Hess, Indian, 44:25⅗, 67.53 m.p.h., Bosch Magneto used.
9. 100 mile race, Grand Island, Neb., Bob Perry, Excelsior, 1:15:12, 79.78 m.p.h., Bosch Magneto used.
10. 100 mile race, Columbus, O., Creviston, Indian, 1:24:40, 70.86 m.p.h., Bosch Magneto used.

NO RECORD of ignition performance ever has equalled the record made by the BOSCH MAGNETO. Here are the best ten victories of the 1915 and best ten of the 1916 motorcycle seasons. They are all Bosch Victories—of course.

With this wonderful record of Bosch Reliability and Bosch Efficiency before you, it is hardly possible that you would buy or sell a motorcycle with other than Bosch Magneto Ignition. It costs motorcycle makers a trifle more than less efficient ignition systems, but it serves and satisfies better—better than you ever could imagine, unless, of course, you are a Bosch user.

CAPRON CLOSES

Store and Discontinues Business—Future Plans Not Stated

TOLEDO, O., Nov. 18.—Harry D. Capron, manager of the Toledo Store, handling Harley-Davidson motorcycles, Yale bicycles and Yale motorcycle parts for 1916, has discontinued business. He has not yet announced his plans for the future.

Harry Capron is widely known to the trade all over the country, having been a traveler, sales manager and finally general manager for the old Yale factory. His experience, in fact, covered all angles of the cycle trade. He is desirous of tying upon some proposition which will allow full use of his abundant energy and aggressiveness and his wide experience in the cycle field.

MEAD SHOP WELL EQUIPPED

DENVER, Colo., Nov. 17.—The Mead Autocycle Company, 1338 Broadway, Excelsior distributors for Colorado, is calling motorcyclists attention to the fact that now is the time to have their machines put in good shape. The Mead people are announcing that they are ready to do overhauling, cylinder grinding, brazing and frame work. The company has one of the best equipped repair shops in the city.

MAHANS ADD THREE TIRES

CHARLESTON, W. Va.—Mahan Bros., cycle dealers in this city, have taken the representation for United States, Firestone and Goodrich tires for the 1917 season. They are handling the Miami and Pierce bicycles.

Manager Stacy Mahan is jubilant over the fact that the firm sold over 300 bicycles during the past season.

HANDLES MERKEL

Hub Cycle Company Distributes This Line in New England

BOSTON, Mass.—The Hub Cycle Company, of 14 Portland street, this city, has taken the distribution rights for the Flying Merkel bicycle for New England. The first allotment of five carloads is now being prepared for shipment by the Miami Cycle & Manufacturing Company, at Middletown, O.

With the advent of this big shipment, the Hub folks will be able to ship all orders from agents in their territory the same day that the orders are received.

AN AD. ON EACH MACHINE

DENVER, Colo., Nov. 17.—The Western Supplies Company, 1448-52 Larimer street, this city, has just recently received a large shipment of 1917 Thors. As one means of letting the people know the 1917 model has arrived, the Western Supplies people have a number of the Thors at the curbing in front of their store. The machines that stand in front of the store have signs hung on them calling attention to the fact that the Western Supplies Company are agents for the Thor and they invite inspection.

NOVEL CARD

From Knoxville Dealer Reminds Merchants of Christmas Deliveries

KNOXVILLE, Tenn.—An attractive, business-getting card is being sent out to local merchants with regard to Christmas delivery by The Motorcycle Store, 702 South Gay street. This card, which has a border typical of holiday season, points out the situation as it is at that period and puts forth a strong argument in favor of the motorcycle as the proper means for delivering goods. Instances are cited of local users who are satisfied with their machines in this work.

WINS CHALLENGE RACE

PUEBLO, Colo., Nov. 18.—In a three-mile road race between Ebert Johnson of Pueblo and George Flynn of Colorado Springs, on an Indian and an Excelsior respectively, Johnson won by a dozen laps. The race was staged on the Pueblo-Colorado Springs highway, five miles south of Colorado Springs. The race was the result of a challenge on the part of Flynn. The men are agents for their respective motorcycles.

BIG DEMAND FOR USED MOUNTS

BOSTON, Mass.—Myreaw Bros., dealers in second-hand motorcycles on Berkeley street, this city, report an unusual demand for used machines. The firm is now taking up all the machines obtainable with a view of meeting the demand for the next few months.

THE BEST DRIVE SPARTAN FOR LIGHTWEIGHTS

1917+Lightweight +Belt Drive=Success

A Case of simple mathematics

THE extreme simplicity of a belt drive Lightweight makes it the obviously right idea for your success.

The idea is as simple as one and one are two. The new fellows to whom you will look for that big 1917 business won't want complication, and you need not give them complication.

Pick a belt drive Lightweight for your line —if your favorite Lightweight isn't belt drive now, ask to have it come thru with belt drive before the 1917 season opens.

Ask for it now—now while there is time, and say too, that you want the best belt —be specific, say

TANDEMITES AVERAGE 45.29 MILES PER GAL.

New York Riders Traverse Motor Parkway at 50 Miles per Hour on Test Run—Use Heath Carbureter

NEW YORK.—Using a fully equipped three-speed Indian of 1915 model fitted with a Heath carbureter, W. Wallace, with Frank Bertolini on tandem, covered 86.9 miles on the road at an average fuel consumption of 45.29 miles per gallon. The distance ridden was covered at the rate of 50 miles per hour, the course being the Long Island Motor Parkway. This is probably the first occasion that a motorcycle was ridden tandem in a consumption test and the figures are considered excellent by engineers, particularly as regards the high average speed maintained.

Wallace and Bertolini started the test run with 7 quarts 6½ ounces of gasoline in the tank, at the Jamaica end of the Parkway. Their total running time was 105 minutes for the 86.9 miles. Wallace and his partner weight 311½ pounds, in addition to the Prest-O-Lite tank and equipment.

STARTS TEST CASE

Rider Is Attacking Constitutionality of Motor Vehicle Act

DENVER, Colo., Nov. 18.—Samuel Ard of Logan county, Colorado, has filed in the State Supreme Court a case attacking the constitutionality of the act establishing a tax on motor vehicles for the purpose of building up a good roads fund throughout the State.

Ard was arrested and fined $1 for not having a motor license. He has determined to carry the case to the Supreme Court in order to test the law, which he insists is unconstitutional on the ground that it is a revenue-raising measure, and that, although the State under its police power can regulate motor vehicles, it cannot pass a revenue-raising measure under the guise of police regulation.

Motorcyclists are watching with interest the outcome of the test case. If Ard wins motorcycle licenses will come a little cheaper in the future.

A CHICKEN DINNER

Is Offered Pueblo Riders Who Climb This Steep Hill

PUEBLO, Colo., Nov. 17.—A sweeping challenge to Pueblo motorcyclists to climb a certain bad hill, 23 miles outside the city limits, has been issued by Frank Pearson, rancher and erstwhile rider himself. He says he will give a chicken dinner to all who succeed in reaching the top. His ranch house stands at the crest, commanding a view of a broad valley below. The hill has been negotiated by a few riders, and some have even taken passengers with them. The road up it is rough and the gradient is pronounced in places.

Pearson makes no conditions except that each machine must reach the top on its own power, and that any fellow forced to stop en route must go back to the bottom for another start. Any make of machine, single or twin, is eligible.

ANNUAL FALL RUN

Bay State M. C. Takes Fifty Riders on Outing to Lake Pearl

BOSTON, Mass., Nov. 17.—Fifty riders figured in the annual fall run of the Bay State M. C. to Lake Pearl. After having dinner at the lake the motorcyclists indulged in impromptu contests. Considerable fun resulted from a spark plug competition. Ten riders were blindfolded and each was given one of the plugs out of his motor; the machines were then mixed up and each contestant was required to locate his own mount, insert the spark plug, connect it up and get the motor running. The event was won by Joe Rogers, who uses a 1916 Powerplus Indian.

This was the last outing of the Bay State M. C. for the 1916 season, and the unanimous opinion was that it scored a big success. A whist party every other Monday evening and bowling each Wednesday evening are the cold-weather features arranged for so far.

TAKE BICYCLES AS PART PAYMENT

DENVER, Colo., November 20.—The Cutter Motor & Cycle Company, 1562 Fourteenth street, this city, is at the present time conducting a sale of used motorcycles. The concern is offering to take bicycles as part payment on their motorcycles.

The Brake That Brought the Bike Back Is a Sure Source of Safety, Sales and Satisfaction.

The care used in the selection of New Departure material, the workmanship entering into the machining of New Departure parts, the heat-treating of all the parts subjected to wear, and the tests and inspections bestowed upon every part in process and of the completed structure, are unsurpassed by any factory in the industry.

Our Dealers have taken pains to investigate these claims. They have satisfied themselves that the New Departure is designed and built for strength, strenuous service and long life. And thus knowing, they remain loyal New Departure Boosters year after year.

If you are not specifying New Departures, if you are not getting your share of the Bicycle Business which follows this brake wherever it is sold, it will pay you to follow the lead of those Dealers who have investigated and convinced themselves that the Brake That Brought the Bike Back is a sure source of safety, sales and satisfaction.

WHY I AM A MOTORCYCLIST

(Continued from page 22)

logue and a back copy of **Motor Cycle Illustrated.** I asked questions here, there and everywhere before I went back to that dealer. But I finally went.

It was agreed that the dealer would supply me with a bicycle until I learned to balance and have confidence in myself, and with my brother acting as instructor I was a fair rider in about eight lessons. The lessons were given in the evening and were necessarily short.

Then the dealer took me out in a sidecar and gave me a talk on the rudiments of motorcycle operating. It was a good deal easier than I had thought; and when I finally got around to sitting in the saddle of the solo motorcycle I found the balancing matter even simpler than it had been with the bicycle.

Farewell to the Trolley Car Bugaboo

I used the motorcycle evenings and Saturday afternoons for two weeks before I felt ready to tackle the trip to the office, but when I did go at it I encountered no trouble. I arrived as fresh as a daisy and bubbling with enthusiasm over my new mount. At noon I hopped in the saddle and rode home for a hot lunch. That made a great hit with my wife. I was back at the office with time to spare, and still as fresh as when I left home in the morning. The ride home in the evening was another pleasure,

I did better work and more of it—and I enjoyed it. A month after I bought the motorcycle my superior commented on my improved appearance and on my increased capacity for work. Seven months later came the advancement and the raise that I had been hoping for. I am now looking forward to another boost.

During my second summer as a motorcyclist my wife suffered an illness that lasted five weeks, and in that period my motorcycle was priceless. With the machine I was able to get home at lunchtime every day, and occasionally I found it possible to spin home for half an hour in the afternoon when the illness was at a critical stage.

Without my motorcycle I could not have arranged to see my wife at all throughout the day (unless I let my work suffer), and that would have been an almost unbearable state of affairs. My machine paid for itself over and over in that trying period, and it has since paid for itself half a dozen times or so, in my opinion. I am now closing my third season as a rider, and am using my second mount. I used the first one two years, and bought a new one in April of this year.

I ride almost the year round. An ordinary snowfall does not bother me, and I plug along through rain without complaining. When I am obliged to use the trolley for a few days or a week during the worst winter weather, I don't mind it because I know I am soon going back to my motorcycle saddle.

Upkeep Expense Was Low

My tire expense has been low and my repair bill comparatively trifling. I haven't kept track of it, because it was never big enough to bother me. During my second summer as a rider I bought a sidecar for my wife, and she accompanied me on all my Saturday and Sunday outings.

So that's my story of why I am a motorcyclist—and of why I intend to remain one. There are a lot of twists and turns to it, but when I sift my observations of the past three years I get back to the definite conclusion that the ability to get to a given point **just when I want to,** and without worry, delay or other annoyance, is the basic reason for my allegiance to the power two-wheeler. And believe me, fellows, that's **some reason.**

Join the Morrow Legion. Hundreds of thousands of riders all over the country are members. They're enrolled for life, for the smoothness, the certainty of MORROW service has made every one of them red hot bicycle boosters.

MORROW means, first and foremost, a greater access of bicycle riding enthusiasm. Wherever there's a MORROW-equipped rider, *there* is the beginning of a bicycle-riding epidemic.

The dealer who cashes in on MORROW service does more than merely make money. He makes friends, profitable friends, the sort of friends that pass the good word along and make his store their shopping centre.

MORROW is the oldest brake on the market, the largest brake, the strongest brake, the smoothest brake and the easiest selling. It has always made its way by the way it's made.

SO—WHY NOT HITCH TO MORROW—TODAY!

More Dealers Seen at the Show

GEORGE L. SMITH has taken the 1917 agency for the Harley-Davidson in Casalia, O. He is located in a town of 700 people and his sales records for this year show 75 machines delivered.

I. W. Schroeder, Ohio traveler for the Harley-Davidson, will also cover Kentucky for the company in 1917.

W. E. Dewey, who formerly handled the Excelsior at Omaha, Neb., and who went into another line of business a couple of years ago, has again taken on the agency for the Excelsior in Omaha.

S. A. McGinnis, Indian motorcycle dealer at Iowa City, Iowa, disposed of over 50 bicycles during the past season. He handles the Iver-Johnson as well as the Indian line of pedal two-wheelers.

Lee Wright, of the Wright Motorcycle Co., Galesburg, Ill., brought Fred Carlson with him to see the Chicago Show, and Fred was so well pleased with the new Harley-Davidson that he gave Wright an order for a 1917 sidecar combination while at the Show.

W. G. H. Ripper of New Brighton, Pa., signed up at the Show to handle the Excelsior motorcycle, Smith Motor Wheel and Dayton Motor Bicycle.

Lon Claflin, of Salt Lake City, Indian distributor for the State of Utah, is enthusiastic over both motorcycle and bicycle business. He has placed about 300 bicycles so far for 1916, and placed an order for a carload of bicycles at the Chicago Show for delivery Jan. 1.

A. Boesche, Jr., of the Motorcycle Service Co., of Cincinnati, O., agent for the Thor and Henderson motorcycle lines, signed up at the Show to handle these makes again during 1917.

Aurich and Curtis, of Billings, Mont., bicycle and motorcycle dealers, came in early and signed up for the Harley-Davidson bicycle line.

Leo C. Nieschwitz, accompanied by his brother, H. V. Nieschwitz, of Canton, O., attended the Show and report ten recent sales of Indian Featherweights in their territory of late.

The G. H. Westing Co. has closed for the Cygnet rear-car for Indianapolis and vicinity for 1917.

Peter de Hammer, Harley-Davidson dealer at Kenosha, Wis., closed at the Show to continue handling this make for 1917. He will also sell the Harley-Davidson bicycle line.

"Speck" Warner announces that he has taken the agency for the Cygnet rear-car for Ellsworth, Kan., and vicinity.

Robert Sayres, of the Appeal Mfg. & Jobbing Co., distributing the Harley-Davidson in California, was at the Show all week. He closed a number of important deals in the Coliseum.

The Motorcycle Supply Co., of Portland, Ore., has remodeled its salesroom and added a bicycle department. A carload of Harley-Davidson motorcycles has already been sent to this firm from Milwaukee.

W. P. Glasgow, of Tacoma, Wash.; Fisk Motor Co., of Eugene, Ore.; Hirsch Cycle Co., of Seattle, Wash., and Falls City Supply Co., of Spokane, Wash., signed up at the Show with Manager Miller to handle Harley-Davidson bicycles.

G. N. Henninger, who has been in charge of W. J. Walker's Harley-Davidson store in Danvers, Mass., for several seasons, will operate the store under his own name during the coming season. He reports sales of 25 sidecars, 50 motorcycles and 75 bicycles for 1916.

C. F. Martin, of the Martin Motor & Supply Co., Sheridan, Wyo., was the only Wyoming representative present. He signed up to sell the Excelsior and also took on the Smith Motor Wheel. His leading bicycle brands are the Excelsior and Great Western models.

MORE SHOW NOTES ABOUT DEALERS

(Continued from page 47)

Toronto. Ed. Buffum of the Indian wigwam, Sam Bully of the Planet Cycle Company, Tom Gibbons, a Planet manager; A. Humphrey of the Humphrey Cycle Co., Percy McBride, Excelsior and Henderson representative; J. W. Gibson of the Canada Cycle & Motor Co., and Earl Rogerson of the Dunlop Tire Company, Ltd.

Stanley Kellogg, of Bridgeport, Conn., sold five Series 18 Excelsiors this week, he reports. Over 475 machines represented Stanley's output for 1916. "I expect to make it 600 this year," he says.

J. E. Stevens, formerly with the 20th Century lamp interests and now with Stevens & Company of New York, was at the Stevens booth. He left for a business trip following the close of the Show, the trip taking him through Illinois, Indiana, Pennsylvania and back to New York.

Morris Hayutin of the Western Supplies Co., of Denver, Colo., was an early Show visitor. He announced that his firm is going to issue a new 86-page catalog shortly that would feature the Frontier and Wesco name-plate machines. Hayutin has taken the agency for Rogers sidecars and renewed the contract for the Reading Standard and Thor for Denver.

A. P. Tyler, Harley-Davidson dealer at Boise, Idaho, signed up to sell the Harley-Davidson bicycle line during the Show. Tyler is tripling the capacity of his place at 820 Grove street and has rented the store next his place to care for the overflow from his present quarters.

P. O. Crawley, of the Indian Motorcycle Company, of Atlanta, Ga., spent the first part of the week at the Show. The first year of the new Indian Georgia agency proved a good one, new agencies having been established with E. L. Wilcox, Augusta; R. R. Oakman, Savannah; W. C. Massey, Columbus; Hudson Hardware Co., La Grange; C. W. Hunt, Coby; J. A. McLaughlin, Hawkinsville. The firm delivered 63 Powerplus models during the past season.

F. D. Shomo, of the Dallas branch of the Hendee Mfg. Co., was a busy man at the Indian booth looking after the interests of Wigwam dealers from his territory.

Norman Hopper, of the House of Hopper, at Salt Lake City, Utah, Harley-Davidson distributor, came in to the Show. He was busy meeting old friends and taking in the various exhibits.

Bob Lawson, transcontinental bicyclist, held forth at the booth of the A. O. Smith Company, where Smith Motor Wheels were displayed.

John Merz, of the Merz Motor Co., of Indianapolis, Ind., was at the Excelsior Cycle Company booth throughout the week. He travels Indiana for the Excelsior and during the summer is busy at Indianapolis with his own company. He reports the sales of 125 wheels during the past season from his own store. Hearsey tires for bicycles and Firestone and Goodyear for motorcycles are handled.

H. L. Dipple, of Indianapolis, Ind., was among the first to visit the Show. He made his headquarters at various booths.

Iwin Jacobs, Indian traveler for Ohio, reported the following dealers from his territory as registered at the Indian stand: Herman Bumiller, Cincinnati; C. A. Clark, Hamilton; Roy Clark, Middletown; George Stream, Newark; Paul Monroe, Sydney; W. O. Lane, Troy; H. J. Tucker, Akron; Charles Rausculf, Lima; Victor Minert, Toledo; Charles Zucker, Cleveland.

R. F. Brasecher, of Allegheny, Pa., renewed his contract for the Indian while at the Show, as did Ray Wood, of Stevens Point, Wis., and T. W. Long, of Washington, Pa.

E. C. Marquardt, manager of the Ashbourne Motorcycle Co., Burlington, Iowa, Indian distributor, visited the Show to look over new accessories as well as the 1917 Hendee product.

A. Weitzman, of the Weitzman Cycle Co., and H. Greenburg, of the Detroit Cycle Supply Co., both from Detroit, came in early. Greenburg was boosting a new line of cycle accessories under the name of the Decyco.

Special Delivery!

For quick deliveries this Stevens Side Car is just the thing. Light construction, but tough—carries 100 pounds. Not unwieldy—only 26 inches wide over all.

JOHNSON'S CARBON REMOVER

80% of engine trouble is caused by carbon. That knocking sound and loss of power is due to just one thing—carbon in your cylinders. Clean them out with **Johnson's Carbon Remover** and your engine will run like it did the first 500 miles.

SAVE GASOLINE

Clean cylinders reduce the consumption of gas from 12% to 20%, giving you the maximum power and speed from the minimum amount of fuel. Johnson's Carbon Remover **saves you money** because the economy in fuel effected by its use more than makes up the price of the Carbon Remover.

OUR GUARANTEE

We guarantee Johnson's Carbon Remover without equivocation. **No matter how much you use or how you use it, Johnson's Carbon Remover cannot injure any part of your motor.** You could soak your engine in it for days without the slightest injury. Contains no acids or chemicals.

Why pay a couple of dollars for having the carbon burned out of your motorcycle when you can easily do it yourself without laying up your machine?

NO MECHANICAL EXPERIENCE NECESSARY

You simply pour four ounces into each cylinder through the Pet Cocks or Spark Plug openings and allow it to remain over night. In the morning race your engine and the carbon blows out.

INTRODUCTORY OFFER

If your dealer cannot supply you send us $1.00 (bill or stamps) and we will send you enough **Johnson's Guaranteed Carbon Remover** to thoroughly clean an ordinary motorcycle twice. Please give us the name of your dealer.

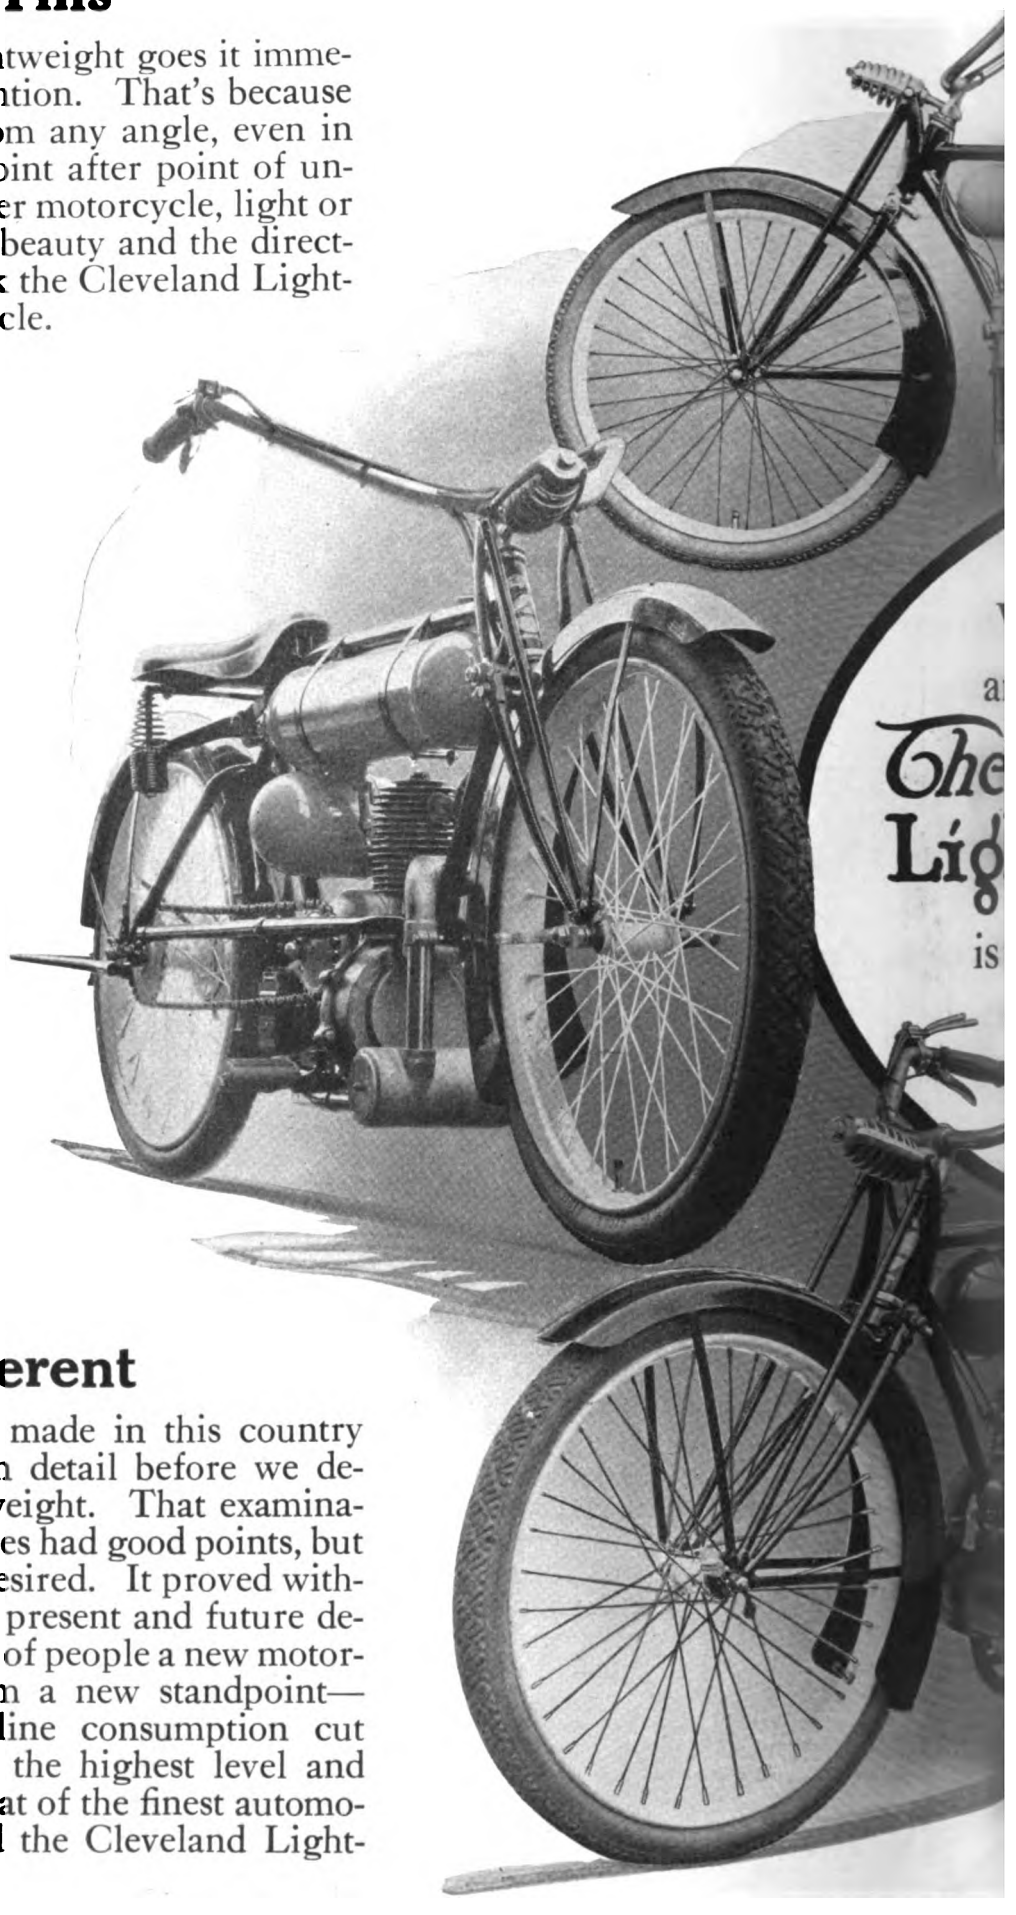
Look at This

Wherever the Cleveland Lightweight goes it immediately attracts favorable attention. That's because it is different. Look at it from any angle, even in these pictures, and you see point after point of unexpected superiority. No other motorcycle, light or heavy, has the simplicity, the beauty and the directness of construction that mark the Cleveland Lightweight as the master motorcycle.



It is Different

Every reputable motorcycle made in this country and abroad was examined in detail before we designed the Cleveland Lightweight. That examination proved that all motorcycles had good points, but that none had all the points desired. It proved without question that to meet the present and future demands of the greatest number of people a new motorcycle must be designed from a new standpoint—with weight reduced, gasoline consumption cut down, specifications put on the highest level and construction on a par with that of the finest automobile. These ideals produced the Cleveland Lightweight.

Digitized by Google

Automobile Quality

A motorcycle won't run on design alone. When we had developed the best possible design for the Cleveland Lightweight, the next step was to establish the best possible specifications on its materials. Compare the Cleveland Lightweight with any other motorcycle—light or heavy—and see if you get nationally accepted quality like this: Bosch Magneto, Brown & Barlow Carburetor, Non Gran bronze, aluminum castings, S. K. F. ball bearings, drop forged frame fittings, straight line worm drive, Firestone Non-Skid tires, multiple disc clutch, heat treated alloy steels, and everything else on the same level. Can you beat it?

75 MILES to the gallon

Now for the Future

Don't hang your next season's selling hopes on a trailer. Pick the Motorcycle that's in the lead—ahead of the times—wanted by every new rider—accepted on sight—proved by the past—and without a question the easiest to sell.

The only thing we could add to our 1916 model was a kick starter. That's ready at $10.00 additional. Watch the changing sentiment in favor of the motorcycle that gets its weight down to 150 pounds—that opens the way for thousands of new riders—that has the beauty, the stand-up-ability, the get-there qualities and a price that everybody can afford—$160.00.

Get in line for the Cleveland Lightweight.

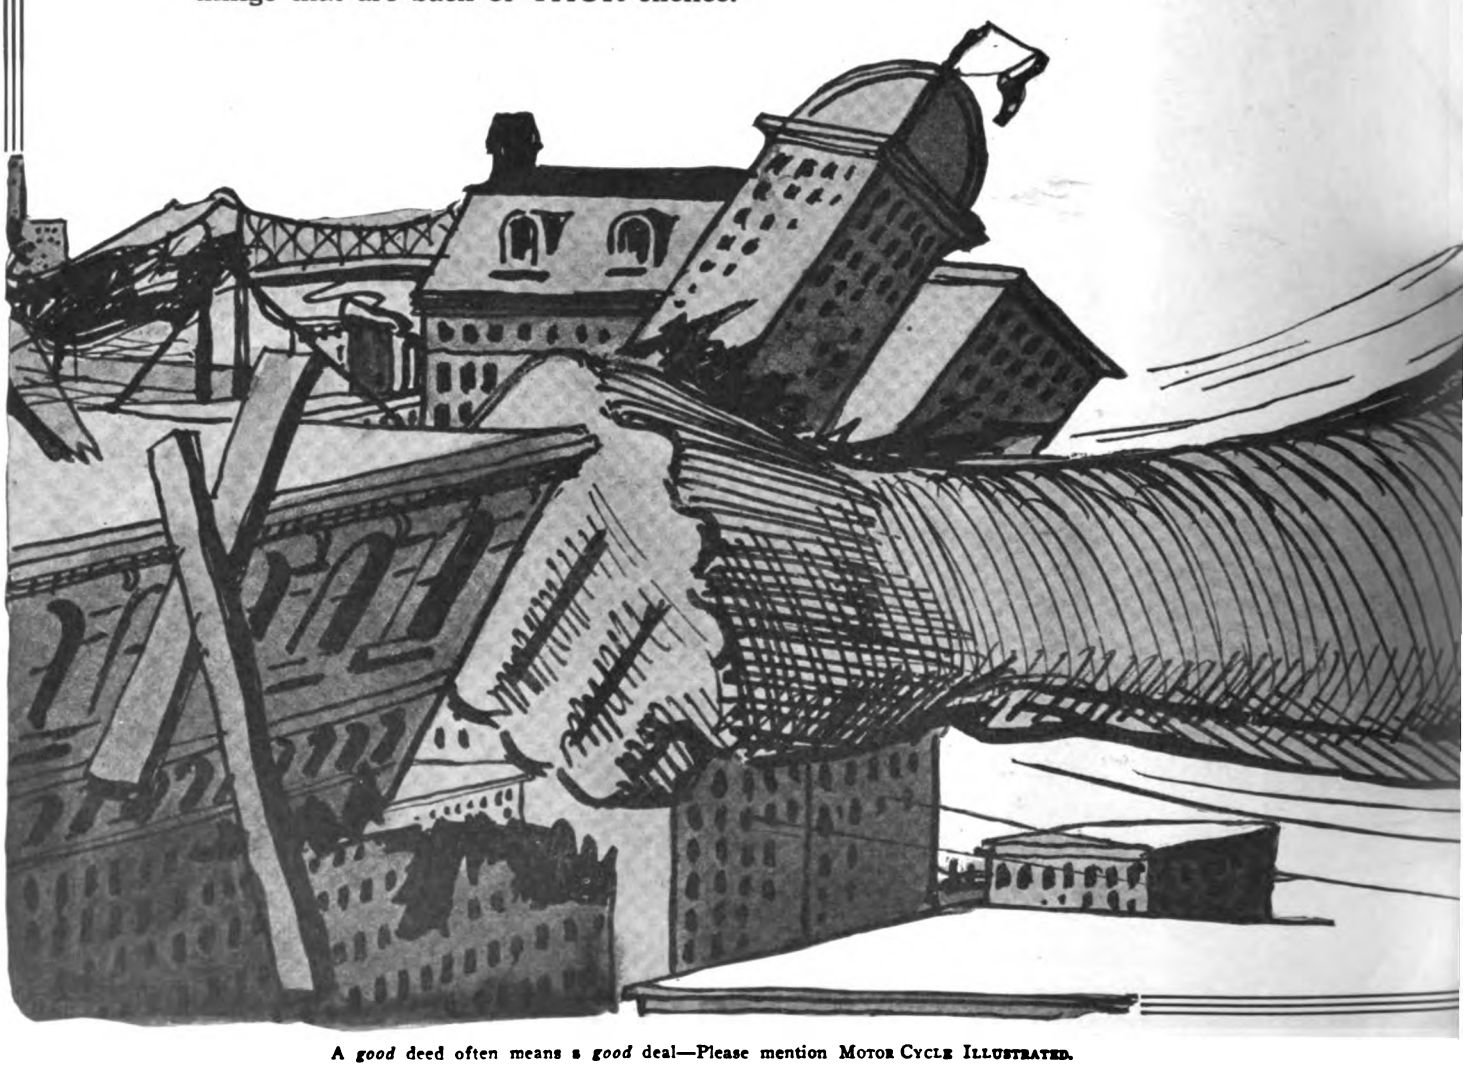
There's Terrific "Punch

Thor Agency

The man who gets the THOR agency invariably puts a dent in his competitor's business. The smashing success of THOR is due not only to the powerful prestige of the THOR reputation, but to the consistent leadership THOR construction and service maintain. First in the field, still first on the road.

For instance, SILENCE of motor and wheel action are no mere word-claims —they're actually THERE in the THOR. A power plant with the valve action enclosed, eliminating those annoying little "ticks" and "taps"; a new type muffler that's built to wipe out sound; a cut-out that is hermetically sealed when not in use and chain-guards that are made sound-proof with asbestos padding—these are the things that are back of THOR silence.



A *good* deed often means a *good* deal—Please mention MOTOR CYCLE ILLUSTRATED.

Digitized by Google

o the

The THOR line is complete—it meets the needs and likes of every type and every purse. There's a high-powered THOR Twin; there's a medium powered twin and there's a light twin, all three fitted with three-speed gears; and there's the phenomenal THOR supersingle.

Behind the dealer, protecting him, assisting him, encouraging him, is the broad-gauge Thor dealer—co-operation policy, the fairest and most human policy ever established by any manufacturer.

Visit the Thor Booth. See what the THOR dealer has to sell. Talk over our sales and business-promotion policy and you will know why the livest, most level-headed dealers everywhere are tying up with Thor.

Announcing

The Merkel Motor Wheel

IT is a great pleasure to be able to make this announcement—the "Merkel Wheel" is here.

¶ When the New York Cycle Show opens, December 4th next, the Merkel Motor Wheel will make its initial bow to the trade; it is bound to appeal to those in the "know" as a history making step in popularizing the bicycle and assisting its huge forward movement.

¶ The Merkel Motor Wheel bristles with the ingenuity of Joseph Merkel, but an outstanding feature of especial interest to the trade is its method of attachment, it can be fitted to any and every bicycle, requiring only the removal of the rear wheel and replacing it with the "Merkel Wheel"—no special tools, no complicated fittings—it is ideal in every respect.

¶ If you attend the New York Show visit the Merkel Wheel Exhibit. See the orange motor wheel—The Merkel Wheel.

Exclusive Merkel Wheel Territory is now being assigned.

The Merkel Motor Wheel Co., Inc., Flushing, New York

Interesting Figures

97 Harley-Davidson dealers visited the great Milwaukee factories during Chicago show week.

Almost without an exception these dealers stated that they would do a bigger business during the 1917 season than they did last year.

The truth of these dealers' statements is borne out by the following facts:

Orders to date are 49% ahead of last year.
Shipments to date are 50% ahead of last season.
Sidecar orders are 139% ahead of last year.
Sidecar shipments are 153% ahead of last year.

Many Harley-Davidson dealers tell us that one reason for the constantly increasing popularity of the Harley-Davidson motorcycles is the truly remarkable convenience and luxury of the electrically equipped Harley-Davidson type. Many of these dealers visiting the Milwaukee factories during show week state that they will sell close to 95% of their machines electrically equipped this year.

We invite correspondence from dealers who are not now selling Harley-Davidson products and who are anxious to improve their factory connections.

Harley-Davidson Motor Co.
Milwaukee, Wis., U. S. A.

Bicycle Supplies

No Goods Sold at Retail

Perlman Cycle Company

The house with a reputation for efficiency and service backed by many years of experience in the bicycle business. We have the reputation of giving our customers quick service with the best merchandise available. We ship all orders the day they are received, and do not substitute for inferior merchandise. We do not want your business unless we can serve you right, but we do want you to get acquainted with us, as well as we want to get acquainted with you. Give us a chance to fill your wants—your first order will surely convince you; and we know after that we will keep you for a customer.

Motorcycle Supplies

We have a system in our shipping department enabling us to take the best of care of all orders. We make prompt deliveries, and our prices and discounts are as good, if not better, than any other jobber. All we ask is a fair trial.

At Booth 56, our Mr. Evans, Mr. Zehner, Mr. J. J. Lehr and Mr. Harry Perlman will be in attendance and will be very glad to meet all of our old customers and friends, and we cordially invite all to make our booth their headquarters.

For those who are unable to visit our place of business or see us at the Show, and who would like to get in touch with us, we would be glad to send our catalogue on request. We solicit your correspondence.

The following are a few of our 1917 specialties:

We are the distributors for the Miami bicycles for Greater New York, Long Island, Westchester, Dutchess, Orange, Ulster and Putnam counties, and the State of New Jersey. We have some good territory open for some live dealers. We have a very good proposition to dealers for our "Perl" and Mohawk bicycles. Write us at once for our proposition. Our line of bicycle tires is unsurpassed; we can convince you upon investigation. The following special brand tires cannot be beaten—Mohawk. White Cup, Imperial, Mercury, Pearl black line and Red Band, Tribune.

Columbia

THE LINE IS N

See it at the New York Show. The annual exhibitions of Columbia bicycles have always attracted the interest of dealers throughout the country. It is logical that they should. Columbia bicycles were the first in the field; they have always been the leaders. Dealers as well as consumers have always looked to them for the latest improvements in bicycle construction.

The demand for Columbia bicycles is established on a foundation of thirty-nine years of successful selling and satisfactory service.

For the reason that Columbia bicycles are so widely known and have proved themselves so thoroughly dependable dealers can sell them with less effort and more assurance of satisfying their customers than any other make of bicycles on the market.

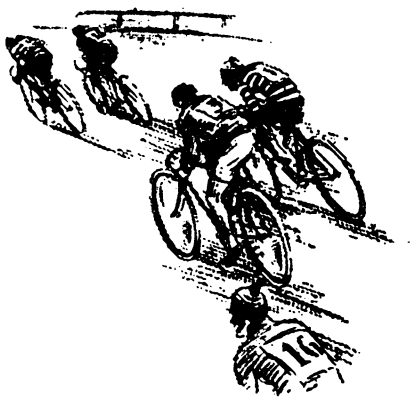
COMPLETE



The Columbia exhibit at the New York Show will attract more attention than ever before. The interest aroused at the Chicago Show surpassed all other exhibitions of Columbia bicycles. The response on the part of the trade was immediate. Already the sale of Columbias has bettered that of the previous year, which was a record breaker.

The line is now so complete that it enables dealers to meet their customers' demands for every type of bicycle at every price. And dealers who carry this line have this advantage: the Columbia name-plate is known to all riders, it needs no introduction, it stands for the best and most progressive in bicycle development.

"Here's the Seat for Me!"

F-N

"It's a real joy-ride for me every time I ride on an F-N. It's SO comfortable, so wonderfully safe. And thousands of girls like me will ride on no other seat. WHY?

"Because of the marvelous air-floating springs of the F-N, its wide, long folding footboards that are just the thing for foot-comfort. They save my heels.

"Because of the Kantpak Cushion that holds its shape forever.

"Because of the low saddle position.

"Because, finally, it's the sort of seat I can trust—one that will never go wrong."

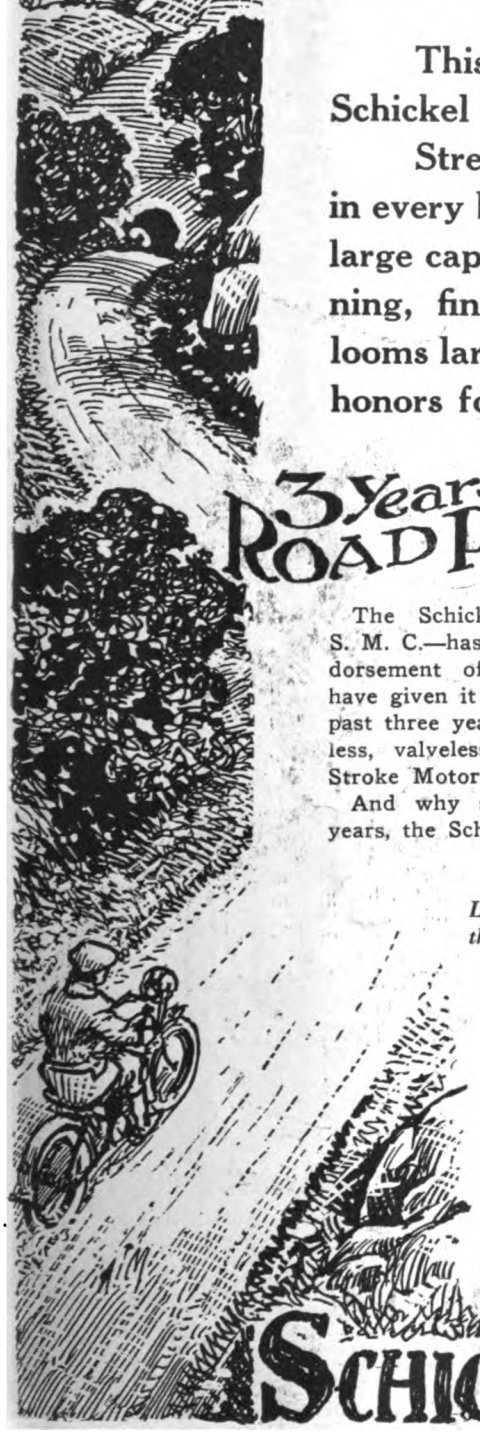
TRADE MARK

NEW NAME — NEW CAPITAL — A POWERFUL ORGANIZATION

This advertisement marks a new era in the history of the Schickel Motor Company.

Strengthened by the addition of broad-gauge men versed in every branch of motorcycle merchandising—buttressed by large capital—bound together into a powerful, smooth-running, finely organized unit—the Schickel Motor Company looms large on the horizon as a contender for sales and service honors for the coming season.



3 Years ROAD PROOF

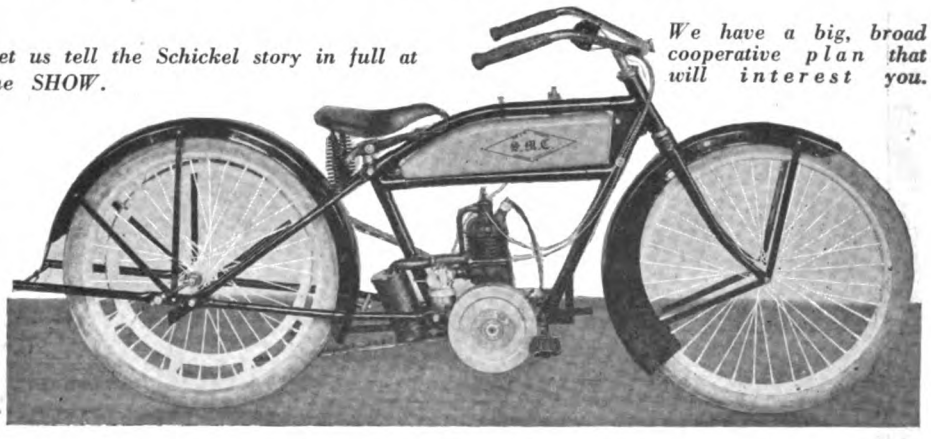
The Schickel Lightweight — now the S. M. C.—has behind it the unqualified endorsement of thousands of riders, who have given it every known test during the past three years, and have found the camless, valveless, high-speed Schickel Two Stroke Motor absolutely flawless.

And why shouldn't it be? For eight years, the Schickel Two Stroke Motor has been on the road. It has been refined, improved and strengthened with each succeeding year until today it stands as the highest example of two stroke motor construction. It is powerful, it is cool, it is astonishingly quiet. Above all, its simplicity and compactness make it the ideal lightweight motor.

Surrounded as it is by a construction whose every feature is the result of EXPERIENCE, the ideal Schickel Motor is in an ideal setting. A flexible, smooth, silent belt drive machine, simple controls—all these features make up an unbeatable proposition for the dealer.

Let us tell the Schickel story in full at the SHOW.

We have a big, broad cooperative plan that will interest you.



SCHICKEL MOTOR CO. STAMFORD CONN., U.S.A.

ATHERTON COASTER BRAKE

Success Based on Sincerity of Service

The Atherton Coaster Brake has a solid, substantial standing in the cycle industry. No one, not even our "dearest enemies" can deny that fact. What is the reason for the vast measure of confidence accorded the wheel fitted with an Atherton?

Simply because the trade and rider have been taught to know that ATHERTON stands squarely for SERVICE—ALWAYS. Because the dealer has learned to speak confidently, assertively, of the superiority of the ATHERTON Coaster Brake—a superiority that has been proven innumerable times to the entire satisfaction of the rider. The rider has come to feel that the dependability of the ATHERTON is not due to chance, but is governed by easily-explained construction methods that distinguish ATHERTON above all others.

These are some of the things we can PROVE to you, dealers, when you visit us at Booth No. 29, Madison Square Garden, during Show Week.

Come! You'll be VERY welcome.

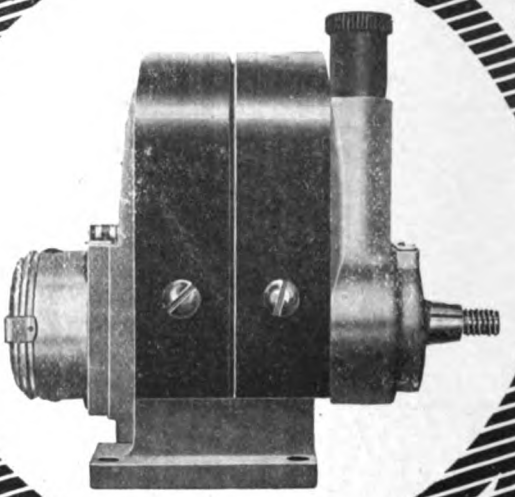
NATIONAL Magneto Midget



You would not use a team of horses to pull a toy wagon. You would not drive a thumb tack with a sledge hammer.

It is equally as ridiculous to use a big, bulky, cumbersome magneto when the little NATIONAL "MIDGET" — the wonder-worker of the ignition field—can be obtained at considerably less cost for use on lightweight motor-cycles and power bicycles.

The NATIONAL "MIDGET" has been directly responsible for the striking road-record made by the CYCLEMOTOR during the past year. The coming year will see another big CYCLE-MOTOR year, both as regards sales and service. The NATIONAL "Midget" is again exclusive equipment on CYCLE-MOTORS and will continue to be so as long as it maintains its record of 100% service under all conditions.

Remember this: The NATIONAL "MIDGET" is the lightest, smallest, most compact and most perfectly developed high-tension magneto on the market. It weighs but 3 lbs. 10 ozs., is oil, dust, mud and water-proof. It gives a blazing hot spark on both retard and advance. It fulfills every mission of a high-grade ignition apparatus—and does this at a cost that makes it the most desirable adjunct to every light power cycle on the market.

Write for full particulars and list of NATIONAL users.

A Motorcycle to Be Reckoned With

It has done big things and it's going to keep right on doing them. It is mechanically impossible for it not to deliver the goods. Look it over at the show. Compare it point for point with other motorcycles. See the Westfield Exhibit at Spaces 67, 68, 85, 86.

Pope

The 1917 Twin Electric is the most highly developed power and speed producer you'll find on the floor. It embodies no radical changes in Pope construction—they weren't necessary.

But every detail has been refined, tested, and refined again until now this machine has reached a degree of mechanical perfection never before attained in motorcycles.

The record it is making on the road tells the rest.

Electrical Equipment

Each item of electrical equipment on this model is in keeping with the high standard of excellence of the machine itself. It was adopted only after the most rigorous tests of the Westfield engineers had proved it to be efficient in every respect. The equipment includes the Splitdorf Combination Ignition and Generator Unit, the Wico Storage Battery, Hawthorne Electric Hornlite and Tail-light, the Splitdorf Ammeter, and a special Pope type wiring set made by the Splitdorf Electrical Company.

Corbin-Brown Speedometer with special Pope rear drive supplied as extra equipment.

Also the most complete exhibit of Columbia Bicycles ever shown—same time, same booth, same makers.

Baby Alice's CYGNET LIMOUSINE DE LUXE

CYGNET REAR CAR

Fits any Motorcycle "On or Off in 30 Seconds"

Now For 1917

The Cygnet Limousine is not our only surprise. Note these three important features of Cygnet 1917 Models:

There's the new Commercial Car Top—for the first time guaranteeing complete weather-protection to Delivery Van drivers.

Then, there are the new Delivery Models, meeting the requirements of new businesses and adding splendid additional sales-possibilities.

Last, but not least, the Pleasure Models, showing progress and refinements in design and finish, meaning added comfort and safety.

BLUE STREAKS

Think Blue Streaks

Clothing Stores, Haberdashers, Milliners, Meat Markets, Laundries, Plumbers, Garages, Bakeries, Telephone Linemen, Shoe Stores, Department Stores, Groceries, Druggists, Messenger and Delivery Service of all kinds.

These are your prospects. Show them the saving offered by the commercial motorcycle.

There are many reasons why each of these classes should use motorcycle equipment—should buy it *at once, from you.*

Ask us today to put the facts and figures in your hands.

Motorcycle users everywhere know all about Blue Streak Tires.

For Blue Streak reputation, as a racing tire and as a road tire, is so well known that most motorcyclists think Blue Streaks when tires are mentioned.

Merchants, too, who figure on longer mileage at lower mileage cost, with fewer tire lay-ups, think Blue Streaks. They know the real economy in a tire of such quality.

Dealers, who want to make tire sales in the least possible time and with the smallest amount of trouble, think Blue Streaks the very minute a motorcycle tire is mentioned.

And when they want to give their customers the greatest tire satisfaction at the least expense they think Blue Streaks.

Motorcycle tires—Blue Streaks!

Think of them together to the merry tune of the cash register.

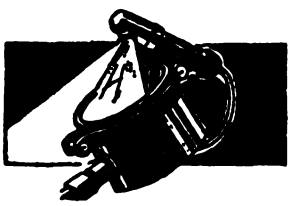
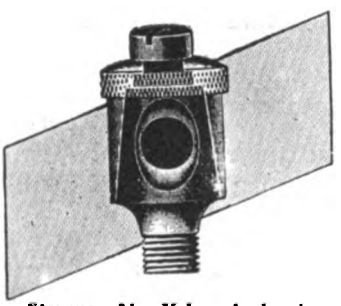
A Great Organization Built Around Little Necessities

Covering nearly a square block on downtown Broadway stands the tallest building in the world —52 stories high—the Woolworth.

This mammoth building stands as an undying monument to the wisdom of Woolworth, the man who appreciated the very important fact that it was not so much the intrinsic value of the commodity dealt in as the METHOD OF MERCHANDISING, that made big business.



Stevens Speedometer Lamp — illumines dial at night—an ideal trouble lamp.
List price, $1.50

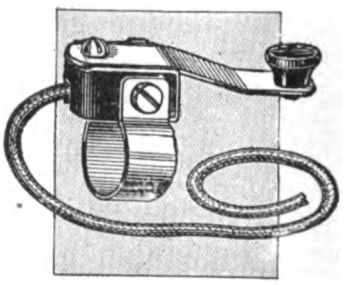


Stevens Air Valve—A handy little jigger; starts cold motors instantly.
List price, 75c.

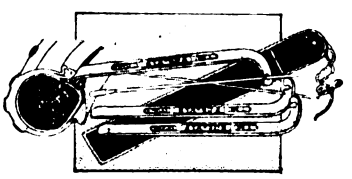
The success of STEVENS & CO. is founded on Service—which is another way of saying—Honorable Dealings with the Trade—a consistent following of the principle of stocking no product that does not fill some definite need in the cycle industry.

The result of a policy to earnestly and sincerely better the cycle and motorcycle is fore-ordained. STEVENS products have gained a reputation in the industry which has smoothed the sales-road of every dealer and jobber handling STEVENS Accessories. Dealers know FROM EXPERIENCE that every article marked with the name STEVENS is, first, saleable; second, practical in use; finally, of that lasting quality that features every single item of the Stevens "HONOR-BUILT" Line.

To visit our booth at the Show is to spend a very profitable half hour. Be sure and look for Space Number 47.



Simplex Magneto Cutout — Grounds magneto at touch of finger. Allows compression to act as instant brake.
List price, 50c.



Simplex Tire Tools—three hefty tire-removers made of carbon steel-nickel finish.
List price, 25c. and 50c.

HOW THE PLANS SHAPE UP FOR GOTHAM'S BIG CYCLING WEEK

Last Minute Entries Bring List of Exhibitors Up to 77; Committee Will Stage Cycle and Motorcycle Development Displays; Meetings Will Make It a Busy Week for the Trade Folk; Military Preparedness Day Planned as Added Feature; Big Advertising and Publicity Plan

NEW YORK, Nov. 28.—They're all lined up—77 of them, the largest number of exhibitors who have ever signed up to exhibit motorcycle, bicycle and accessory products at a New York two-wheeler display.

To the original list of folks who have taken space for the Garden exhibit, Show Manager Coffman announced that he has added a few newcomers. The new ones are:

Badger Brass & Mfg. Co., Kenosha, Wis.; Edwards-Crist Mfg. Co., Chicago, Ill.; H. & F. Mesinger Mfg. Co., New York; Perlman Cycle & Auto Supply Co., New York; Cat-Nan Mfg. Co., Chicago; Chainolene Mfg. Co., Chicago; Stoll Mfg. Co., Denver, Colo.; Gendron Wheel Co., Toledo, Ohio.

Coffman Starts Things Humming

Manager Coffman got into town yesterday and immediately things began to hum. The three freight cars loaded with materials and exhibits from the Chicago show were reported at Buffalo today and Coffman has every expectation that they will reach New York by tomorrow night in ample time for his highly efficient corps of show-setters to begin work the minute the Garden keys are turned over to him on Thursday morning.

Plans have been perfected to give the New York show quite a different twist from the Windy City affair and at the same time to provide a feature of interest that is bound to go well both with the cycle enthusiasts as well as with the general public.

These include the staging of an impressive exhibit depicting the development of the bicycle from the old hobby horse days right down to the most modern of present-day bicycle models. And along the same lines in the motorcycle field, Coffman is putting on in co-operation with the motorcycle manufacturers, an exhibit of the original models of all of the various makes of machines.

Such a display will show at a glance, so to speak, the wonderful progress that has been made in motorcycle design in the short span of 15 years and cannot fail to impress the show visitor.

Chicago Decorations Duplicated

The decorative scheme will be identical with that which made the Chicago affair so much more eye-pleasing than any of its predecessors with a few added features which the show committee is holding back to spring only when the doors are swung open on the show on Monday evening next.

While it cannot be expected that following so closely on the Windy City exhibit there will be a vast amount of new things disclosed, the trade will no doubt be greatly interested in the appearance of the Merkel Motor Wheel, while another of the best known of the motorcycle manufacturers has promised a new line of bicycles which it is expected will be disclosed at the Gotham affair.

The last-minute show plans include the staging of a "Military Preparedness" night in co-operation with the New York State military authorities and the U. S. Army officials, arrangements for which are now under way.

Big Publicity Campaign

By way of bringing in the crowds, the show committee has planned a mammoth advertising and publicity campaign involving the use of practically every one of the many metropolitan dailies as well as a number of out-of-town papers, while the elevated railroads, street cars and subway cars will be plastered with show cards calling the attention of the public to the show.

It will be a busy week for the trade folks. There will be a meeting of the Dealers' Betterment Committee of the Motorcycle and Allied Trades Association at the Astor on Tuesday at luncheon. On Wednesday the Bicycle Manufacturers' Association is scheduled to meet also at the Astor.

Thursday promises to be the biggest day of the week. The Board of Directors of the Motorcycle and Allied Trades Association will meet at luncheon at the Prince George on that day, the meeting to be followed at 2 o'clock by a meeting of the entire association.

In the morning the Cycle Parts and Accessories Association will meet at the Hotel Astor at 10 o'clock while the Cycle Jobbers' Association of America will meet at the Garden at 10:30. At noon, both bodies, as well as members of both the Bicycle Manufacturers' Association and the Motorcycle and Allied Trades Association, will adjourn to the Hotel Breslin for a short joint meeting to be followed by a luncheon.

Luncheon and More Meetings

The Parts Makers, as usual, will play the part of host at the luncheon, the arrangements for which are being made by Frank Chase of the entertainment committee. Frank says he has something novel in store for the trade folks, but he refuses to divulge a detail until the luncheon bell rings on Thursday next.

The United Cycle Trade Directorate has called a meeting of all bicycle dealers in attendance at the show for the Concert Hall on Thursday night and an interesting as well as instructive program of events has been arranged for the benefit of the cycle retailers.

And just to round out the week, the Motorcycle Dealers' Co-operative Association, which is the retail trade body of the Metropolitan district, has called a meeting for the Concert Hall on Friday evening at 8 o'clock.

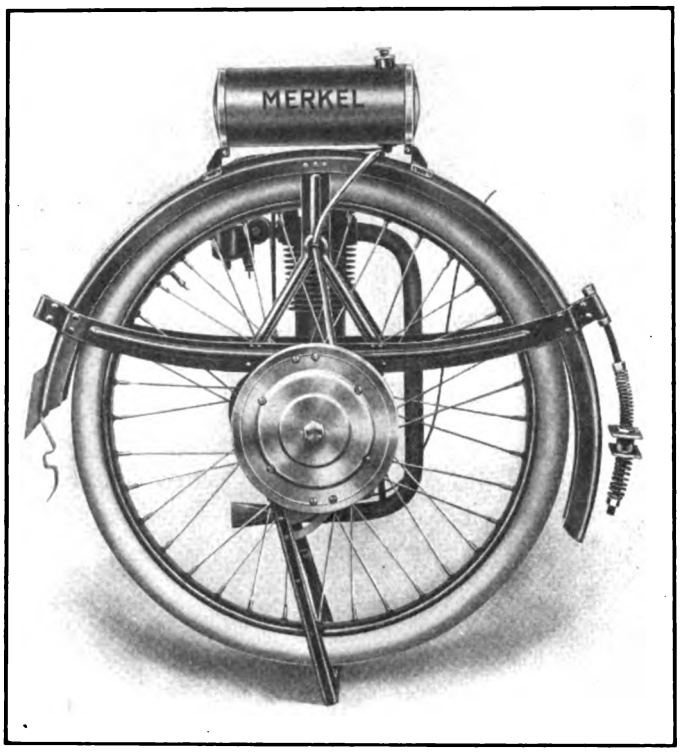
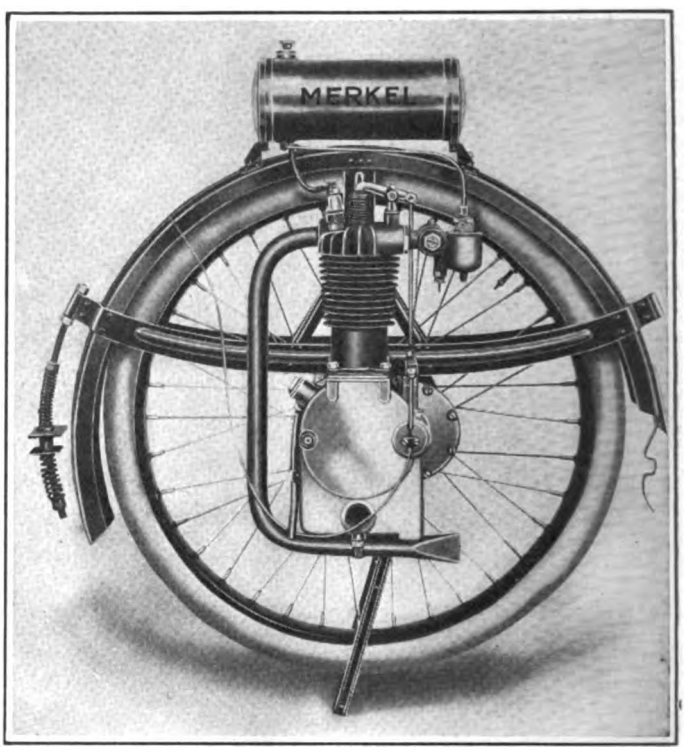
MERKEL UNVEILS HIS MOTOR WHEEL

Simple Little Four-Cycle Bicycle Attachment Fits Any Wheel and Will Sell at $75—Has Built-In Magneto, and Novel Spring Frame Features—Will Be Built and Marketed by $500,000 New York State Corporation





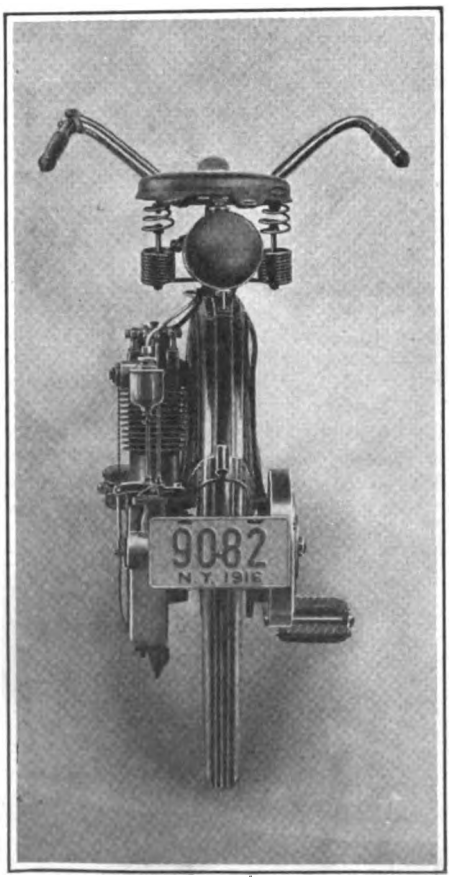
Right and Left Sides of the New Merkel Motor Wheel Which Is Promised for March Delivery and Will Sell for $75. The Illustrations Show Clearly the Disposition of the Various Elements

THAT little cycle problem which has been uppermost in the mind of Joe Merkel for all of two years past, and which just a few months since caused him to cram a whole year's work into the short space of three months, has been solved. And the answer is the Merkel Motor Wheel, a bicycle motor attachment adaptable to any bicycle, of whatever make, and regardless of whether it be a man's, lady's or juvenile model. The Merkel Motor Wheel will sell at $75.

The Company Behind It

As for the mechanical end of it, Merkel brought forth the final answer to that all of six months ago, and as has been exclusively told in former issues of **Motor Cycle Illustrated**, has since the completion of his highly successful models busied himself with the even bigger problem of rearing up an organization adequately fitted out with both capital and business acumen to tackle the job of producing and selling the little outfit. And with the incorporation of the Merkel Motor Wheel Co., Inc., a New York State corporation, with an authorized capitalization of $500,000, and with the control vested in men fully trained in the various branches of the work they are to manage, Merkel is enthusiastic in his belief that that solution also has been achieved.

Joseph F. Merkel himself heads the concern. He has cut too big a figure in the cycle industry to need an introduction at this time. For close on to a score of years he has been intimately connected with the two-wheeler industry, always in



Merkel's Latest Cycle Achievement as Viewed from the Rear

the capacity of mechanical engineer, his greatest triumph being the conception and development of the Flying Merkel motorcycle. As a matter of course, his title of President will be supplemented by the hardly less fitting one, "Chief Engineer" in the new company.

Merkel is highly enthusiastic over his latest invention, so much so in fact, that he dug the writer out after he had been in bed for a week with a game leg and caused him to limp painfully over to 284 Washington Place, Flushing, L. I., to go over the details both of the motor wheel itself and of the company which is to produce and market it.

But it was worth the trip. One glimpse of the little machine as Merkel wheeled it out of the garage, was convincing proof of that. It's just a little 26-inch wheel, incorporating a two-horsepower plant and fitted with substantial rolled mudguard which is designed to fit right into the forks of any bicycle, after the original wheel has been removed.

What Merkel Claims

A glance reveals the fact that the Merkel Motor Wheel has many claims to novelty and originality. In the first place, although it is powered with a motor which Merkel claims will enable it to keep up with fast moving traffic and climb the steepest of grades, none of this weight or vibration falls on the bicycle itself, all being carried by the specially constructed wheel.

Furthermore, it not only fits every wheel, but is very easily attached and converts the

Digitized by Google

bicycle into a spring frame machine. Its thrust is a direct one, there are no belts or belt rims to attach and no extra wheel to be tired. And withall the machine embraces the use of a four-cycle motor involving the best of motorcycle practice, weighs only 57 pounds, and will make about 100 miles to the gallon of gasoline without the slightest difficulty.

Is Typically "Merkelesque"

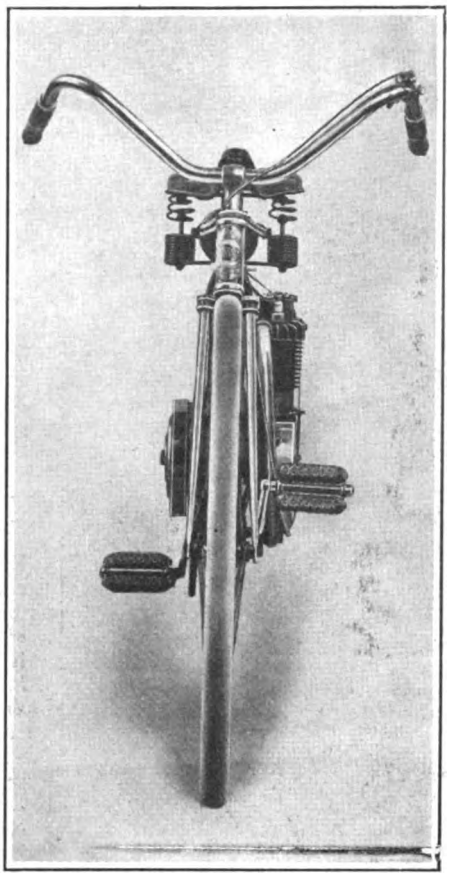
The idea is unique and ingenious in its conception and typically Merkelesque in the way the details have been carried out. The motor, a 2½" bore by 2½" stroke overhead valve, four-cycle type, is positioned on the left side of the wheel in such a manner that it comes outside of the rear fork stay of the bicycle when the wheel is in position. The crankshaft extends straight through the hub of the wheel and mounts on the other extremity, so that it occupies the same relative position on the right side as the motor does on he left, a flywheel incorporating a built-in magneto of the high tension type.

The drive from the crankshaft to the wheel is through the intermediary of spiral cut gears encased on the engine side and formed as a unit with the motor; the gears provide a reduction of 8 to 1 between the crankshaft and the rear wheel.

A boss projecting from the crankcase of the motor and in which the crankshaft finds its bearing, also serves to mount the raceways for the wheel bearings and as an anchor for the stationary plates of the disc type of coaster brake which is built into the device. The mudguard, of pressed steel, is supported on substantial pressed steel arms which serve also as yokes, bridging the wheel and relieving the crankcase boss of all undue strain.

Novel Compensator

Perhaps the most novel feature of the Merkel Motor Wheel is the compensating device. It will be seen by a glance at the illustrations that the crankcase of the motor does not come in the same position as the axle of the original wheel of the bicycle; as a matter of fact, it is placed some 4½ inches behind that point. The bolts which hold the wheel to the rear fork stem ends come down tight on a pair of collars on which the whole power plant



As the Merkel-Equipped Wheel Appears From the Front

is pivoted so that it is free to swing with the fork ends as the center.

This tendency to swing is counteracted by means of a pair of helical springs fixed on a curved guide rod attaching to the front members of the framing in such a position that the springs pass through the rear forks just behind the bottom bracket of the bicycle. A bearing plate clamps to the forks at this point and serves to take the strain. It will be seen that one spring takes the movement in one direction while the other acts just opposite; both springs are adjustable, to provide the best working tension.

This device acts at once as a compensator to soften the drive when the wheel is started or running very slowly, and as a spring frame for the bicycle, for any road shock tends to drive the whole wheel up, turning it around the pivots against the action of the compensator spring.

The motor itself is ingeniously designed so that the cylinder can be readily removed simply by taking out five bolts. This makes for facility in refitting of the connecting rod; the rod can be removed without taking down the crankcase. Both the crankshaft and the camshaft, which serves also as a lay shaft for the power transmission, are carried on annular ball bearings, the only plain bearing being the connecting rod big end. The whole connecting rod is made of bronze for ready replacement in case of wear or breakage.

Some Motor Details

The mixture is supplied by a single jet float feed carburetor of Merkel design which is designed for full adjustment of both gas and air and which is provided with a barrel type of throttle valve. Lubrication is effected by means of a constant level splash system, the oil being pumped from a sump in the lowermost portion of the crankcase to a tray into which the connecting rod big end dips and splashes the oil to the working sufraces and bearings. The oil pump is of the plunger type, cam driven from the lay shaft. An oil sight in the sump is fitted for convenience.

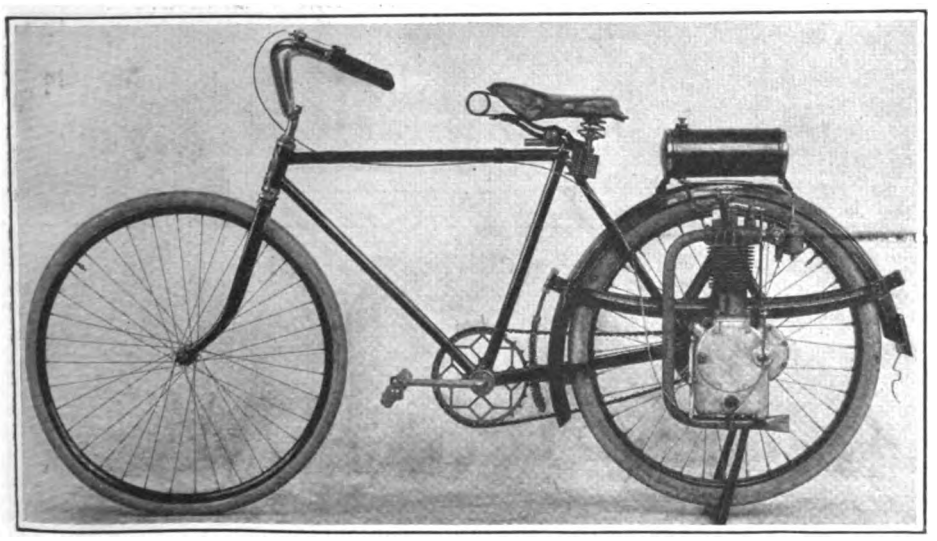
The valves are of nickel steel, $1^1/_{16}$ inches in diameter and with a lift of $^3/_{16}$ of an inch. The spiral cut transmission gears also are made of 3½ per cent. nickel steel, heat treated. A long exhaust pipe reaching down in front of and underneath the motor, and provided with a fish tail end and diagonal saw cuts on the under side, takes the place of a muffler and effectively silences the exhaust. The cylindrical half-gallon gasoline tank is positioned on the top of the mudguard, the filler cap incorporating the shut-off valve.

Single Control Lever

The entire control is vested in a single handle bar lever, which acting through Bowden wire control, serves to operate the compression release and the throttle. The spark is fixed.

The wheel is 26 inches in diameter and fitted with a two-inch standard AA rim drilled for 36 100-110 regulation motorcycle spokes. The device is also fitted with a substantial stand of the quick action motorcycle type which is absolutely independent of the bicycle itself and which is designed to be snapped up and clipped by a spring clip on the end of the mudguard.

The little arrangement looked so alluring that the **Motor Cycle Illustrated** man despite a bad leg and also zero weather, could not resist the temptation to give it a tryout. With the compression released, he machine pedalled along without the slightest difficulty and the motor started readily as soon as the valve was dropped. But what a start! The light little machine fairly jumped ahead, and yet so delicate is the compensating device that there was not the slightest jar even on the first explosion. It certainly was a revelation.



Showing Just How the Little Merkel Device Attaches to the Bicycle

How the Dealer at the Show Can Acquire the Factory Spirit

Excellent Opportunity Is Offered at Show Booths for Agents to Acquaint Themselves Fully With the Manufacturer's Sales Plans and Profit by the Observations of Factory Experts.

ONE of the most important duties of the motorcycle dealer who attends a national show is to acquaint himself fully with the plans of the manufacturer, or manufacturers, he represents for the systematic development of the sales field during the approaching season. The signing of a suitable agency contract is naturally the first matter to be disposed of, and then should come serious consideration of the lines along which the dealer can work most fruitfully to make that contract a paying one. In this he needs the close co-operation of the factory representatives at the show.

Officials of the various companies, assisted by heads of departments and salesmen, can be easily located for interviews at the show booths, whereas it would be difficult, if not impossible, because of geographical conditions, for the average dealer to get in personal contact with the factory men at any other time. And it is only from the factory representatives that the spirit, as well as the text, of the company's plans can be acquired.

The Heart-to-Heart Conference

It may be argued that every dealer who visits the show is certain to come in contact with the staff men representing the motorcycle he is selling, which is true; but the fact remains that few dealers avail themselves of the opportunity to discuss sales on a concrete basis at these meetings. They are accustomed to make a brief report on the business transacted in the season just closed, and perhaps forecast roughly the sales possibilities for the next year, but rarely do they go about the important matter of learning what the factory experts have in mind along lines of broad-gauge business development for the ensuing twelve months.

Only one dealer in a hundred—perhaps only one in five hundred—has the time, the money or the inclination to make a critical study of the general sales situation with a view of applying the information gained to his own interests, and it is only fair to say that he should not be expected to go far in that direction. There are keen-witted and experienced men at the factories probing for facts, and then putting them to work as business-boosters the year round, and it is only necessary for the dealer to use the detailed information thus acquired in the manner best calculated to improve his local conditions. It goes without saying that the company he represents will be exceedingly pleased to have any dealer profit by the findings of the factory experts.

Acquiring the Factory Spirit

But the dealer must know of the conclusions at which the factory men have arrived, and must acquire something of the spirit behind the factory plans before he can properly participate in the upbuilding campaign which his company is launching for the advancement of its agents in general. He must, in short, place himself in sympathy with the company whose product he handles, and he can do that effectively only through a personal interview.

Letters are cold and unsatisfactory media through which to work up a feeling of genuine helpfulness and co-operation between factory and dealer. It is the hand-to-hand, man-to-man contact that results from a visit to the factory, or a hard-fact conference at the show, that delivers the goods.

Some Pertinent Questions

Has the dealer found it difficult to work up and apply a mailing list system? Has he been somewhat at sea as to how to solve the used machine problem? Has he been troubled over the matter of doing justice to his opportunities on limited capital? Is he hampered by the display and repair shop problems incidental to a small establishment? Are there commercial prospects in his city that he cannot convince for some obscure reason? Is he puzzled over the advisability of carrying side lines during the winter months? Are there large factories in his district whose employees have so far failed to be impressed by the possibilities of the motorcycle? Is he losing money through faulty methods of handling his repair and parts business? In brief, is he worried or hampered by any angle of his business? If he is, he needs the encouragement and constructive advice of the men from the factory, and the annual show is a good place to find them.

Broad-Gauge Plans Afoot

There are greater and more promising plans afoot at this moment for the advancement of the motorcycle dealer than have ever been possible in the past, and the distributor or retailer who makes a point of profiting by every co-operative suggestion of his factory during 1917 is going to be pleasantly surprised by the progress he has made a year from now.

Even the seemingly unimportant aspects of the dealer's business are being studied with unprecedented thoroughness by the factory experts, and once definite conclusions are arrived at *they are acted upon.* That's the big point. The research work does not begin and end in mere words. It brings action—broad-gauge action with a recognizable punch in it. That is the outstanding feature of the 1917 policy of the big factories as applied to the dealer.

Under the circumstances, it would be a matter for deep regret if any dealer failed to benefit by the campaigns which are being so painstakingly worked out by the factories. In the first place, the manufacturer deserves the best possible co-operation of his dealers; and secondly, the dealers owe it to themselves to get in touch with what is being done in their interest.

What the Show Exhibitor Can Do to Increase Its Effectiveness

Spectacular and Interesting Displays Add to Attractiveness—Capable Booth Attendants, and Supply of Catalogs or Other Literature Are Real Necessities Which Should Be Provided.

ARE the shows profitable for the manufacturer? Do the bicycle manufacturer and the accessory producer obtain as good results as the manufacturer of motorcycles?

That's what a good many trade folk are asking—especially those tradesmen or firms who have hesitated on the matter of exhibiting.

But why the question? Just compare the show lists of this year with those of last. Bigger? Well, and then some! That's the answer. Of course the manufacturer reaps a great deal of benefit from the shows; and the smaller manufacturer reaps a bigger benefit proportionately than the motorcycle maker or the bicycle manufacturer.

Likewise with the jobber; it pays him a handsome profit to stage an exhibit at a show which draws dealers and distributors from all over the country.

The Biggest Profiter

But in this connection, there is one point which should be emphasized. The exhibitor who derives the greatest benefit from the show is the exhibitor who puts the greatest energy into it.

The exhibitor, for instance, who simply fills a booth with a lot of ill sorted materials and leaves it in charge of someone who knows nothing at all or very little about the products and prices and general trade conditions is the one who is most apt to decry the show as a business venture.

To derive the greatest benefit from the show, and to impress the show visitors, whether they be trade folk or laymen or simply "kids," firmly with the trade name, products and quality of his line, the exhibitor must needs put on an orderly and neat exhibit.

And those exhibitors who go in for the more elaborate and eye-pleasing exhibits are firm in their belief that the attractiveness of the setting is well worth both the time and the money spent in developing the ideas in the added interest which the exhibit attracts.

Proof of the Pudding

That this is so can be gathered from the present shows. Whereas in past years most of the exhibitors confined their efforts simply to a display of their wares, so to speak, only one or two going in for the "pretty stuff" to any great extent, they have gone to the opposite extreme this year.

Practically every one of the motorcycle exhibitors has gone great lengths to set off his or its exhibit in a manner that will appeal to the show visitor and impress him with the substantialness of the cycle industry.

And in this matter the motorcycle makers are not alone, for the bicycle makers in more than one instance and numbers of the parts and accessory folk are following suit.

But even more necessary than that, in point of real benefit accruing to the exhibitor, is the call for a really well posted man as booth attendant. The average show visitor, when all is said and done, is not simply an uninterested spectator. He is drawn to the show because something there interests him and what he wants more than anything else is information.

Where You Miss a Bet

And you, Mr. Exhibitor, take space for the sole purpose of handing out this information. If you do not station a well-informed booth attendant at your booth to pass out every bit of information that is desired about your product or products, some of the money you are paying to stage the display is going to waste.

Quite in the same category as the exhibitor who mans his stand with inefficient help is the one who neglects to provide catalogs or other literature bearing on his products. It's a fact that we are wont to regard the catalog gatherer as a sort of a pest, but the fact remains that in most instances those folks who take the time and trouble to gather a collection of catalogs are vitally interested in their contents and are not simply moved by mere idle curiosity.

The exhibitor who fails to provide some sort of literature is overlooking a matter which is quite as important as providing a well informed booth attendant.

In Lieu of Catalogs

Of course, it is not always possible to arrange to have catalogs ready for show distribution. It is, however, quite possible to have leaflets printed at very short notice; just enough to give the necessary information at least about the new features of the line or any changes that have been made since the last catalog.

The least that can be done in this connection is to have on hand an address book and jot down the name and address of any folks sufficiently interested in the line to inquire for literature.

If the show exhibitors all would bend their efforts to do these simple things, how much more attractive to the outsider and to the insider, too, the annual affairs would be!

A Trade Stimulant

It's just one means of stimulating cycle enthusiasm, but an important one, and the manufacturers and jobbers who will go to it and make their exhibits not only as comprehensive, but also as interesting and as eye-pleasing as possible, and will be prepared to give out full information to every folk who inquires, and literature covering at least the "newness" of the lines, the shows to come will be found even more profitable investments than those of yesteryear.

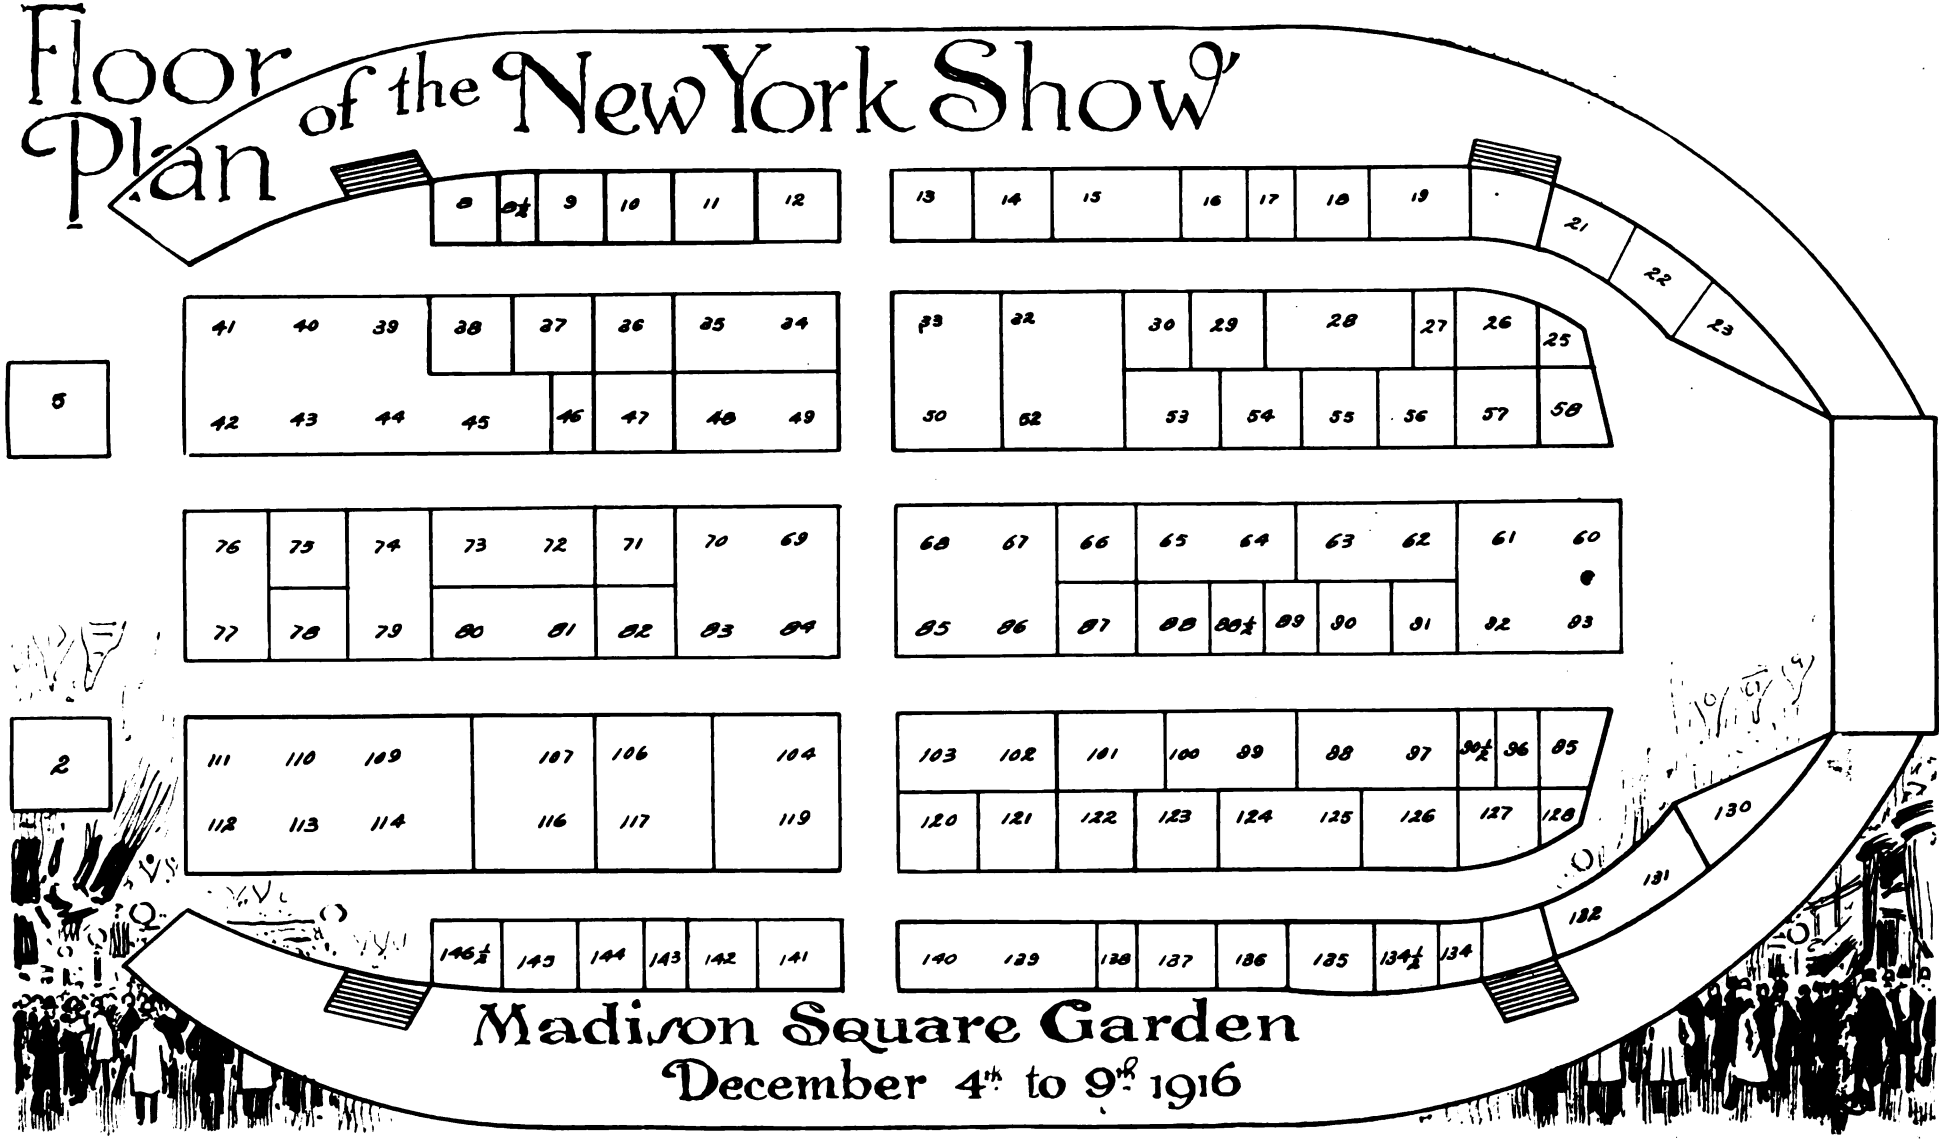
Floor Plan of the New York Show



ONCE more the historic Madison Square Garden is ready for the bustling inrush of decorators, carpenters and electricians and the staging of a National Motorcycle, Bicycle and Accessory Show. This announcement may be tinged somewhat with sentimental interest because of the announcement that at last plans have been definitely laid to tear down the old landmark in the near future. In other words, this year's show will probably be the last to draw trade men and riders to the Garden. Next year's exhibition will in all probability be held elsewhere, perhaps in Grand Central Palace.

The floor plan of the coming Show, as diagrammed above, gives an excellent idea of the adaptability of the Garden to exhibition purposes. The main entrance is at the right of the drawing, and the various exhibits have been so distributed that in order to see all the motorcycle and bicycle stands the visitor must pass through the entire accessory section. There is no distinct motorcycle department. The motor displays are scattered along the broad aisles at intervals, with bicycle and accessory exhibits attractively filling out the lines. The broad curving open spaces on either side of the plan above indicate the galleries.

The drawing gives the final layout of the stands and shows that no floor space has been allowed to go to waste. **The full lineup of exhibitors, with stand numbers, appears on the two preceding pages and in order to locate any exhibitor in the Show it is only necessary to compare the list with the above diagram.**

NOW that the 1917 motorcycles have been announced and have appeared, it will be interesting to consider the tendencies which have led to the practical development of the present diversified types of motorcycles. By taking a general average of the characteristic features of the more prominent makes of motorcycles, we shall be able to give an intelligent answer to the question, "What are the characteristics of a 1917 model?"

That a motorcycle engine costs less per horse power than the average automobile engine, may not be known. This is in spite of the manifestly better workmanship and materials used in the motorcycle engine. The saving is due to the simplicity of the air cooled motorcycle engine and the elimination of non-essentials.

The average motorcycle costs $4.50 per cubic inch displacement or about $36 per horse power, if we assume that 8 cubic inches will give approximately one horsepower. But the average automobile costs $8.33 per cubic inch, or $66 per horsepower; so that the motorcycle scores not only in lower running costs, but in lower first costs as well.

The diversification of the motorcycle has made it necessary to divide motorcycles into three general classes. The standard motorcycles are those of over four horsepower. The lightweights are those of less than four horse-power. The featherweights include the Smith Motorwheel, the Dayton Motor Bicycle, the Cyclemotor, and the Okay bicycle attachment. The featherweights differ so greatly that they cannot well be averaged, and the same is true to a less degree of lightweights.

While electric lighting equipment is furnished in many cases at an increase in cost of about $35 or $40, this can hardly be considered as an integral part of the motorcycle, and so has not been counted in summing up the average cost.

While horse-power ratings may seem slightly smaller this year, this is due to the fact that manufacturers' ratings have not been taken, but rather the horse-power figured on a basis of one horse-power for every eight cubic inches of piston displacement. Thus a 61 cubic inch twin would be rated as 7.5 horse-power. On this basis, the average 1917 motorcycle is conservatively rated at 7 horse-power, and can actually deliver much more power than this, especially at high motor speeds.

As the utility type, the single cylinder motorcycle still seems to be holding its own, with an average of 28 per cent. of all the models listed, while if lightweights were included, this percentage would be even larger. Twin cylinders are, of course, the predominating type, with an average of

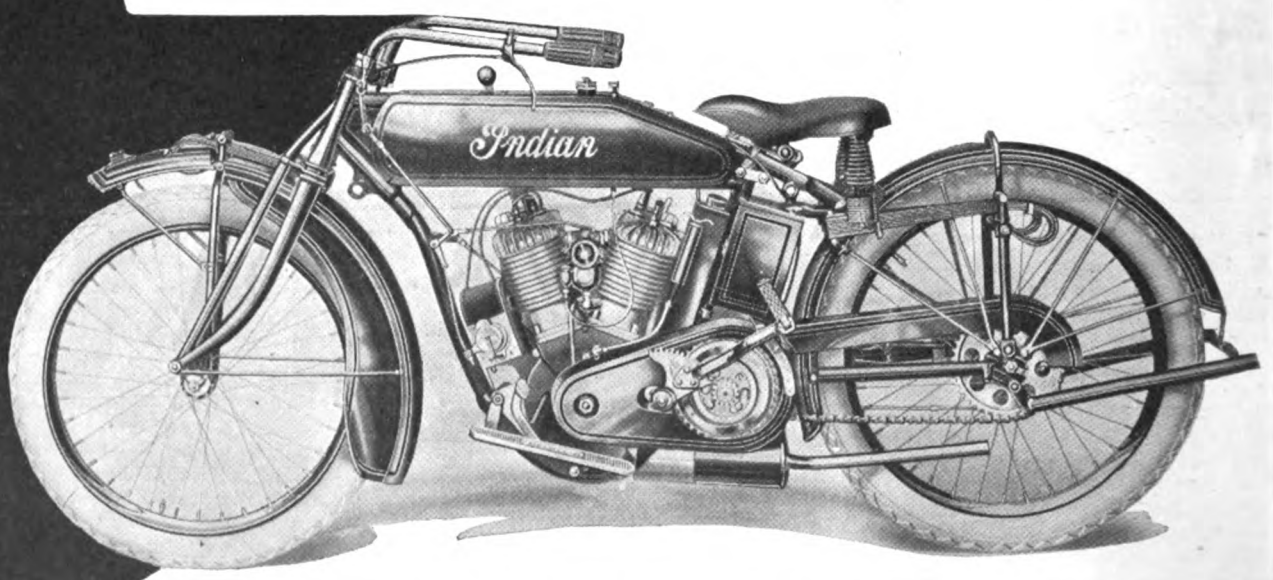
Indian

At The Madison Square Garden Show

—just as we were at Chicago—we expect to be crowded to the very limit of our big exhibit space with enthusiastic riders and dealers anxious to get their first peep at the 1917 line of Indian achievements—Big Twin, Light Twin and Bicycles.



For assurance of prompt attention to your wants mention MOTOR CYCLE ILLUSTRATED.

Digitized by Google

17 Motocycles

We'll be right there in the limelight of popularity talking profits and closing territory with every up-and-doing dealer who has his ear to the ground and can hear the onrush of multitudes of Indian sales, and who want to share with us the biggest of all the Indian years.

That 1917 Big Twin with refined Powerplus Motor, Triple Stem Fork, 3½ gallon Gasoline Tank, Webbed Head, and other improvements and refinements, just naturally spellbinds every man who takes a close-up at it.

And the Light Twin with New Indian Four Cycle Opposed Motor calls for an inspection that winds up in big enthusiasm and orders.

Then there's the line of 1917 Indian Bicycles—headed by the natty Electrically Equipped model. To overlook them is to miss an education in what's what in the 1917 bicycle world.

They'll all be in abundance at the New York show. And there also will be at the Indian Exhibit men who can talk turkey as only men who represent the best of everything can talk.

If you're a motorcyclist—or intend to be one—walk up and pick out the model you want, knowing you can't go wrong on an Indian buy.

All we want is an opportunity of explaining to dealers and riders just what the 1917 Indian line is and what it stands for.

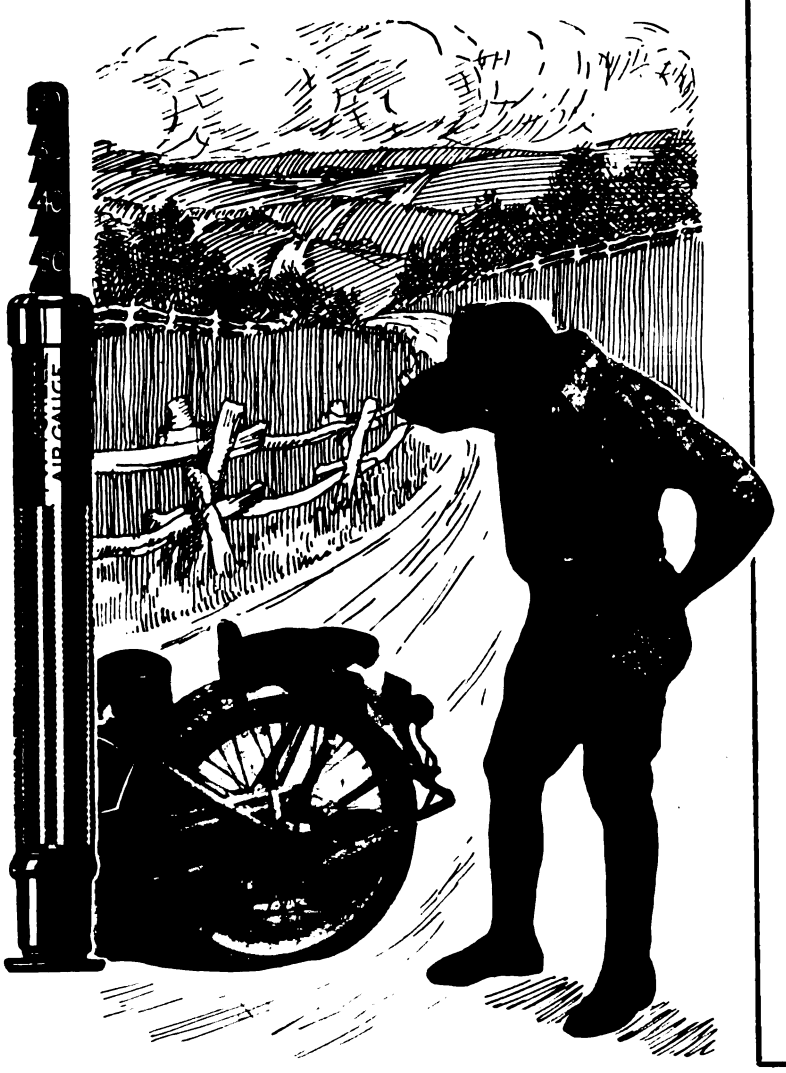
Blowout!

Why Didn't I Use A

TWITCHELL

AIR GAUGE



A Merry Christmas and No More Tire Trouble

By giving your motoring friend a Twitchell Air Gauge for Christmas you will be giving him something that will please him not only at the time of receiving it but for many months thereafter, since every time he uses the Gauge he will be saving himself money.

It's all in this proposition:

Tires that are tested as to their inflation last twice as long as tires which are run with haphazard pressure.

Measure your air pressure with a Twitchell Air Gauge and save your tires.

Stolen Machine Bureau Is Launched to Aid in Campaign Against Cycle Thieves

IN view of the steadily increasing menace of motorcycle thieves throughout the country, and owing to the fact that manufacturers, dealers and riders are of one mind as regards the necessity of a widespread and definite movement to combat the evil, **Motor Cycle Illustrated** has launched a Stolen Machine Bureau. The purpose of this Bureau is to give prompt co-operation in identifying a stolen machine as soon as it comes under suspicion, and to give equally prompt assistance towards putting the owner in touch with his mount.

The Owner's Part in the System

Every rider who suffers the loss of his motorcycle by theft is hereby invited and urged to send to the Stolen Machine Bureau of **Motor Cycle Illustrated** the following data: Motor number, machine number, single or twin, type, three-speed or otherwise, full list of equipment, including make of sidecar or tandem, if one was fitted, and make of tires. In addition, he should give any special distinguishing marks to be found on the machine or its equipment. This latter provision is highly important. Articles of equipment may be quickly changed, but a small distinguishing mark on the machine is likely to be overlooked by the thief.

How the Bureau Operates

As soon as this data is received at the office of **Motor Cycle Illustrated** it will be placed in a special card file, so arranged as to permit of speedy reference work. This hooks up the machine owner with the Bureau in a simple and practical way. Now for the finder of the machine.

Dealers, garagemen and police departments throughout the country will be fully acquainted with the purposes of the Stolen Machine Bureau, and its method of operation, and will be requested to forward data as outlined above to the Bureau as soon as they come into possession of a motorcycle under conditions which arouse suspicion. When such a report is received at this office it will be compared immediately with the file list of stolen machines, and the mount can thus be identified. The next steps of the Bureau will be to communicate with the finder of the machine, and then to notify the owner.

A Bertillon Department for Motorcycles

It often happens that a dealer, or an officer of the law, has his attention called to a motorcycle under circumstances which lead him to believe that the mount has been stolen, but being unable to confirm his suspicions without considerable trouble, delay and uncertainty, he allows the machine to slip away from him. With the Stolen Machine Bureau of **Motor Cycle Illustrated** in operation this situation will be remedied. It will be very easy for a dealer, or any one else to "start something" as soon as he believes that he has located a stolen machine.

The fact that the F. A. M. offers a reward of $25 for the recovery of every motorcycle stolen from a member will doubtless have a stimulating effect upon those who believe they have located a purloined mount.

The Bureau Is Ready; Do Your Part Promptly

The Stolen Machine Bureau is now ready for business and riders who have had motorcycles taken should file the required data with this office at once. Lists of stolen machines will be received from all the factories, and will be duly filed, but the motorcyclist who has lost his mount through theft need not wait for the factory to send out a list. It is to the rider's interest to get a full report on his machine on file with the Stolen Machine Bureau at the earliest possible moment.

The first duty of a rider who has his motorcycle stolen is to notify his local police department; his next move should be to send the necessary details to the Stolen Machine Bureau of **Motor Cycle Illustrated.**

The first duty of the person who feels that he has located a stolen machine is to record carefully the data as outlined above and then to forward a full report to the Stolen Machine Bureau. If the motorcycle has been stolen—and its owner has availed himself of the opportunity to file a report on it with the Bureau—it will be a simple matter to get quick action.

You Can Help by Passing the Word Along

Dealers, garagemen and riders throughout the country will have the aims and method of the Bureau explained to them through the columns of **Motor Cycle Illustrated,** while police departments in all the larger cities will be fully acquainted with the proposition in a series of special circular letters.

The scope of the Bureau will be constantly broadened along these lines and those who are interested in the motorcycle field in any way, can aid in the work by passing along to their friends information concerning the Bureau and the steps to be taken in co-operating with it.

DEALERS' MEETING

Metropolitan Dealers' Association Has Called One for Show Week

NEW YORK, Nov. 28.—The Motorcycle Dealers' Cooperative Association has called a big booster meeting to take place in the Concert Hall of the Garden on Friday night during Show week at 8 o'clock. A full attendance of Metropolitan dealers is expected.

The association, which includes motorcycle dealers from the Metropolitan district and nearby towns and cities, extends an invitation for dealers within ready riding distance of Gotham to join the ranks and aid in the effort that is being made to improve general trade conditions in this section of the country.

The association has some real interesting and helpful plans in prospect, and these will be presented at the Garden meeting at which officers for the coming year will be elected and other important business transacted.

WAUGHOP'S PLAN

Eastern Cleveland Man Arranging to Have Cleveland Dealers Ride to Show

NEW YORK, Nov. 28.—C. W. Waughop of the Cleveland is making arrangements for a demonstration that cannot fail of bringing the attention of the general public to center on the Motorcycle, Bicycle and Accessory Show at the Garden next week.

Waughop's plan is to have all of the Cleveland motorcycle dealers within gunshot of New York ride to the show on their demonstrators and park the little machines in front of Madison Square Garden.

Waughop has lined up over 100 dealers already and is now busy making arrangements to have the machines parked without interfering with traffic or exposing them to the danger of being stolen or tampered with.

FARR JOINS HESS STEEL CORP.

HARTFORD, Conn.—Arthur V. Farr, who for the last three years has been advertising manager of the S. K. F. Ball Bearing Company of Hartford, has accepted the position of sales manager of the Hess Steel Corporation of Baltimore, Md.

PARAMOUNT LIGHTWEIGHT DUE

Motor Bicycle to Sell at Moderate Price Coming with Line of Parts and Bicycles from New Ohio Concern

COLUMBUS, Ohio, Nov. 28.—There's a new lightweight motorcycle coming from Columbus. It is to be known as the Paramount and is to be the chief product of the Paramount Motor Co., 40 Yale avenue, of which Geo. V. Rottweiler is the general manager.

While no specific details as to the make-up of the new machine are forthcoming at this time, Rottweiler vouchsafes the fact that it will be a popular priced model of the motor bicycle type, and that it will be built from the bottom up in the plant which the Paramount folk are now equipping with the newest and most modern machinery.

On Orthodox Lines

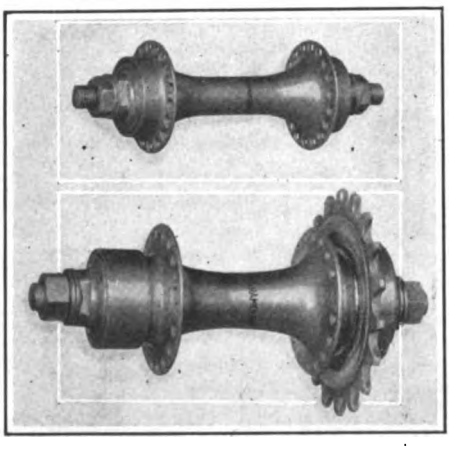
While not specific on that point, from some things the moving spirit in the new enterprise had to say, it is indicated that the Paramount machine will be powered with a two-cycle motor, but it is made emphatic that it will be built absolutely along orthodox lines and will be far removed from anything that can be construed as freakish.

The test machines, which are described as of a type which is bound to strike a responsive note with the general public as well as with the motorcycle fraternity, are now being put through a series of exhaustive tests in and around Columbus for a final determination of the correctness of the design and the choice of materials used in the parts that enter into the construction of the machine. When the machines have proven their ability to stand up under this hard treatment, and the manufacturing plans have been completed, the announcement will be made.

Parts and Bicycles

The plans of the Paramount Motor Co., however, do not stop with the production of the lightweight motor bicycle. As a matter of fact, the plant equipment plans have progressed to a stage where the company is now in a position to offer for delivery after February 1 next a line of both front and rear bicycle hubs that are described as the very acme in hub design and workmanship.

Other bicycle parts are also to be made at the Paramount plant, and a little later on the company will offer a complete line of bicycles. For the purpose the factory, which provides 36,000 square feet of floor space in a three-story building measuring 60 by 300 feet, is being equipped with automatics, presses and quantity and quality producing tools of every description and even includes a large nickel plating department and special japanning and enameling ovens.



Paramount Front and Rear Hubs

BOORD ON TRIP TO WIGWAM

OMAHA.—Sam Boord, of the Omaha Bicycle Company, Indian agent, will shortly arrive home from a visit to the Hendee Manufacturing Company, at Springfield, Mass.

MERKEL UNVEILS HIS MOTOR WHEEL PLANS

(Continued from page 29)

Merkel, in his talk, had claimed a speed of 35 miles an hour for the machine, but the speedometer with which this test model was fitted proved that his claims were modest. The writer had it going 42 before he had gone more than half a block, and its real possibilities for speed were not even tested. It went fast enough, however, to prove that Merkel's contention that it was capable of keeping well up with the traffic was no merry jest.

It speaks well both for the design of the attachment itself and for the oft flouted quality of American bicycle construction when it is pointed out that the bicycle to which it was fitted is one that Merkel bought retail for $13. It has stood the test of weeks at speeds for which it never was intended without giving the slightest evidence of weakness; which, Merkel takes it, is first hand evidence of the correctness of his principle by which the frame of the bicycle is relieved of all the weight and vibration of the power plant.

Production Plans

It is not the intention of the directors, according to Merkel, to use any part of its capital in fitting up a manufacturing plant at this time when both machinery and materials are so costly. On the other hand, the units entering into the makeup of the motor wheel will be contracted for with various manufacturing specialists, final assembly and testing only to be undertaken by the Merkel company in a moderate plant, several of which are under consideration.

On this basis the Merkel company is going ahead and letting contracts with the expectation of having the first machines come through the assembling plant for delivery the latter part of March.

As for the method of distribution, it is planned to deal directly with the dealer in such localities where that plan is deemed practicable or advisable, and to handle the device through large distributors in remote districts.

1917 MESINGER FOR INDIAN

Modified Form of Clamp on Air-Cushion Model Enables Rider to Choose Desired Position on New Powerplus Machines

NEW YORK, N. Y., Nov. 27.—In line with its policy of manufacturing saddles to suit any motorcycle, the H. & F. Mesinger Manufacturing Company, of Austin Place and 144th street, this city, has developed the clamps on its Air-Cushion model specially adapted to the Indian during the past season to fit the 1917 Powerplus machines. Not only will the saddle fit the new Indian models, but it will also fit previous Powerplus machines with a slight alteration in the position of the end portions of the clamps.

In the new saddle for the Indian, the rear clamp construction remains practically the same as before, the longer part attaching by a joint to the bridge between the spring cylinder at the rear, while the clamping portion fits around the seat post lug as in former models. The usual serrated angular adjustment is of course retained.

The front clamp, which hinges to the seat frame near the nose, is turned to point rearward in the new design. The clamping portion embraces the top tube just in front of the seat post lug in the space formed by that lug and the rear end of the fuel tank. This clamping portion is made in two pieces and is held in position by a screw and nut, the latter being lock-washered to do away with loosening. The links connecting this portion with the saddle frame, permit of the saddle being shifted to suit the desire of the rider.

When fitted in place, the nose of the saddle rests lightly on the tank when the saddle is empty. With a rider in position, the nose rises slightly, but under no circumstances will the saddle touch the frame and rub the enamel. There is ample clearance between the saddle and the motorcycle frame no mater what the weight of the rider and bottoming is practically impossible.

The seat of the Mesinger Air-Cushion saddle is of the same high-grade leather as in the 1916 and past seasons. The alteration in the clamps has in no way affected the easy riding qualities for which this saddle is noted. The new saddle will be on exhibition at Madison Square Garden next week in the Mesinger booth.

TRADE EXCURSION

Dallas Dealers To Have Representatives on Tour of Southern Texas

DALLAS, Texas.—Taking advantage of an unusual opportunity for advertising their business, motorcycle, bicycle and accessory dealers of Dallas are planning to send representatives with a party of automobile dealers of Dallas, who will soon make a three-day trade excursion to the cities and towns south of Dallas as far as Waco.

The trip is being arronged under the auspices of the Dallas Automobile Dealers Association.

All towns between Dallas and Waco on two routes, for the party will return by a different route from that which they follow in going, will be visited.

STUBBS VISITS HENDEE PLANT

BIRMINGHAM, Ala.—Robert Stubbs, the Indian dealer, who put Birmingham on the map as a parcel car center, made a side trip from the Chicago Show to the Hendee headquarters in Springfield, Mass. He started his return trip to Birmingham Wednesday, after having spent several days inspecting the production of the 1917 Indian.

PLANS FARM TRACTOR

Carl G. Fisher of Prest-O-Lite Contemplates Entering a New Field

INDIANAPOLIS, Ind.—Carl G. Fisher, president of the Prest-O-Lite Co., is entering on a new venture. Fisher is contemplating the manufacture of a farm tractor and is now engaged in the organization of a company to handle the details of the new product.

HENDERSONS FOR JAPAN

Tokio, Japan, is the latest shipping direction on crated 1917 Hendersons, sold by the Henderson Motorcycle Sales Corporation, of Los Angeles. Several machines were sold and promptly shipped to a Japanese dealer this week.

"MOTOR GAME" GIVES TOURING DATA

Novel Deck of Cards Introduced by W. M. Johnson Incorporates License Laws and Other Points for the Touring Rider

CHICAGO, Ill., Nov. 20.—William M. Johnson, former chairman of the Legal Action Committee of the F. A. M. has just obtained the copyright on "The Motor Game," a device combining a pack of cards with a wealth of valuable information to the touring motorcyclist.

The cards in this pack have the usual suits and pips in the center, while around the sides and ends are printed the following: Name of State, capital, speed limits therein, registration expiration and non-resident exemptions, local traffic rules, etc.

The heart suit, for instance, king to ace, takes in States from Alabama to Indiana; the diamond suit from Iowa to Nebraska; the club suit, Nevada to South Carolina, and the spade suit from South Dakota to Texas. The states are arranged alphabetically. The pack is intended to be used for solitaire, giving the rider double value in impressing legal information on his mind and at the same time enabling him to indulge in his favorite card game.

It will be seen that this game is very useful to any rider who crosses his own State line at any time.

Information on "The Motor Game" can be had from Mr. Johnson, 818 Ashland Block, Chicago, Ill.

Bulletins From California

WEINSTOCK-NICHOLS ACTIVITIES

New California Cleveland Distributors Have Put in Force a Remarkable Campaign to Make a Big Name for the Lightweight

LOS ANGELES, Nov. 28.—The Weinstock-Nichols Co., new distributors of the Cleveland in California, Arizona and Nevada, have already put the full power of their tremendously active and efficient organization behind a selling campaign that has for its purpose the establishment of the lightweight in the position which the far-seeing men in the trade realize it is bound to achieve.

Weinstock-Nichols Co. is known as the largest and strongest auto supply house on the Coast, and its entry into the lightweight distributing field at this time is an event of the utmost significance. This firm has a remarkable record of success with everything it has undertaken, and its growth has come about through backing energetic sales activity with a service policy that is unsurpassed. Its organization of 150 men includes 48 salesmen, and activity in promoting a strong dealer organization throughout the entire distribution territory allotted to the firm is already in motion.

H. J. Banta, well known in the cycle trade from his previous connections with the Pierce and Iver Johnson, has been made general sales manager for the Cleveland, with headquarters in San Francisco. In southern California the Weinstock-Nichols Co. has induced Paul J. C. Derkum to put his energy into the campaign as Cleveland sales manager, and his duties will include traveling throughout his territory and organizing a dealer staff and maintaining dealer relations of the firm on the basis of the strongest campaign ever witnessed in the motorcycle field.

SECOND CAR FOR PASSMORE

LOS ANGELES.—Passmore & Sayre unloaded a second carload of Harley-Davidsons this week, the contents all being sold in advance. A third load is due Nov. 23, and ten of the machines in this load have been sold already. Half of these sales were made before the demonstrator arrived. Sidecars of 1917 model to the number of four have been disposed of.

SOCIAL RUN TO LOS GATOS

SAN FRANCISCO.—A few members of the San Francisco M. C. enjoyed a social run to Los Gatos Nov. 19, five machines making the trip. The riders found the hills full of fine red Christmas berries, and came home loaded down with them. The next regular run is to Pescadero, and one more run after that will probably end the season. There are still seven members with perfect scores for the club runs.

GET 1917 DEMONSTRATOR

SAN FRANCISCO.—Hopkins & Alzina, distributors for the Reading Standard, have just received their first 1917 machine. A carload shipment is expected within a few days. With a sales campaign well planned out, they are going ahead signing up dealers throughout this section of the State.

GETS SECOND CYGNET

LOS ANGELES.—T. E. Berry, Thor dealer, has his second Cygnet Rear Car on the floor. The first one went to M. Wortendyke, cashier of the National Biscuit Company branch. Berry has been carrying bicycles for a month past and this week a jump in sales cleaned out his stock.

COMMERCIAL SALES

Maggini & Perkins Place Four of 1917 Model-Eleven Solo Machines

SAN FRANCISCO, Cal.—Maggini & Perkins, of 116 Van Ness avenue, this city, have sold and delivered 11 Harley-Davidsons of 1917 model, as well as eight sidecars and delivery vans. Delivery outfits have been recently sold to the following: San Francisco *Bulletin*, Young Sawa Cleaning & Dyeing Works, A. Sorraco & Co., and the Bay State Grill.

The commercial end of Maggini & Perkins' sales is a strong one. There are 30 outfits of 1915 and 1916 models in use daily in this city, all of which have been obtained from this firm. The partners expect to place a considerable number more in the early part of the year.

ENDURANCE RUN

Dudley Perkins, Hippodrome Winner, Boosts for All-California Affair

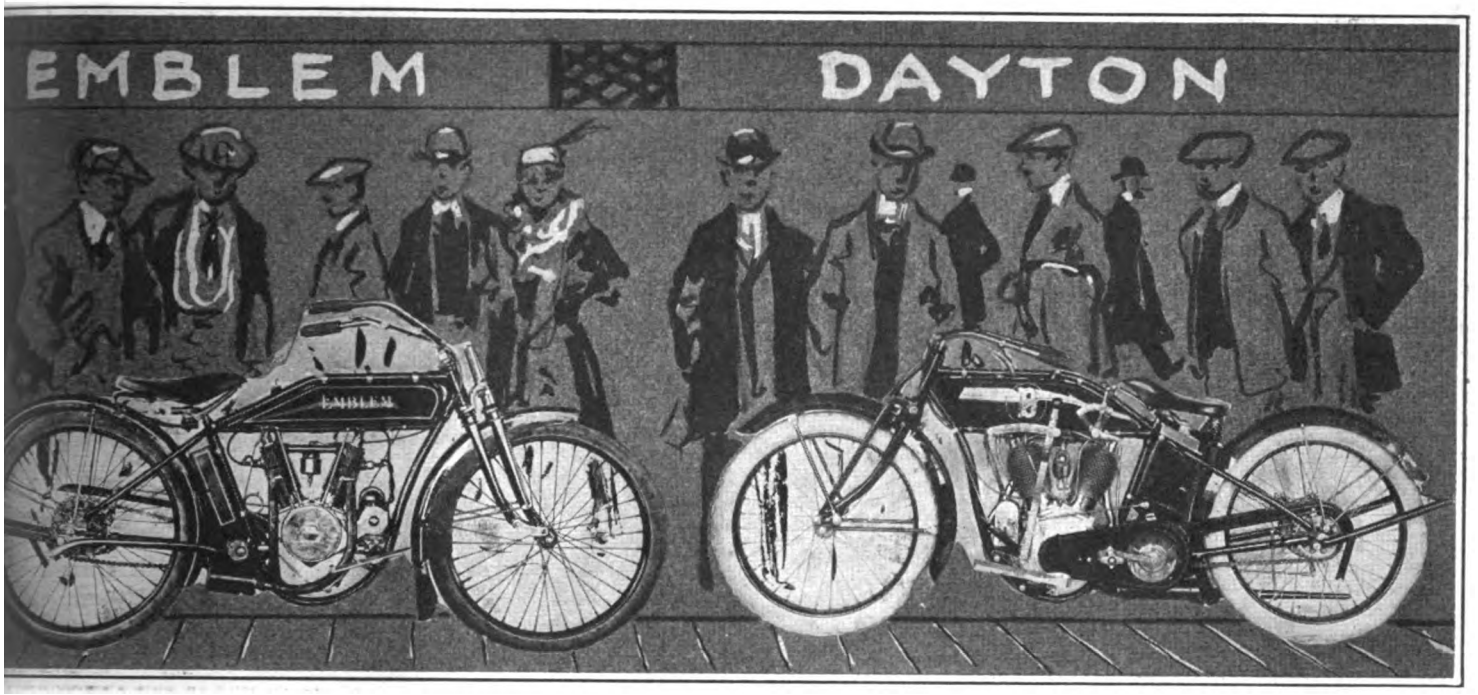
LOS ANGELES, Cal.—Dudley Perkins, the Harley-Davidson rider, who was victor in the recent Hippodrome Hill climb, stayed in this city a few days to talk over a plan made by Northern Californians for a big All-California endurance run. December 9 is the date.

The idea is for San Francisco to send a bunch down one route and back the other for two succeeding days, and for Los Angeles to send a squad up to Frisco on the first day and back on the second. Thus both squads would cover the same route but on different days.

CONDUCTS OPEN AGENCY

VENICE, Cal.—The Venice Bike & Motor Shop, of 1412 Innes Place, this city, is conducting an open agency for motorcycles and bicycles. Proprietor Ellsworth has to depend largely upon repairs during the winter, as the summer population returns to the city when the fall season opens. "One of the best friends of the repairman in the winter," says Ellsworth, "is the sea fog which corrodes metal quickly."

Digitized by Google



CAPISTRANO CLIMB

Another Try at Grade, Yet Unconquered, Slated for First of Year

LOS ANGELES, Cal.—Orange County riders are still taking a whirl at the steep hill south of Capistrano, where the big climb was staged last spring. To date, nobody has reached the summit. Since the advent of the 1917 machines, dealers and riders have been fired with the desire to make a complete climb of the grade and so a big meet there will be held around the first of the year.

An earlier date was first suggested, but as the local trademen are booked up to the limit with orders for the next 60 days, they are holding off until the factories catch up with the orders.

PEACH SETS RECORD

Old Line Cyclist Makes San Bernardino-Los Angeles Trip in 9:49

LOS ANGELES, Cal.—J. S. Peach, the veteran bicyclist, who started to "come back" on Bicycle Day and has been coming ever since, has just set a new mark for the 136 mile San Bernardino-Los Angeles round trip. He made the distance on his Miami racer in 9:49:00. Peach is planning a series of rides over various California inter-city routes, to better the times made by him all of fifteen years ago. He held records between this city and San Diego and San Francisco.

Peach used Marathon "White Flyer" tires on his machine for the San Bernardino-Los Angeles trip.

SPEEDSTERS ARRIVE

At Los Angeles After Phoenix Race—Baker Plans New Stunt

LOS ANGELES, Cal.—Motorcycle row gave a lively welcome this week to the boys who set up new marks in the big races of the season. Following the Phoenix race, Don Johns, E. G. Baker, Joe Wolter, Glenn Stokes, Morty Graves, Ray Creviston and Dave Kinney arrived to swell the congregation.

Baker has a stiff leg which will bother him for weeks. Then Baker is going to start something in Southern California, but just what his newest novelty is, he is keeping under cover. Joe Wolter is going back to Chicago in a few days.

A VETERAN SEARCHER

Henry Van Vliet, 72 Years Old, Uses Motorcycle to Scout Lost Man

JOHNSTOWN, N. Y.—One of the interesting sidelights in the sensational search by a hundred men for trace of Carleton Banker, superintendent of the electric division of the F. J. & G. railroad, who was lost in the north woods for four days and nights, is the fact that the oldest man in the party is Henry C. Van Vliet of Byard street, Johnstown, father of Edward Van Vliet, a Bleecker street glove manufacturer.

Mr. Van Vliet is 72 years old and rides a motorcycle just as handily as a 20-year-old youngster. For years he has hunted in the Piseco district and "knows it like a book," as he says.

As soon as Mr. Van Vliet heard of the missing Banker he filled up the tank of his Harley-Davidson and drove through to Piseco, where he joined the party of searchers.

Van Vliet is undoubtedly the oldest man to ride a motorcycle in this section. He is hale and well preserved and keen for the exercise that men a score of years younger tackle with zest.

FOR TEMPORARY USE

Cardboard License Plate Issued by Harley-Davidson to Dealers for Machines of Customers Awaiting Regular Tag

JOINS PACIFIC MOTOR SUPPLY

LOS ANGELES.—Emil Viseipka, formerly with C. L. Smith, has joined the expanding organization of the Pacific Motor Supply Co., Indian distributor, in the clerical department.

UNDERTAKER USES MOTOR WHEEL

PINE BLUFF, Ark.—Ambulance drivers, like doctors, have to be ready for duty at any hour of the day or night. Not only do they have to respond to a call, but they have to respond quickly. Loss of time, delay of any kind, may be serious—it may mean loss of life. An ambulance driver, therefore, has to be Johnny-on-the-spot when he's wanted. G. C. Johnson is a local undertaker's assistant, and it is his duty to answer the ambulance calls. He lives a mile from his work, and the problem of quick and sure transportation when he was telephoned for was a big one. He purchased a Smith Motor Wheel from Fox Brothers Hardware Co. and the modern samaritan goes to the rescue on the dependable bicycle booster.

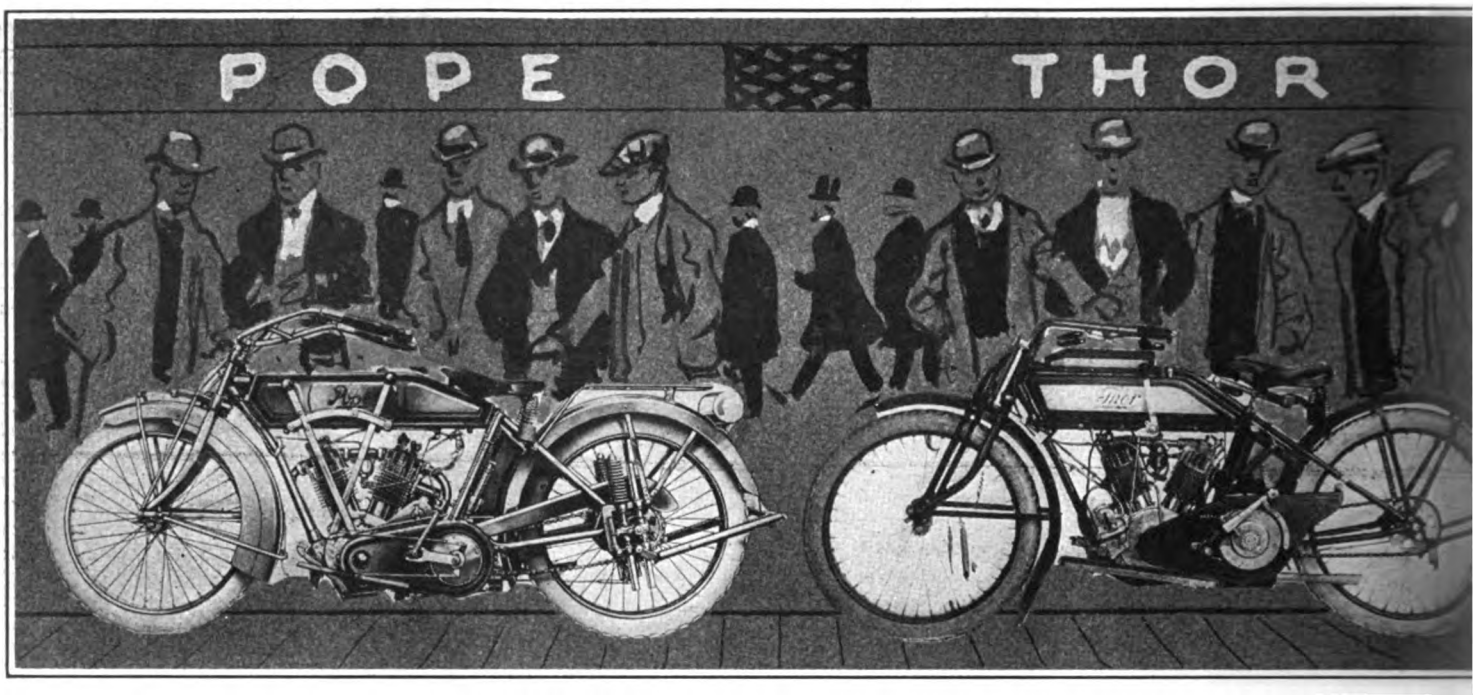
COP GETS PROMOTION

OMAHA—Brilliant work on the part of motorcycle policeman, C. W. Pipkin, has been prompted to the rank of detective. He has developed clues, since his connection with the Omaha force as motorcycle patrolman, which led to the recovery of over 40 stolen motorcycles and has put out of business a gang of thieves, who for two months stole from two to six automobiles daily.

LIMONITES SEEK GOOD ROADS

DENVER, Colo., Nov. 25.—The citizens of Limon, Colo., are working hard to secure a good road between their town and Denver. It is pointed out that it would form a drawing card for tourists travel and it would also aid the farmers in bringing their grain and other products to Denver.

Digitized by Google



WHERE OUR EXPORT POLICY FAILS

Representative of Well-Known Amsterdam House Points Out That Tendency to Change Foreign Agents Frequently Is Damaging to Prestige of American Cycle Industry

NEW YORK, Nov. 28.—H. Vredenburg, representing Klisser & Citroen, of Amsterdam, Holland, prominent distributors and jobbers of motor and cycle products, arrived in New York a few days ago for the purpose of signing up with both motor car and motorcycle manufacturers.

He is stopping at the Hotel Astor, and will remain in this country a month or more.

The chief point brought out with reference to American export business by Mr. Vredenburg during a visit at the office of **Motor Cycle Illustrated** was the necessity for a more dependable policy on the part of manufacturers in dealing with foreign agents. The visitor explained that the most prominent foreign representatives are now reluctant to sign up with an American company because they fear that the agency will be taken away from them at the end of the first season for the benefit of another house that may hold out a promise of better business.

The Foreign Situation

Mr. Vredenburg called attention to the fact that few foreign firms can make a profit on their first year's business with an American product; that money must be spent and much time devoted to introducing the machine, and that in most cases they suffer an actual loss unless they are permitted to carry the line for a second or third season. This tendency to "skip around" among the dealers on short notice lets in many undesirable agents who spoil the field for the reliable houses without really doing justice to the product themselves, according to Mr. Vredenburg.

"In general," says the Dutch enthusiast, "the American manufacturer is not highly esteemed in Holland and other European countries, because he is not inclined to be lenient on credits and other matters, and because he does not seem to realize that it is necessary to build up good will on which to continue future business. At least, that is the way the situation looks to the foreign agent.

"This is a serious situation for the American cycle industry," continued the visitor, "because unless it is changed it will result in almost complete loss of foreign business as soon as the countries at war resume manufacturing operations. Competition is going to be exceedingly keen after the war, and European companies will quickly arrange to do business on a basis that will be more satisfactory than that now adhered to by most American manufacturers. This is a warning given in a friendly spirit, and I trust the cycle manufacturer in the United States will profit by it."

Mr. Vredenburg has represented his company for years past in the Dutch East Indies, but admits that the motorcycle market in those parts is hardly worth bothering with. His chief business there is in motor cars.

MOTORCYCLE EQUIPMENT CO. EXPANDS

Pioneer Parts and Accessories Firm Now in Well-Lighted Structure Four Times Size of Former Building

HAMMONDSPORT, N. Y.—The Motorcycle Equipment Company, manufacturer of Meco supplies and accessories, has moved into its new daylight building and is conducting its steadily increasing business with greater facility than ever before. The new structure, is of reinforced concrete, with saw-tooth roof and measures 119 x 67 feet. It has four times the capacity of the former structure occupied by the firm. The cost of the building was $20,000.

The Motorcycle Equipment Company recently bought out the entire motor parts stock and good will of Stevens & Company, of 375 Broadway, New York. By this purchase, a stock and assortment of parts and accessories without a peer is now in the possession of the progressive cycle firm.

STANDARD PARTS CO.

$35,000,000 Concern From Merger of Standard Welding and Perfection

CLEVELAND, Nov. 28.—The merger of the Standard Welding Company and the Perfection Spring Company, both of Cleveland, which has been hanging fire for all of two months has been finally consummated.

A new company has been formed with an authorized capitalization of $35,000,000 to take over the properties of both concerns and which will be known as the Standard Parts Company. Of the new capitalization $10,000,000 will be 7 per cent cumulative preferred stock and the balance $25,000,000 will be common stock.

Only $8,000,000 of the common stock is to be issued at present while $4,000,000 of the preferred stock will be issued to investors at par. The common stock will not be offered publicly, having been underwritten by a syndicate.

14 INDIANS FOR AVIATION CORPS

Order Has Just Been Placed for New Fleet of Motorcycles to Serve as Auxiliary Arm of Flying Service; To Be Delivered Dec. 7

WASHINGTON, D. C.—As an early step toward enlarging the Aviation Corps, the War Department has placed an order for fourteen Indian motorcycles, to be delivered on December 7. This order was placed direct with the Hendee Manufacturing Company, as the result of competitive bids filed with the Quartermaster Department in New York City by several manufacturers of motorcycles.

The machines are to be used as an auxliiary arm of the aviation corps. Their chiet duties will be rushing supplies from point to point for the aviators, and it is expected they will also prove valuable for the purpose of rushing mechanics to points where airplanes may have come to grief, or have been forced to descend because of engine trouble.

The fourteen Indians ordered are to be 1917 three-speed, electrically equipped models, with cradle spring frames and Splitdorf Mag-Dynamos. Each machine will also be equipped with a cidecar. Their color will be olive drab, but slightly different in shade from the coloring of other army machines. They will be lettered with the aviation corps' insignia.

The machines will go into service on the Border and will be shipped to the supply officer of the aviation section, signal corps, San Antonio, Tex.

N. J. HILL CLIMB

Pompton Plains' Steepest Grade Chosen for Newark Club's Dec. 3 Event

NEWARK, N. J., Nov. 27.—The New Jersey M. C. has selected a new hill for the scene of its hill-climb, scheduled to be contested December 3, starting at 1 p. m. This hill, which has been named "Waterloo," is situated on the outskirts of Pompton Plains, N. J., about 20 miles from Newark. The grade is 35%, actual, not conjectural, and is 850 feet in length.

To "Chet" Charles goes the honor of being the first motorcyclist who has poked the front wheel of his mount over the summit; he made the ascent on his Indian in 45 seconds.

Gold, silver and bronze medals will be awarded for the three best climbs in both solo and side-car class.

COAST ENDURANCE

Frisco Club Backed by Dealers Plans Two-Day Affair Dec. 9-10

SAN FRANCISCO.—Dealers of this city and a committee from the San Francisco M. C. met a few nights ago at John Baumgardner's store to thresh out plans for the proposed endurance run between San Francisco and Los Angeles. It was finally decided that the run will be held, rain or shine, on Saturday and Sunday, December 9 and 10. It will be under the auspices of the San Francisco M. C. All the dealers have pledged their enthusiastic support, and it is stated that prizes to the value of about $1,000 have been put up by the dealers and manufacturers.

According to the present plans, the route will be from San Francisco to Gilroy, to Pacheco Pass, to Fresno, to Bakersfield and to Los Angeles. This route affords a first-class road, with the exception of a short stretch in Pacheco Pass and the ridge road into Los Angeles. At these two points there will be serious difficulties in case of rain, but otherwise it is expected that all the contestants will be able to get through.

CROTONA M. C. STAGES SUCCESSFUL BALL

Progressive Bronx Organization Attracts Many Riders and Their Ladies to Annual Social Affair; Attractive Dance Order a Feature

NEW YORK, Nov. 29.—One of the best attended social affairs that has been staged by a motorcycle club in the East was the annual ball of the Crotona M. C., held tonight at the McKinley Square Casino. Motorcyclists and their ladies by the score were on hand from the Metropolitan district, and adjoining states were also represented by delegations. Excellent music, tempting refreshments and perfect management throughout made the program a highly successful one.

The Entertainment Committee which was responsible for the affair was made up as follows: Fred Christmas, chairman; Kenneth Hoffman, Larry Ferri, John Ramsteck, George Gessler, Edward Schrader and Oliver C. Berckhemer. Fred Nissen acted as floor manager, with Joe Barnett and Gene Coughlin as his able assistants.

The present officers of the club follow: John Paff, president; Charles Crownshield, vice-president; John T. Welch, secretary; Edward Schrader, treasurer; Ben Goldstein, road captain; Fred Christman, first lieutenant; John Cobban, Jr., second lieutenant; O. C. Berckhemer and Fred Nissen, directors.

An unusually attractive dance order and program was prepared by the club, with an appropriate Thanksgiving subject in colors on the cover.

OMAHA CLUB HOLDS BANQUET

OMAHA, Neb.—Fifty-four members of the Omaha Motorcycle Club, with their wives and sweethearts, celebrated the opening of the new club rooms with a banquet on November 21. The rabbits and squirrels, which were served as part of the menu, were tributes to the marksmanship of the club hunt held on the preceding Sunday. President Harry Stryker was master of ceremonies. Louis Fletcher, Lee Lytle, Officer Anthony, of the Traffic Squad; M. Carpenter, Charlie Hayes and A. L. Dunn, representing **Motor Cycle Illustrated,** gave short talks.

IMPORTANT INFO. FOR DEALERS

Those in Southwestern and Western Classification Limits Are Advised to See That They Obtain New Shipping Rate on Sidecars

MILWAUKEE, Wis., Nov. 28.—Motorcycle dealers in southern and western classification territories will be interested in learning that the official classification committee has decided that hereafter sidecars will be rated in the "knock down" class and billed at twice the firse class rate in less than carload lots. This decision comes as a result of many months of agitation by E. V. Gumpert, traffic manager of the Harley-Davidson company.

Mr. Gumpert calls the attention of all dealers in the southern and western classification limits to the fact that he has received numerous complaints from motorcycle agents who assert that they are still being charged the old rate of two and one-half times the first class schedule on sidecar shipments. Any such case that is brought to his attention will receive prompt consideration and a rebate for the difference between the old rate and the new one will be secured.

According to E. J. Mueller, assistant sales manager of the Harley-Davidson company, this new "knocked down" classification will mean a material increase in sidecar sales throughout the territory affected, as many motorcycle dealers have hesitated in pushing sidecars, due to the fact that the freight rate has always been excessive. With the more favorable adjustment of rates on sidecars to western and southern dealers will come an increase in popularity for the sidecar there, just as in the East at the present time.

WESTFIELD BANQUET

Members of Live Organization in Massachusetts City Dine at Russell

WESTFIELD, Mass.—Thirty members of the Westfield M. C. had their semi-annual banquet Thursday night Nov. 16, at the Russell Hotel in Russell. On account of the cool weather the boys did not undertake the trip on their machines, but went in a big motor truck. The start was made from the headquarters on Church street at 8 o'clock and it was in the wee small hours before the machine whizzed the club back into town.

The banquet was one of the most enjoyable ever held. Landlord Edward Brennan gave the boys a great "feed" with an abundance of everything. William Yelinek was the toastmaster and he called upon a number of the club members to give expression to their ideas. Activities for 1917 were discussed and it was agreed that Sunday runs would be arranged.

R-S MEETING JANUARY 9

Annual Gathering of Stockholders Is Set Ahead Because of New York Show

READING, Pa., Nov. 28.—Plans were laid by the Reading Standard Company, Inc., as in past years, to hold the annual meeting of stockholders on Tuesday, December 5, but owing to the fact that the New York Show opens on December 4 it will be impossible for several of the largest stockholders to remain in Reading for the session, and it is practically certain that it will be set ahead to Tuesday, January 9. The stockholders will gather at the office of the company, 501 Water street, Reading.

TWO NEW INCORPORATIONS

COSHOCTON, O.—The Midland Tire & Rubber Co., and the Ben-Hur Tire & Rubber Company, both with preliminary capitals of $10,000, have been incorporated for the manufacture of tires and tubes.

In each instance the incorporators are the same; being, W. P. Horton, Jr., J. S. Culp, Thomas Brennan, Herbert P. Laurence and M. B. Glore. It is planned to erect a large factory.

O'BRIEN A COLUMBUS VISITOR

COLUMBUS, Ohio. — J. Howard O'Brien, manager of the Parts Department of the Hendee Manufacturing Co., stopped off in Columbus to visit the Sykes Motor Co., central Ohio distributor for the Indian, on his way back from the Chicago Show.

The Sykes Motor Co. has sold almost a dozen of the 1917 model Indians. The pleasant weather during the greater part of November stimulated the sale of motorcycles and bicycles.

SCHOOL HAS 10 MOTOR WHEELS

MILWAUKEE, Wis.—A letter received at the A. O. Smith factory from "Johnnie" Clark, Dallas, Texas, has this postscript, "I'm the tenth boy in my school to own a motor wheel and the eighth fellow in my class." Eight motor wheels in one class room is going some, and much credit must be given George Boehn, the Smith Motor Wheel dealer, for recognizing the big field for bikes and motor wheels among school boys and girls.

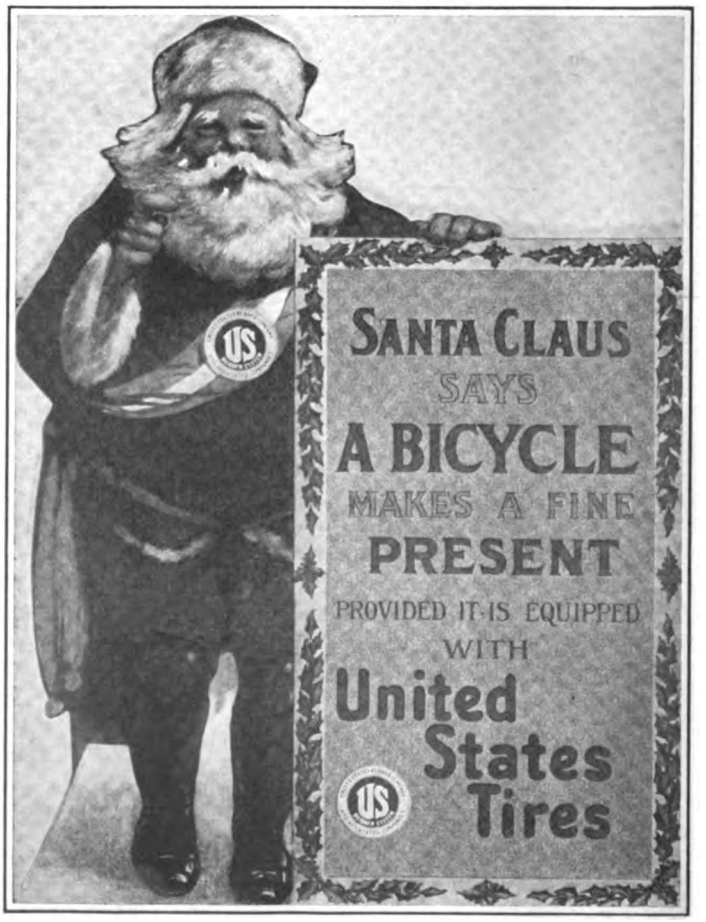
BAILEY TO SEE DEALERS ON SOUTHERN TRIP

Henderson Sales Manager to Make Quick Circuit Through Dixie, Visiting Representatives—Will Attend New York Show

DETROIT, Mich., Nov. 24.—In order to get in personal touch with dealers in several southern cities, who were too busy to get up to Chicago for the Show, Sales Manager P. J. Bailey, of the Henderson Motorcycle Co., will make a quick circuit of the south and east before going to New York for the opening of the Metropolitan Show on December 4.

Mr. Bailey will pass through Cincinnati, and his next stop will be at Chattanooga, where he will spend a day. Birmingham, Ala., is the next stop he has scheduled, and from that point he will turn east to Atlanta. After visiting in Atlanta and talking matters over with the local Henderson representatives, he will circle back north again, stopping next at Washington.

From Washington, D. C., he will jump to Baltimore, and will go thence to New York City. The object of the trip is chiefly one of getting acquainted, Sales Manager Bailey's desire being to meet personally the big Henderson dealers in cities far enough south of the Mason-Dixon line to miss the National Motorcycle Show.



A HOLIDAY CUT-OUT

THE accompanying illustration gives a faint idea of the attractiveness of a new cut-out feature which has been prepared by the United States Tire Company for use by bicycle dealers in connection with Christmas sales campaigns. The cut-out is handsomely printed in four colors.

J. J. Hanse, manager of the Motorcycle and Bicycle Tire Department of the United States Tire Co., states that the cut-outs are being distributed to all bicycle dealers, and that one will be supplied to any dealer who makes application.

SEPTEMBER EXPORTS SHOW DECREASE

Figures Show We Shipped Only 60 Per Cent. of Machines During Last September as Were Exported a Year Ago

NEW YORK.—Another marked falling off in our exports of motorcycles is indicated in the figures bearing with our foreign and domestic commerce for the month of September gotten out by the United States Department of Commerce. Considering values, the figures show that during the month of September we shipped only sixty per cent of the amount of motorcycles as left our shores for foreign ports during September of a year ago.

The total valuation of the shipments of motorcycles for the ninth month of the present year was $212,865 as against $355,- for September of 1915. The figures represent the shipment of 1,683 machines during the previous period as against only 1,184 which were exported during September just passed.

The figures bearing on the nine month period terminating with September, while they show a similar falling off, in point of valuation, show an increase in the number of machines shipped, which indicates, as a matter of course, a marked falling in the average price of the individual machines shipped. During the nine-month period terminating with September a year ago there were shipped 11,859 machines which were valued at $2,261,200. During the corresponding period of the present year the number of machines shipped was 13,512 and the valuation of the shipments, $2,552,074.

There is no apparent let-up in the increase of our exports of bicycles and bicycle parts. During September of a year ago the valuation of such shipments was $79,727, while the value of such exports for September of this year was $94,615. Even greater is the increase exhibited by the figures extending over the nine-month period. For the period terminating with September, 1915, the total valuation of the shipments was $443,209 as against $767,960 for the period ending with September just passed.

Contrasted with our cycle exports, the imports are ridiculously small; they, however, show a marked increase over those for September of a year ago. We imported cycles and parts to the valuation of $5,725 during September this year, while the figures stand at only $2,018 for September of a year ago. For the whole of the nine-month period ending with September of 1915, the valuation of the cycle imports was only $31,131, while for the present year, for a similar period, the valuation was $53,784.

KNEBEL GIVES COUPONS

Pueblo Pope Agent Hands One Out for Each 50 Cent Purchase

DENVFR, Colo., Nov. 25.—As a means of enlivening business at his store, J. M. Knebel, 223 North Main street, Pueblo, Colo., is giving out coupons with each fifty cent purchase, or each fifty cent payment made on accounts. These coupons will entitle the holders to participate in the annual Christmas gift distribution at the Knebel store next month. Knebel is Pueblo agent for the Pope motorcycle, and he also carries a line of bicycles.

This week, as a drawing card, the Knebel store is featuring a special sale of sweaters and mackinaws for bicycle and motorcycle riders. The store will also remain open Saturday evenings until 10 o'clock from now on throughout the winter months.

RUN FEE IS 50 CENTS

Oliver Announces Entry Fee of Four Bits for Social Trip

BRONX, N. Y.—Oliver, the Indian Man, at 993 Washington avenue, who is to hold a social run on December 3, announces that an entry fee of 50 cents is to be charged each person entering the affair, instead of the entries being free as in his original announcement. To date, he has over 60 riders slated to compete in the run.

The start will be made from his store at 8:30 a. m. December 3, and the route will be to Danbury, Conn., via New Rochelle, Stamford and Bridgeport. Return will be made via Brewster, Lake Mahopac, Briarcliff and Yonkers.

NEW BALTIMORE CLUB

BALTIMORE, M. C.—E. A. Davis, 1023 Calhoun street, announces that he is launching a new motorcycle club for Baltimore riders. Those who are interested in affiliating with the new club are invited to communicate with Mr. Davis at the address above given.

MORLER ON LONG TRIP

BOISE, Idaho.—Chris Morler, for years past Indian agent in Boise and vicinity, attended the National Show in Chicago and then proceeded to Springfield, Mass., where he made a trip through the plants of the Hendee Manufacturing Co. Morler is one of the most successful motorcycle and bicycle dealers in this section of the country, and has placed large orders with Ballou & Wright, of Portland, Ore., Indian distributors for the Boise territory, on several occasions machines being ordered in carload lots. Morler has been in the cycle trade for about 12 years.

Our Canadian News Letter

TORONTO'S STRONG SHOW DELEGATION

Ten Dealers From Canadian Metropolis Attended Chicago Exhibition; Impressed by Growth of Interest in Bicycle Among Manufacturers

TORONTO, Ont.—The tightness of the metal market was one of the features which opened the eyes of Canadian visitors at the Chicago Show, according to comments collected from local distributors and dealers. Toronto visitors at the Show were also impressed with the number of motorcycle manufacturers who have now taken up the production of bicycles on a large schedule.

The Toronto Trade Delegation is enthusiastic over the belief that far more accessories will be seen at future shows in Chicago and New York, mainly because of the organization of the Motorcycle and Allied Trades Association. With the accessory manufacturers in the same association with motorcycle producers it is argued that there will be more united action with regard to Show matters in future.

Toronto dealers expressed satisfaction over the Chicago exhibition. They assert, without exception, that the Show was a fitting demonstration of the trade, and that they will continue to support it by their presence hereafter. For its size, Toronto probably had better representation at Chicago than any other city, no less than ten members of the local motorcycle and bicycle trade having been numbered among Show visitors.

Montreal, Winnipeg, Brandon, Sault Ste. Marie and Regina were among the other Canadian centers represented at the Show.

MONTREAL'S FREAK LAW

New Ordinance Proposes Special Tax for Machines Using Tire Chains

MONTREAL, Que.—Among the latest freak laws to be put forward in this part of the world is the proposed local statute which provides for the special taxation of motorcycles, along with automobiles, which are equipped with non-skid tire chains. The Montreal City Council is responsible for this measure and the idea was first suggested by Mayor Mederic Martin, who claims that the city's roadways are being damaged by the chains. This reason is considered a joke as the pavements of Montreal have long been in a wretched state of repair.

The proposed law has been "approved" by the city council.

Quebec City, the capital of this Province, has also asked the Provincial Legislature for power to place a special local tax on the few dozen motorcycles used in that city. The civic money chest is said to be empty and the motorcyclists are to be called upon to help relieve the financial situation.

RACER INVALIDED

Ruelins, Former Motordrome Speeder, Home to Recuperate from Wounds

TORONTO, Ont.—Another bicycle hero to be invalided home because of wounds received on the firing line in France is Private Fred. Ruelins, who served with the 2nd Canadian Pioneer Battalion. Ruelins, who is of Belgian descent, was racing at the Toronto Motordrome when he decided to join the colors.

Notification has been given officially that Corporal Joe McKelvie, a despatch rider attached to the 3rd Canadian Battalion, has been awarded the Military Medal for conspicuous bravery. McKelvie, who is a well-known Toronto motorcyclist, enlisted upon the outbreak of hostilities in August, 1914.

HENDERSON FOR SPEED COP

TORONTO, Ont.—Percy A. McBride has sold a three-speed Henderson, of 1917 pattern, to Constable Ellis, who patrols the western portion of the new Hamilton-Toronto model highway. Both ends of the 40-mile boulevard are now covered by speed-cops on Henderson motorcycles.

WANT LOCAL FEES ALSO

HULL, Que.—Although the Province of Quebec imposes an annual registration fee of $10 on motorcycles owned by residents within the Province, the city of Hull has asked the Quebec Legislature for permission to collect a municipal tax from local motorcyclists. The city would also tax bicyclists.

A CANADIAN SPRING FRAME

TORONTO, Ont.—Saville Whiting has just taken out a Canadian patent for a spring frame for motorcycles, according to the published list of patents issued recently.

The springing arrangement is quite unlike anything that has been seen before and is remarkably ingenious. Whiting has not yet disposed of the patent.

CANADIAN STATION FOR HARLEY-DAVIDSON

Andrews, Ontario Representative, To Direct Service Headquarters in Toronto for Milwaukee Company

TORONTO, Ont.—Upon his return from the convention of Harley-Davidson distributors and dealers at Milwaukee and from the Chicago Show, Walter Andrews told the Canadian representative of **Motor Cycle Illustrated** of the plan arranged by the Harley-Davidson Motor Company for the establishment of a Canadian Service Station at Toronto under his management and control. Andrews will have charge of the Harley-Davidson service branch, but the territory over which he has jurisdiction as distributor will not be affected in any way. This territory consists of the greater portion of the Province of Ontario.

According to the new service plan, Andrews will carry a complete stock of Harley-Davidson parts and all Canadian orders for replacements will be filled at Toronto. Even orders for parts received at the factory in Milwaukee will be referred to Andrews. The Toronto branch will have a list of all Harley-Davidson distributors and dealers in the Dominion and Andrews is to keep in direct touch with them regarding various matters.

Arthur Andrews, a brother of Walter, has gone to Milwaukee to acquaint himself with Harley-Davidson details and a factory representative is to spend one month at Toronto to assist in the establishment of the service station.

The Rider in the Saddle and a Companion Rode Out 53 Miles to Morehouseville, N. Y., and Brought Down the Fine Buck Which Is Seen in the Sidecar

NORTHWEST THOR AGENTS

Traveler Barton Renews Many Contracts in Washington and Oregon

SAN FRANCISCO.—Z. Barton, who returned from the Northwest last week, announces the placing of numerous agency contracts covering practically all of that territory. At Portland the Apex Bicycle Company, which has had the Thor five years, has renewed. At Seattle, J. C. Austin, who was formerly with the Thor agency and who succeeded very well with the line on his own account last year, has signed up for 1917.

At Tacoma, Paulson Bros., who have had the line two years, have signed for a third. At North Yakima, Wash., it has been placed with a new firm, the Walker Motor Company. Henry Bougher has the agency for Granger, Wash., and the Pullman Tire Shop, at Pullman, Wash., has renewed. The Eugene Motorcycle Company of Eugene, Ore., R. W. Brant, proprietor, with a branch at Albany, Ore., has the Thor for those towns, and a new firm, Jackwin & Luckerath, has taken the line at Medford, Ore.

Mr. Barton went as far north as Vancouver and Victoria, B. C., where he talked with all the dealers. While they favor American machines, they state that all the motorcycle riders are now in the war, and look for little business for two years to come. On this side of the line he found things humming everywhere. Seattle and Portland are going ahead in great shape, and eastern Oregon and Washington are exceptionally prosperous.

BURGLARS VISIT BURNETT

PROVIDENCE, R. I., Nov. 24.—Last Wednesday night thieves broke into the store of the Harley-Davidson Sales Co., 82 West Friendship street, and carried off one mackinaw, one chinchilla coat and a gray sweater, in addition to five unimpressive little coppers which had been left in the cash drawer the night before. Manager Burnett, of the agency, has the police on the trail of the stolen goods.

NEW R-S DISTRIBUTORS

Nickerson & Schroeder, Inc., Will Handle the Line for 1917 in Wide Area

NEW YORK, Nov. 28.—The Reading Standard Co., Reading, Pa., announces that it has closed a contract with Nickerson & Schroeder, Inc., a newly-organized firm, as distributors for the R-S motorcycle throughout Greater New York, eastern New York State, Connecticut and the greater part of New Jersey.

The company has opened a large and fully quipped sore at 1078 Bedford avenue, Brooklyn, and has already closed with many agents throughout their territory to handle the R-S. An active canvass is now under way in New Jersey.

Messrs. Nickerson and Schroeder were prominent recently in the motorcycle company organized in connection with the Seventy-First Regiment, N. Y. N. G., Nickerson holding the rank of lieutenant and Schroeder that of captain in the Seventy-First.

MECKLENBURG RACES

Ed. Wilcox and His Indian Take All Firsts at County Fair

CHARLOTTE, N. C., Four motorcycle races were staged on the last day of the Mecklenburg County Fair, Nov. 10, at 15, 10, 5 and 20 miles, and about 25,000 people were on hand.

Ed. Wilcox, of Atlanta, on an Indian, won all the firsts, and Wilson, also on an Indian, took all the seconds with the exception of the 5-mile event in which he was third. Cassell was second in the 5-mile race and third in the 10-mile.

The races were fast considering the cut-up condition of the track. The 15 miles were run in 18:56; the 10-mile race in 12:57; the 5-mile in 5:57 and the 20-mile in 25:12.

22,022 OHIO TAGS SO FAR

COLUMBUS, Ohio.—The Automobile Department of Ohio, which has charge of the issuance of motorcycle tags, had furnished 22,022 tags up to November 23. During the entire year of 1915 the department issued 22,145 registrations, so the number each year holds about the same. Applications for the 1917 registration are coming in rapidly and a large number of tags will be sent out the last week in December.

SPEED-COP APPOINTED

PARKERSBURG, W. Va.—This place has just fallen in line with traffic developments in other cities and towns throughout the State by approving of the appointment of a motorcycle cop. A 1917 Harley-Davidson with three speeds and twin motor has been purchased.

LONN SEAT POST PATENT GRANTED

New Great Western Device Is in One Piece of Cold Rolled Steel, Pressed to Form—Has Unusual Strength

LA PORTE, Ind.—Announcement is made by the Great Western Mfg. Co., that its application for a patent has just been granted on the new Lonn seat-post. The new offering is made up on a one-piece basis and is therefore featured by unusual strength. The manufacturer of bicycle seat-posts in the past has usually involved the use of two or more pieces, some made of tubing and others of tube steel and a forged top, but the Lonn seat-post is made entirely of high-grade cold rolled steel, and is completely turned out by pressed operations.

The new seat-post has lost nothing in attractiveness because of the additional strength and rigidity built into it, and the Great Western Mfg. Co., is confident that it will add materially to the popularity of its already widely sold bicycle lines. The patent which protects Mr. Lonn's invention is numbered 1,204,797.

RAPID-FIRE DELIVERIES

Providence Company Obtains Highly Efficient Service with Sidevan

PROVIDENCE, R. I., Nov. 28.—S. H. Orenstein, proprietor of a Dime Messenger Service in this city, has purchased of William N. Burnett, agent for the Harley-Davidson motorcycle, a 1917 machine with sidevan. This machine will be used for the delivery of small parcels throughout the city and in Pawtucket.

When Mr. Orenstein purchased the van he did it largely as an experiment because of difficulties arising in securing help to deliver bundles by the bicycle method. He has found that he can put out from 80 to 100 bundles a day and cover 75 miles easily. He also finds that the van takes the place of four men.

Mr. Orenstein finds that it is not an expensive vehicle either. He puts away a dollar a day for its upkeep. From this sum he buys gasoline and keeps the balance for such repairs as he may find it necessary to make. He said last week that he was already contemplating the purchase of another motorcycle outfit to help out in the Christmas business.

FIRST SHORT GRASS RIDER

OMAHA.—Dr. Wildman, the F. A. M. State Commissioner, who spoke at the recent banquet of the Omaha M. C., recalled the fact that he was the first motorcyclist to make the run over the Kansas short grass from York, Neb., to Denver, Colo. At that time, the doctor said, motorcycling was in its infancy and especially so with regard to the manufacture of machines.

AD MEN TAKE THE LEAD

They Are the High Scorers in Harley-Davidson Bowling League

MILWAUKEE, Wis.—There's a smile of satisfaction in the advertising department of the Harley-Davidson Motor company. The reason? The advertising team tops the Harley-Davidson bowling league, a feat accomplished by acquiring the championship laurels that hitherto rested with the foremen. The members of the advertising team are: Otto Grigg, captain; M. Fitzgibbon, E. Zeller, F. Augustin, H. Sharp, L. Crolius and Walter Davidson.

This is the third season of the Harley-Davidson bowling league, and the organization is a big factor in promoting close co-operation between the men in the office and those in the works.

The league is conducted strictly on a goodfellowship basis, as is evidenced by the fact that the scores run all the way from an 87 average to 179.

U. S. RUBBER INCREASES WAGES

PROVIDENCE, R. I.—The United States Rubber Company in this State has increased the wages of its employees 10 per cent., to take effect at once and remain in force until September 1, 1917, at least.

JENSEN'S RIDING FEATURES TEAM RACE

Wins All of Sprints in Two-Hour C. R. C. A. Team Contest—Record Attempt to Better 39.3 Miles Unsuccessful

NEW YORK, N. Y., Nov. 27.—Edwin Jensin and Anthony de Luise captured first honors in the two-hour team race of the Century Road Club Association which was held yesterday over the Fordham road, between White Plains avenue and Westchester road.

Jensen engaged in all of the eight sprints that were staged in the last hour of the race and he finished in front in each of them, his team winning with a total of eight points. Second honors went to the Raymond Caldwell-August Bailer team, 22 points being their score. Max Halpern and Willard Knecht scored one more point than did the Caldwell-Bailer combination, while the Sattler and Tomosula pair scored 30 points for fourth.

Record Attempt Fails

An attempt was made to better the mileage of 39.3 miles made in the 1914 race, but the best the leaders did in the race yesterday was 36 miles. The first 20 miles was ridden in 58:15, and the low score is accounted for through the Berlin style of finish.

Five of the ten teams that started were eliminated from the last hour of the finish. In the second lap of the race the Baker-Steppelo and Zemo-Winquist teams were dropped back and they withdrew at the 11th and 19th miles, respectively. On the 12th mile the Brock-McGinnis team were lapped and in the 14th mile the Marquart-Peters and the Cestone-Grace pairs suffered a like fate.

When the last hour of sprinting started all teams that were lapped withdrew and the finish of each of the eight sprints is given below:

	Sprints							
Team	1	2	3	4	5	6	7	8 Pts.
Jensen—de Luise ...	1	1	1	1	1	1	1	1— 8
R. Caldwell—Bailer..	4	2	2	2	2	5	2	3—22
Halpern—Knecht	2	3	3	3	5	2	3	2—23
Sattler—Tomasulo ..	3	4	4	4	4	3	4	4—30
J. Caldwell—Carroll.	5	5	5	5	3	4	5	5—37

MARTIN WINS

Salem B. C. Race of 18 Miles in 45:05—Sixteen Starters

TORONTO, Ont.—The final bicycle road race of the season was the 18-mile grind staged by the Salem Bicycle Club of Toronto on Saturday, November 18. Double honors were captured by Harry Martin when he finished first and won the time prize as well. Starting from scratch, he covered the distance in 45:05, beating the other scratch man, Ray Goldsmith, by ten seconds. Sixteen cyclists lined up for the start of the race, which was held on Dufferin street, to Fisherville and return. The race was closed to members of the Salem Bicycle Club.

Martin, the winner, won the historic Dunlop road race in 1913. The first six riders to finish in the Salem race were: first, Harry Martin; second, Fred Bingley; third, Jimmy Hall; fourth, Ray Goldsmith; fifth, W. McCarrell; sixth, Walter Bingley.

BAY VIEW'S BALL A SUCCESS

NEWARK, N. J., Nov. 26.—One of the largest turnouts of the season at the Krueger Auditorium showed up for the annual ball of the Bay View Wheelmen, the hustling local organization. Music was furnished by Prof. John L. Staehle, who in public life is the American amateur champion cyclist. Joe Kopsky, the professional rider, acted in the capacity of floor manager.

GARDEN CITY WHEELMEN'S JINKS

SAN JOSE.—The Garden City Wheelmen, of San Jose, held a banquet and jinks on the evening of Nov. 9, at which about 70 were present, including many of the club's old-time riders, who received an enthusiastic welcome. George Lucien was toastmaster.

CYCLISTS MUST HAVE BELLS

NEWPORT NEWS, Va., Nov. 27.—Local police officials have been waging a war against bicycle riders who ride without bells. Last week five cyclists were haled before Judge Robinson, who discharged them with a warning.

CLOSE GUESSES IN ATHERTON CONTEST

Five Figure Within Fractional Mile of Total in Buffalo Metal Mileage Competition and Drawing Is Held—Krummer Gets First Prize

BUFFALO, N. Y.—Following the close of the Chicago Show, the Buffalo Metal Goods Co., maker of the Atherton coaster brake, has announced the winners of the mileage guessing contest. The company offered prizes for the show visitors estimating the combined mileage of three bicycle rear wheels at its booth, each being fitted with a cyclometer.

The actual mileage recorded on the three cyclometers was 545.1, and no less than five guessers figured 545 miles. Sales Manager F. T. Chase, of the company, organized a drawing among the quintet, with the result that Wilbert Krummer, of 1135 North Spaulding avenue, Chicago, Ill., drew the first prize, a bicycle. The second prize, a pair of Vitalic bike tires, goes to Thomas Quaney, of 742 East 47th street, Chicago, Ill., while the third, an Atherton coaster brake, is awarded to Randal Preere, of 4830 Cottage Grove avenue, Chicago.

To George Eberhardt, of 1921 Pratt avenue, and Roy Smith, of 1419 Jackson street, both of Chicago, will be given Atherton coaster brakes, also.

N. C. W. CYCLISTS AFTER RECORD

Ten Riders of San Francisco Club Just Miss San Francisco to San Jose Mark; Castillo Rides Course in 5:48:00

SAN FRANCISCO, Cal., Nov. 23.—Last Sunday ten cyclists sporting the colors of the New Century Wheelmen made an attempt to better the record of 5 hours and 42 minutes, held by Walter Hammit and Frank Murray, for the 100 miles between this city and San Jose and return. Due to a heavy rain, which the riders struck shortly after the start, the attempt was not a success, the first rider, Milton Castillo, finishing six minutes outside of the mark.

Promptly at 5 a. m. Captain Hammit sent the riders on their way. The route traveled was out Valencia street to Mission street to the Great Viaduct. Going over the Daly City hills "Pop" Rhodes and Harry De Brie were unable to hold the pace set by the pacemakers, Ralph Welch, Milton Castillo and Harry Spence, and were dropped off.

At Belmont, 26 miles out, which was covered in 1 hour and 3 minutes, the first checking was made, with the three pacemakers and C. C. Mettlers being together. After leaving Belmont a heavy rain was encountered and everyone was soaked through. The rain also made the going dangerous and each rider suffered several falls. Another checking station was located at Mountain View, where the supposed to be checker had to be aroused from his bed to do the honors. San Jose was reached at 7:30, with the first half of the journey accomplished in 2½ hours.

After partaking of "coffee and" at San Jose the fast bunch started back for 'Frisco. Three miles out of San Jose the other crowd, or slow bunch, were just coming in. A fast pace was set and at Belmont, the last checking place, Castillo stole a march on the pacemakers, while the latter were wetting their whistles, and although they tried to catch him he arrived home seven minutes in advance of them. Castillo's elapsed time was 5:48:00. Spence did the course in 5:55:00, as did Welch. Mettler's time was 6:24:00, Art Filley's 6:48:00 and Walter McGrath made the same time as Filley.

G. C. W. IS GROWING

Hustling San Jose, Cal., Club Booming Membership Campaign

SAN JOSE, Cal., Nov. 23.—Since its reorganization on August 1 last the Garden City Wheelmen has swelled the club's membership rolls with 140 members, which brought the total up to over the 200 mark. Among the members can be found prominent business men, State senators and city officials.

The club was formed back in 1888, and there have been many famous riders who started their careers as members of this club. Many of them started as newspaper carriers before taking to the cycle track, their route laying in and around San Jose. Among the prominent riders of national fame who were members of the G. C. W. were the late Floyd McFarland, the Downing brothers, Hardy, Burton and Lace, Otto Ziegler, the "Little Demon," the late Carl Limberg, Earl Cooper, the auto driver, Johnny Berryessa, Bob Diefenbacher, Hal McCormack and many others.

With the club in flourishing condition and many events planned for the winter and the 1917 season great things are looked for. The newly elected officers include: President, George Suicer; vice-president, James Hall; recording secretary, W. H. Walker; financial secretary, F. G. Rupert; captain, W. Moon; board of directors, E. O. Stevens. W. A. Johnson and H. Manchester.

ANOTHER RACE FOR READING

READING, Pa., Nov. 27.—A ten-mile bicycle road race will be held on Thanksgiving Day by local cycle dealers. The race will start at 10 a. m., and the dealers have donated a number of fine prizes, which have been on exhibition at the store of J. G. Neubling. Saturday, December 2, will be the rain date.

A SIX-DAY ENTRANT

Peter Drobach, South Boston, Who Signed for New York "Grind"

BICYCLE RACE

On Road Is Held by Local Dealer—Forty-eight Starters

KINGSTON, Ont.—A very successful bicycle road race was held in Kingston recently under the auspices of Harvey Milne, the local Cleveland bicycle dealer. There were three classes of riders and the starters numbered forty-eight cyclists. The course was twelve miles and the winner, Ken. Murray, covered this distance in 27 minutes.

The starter of the contest was Mayor Richardson, who also presented the prizes at its conclusion. The race was held in rain, but more than 400 people were spectators. This was the first real bicycle road race in Kingston for many years.

A two-mile race for boys of eight years or under was won by Charles Connelly.

RIDERS SIGNING UP

Although Terms Are Not Pleasing Riders Agree to Ride in "Grind"

NEW YORK, N. Y., Nov. 28.—Although there was an air of doubt about who would sign to ride in the six-day race at Madison Square Garden, which is due to start Dec. 18, the cyclists are quietly journeying to the office in the famous building to look over the prospectus and after giving the prospectus the once over affixing their signatures to a contract.

The latest one to sign to ride the "grind" is none other than Alfred Goullet, the former Australian, who, the press agent says, signed yesterday. Who Goullet's partner will be is not named. Peter Droback will also be among the starters. George Wiley, the Syracuse pace follower, who likes six-day racing as well as Teddy Roosevelt loves the Progressives, has signed. There will be more that said they would not ride toe the mark when the starter's gun is fired about a minute after midnight of Dec. 17.

That the cyclists are not overly pleased with the conditions of the race goes without saying. The riders are to ride for 35 per cent of the gate receipts, and the bonuses of the riders are to come out of the bonuses. If the receipts fail to come up to expectations a few bicycle riders will be shy of their Christmas shopping money.

FOREIGN RACING NOTES

Sixty-one riders started in the Tour of Lombardy (Italy) recently. Leopold Torricelli won and covered the 440 kilometer (273.4 miles) in 15 hours 46 minutes and 35 seconds.

Leon Didier, the French paced rider, who performed in this country last season, has volunteered for military duty and has been assigned to a cycling corps.

Louis Darragon, the ancient French paced champion, was forced to take a rest recently. Darragon took a dislike to a French officer and insulted him. For the offense Darragon was sentenced to two weeks in the "Hoose Gow."

Marcel Durand, former manager of the Velodrome d'Hiver (indoor track) in Paris, has been called to the army. Durand's place has been taken by M. Benoit, Durand's assistant.

George Seres, another American visitor, has been refused his racing license by the Union Velocipedique de France, the French governing body. Seres has not been numbered among those who have done military duty, hence the refusal of the license

NEW RALEIGH, N. C., CORPORATION

RALEIGH, N. C., Nov. 27.—The Queen City Cycle Co., of this city, has been incorporated to carry on the sales and repairs of bicycles. The incorporators are J. D. Pritchard, Mary Pritchard and W. S. Beam, and the company is capitalized at $5,000.

TWO RACES SCHEDULED FOR PROVIDENCE

John Montecalvo, Rhode Island Dealer Will Run Two Amateur Events on Thanksgiving Day

PROVIDENCE, R. I., Nov. 28.—John Montecalvo, a bicycle dealer in this city, will conduct a 12-mile amateur handicap and 4-mile novice bicycle road race on Thanksgiving Day. Montecalvo has aroused considerable enthusiasm among bicycle men and they have generously contributed prizes for the event. Montecalvo will donate a cup for time prize.

For the first race, 4-mile novice, the following prizes will be given: First, pair of tires, Fisk Rubber Company; second, pair of tires, Combination Ladder Company; third, pair of tires, New England Cycle Shop; fourth, set of handle bars, Chicago Handle Bar Co.; fifth, one set bicycle guards, International Stamping Company; sixth, electric light, Hawthorne Manufacturing Company.

In the 12-mile race the following are the prizes: First, one watch set, by New Departure Manufacturing Company; second, pair of tires, Pennsylvania Rubber Company; third, pair of tires, Goodyear Rubber Company; fourth, pair of tires, Continental Rubber Company; fifth, pair of tires, United States Tire Company; sixth, lamp, Badger Brass Manufacturing Company; seventh, one coaster brake, Eclipse Machine Company; eighth, lamp, B. A. Swenson, the Indian Motorcycle man; ninth, racing saddle, Troxel Manufacturing Company; tenth, one set wood cycle rims, Tucker Woodwork Company.

BRINDLE WINS AGAIN

Defends Bay View Brassard for Tenth Successful Time Against Grenda

WOODBRIDGE, N. J., Nov. 27.—George Brindle, the "Brassard King," of the Bay View Wheelmen, Newark, won his tenth match race yesterday for the club armlet. Brindle met and defeated Captain Walter Grenda, who is credited with showing Brindle how to ride. in the Brassard race at the local half-mile trotting track. Four other races were run in addition to the Brassard race. Summaries:

One-mile open—Won by Robert Benwell; second, William Keller; third, Charles Osterwitter; fourth, John Martin. Time, 4:55⅘.

Brassard race, half-mile—Won by George Brindle; second, Walter Grenda. Time, 1:36⅘.

Half-mile match—Won by Charles Osterwitter; second, Robert Henderson. Time, 2:00⅗.

Half-mile match—Won by Walter Grenda; second, L. Marchiverna. Time, 2:11⅕.

MAHIEU A WINNER

Takes First Honors in Feature Race of the Hudson County Wheelmen

BAYONNE, N. J., Nov. 27.—Louis Mahieu, riding from the 30-second handicap mark, accounted for first place in the five-mile handicap road race held by the Hudson County Wheelmen yesterday. Mahieu's time was 16:56 4/5. John Fargo, 15 seconds, finished second; Henry Klotz, 45 seconds, third, and Tom Flanagan, 30 seconds, ran fourth.

A ten-mile open went to James Flanagan with C. F. Hansen second; Louis Mahieu, third, and Arthur Neminsky fourth. The time was 29:46 1/5. An unknown distance race, which went to the three-mile limit, was won by James Flanagan. Hansen finished second and Tom Flanagan third. This was Tom's second finish in that position, and in both races he put up a game fight for place.

McKAY CAPTURES CUP IN CLASSIC RACE

Dark Horse Wins 20-Mile Road Contest With Ten-Minute Handicap —Woodcroft Wins Time Prize

TORONTO, Ont.—Howard McKay, a real dark horse, captured the chief prize, a beautiful cup, in the second annual handicap bicycle road race of the Classic Athletic Club, which was held on the Danforth Road, Toronto, on Saturday, Nov. 11. The course covered a distance of 20 miles and, with a handicap allowance of ten minutes, McKay won the event in 1:02:52. The time prize was secured by Dick Woodcroft by a mere fraction of a second. Woodcroft was started with the four minute bunch and finished in second place only a few feet behind McKay, the race winner, after a desperate sprint. His time for the twenty miles was 56:53. The third competitor to finish was A. Bouttell who finished one second later.

A feature of the competition was the participation of a father and son, both of whom finished among the first eight. The father, Tom Ford, rode into fourth place, while the son, a boy of twelve, finished eighth. The latter was given a fourteen minute handicap. Mark Hannam, winner of the recent Dunlop Trophy race here, landed sixth prize, a short distance behind N. Gerrold.

Fred McCarthy, the Canadian veteran, who had been given a one minute start, finished seventh. The two scratch men, Norman Webster and George Wright, were eliminated through punctures.

This race practically closes the bicycle racing season in Canada for 1916, but riding will be resumed by Spring.

Some Odds and Ends of Motorcycle News

MILWAUKEE M. C. STARTS A BOOM

Reduces Dues to Bring in New Members; Big Show Plans Are Being Developed; Bowling League Is Ready; Ball for Sylvester Eve

MILWAUKEE, Wis., Nov. 28.—As an inducement towards increasing membership, the committee in charge of the campaign now under way by the local club to bring its membership up to the 250-mark has announced that the club dues hereafter will be 50 cents instead of $1. In making this reduction known the committee stated that the new dues schedule would give motorcycle club members in Milwaukee more for their money than is derived from any other organization in the city, and laid especial emphasis on the affiliation of the club with the F. A. M. and the resultant benefits accruing through the national body's well equipped Legal Aid Department.

While the officers of the Milwaukee club feel that reduction of the dues is a rather daring plan to inaugurate at the present time, there have been received promises from various dealers that they could get more than 100 new members if the dues were reduced to where they were in reach of the ordinary rider. The club also has several sources of revenue in the way of money producing affairs falling due in the near future.

The Milwaukee show plans call for a bigger exhibition than has ever been held before. Frank Effinger will manage the show this year, according to present plans, and depending on whether or not Mr. Effinger remains in Milwaukee. The past two shows have been put on with ever increasing enthusiasm and exhibitors' spaces.

The Milwaukee club will have a bowling league under the supervision of Bert Talbert, chairman of the sports committee. Four teams will comprise the league. Talbert has uncovered some surprising talent along bowling lines in the club.

Sylvester eve will be a gala occasion in local motorcycledom. The club will give its first Sylvester ball in the clubrooms. This is the first year that the club has had facilities to stage an affair of this kind, due to the fact that the old clubhouse did not provide the room. Emila Harrisburger, T. W. Lamb, F. C. Bassford and Leslie Garrow comprise the committee in charge of the event.

PARCEL DELIVERY

Omaha Rider Makes Mount Pay Dividends in Service of Clothing Firm

OMAHA, Neb.—Charles Hayes, of this city, makes his motorcycle pay him big dividends. Hayes has a contract with the Berg Clothing Co., of Omaha, to deliver all their packages for them, and he charges them just one-half the amount they would pay under ordinary circumstances. He starts work at ten o'clock and finishes between six and seven. If, however, he should have to work overtime he never kicks because that means so much more for him.

During a recent snowstorm when all the horses and motor vehicles without chains were put out of business Hayes showed the value of his motorcycle delivery more than ever. He made all his usual deliveries, netting nearly $9 for himself.

New Sales Helps . . .

Yes! New Departure Quality is what sells the Brake that Brought the Bike Back. Throughout the season just closed this fact has become increasingly apparent.

Those dealers and riders who visited the Chicago Show were thoroughly convinced of this truth.

Every part entering into the manufacture of this brake is made with a view to the special duty which that part shall perform.

Extraordinary hardness, resiliency, exactness of

size and high finish are characteristics of parts which need these qualities.

Each part must be fit for its peculiar function regardless of cost.

The assembled whole is as near perfection as study and ingenuity can make it.

HERE'S THE LAST CONTEST PICTURE

Last Picture Was Taken from a Henderson and It Brought Forth 19 Correct Answers; List of Motorcycle Experts and Near Experts Will Be Published at Early Date

GOSH! Almost as hard to be a Contest Editor as it is to be a Contestant. Somehow or other even the best of contest editors—no names mentioned—seems to go bad when it comes to figuring up the scores.

Took that batch of "dope" with us when we left for the Chicago Show, and spent all the 24 hours between Gotham and the Windy City figuring up the "dope" on a Pullman table. Thought that without anything to disturb our peace of mind we surely could not go wrong.

We Slighted This Trio

Must have been too close to the Buffet car. Anyway, along comes Grant R. Moore of Monticello, N. Y., and says he should be a 100 per cent. man—and investigation reveals the fact that the boy is perfectly correct.

Likewise comes Charles B. Williams of Pittsfield, Mass., and opines that he is still an unblemished Motorcycle Expert. And we dug back in the files in order to find a blemish and must confess that Chas. B. is all that he claims in the way of a 100 per cent. contestant.

And just to make good the rule that troubles always come in threes, here's our own Elliott Holton of Newark, claiming he should have been classed as an 800 per cent. batter. Well, don't get sore about it, E. B. Just did that to get back at that bunch from Newark. You certainly should have been an 800 per cent. man and we hereby make you one.

What One Show Did

Yea, Bo, the Contest Editor went to Chi for the show. That was his picture up there on the front page of the Chicago Show Report number, but the artist didn't do him justice. And he contracted such a bad hind leg walking around and looking for some contest dope on the 1917 models that he came back and went to bed for a week. That's why there was a lapse of a couple of weeks—one at Chicago and the other home in bed, and you know there's no sub possible for a Contest Editor.

In the meantime a trio of correct Thor answers came in, along with sweet little epistles from Millie and Jennie; credit given for all of them.

Have received 19 correct answers to the last picture, which was taken from a Henderson and which was very easy. No one has gone bad on it yet, which is proof enough.

The little picture shown this week will close the contest for the present season. And just as soon as all the allowable answers are in we will publish a list of the Motorcycle Experts and the near-experts and—oh, well, you know a Contest Editor has to earn his salary, so keep your eyes peeled for something new.

WHAT MAKE OF MOTORCYCLE IS THIS TAKEN FROM?

NOVEL CONTEST

Successful Bidder to Give Name to "Midnight Run," December 31

YONKERS, N. Y., Oct. 15.—A novel idea with regard to the proposed "Midnight Run" on New Year's eve from this city to Albany, has been suggested to Commissioner Ellis by Vice-Commissioner J. O. E. Dieterich. It is that sealed bids be invited from manufacturers for awarding prizes in this run and that the bid chosen by the riders will decide the title of the run, the title being the name or other distinguishing mark of the firm whose bid is chosen.

Messrs. Ellis and Dieterich desire to receive these sealed bids from all who wish to bid for the award of the prizes. The bids are to be sent to the State Commissioner, who in turn will select some clubhouse when the bids are all in and open them. The riders present will then decide what bid they desire. The name of the successful firm will give title to the run.

There will be three classes: sidecar, solo and lightweights, with amateur and pro. divisions in each. This will make six first prizes, as many second and six third prizes—eighteen in all. Commissioner Ellis feels that it would be well worth the expense involved for a manufacturer to get the bid, owing to the extensive publicity derived from the run. The run will be an annual affair hereafter, says Ellis.

The company whose bid is successful is to supply an official at the start and at Albany. Motion picture provisions have been made at both ends, so that additional publicity will thus be obtained. The run, which starts at 12 midnight, will be held regardless of the weather. Entry fee will be 50 cents, and membership in the F. A. M. is required of all entrants.

Bids for prizes must be in Commissioner Ellis' hands not later than Dec. 17 at 6 p. m. His address is c/o Baker, Murray & Imbrie, Inc., 10 Warren street, New York.

TO INCORPORATE F. A. M.

Prominent Trade Members Decide on This Action at Informal Gathering

CHICAGO, Ill.—At an informal meeting of F. A. M. boosters, held during the last day of the Cycle Show, it was decided to incorporate the Federation of American Motorcyclists. This was pursuant to the action of the National Assembly in Sacramento, July, 1915.

Those at the meeting were William S. Harley and Walter Davidson, of the Harley-Davidson Motor Co.; George W. Sherman, of the Hendee Manufacturing Co.; T. W. Henderson, of the Henderson Motorcycle Co.; C. H. Schnee, chairman of the Legal Action Committee, F. A. M., and W. M. Johnson, F. A. M. director. Chairman Schnee will take the necessary action in the matter.

MAKES 250 MILE RUN

With Machines Fastened Side by Side to Get Through Mud

OMAHA, Neb.—Harry Stryker, president of the Omaha M. C., and C. W. Adolfson recently made a run of 250 miles out of Omaha. Before starting back to Omaha a heavy rain set in, which set the boys figuring how they could get back with the roads flooded as they were.

Finally they hit upon a plan to team their machines up. Eight five-foot sections of lead pipe were secured and these were laced to the motorcycles so that the two made a side by side outfit. Then they opened up, and to their delight the return trip was made in record time and without a mishap. On the way they passed several wagons that had sunk hub-deep in the mud.

MORE PHONE SALES

Lang Places Ten Harley-Davidsons with Chicago Telephone Company

CHICAGO, Nov. 28.—C. H. Lang, local Harley-Davidson distributor, announces that he has just sold ten more machines to the Chicago Telephone Company. These will replace motorcyles which have been in use for a long time. The Harley-Davidson is now represented to the extent of 19 of the 1917 models in the Telephone Company's fleet. Lang also closed four other commercial sales during the past week.

As an example of the service which telephone men get from their motorcyles, I. I. Woodward, a Harley-Davidson rider, who works in one of the Chicago suburbs, has reported at the local headquarters that from last March until November 1 he had ridden his machine 8,000 miles. He had bought but one new tire, for the rear wheel, and his expenses for parts had been only 40 cents.

RACE CIRCUIT

To Take in Five Towns Planned by Kansas City Fans

KANSAS CITY, Mo., Nov. 28.—There is now a deal about to be consummated to promote a circuit of sanctioned F. A. M. races at the towns of Coffeyville, Kan.; Chanute, Kan.; Caney, Kan.; Parsons. Kan., and Dewey, Okla. The first meet is scheduled for Caney, Kan. All of the riders that came to Kansas City expecting to compete in races scheduled at the half-mile dirt oval at Independence, Mo., on Nov. 11 and 12, have been signed to ride this circuit.

CROWN TO MAKE CORD TIRES

OMAHA, Neb.—The Crown Tire & Rubber Company, of this city, which has just incorporated with a capital of $250,000, will make cord tires for motorcycles and automobiles. Five acres of ground have been secured and six buildings will be erected thereon. The incorporators are Henry A. Reichenbach, Henry C. Meyer and Jesse P. Howe.

BRAENDER PASSES ON

WHITE PLAINS, N. Y.—Philip Braender, president of the Braender Rubber & Tire Company, of Rutherford, N. J., died at his home in this city on Nov. 4. He was 68 years of age. He entered the rubber business in 1911, forming the Cable Pneumatic Tire Company, and later the firm bearing his name.

NEW R-S AGENTS FOR HOLLAND

READING, Pa.—The Reading Standard Company has recently made new connections for the representation of its motorcycle line in Holland and the Dutch colonies, M. Adler, of Amsterdam, being the agent. The Adler firm has just placed its first order, for 150 Reading Standards, to be shipped within 60 days. The first carload has already left New York.

FIRE IN VULCANIZING SHOP

PROVIDENCE, R. I., Nov. 27.—H. F. Bittaker & Co., operators of a tire vulcanizing shop, suffered a considerable loss by fire last Thursday following the explosion of a gas meter.

One Van Demonstration Will Usually Change a Merchant From a Doubter to a Buyer; Here's a Case in Point

ONE of the outstanding facts relative to the application of the motorcycle, or the van combination, to general commercial service is that it invariably becomes a permanent feature of the merchant's business. The motorcycle outfit, once thoroughly tested, is never relinquished for any other form of vehicle, and in nearly every case it opens the way to the purchase of additional motorcycles and vans as the merchant's business develops. So, the chief concern of the dealer should be to have one of his own van outfits given a thorough and systematic test.

The Sharp Music Co., of Denver, Col., didn't feel that it could satisfactorily apply a motorcycle van combination to its delivery and repair business, but it is now using the Excelsior outfit pictured above and is enthusiastic over the results obtained.

How did it happen? Well, the Mead Autocycle Co., which handles the Excelsior in Denver, simply got on the job and demonstrated that a motorcycle with a van attachment would cover more ground and do more work for less money than any other type of vehicle. That's all.

Once the facts were presented to the Sharp Music Co. on a bed-rock basis it was a simple matter to close the sale. The firm frankly states now that it could not get along without the motorcycle combination.

But it had to be convinced. That's natural enough. No one can blame a merchant for being "from Missouri." Dollars are dollars, and experiments are costly. The merchant is entitled to a practical demonstration, and the dealer should see that he gets it.

Don't wait for him to ask for it. He's busy, and besides he doesn't know what a motorcycle will do for him, so he's not likely to ask for a demonstration. But if he is offered a free trial of a motorcycle van outfit, he'll be interested.

RETAIL SALES PROVE SHOW'S SUCCESS

Chicago Dealers Highly Pleased with Immediate Returns from Coliseum Exhibition—Cash Sales Figure Largely—Many High-Priced Outfits Disposed Of

BY C. D. CRAIN

CHICAGO, Ill., Nov. 27.—Local motorcycle men, now that the big Chicago cycle exhibition is over, are enthusiastic over the results. From the standpoint of immediate returns, the Show was a huge success and tradesmen are unanimous in stating that more sales were made during the week past than during any other Chicago Show week for years.

The retail business handled was more than enough to prove the strong and increasing demand for motorcycles. Not only were orders taken for immediate delivery with cash down in a large majority of cases, but also for delivery of the machines early in the year. There were many sales of unusually high-priced outfits, such as sidecar combinations with tops and de luxe fittings, and these convinced the dealers that the public not only wants cycles but it is looking for the best products of the manufacturers.

Some dealers report doing a business of from $5,000 to $10,000 at the Show. Most of the Chicago retailers sold a number of machines on exhibition for delivery at the conclusion of the exhibition.

Whipple the "Motorcycle Man," who claims the distinction of having sold the first motorcycle in Chicago, 13 years ago, has lined up with the Thor for 1917. He has sent out a letter in which praise of this machine is expressed in a remarkably interesting form. Whipple will continue to handle the Pope line as well in his store at 1227 West Jackson Boulevard.

C. H. Lang, distributing the Harley-Davidson, is looking forward to a fine season with the Harley-Davidson line of bicycles. He is also looking forward to a bigger total of sales with the Cygnet Rear Car than in 1916, particularly with the model having the new top. Lang has sold the Chicago Telephone Company two more machines, making 20 or the 1917 model that the phone organization has now in service.

R. C. Crist, Excelsior man, was much pleased with the results of the exhibition at the Coliseum. There were a number of Excelsiors sold right in the hall and Hendersons took finely with the trade. All Hendersons in stock at the Crist store were sold during the Show as well as several which were in on display.

Thus far, Chicago dealers have not been featuring bicycles as Christmas gifts, several figuring that this is "small-town" stuff. The fact remains that, while a motorcycle would not be given as a holiday present in most cases, many people would buy bicycles for this purpose if attention was called to the idea.

Quite a number of riders in this city are taking advantage of the lull following the Show to express the opinion that local motorcyclists are not sufficiently appreciative of club and other organization work. "The boys will take all they can when it comes to service," said an enthusiast recently, "as well as assistance in getting license matters fixed up. They seem to enjoy the runs and other social events, too. But when they are asked to come across with a quarter for dues, enthusiasm for the club is hard to find.

"Riders should realize that they are getting a great deal more out of the club than they put into it and that the small amount asked for dues should be paid cheerfully," continued the club booster. "The clubs can do much to protect the riders and increase their enjoyment of the machines and they are worthy of more hearty support. Two bits is little enough to ask, and I have been unpleasantly surprised at the attitude taken by some of the riders on this question."

SIX YEARS OF MOTORCYCLE PROGRESS

(Continued from page 35)

70 per cent. The Henderson is the only exponent of the four-cylinder type.

All valves are now mechanically operated, the automatic inlet valve having passed from use in 1914, but there is little agreement as to the best method of valve grouping. Overhead valves are used on 18 per cent. of the various models, while side-by-side valves have doubled their last year's mark by rising to 28 per cent. Inlet over exhaust valve placing still leads with 54 per cent., but has lost considerably since last year.

Chain drive is the accepted form of final drive on standard motorcycles, being used in every case, although belts are quite generally used for lightweight motorcycles.

Three-Speed Gear

For a time, the two-speed gear showed a steady increase in popularity and it rose steadily from 8 per cent. in 1912, to almost 50 per cent. in 1915. And then came the three-speed gear, which has increased from 9 per cent. in 1915, to 68 per cent. in the 1917 models. This proves how rapidly a new idea is adopted, when it once proves its worth.

As usual, some form of mechanical oiler is used on nearly every form of the standardized motorcycle, the single exception being a light twin, which is oiled by the splash system.

To make safety safer and to provide the utmost ease of control, 77 per cent. of the latest models are fitted with two brakes. This is certainly a startling gain from 22 per cent. last year. It is only by comparisons of this kind, that we really realize the changes that have been made in the evolution of motorcycle progress.

The increase of the capacity of the gasoline tanks is a commendable feature, as eliminating frequent filling of the tank, and enabling gasoline to be purchased where the price is reasonable. The figures show an average increase of from 2.5 to 2.75 gallons, while in the case of the Indian, the increase is even greater. Oil capacity shows a slight increase to 2.6 quarts, which is sufficient for a long trip.

The wheelbase has settled down to 58 inches, as practically standard, and combines ease of handling with comfort.

Foot-starting devices are another recent improvement which have increased rapidly from 7 per cent. in 1914 to over 96 per cent. this year, so that they have become practically universal.

Stands for the front wheels are a new development this year, but are found on 45 per cent. of the 1917 models. We wonder how many models will be found so equipped next year?

Average Price Is $251

It was hardly to be expected, in the face of a rising material and labor market, that prices would show a reduction. The latest models are so generally fitted with front-wheel stands, three-speed gears, luggage carriers, and other equipment, that it has really been an achievement to keep the average cost of a 1917 motorcycle at $251.

The 1917 lightweight motorcycle averages 2.50 horse-power, and single cylinders predominate to the tune of 80 per cent. But most of these single cylinder models are of the two-cycle type, so that they are practically twins in action, even if they are not in actual number of cylinders. Sixty per cent. of the engines are of the two-cycle type.

Drive is by chain in 40 per cent. of the lightweights, belt drive being in the lead with 60 per cent.

Two-Speed Predominates

Sixty per cent. of the lightweight models are fitted with two-speed gears, only one lightweight model being fitted with three-speed gears. A clutch is fitted on 80 per cent. of the lightweight models, but as yet two of the lightweights are not fitted with a clutch.

None of the lightweight models are fitted with more than one brake. In consideration of their light weight and reduced speed, one brake is probably all that is required. If a lightweight starts to go too fast, the rider can lift the rear wheel off the ground and hold it in the air, until the pace moderates.

The average capacity of the gasoline tank is 1.75 gallons of gasoline. In view of the small consumption of gasoline, this should be quite sufficient for trips of considerable length.

As some of the lightweights use oil mixed with the gasoline, it is not easy to give the oil carrying capacity of the lightweight models.

The average wheelbase is slightly over 51 inches, which is 7 inches less than the average of the standard type of big twin motorcycles.

Foot starters are used on 40 per cent. of the 1917 models, but front wheel stands are not regularly fitted to any of the lightweights.

Varied Activities of the Dealers

NEW BRANCH IN BRONX

Harley-Davidson Sales Co., of New York, Will Open Another Store

NEW YORK, Nov. 25.—The Harley-Davidson Sales Co., Metropolitan distributors, announces that its new branch, at 165th street and Webster avenue, will be formally opened on the evening of December 2, and that arrangements have been made for refreshments and a social program. A large number of guests have been invited, among them traveling representatives of some of the factories, and all who attend are assured of a good time, says Manager G. E. Wood.

The new branch has plenty of floor space in the salesroom. The repair department is spacious and up-to-date, large front windows afford opportunities for highly attractive displays, and the whole layout of the place bespeaks progressiveness and capacity for service.

DALER RENEWS HIS CONTRACT

FORT WAYNE, Ind.—H. L. Daler, who has represented the Reading Standard for the past four years, has renewed his contract and will remain a member of the R-S fold for the season of 1917. Mr. Daler is one of the most successful motorcycle men in the state. He was formerly connected with other enterprises, but has disposed of them and will devote all his time to the motorcycle business.

INDIAN SHIPMENT FOR BURTON

FORT WORTH, Tex.—The Burton Supply Company, Indian agent, is awaiting the arrival of a large shipment of Powerplus models. Practically all the contents of this shipment has been sold for cash. A good sized shipment of Indian parts was recently received.

YOST CONTINUES WITH R-S

KANSAS CITY, Mo.—L. A. Yost, an old R.-S. dealer was an interested visitor at the Chicago Show, and has again contracted for the Reading Standard machine for the season of 1917. He will handle the Reading Standard exclusively. Mr. Yost, during the 1916 season, greatly increased his sales over any preceeding year, and claims that for 1917 he will more than double his sales over last year.

SHERIDAN DEALERS MOVE

SHERIDAN, Wyo.—The Sheridan Motorcycle & Equipment Co., Harley-Davidson dealers in this city, have moved from the Kutcher Building on Works street to West Brundage street, opposite the Orpheum theater. Larger quarters were badly needed and the new location fills the bill satisfactorily.

The business, which is managed by B. H. Stutsman and W. L. Wright, was established in 1914. The company now carries a full line of bicycles, motorcycles and accessories. Within the next few months the company will install a lathe and in the spring will put an expert mechanic in charge of the repair department.

COOK GETS TWO

Fort Worth Harley-Davidson Man Sells Them Immediately on Arrival

FORT WORTH, Texas.—The J. W. Cook Motorcycle Company, dealers in the Harley-Davidson, reports receipt of two 1917 model twin this week, both of which were sold for cash before the machines were received.

There is an unusual demand for this make, according to Cook, who declares that he could sell more than twice as many machines for cash as the factory will allot him at this time. He says there is no need to talk trade or deferred payments around his shop, for there are always buyers on hand with sufficient cash to pay for any machine he has to offer.

HANDLES R-S EXCLUSIVELY

DETROIT, Mich.—John Trossel, a veteran cycle dealer of Detroit, is convinced that the best sales results are obtained by concentrating on one line, and he has therefore announced that hereafter all his time will be devoted to the Reading Standard motorcycles. Mr. Trossel's first order calls for fifty machines, six of which have already been shipped.

SENT AN ORDER FOR FORTY

LOUISVILLE, Ky.—R. L. Davis, who has been representing the Reading Standard for many years, and who has always attended the Chicago Show, was compelled to remain at home this year on account of sickness in his family. He demonstrated that he was there in spirit, however, is not in person, by forwarding a letter expressing his regrets on account of not being able to come, and enclosing his order for 40 motorcycles, asking for five to be shipped immediately.

R-S DISTRIBUTORS FOR WISCONSIN

MILWAUKEE, Wis.—The Milwaukee Cycle Supply Co., J. J. Koehler, president, will represent the R.-S. exclusively for 1917 throughout the State of Wisconsin. They have placed their order for a large number of samples to be shipped immediately in order that they may be able to supply their sub-agents with demonstrators at once.

This concern is old in the business, and during the past few months has been completely rejuvenated. Mr. Koehler believes in having young, active men as his business associates, and has recently appointed four experienced riders, who have been associated with the sale of motorcycles for a number of years, to handle the motorcycle end. His most recent addition to his sales force is Adolph Waech, formerly a partner in the Badger State Motorcycle Co.

SHOW HELPED MECHANIK

Agent for Reading Standard in Cleveland Obtained Many Sales Pointers

CLEVELAND, O.—The Woodland Avenue Cycle Co., of which Arthur Mechanik is proprietor, was represented at the Chicago Show by Mr. Mechanik, who closed his contract with the Reading Standard Company for 1917, placing an order for three sample models. Mr. Mechanik asserts that in 1917 he will increase his sales 200 to 300 per cent over 1916.

He also states that he was amply repaid for the time and money expended in attending the Chicago Show, in view of the fact that he received many new ideas in regard to selling motorcycles. He made it his business to get in touch with dealers and others who attended the show from various parts of the country, and in that way acquired much valuable information. Among other things, he is now convinced that a well arranged store is a big business asset, and he has returned home to Cleveland with a determination to completely remodel his place of business.

FEATURE XMAS IN ADVERTISING

DENVER, Colo., Nov. 25.—In spite of the fact that Denver and other parts of Colorado have been experiencing considerable winter weather of late, the motorcycle business is going along nicely, according to the dealers here. Many of them are making use of the fact that Christmas is near to push the sale of their machines as suitable Christmas gifts. This fact is being used in advertising, sales talks, and other ways.

SCHAEFFER NEEDS MORE ROOM

READING, Pa.—William G. Schaeffer, proprietor of the Penn Cycle & Motorcycle Co. on Penn street, near Fourth, has vacated his old headquarters and moved into a larger store next door. He now has twice as much floor space as in the past, and is making arrangements to conduct his business on a proportionately broader basis.

GIVES DELIVERY COSTS

KNOXVILLE, Tenn.—An attractive folder of the Harley-Davidson van is being sent out by The Motorcycle Store, at 702 Gay street. This folder, which is in three sections, points out the actual cost of delivery made by a local department store and invites a demonstration.

NOVEL WINDOW DISPLAY

DENVER, Colo., Nov. 25.—T. D. Scapcott, agent for the Cleveland motorcycle, has a very attractive window display this week featuring that machine. A poster of a large traffic officer with uplifted hand—a sign to stop is used to good advantage and it serves to draw people's attention to the Cleveland motorcycle standing prominently in the window.

WIDE SCOPE IN THIS LIST OF DEALERS

Agents Who Registered at Harley-Davidson Stand During Chicago Show Brought Their Enthusiasm From Widely Scattered Points

MILWAUKEE, Wis.—Below is given a list of the dealers who registered at the Harley-Davidson booth during the Chicago Show. The percentage of active dealers who inspected the company's exhibit was not quite as high as last year, owing to the fact that many of the agents visited the factory immediately upon the announcement of the 1917 models some time ago, but the showing is still one which speaks volumes for the interest of the retailers in the big exhibition. The Harley-Davidson list follows:

E. H. Lueck, Chippewa Falls, Wis.; Louis E. Fluke, Dayton, Ohio; C. A. Pierce, Johnstown, Pa.; C. A. Geerkens, The Hague, Holland; August Zimmerman, Washington, D. C.; Mr. and Mrs. Walter Andrews, Toronto, Canada; Wilfred Morrison, Toronto, Canada; S. J. Snyder, Mason City, Iowa; T. E. Spotswood, Mobile, Ala.; R. W. Sayre of Appeal Mfg. & Jobbing Co., Los Angeles, Calif.; C. J. Maetzold, Red Wing, Minn.; N. Kellington, Decatur, Ill.; R. I. Kellington, Decatur, Ill.; C. Roy McClanahan of Harley-Davidson Sales Co., Dallas, Texas; Mr. and Mrs. Carl Aurich, Billings, Mont.; Chas. Weatherhead, Elkhart, Ind.; R. W. Blucke, Springfield, Ill.; Mr. and Mrs. Carl W. Bush, Newark, N. J.; Mud Gardner, Mansfield, Ohio; Earl Carver, Mansfield, Ohio; H. L. Dipple, Indianapolis, Ind.; S. C. Hamilton, Pittsburg, Pa.; Glenn A. Scott, Marion, Ind., and a party of eight Harley-Davidson riders; W. W. Whiting, Denver, Colo.; Earl Braunlich, Wheeling, W. Va.; G. H. Neidengard, Steubenville, Ohio; August Drouhard, Drouhard Motor Co., Danville, Kans.; G. A. Sayers, Cedar Rapids, Iowa; Mr. and Mrs. J. M. Johnson, Marshalltown, Iowa; H. L. Daler, Fort Wayne, Ind.; G. E. Wood of Harley-Davidson Sales Co., New York City, N. Y.; Earl L. Cronk, Anderson, Ind.; P. I. Haynes, Columbus, Ohio; G. W. Fagan, Cedar Falls, Iowa; R. W. Heagy, Harrisburg, Pa.; P. B. Heagy, Harrisburg, Pa.; G. A. Schnittke, Mansfield, Ohio; Bert E. Heinz, Heinz Motor Co., Baltimore, Md.; C. B. Schnepfe, Wilmington, Del.; Ivanhoe W. Haskins, Danville, Ill.; Mr. and Mrs. Norman C. Hopper of House of Hopper, Salt Lake City, Utah; R. E. Dessinger, Fort Dodge, Iowa; Alexander Klein, Philadelphia, Pa.; C. C. Cline, Grand Rapids, Mich.; W. J. Lister of Lister Motorcycle Co., Cleveland, Ohio; C. H. Lang, Chicago, Ill.; J. E. Wolfe, Paxton, Ill.; Peter Niccolai, Woodstock, Ill.; Clarence Gaylord, Woodstock, Ill.; Gueno Kaenne, Woodstock, Ill.; Geo. H. Schmitt and Louis Schneider of Olive Cycle & Motor Co., St. Louis, Mo.; W. V. Stockwill, Urbana, Ill.; G. L. Smith, Castalia, Ohio; Otto Peters of H. L. Peters, Buffalo, N. Y.; Howard W. Poage of Poage & Sollers, Lima, Ohio; Victor H. Roos, Omaha, Nebr.; Peter De Hamer, Kenosha, Wis.; Chas. H. Siems, Fargo, N. Dak.; M. T. Main, Waukegan, Ill.; A. P. Tyler, Boise, Idaho; J. Kegel, Freeport, Ill.; W. E. Wandersee of Wm. E. Wandersee Co., Detroit, Mich.; M. Hirschberg, Gary, Ind.; Guy W. Webb, Minneapolis, Minn.; Carl Nickum, Zion City, Ill.; Mr. and Mrs. Chas. E. Wilcox, Sioux City, Iowa; H. Burrows, Fond du Lac, Wis.; Paul Gott, Peoria, Ill.; Gus. Castle of Harley-Davidson Motor Co., Atlanta, Ga.; Jes Campbell of Harley-Davidson Motor Co., Boston, Mass.; James A. Trent, Knoxville, Tenn.; W. J. Walker, Boston, Mass.; Louis B. Schneider, Knoxville, Tenn.; J. L. Haines, Creston, Iowa; Louie C. Larson, Whitehall, Wis.; A. J. Henry, Connersville, Ind.; A. A. Gappen, Greenfield, Ind.; Lee W. Wright, Galesburg, Ill.; Crouch Bros., Bloomington, Ill.; Pearle Wehrly, Milford, Ind.; Dwight Doty, Milford, Ind.; Elmer H. Hammer, Bristol, Tenn.; Ira R. Albert, Waterloo, Iowa; Frank Curran, Sault Ste. Marie, Can.; H. M Hagedorn and Ralph W. Webster of Hagedorn & Webster, South Bend, Ind.; Arthur L. Johnson, Rockford, Ill.; Andrew H. Boss, Gypsum, Ohio; F. J. Strachota and Louis Peterik of Mueller Cycle & Supply Co., Milwaukee, Wis.; L. F. Bradburn, Canandaigua, N. Y.; Fred L. McCormick, Cadillac, Mich.; S. H. Kinsey, Fremont, Ohio; Ora Clossen, Chanute, Kans.; P. Lorenzen, Chicago, Ill.; F. E. Brooks, Vincennes, Ind.; P. L. Abbott of Motorcycle and Supply Co., Portland, Ore.; A. R. Fagerholm, Aurora, Ill.; H. A. Schultz, Monroe, Wis.; Al. Oberwegner of Oberwegner Motor Co., Toledo.

"SPACE 123"

The headquarters of a famous line of motorcycle speedometers and bicycle coaster brakes at the New York Motorcycle, Bicycle and Accessory Show. Visit this space and let our representatives explain to you the advantages of selling the Corbin lines. Look them over and secure terms on your 1917 stock.

The sales of these two standard accessories clearly show their popularity among motorcyclists and bicyclists everywhere. Don't forget the space number—123.

The CORBIN-BROWN SPEEDOMETER

This instrument's reputation is backed by many seasons of exceptionally satisfactory service. No speedometer on the market has recorded as many miles for motorcyclists as has the Corbin-Brown. That there are many thousands of them now in use and the demand becomes greater every year. This would not be the case had not the Corbin-Brown made good.

Dealers that carry the Corbin-Brown have every reason to be satisfied. And they are satisfied. Every year proves that they are right in carrying it in stock.

Are you one? If not, get in touch with us at once. We can fill your orders now.

The CORBIN DUPLEX COASTER BRAKE

Few riders go very far in bicycling before they come to the Corbin Coaster Brake. And once they have found the Corbin they stick to it. A brake has yet to be made that enjoys the nation-wide reputation and popularity of the Corbin Duplex. It is not a question of selling this famous coaster brake, but one of meeting an already established and constantly growing demand. Its past record means future friends. Its presence on a bicycle is an added attraction.

The dealer that sells the Corbin Duplex is selling a standard article. The name, the brake and its record are all in his favor.

Get your orders in at once. Write for price lists, catalogs and discounts.

FRENCH MAKES AN ADDITION

Pioneer Cycle Firm Occupies Two Extra Floors in Baltimore Building, Aggregating 5,000 Square Feet; Entire Building Now Used

WASHINGTON, D. C.—Howard A. French & Co., of Washington and Baltimore, jobbers in motorcycles, bicycles, sporting goods and general athletic supplies, and Indian distributors for the State of Maryland and the District of Columbia, are so favorably impressed by the outlook for 1917 business in their territory that arrangements have been made to occupy two extra floors at the Baltimore headquarters. This will give 5,000 square feet of additional storage space; the firm now occupies the entire building, four floors and basement.

The basement will be used exclusively as a repair and service department, and an improved stairway has been built to the second floor so that both the first and second floors can be used as salesrooms. The extra stock will be carried on the third and fourth floors, which are accessible by elevator as well as by side stairway.

Improvements Under Way

Although the building is of modern construction the firm is still further improving the premises by the additon of up-to-date show windows and hardwood floors, and paying a city franchise to take in part of the pavement outside of the building line. The new windows are now under construction and will be finished for the big Christmas trade. The show rooms in both Washington and Baltimore are located in the downtown business section on the most prominent thoroughfares.

Following the firm's annual custom, the new catalogue will soon be in the hands of the printer. It will be larger than ever and a special effort is being made to produce an artistic and comprehensive book, as the wholesale department has shown an abnormal growth during the past season.

The past year has been one of the best the company has ever enjoyed, all departments having run ahead of the fondest expectations.

French Remains Head

Howard A. French, who held some records in the old days of bicycling, will still be in charge of affairs, with "Chic" Thomas for manager of the motorcycle department. Clarence Mahrer will manage the bicycle department, while Ernest Wimmer will oversee wholesale sales. Sporting and athletic goods will be in charge of "Ike" Ruth, the Marathon crack. John Johnson is to look after the shop and service ends.

The Washington branch will be under executive control of Walter Seabrook.

WHIPPLE'S SHOW LETTER

Chicago Dealer Sends Out Review of Chicago Affair to His Patrons

CHICAGO, Ill.—Whipple the "Motorcycle Man," 1227 West Jackson Boulevard, is capitalizing on the recent Chicago motorcycle show by means of a letter he is getting out, bringing home to those of his patrons who failed to get to the show some idea of how the new models lined up at the Coliseum display.

Incidentally Whipple uses the letter as a vehicle to convey the fact that he is again handling the Pope as well as the Columbia bicycle line; also that he has taken the Thor for the west side of Chicago. Whipple also lets it be known that he has taken the agency for the Smith Flyer for the Windy City.

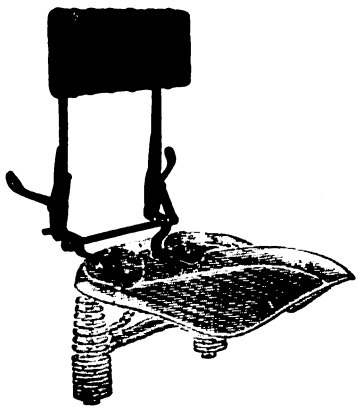
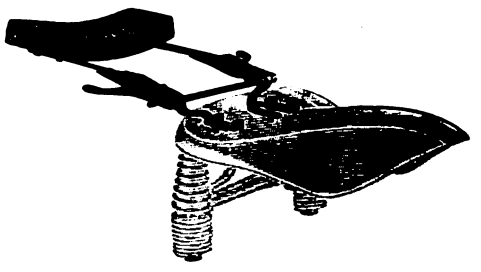
"WEED"



Folding Backrest



$4.50

THE "WEED" FOLDING BACKREST IS THE GREAT COMFORT ACCESSORY FOR MOTORCYCLES. IT IS JUST AS NECESSARY TO YOUR MACHINE AS THE BACK IS TO YOUR FAVORITE FIRESIDE CHAIR. IT ABSORBS ROAD SHOCKS AND VIBRATION AND LENDS SUPPORT TO YOUR BACK. IF YOU HAVE NEVER USED THE "WEED" YOU HAVE MISSED ONE OF THE PLEASURES OF MOTORCYCLING.

THE PATENTED FOLDING FEATURE ALLOWS THE BACKREST TO BE FOLDED WHEN MOUNTING OR DISMOUNTING TO AVOID INTERFERENCE.

See our new universal model at the New York Show. It fits the Troxel, Mesinger and Persons saddles on any machine, and does not come in contact with the leather. Adjustable to any angle to suit the rider.

Three Times More Light Without More Gas— *"Brilliant"*

Or—the Same Light with One-Third the Gas *Burners*

The Perfect Headlight

THE most progressive and largest cycle dealers in the United States are now selling "Brilliant" Burners. These burners have become recognized as a refinement of merit instead of a futile fad.

The light cast by the "Brilliant" Burner is **three times** more powerful than by the regular "fan-tail." Or "Brilliant" Burners can be used for economy; only **one-third** the gas is needed to give the same light as cast without them.

Every rider wants to have the brightest illumination possible. The rider who tries "Brilliant" Burners will find that he has a light akin to calcium. Naturally, this light reaches much farther ahead than the ordinary one.

Moreover, you always have a dependable light, absolutely steady, no flicker, no jarring or blowing out even without the front glass in the lamp. **"BRILLIANT" BURNERS** combine **ELECTRIC BRILLIANCY WITH PREST-O-LITE RELIABILITY.**

These powers which we attribute to "Brilliant" Burners are not mere flights of imagination. Our claims are backed by a real guarantee that gives you your money back if not satisfied with the results.

DEALERS: Don't fail to stock these burners. They can be used with and attached quickly to any lamp using standard height burner. And one burner sells the next. As soon as one of your patrons uses them, every rider in town will want a set. They advertise themselves. "Brilliant" Burners sell at $2 per set of one burner complete and one extra button, and users confirm our opinion that they're worth many times that sum. Get our Literature and Proposition. Be convinced.

All Claims Guaranteed

Such an article as "Brilliant" Burners is a strictly velvet proposition. It isn't a case of which make to sell. It's "Brilliant" Burners or none and no profit. There are No Others like them. They are heavily covered by patents.

Don't forget! Write today! We are glad to send literature to riders as well as dealers. If you are a rider and cannot get "Brilliant" Burners at your dealer's, send direct to us.

2200 Beale Ave.

Altoona, Pa., July 19, 1916.

The Monosmith Bros. Co., Spencer, Ohio.

Gentlemen:—

After using a pair of the "Brilliant" Burners, I find that they give the best light of any burner I have ever handled, so please ship by Parcel Post, C. O. D. 3 Automobile Sets and 3 Motorcycle Sets.

Please give me your best Dealer's Prices for I know I can sell this burner.

Very truly yours,

PEOPLES TAXICAB CO.

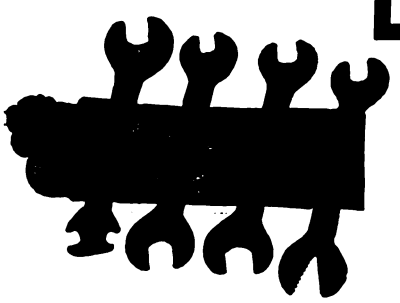
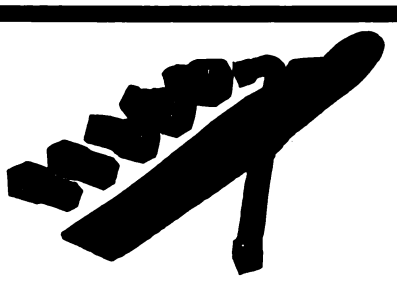
Mossberg Tools are made to make good—they are built so that a guarantee is superfluous—their own construction is their *best* guarantee. The motorcycle and bicycle rider of discrimination and judgment knows the value of having certain-teed tools in his kit, for in emergencies an unreliable tool may be the means of a long, weary walk.

Consider the Mossberg reputation, then ask your dealer. Write for Catalog No. 192C.

See us at the Show.

FRANK MOSSBERG CO.
ATTLEBORO, MASS. U. S. A.





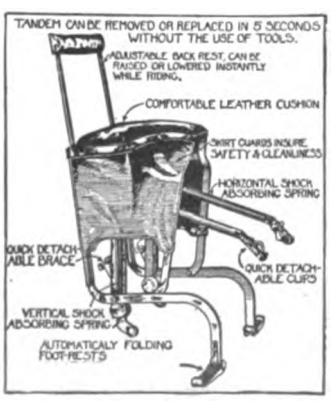
Almost 300% Increase in Sales

over the previous season on

STOLL TANDEMS

is the record of THE NEW YORK SPORTING GOODS COMPANY

Such an increase shows the results of a progressive firm-dealer co-operation and a quality article. It is further proof that Eastern dealers and riders are more and more demanding greater tandem comfort and service.



For 1917 there are no radical changes—but a number of refinements and re-enforcing throughout—and closer attention to details, combining with the comfort qualities always built into Stoll tandems, makes this the greatest value on the tandem market.

Riding Keeps Old Men Young

So Says Doctor Frank Lake of Mexico City and Proves It By Competing in 100 Mile Road Race; Still Able to Enjoy a Hard Ride

MEXICO CITY, Mexico.—Dr. Frank E. Lake of this city is not only an enthusiastic motocyclist himself, but also is a firm believer in the power two-wheeler as a medium for keeping a man young and healthy. This point he is endeavoring to press on many of the older men among his patients, assuring them it will be to their advantage to take up motorcycle riding.

The live wire doctor further declares that although he is rather old for road work he is nevertheless able to give many young men lessons in hard riding on the road. He went out to prove this on October 29, when he answered a challenge by several riders for a race of 165 kilometres (about 100 miles), Dr. Lake with Riba Cervantes and Agent Barroso to uphold the abilities of the Indian motorcycle against all comers.

The Indian riders started on time and all finished, with the doctor up front. The competing riders finished late or were towed in. Dr. Lake finished in the best of condition, thus proving that his theory is a sound one.

HENDERSON DEALERS LINED UP

SAN FRANCISCO.—Tennant Lee, the Henderson distributor, was in San Francisco again last week, and reports that he now has his territory as a whole covered in first-class shape. Only a few sub-agencies are still open. Mr. Lee states that all the Henderson dealers have sold their first allotments and that some of them have already recorded several times.

GOING AFTER HOLIDAY TRADE

SAN FRANCISCO.—Edwin F. Merry, Excelsior distributor, has decided to make a drive at the holiday cycle trade, and is preparing to make the most of the display opportunities offered by his large frontage. A raised platform is being built in the Van Ness avenue windows for display purposes, and other plans are being worked out to facilitate attention to the retail trade.

NAVY YARD SALES PROMISING

SAN FRANCISCO.—F. E. Gerick, a dealer and prominent motorcycle club man of Vallejo, paid a visit to San Francisco last week and reported that his first year as a Henderson agent was a successful one. He has signed up again for 1917. Owing to the vast amount of work under way at the Mare Island Navy Yard, and in view of the increased payrolls of other nearby establishments, Gerick is looking forward to a heavy increase in his business for 1917. He says the Navy Yard workmen are taking to the motorcycle with enthusiasm, and that many of them are on his list of red hot prospects. According to Gerick, most of the Navy Yard buyers also want sidecars.

BENTE RECEIVES EXCELSIORS

SAN FRANCISCO.—Fred H. Bente, Excelsior dealer in San Francisco, has just received his first lot of the new models. While awaiting the arrival of the new machines Bente turned his attention to the sale of second-hand mounts, and reports that he experienced no difficulty in selling all of them that he could obtain for spot cash.

BAY STATERS PLAY WHIST

BOSTON, Mass.—The Bay State M. C. held its third whist party at the club rooms on November 20. There were fourteen tables in all. The club is now laying plans for its annual dance, to be held on February 20 at the headquarters, Huntingdon avenue in the Oxford Hotel.

OKOLA SIGNS AND SELLS THREE

BOSTON, Mass.—W. J. Walker, the Harley-Davidson man for this city and vicinity, has just closed with J. Okola of Rockport, Mass., to handle the Milwaukee-made machine for that city and Gloucester. Okola has sold and delivered three of the electrically-equipped models in the week following his signing up.

FRAMING UNIFORM ROAD LAW

A. A. A. Committee Will Work to Have New Measure Adopted by All States; But One Traffic Problem

NEW YORK, Nov. 28.—Of interest to motorcycle riders as well as motor car owners are the preparations being made by the American Automobile Association to have a uniform motor vehicle law drafted and to make every possible effort to have this law adopted by every State in the Union as quickly as the necessary steps can be completed.

It is expected that the uniform law will do away with much of the confusion and vagueness that results from the present unnecessarily long and cumberson acts and will at the same time do away with the conflict existing now in several States between the motor vehicle acts and traffic acts.

A Single Problem

"Highway traffic is but a single problem," says O. I. Yellott, chairman of the board that is drafing the new law, "and it matters not whether it relates to motor vehicles, horse-drawn vehicles, traction engines or pedestrians. Traffic should be handled as one problem by one general set of laws, so that the rules governing one particular kind of traffic may fit into and be consistent with those governing all other kinds of traffic.

"The details of the uniform law to be framed by the A. A. A. board have not yet been fully worked out, but it may be stated in a general way that the first sub-division will deal with general provisions relating to the applicability of the law and definition of terms used therein. The second subdivision will deal with the appointment, powers and duties of a State traffic commissioner, who will have general supervision of traffic of all kinds on the public highways. The third sub-division will deal with the registration of motor vehicles and operators. The fourth will deal with the operation of vehicles of all kinds on the public highways, as well as with the conduct of pedestrians thereon. The fifth will deal with the enforcement of the preceding provisions."

COOLEYS AT WIGWAM

Report Remarkable Increase in Indian Sales During Past Two Years

SPRINGFIELD, Mass.—A. B. Cooley, Indian agent in Joliet, Ill., and Mrs. Cooley, who is his "right-hand man" in conducting the business, spent several days following the Chicago Show visiting the Indian factory in Springfield, Mass. They made a careful study of the manufacturing ends of both the motorcycle and bicycle fields and returned home with numerous new ideas for the coming season.

Mr. and Mrs. Cooley started in business less than two years ago, their capital at that time consisting of $30 and their rent paid for one month in advance. Pluck and good business judgment, coupled with lots of hard work, have enabled them to build up their business until today they are firmly established among the leading motorcycle agents of their territory. Their business is increasing month by month, their increase from the time when they started to the present date being figured as 2,000 per cent.

VAN GIVES SATISFACTION

BOSTON, Mass.—Lester P. Winchen, a high-grade stationer and engraver, has been using a Harley-Davidson sidevan outfit with great satisfaction during the season just closed for making deliveries. An average of nearly 200 packages per day are delivered in the city alone, while extensive trips are made into the suburbs on occasion.

Winchen is so well pleased with the performance of the machine that he intends to purchase a second one very shortly.

Diamond Chains

FOR

Motorcycles

Diamond No. 149 is an unexcelled motorcycle chain for every motorcycle service.

Every part is accurate, the wearing parts are heat treated by the same scientific process as those of our heavy truck chains, the rollers DO NOT BREAK.

Put DIAMOND to the test on your machine.

You'll be a DIAMOND booster ever after.

Is Written Large in the Sales Ledger

Any dealer who keeps a sales ledger knows he doesn't keep a Morrow long. He sells it! And if he keeps the kind of a record that shows how each bicycle he sold was equipped he will find that the Morrow Coaster Brake in a great many cases influenced the big sale.

Morrow is the synonym that is always associated with the word brake. It stands for the largest, strongest, and smoothest brake on the market. Not only largest in point of size, but largest in point of braking surface. Not only strongest as regards durability, but backed by the oldest and strongest brake organization in the country. Not only the smoothest in riding qualities, but the smoothest in selling.

Truly, the sale of one Morrow today means the sale of two Morrows tomorrow.

GETTING THE SIDECAR BUSINESS

4 Harley-Davidson dealers in as many different states opened the 1917 season by making the percentage of sidecar sales 9 out of 10. A 90% sidecar business certainly is profitable business. Are you getting your share? What these 4 dealers have done can be duplicated in your territory.

The Harley-Davidson sidecar and Harley-Davidson motorcycle are designed and constructed to travel together. That's the big factor in Harley-Davidson sidecar popularity. The last word in comfort, combined with graceful lines, and the elimination of all stresses by specialized design, gives the Harley-Davidson distinctive class.

Sidecar sales bring profits.

Take Cleveland fo

Cleveland, one of the largest cities in the world, depends, to a considerable extent, for the maintenance of its lighting efficiency upon the MASTER THOR.

The East Ohio Gas Company has 49 THORS in 24-hour-a-day service. Forty-nine messengers of speed always on tap to carry the "turn on" men across town to give light and heat to the householder. Forty-nine utterly reliable steeds to carry inspectors over short-cut lots, rolling land, muddy meadows, to the outlying country to regulate the supply of gas in the wells to meet the varrying demands of a great city.

The THOR cooperative policy is the strongest, most considerate of the dealer's requirements and most broad-gauge of any motorcycle manufacturer. That is one of the big reasons why THOR dealers stick to the Master THOR year after year—and more representative merchandisers are daily flocking to the THOR standard. Write for our proposition.

One Company Uses 49 Thors

Speed and certainty of getting there were the two main essentials that received consideration in the selection of the THOR by the East Ohio Gas Company officials. Certainty of service demanded a machine that would stand up under the gruelling use and abuse of such hard, constant service and the THOR met that demand by its simplicity, its powerful action and durable construction. And as for speed—well, all the traffic cops of Cleveland have their eyes out for "those gas company fellers that ye can't hear comin' and can't hardly see goin'."

Tomorrow, another gas company, another electric light corporation, another telephone company in another city will call for the THOR. Will YOU be ready to supply them?

Here They Are—More 1917 Indian "Clean-ups"! And All on Stock Powerplus Models

December 4th

Johnnie Constant, astride a solo Indian Powerplus stock model, captured 1st place in the New Jersey Motorcycle Club's Hill Climb.
Constant made the 851 feet of treacherous, shifting surfaces of sand, in 21 4/5 seconds. In the side car event an Indian Powerplus was awarded First Prize for greatest distance.

December 3rd

Roy Artley, on a stock 1917 Indian, made fastest time at Bakersfield, Cal., Hill Climb—negotiating the 800 foot hill, 35% grade, in 21 4/5 seconds.

November 28th

Edgar H. Buck, with H. S. Passmore as side car passenger, set new 24 hour continuous riding record—making 584 miles over most difficult roads, and beating the former record by 39 miles.

November 26th

Clifford Coulter and passenger won the 200-mile side car match at Pittsburgh, Pa.

November 10th and 11th

And don't forget Roy Artley's Indian victory in the Phoenix, Ariz., Desert Run.

Positive Proof that Powerplus Is the *Best Stock Motor* Ever Built. A Word to the Wise—

BLUE STREAKS

What the Goodyear Guaranty Means to You

IT MEANS that when you are selling a Blue Streak Bicycle Tire you can give to your customer an unqualified promise that if the tire does not give satisfactory service he may return it and receive a new tire in its place. We back you up to the fullest extent.

We place our endorsement upon your promise. You are relieved of all responsibility.

We bear the burden and we do it gladly, for we are eager to replace any Blue Streak Tire that does not live up to all we claim for it.

This means that your customer has double assurance of complete satisfaction in his purchase.

He not only has your word, backed by your local reputation for square dealing, but he has also the pledge of the world's greatest tire manufacturers, The Goodyear Tire & Rubber Company.

This double guaranty is ironclad.

Your customer is doubly sure there can be no come-back, no haggling, no back-talk.

If the Blue Streak disappoints him he can bring it back and receive another one free.

This guaranty is only another reason for Blue Streak's ready sale.

And the ready sale means the quick turnover and the quick turnover means more profit and less capital invested.

By the way, are you a Blue Streak dealer?

Gotham Show Sets New Record for Spectacular and Instructive Exhibits

Many of the 80 Exhibitors Have Gone Great Lengths to Present Offerings in Striking Manner, Making a Composite Whole Surpassing Anything That Has Gone Before—What Was Done and How It Was Accomplished

THE Chicago Show was spectacular; quite. Likewise it was instructive. But in both ways the New York exhibit has it beat. Taking their cue from the results obtained at the Windy City affair in the way of increased interest growing out of the many handsomely presented exhibits, numbers of the exhibitors who had not gone in for anything of that sort at the Chicago show have gone great lengths at the Garden display to make their booths at once eye-pleasing and instructive.

At the same time several of the makers whose booths were of the most attractive sort at Chicago have gone even farther in the New York show to strike that note of appeal with the show visitor, which comes of seeing something worth-while presented in a striking manner.

Gotham Responds

And Little Old New York certainly has responded. The far-reaching advertising and publicity campaigning which the show management inaugurated has packed the Garden every night; and the afternoon gatherings are likewise fulsome. There is not an exhibitor on the floor who is not fully satisfied not only with the attendance, but also with the business transacted at the show.

And in the way of eye-pleasingness, the show far surpasses the Chicago affair. The Garden, in the first place is smaller than the Coliseum and lends itself more readily to decoration. To all intents and purposes, the decorative scheme and the fixtures even to the flag top which hides from view the ugly ceiling beams are identical with the Coliseum exhibit; but the compactness of the show in the Garden quarters greatly aids the appearance of the ensemble.

In the matter of instruction, the display staged by the Cycle Trades Directorate and the booth maintained throughout the week by the Motorcycle and Allied Trades Association are noteworthy; likewise the dealer's co-operative exhibits which form part of the displays of both the Indian and the Harley-Davidson factories. In this connection also must be noted the dealers conventions that mark the progress of the week; the observer can see in the whole movement a concentrated effort on the part of the manufacturers to lend every possible aid to the dealer.

Of course the spectacular set features which characterized the Chicago exhibit have in most instances been transported to the Garden affair. In this line is included the two "polished chassis" models of the Excelsior, which are enclosed in glass cases and beautifully lighted in such a manner as to set them off to the best advantage, and the translucently finished Indian "lightwin," which is made to stand out in a most distinctive manner by being framed in a full gold frame, backed with black plush and suitably lighted.

A. B. Says.

"With the week not half over and the 'big doings' in the way of dealers' gatherings and conventions still ahead of us, the exhibitors are unanimous in the statement that the present Gotham Show eclipses every previous cycle show both from the standpoint of attractiveness and in the amount of business transacted on the floor.

"The attendance has been record breaking up to this point, with every indication of larger crowds to come as the week draws to a conclusion. Taken all in all, it must be conceded that it is without doubt the best ever."

Show Manager A. B. Coffman.

Cygnet Is Impressive

Along the same line also is the Cygnet "Limousine DeLuxe," which, transplanted from the Chicago Show, makes one of the most attractive show features on the Garden floor. The Cygnet exhibit has been augmented and been made even more spectacular than when first time out at Chicago by the addition of the latest Cygnet war model, which is finished up in characteristic military drab finish and which serves to hold the fixed attention of the passing multitude.

Adding considerably to the eye-pleasing qualities of the Cleveland booth, which, by the way, was one of the most spectacular at Chicago, and also serving to hold the attention and instruct the show visitor on the why's and wherefor's of the various Cleveland principles is a new set show piece embracing a complete Cleveland model in cutaway frame and arranged to be operated with an electric motor so that its working parts are fully exposed and made clear to the interested spectator.

The full nickel and copper finished Cleveland model, suitably lighted, and several Cleveland machines in "show dress enamels" also serve to brighten up the Cleveland booth.

The Reading-Standard folk added considerably to the spectacular side of their exhibit by mounting a full white enameled model on a suitable platform and so arranging the lighting as to throw first red, then green, then blue, and then white glows on the glittering surface of the highly polished machine. The booth is one of the most attractive on the show floor.

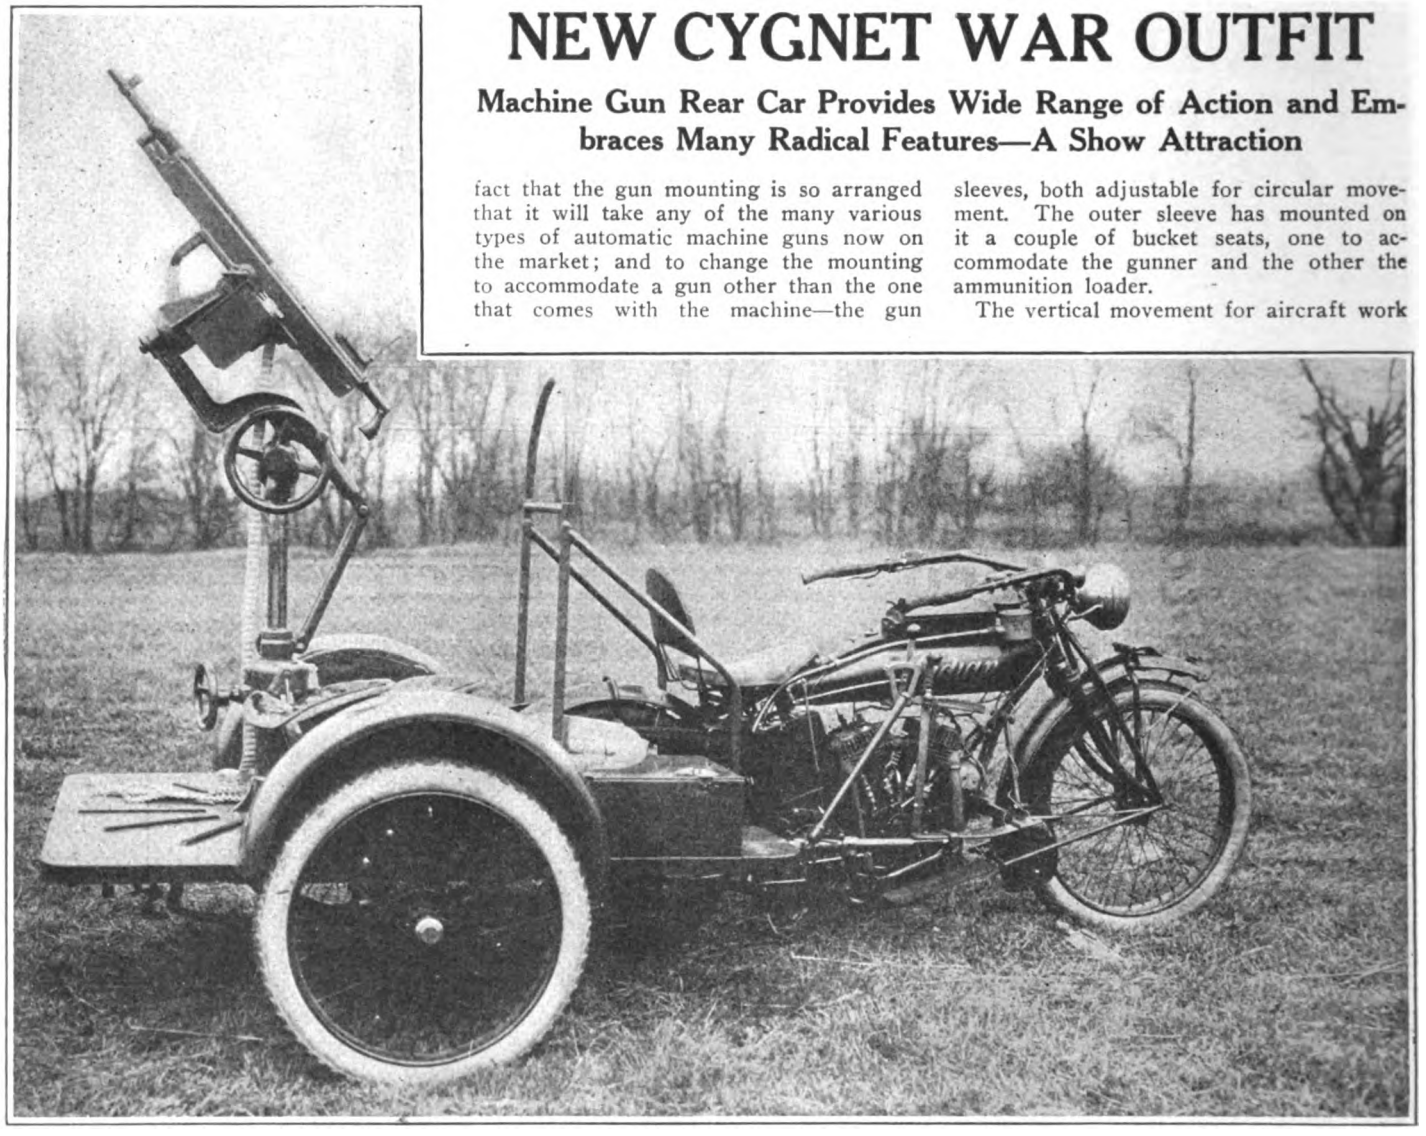
NEW CYGNET WAR OUTFIT

Machine Gun Rear Car Provides Wide Range of Action and Embraces Many Radical Features—A Show Attraction



Colt Automatic Gun on Cygnet Military Car Trained for High Angle Fire. Note General Construction of Carriage

IF enthusiasm ever was personified it was done in the grandest style at the booth of the Cygnet Rear Car when Leadley Ogden, general sales manager, took to demonstrating the new Cygnet war outfit.

The new Cygnet outfit arrived at the show fresh from a couple of months at the testing grounds of the Colt company at Hartford, where, according to Ogden, it not only had the unqualified approval of two officers high up in the United States Army, but was also thoroughly inspected and thoroughly tried out by representatives of foreign powers, at least two of which have adopted it for use across the sea.

Undoubtedly the big feature of the newest Cygnet outfit is the gun mounting, which is unqualifiedly a wonder for simplicity and mechanical ingenuity. Perhaps the biggest point in its favor is the fact that it not only makes possible a horizontal range of action embracing a complete circle, or 360 degrees, but it is also so designed that the gun can be elevated through a 45-degree arc for use against aircraft. In other words, its range of action embraces a full hemisphere, and the adjustment is so simple that the gun can be sighted instantly.

Quite in line with this great versatility afforded by the wide range of action is the fact that the gun mounting is so arranged that it will take any of the many various types of automatic machine guns now on the market; and to change the mounting to accommodate a gun other than the one that comes with the machine—the gun shown is a Colt automatic—takes only an instant.

By way of obtaining the necessary horizontal circular movements providing the varying adjustments, the main pillar of the gun mounting is made up of a main centrally mounted shaft, which carries the gun saddle itself, and two concentric sleeves, both adjustable for circular movement. The outer sleeve has mounted on it a couple of bucket seats, one to accommodate the gunner and the other the ammunition loader.

The vertical movement for aircraft work is obtained by a sort of toggle joint arrangement actuated by means of specially cut bevels and a worm; the adjustment is obtained by means of a hand wheel and the full range from the horizontal position to the vertical can be attained in half a minute.

EXCELSIOR SIDECAR MAKES ITS BOW

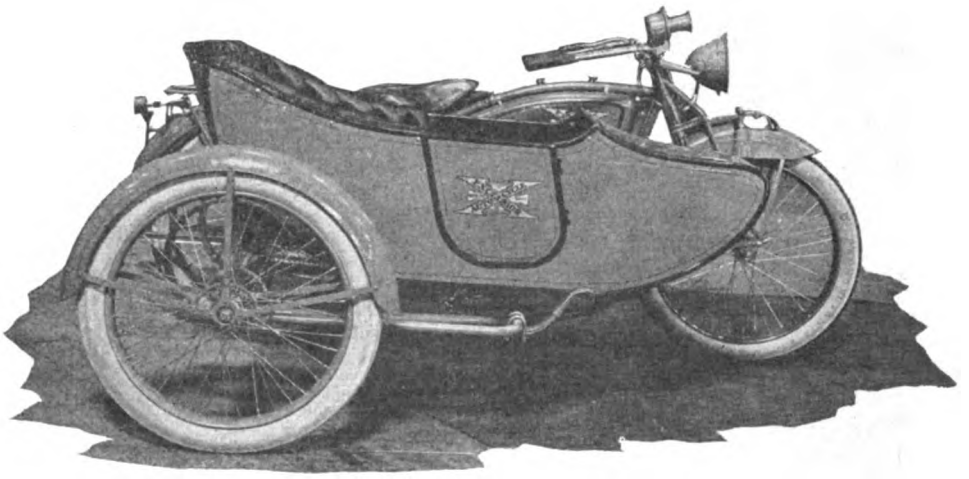
Latest Offering of Chicago Builder Has Novel Spring Arrangement Allowing of Controlled Movement Between Car and Motorcycle—Has Extension Axle

NEW YORK, Dec. 5.—Passengers and drivers of sidecar combinations, both present and prospective, centered about the south stand of the Excelsior Motor Mfg. & Supply Co. in the Garden to admire the latest product of that firm—a semi-flexible sidecar. This car, which makes its initial appearance at the New York show, is noticeable for its novel springing, not only of the frame but of the body itself. It also has an extension axle.

The chassis of the new Excelsior sidecar is of general rectangular form, but the cross members terminate at the left side in a hinge joint. The male portions of these joints are formed on short members which fit within the fixed sidecar lugs on the Excelsior motorcycle. There are two of these hinge joints, these serving for the main connection of the chassis to the machine.

The intermediate connection running from below the seat post cluster to the left-hand longitudinal member of the frame, is by means of a two-leaf spring formed to a given curve. The butt of the spring attaches to the frame as mentioned above while the end is affixed to the chassis.

The curved spring not only acts as an auxiliary connection for the sidecar but also controls the vertical motion of the car with relation to the motorcycle. On passing over irregularities in the road, the sidecar chassis rises under control of the spring without transmitting torsion strains to the motorcycle. Riding is thus made easier for the driver and passenger than when a rigid set of connections are used, the Excelsior people state.



The New Excelsior Sidecar. Note Novel Front Spring and Neat Lines of Body

The body is suspended by C-springs at the rear as in recognized sidecar practice. At the front, however, S-form springs are used. One end of each of these springs is scrolled around the cross-bar near the front of the body, while the other end is clipped below a cross-member on the chassis.

The Excelsior sidecar has an extension axle, giving a range of tread up to 60 inches. The axle is readily extended or telescoped. The mudguard is carried on a rod forward of the axle, so that the guard and wheel are always in the proper relation to one another. Strong guard braces are fitted.

The sidecar is built along pleasing and comfortable lines and is well upholstered. A folding footrail is fitted within. The finish is Excelsior military drab, similar to that of the Series 18 model of mtorcycle. The price is given as $80 complete.

LIGHT TWIN PRICE INCREASED

Fire in Steel Works Destroys Indian Patterns and Prevents Filling of Contract—New List Quotation Is $180

SPRINGFIELD, Mass.—Owing to an unavoidable accident, which not only prevented the fulfillment of a vital contract for raw material but which necessitated the hurried replacement of expensive tools and patterns, the Hendee Mfg. Co., has been compelled to increase the price on the Indian Light Twin to $180. The original price was $165.

The catastrophe which caused this change in price was the burning of a steel plant where important contracts had been placed for material for the Light Twin. But the fire did not only prevent the shipment of the raw material; it also destroyed the Hendee Mfg. Co.'s patterns and gauges. It cut off the source of supply and the firm was forced to go into the open market and purchase steel at the prevailing high prices.

The company was likewise obliged to replace the costly tools and patterns and to double the number of men employed in this branch of work to overcome the series of delays resulting from the fire.

The time the fire occurred was decidedly inopportune. It is at this time that riders are especially anxious to see the new machine. Being an entirely new type of American motorcycle, much interest has been aroused in it and the fire that delayed its appearance has kept many riders in a state of suspense for what seems a remarkably long time.

Although the task was far from easy, the company bent every effort to replace the material destroyed, and finally did so. But it was necessary to make the increase in the list price of the product, as a result of the loss.

The production of Light Twins is now being rushed as rapidly as possible and with ample material at hand, the already heavy demand will shortly be supplied.

(EDITOR'S NOTE.—The plant referred to was that of the Whiteley Steel Co., in Muncie, Ind., which suffered heavily from fire recently.)

SULLIVAN BACK AGAIN

Man Who Made First Splitdorf Plug Rejoins the Newark Concern

MAURICE P. SULLIVAN is back with the Splitdorf, it was learned at the show. Sullivan will be remembered by the old timers as the man who built the first Splitdorf spark plug, and he has again joined the forces of the Splitdorf Electrical Co. for the purpose of working up new lines and improving upon existing models of the Splitdorf plug.

Sullivan first became identified with the Splitdorf folk some twelve years ago, and was in their employ for eight years. Four years ago he broke away and in the interim has been identified as sales and production manager with the Benton Manufacturing Co.

His come-back to the Splitdorf augurs the coming of some real new ideas in Splitdorf plug design and Sullivan makes bold to promise them before the next riding season is in full swing.

VARIED NEW DEPARTURE EXHIBIT

EMPHASIZING the firm's co-operation with the cycle dealer are several prominent exhibits at the stand of the New Departure Manufacturing Company, of Bristol, Conn. Among these is a series of animated advertising lantern slides which throw on a small screen the features of the New Departure bicycle boosting campaign, among other things. C. F. Olin, advertising manager; De Witt Page and M. J. Horton oversee things at this stand.

Portfolios showing posters, window displays and other advertising matter are conveniently arranged on tables at the front of the stand, while a large facsimile of the factory in Bristol is in a frame in the background. There are albums of photographs depicting the universal use of the bicycle. Samples of the firm's products are likewise on view.

NEW SPLITDORF LIGHTING SYSTEM

It's for Both Bicycles and Motorcycles, and Is a Wonder for Simplicity—Sells for $6.50 and Promised for Spring Delivery

THE show visitor who came on Monday to see what was new in motorcycle and bicycle fitments missed a bet, for early on Tuesday morning, quite unexpectedly, there appeared in the Splitdorf booth a new and novel, not to say radical, dynamo electric lighting system, which holds more than passing interest for cycle trade folk.

The Splitdorf idea of the ideal electric lighting outfit embraces a very simple, compact and light motorcycle dynamo, friction driven from the front wheel of the machine. Built in unit form with the dynamo is the lamp itself, which comprises simply a parabolic reflector and a receptacle for a two-candle power bulb.

Fits Any Machine

The system is arranged for attachment to any cycle by means of a bracket, which attaches by clamps to the left fork side, and it is so arranged that the lamp can be swung so that the friction wheel is out of contact with the tire and locked in this off position when the light is not in use.

The dynamo itself is novel in many respects. As a matter of course, it is of the magneto-generator type, but by virtue of peculiarly-shaped permanent magnets, not only is a large current produced at comparatively low armature speeds, but at higher speeds, owing to magnetic distortion this current value is held practically constant.

This inherent control, due to the peculiar shape of the magnets, holds the light perfectly steady throughout a range of speed of from four miles to 15 miles an hour; and it is stated that the machine has been run at a rate corresponding to 40 miles an hour without causing the bulb to burn out.

Needs No Oiling

The armature is mounted on a vertical shaft and runs on ball bearings. The bearings, by the way, are packed with grease and do not require the slightest attention from the rider throughout the life of the machine. There are no brushes or commutator or slip rings to get out of order.

The lower end of the armature shaft carries the friction wheel which bears against the side of the tire. The tension has been so arranged that the wear induced by this drive is practically negligible. In proof of this it is pointed out that the experimental model was driven at the rate of eight miles an hour on a bicycle for over 1,200 miles without the tire showing the slightest bit of wear due to the friction wheel.

Bulb Revolves

The use of brushes and a commutator or slip ring is done away with by mounting the bulb receptacle on the top of armature shaft so that the receptacle and bulb rotates with the armature. By this means the full circuit is contained in the armature unit. This construction is beneficial in another way, for the revolving fillament spreads under the centrifugal action, and being slightly out of focus in the parabolic reflector, the intensity of the light is considerably increased. As a matter of fact, in the light giving qualities the two candlepower bulb is said to closely approximate a ten candlepower lamp in lighting efficiency.

P. E. Gilling, of the Sumpter Electric Co., is on hand to explain the inner workings of this latest Splitdorf offering, and he makes plain that things are so arranged at the Sumpter plant as to make possible deliveries by February 1, next. The outfit will sell for $6.50.

Also at the Splitdorf booth were Dan R. Walls, advertising manager; H. W. Scholl, M. E. Toepel, Jack Neis and M. J. Sullivan.

ARMY COURIERS ARRIVE FROM McALLEN

Dresser and Edwards Finish 2,895 Miles on Military Trip From Texas Camp to Albany with Message for Governor Whitman

NEW YORK, Dec. 6.—With 2,895 miles (and most of them heart-breakers) showing on their speedometer, Dan LeR. Dresser and Harvey Edwards, the army dispatch riders, arrived in New York at 7 o'clock this evening on their way from Camp McAllen, Texas, to Albany, with a message from Major General O'Ryan, of the New York National Guard, to Governor Whitman. The military couriers will go on to Albany to-night with their Harley-Davidson sidecar combination and present the message to Governor Whitman tomorrow morning, thus completing successfully the longest and most severe test ever made of a motorcycle outfit in this country under army auspices.

Dresser and Edwards pulled out of Camp McAllen at 12:01 A. M. on November 22, carrying their full field kits, and almost at once struck bad roads. They followed twelve hours behind a storm all the way to Zanesville, O., and there they caught up with the deluge. As a result they had muddy roads nearly all the way, with a thorough soaking to top matters off at Zanesville. It was at the Zanesville stop, by the way, that the motorcycle couriers spent their first night in a hotel during the trip. They drove night and day, in six-hour shifts, the "off" rider sleeping in the sidecar.

On arriving in New York the riders went at once to Madison Square Garden, where they were given a warm welcome by the show crowds. Both Dresser and Edwards are in good condition, save for slight colds. They had no mechanical trouble with their Harley-Davidson, which is a 1917 stock model, and the sidecar did not bother them except while they were traversing ruts 24 inches deep in Texas.

SHOEMAKER SHIFTS TO MERKEL

Graton & Knight Sales Representative Becomes Treasurer and Salesmanager of Flushing Concern

W. WALTER SHOEMAKER has severed his connection with the Graton & Knight Mfg. Co. of Worcester to take up the duties of treasurer and salesmanager with the Merkel Motor Wheel Co., which has just entered the field with motor attachment for bicycles.

Shoemaker is, perhaps, one of the best known men in the cycle trades. He has been identified with the Graton & Knight company for close on to ten years in the capacity of special representatives for their automobile and cycle offerings; before that time he held a similar post with another belting concern.

Shoemaker's intimate acquaintance with trade conditions, coupled with a broad selling experience and an acquaintance that includes just about everyone in the cycle field, fit him ideally for his new duties, His association with Joe Merkel in his newest venture is looked on by trade folks in the know as an ideal combination.

W. Walter Shoemaker

NEW WEED BACKREST

Model P Made Up Specially to Fit Persons Saddle

SENSING a demand for a back rest adaptable to the Persons saddle, which is supplied on the Henderson motorcycle, the Reeps Mfg. Co. has added a new model P. Weed folding back rest to its line.

The new model is to all intents and purposes identical with the model offered for the first time at the Chicago Show, which, however, was made up to fit only the Mesinger and Troxel saddles. The model P is fully adjustable and attaches to the under side of the saddle without marring the top with clamps or other fittings. The back rest is upholstered in black to match the Persons Henderson model and lists at $4.50.

At the Reeps booth are C. S. Shuman, sales manager; H. N. Speer, production man; B. J. Aplin and Frank Albert. The quartet is tickled to death with the amount of business that has been done up to Wednesday evening.

POINT OUT OKAY FEATURES

G. K. FISHER, secretary and treasurer of the Okay Motor Mfg. Co., of Brooklyn, assists President Lee S. Woodruff, in pointing out the new features which have been adopted on the little bicycle motor attachment since the Chicago exhibit.

The motor has now reached its final form and they are pushing the work of tooling up the factory for the manufacture of the machines on a comparatively large scale. According to the present outlook they will be making deliveries at the rate of from ten to fifteen motors a day after January 1.

BARWISE GLITTERS FOR DIAMOND

R. M. BARWISE held the Diamond Chain fort up until Wednesday evening, when L. M. Wainwright came to town and divided his time between the booth and the many cycle trades meetings which marked the week.

There is nothing new at the Diamond booth with the exception of new business, which, according to Barwise, is coming in in great chunks.

FULL LINE FROM CITY SUPPLY

A comprehensive line of Hudson bicycles and a representative showing from its full line of parts and accessories for both motorcycles and bicycles is shown by the City Supply Co. of New York.

The City Supply booth is in charge of J. S. Barnett who is assisted by C. F. Brooks, L. R. Korn, David Gottleib, Wm. Strom, Ben. Gottleib and F. J. Schultheis.

PERLMAN BOOTH DEALERS' MECCA

IT is Harry Perlman himself who points with evident pride to the full line of "Perl," Hudson and Mohawk bicycles and comprehensive display of both bicycle and motorcycle parts and fitments that adorn the booth of the Perlman Cycle and Auto Supply Co., 34 Warren street, New York.

Perlman says that the booth has been a regular "mecca" for both bicycle and motorcycle dealers from all sections of the country throughout the week and that the business transacted on the show floor has been far and away beyond expectations.

Assisting Perlman are: Nathan Evans, Charles Zehner and J. J. Lehr.

COMPREHENSIVE COLONIAL LINE

JUST about everything there is in the way of cycle fitments, together with a full line of bicycles, is shown by the Colonial Rubber Specialties Co., of 35 Warren street, New York. George Westgat is in charge of the booth, assisted by B. M. Port and Adolph Weiner.

Quite a touch of interest is added to the exhibit by an educational display showing the construction of the Colonial tires from the raw material through each process to the finished product. The tire line, by the way, embraces many new styles with exclusive tread designs and a variety of colors.

PROGRESSIVE'S NEW BICYCLE

PERHAPS the lightest bicycle at the show, and a new one, too, made its bow at the booth of the Progressive Cycle & Auto Supply Co., of New York. It is a B. S. A. racing model and tips the scales at 18 pounds 2 ounces; finished in either copper or nickel it lists at $75.

Those at the Progressive booth where a full line of Miami-made bicycles are on display are: Elias Pitzell, M. Braun, A. Scaisson, W. R. Kay, Chas. Moskowitz, and C. Knatz.

AGAIN THE ATHERTON CONTEST

W. F. EMERSON, Frank Chase, J. F. McKenneth, Bob Lawson and W. H. Kittle are urging both youngsters and the older folks to spin the wheels in the Atherton guessing contest at the booth of the Buffalo Metal Goods Co.

Scarcely less attractive than the contest itself are the apples, pennants, pencil clips and other little souvenirs which the Atherton boys are handing out, and the booth is crowded from morning till night.

CARRY OUT DUTCH IDEA

FELIX VAN CLEEF, connected with the sales end of the Dutch brand products, ably assisted by Charles Kollman, eastern missionary, and now famous Dutch girl, does the honors at the Van Cleef booth.

While the exhibit is not gotten up in such elaborate style as at the Chicago Show the Dutch idea is carried throughout in the color scheme and decorative arrangement. And, of course, the little Dutch Miss is handing out characteristic Van Cleef souvenirs—a novel whistle and a snapper.

BROWN THE KOKOMO SENTINEL

FRANK BROWN is a lone sentinel at the booth of the Kokomo Rubber Co., of Kokomo, Ind. Brown, between writing orders, is busily engaged pointing out features of the three new bicycle tires which have come to make the Kokomo line more nearly complete. The tires are Sticktight, with a suction tread; the Pioneer, with a studded tread, and the Utility, with a red dot tread. The complete Kokomo line embraces ten different tires.

NOVEL TIRE SEALER

Cat-Nak Mfg. Co. Offers Vegetable Compound for All Tires

SOMETHING new in the way of a puncture sealing compound for use either in single or double tube bicycle tires and for both automobile and motorcycle tires appeared at the booth of the Cat-Nak Mfg. Co., 1007 Irving Park Boulevard, Chicago.

Cat-Nak is described as a vegetable compound comprising a liquid in which material of a fibrous nature is held in suspension. It is injected into the tires and remains in a liquid state. When a puncture occurs, the fibres tend to retard the flow of air through the opening until the liquid gets in its good work and permanently seals the orifice. It is claimed that the escaping air forces the liquid into the hole where it forms something akin to a plug preventing further loss of air.

Among the claims made for the substance is that it will neither dry in the tire nor rot the rubber or fabric; that it is not sticky and is consequently cleanly to handle and will not gum up the tire valve and moreover it is absolutely unaffected by either heat or moisture.

The substance, which has been well introduced on the coast during the past two years, is put up in three sizes in collapsible tubes. The smallest size, for bicycle tires, retails for 25 cents; the motorcycle size at 75 cents and the auto size at $1.25.

A. J. Pearce from the factory points out the merits of the compound as well as the method of use to the interested show visitors and awes them greatly by jabbing nails and picks into Cat-Nak treated tires fully inflated, without affecting the air pressure within.

NEW CYGNET WAR OUTFIT

(Continued from page 12)

Carried beneath the outfit is a tripod, which is so designed that it can be carried readily on a man's shoulders. This is used when the gun is demounted which, by the way, is accomplished simply by loosening one hand screw and lifting the gun from its saddle. Ogden points out that it is perfectly possible for the gunner to mount the machine gun on this tripod and carry the whole business on his shoulders to a favorable position and simply step from under it and operate the gun from this separable tripod.

Provision is made for carrying some 4,000 rounds of ammunition by means of two armored boxes positioned at either side of the outfit, and a measure of protection is afforded for the tires and wheels by specially constructed mud guards, which are said to be quite bullet proof. The regular Cygnet hand-operated brake is provided, convenient for the driver or gun crew.

The outfit tips the scales at slightly under 500 pounds without the ammunition boxes filled and without the weight of the gun operators included. Ready for action with the operators in place, the weight is brought up to very nearly 1,000 pounds, which fact, however, in the tests which have just been completed did not prevent the outfit from attaining a speed of 50 miles an hour in road work and 35 miles an hour across the sod.

Where the Trade Folk Congregate

IT developed at the show that Frank Albert, who was formerly connected with the Schickel Motor, of Stamford, Conn., has joined the sales staff of the Reeps Mfg. Co., maker of Weed folding back rests and mechanical warning signals.

Albert is an ex-champion bicycle rider and says that in his former six-day bicycle races he has put in more time in the Garden than any other man on the show floor. He has just returned from a trip from the Middle West for the Reeps company.

SALES MANAGER C. B. O'HARE, of the Thor was enthusiastic in telling booth visitors of the success the Thor service model 17 Y is meeting with in commercial use. The latest of the large orders from public service corporations to reach the Thor factory was from the East Ohio Gas Co., of Cleveland, which recently took ten of these Thor "Supersingle" models, which brings their "fleet" of Thors up to 49.

This repeat order came as a direct result of the success the Cleveland gas folks have met with in the employment of the Thor machine.

E. M. JACKSON, J. A. Priest and J. B. McNaughton from the Indian factory, and George Miner, who handles the Hendee-made machines in Rochester, got into New York from the factory just before the show opened. The first thing the Wigwam gathering did on reaching the Garden was to take in the Indian exhibit and the next to make a tour of the show.

W. F. EMERSON, Frank Chase, J. F. McKenneth and J. H. Kittel, of the Buffalo Metal Goods Co., and W. J. Schack, of the Emblem, formed a little delegation from Buffalo which arrived in New York on Monday morning. The Atherton boys immediately went to the Garden and began to set up the cyclometer bicycles for the Atherton guessing contest, which, having been tried out in Chicago and been found highly successful, has been retained as a New York Show feature.

THE Windy City and Milwaukee trade folk came in on the Chicago show special, which arrived in New York 5.30 on Sunday night. The party included Walter Davidson, Arthur Davidson and Hal. Miller from the Harley-Davidson plant; C. B. O'Hare and C. A. Wells of the Thor; Carey G. Wirick of the Chainolene Mfg. Co.; Frank Schwinn of the Excelsior; H. N. Kirk of the Edwards-Crist Mfg. Co.; Alden B. Perrin and W. H. Parsons of *Motorcycling and Bicycling*.

LONG before the show was formally opened, O. A. Adams, of the Cyclemotor, recorded the first sale of the week. It was made to the Bridgeport Cycle & Supply Co., which took five of the little Cyclemotor outfits for immediate shipment.

AFTER two requests, one from the show manager, and the other from the police sergeants at the Safety First booth, Leadley Ogden, general manager of the Cygnet Rear Car Co., moved the new Cygnet rear outfit from its place in the Cygnet booth to a more favorable one right at the entrance of the Garden. In its new position the outfit made a most attractive show feature and claimed the attention of incoming spectators immediately.

IRVING BECK, of the Rogers Sidecar, had signed up so many orders before the show was actually opened that he wired to Chicago for a full carload of the new Rogers models for shipment this week, and a second to follow within the next ten days. Rogers prospects in the East, according to Beck, are brighter than ever before. The new "taylor-made" model is striking a strong appeal to the dealers and riders throughout Beck's territory, and promises big business days to come.

PERCY PIERCE, president, and Fred Brown, vice-president and salesmanager of the Pierce Cycle Co., Buffalo, blew in on Tuesday and made their headquarters with Baker, Murray & Imbrie, Inc., the Metropolitan Pierce distributors.

The call for Pierce bicycles from all parts of the country is so insistent, says Brown, especially for the new Boy's Racer and Kramer Racer models, that it keeps the factory folk busy hustling to get sufficient materials to keep ahead of the orders. With the materials situation cleared up, Brown says it looks like the bigest Pierce year is ahead of them.

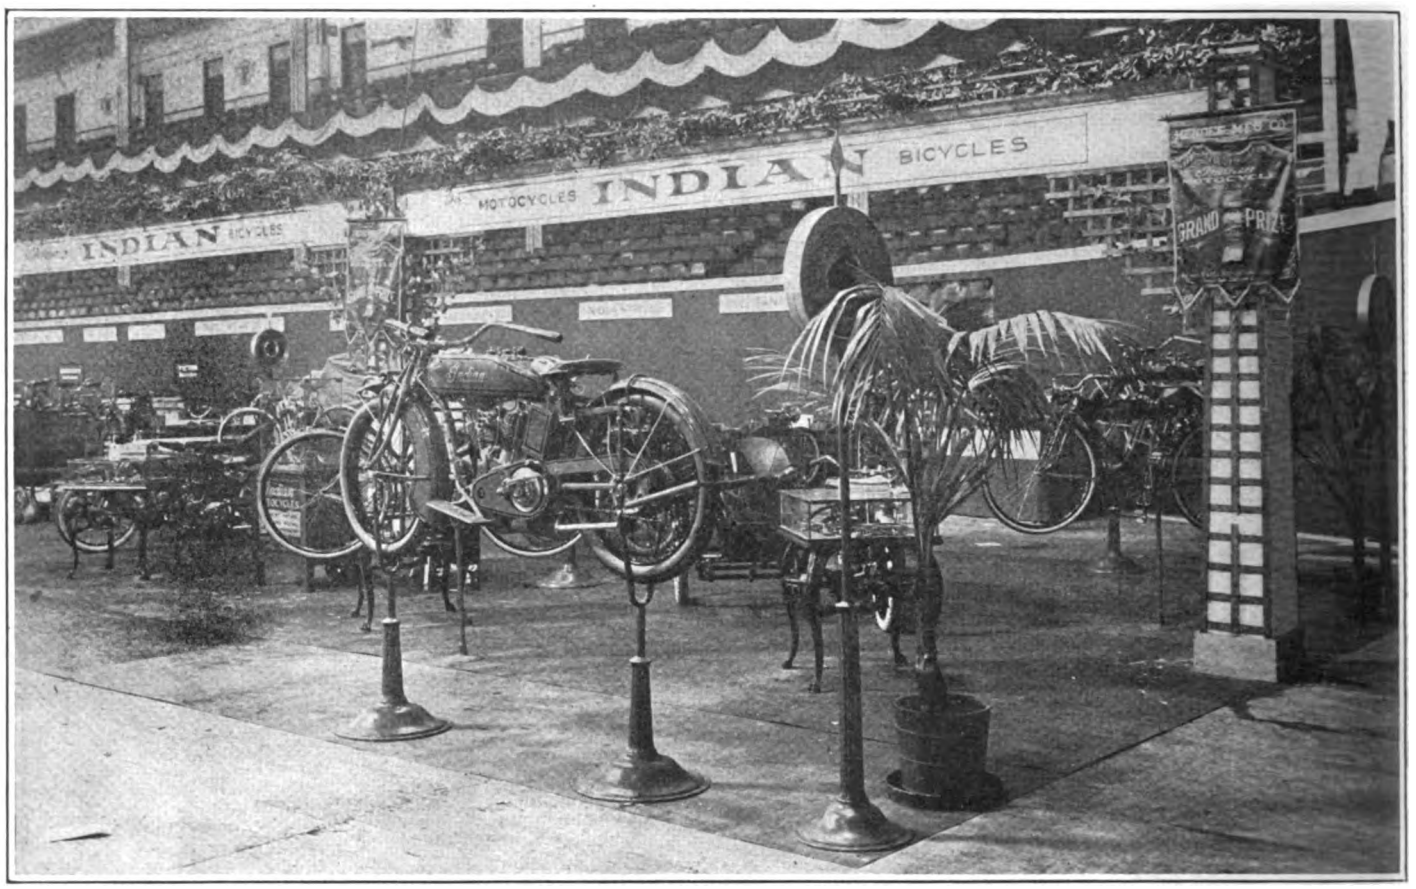
COMPREHENSIVE DISPLAY OF INDIANS BEARING THE 1917 NAMEPLATE



INDIAN devotees, present and prospective, are given a cordial greeting by the big crowd from the factory of the Hendee Manufacturing Company, and to say that the stand, or rather the stands, were crowded is putting it mildly.

Heading the Wigwam forces is General Manager F. J. Weschler, assisted by Advertising Manager J. A. Priest, Chief Engineer Oscar Hedstrom, J. McNaughton, of the Dealers' Aid Department, J. H. O'Brien, of the Parts Department, Carl Gustafson, of the Engineering Department, and Special Representative George Sherman. Messrs. Hal Noyes, McDowell, Sidell, Atwood, Snyder, Wilson, Bernard and Armstrong are efficient aides at the exhibit.

At the main Indian stand are displayed seven Powerplus models. One of these is finished in olive drab and to it is attached a Colt machine gune on the regular Indian gun chassis. An olive drab sidecar combination and one in red complete the passenger outfits in the exhibit, while the solo mounts include two electrically-equipped Powerplus machines in red and others in both colors. The Lightwin finished in translucent red and blue, and set in its gold frame, is one of the chief centers of attention of the Show.

The Dealers' Aid Department, presided over by McNaughton, across the aisle, is the focus of all trade men of Indian affiliation.

ANOTHER HARD-WORKING SQUAD

HEADED by Sales Manager Fred Mathis, a picked staff representing the chief departments of the Excelsior Motor Mfg. & Supply Company's organization is busy at the Show explaining the various details of the Series 18 Excelsiors. With the new semi-flexible sidecar also on display, at the south stand, and surrounded by eager crowds, it is necessary to work in shifts, so numerous are the questions. Assisting Mr. Mathis from the Chicago factory are Vice-President Frank Schwinn, Traveler Irving Barnard and Stanley Kellogg, Eastern distributor, among others.

The Excelsior exhibit includes, in addition to the new sidecar, a nickeled twin three-speed and another all in white. There are two three-speed Series 18 machines in Excelsior military coat, both being electrically-equipped. The little two-stroke lightweight is also on view.

Fred Shull, representing The Teagle Company, maker of Midco generators, is present to explain the details of this lighting and ignition system to all comers.

STRONG POPE AGGREGATION

FOLLOWING the Pope custom of having thorough representation at all shows, the Westfield Manufacturing Company has gathered a goodly aggregation from its main departments to take care of Show visitors.

Headed by President W. C. Walker and Vice-President C. E. Wilbur, the list includes Messrs. Scott McLanahan and O. J. Thoman, of the Board of Directors; Manager J. P. Fogarty and Factory Manager F. E. Baldwin.

Sales Manager L. D. Harden, Publicity Manager W. K. Porzer, Assistant Sales Manager F. L. Merrill and P. L. Montgomery are there, with the following members of the sales staff: B. A. Edgar, D. G. Ryan, C. A. Leander and D. L. Marshall.

Centers of attraction in the motorcycle section of the Westfield stand are the sectioned single and twin motors, the cut-away gearset and a three-speed twin sidecar combination. A twin with single gear, a three-speed twin electric and the belt-drive Pope lightweight, Model H-17, are drawing their meed of attention also.

DOEHLER A SHOW NEWCOMER

THE exhibit of the Doehler Die Casting Co., of New York, is interesting principally because it is one of the few exhibits at the New York show which was not staged at Chicago.

The booth is in charge of A. J. Erslew, sales engineer, and he is assisted by H. D. Griffin, sales manager, J. Honig, advertising manager, and O. E. Wertheim, the Connecticut representative.

A full line of die castings in aluminum, tin, white metal and brass, being intended primarily for use on magnetos and other motor paraphernalia is on view. One of the most interesting items on the Doehler lists is the die cast crank case which this company manufacturers for the Cyclemotor Corp.

ROTHOLZ AT SHOW

GUS ROTHOLZ, the veteran metropolitan dealer, divided his time between the Indian and Excelsior stands and greeted old friends in the trade and among riders. Rotholz is doing well in his big place at 1691 Park avenue, where he has a gasoline and oil installation handy for his customers.

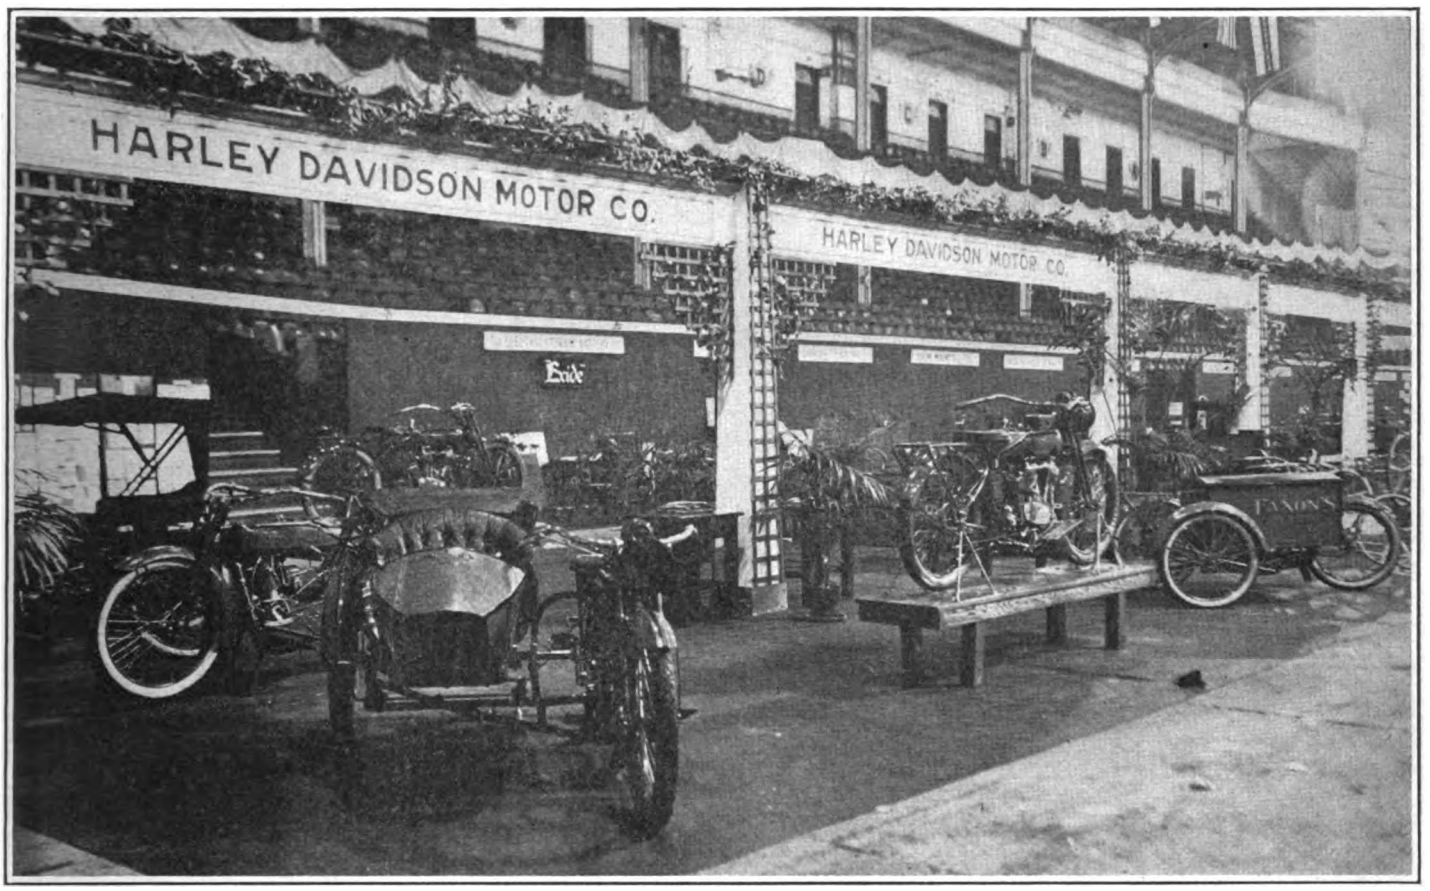
OLIVE DRAB HARLEY-DAVIDSONS IN THE USUAL VARIETY OF TYPES



An attraction at the New York Show stand of the Harley-Davidson Motor Company, in addition to the fine array of motorcycles and parts, is a series of departmental and dealers' system wall exhibits. These show the prospect, and the dealer-to-be, just how the "wheels go around," and how systematically the dealer is taken care of. On hand to explain matters are Assistant Sales Manager E. J. Mueller, Arthur Herrington, T. A. Miller and Fred Stierhoff.

The whole exhibit is under the supervision of President Walter Davidson and Sales Manager Arthur Davidson. Jes Campbell, of the New England branch, is also on hand, making himself useful as usual in various capacities. The exhibit consists of three-speed, solo, twin, regular and electrically-equipped models, a single-cylinder direct-drive machine, an army van for the Aviation Corps and a sidecar outfit, complete with top, luggage-rack and tire-holder. Drop-forging boards and a full set of tools are also on view.

THE THOR ATTRACTIONS

ACTIVE at the space where Thor motorcycles are displayed is a well-known trio consisting of Sales Manager C. B. O'Hare, J. D. Hurley and C. A. Wells, assisted by William R. Spear, of the Eastern territory.

A striking feature of the exhibit of the Aurora Automatic Machinery Company, the Thor makers, is an electric sign depicting a Japanese scene and bearing the company's trade mark. Flashed at intervals behind this sign are different colored lights, the effect being most pleasing.

The machine exhibit consists of a 15-horsepower twin, Model 17-A with electrical equipment, a 17-U twin with regular equipment, a 17-V or 6 horsepower twin, a single-cylinder Model 17-Y, and a sidecar combination using a 17-U motor of 12 horsepower. A cut-away unit consisting of the gearset and clutch is also on view, and well illustrates the working of these parts.

COMPREHENSIVE DAYTON LINEUP

PROMINENT in the center aisle is the stand of the Davis Sewing Machine Company, with Sales Manager Horace M. Huffman in charge. Here the Dayton Motor Bicycle and several models of the Dayton motorcycle are shown, as well as the full line of Yale and Dayton bicycles.

In active assistance to Mr. Huffman are "Bob" Larsh, traveler for the Middle West and a particularly live wire among the Dayton roadmen. W. A. Harland, the Eastern representative, is likewise on the job, as are many retailers from the East. President Huffman is expected later in the week.

Dayton motorcycles fitted with De Luxe and Dayton high-speed motors are on view, as well as two models of the Motor Bicycle, one being fitted with the well-known compensator in the transmission, while the other is fitted with a multiple disc friction clutch, shown first at Chicago.

EXIDE IS A SERVICE DISPLAY

T. J. FITZGERALD, secretary of the New York branch of the Electric Storage Battery Co., does the honors at the Exide battery booth. The Exide exhibit comprises complete storage battery models and also cutaway models showing the various features that enter in the construction of the battery. Fitzgerald is kept busy pointing out the "whys and wherefores" of battery care to both riders and dealers.

As an aid in this line of work the Exide folk have gotten out a little booklet entitled "The Story of the Storage Battery," done up in a characteristic style, which tells the full story of battery operation and battery care in 15 pages of text.

CHARACTERISTIC VIM DISPLAY

L. KRONSON and S. D. Green, both of the sales staff of the Vim Cycle Hardware Co., Buffalo, held the Vim fort on Monday night.

John Henry was too busy jubilating over the arrival of "John Henry, Jr.," to get to the show before Tuesday.

The high spots of the replete Vim cycle line, including both Vim and De Luxe bicycles, Vim tires, parts and accessories, makes up an attractive display which is attracting more than passing notice.

COMPLETE SOLAR LINE

THE full line of Solar electric and acetylene motorcycle and bicycle lamps, as well as a complete Solar lighting equipment as used on the Harley-Davidson are to be found at the booth of the Badger Brass Mfg. Company, of Kenosha, Wis. Manager Harry G. Haft, of the New York branch, is in charge of this exhibit.

Assisting Mr. Haft are C. E. Hammond and George Barth, as well as G. H. Schuler. Solar lamps are now so packed as to be shipped by parcels post. The Solar gas cycle lamp is fitted with green and red jewels on the proper sides for traffic riding.

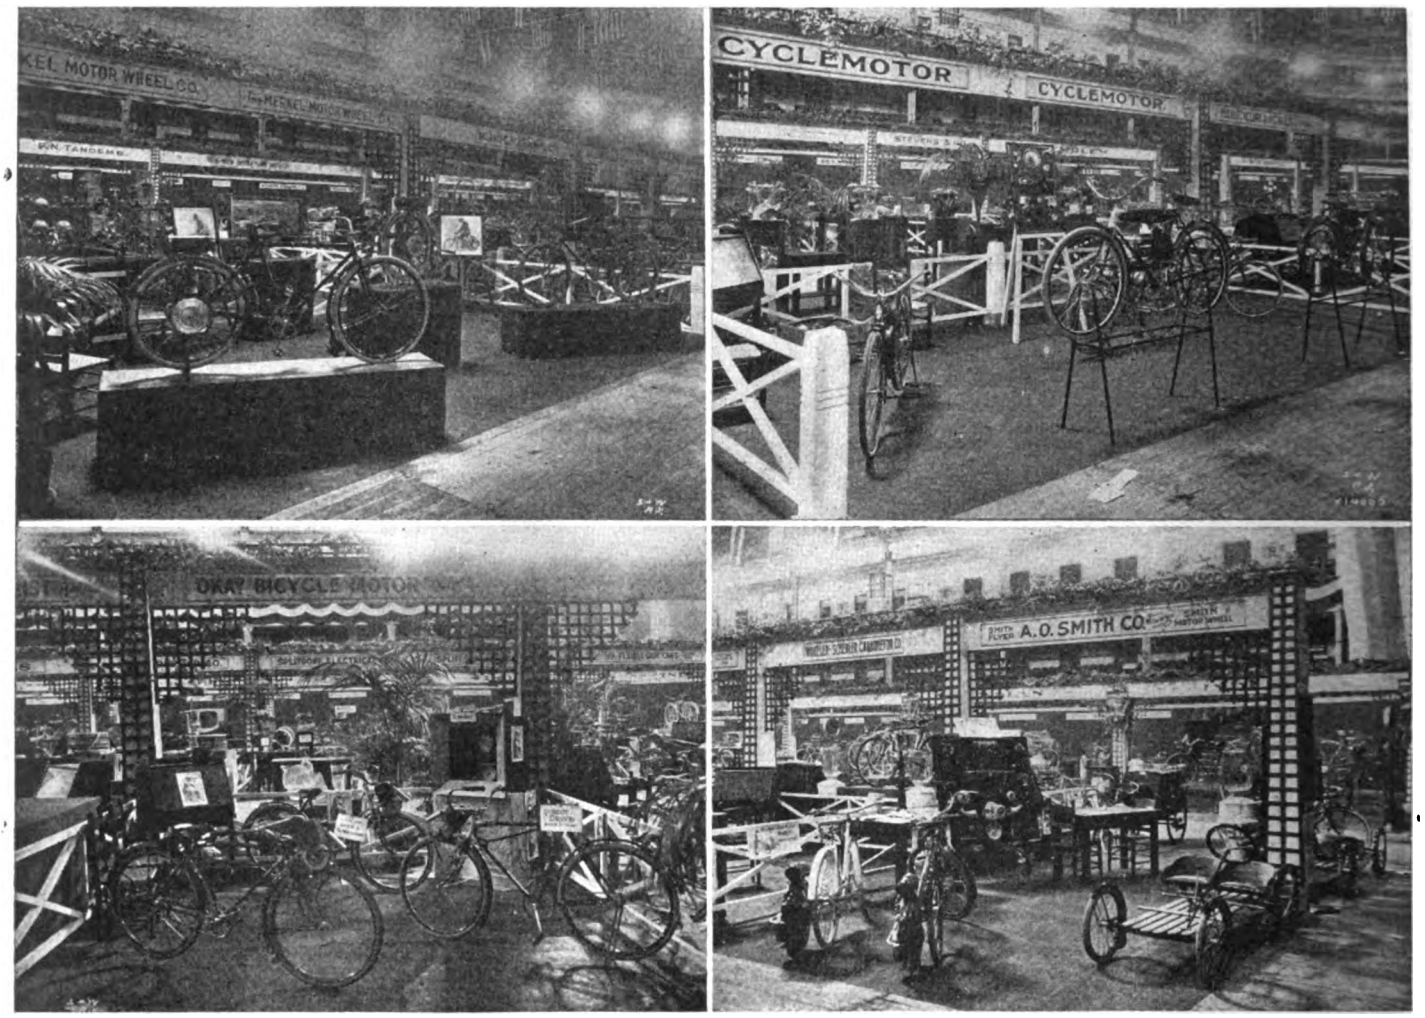
THE BICYCLE MOTOR ATTACHMENT IN ITS FOUR SEPARATE PHASES



Upper Left, the Merkel Motor Wheel, Which Makes Its Debut in the Garden; Right, The Cyclemotor, Shown with Single and Double Tanks; Lower Left, Okay Bicycle Motor, Driving the Front Wheel; Right, Smith Motor Wheels and the Smith Flyer

MANY CHANGES IN OKAY MOTOR

Bicycle Motor Attachment Appears at New York Show with Aluminum Cylinder and Other Changes

WHILE with only a couple of weeks intervening between the Chicago and New York shows, not much in the way of newness could be expected, Lee S. Woodruff, of the OKay Motor, displayed his little motor attachment for bicycles changed in many little details from the way it made its bow at Chicago.

The biggest change, and one which is radical in motorcycle practice, embraces the use of an aluminum cylinder fitted with a steel sleeve. According to Woodruff, this design makes for greatly reduced weight and for better cooling, while at the same time none of the beneficial features of the heavier iron are dispensed with.

Other OKay improvements since the Chicago show are the fitment of a strap which holds the gasoline tank firmly to the cylinder of the machine so that it cannot possibly rattle or shake; and the fitment of a dripshelf to the mixing valve, whereby such fuel as leaks out in starting when the motor is cold is caught and used to enrich the mixture, thus facilitate starting.

Another of the biggest changes has to do with the attachment bracket. Instead of supplying a single universal bracket to fit all forks as was originally intended, Woodruff has designed two brackets, one to take the ordinary plain type of bicycle fork, and the second which is used in connection with the braced forks. Either type can be had on specification.

The control design has been somewhat simplified, although in its main principles it remains unaltered. Woodruff points out that his organization is at present busily engaged tuning up its plant in Brooklyn, and that once that big task is accomplished he will be in a position to turn out from ten to fifteen of the little motors a day. He expects before the first of the coming year that the factory will be running on this basis.

A. O. SMITH ATTRACTIONS

SMITH MOTOR WHEELS and their applications to various means of transportation are being explained by Sales Manager J. A. Benson, Service Manager A. H. Beckman and W. E. Wolgast, special representative, at the stand of the A. O. Smith Corp., of Milwaukee, Wis. In addition to a comprehensive line of Motor Wheels, there are photographs of the little boosters driving railway inspection cars and the like.

The display consists of three different makes of bicycles fitted with the Smith Motor Wheel, two of the American Flyers similarly powered and a Worksman van, the latter a special adaptation of the motor wheel to a three-wheeled delivery vehicle with rear box. The composition of the Smith Motor Wheel is seen in a sectioned powerplant, which is prominently placed.

BUSY PAIR AT MERKEL STAND

CROWDS gathered at the stand of the Merkel Motor Wheel Company, of Flushing, N. Y., to see the latest in bicycle propelling outfits, and Joseph Merkel himself was right on the job to tell them all about it. So was Walter Shoemaker, and both live wires are kept busy from show opening to the closing as a result.

The Merkel Motor Wheel with its characteristic spring mounting and control is shown on several bicycles, as well as alone on a display stand. The finish is orange and black, the name "Merkel" being blazoned on the tank above each powerplant.

Digitized by Google

WHERE CYCLEMOTORS ABIDE

HOLDING forth at the popular exhibit devoted to the interests of the Cyclemotor Corporation, of Rochester, N. Y., are O. W. Adams, sales manager, assisted by Dan Sullivan of the Hub Cycle Company, New England representative. General Manager Anderson is expected later in the week.

Those interested in Cyclemotor construction are naturally most interested in the sectional view of the powerplant which occupies a leading place at the exhibit. There are two bicycles fitted with the double motor outfit, the wheels shown being of the highest class, in keeping with the Cyclemotor itself. Three of the single tank type are also on view, as well as a powerplant ready to fit.

GODIN GETS FIRST SALE

THE first sale at the Show is claimed by Z. Godin, of the Hendee forces. Godin closed with Frank Baker, Brooklyn, N. Y., Indian man, for 12 Indian bicycles, Baker signing just as the horn blew which opened the big New York exhibition. The Indian man was in high feather, as a result.

HALF A DOZEN STANDS DISPLAYING BICYCLES OF QUALITY

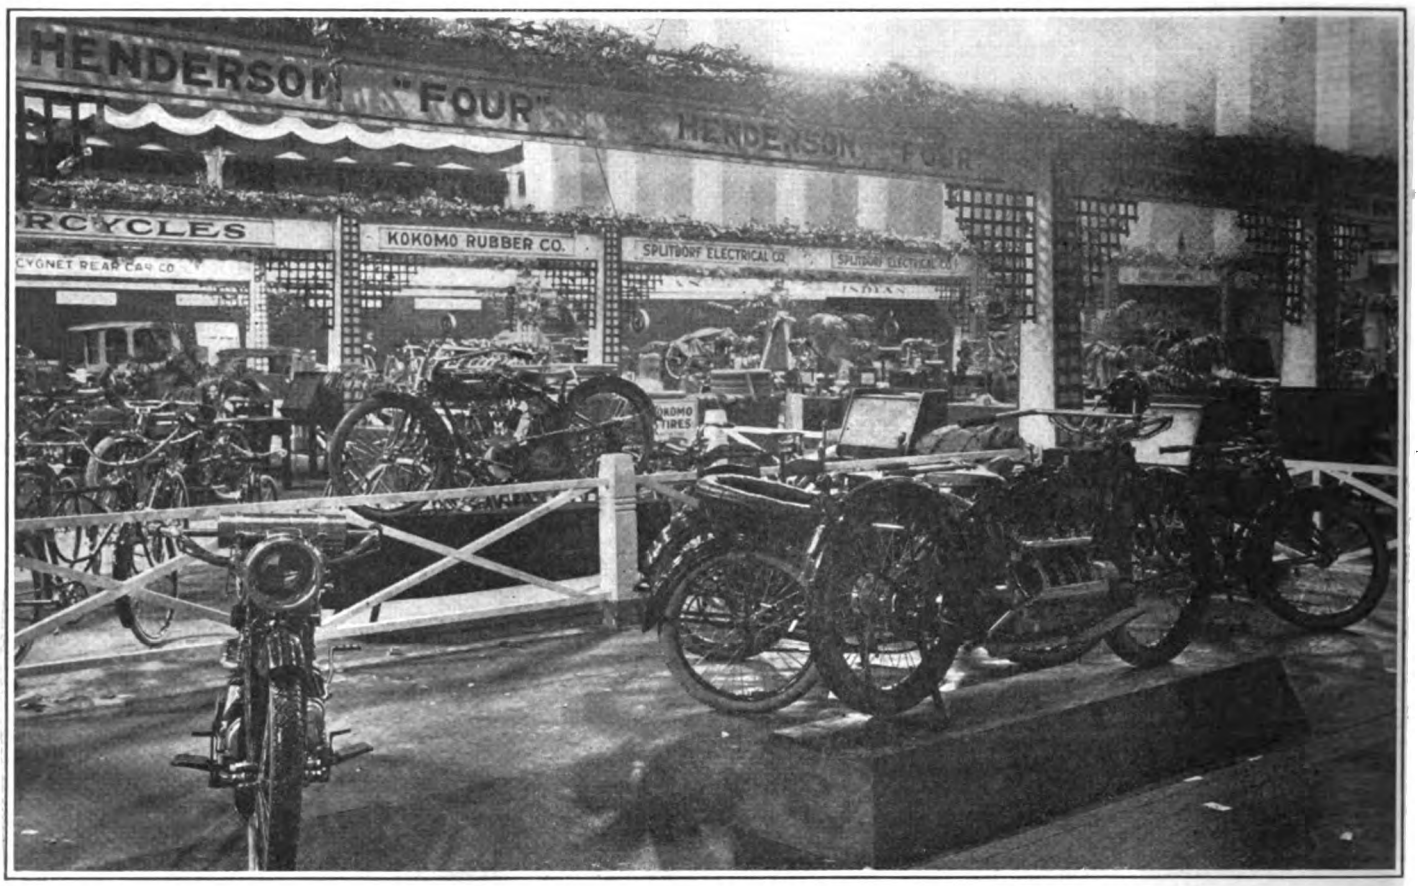
WHERE THE HENDERSON AROUSED INTEREST OF FOUR-CYLINDER DEVOTEES



FOUR-CYLINDER devotees are naturally to be found at the striking exhibit of the Henderson Motorcycle Company, where President T. W. Henderson and Sales Manager Paul J. Bailey are welcoming their friends. Felix Lewin, manager of the Metropolitan branch, is overseeing the exhibit, assisted by Irving Lewin, Charles H. Drude and Miss Florence Gottschalk.

On the machines shown, the tappet guide clamps are fitted with nuts instead of screws as in the first of the 1917 output. The breather pipe has been moved farther to the rear to allow of greater access to the contact-breaker. The cross-shaft bearing end is squared off instead of being notched, also. On the electric model the generator has been made self-regulating and a manual switch is now fitted.

One three-speed solo Henderson, one with electrical equipment and a sidecar combination are shown, as well as a machine fitted with the new dry battery and headlight with switch at the rear.

FOUR-WHEELERS ON VIEW

AMERICAN JUNIOR and American Flyer, vehicles incorporating the Smith Motor Wheel as a power unit, are being displayed at the stand of the American Motor Vehicle Company, by General Sales Manager Carl Marshall. At the opening of the Show, Mr. Marshall had Oscar Rubinstein as his assistant. President Jacob Weisenthal, of the company, is expected before the end of the week.

The American Junior is a light two-seater with four wheels, while the Flyer is built along buckboard lines. The Smith Motor Wheel is pivotally mounted at the rear of the vehicle in each case.

WELL-KNOWN STANWELD MEN

STANWELD parts are well represented in the Show, not only at the space given over to the Standard Welding Company of Cleveland, O., but on most of the motorcycles on view at their respective stands. Sales Manager P. W. Gilbert is in charge of a picked staff of factory men, consisting of A. F. Stengle, special representative, Bert Quayle, who takes care of the motorcycle end of Stanweld activities, Jack Manternach, the genial Fred Wilhelmy, Ollie Bryan and L. D. Rockwell, the latter two from the metropolitan office.

Motorcycle parts in a variety of forms, such as are furnished in quantity to manufacturers, are to be seen, as well as special forms. Visitors to the Standard Welding exhibit are sure of a most cordial welcome by all hands.

EDWARDS-CRIST DISPLAY

UNDER the supervision of Sales Manager H. N. Kirk, is the comprehensive exhibit of the Edwards-Crist Mfg. Co., of Chicago, Ill. C. E. Wilson is giving Mr. Kirk his able assistance.

The most recent of the Edwards-Crist offerings is a Prest-O bracket adaptable to any motorcycle, the tank being carried back of the handlebars but higher up, while the lamp is supported by two staunch brackets. A full line of leather puttee leggings, spring frame and fork bumpers, dry battery cases and inspection lights are shown.

SCHRADER GOODS ON VIEW

BEST known among the exhibits at the stand of A. Schrader's Son, Inc., of Brooklyn, N. Y., are the Schrader valve and valve parts, as the efficient staff in attendance will assure you should you by chance not notice beyond the front show case. The Schrader tire gauges and universal pump connections are right there to be shown and the aides of M. C. Schweinert are there to do it.

M. H. Tisne is on hand, as are B. W. Yockers, S. A. Howell, W. J. Kilpatrick, J. J. Kuhl and M. D. Bendell.

MANY CORBIN PRODUCTS

AMONG the veteran firms to show at the Garden, the Corbin Screw Corporation of New Britain, Conn., is prominently placed and the many products of this company are being demonstrated by R. O. Recknagel, F. K. Hess, R. J. Smith and J. T. Sheldon, of the New York office.

Corbin front and rear hubs for the bicycle, front hubs for the motorcycle, Corbin-Brown speedometers and rigging for all standard makes of motorcycle occupy the attention of visitors to this booth. The Corbin two-speed hub and coaster brake are also on view.

TANDEMS OF STOLL MAKE

STOLL tandems, in both Dream and Combination No. 2 are the main features at the booth of the Stoll Manufacturing Company of Denver, Colo. Matters pertaining to tandems are here explained by M. Walter Stoll in person.

The Stoll footrest attachment is shown separate and also attached to the firm's tandems. Stoll tandems are finished to correspond with standard machines; examples on Harley-Davidson and Indian appearing at the booth.

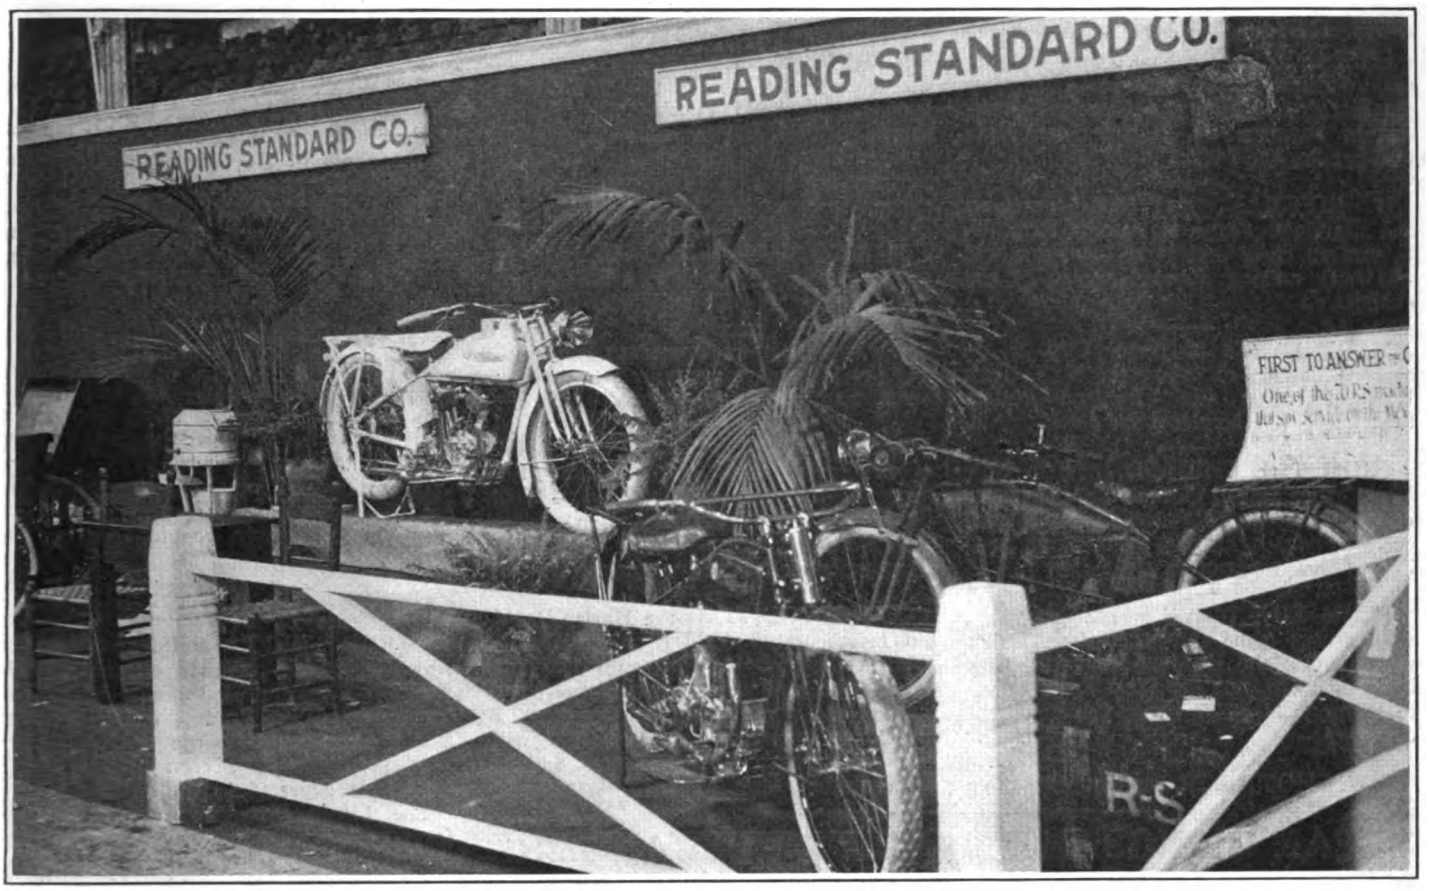
THE READING STANDARD BOOTH — COMPACT AND ARTISTICALLY ARRANGED



FROM Reading, Pa., has come a capable aggregation, headed by General Manager E. Theurer and Sales Manager G. E. Atkins, to talk brown twins and singles of Reading Standard make. Publicity Man V. C. Vogel, F. Kaiser and E. J. Wilson, the latter in charge of the factory forces of the Reading Standard Motor Company, are likewise on hand.

The piece de resistance of this exhibit is a three-speed twin electric model finished in white and gold and mounted upon a platform. On it are thrown concealed colored lights, giving a most picturesque effect. A three-speed twin, direct from the Mexican border, is also on view, as well as another in the brown finish which has marked the R-S since its debut many seasons ago. There is also a single-cylinder model and a cut-away gearset.

AT THE EMBLEM exhibit was spied Bill Kitz, who represents the Emblem at Baltimore, Md. Bill was highly pleased with the 1917 Emblem line.

FROM THE "MILE HIGH TOWN" comes Morris Hayutin of the Western Supplies Co., of Denver, Colo. Hayutin represents the Thor and was busy renewing old acquaintances after contracting for the line again for the coming season.

HENRY HOLGATE represented the Harley-Davidson and Clelevand interests from Scranton, Pa.

FROM THE NEW JERSEY capital came R. S. Woods and was seen in the Harley-Davidson and Cleveland booths. Woods was highly satisfied with his prospects for 1917.

P. S. COULTER, the "Redskin" from Homestead, Pa., was found in the Indian booth. Coulter was full of smiles. His last year's business showed an increase of more than 50 per cent over the preceding year. Coulter sold 70 machines in 1916. He brought his son, "Chubby Clifford," with him. Coulter also handles the Flxible sidecar.

NEWARK, N. J., was not to be slighted. She had her full quota of dealers. Carl Bush and P. W. Stevens of the C. W. Bush Co., Harley-Davidson & Cleveland delegates; Walter Goerke and Harvey Snyder of the Walter Goerke outfit, Indian dealers; W. R. Spear, the Thor man; Watson Kluczek of Reading-Standard fame, and Chas. Krebs. of the Henderson made up the delegation.

Where the Dealers Hover At the Show

"SMILING MICHAEL" FERRARO, from Sloatsburg, N. Y., blew in early and divided his time between the Reading Standard and the Thor exhibits. Ferraro handles both lines and signed up for next year.

ANDREW LARDINO, from Jersey City, N. J., came in and signed up with the Nickerson & Schroeder Co., which handles the R-S for his territory. Lardino is highly pleased with the new machine and expects much from it during the coming year.

YES, THEY CAME all they came all the way by machine—Joe Parmienter and Gillis Fuyatt from Lowell, Mass. Parmienter is highly enthusiastic over his prospects for 1917. Joe sold 29 machines and 16 sidecars in 1916 and to date has orders for thirteen of the 1917 models.

WILLIAM BEECROFT, of the W. & V. Beecroft Co., Ossining, N. Y., walked into the Indian headquarters and signed for the Wigwam product. This is Beecroft's first attempt at motorcycles. Good Luck, Bill.

OTTO MAXION, the Excelsior dealer from Scranton, Pa., made a flying trip to the show and landed in on the opening night. The "Big X" is enjoying a nice business now and the outlook is excellent. Otto sold 24 of the series 17 Excelsiors and 12 sidecars. His used machine sales totaled 60 for 1916. He has signed for the series the coming season.

FROM THE LAND of the "Midnight Sun" came Otto Bruun and Neils Beyer, who represent the Fries Hansen Co., Harley-Davidson distributors at Copenhagen, Denmark. Bruun said that his sales for the past year were more than 300 machines and an even bigger year is in prospect.

JUST AS SOON AS the doors were opened Bob Brazenor, the H-D missionary from Brooklyn, N. Y., reported a sale of 1917 Harley-Davidson and sidevan to the Brooklyn Union Gas Co., for service use.

More News from Show-Visiting Dealers

SILK CITY was personified in the persons of Elmer Havenstrite who looks after the Harley-Davidson and Cleveland interests at Paterson, N. J., and John Hule who handles the Indian.

H. RIESMAN, the Harley-Davidson and Cleveland dealer at Asbury Park, N. J., was an early arrival at the show and was busy making a rapid survey of the exhibits.

MORT LANTZ of Jersey City, N. J., and A Maunzo of Elizabeth, N. J., both Harley-Davidson and Cleveland dealers took in the fine points of the show.

FROM THE CHICAGO show to New York came Chas. Merkel, the Excelsior representative at Rochester, N. Y. Merkel certainly was a bustling man laying in a line of new accessories.

FROM THE TOWN where they make soldier boys came the genial Geo. Miller who handles the Reading-Standard. Geo. is trying to convert the West Point cadets to motorcycles in line with the preparedness idea.

J. W. THOMAS, JR. came into the show "on high" and made himself known. He was a very busy individual at the Harley-Davidson exhibit. Thomas sold 92 machines in 1916 and 27 sidecars. He has ordered 21 of the new models. His total contract for 1917 is 125 machines but he expects to better this mark.

THE DYED-IN-WOOL Harley-Davidson twins were there. They are Bill Ruhle and Walter Koch, ex-Harley-Davidson travelers how located at Jamaica, L. I. Ruhle says that he was surprised at the way the Milwaukee-made product was selling in his "neck of the woods."

FROM THE "AMMUNITION CITY" of Bridgeport, Conn., came Stanley Kellogg the Excelsior distributor, and John Burroughs the Harley-Davidson dealer. Both were kept busy doing the "glad hand" stunt welcoming incoming dealers.

COULD YOU FIND the Harley-Davidson representative from Brooklyn, N. Y.? Well, rather! Bobby Brayenor was disguised with a number of extra large lappel buttons and about a dozen streamers but his "lingo" betrayed him. He had with him his manager, George Barnes, and his demonstrator, Miss Florence Barnes.

BEAN BRINGS OUT POCKET VULCANIZER

New Tire Repair Device Is Simple and Effective—Special Substance Gives Heat For Vulcanizing

NEW YORK, Dec. 4.—One of the most useful articles to the user of pneumatic tires is the Self-Centering pocket vulcanizer, shown for the first time in the Garden by the Bean Tool & Sales Co., of Berea, O. As the name implies, this tool will fit in any pocket, the dimensions being 4⅝ inches by 2¼ inches by 1 inch thick.

The Bean vulcanizer consists of a thin steel bed slotted down the center and carrying a hinge device with D-clamp at one end. In the slot is a guide, movable along the slot to accommodate varying sizes of inner tubes. The guide has a hump and the end is pointed. It serves as a holder for the inner tube to be vulcanized.

Hinged to the bed at one end are pressure arms forming a rectangle. There is a heat unit pan slidable along these arms and moving with them. The D-clamp serves to keep the pressure arms and heat pan in place on the part of the tube to be vulcanized.

After the patch has been put on the tube, it is placed under the guide, with the center of the puncture and patch at the pointed end. The heat unit pan is moved to be directly over the patch, and the pressure arms brought down and clamped. The heat unit pan is then lighted and the work completed.

The heat unit is a special substance which generates heat when lighted. No other fuel is needed. The Bean vulcanizer is sold at $1.00 complete with six Para rubber patches and six heat units.

NEW DELTA SIDECAR LAMP

G. S. STEVENSON, New York representative for the Delta Electric Co., assisted by Mrs. Stevenson, held sway at the booth during the first couple of days of the show; A. E. Case, from the factory, arrived on Wednesday morning and helped to keep things humming.

New in the Delta booth since the Chicago show is a little electric lamp embracing a parabolic reflector and a rear red jewel, which is made expressly for sidecar use. The lamp is an adaptation of the Delta vehicle light which has made such a hit throughout the carriage trade. It is supplied with a six volt bulb and takes it current from a three cell battery, supplied in a neat steel case. The lamp can be had without the battery for use on electrically equipped machines. It is finished in black enamel.

NEW PERSONS LINES

WHILE those devices or fitments were not in evidence at the booth, C. A. Sawyer, of the Persons Mfg. Co., makes no secret of the fact that his concern has entered the market with a new line of leather covered wood grips for bicycles and bicycle hub cleaners. The new lines, of course, supplement the well-known Persons saddle and tool bag lines which form the main stay of the Persons exhibit.

Besides Sawyer in the Persons booth is O. A. Jones, sales manager of the Majestic Mfg. Co.; while C. A. Persons, who is head and shoulders of both concerns, arrived in New York and dropped in on the show on Wednesday morning.

LOBDELL RIMS IN ALL STYLES

BETWIXT and between times when he was not overwhelmed with his show managerial duties, A. B. Coffman holds the fort at the booth of the American Wood Rim Co., Onaway, Mich.

The display embraces a full line of Lobdell wood rims in various styles and finishes, as well as a line of French racing rims.

FEATURING THE MICALITE

MICALITE goggles are the feature at the stand of Strauss & Buegeleisen, of New York, these goggles being shown in a variety of styles. E. Buegeleisen is on hand to show the firm's goods.

In addition to these effective protectors for the motorcyclist's eyes, the stand is displaying protective goggles bearing the name Autospec.

AT BUFFALO SPECIALTY BOOTH

LIQUID VENEER and Neverleak, the two well-known products of the Buffalo Specialty Company of Buffalo, N. Y., are demonstrated by Fred Wood, with the able assistance of George W. Schneider. The presence of Secretary Martin J. Cabana is expected later in the week.

The Liquid Veneer is applied in the form of a spray to the surfaces to be treated, a higher polish being afterward obtained by rubbing. Holdfast liquid shellac is also shown at this booth. The big Neverleak facsimile tube occupies a prominent place in the exhibit.

A METROPOLITAN EXHIBITOR

ACCESSORIES, Indian motorcycles and a comprehensive bicycle line are to be found at the stand of Baker, Murray and Imbrie, Inc., of New York. The aggressive force at this booth consists of Calvin Webber, manager of the Motorcycle Department, W. J. Dowse, Wallace Stuart, George Ellis, James E. French, J. A. Wade, and A. Zimmer. President Fred Baker is on hand looking things over.

The Indian motorcycle in its various models, Infallible tires of the firm's own make, the Cyclemotor, Micalite goggles and a line of bicycle sundries are among the many goods displayed. This firm was formerly known as the New York Sporting Goods Company.

CHAINOLENE IN SMALLER TUBES

WHEN Chainolene, which is recommended as a superior lubricant for roller chains of all sizes, made its bow at the Chicago Show it was supplied only in tubes of a size to be sold at 25 cents. Carey G. Wirick, general sales manager for the Chainolene Co., who did the honors at Chicago, was quick to hear a call from bicycle riders for a smaller size tube with the result that at the New York show Chainolene appears in a 10 cents size tube as well as the larger motorcycle size.

Wirick, who is assisted at the booth by E. C. Kennedy, makes it emphatic that the Chainolene, no matter what size package

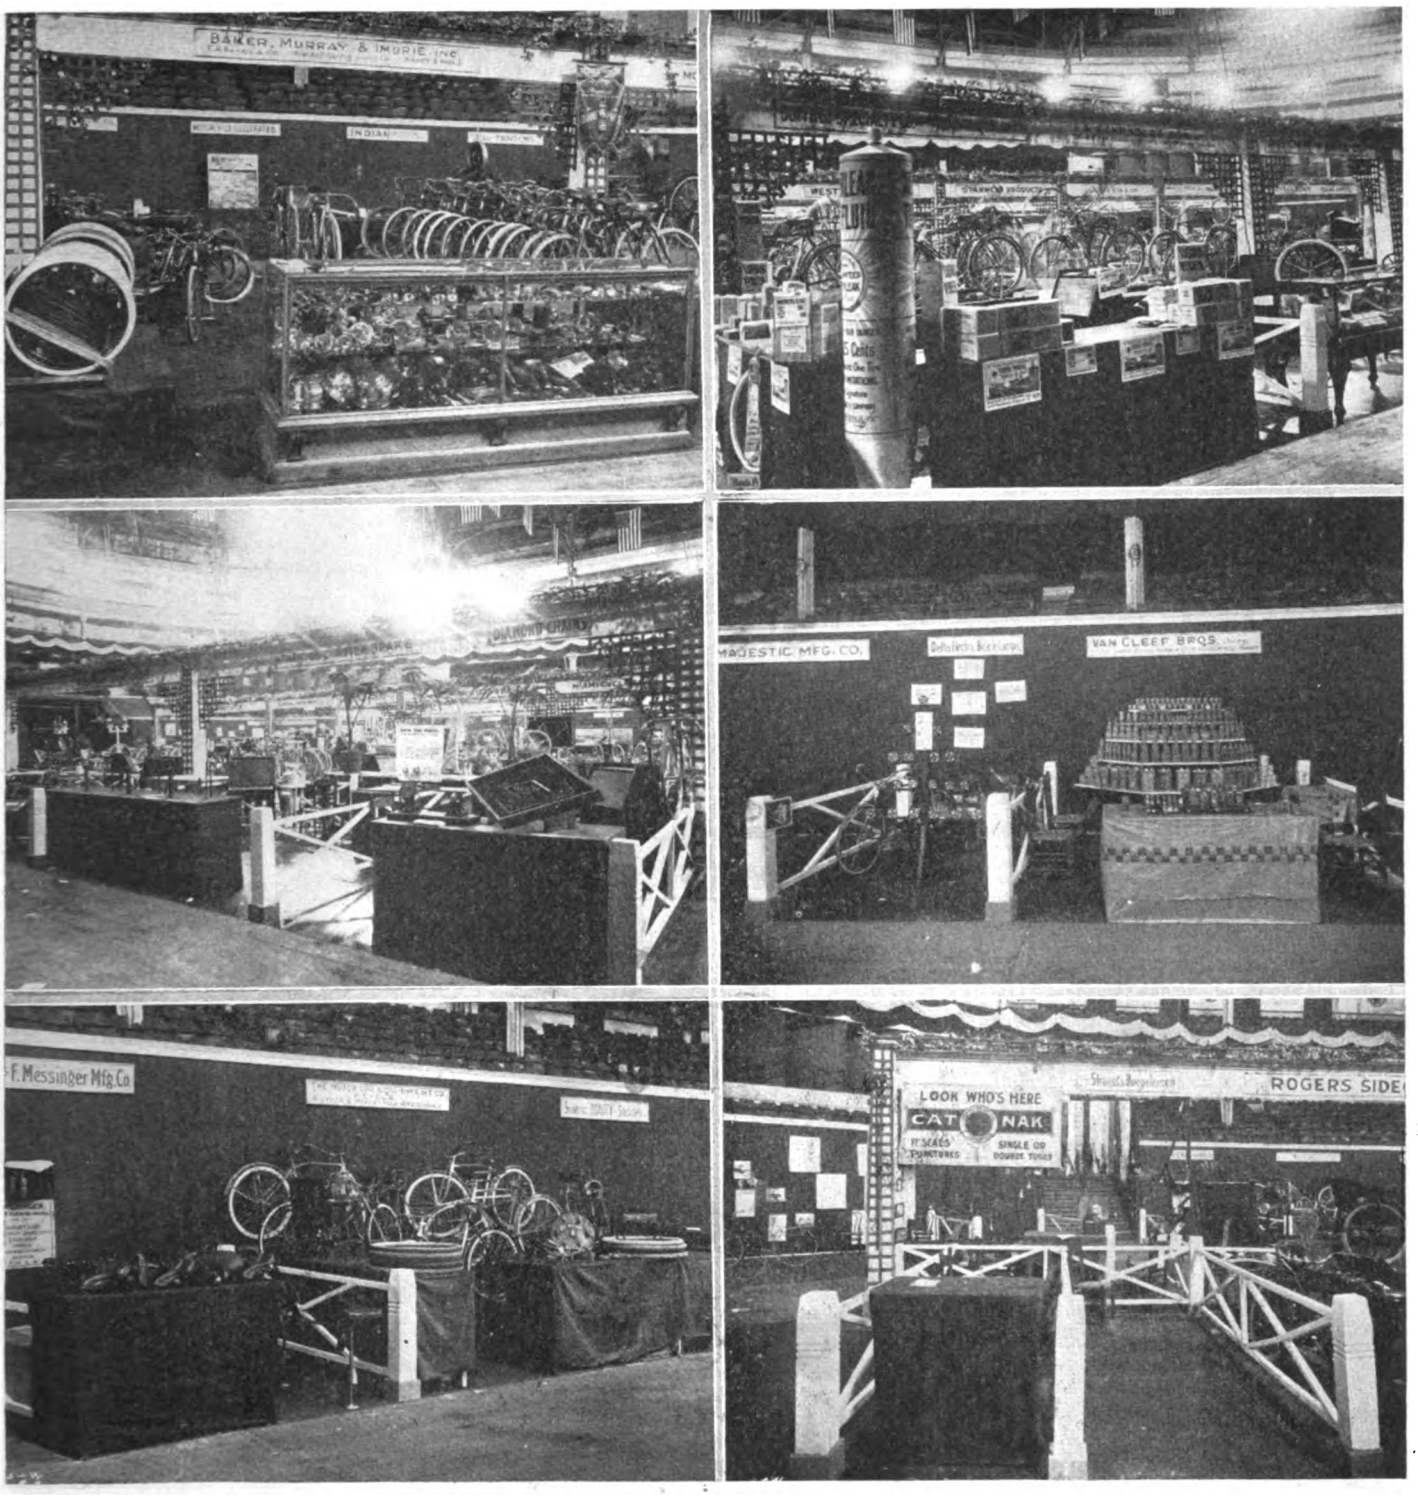
SEXTET OF PHOTO SLANTS ALONG "ACCESSORY ROW"



On Top Are the Booths of Baker, Murray & Imbrie and the Buffalo Specialty Co.; In the Middle, the Diamond Chain and Atherton Booths Are Shown at the Left and the Delta Electric Booth and Van Cleef Brothers' Dutch Brand Exhibit Appear at the Right; Below Are the Mesinger and Motor Car Equipment Displays and the Cat-Nak Mfg. Co. and Strauss & Buegeleisen

it comes in, is identical with the lubricant which is used nationally for roller type chains on automobile trucks.

MANY MOSSBERG TOOLS

THOSE who visited the stand of Frank Mossberg Company, of Attleboro, Mass., were welcomed by Sales Manager A. W. Harrop and H. E. Ring. There is much to interest the motorcyclist at this booth in the form of wrenches of all sizes and adaptable to any make of machine on the market.

Wrenches and other tools in sets are a feature of the Mossberg exhibit, and the line includes shop tools also.

ACTIVE HAWTHORNITES

FEATURED at the exhibit of the Hawthorne Mfg. Co., of Bridgeport, Conn., is the new Nitrojector spot light, especially adapted to sidecar use. E. Horace Hawthorne, the sales manager; W. A. Prince and C. H. Mackay constitute the force which is kept busy telling the adavntages of "Old Sol" products. President Ellsworth Hawthorne will be in later.

The Hornlite, combining electric two-bulb headlight and electric horn, as well as the tail light and lamp bracket combined, occupies a prominent place at the stand. This outfit is now standard on a number of 1917 motorcycles. Gas and electric head and tail lamps of various models complete the line displayed.

DEALER COMMITTEE REPORT READY

M. and A. T. A. Committee Meets During Show and Draws Up Report for Board of Directors—The Work to Be Done and Where Start Will Be Made

NEW YORK, Dec. 5.—The Dealers' Betterment Committee of the Motorcycle and Allied Trades' Association met at the Prince George Hotel at noon today and drew up full and final plans for the inauguration of a broad-gauge campaign for helping and co-operating with motorcycle dealers the country over.

The suggestions and recommendations of the committee will be put in report form by Secretary Thomas and submitted at the Board of Directors' meeting of the Allied Trades' Association at noon on Thursday of this week.

Standing out prominently among the recommendations to be made in this report is that the name be changed from Dealers' Betterment Committee to simply Dealer Committee, it being felt by the committee that the word "Betterment" in the title might be construed as derogative or belittling by the average motorcycle dealer.

Educational Folder for Dealers

The campaign, as outlined by the informal committee and presented at the Atlantic City meeting of the association, was adopted almost in its entirety, and the approval of the Board of Directors forthcoming, work will be started immediately on the matter of getting out a neat and attractive folder to dealers, which will be well illustrated and which will point out the benefits of clean stores, attractive window displays and better selling methods generally. This folder will be mailed to all the dealers on the lists of the various factories.

In the same line the committee recommends that a series of attractive posters be gotten out and that the full co-operation of the trade papers be enlisted in the matter of acquainting the dealers with the work which the committee is to undertake.

By way of furthering the neat rider movement the committee will recommend that the Board of Directors offer some sort of a prize competition whereby motorcycle clubs sending in the best club pictures depicting riders in neat costume will be awarded cash prizes; also in this line is the movement the committee will recommend be started to have the factory representatives and travelers call on the dealers clad in neat motorcycle riding togs.

Quite apart from the clean rider movement, but quite as big as it, is the plan the committee has in hand for setting aside a week early in February of the coming year, to be known as "Clean-up Week," during which time motorcycle dealers will be urged to take inventory and clean up their shops, and to get rid of the winter's collection of odds and ends, getting a good start for the new season's trade.

In full realization of the fact that before it can really make bookkeepers or accountants out of motorcycle dealers it must create within them the desire to embrace the more modern methods of keeping track of their business, the committee plans to inaugurate a campaign to this end.

Once the desire for knowledge along accounting lines has been aroused within the dealer, the committee will be in a position to supply him with simplified means aptly fitted to his business needs, and also with literature on the subject and with information as to how and where he can obtain further coaching on the subject.

Those present at the meeting were: H. A. Haws, chairman, Firestone Tire & Rubber Co.; T. R. Thomas, secretary, Goodyear Tire & Rubber Co.; M. E. Toepel, Splitdorf, Electrical Co.; J. B. McNaughton, Hendee Manufacturing Co., and H. L. Corey, Champion Spark Plug Co.

STEVENS "NEWNESS"

Embraces Parts Cabinet, Ball Retainer Assortment and Brake Tool

THERE is always something new from Stevens & Co. At the present show special emphasis is being laid upon a handy service cabinet for dealers's use. This little cabinet, which is intended for carrying a stock of screws, bolts, nuts, repair parts, and other small fitments, is made of oak and fitted with a dozen small drawers and three large ones. The novel feature of the cabinet is the fact that it is built in sectional form so that any number of sections can be combined to take care of the needs of an increasing business. Each section retails at $5.

Other Offerings

Also new in the Stevens line is the Vim cabinet for ball retainers containing 52 hooks, each with an assortment of different size retainers and a Stevens coaster clutch tool which facilitates the removal of the coaster brake sprocket.

Louis Schwab, who is the backbone of the Stevens organization, hovers in the offing, so to speak, while S. L. Parker, manager, and E. C. Hunting, sales manager, preside at the booth. They are assisted by J. E. Henderson, Paul Rink and H. Proudfoot.

COPS SAY "SAFETY FIRST"

Stage Interesting Show Exhibit in Connection with Department Campaign

ONE of the most interest-impelling displays is the Safety First exhibit put on by the Police Department of the City of New York.

The booth is fitted out with working models of the New York police call system and models showing the proper way to drive to avoid accident; it is finished off with regulation models of the traffic squad street signs and with posters, cards and other literature bearing on the Safety First Campaign which the police department is pushing with all its might at the present time.

The booth is in charge of Sergeants Hugo O. Wunsche of Traffic Squad C and Alexander Kittle of the 15th precinct, both in full uniform, and say, those cops are a darned sight more friendly when you meet them at the show than when your momentum carries you past the extended arm of the law at a traffic corner.

Stolen Machine Bureau in Operation

DEALERS, riders and all others throughout the country who may be in any way interested, are hereby notified that the Stolen Machine Bureau just instituted by "Motor Cycle Illustrated," and which was fully described in the November 30 issue, is ready for business.

One of the factories has already filed with the Bureau a complete list of motorcycles stolen from its riders, and the other factories are invited to adopt the same policy.

If you have a machine stolen, send the necessary data (as explained in the November 30 issue) to the Stolen Machine Bureau of "Motor Cycle Illustrated," 13 Park Row, New York; if you locate a machine that you believe has been stolen, send the same details to the Bureau. The Bureau is the connecting link between loser and finder. Co-operate with it promptly and you will "start something."

EMPHASIZE MIAMI-MADE LINES

J. W. ASH and C. R. Miller head the Miami delegation and emphasize the newness that characterizes the Miami-made bicycles for the coming season.

Also at the Miami booth are Harry Gliesman, J. E. Ruby and Mrs. Ruby, G. E. Schueller and H. K. Ford of the New England branch.

The Miami booth is merged with the display of the Progressive Cycle Co. of New York and the two make up the most comprehensive bicycle display on the show floor.

The special frame testing machine gotten up to demonstrate the strength of the new hercules frame construction was the center of an interested crowd of spectators throughout the week.

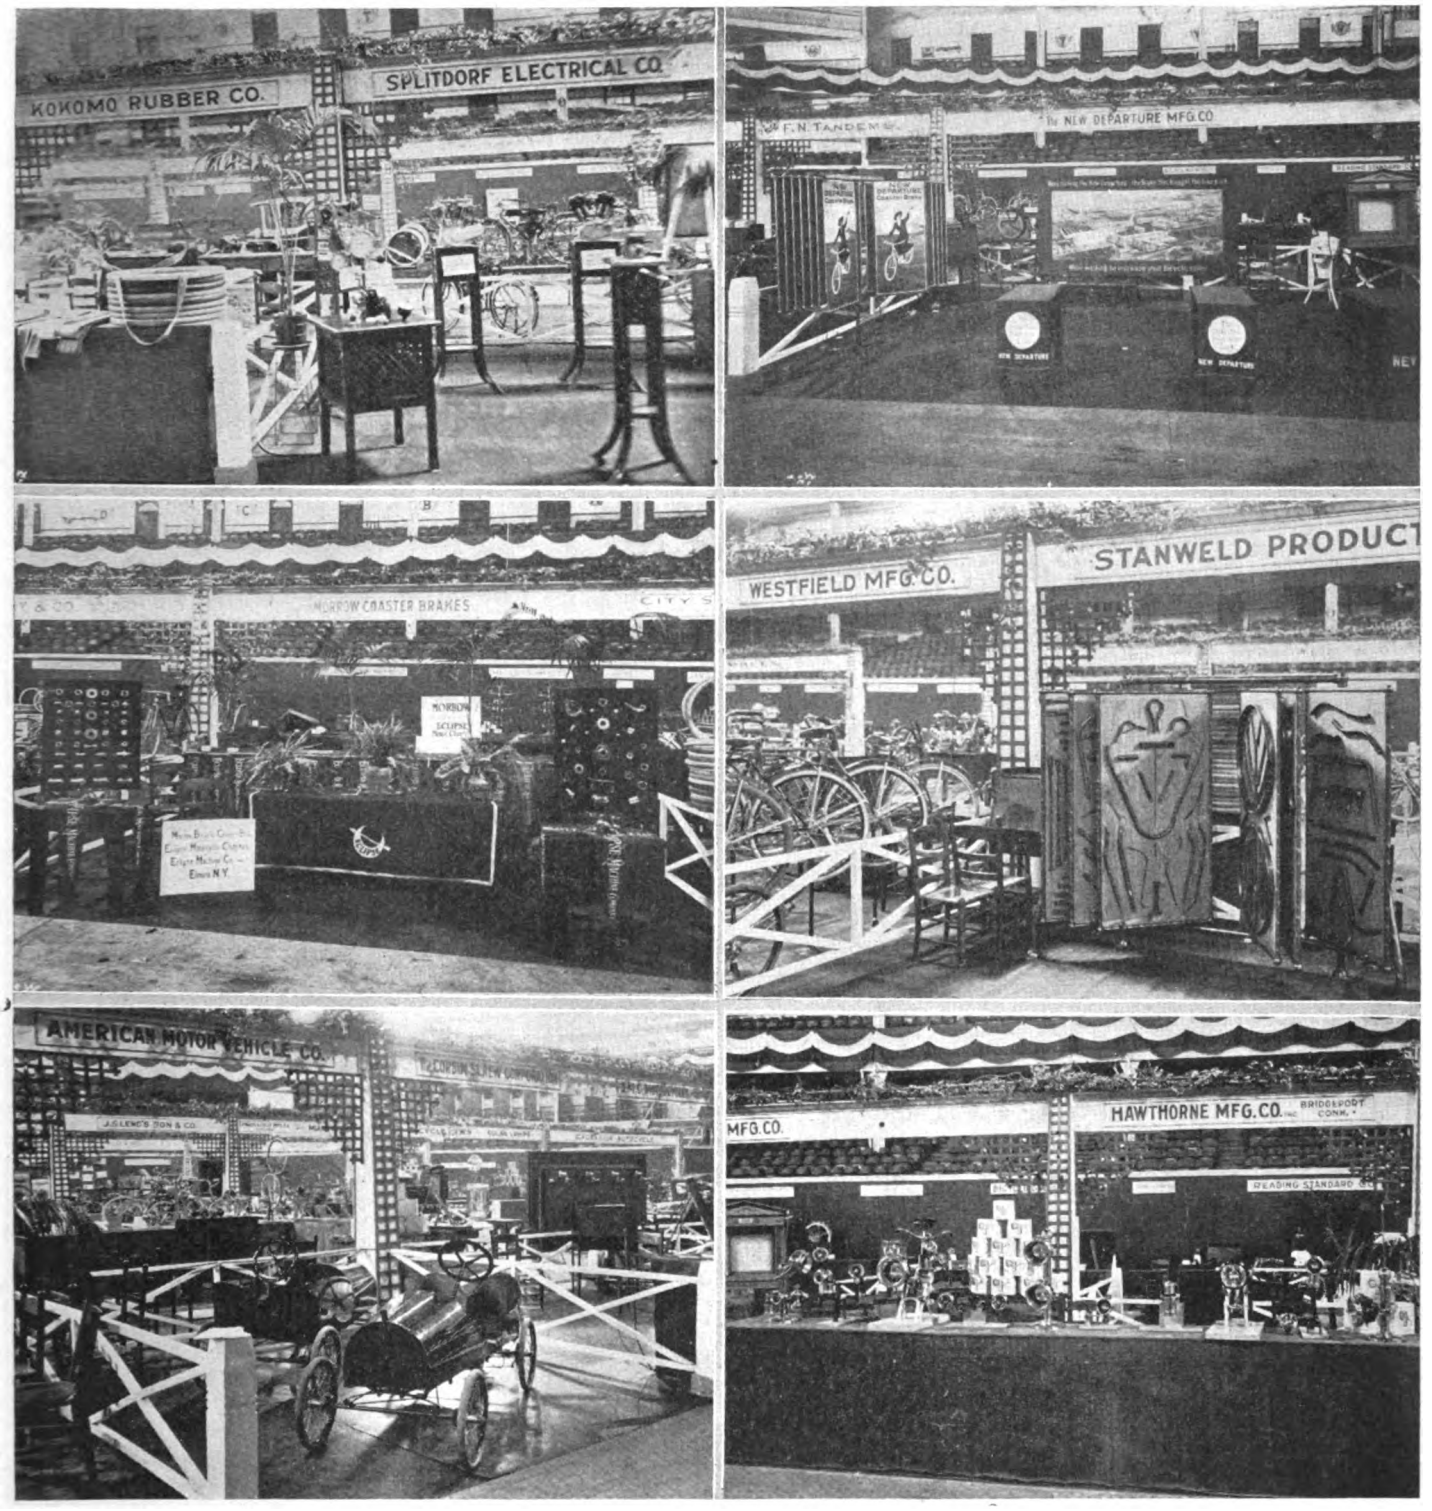
BUSINESSLIKE EXHIBITS IN ARTISTIC SURROUNDINGS



Upper Left, Splitdorf Stand, Featuring Dixie Magnetos and Mag-Generator; Right, New Departure Space With Poster Rack and Lantern Slide Projector. Center Left, Morrow Coaster Brakes, Eclipse Clutches and Hubs Shown Here; Right, Standard Welding Company Display Boards. Lower Left, at Stand of American Motor Vehicle Company; Right, Old Sol Lamps at Hawthorne Space

NEW GRADY RACER

Road Model With B. S. A. Fittings From Worcester Plant

SOMETHING new in the way of a racing model made its bow at the booth of J. W. Grady of Worcester. It's a road racer of the B. S. A. fitting type and scales at 22 pounds. Novelty is found in the rear fork stay construction, which is of the bridge type permitting the use of the wide road racing tires as well as the narrow track tires. The new racing model lists at $55.

The racing model which Eddie Root is to ride in the coming six-day bicycle race, as well as Clarence Carmen's and Alfred Goullett's racing machines are feature attractions at the Grady booth. A full line of Red Wing and New England bicycles is on display.

J. W. Grady presides in person, and is assisted by W. P. Farrell, George Smith and Dan DeLong.

BERLINGS WITHOUT CHANGE

E. L. Valance, with H. E. Walker, makes plain the constructional features of the Berling magnetos at the booth of the Ericsson Mfg. Co.; Salesmanager E. Hemenway did not get to New York until Wednesday evening.

The Berling line is exactly the same throughout as when shown at Chicago a couple of weeks ago. Single, twin and four cylinder models, the latter as used on the Henderson, are displayed.

Digitized by Google

EMBLEM TWIN LIGHTWEIGHT IS FLANKED BY ARRAY OF BICYCLES

STRIKING in its coat of carmine at the center front of the Emblem exhibit is the new Emblem three-speed twin, and this two-cylinder mediumweight model is flanked by others with single gear to right and left. The latter are finished in a neat drab with black striping, characteristic of the high quality of finish of all products of the Emblem Manufacturing Company. It goes without saying that Manager W. G. Schack is right on hand to oversee matters and to greet his host of friends in the cycle trades.

The rear of the exhibit is occupied by Emblem bicycles in an extensive assortment. Assisting Mr. Schack are J. F. Kitz, Designer John Glass and A. P. Strogonoff, the latter from Schenectady, N. Y.

SHOWING FLYWHEEL MAGNETOS

MAGNETOS incorporated in the flywheel are featured at the stand of the Quick Action Ignition Company, of South Bend, Ind. In these apparatus, the coils and other component parts are housed in the flywheel, while the current is taken off from a rotating contact-piece and stationary brush. Models for single, 50-degree twin, 180-degree and four-cylinder motors are shown.

In charge of the exhibit is Chief Engineer R. A. Oglesby, assisted by Sales Manager Dick Oglesby.

WEALTH OF ACCESSORIES

HIGH-CLASS accessories for motorcycles and bicycles are prominently displayed at the busy stand of the Motor Car Equipment Company, of New York. The line of tires shown includes the Kokomo and Electra for bicycles. Hand vises, pliers, socket wrenches, bells, leggings, bicycle rims and grips share the booth with Excelsior and De Luxe model bicycles. The Stoll tandem attachment is featured.

Manager Harry F. Schleininger is in charge of the booth, with the able assistance of Arthur Chapple.

MESINGER SADDLE MODELS

SPECIALLY finished in white leather with gold trademark is the Mesinger air-cushion saddle which occupies a prominent place on the wall of the H. & F. Mesinger Mfg. Co.'s exhibit. This saddle is adaptable to the 1917 models of Henderson, Indian, Harley-Davidson and other makes of motorcycle. Other saddles in the extensive Mesinger line, for both bicycles and motorcycles are shown in the main part of the stand, as well as tool bags.

Fred W. Mesinger oversees matters at this booth. President Henry Mesinger was on hand early in the week to meet trade friends.

NEW BEAN VULCANIZER

AT THE BOOTH of the Bean Tool & Sales Co., of Berea, O., is to be seen a most ingenious pocket vulcanizer, measuring 4½ inches long by 2¼ inches wide and 1 inch thick. The tube to be vulcanized is clamped by a spring device over the patch and a pad is then heated and locked in place on the tube. In addition to this new article, the well-known Bean chain tool, and valve tools are on display. The valve tool takes all valves up to 1¾ inches.

General Manager Roscoe Bean is in charge, assisted by C. S. Galbraith.

MARKET FORGE LINE

COMBINATION luggage carriers and stands for bicycles, as well as separate carriers and stands are being shown by L. I. Beckwith at the stand of the Market Forge Company, of Boston, Mass. There is also a motorcycle tandem attachment with spring cushion, and two of the firm's well-known delivery baskets.

SHOWING SUPERIOR SADDLES

UNDER the supervision of President H. A. Jackson are F. K. Pierce and H. G. Davidson at the stand of the Superior Metal Products Company, of Elyria, O. The line shown includes one or more of each model of Superior saddle for motorcycle and bicycle put out by the firm. A new model is the No. 6, specially designed for ladies' use. All are neatly arranged on the counter at the front where the best demonstration is possible.

SVENSGAARD ON THE JOB

PULLMAN sidecars are the feature of the Svensgaard exhibit, these cars being shown attached to several standard motorcycles. In addition there is a chassis to show the characteristic Pullman connections and other constructional details. Harry A. Svensgaard, president of the Harry A. Svensgaard Sales Corporation, of Detroit, Mich., presides at the exhibit with his usual cheery smile.

Of more than usual interest is the knock-down model of the Pullman in its casing ready for export.

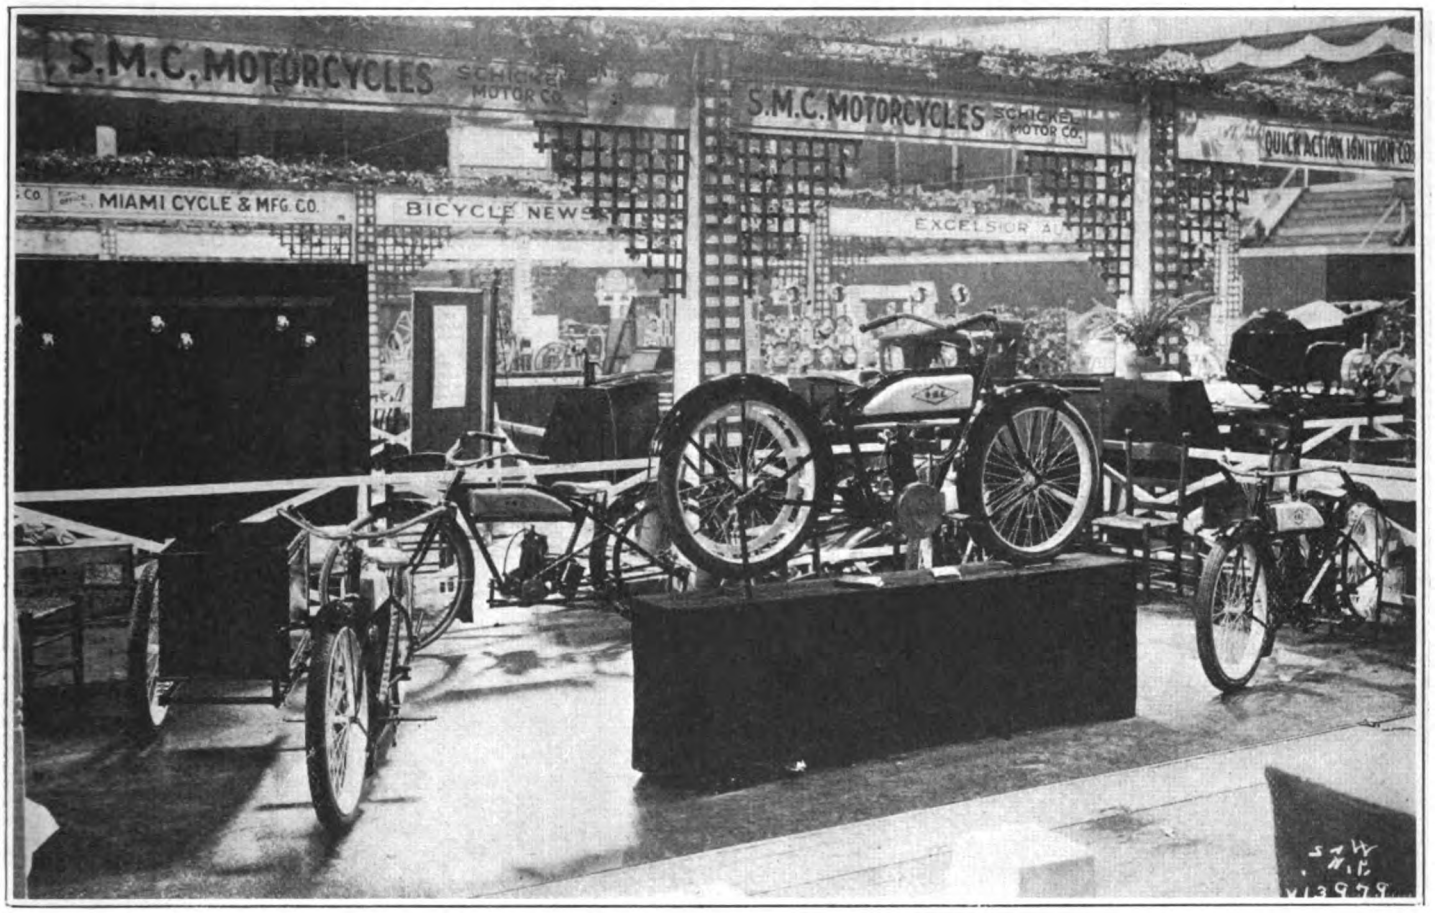
TWO-STROKE S. M. C. ATTRACTED STUDENTS OF LIGHTWEIGHT MOUNTS



TALKING two-strokes at the booth of the S. M. C. are President Norbert H. Schickel, Sales Manager L. A. Hopkins, M. E. Gale and Joseph Clapes. Treasurer Arthur J. Barzaghi is also on hand from the executive staff of the Stamford, Conn., company.

Five S. M. C. machines occupy the attractively-dressed space. These include the commercial van model with body complete, ready for the business man to drive off, a two-speed model in white and black, and two of the 26 by 2¼ inch tired white finished models. There is, in addition, a machine listing at $109, fitted with 28 by 1⅝ inch tires, the successor of the original Schickel lightweight two-stroke. The two-speed model has a hub gear.

BRONX RUN

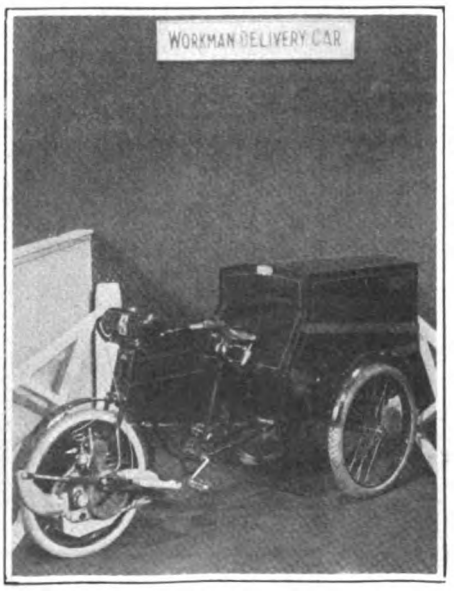
Berckhemer's Sociability Brings Out 125 Enthusiastic Participants

BRONX, N. Y., Dec. 3.—That the Metropolitan district can make an unqualified success of a motorcycle event "when the spirit moves" was demonstrated today when no less than 125 enthusiastic riders turned out to participate in the run conducted by Oliver Berckhemer, Bronx Indian dealer. The big party, including all makes of machines, and featured by the variety of passenger attachments—sidecars, tandems, rear-cars and side-by-side seats—left Berckhemer's headquarters at 8:30 a. m. and headed for Bridgeport, Conn., where the riders were due to check in at 10:45.

From Bridgeport the route led to Danbury, Conn., where the crowd arrived at noon. An hour was allowed for lunch, and at 1 p. m. the travelers headed for home, arriving back at Oliver's agency at 4:30 p. m., having covered 140 miles. Oliver drove an Indian-Cygnet combination throughout the run, with State F. A. M. Commissioner George Ellis and Mrs. Ellis as his passengers.

Following are the prize winners: Tony Gutter, Indian, a battery; Fred Saugaman, Indian, shoe and tube; T. Netiz, of Bridgeport, Indian, Weed backrest; J. Hazel, Indian, Mesinger, Air-Cushion saddle; J. Simons, Harley-Davidson sidecar combination, an F. N. tandem; E. Stern, Indian, a gold-plated Splitdorf spark plug; S. Heins, Excelsior, a handlebar watch; J. J. McGuire, Indian, a pair of goggles; T. Platzek, Harley-Davidson, Splitdorf spark plugs; J. M. Stark, Harley-Davidson, set of tire irons

WORKSMAN VAN



MAC JOINS WOOD

Former Cygnet Booster Will Manage Bronx Harley-Davidson Store

NEW YORK, Dec. 5.—E. C. MacDonald, who has recently been on the sales force of the Cygnet Rear Car Co., has severed that connection to take the managership of the new Bronx store of the Harley-Davidson Sales Co., the New York Harley-Davidson distributor.

MacDonald, who obtained a broad Harley-Davidson experience during the two years when he was connected with the Southern branch of that concern, will be in full charge of Wood's uptown branch, which is located at Webster avenue, corner 165th street. The new arrangement takes effect on Monday next, December 11.

NECHAMKIN VISITS R-S PLANT

BALTIMORE, Md.—S. Nechamkin, proprietor of the Baltimore Cycle Co., which handles the Reading-Standard in this territory, was a recent visitor to the Reading Standard factory, in Reading, Pa. Mr. Nechamkin received his 1917 R. S. demonstrator on November 21, and by way of giving it a thorough try-out he immediately started for the factory, accompanied by a tandem passenger.

CLEVELAND STAND—ANOTHER CENTER OF INTEREST IN THE LIGHTWEIGHT

QUITE the feature at the stand of the Cleveland Motorcycle Manufacturing Company, of Cleveland, O., is the cut-away two-stroke Cleveland lightweight, shown with the parts moving as when on the road. Stand attendants, headed by General Manager C. A. Gilbert and Sales Representative C. W. Waughop, are actively engaged in pointing out the features of this make of machine and its performances. President H. G. Alexander, Treasurer W. D. B. Alexander and Secretary W. S. Quinlan are on hand to greet the flocks of visitors.

In addition to the cut-away Cleveland, a most attractive machine in copper and nickel occupies a prominent place railed off with chains. There are also Clevelands finished in the regular colors and in black and white. The new starter is shown fitted to a sectioned portion of the power plant. The tandem is attached to the axle to give a longer reach and at the same time does not interfere with the chain adjustment. The cushion is colored to match the new Harley-Davidson finish.

ROGERS AND F-N

Sidecars and Tandems Have New Features for 1917

SIDECARS and tandems, of Rogers and F-N make respectively, are shown at the stand of Irving Beck, of New York. Beck is Eastern distributor for both products. Also on hand to greet their many friends are President R. F. Rogers, of the Rogers Manufacturing Company, and President J. C. Sage of the Fentress-Newton Manufacturing Company, of Indianapolis, Ind.

The Rogers sidecars are shown in their special "tailor-made" forms to fit the 1917 Indian, Harley-Davidson and the Series 18-3 Excelsior. The Model M car, for these machines, has the three-ball joint connections and has a foot rail and extension axle as regular equipment. A Model H sidecar is also on view.

The F-N tandems are shown for Indian, Excelsior and Harley-Davidson, the latter having a special means of fitting. The seat is moved about three-quarters of an inch further forward to clear the electric lamp on that model and there is a special brace from the mudguard to eliminate rattle.

Where Irving Beck Displays Rogers Sidecars and F-N Products to Full Advantage

NATHAN SHOWS LEGGINGS

LEGGINGS, in both puttee and fabric models, and in shapes to suit the most critical, are being shown at the booth of the Nathan Mfg. & Novelty Co., of New York. Messrs. F. Nathan and L. Cohen are on hand to show the extensive line to visitors.

The puttee leggings displayed are in either dark or light color, while the fabric leggings are shown mostly in gray finish.

How the Harry Svensgaard Sales Corp. Displays the Comprehensive Line of Pullman Sidecars and Sidevans; the Box in the Rear Shows How the Pullman Sidecar Is Packed for Export

OGDEN HEADS CYGNET FORCE

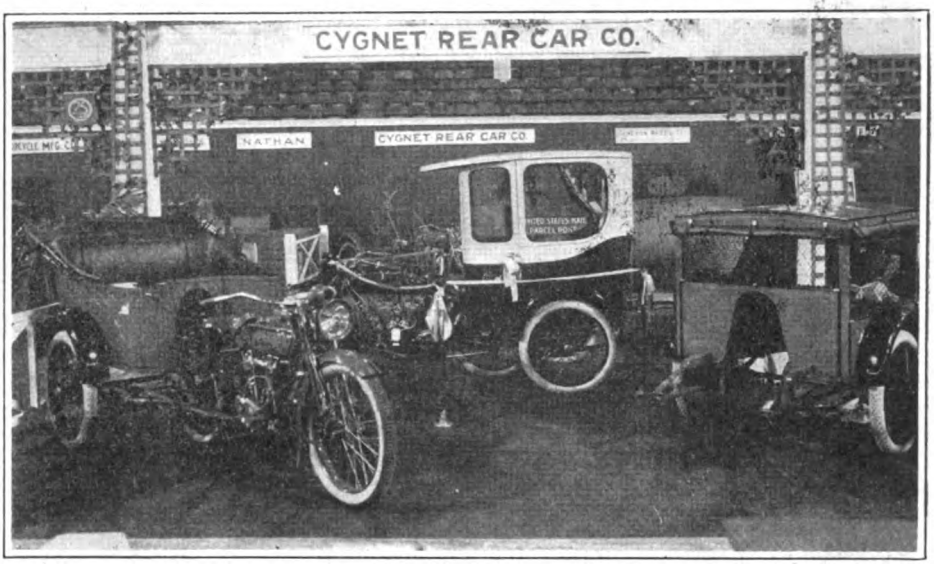
APART from the attraction of the new Cygnet military machine gun outfit, there are five models of the Rear Car to be seen at the stand of the Cygnet folks from Buffalo, N. Y. Sales Manager Leadley Ogden is the chief factory representative present, and he is ably assisted by E. C. MacDonald, as well as Wallace Stuart, of Baker, Murray & Imbrie, Inc., metropolitan Cygnet representatives.

In the main Cygnet exhibit, across from where the machine gun outfit is staged, is a limousine finished in red and gray, an open van with wire sides, a passenger Rear Car attached to a Harley-Davidson motorcycle, a U. S. mail van with top such as is used in Boston and a special closed van with top rail and front seat. There is a box body with folding top on another example at the booth.

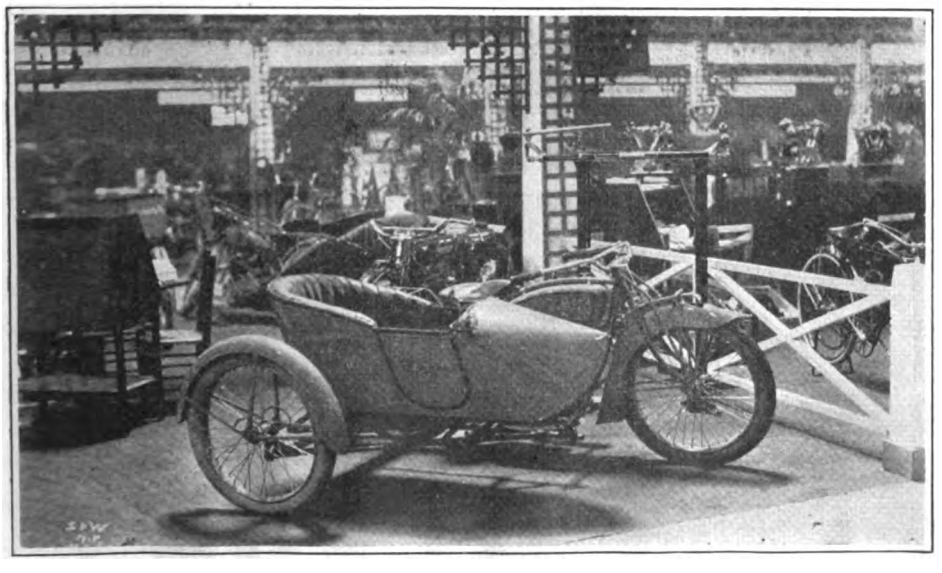
SHOWING FLXIBLE SIDECARS

UNDER the leadership of President Hugo H. Young, who is also the inventor of the sidecars shown, the Flxible Sidecar Company, of Loudonville, O., has a number of able representatives meeting all comers. The chiefs in this group are Clifford Coulter and E. J. Brennan, the latter being Eastern distributor for the Flxible.

Sidecars of this make are shown attached to and finished to correspond exactly with Indian and Harley-Davidson motorcycles. This of course by no means exhausts the list of machines to which the Flxible is adapted, for it can be fitted to any standard make. A military outfit, consisting of a Flxible and R-S combination, fresh from the Mexican border occupies a prominent place at the stand.



Here's the Attractive Cygnet Booth with the Cygnet Limousine De Luxe Which Electrifies the Show Visitors, Holding the Center of the Stage. A Cygnet Passenger Vehicle and a Commercial Type Flank the Limousine



The Members of the Flxible Sidecar Sales Force Keep This Demonstrating Model Swinging Like a Pendulum in Order to Demonstrate Its Flxible Construction

EMPHASIZE GREAT WESTERN RACERS

GREAT WESTERN bicycles under the three different name plates, which the Great Western folk have made famous, comprises the display of the Great Western Mfg. Co., of LaPorte, Ind. Special emphasis is being placed by Salesmanager C. A. Lonn, who is in charge of the display, on the racing models in the Crown, Adlake and America lines. Assisting Lonn is his brother, A. E. Lonn and Messrs. Leng, Winslow and Holland.

LING LOOKS FOR SPOKES

O. LING, who manages the export department for the Herbert F. L. Funke Co., Inc., is looking out for spokes as usual. Ling says that he could export five million spokes within the next few weeks if he could only get them, but only small shipments are available.

MARTIN DROPS IN

C. E. MARTIN, of Banker & Martin, Harley-Davidson exploiters at Plattsburgh, N. Y., steamed into the show "wide open" and made for the Harley-Davidson sanctuary, where he signed up for the coming season. Martin delivered 30 machines and 12 sidecars in 1916 and already has a half dozen of the new models roaming around. He easily expects to get rid of his quota of 50 machines during the coming year.

Right, Accessories and Several Makes of Bicycle Comprise City Supply Company Offering. Lower Left, Majestic Saddles Are Attractively Arranged on Racks; Right, Flywheel Magnetos at Quick Action Ignition

READING SADDLES IN EIGHT MODELS

The Reading bicycle in eight different models is shown at the booth of the Reading Cycle Mfg. Co., of Reading, Pa. The leader is the Gent's Racer, listing at $50, and the prices taper down from this price to $25, which is asked for the Boy's Speeder Juvenile.

Keyser Fry, of the Reading factory, has been in attendance at the show throughout the week, and assisting him at the booth are W. L. Kerst, B. F. Frees, J. W. Strashaugh, Harry Adams and John Naregang.

SCHEBLER EXHIBIT GOES ASTRAY

George T. Briggs and B. E. Okay, who always do the Wheeler-Schebler Carburetor Co.'s honors, were quite naturally on hand at the Schebler booth. They were assisted by R. Weston Doeherty, New York representative.

Not even the loss of their express shipment of show material took the smile from Briggs' and Okay's countenances. The deficit in the material was partly made up by a supply from the New York branch. "Nothing new yet" came in answer to the question, and that there is deep significance in that word "yet" is never doubted.

GENDRON JUVENILE AT $8.50

Something unheard of in the cycle trade heretofore made its bow at the booth of the Gendron Wheel Co., veteran bicycle makers, of Cleveland, O.

The newness is a juvenile bicycle, which sells at the phenomenally low price of $8.50, fitted with pneumatic tires.

The machine is made up in "velocipede" style; that is, the frame, unlike orthodox bicycle construction, is built up of two pieces of half round stock, forming a rigid truss, although to all appearance in its general outline the little bicycle looks like a regular juvenile.

The Gendron display was filled out with a full line of wheels in every conceivable model and size, and the booth was in charge of G. H. Stenzel, eastern representative.

C. R. C. A. SHOW DISPLAY

Quite unexpected, and likewise unheard of in shows of yesteryear, was the exhibit staged by the Century Road Club Association. Sylvain Segal, Centurian, was in charge of the C. A. booth, and was assisted by W. M. Winguist, secretary.

The display of the association was replete with medals, cups, brassards and other cycling trophies.

BICYCLES AND A FEW ACCESSORY STANDS

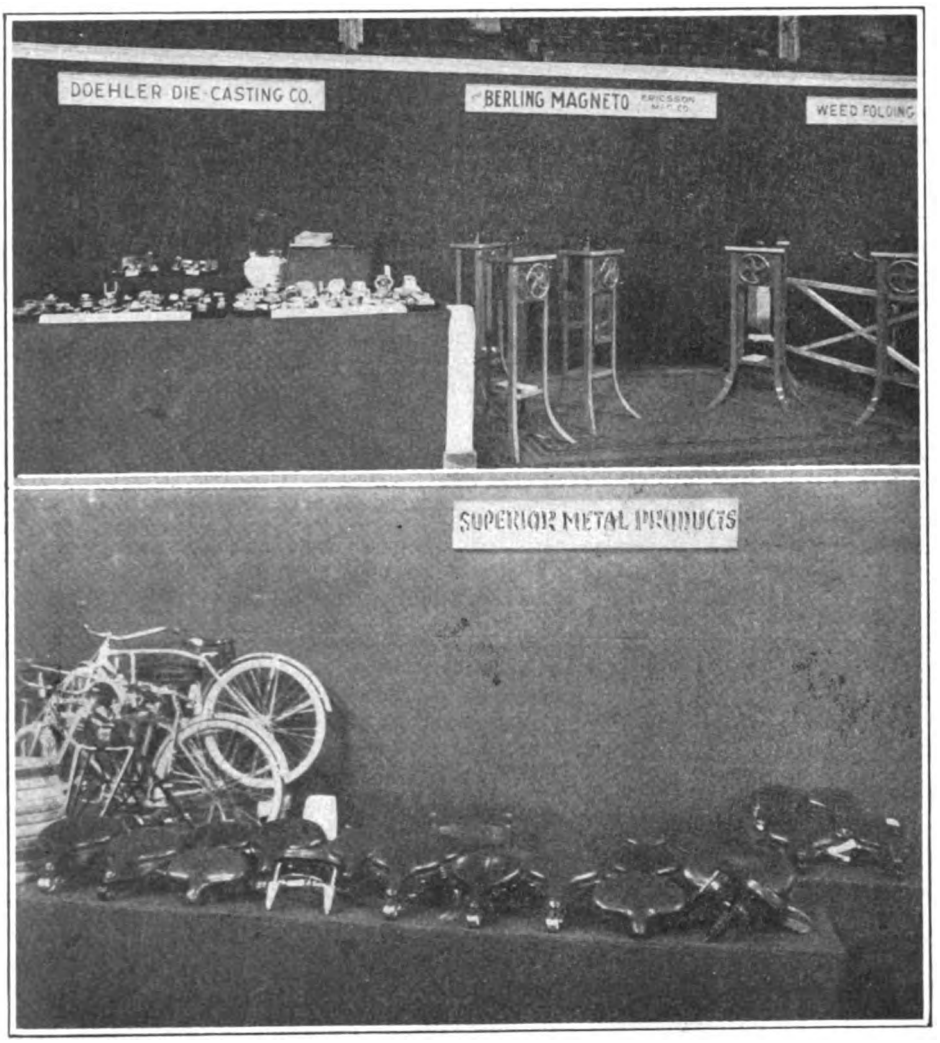
A TRIO OF INTERESTING SHOW BOOTHS



Top Picture, Products of Doehler Die Casting Company and Berling Magneto Display; Below, Line of Bicycle and Motorcycle Saddles Made by Superior Metal Products Co.

SOUVENIRS APLENTY FROM ECLIPSE

THE souvenir hunter finds his haven at the booth of the Eclipse Machine Co., of Elmira, N. Y. For the trade folk, the Eclipse boys have new 1917 diaries and pencils and for the kiddies and the more frivolous of the older folk the toy balloons which spread Eclipse fame from one end of the Garden to the other.

A. C. Rice, sales manager, presides at the booth, assisted by T. N. Biddle, H. P. Farming, G. S. Bush and W. M. Ingalls. President E. J. Dunn, General Manager J. C. Ferguson and L. S. Whittier are also at the show.

SHOWS DUCKWORTH CHAINS

GEORGE H. EMPSALL, assisted by a "silent salesman" in the shape of a full display of Duckworth chains in all their various types and sizes, did the honors at the booth of the Duckworth Chain & Mfg. Co., Springfield, Mass.

The Duckworth exhibit was set off by a trimming of potted ferns, which added greatly to the attractiveness of the booth.

WORKSMAN ARRIVES LATE

THE exhibit of Morris Worksman was one of the latest arrivals. Worksman came to the show with two special commercial outfits, one powered with a Dayton motorbike, which he exhibited under his own name, and the other with a Smith motor wheel, which was on display at the booth of the A. O. Smith Corp.

Worksman divided his time between his store, his own booth at the show, and the A. O. Smith booth, and left in charge at his booth M. Laurie, of his sales staff.

LENG'S BICYCLE EXHIBIT

A FULL line of Monarch bicycles, as well as Storm King and American Scout bicycles are shown by John S. Leng's Son & Co., of New York; bicycle sundries also form a big part of the display.

The bicycle line embraces men's and ladies' models, as well as juveniles, with emphasis placed on the racing machines.

Theodore C. Leng, Lafayette H. Kent, George Hees and R. H. Hance did the honors at the Leng booth.

Another Lineup of Dealers At the Show

BAKER, MURRAY & IMBRIE, INC., formerly the New York Sporting Goods Co., have signed numerous dealers for the Pierce bicycle in their territory. The following is a partial list of retailers who have signed for the Buffalo-made two-wheeler: Geo. Force, Jersey City; E. Lauriti, New York; Zeal Kraus, New York; Stern Bros., New York; I. Feinstein, New York; Baer Bros., New York; H. Sharp, New York; J. F. Blackman, Bronx, N. Y.; Parisian Cycle Co., Bronx, N. Y.; Iseman & Colletta, Bronx, N. Y.; Johnson, Estrick & Johnson, Bronx, N. Y.; M. Rappaport, Bronx, N. Y.; Kings Highway Electric Co., Brooklyn, N. Y.; E. R. Wagenorth, J. Collaiccio, Trotta Brothers, A. Freeman, Andrew Eckel, B. Slotnick, S. Slotnick, Victor Lind, J. Triebus, George Ashley, J. G. Felbinger, Ventrice Brothers, B. Robbins, S. Litman, George Lewis and Bob Brazenor, all of Brooklyn, N. Y.

Also H. R. Williams, Lancaster, Pa.; West End Electric Co., Harrisburg, Pa.; H. Platt, Hazelton, Pa.; L. Martin, Berwick, Pa.; John Rawlings, Scranton, Pa.; North Philadelphia Cycle Co., Philadelphia; Lit Brothers, Philadelphia; Harder Sporting Goods Co., Williamsport, Pa.; George Dengler, Reading, Pa., and C. W. Habecker, Lebanon, Pa.

FROM Providence, R. I., came Swenson, the Indian man, and he made his headquarters at the Hendee exhibit. If you did not know B. A. you would soon recognize him by his handshake if you had any hand left.

MR. AND MRS. M'GRAW, the Excelsiorites from Syracuse, were early visitors at the show. Mrs. McGraw was an interested visitor at the various stands, while her husband was attending to people at the Big X stand.

A. CRESCI, the Harley-Davidsonite from Vineland, N. J., was beaming with smiles. During the past season he sold 48 machines and 9 sidecars and at present he has orders for more than 15 machines for the new series. Cresci makes a specialty of selling his machines to the various city departments.

WILBUR RANKIN, formerly of the Decatur Motorcycle Shop, of Brooklyn, N. Y., was found at the Henderson exhibit. Rankin was well pleased with the amount of business he had done in the past and has now taken Charles Cloud in partnership with him. The new business is now located at 353 Sumpter street, where they handle the Henderson.

CLAYTON SANDRUCK, the veteran Excelsior representative from Baltimore, was at the Excelsior stand. He had sold more than 70 of the series 1917 and has just received his new model and has started on his new selling campaign.

THE Towner boys from Rochester, N. Y., breezed in, and are well satisfied with the Dayton and have signed for another year.

AT the Excelsior stopping place we discovered A. C. Longtin, of Elliott & Longtin, Watertown, N. Y., and Childs Bros., of Amsterdam, N. Y., both Excelsior boosters.

BIDDEFORD, Maine, and W. A. Clark were together at the show, because Clark is putting Biddeford on the motorcycle map and at the same time selling Harley-Davidsons.

Digitized by Google

GARDEN SHOW SETS NEW RECORD FOR SPECTACULAR AND INSTRUCTIVE EXHIBITS

(Continued from page 11)

By way of still further emphasizing the extreme lightness of the full nickel finished Columbia racing model, the Westfield Mfg. Co. has rigged up in its booth a platform mounting a nickel plated spring balance which records the 20½ pound weight of the speed model in a most impressive manner. It serves to hold the attention of the crowd in a most satisfactory manner.

Corbin Vibrator

Something of the same sort has been done by the Corbin Screw Corp., which has rigged up a vibrating stand by way of demonstrating the steadiness of the Corbin-Brown speedometer road shocks and motor vibration regardless.

The folks passing the booth of the Great Western Mfg. Co., especially folks of the comfort loving variety, are tempted to spend a few minutes in the restful-looking settees set in between the large southern palms which adorn the booth. The palms work well into the color scheme adopted in the show decorations so that the Great Western booth stands out like a little oasis amid the other booths.

Novel Movie Show

The New Departure folk rely upon the extreme popularity of the "movies" to attract and hold the crowd at the New Departure exhibit. A very clever little moving picture machine has been rigged up in the booth and it not only points out to the spectator the various features of New Departure service, but it also makes plain before its cycle has been completed, the various mechanical features that have won for the New Departure brake, and other New Departure fitments, the enviable name they have made for themselves in the cycle trade.

Those who fail to stop at the historical booth and go over the models which record the progress which has been made in American bicycle construction right up from the beginning of cycling some thirty years ago to the present day, and the fifteen years of progress that have made the American motorcycle the reliable vehicle that it is today, are quite few and far between.

The bicycle display, which was supplied by the Westfield Mfg. Co., pioneer bicycle manufacturers of America, occupied four full booths. The historical motorcycle display, which was loaned by the various motorcycle manufacturers and which is very comprehensive, occupies an equal amount of space.

The Bluecoat's Exhibit

The smokers stop short and cast aside their cigars and cigarettes when the police department booth is reached. The two police officials on duty, however, are not there to correct the disorderly or even to impress them with their august presence. They are there for an altogether different purpose, and a most laudible one. That is to point out to the motorcycle and bicycle riders the benefits accrued from a strict adherance to the "safety first" policy at all times.

The characteristic green lighted street signs and a couple of set pieces behind glass and handsomely illuminated together with a complete line of picture cards and booklets, all bringing home to the observer the safety first idea, serve to make this booth more than ordinarily attractive.

Among the other pleasing displays is that of the H. & F. Mesinger Mfg. Co., in which the set piece is a full white leather saddle suitably mounted on a black plush background, and showing up every one of its many distinctive features. The Mesinger way of demonstrating the easy riding qualities of the air cushion saddle is also noteworthy. A special stand has been rigged up mounting two of the saddles so that the booth visitor can straddle them and try out for himself the feel of the Mesinger product.

Neverleak Booth

The Neverleak booth, that is the booth of the Buffalo Specialty Co., is made distinctive by a colossal tube of the now famous tire fluid set up in lieu of a corner post. The tube stands some ten feet high and can be seen from all parts of the show floor.

Serving as an interest holder at the booth of the Flxible sidecar is a Reading-Standard - Flxible sidecar combination which has just come from the border. While the machine shows that it has had hard usage, as is pointed out by the booth attendants, it has lived through the ordeal and from a mechanical point is as good as the day it left the factories.

Some Attractive Ones

Among the other attractive booths is that of the Eclipse Machine Co., which is set off with ferns, Eclipse pennants and black and gold plush hangings in a most attractive manner; the Okay motor booth, which includes a full white enameled model mounted on a scale in a gold frame and lighted up to make plain not only its light weight, but also its compactness and simplicity; the Thor booth, which is made distinctive by the use of a handsome flashing electric sign calling the attention of the passerby to the pleasures that come of motorcycling; and the booth of the Century Road Club Association, which is just "chock" full of cups, medals, brassards and other cycling trophies as well as with members of this now famous bicycle organization who are just flowing over with cycling enthusiasm.

Dutch Girl Again

No cycle show is complete without a Dutch girl, and that little lady is there in person at the booth of Van Cleef Brothers. As was the case at Chicago, the Dutch idea, significant of the Van Cleef brand name is carried out throughout the whole exhibit, the color scheme being orange and blue, the Dutch national flower, the tulip, being present in abundance.

EASY FOR THE R-S

A Shale-Strewn Grade Offers Little Difficulty to the Powerful Brown Twin

LUCKY NYMPHS!

Ogden Sells Cygnet Limousine to Show Manager

EARLY on Tuesday morning Leadley Ogden, of the Cygnet, closed a deal at the show of which he is mighty proud.

He sold a Cygnet limousine DeLuxe model to Charles T. Earl, a theatrical man, who is traveling the country with a company of "diving Nymphs." The Cygnet outfit will be drawn by an Indian Powerplus machine, which was also sold from the show floor, and will be used for advertising as well as utilitarian purposes.

It is Earl's intention to furnish the machine with a uniformed chauffeur and to provide a life-size cutout picture of it for advertising purposes in the lobbies of the theatre. It will also be featured in the show advertising which, as Ogden points out, cannot fail to prove of benefit to the show at large.

DEALER STAGES RACES

Providence Booster Attracts Enthusiastic Field for Two Road Events

PROVIDENCE, R. I., Dec. 3.—The bicycle races arranged by John Montecalvo, a dealer at 129 Spruce street, for Thanksgiving Day, were not held until Saturday because of rain. There were about 20 entries in each event and some really good racing was shown. The course lay over an ordinary road built of macadam and was in good condition.

PERSONS INCORPORATES CYCLE CO.

Worcester Manufacturer Forms Silvertown Cycle Mfg. Co. with $500,000 Capital—Deliveries Within 60 Days

WORCESTER, Mass., Dec. 6.—With the incorporation of the Silvertown Cycle Mfg. Co., under Massachusetts laws, and with an authorized capitalization of $500,000, it came to light that Charles A. Persons is back in the bicycle manufacturing business.

The Silvertown company has already secured space in the Bradley building in this city, and will be in a position within the next 60 days to supply a comprehensive line of both high and medium priced bicycles to the trade.

Associated with Persons in his newest venture are several prominent Worcester manufacturers and Boston bankers, whose names, however, will not be disclosed at the present time.

When seen in connection with the matter Persons pointed out that before incorporating—in fact, before mentioning the matter at all to folks in the trade—the parties interested had gone ahead and purchased sufficient material for the production of 20,000 bicycles, and had secured a well-equipped plant for manufacturing purposes, so that the new concern enters the market in the enviable position of being able to make deliveries right from the start.

As for the details of the bicycles which the Silvertown company will manufacture but little is forthcoming. It is stated, however, that among other things a full nickel finished line will characterize the new company's offerings.

JUST ABOUT DEALERS

F. W. SANDRUCK, JR., the Hendersonite from Baltimore, Md., was flitting around with a smile of satisfaction on his face. F. W., Jr., is a new dealer in the Sandruck family of motorcycle dealers. To date he has orders for more than 17 of the new model Henderson.

A GATHERING OF bicycle speed boys loomed up in the shape of the Spencer Brothers from the land of the Maple Leaf, Dupuy the Frenchman and Hans Ohr: from San Francisco.

FORD WAS THERE. Not our friend Henry, but just plain W. A. who looks like real money from White Plains, N. Y. W. A. handles the Harley-Davidson and many of them.

FROM WAY UP NORTH, from Portland, Maine, H. G. Adams, the Cleveland and Henderson delegate, dropped in. It's cold up there, says Adams, but not cold enough to chill next season's bright outlook.

MEYER AFFRON let drop that he was trying to devise some schemes whereby he could sell more Harley-Davidsons at Kingston, N. Y. He was immediately ushered in to the "Most Innermost" and E. J. Mueller did some devising for him.

MORE AD SUGGESTIONS FOR DEALERS

A Couple of "Ready-Made" Newspaper Ads Covering Both the Commercial and Pleasure Fields For the Dealer Who Has Not Time to Devote to Copy Preparation

Dollar Saving Tips for Merchants

YOUR Customer, Mrs. Brown, lives *miles* away. She *always* wants some article, and wants it *immediately*

You cannot give her the service she demands with either horse or auto delivery. One's too *slow* and the other's too *costly*.

But Mrs. Brown buys the "fancy" stuff with the "wholesome" profit. You would *like* to serve her but—

Every merchant has reluctantly lost customers of Mrs. Brown's type. But you can *hold her trade* and her good will alike. *How?* Mail or phone a request for a demonstration of the merits of the

"*Best*" Motorcycle

Dealer's Name, Address and Phone Number

FOLLOWING up the quartet of advertising suggestions which were published a couple of weeks ago and still further emphasizing the fact that **Motor Cycle Illustrated** is willing to go a step more than half way in extending the helping hand of real service to the motorcycle dealer, we offer on this page two more newspaper ad suggestions which cannot fail of proving helpful to the dealer who has neither the time nor the necessary training to prepare the sort of ad copy that nets results in the shape of increased sales.

As was explained last time, the matter is prepared to cover any make of motorcycle; to stir up interest in the motorcycle itself and not in any particular make. It is distinctly up to the dealer making use of the ads to hook them into the make of motorcycle which he is selling by substituting the name of his machine for the general name "BEST" which we have used for obvious reasons; also by the use of a small cut of the make of machine he handles if possible.

The ads are a continuation of the two series—one bearing on the commercial motorcycle and the other on the pleasure mount—which were started with the last suggestions and it is suggested that they be run in consecutive issues of the daily or weekly paper which carries your ad. Run this way, they cannot fail of bringing in maximum results.

Don't forget that we stand ready to supply you with an electrotype of any of these ads, properly mortised for the reception of the reading matter you need to hook the ads into your own proposition—name of your machine; your name, address and phone number, etc. We supply you with these electros at cost price plus the necessary postage. Address, Service Department, **Motor Cycle Illustrated**, 21 Park Row, New York City.

The ads are made up to fit single column measure and are about eight inches deep; a size that is sufficient to give a good punch without, however, costing a great deal to run. There is not a reason in the world, however, why the same idea cannot be expressed in a two column ad at about half the depth if the dealer prefers that space to the single column measure. In that case, when you write our Service Department, simply ask for an electro of the little picture you desire, and not the whole ad.

Take a Friend with You on Your Trip

MAN is normally a *sociable* animal. He craves companionship. But he does not need a costly auto to carry a friend or two with him on his motoring trips.

A motorcycle with *sidecar* fills the bill. It will give him *double* the fun at *half* the expense of the four-wheeler.

Yes, the motorcycle's a *family* vehicle. Thousands of families are proving that. *Maximum* fun, *minimum* cost; that's the motorcycle idea.

Drop in and let us explain how the motorcycle will fit into *your* family circle. We are *proud* to demonstrate the 1917

"*Best*" Motorcycle

ARMY ASKS FOR $62,000 FOR MOTORCYCLES

War Department Makes Request for Funds from Congress—Bids Asked on 200 Machines in Addition to 78 for Engineering Corps

WASHINGTON, Dec. 5.—The strongest recognition that has yet come for the motorcycle from the Government came through today in the shape of a request from the War Department to Congress for $620,000 for the purchase of armored motorcycles for army use.

Coincident with the request for funds from Congress, comes a request for bids on from one to two hundred twin, two or three speed machines fitted with tandem attachments issued by the Quartermaster's Department in New York.

It is stated also that the appropriation is intended to cover 78 machines for the engineering corps in addition to the 200 machines embraced in the request for bids, and a large number of motorcycles for use by the signal corps.

The request for bids for the 200 motorcycles cover the following equipment: Prest-O-Lite outfit including head light, tail light, gas tank and necessary copper tubing; warning signals; oil lamps; speedometers and sets of spare parts embracing spark plugs, valves spare tubes and valve stems, tools, pump and oil cans. The specified finish is olive drab.

The bids close on Friday (tomorrow) Dec. 8, and the time of delivery must be stated in the bids. The bids are to hold good until June 30, 1917.

BICYCLE MAKERS MEET

Weighty Matters Discussed at Hotel Astor Gathering

NEW YORK, Dec. 6.—The Bicycle Manufacturers' Association met over the luncheon table at the Hotel Astor this afternoon and indulged in a lengthy discussion of some very important phases of the bicycle trade conditions. Some matters of weight were put through which, however, in the decision of the association members, it would be highly inadvisable to give publicity to at this time.

It was decided the next meeting would be held at the Secor, Toledo, O., on Tuesday, January 16th.

Those present at the meeting were: Charles Lonn, Great Western Mfg. Co.; W. G. Schack, Emblem Mfg. Co.; Keyser Fry, Reading Cycle & Mfg. Co.; J. P. Fogarty, Westfield Mfg. Co.; H. M. Huffman, Davis Sewing Machine Co.; Fred Brown, Pierce Cycle Co.; W. J. Ash and C. R. Miller, of the Miami Cycle & Mfg. Co.; Pete O'Horo, Excelsior Cycle Co., and Col. George Pope, executive secretary of the association.

R. F. D. SITUATION

Department Forces Rural Carriers to Give Up Cycle Agencies

MILWAUKEE, Wis., Dec. 2.—That the Rural Free Delivery situation has taken another twist comes from the Harley-Davidson Motor Co.

It seems that several of their dealers in the rural districts, who also handle a mail route, have been forced to give up the motorcycle agency under the penalty of losing the mail route.

Post office inspectors the country over are warning motorcycle dealers handling the R. F. D. routes that one or the other of the separate lines must be given up and the Harley-Davidson folk point out that with the present Postmaster General in office, and he doubtless will remain for another four years, there is absolutely no relief in sight.

Postmaster General Burleson has always been antagonistic to the motorcycle, having first limited its use on the R. R. D. routes and finally brought things to a point where its use is all but prohibited. This latest course taken by the department is right in line with the policy that has been pursued with reference to the motorcycle since a year ago last June.

TRIANGLE RUN AWARDS

PROVIDENCE, R. I., Dec. 4.—B. A. Swenson, the Indian Motorcycle man, has been distributing prizes the past week to those who participated in the annual Triangle run to Boston and Worcester in October. The prize is a watch fob, bearing a beautiful charm of an original design, while the name of the winner is engraved on the rear.

GOLDSMITH IS DAYTON CHIEF ENGINEER

Former Automobile Designer to Oversee Construction of Dayton Products; Long Experience in Motor Vehicle Industry

DAYTON, O.—F. C. Goldsmith, formerly efficiency engineer for the Haynes Automobile Company, has resigned to accept the position of chief engineer for the Davis Sewing Machine Company, maker of Dayton bicycles and motorcycles.

F. C. Goldsmith

Mr. Goldsmith is a graduate of Purdue University, Lafayette, Ind., and was for several seasons instructor in machine design at that institution. He has been connected with experimental work with automobiles and starting and lighting equipment, as well as the designing end, and has had a fund of experience which fits him ideally for his new post.

Mr. Goldsmith has already added Joe Powers, formerly chief draughtsman for the Haynes company, to his highly efficient staff.

EMPIRE REORGANIZATION

Trenton Tire Firm Changes Name and Recapitalizes

TRENTON, N. J., Dec. 6.—The Empire Rubber & Tire Co., maker of Empire tires, has reorganized under the name of Empire Tire & Rubber Corp., under the laws of New Jersey, and with an authorized capitalization of $6,000,000. The stock is divided as follows: $1,500,000 cumulative seven per cent preferred of $100 par value, and $4,500,000 of common at $10 par value: all of the preferred stock is to be issued, but only $3,000,000 of the common will be offered at the present time.

The entire issue has been underwritten by a syndicate formed for the purpose, and is being offered at the present time to investors through reputable New York brokerage concerns.

ARTLEY SCORES AGAIN

Wins Bakersfield Hill-Climb on Indian; Tice, on H-D in Second Place

LOS ANGELES, Dec. 4.—A good-sized crowd of riders from this city and vicinity attended the hill-climb at Bakersfield yesterday. There was much talent on hand, and spectacular ascents were the order of the day.

Roy Artley, mounting a 1917 Powerplus Indian, went up the 800-foot, 55 per cent grade in 21⅘ seconds, thus making the best time of the day. Ed. Tice, astride a Harley-Davidson, was in second place, his time being 23½ seconds. J. Parks, using a Henderson, made the climb in 27¼ seconds.

HARE AND HOUNDS CHASE

DENVER, Colo., Dec. 4.—One of the main events on the Thanksgiving Day sports program in Colorado Springs, Colo., was a hare and hound chase for motorcycle riders. The event was run over a course starting at the Nevada avenue bridge, in Colorado Springs, taking the Canon City road to Little Fountain and then back to the city limits of Colorado Springs, a distance of 45 miles.

RACE AT STOCK FAIR

DENVER, Colo., Dec. 4.—On the last day of the Stock Show that is to be held in Grand Junction, Colo., December 6 and 7, a 10-mile motorcycle race at the fair grounds will be the main sporting event of the day.

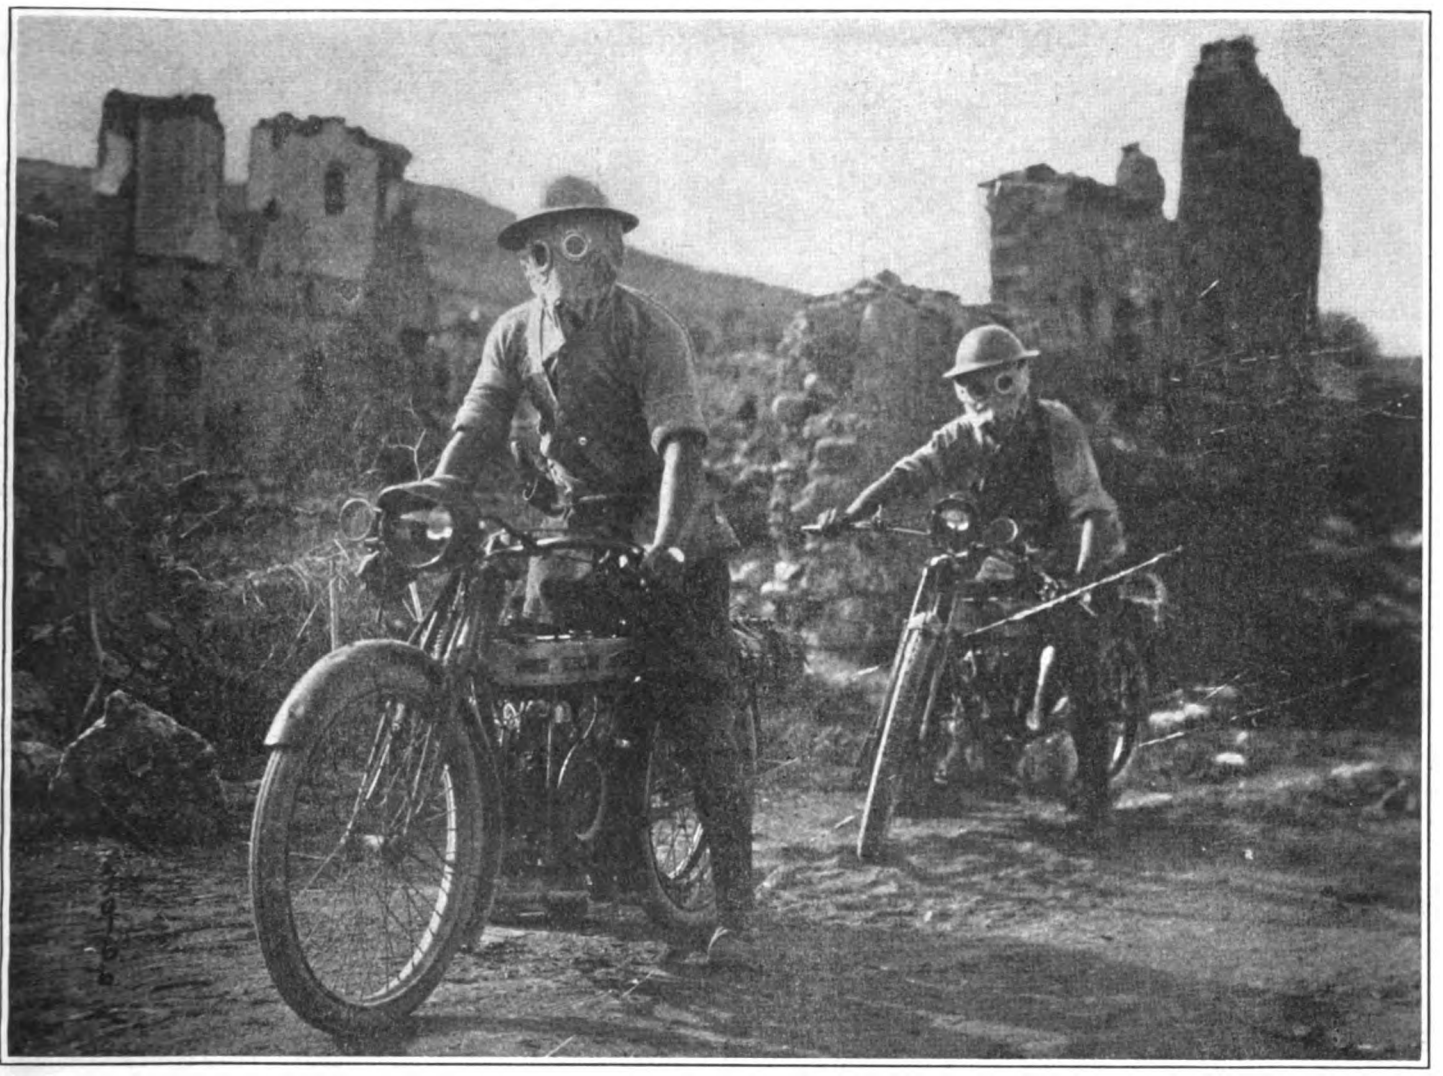
HOW GAS MASKS ARE UTILIZED BY DISPATCH RIDERS IN FRANCE



This Remarkable Photo Shows Two Motorcycle Couriers Attached to the English Forces in Northern France; They Are Often Called Upon to Carry Their Precious Messages Through "Gas Zones," Hence the Weird-Looking Masks

DAVIS TRAVELER

Rosenfield Joins Dayton Staff to Cover Illinois and Indiana

W. S. ROSENFIELD, of Chicago, Ill., is the latest addition to the traveling salesmen for the Davis Sewing Machine Co. Mr. Rosenfield is covering Illinois and Indiana, closing agencies on the Dayton Motor Bicycle and Motorcycle. He reports to the factory that Dayton dealers everywhere are enthusiastic over the prospects for the coming season, both with Dayton Bicycles and with the new line of Dayton Motor Bicycles.

Prompt deliveries are especially pleasing to the Dayton dealers, and many of them find considerable Christmas business in sight already. Mr. Rosenfield was formerly with the A. O. Smith Co.

GROSSMAN DETAILS

How New $320,000 Stock Issue of Brooklyn Concern Is Divided

BROOKLYN, N. Y.—In connection with the reorganization of the Emil Grossman Manufacturing Corporation, with a capitalization of $320,000, M. L. Schwartz, vice-president, points out that 10,000 shares of common stock of no par value have been issued.

As for the rest of it, the capital stock is divided as follows: 1,500 shares of first preferred at a par value of $100 per share and 1,600 shares of second preferred also at a par value of $100 per share.

Emil Grossman remains as president and general manager and L. M. Schwartz becomes vice-president; C. L. Hemple, secretary, and Harman August, treasurer.

TRUMBULL WITH S. K. F.

HARTFORD, Conn., Dec. 2.—Horace N. Trumbull has been appointed advertising manager of the S. K. F. Ball Bearing Company of this city. Trumbull has long been identified with the motor industry and knows the parts business from A to Z.

BERLING JOINS M. & A. M.

NEW YORK, Dec. 2.—The Ericsson Manufacturing Company, makers of Berling magnetos, has joined the Motor and Accessories Manufacturers' Association. The association, which is made up of folk making parts and accessories for automobiles, embraces in its membership a number of folk who are also closely identified with the motorcycle trade.

WINDOW PICTORIALS

Latest Aids from Harley-Davidson to Draw Attention to Sales Windows

MILWAUKEE, Wis., Dec. 2.—The wonderful double transcontinental trip of the Los Angeles cripple, Alfred Le Roy, who although handicapped by the loss of both legs and his left arm encounters little difficulty in piloting his Harley-Davidson sidecar combination, at the spectacular dash of R. L. Bishop and S. C. Hamilton from Pittsburgh to Shadow Lawn with an invitation for President Wilson, both of them likewise on Harley-Davidson machines, are featured in the two window pictorials gotten out this week by the Harley-Davidson Motor Co.

These pictorials are supplied for use in their show windows to Harley-Davidson dealers the country over, new pictures being issued on a regular basis.

MOTORCYCLIST GETS DAMAGES

PROVIDENCE, R. I., Dec. 5.—Peter Mounier, Central Falls, has been awarded a verdict of $1,100 against Charles E. Bassett, an automobile owner. Mr. Mounier, a motorcyclist, claimed damages as the result of a collision between the two machines in which Mounier was injured.

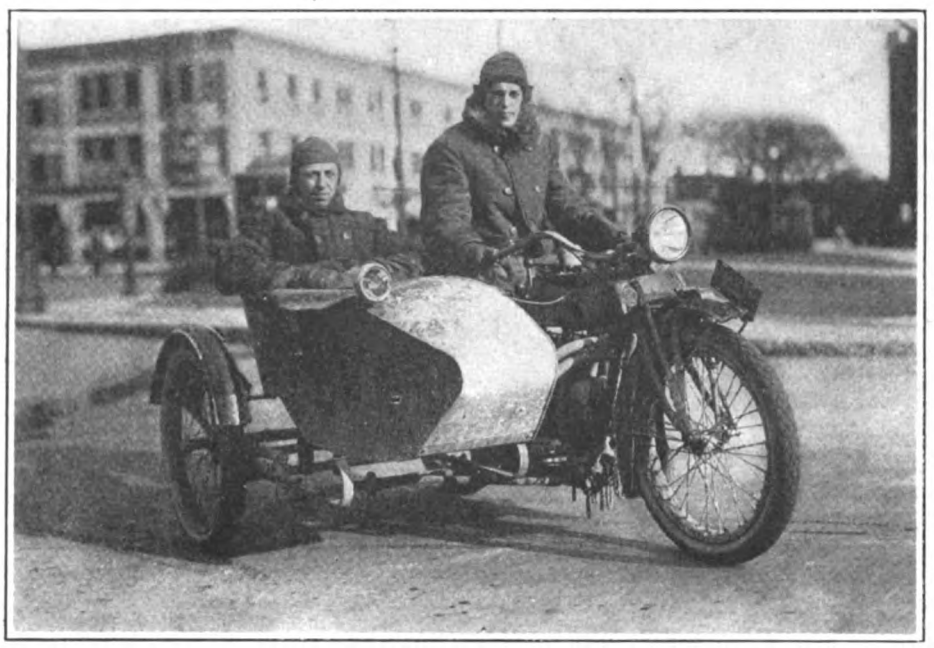
AMATEUR SIDECAR RECORD GOES UP

Messrs. Buck and Pasmore Drive Indian Combination from Springfield, Mass., to Montreal. 584 Miles, in 24 Hours, Thus Beating Recent New Jersey Record—Bad Weather Throughout



Buck and Pasmore Leaving Springfield, Mass., at Start of Trip. Buck Is Driving

WARREN, Mass., Dec. 5.—Using a 1917 Indian Powerplus and sidecar Edgar H. Buck, of Warren, Mass., with Howard S. Pasmore, of Mt. Vernon, N. Y., as passenger and observer, established a new 24-hour road record in a run starting in Springfield, Mass., at 6 p. m. November 28, and ending in Montreal at 5:45 the following evening.

The event was an F. A. M. sanctioned ride, and beats the amateur record established two weeks ago by 39 miles. The run made by Buck and Pasmore was naturally over a straightaway road, the former record having been made over a circuit which the riders rounded approximately four times. Buck's actual running time was 19 hours and 27 minutes, and the distance covered was 584 miles.

Through Adirondacks

The run was made through the Adirondack mountains and over roads covered with ice or mud, the mud being so deep in some places that it was necessary for the driver to get off and steer while the observer climbed out of the sidecar and pushed. Neither man had previous experience in an endurance run of this nature, so neither was properly equipped for the hardships of the trip. They had no protection for their faces, not even being supplied with goggles, the result being that when they struck the sleet and snow storms they suffered intensely from cold. Previous to this run Buck had not driven a sidecar more than 500 miles all told, and Pasmore was almost a total stranger to sidecars.

The riders started from the Hendee plant in Springfield at 6 o'clock on the evening of Tuesday, November 28. At first the running was not bad, except for the traffic they were obliged to go through. When they reached New Haven it began to mist and as they pulled into Bridgeport the mist turned to a steady rain. From that time forth they were confronted by a continuous stretch of wet and slippery roads, and by a rain which made it extremely difficult for them to see where they were going. There was no moonlight whatever, and during the next day there was little sunlight, the sun actually shining for only nine minutes during the entire run.

Heading Northward

At Mt. Vernon, where they arrived at 10:20 p. m., they stopped at Pasmore's home for a lunch, but being nearly two hours ahead of their schedule, the lunch was not ready and they lost 40 minutes before being able to get under way again. From Mt. Vernon to Peekskill they were obliged to run frequently on second or low gear, the roads being muddy and greasy, with frequent hills. Just outside Poughkeepsie they struck one of the worst stretches of road they found anywhere on the trip, the mud being deep and sticky and the road closely resembling a plowed field after a storm. In Poughkeepsie they lost time hunting for gasoline, being obliged to try three garages before finding a man awake.

After leaving Poughkeepsie they began to experience the real hardships of the run. The weather turned colder and the rain began to freeze on their legs, while the roads became more and more slippery. At Albany they spent 35 minutes taking on gasoline and drinking a couple of cups of hot coffee, the latter proving its worth during the run from Albany to Schenectady.

How Time Was Lost

Approaching Saratoga they found the roads entirely coated with ice, a condition which made it necessary for them to almost stop when turning a righthand corner. Another cup of coffee, taken in Saratoga, cost them 18 minutes. In Glens Falls they made an attempt to buy rubber shoes and trousers, but could find no stores open. They succeeded in making the purchases in Lake George Village, where they also took on more gasoline. Making the purchases, and changing to heavy woollen socks, with newspapers wrapped about their legs under the rubber trousers, cost them 35 minutes more. In Elizabethtown, where the sun deigned to shine on them for nine minutes, they lost 25 minutes more in hunting for a garage in order to replenish their gasoline tank.

From Lake George they began the climb up the Adirondacks through roads covered with snow and ice, much of the running being done on second or low gear. Near Keene they struck an especially bad stretch of ice and snow, which stayed with them until they reached Keeseville. From the latter place to Plattsburg they found

100 GIRLS OF DAVIS WELFARE CLUB AT THANKSGIVING DINNER

DAYTON, Ohio.—One hundred girl employes of the Davis Sewing Machine Company, who are members of the Welfare Club at the factory, participated in a turkey dinner on Thanksgiving Day in the dining room at the plant. The club was formed about a year ago and has been highly successful in promoting the welfare of the girl workers, chiefly along social and recreational lines.

The Davis company has furnished the Welfare Club with a dining room and equipment, but otherwise the girls have made their organization self-supporting. They now have a neat balance in their treasury, although a piano was recently purchased.

TO STOP SPEEDING

Denver Police Chief Proposes Mile Per Hour Fine as Remedy

DENVER, Colo., Dec. 2.—Owing to increase in violations of the speed limit by motor vehicle drivers, Police Chief Armstrong is advocating an increased fine as an adequate remedy. This fine will be $5 per mile hour over the speed limit.

"This would make fast driving costly," says the Chief, "and the faster the more expensive. It would take the sportiveness out of speeding by those inclined to disregard the rights of others. Only heavy fines that will cripple the pocketbook will be effective."

MILLER VAN SATISFIES

DENVER, Colo., Dec. 2.—The Miller Rubber Company, 1633 Broadway, this city, is getting good service out of an Indian motorcycle and van. The motorcycle is in use by the service department of the concern. The van is built in a round shape in order to better carry tires. The van is painted red to match the motorcycle and on it in gold letters is the name of the rubber company.

GOOD SEASON IN DENVER

DENVER, Colo., Dec. 2.—Business at the different motorcycle stores in this city continues good. The month that has just passed has been a good one for the dealers in spite of the fact that something like four snow storms and some cold weather visited Denver and vicinity in November. The new models have been at the different stores long enough now to make it possible for quite a number of prospects to inspect them and become acquainted with them.

TURKEY SHOOT

Three Pueblo Riders Win Five Birds in Vineland Contest

PUEBLO, Colo., Nov. 27.—Five fat turkeys were won by three Pueblo motorcyclists yesterday at Vineland, Colo., in a turkey shoot staged by Floyd Huntsacker, himself an ardent motorcycle enthusiast. The winners were Clarence Studzinski, three turkeys; O. N. Johnson, Excelsior agent, one turkey, and Damon Royce, one.

Others who rode out on their motorcycles and took part in the contest were: Henry Smith, Bernard Chasteen, Fred Engstrom, William Brommer and V. C. Springer. All belong to the Pueblo Rifle Club, recently organized, and attribute their success to proficiency in marksmanship attained thereby.

PRIZE WINNING BOWLERS

MILWAUKEE, Wis.—Messrs. Fitzgibbon, Viebrink, Stelzner and Zetterlund walked off with four turkeys put up by Walter Davidson for the best showing during Thanksgiving week by members of the Harley-Davidson bowling league.

One of the birds went to the winner on each of the three alleys and the other went to the bowler making the greatest increase in his average.

INDIAN FACTORY GUNNER BAGS A FINE BUCK

SPRINGFIELD, Mass.—Eugene Madden, chief of the Hendee drafting staff, took a day off during the short deer-hunting season in Massachusetts and brought home a 250-pound buck to prove his prowess as a nimrod. Mr. Madden made the trip into the woods, a distance of 60 miles, with his Indian motorcycle and sidecar, and used the latter to transport his deer home.

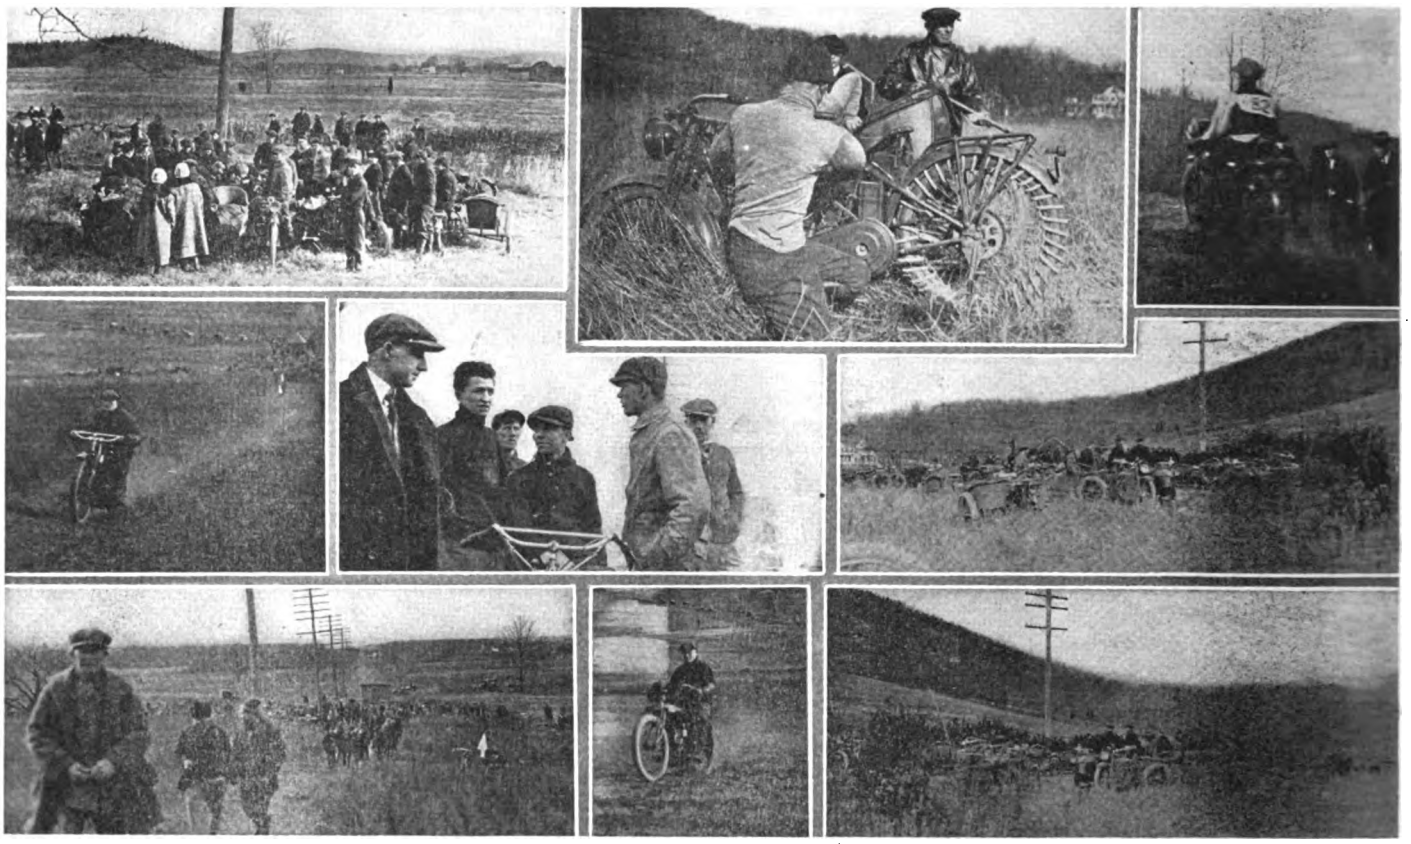
CONSTANT SETS PACE ON JERSEY HILL

Brooklynite Climbs 850 Feet on New Police Model Indian in 21 4/5 Seconds; Terhune, Harley-Davidson, Is Second in 23 Seconds; Snyder Makes Best Sidecar Climb with Indian Outfit

BY E. B. HOLTON



A Conference of Contestants Before the Climb; Havenstrite "Roped Up" for the Ascent; Harry Somers Indian, Going Up; Center Row, Left to Right, Damback, Henderson, Passing the 300-Foot Stake; Steele, Walton, McKinney and Thebaud Talking It Over; a Bunch of Parked Machines; Bottom Row, the Crowd Going Up to View the Events; Snyder Ascending on Indian; Another View of the Parked Machines, with Sidecars Predominating

NEWARK, N. J., Dec. 3.—Amid a roar of exhausts and a cloud of smoke the first annual hill climb of the New Jersey Motorcycle Club was contested today, and when the air had cleared John U. Constant, on one of those new police model Indians, had rocketed his way to victory in the solo class with an ascent in 21 4/5 seconds and Harvey Snyder, also riding the Springfield-made machine in the sidecar class, swept the boards clean with a climb of 777.6 feet.

J. W. Terhune, Harley-Davidson, riding his 1915 motor, was just a shade behind "Conny," snorting to the top in 23 seconds flat and copping second honors.

Harvey Snyder took third in the solo class, mounted on a war-colored Indian, weaving his way through the shifting sand in 26 seconds.

Bush Surprises the Crowd

Carl W. Bush, on a bright new 1917 Harley-Davidson hooked to a little old last year's Rogers, electrified the crowd by a fine climb of 770.3 feet first time out. His passenger, Eddie Druning, showed the rest of the passengers how to give that spinning rear wheel traction, and they were quick to copy.

Carl's second try was not so lengthy. It measured 534.4 feet and was not touched again except by Snyder. Bush and his Harley-Davidson therefore drew the silver medal.

Elmer Havenstrite, 1917 Harley-Davidson, took third honors in the sidecar class with an average of 471.3 feet, just beating out A. J. Terhune, 1917 Harley-Davidson, by 5 feet.

It was estimated that a crowd of 1,000 people lined the sides of the hill, stood at the top or bottom, and yelled for a good climb regardless of machines.

Over 250 motorcycles and 50 autos were parked at the base of the hill, and from the enthusiasm shown hill-climbing has it all over every other form of motorcycle competition.

Constant's Three Climbs

In "Conny's" three respective rides he made the hill in 24.4, 24.8 and 21.8 seconds, showing remarkably consistent riding.

His motor was one of those big valve machines in a rigid frame and with an over-sized Firestone on the rear. His ignition was supplied by a Hendee generator.

Snyder used a spring frame model Indian—Walter Goerke's pet—and pinned his faith to United States "Nobby Treads" and Weed chains for traction. Snyder also used a Hendee generator.

The ball opened with Havenstrite whirling over the summit in 34 4/5, which Walter Goerke immediately bettered by an ascent in 32 flat.

Then came three failures, Holton, Walton and Grimm, all on Indians, "somewhere 'twixt top and bottom;" then Calvin R. Webber, 1917 Indian, meandered to the top in 1 minute 10 seconds.

Then came another string of "almost-made-its"—Weinkop, Indian; Werner, Harley-Davidson; Dombach, 1917 Henderson; Blecher, Harley-Davidson; Les Wintsch, Indian, and Bergfels, Harley-Davidson.

Ralph McKinney, 1915 Harley-Davidson, then shoved her over the top in 59 4/5, followed by four more candidates for the Alibi Club: Snyder, Indian; Young, Indian; Mims, Harley-Davidson, and Somers, Indian, in the order named. Line forms to the right.

"Chet" Charles, Indian, the man who discovered that the hill could be climbed on a motorcycle, tore up to the top in 37⅘, the first man the timers had clocked for ten minutes.

McDonald's Good Showing

Two more failures, Stoner, Excelsior, and Thebaud, Indian; then McDonald, Indian, went up in 31 seconds, the second fastest

MICHAELS BEST IN WHEELING HILL-CLIMB

On Ancient Thor, Takes Class A Solo Event and Free-For-All in 38 Seconds—Time Made in Wheeling Club's Fourth Annual Program Not Up to Previous Year's Standard

WHEELING, W. Va., Dec. 1.—Six-tenths of a mile of 15- to 20-per cent grade up Fulton hill and a Thor motorcycle of ancient vintage, coupled with a degree of pluck that enters into the making of a real speed star, won for Dave Michaels the lion's share of the glory attaching to the fourth annual hill-climb of the Wheeling Motorcycle Club yesterday afternoon.

Michaels finished first in the class A solo event and the free-for-all. His time for those events was 38 seconds. The time made in the events yesterday was not up to the standard of the previous meets. This year the club inaugurated a new electric system in checking the riders as they finished, recording their time with absolute accuracy.

The day was ideal for the hill-climb and several hundred enthusiastic motorcyclists gathered for the events. They were started at 2 o'clock and the last event was completed at 5:30 o'clock. During the afternoon the course was kept clear of traffic by local police officers.

Match Race the Big Feature

The stellar event of the afternoon was the match race. Otto Ritz and G. H. Miller were the participants. Ritz won, his time being 40½ seconds.

Near the finish of the first event an accident was narrowly avoided. Carl Glasser was leading the event when two women stepped from the side of the course directly in front of the speeding motorcyclist. To avoid hitting them Glasser stopped his machine. His action caused him to lose the race, but a desperate spurt enabled him to finsh third, one quarter of a second behind the second rider.

The summaries:

Event No. 1—Side cars, 61 cubic inches for club members only. Walter Bowman, Excelsior, first, time, 51 seconds; Walter Woris, Harley-Davidson, second, 59½; Carl Glasser, Harley-Davidson, third, 59¾.

Event No. 2—Side cars, over 61 cubic inches. Bob Newell, Washington, Pa., Harley-Davidson, first, 52 seconds; Earl Braunlich, Harley-Davidson, second, 53 seconds; C. L. Chesire, Harley-Davidson, third, 53½ seconds.

Event No. 3—Solo, class A, 61 cubic inches, for club members only. Dave Michaels, Thor, first, 38 seconds; Elmer Gardner, Excelsior, second, 39 seconds; Walter Bowman, Excelsior, third, 40 seconds; Andy Pastors, Harley-Davidson, fourth, 40 2-5 seconds; Otto Ritz, Harley-Davidson, fifth, 41 2-5 seconds; Robert Campbell, Henderson, sixth, 43 seconds; LeMoyne Pickens, Thor, seventh, 43½ seconds; George Clapper, Harley-Davidson, eighth, 44 seconds.

Event No. 4—Single cylinder 30-50 port. Otto Ritz, Harley-Davidson, first, 39 2-5 and 44 seconds; George H. Miller, Indian, second, 43 and 45 seconds; John Weidner, Excelsior, third, 44 seconds; Walter Johnson, Indian, fourth, 45 seconds.

Event No. 5—Twins over 61 cubic inches. Big valves and special motor. John Simonia, Excelsior, first, 41 seconds; John Weidner, Excelsior, second, 44 seconds; Walter Johnson, Indian, third, 45 seconds.

Event No. 6—Special event. Second gears sealed. Emery Herrold, Indian, first, 47 seconds; Dan Prager, Pope, second, 48 seconds; Walter Worls, Harley-Davidson, third, 49 seconds.

Event No. 7—Free-for-all. Twins. Dave Michaels, Thor, first, 38 seconds; Andy Pastors, Harley-Davidson, and Elmer Gardner, Excelsior, tied for second place with 39½ seconds; Walter Bowman, Excelsior, third, 40 seconds; Otto Ritz, Harley-Davidson, fourth, 41 2-5 seconds; J. P. Wasmuth, Excelsior, fifth, 42 seconds; Robert Campbell, Henderson, sixth, 44 2-5 seconds; LeMoyne Pickens, Thor, seventh, 45 seconds.

Events No. 8—Match race. Otto Ritz, Harley-Davidson, first, 40½ seconds; G. H. Miller, Indian, second, 44½ seconds.

The officials were: Starter at foot of hill, Paul Dangel; assistant to starter, William McCune; referee, J. Landon Bier; instructor, H. A. Brady; timers, Peter Boyd, Harry Bier, Nick Caravasios; flagmen, Ace Hubbard, M. E. Knapp; announcer. Frank Hediger.

ENDURANCE RUN PLANS READY

Frisco Clubsters and Tradesmen Complete Details for Two-Day Contest Between San Francisco and Los Angeles

SAN FRANCISCO, Cal., Nov. 30.—Plans for the endurance run between this city and Los Angeles, slated for December 9, 10 and 11, have been completed by members of the San Francisco M. C., co-operating with manufacturers and jobbers in this section. This run, which is expected to be the biggest ever held on the West Coast, has already a goodly list of entrants. Several thousand dollars in prizes have been offered.

The route is from San Francisco to Gilroy on a 25-mile schedule; thence to Fresno on a 22½-mile schedule. From Fresno to Bakersfield the rate will again be 25 miles per hour, dropping to 22½ from thence to Los Angeles. At each of the cities mentioned there will be a checking station. The actual riding time will be 18 hours, 33 minutes.

Two stops of 45 minutes each for meals are scheduled. The mileage is 447 there and back. Sidecar and tandem entrants will ride on the same schedule as the soloists, and the passenger must enter the same class the the driver. Both amateur and professional classes are provided.

The start will be made at 4 a. m. on December 9. The first man to finish is due at 9:08 a. m. on December 11. Many riders of both classes are already practicing for the big run on various parts of the course.

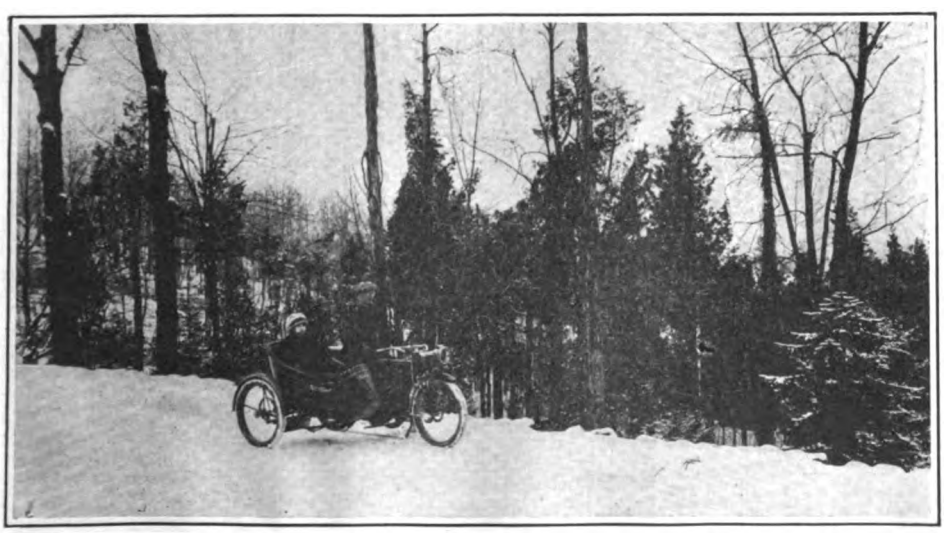
TO HOLD STAG

Chicago Indian Clubsters to Celebrate New Year with Smoker and "Eats"

CHICAGO, Ill., Dec. 3.—The Chicago Indian M. C. is to hold a stag affair at the club house, 235 Racine street, on December 30, to celebrate the New Year. This is in lieu of December 31, as that date falls on a Sunday. The stag will take the form of a smoker, with music and refreshments.

Each member of the club is asked to bring a guest to the stag and by this means to stimulate interest in club life and get more members. The stag is the first of a series of social events planned for the winter.

ENJOYING FIRST SNOWFALL IN MAINE WOODS



Reading Standard Sidecar Combination Driven by M. Kline, Bangor Enthusiast, Passing Through Picturesque Country in Southern Pine Tree State

SPECIALIZING ON GLOVES

DENVER, Colo., Dec. 2.—The Mead Autocycle Company, 1336 Broadway, this city, has a very attractive window display this week consisting of gloves for motorcycle riders. The gloves are fastened to a large board, which is decorated with different colored paper. This sets off the gloves to good advantage and assures that they will be seen.

FRASER FOR HAWAII

SAN FRANCISCO.—J. D. Fraser, of the Appeal Manufacturing & Jobbing Company, handling the Harley-Davidson, is now on his way to Honolulu, where he will remain till the first of the new year. The Appeal people are awaiting another carload of the Milwaukee-built motorcycles, due before the end of the month.

INDIAN DEALERS MEET AT BRESLIN

Eighty-seven Retailers Are Guests of Hendee Company at Convention—Addresses Are Delivered on Various and Vital Subjects and Co-operative Plans Are Talked Over

NEW YORK, Dec. 6.—In the line of development to a greater degree than ever the co-operation between factory and dealer in all possible directions, the Hendee Mfg. Co. held an Indian dealers' convention today at the Hotel Breslin. The session commenced at 10 a. m. and outside of an hour devoted to an excellent luncheon, continued until late in the afternoon.

That the convention more than amply fulfilled its aims was evidenced by the marked enthusiasm on the part of all who attended. In fact, the Indian dealer, to the last man, left the meeting room primed with business-getting ideas and headed back for the show to talk it over with "the other fellow." Eighty-seven dealers in all attended the convention.

The meeting was opened by General Manager Frank J. Weschler, who presided. He spoke on the object of the convention, pointing out the factory's side as well as that of the dealer. Owing to the absence of Jesse Edwards, the address on installment sales with relation to the Indian Guaranty Co. was not delivered.

An address on co-operation was next dislivered by W. H. Parsons, of *Motorcycling and Bicycling*. His address was to the point and was well received.

Sales Manager E. M. Jackson then spoke about "Our Indian Bicycle." He referred to the influence of the name plate in former seasons in his opening remarks and covered the pedal two-wheeler in all its important phases. Following Mr. Jackson's address, the dealers and Hendee officials sat down to an excellent luncheon.

The afternoon session was opened by a talk on magnetos and generators by M. E. Toepel of the Splitdorf Electrical Co. Mr. Toepel's interesting address was followed by that of A. M. Lawson, who spoke on the care of the storage battery.

J. B. McNaughton, head of the Dealers' Aid Department, gave a forceful talk on the object of the Indian Dealers' Department. He showed how this department was co-operating with the dealer, and how the scope of co-operation was to be extended to meet all possible conditions.

Advertising Manager J. A. Priest was the next speaker, the subject being "Advertising." He impressed upon his audience the relation between the factory advertising department and the dealers.

DEFENDS "SCARE COPY"

Head of American Chain Co. Says Its Ad. Illustrations Always Point Moral

NEW YORK, Dec. 5.—An interesting point has been raised in connection with the advertising copy of the American Chain Company of New York City and Bridgeport, Conn., Alfred Reeves, general manager of the National Automobile Chamber of Commerce, taking the stand that some of the chain company's advertising illustrations showing accidents resulting from failure to use anti-skid chains are prejudicial to motor car interests.

President Walter B. Lashar of the American Chain Company, which produces the Weed tire chains, sums up the situation in his reply by stating that newspaper reports of motor car accidents, through skidding as well as from other causes, are much more injurious to the interests of the automobile industry than advertising pictures, which at least point a moral while depicting the smashup.

OIL MEN TAKE OVER HYDRAULIC

CLEVELAND, O., Dec. 5.—Announcement is made that the Hydraulic Pressed Steel Company of Cleveland has been taken over by interests closely associated with the Standard Oil Company. It is understood that a new $10,000,000 concern, to include the Hydraulic and one or two other companies, will be launched. The Hydraulic company recently perfected a seamless steel barrel of a type suited to the oil business.

MORE VIM FOR VIM

BUFFALO, Dec. 1.—Just a bit more Vim has been added to the personnel of the Vim Cycle Hardware Company of this city in the shape of a boy, John Henry, Jr., which arrived at the Henry home yesterday. Take it from his daddy, John, Jr., is going to put VIM in capital letters in the Vim business in time to come.

MITCHELL STEPS UP PRESTO LADDER

MILWAUKEE, Wis., Dec. 5.—C. F. Mitchell, former manager of the Prest-O-Lite Company, Inc., 18-20 Martin street, has been promoted to divisions manager with headquarters at Milwaukee, in the recent reorganization of the local company. E. P. Drummond succeeds Mr. Mitchell as Milwaukee manager.

GILLETTE TIRE BREAKS GROUND

EAU CLAIRE, Wis., Dec. 5.—Building operations in connection with the new plant being erected by the Gillette Safety Tire Company are completed and the first shipments of machinery and other equipment are bing installed. Several departments are in operation and the entire plant is expected to be in working order by the first of the year.

NOVEMBER MEMBERSHIPS

WESTBORO, Mass.—A total of 35 affiliated memberships, 35 unaffiliated and 76 renewals is announced by Secretary G. B. Gibson in his F. A. M. membership statement for November, 1916. New York leads the list with eight unaffiliated, five affiliated and 12 renewals. Southern California is second with six, nine and 6, totaling 21 as against New York's 25. Many states show nothing better than a single renewal and no new memberships at all. November is, however, one of the dullest membership months in the year.

MEMBERSHIP WINNERS

WESTBORO, Mass. — Secretary-treasurer J. B. Gibson, of the F. A. M., announces that O. B. Bray, of Los Angeles, Cal., is the winner of the membership contest for the week of November 20-26. Bray sent in 17 applications signed with his name. For the week of November 27-December 2 G. R. Fassberger, of New York, is awarded the prize. He sent in 13 applications.

TWO MORE REGISTER

WESTBORO, Mass.—Two more shops have been added to the long list of F. A. M. registered establishments. They are the West End Motorcycle Shop, of 1401 West Third street, Dayton, O., and Frank Antepara, of Broadway and Thirtieth street, Bayonne, N. J.

AN ILLUSION

"Great Scott! Look at That Long Steep Hill." But at the Bottom They Found a Level Road

TEACHERS STUDY TIRES

Participants in Wisconsin Convention Pay Annual Visit to Federal Plant

CUDAHY, Wis.—A feature of the annual convention of the Wisconsin Teachers' Association, held in Milwaukee recently, was a trip to the plant of the Federal Rubber Co., at Cudahy. Over 200 of the visiting teachers and principals availed themselves of the opportunity to visit the big plant and acquaint themselves with the interesting processes by which Federal tires are produced.

Every department of the Federal plant was visited, and a special exhibit showing the progress of the rubber from the raw material to the finished product received unusual attention. These visits to the Federal plant by the Wisconsin teachers have now been placed on an annual basis, and are regarded as one of the most interesting features of the yearly gatherings.

NEW F. A. M. CIRCULAR

WESTBORO, Mass.—The numerous advantages of membership in the Federation of American Motorcyclists are concisely told in a circular just issued by Secretary-Treasurer G. B. Gibson. The circular is being sent out to members close to expiration and accompanies the regulation renewal blank and literature.

CLAIMS NEW GASOLINE PROCESS

COLUMBUS, Ohio.—Dr. Emrick W. Ritter, a Cleveland chemist serving a term in the Ohio penitentiary for conspiracy, has applied for patents on a new process of manufacturing gasoline from natural gas, which he claims is seven times more efficient and six times less expensive than the present gasoline used.

WHITCOMB'S OUTFIT STOLEN

KANSAS CITY, Mo.—While thefts of motorcycles have not been numerous of late, several outfits have disappeared, and among them was an Indian sidecar combination owned by C. E. Whitcomb, president of the Kansas City M. C. Whitcomb's outfit was stolen from in front of his place of business.

WILL HOLD STAG PARTY

WHEELING, W. Va., Members of the Wheeling M. C. will hold a stag party in the clubrooms Tuesday evening, December 11, and a feature of the program will be an address by President J. Langdon Dier, on "How to get the best out of your motorcycle."

CROCKER EXPECTING CARLOAD

KANSAS CITY, Mo.—Al. Crocker, manager of the Indian Motorcycle Sales Co., announces that he has six of the new Indian models out on the road, and that he is anxiously looking forward to the arrival of a carload of the 1917 machines.

EXCELSIOR ON DISPLAY

LOWELL, Mass.—The Lowell Cycle Shop, local Excelsior dealers, have one of the new models on display in the window on Gorham street, which is being thoroughly looked over by the boys.

Digitized by Google

Bulletins From California

BENTE GETS SERIES 18

SAN FRANCISCO.—Fred H. Bente, handling the Excelsior, is now showing the Series 18 three-speed "Big X." The machine is the first to arrive in this city and is the center of much interest in its new drab coat. The new Excelsior lightweight demonstrator is expected very soon.

IN FOR ENDURANCE RUN

SAN FRANCISCO.—Among the crack riders who have come to this city for the San Francisco-Los Angeles endurance run are Frank Carslake and Ray Creviston. E. G. Baker is already on hand, as well as a number of Pacific Coast speedsters.

NO MORE RUNS THIS SEASON

SAN FRANCISCO.—By reason of inclement weather, the official run of the San Francisco M. C. to Pescadero was called off. The runs committee has declared that no further runs will be held this season. Six perfect score members attended every run during the season and will receive gold medals. They are Mr. and Mrs. Green, financial and recording secretaries; O. Meyer, president; W. L. Hunt, vice-president; E. J. Moore, captain, and E. L. Howard.

MEYER IS BENEDICT

SAN FRANCISCO. — President O. Meyer, of the San Francisco M. C., and Miss Virginia Payson, of this city, were married on November 25. Mrs. Meyer has been the president's tandem passenger on all official runs of 1916 and is well known to the club members.

R-S DEMONSTRATOR ARRIVES

SAN FRANCISCO.—Hopkins & Alzina have received their first 1917 Reading Standard demonstrator. A carload of big brown twins is now on the way out from Reading and will be received the first of the month.

BAKER IN 'FRISCO

SAN FRANCISCO.—Erwin G. Baker, the transcontinentalist and "Three Flag" record-holder, has just arrived here to participate in the forthcoming San Francisco-Los Angeles endurance run. He is making his headquarters with the local wigwam.

COCHRAN IS MANAGER

SAN FRANCISCO.—Neil Cochran, well known in motorcycle circles here, is now managing the newly-created motorcycle department of the Weinstock-Nichols Company in Oakland. The Cleveland motorcycle is represented.

THINGS HUM WITH MEADARIS

LOS ANGELES.—H. D. Medearis, proprietor of the Valley Cycle Garage at Escondido, agent for Harley-Davidson motorcycles and Emblem bicycles, is having an active fall season in his repair shop, and is expecting an improved demand for new machines as soon as deliveries become possible. Among advertising activities which have helped with this trade he has obtained good results from the use of special slides in moving picture theatres and distribution of Goodyear cycle caps bearing his name.

MORGANSON ON HENDERSON

SAN JOSE.—Henderson agent Hunt, of San Jose, last week sold one of the 1917 Henderson models to County Speed Officer Morganson, of Gilroy, who is one of the best known motorcycle riders in that part of the state.

SAHAGIN FOR HIMSELF

LOS ANGELES.—Lem Sahagan, formerly in the Henderson repair shop, who, as a rider, made the remarkable desert trip a little over a year ago, and also won a place in the Capistrano hill climb, has gone into business for himself. With H. McClelland, also formerly with the Henderson, Lem has opened a well equipped machine shop right in the heart of motorcycle row, at 919 So. Main street. They handle nothing but repairs, and specialize in magnetos, electric lights and generators, as well as general repairs. In less than a week they have enough work on hand and coming in to keep them busy.

LOS ANGELES TRACK MEET

LOS ANGELES.—The presence of well-known riders who have been in all the big meets this summer has renewed racing enthusiasm in Los Angeles. Los Angeles M. C. has appointed A. F. Van Order, Geo. Rubsch, Wells Bennett and Don Johns a committee to work out plans for a big meet at Exposition Park about the last of January.

REED MAKES RECORD SALE

LOS ANGELES.—L. E. Reed, of the Goudy-Hoffer Co., Excelsior distributors, smashed all records for amount of a single sale this week. He sold to James Cunard, an expert moving picture camera man, a 1917 Excelsior three-speed machine, with electric lighting outfit and Stewart speedometer, and a Cygnet rear car, for $445 cash. Cunard also bought a second-hand two-speed machine for his brother, as a gift. Cunard has a contract to take 300 feet of scenic feature film at points from San Diego to Portland, and has chosen his outfit as the most practicable method of getting over the ground.

BERRY SELLS THORS QUICKLY

LOS ANGELES.—T. E. Berry almost thinks he dreamed he had seven Thor twelves last week. They came in, were uncrated, and the next thing Berry knew he was looking as some figures in his bank book and Sammy Hamilton was saying, "Hey, Berry, here's a fellow wants to buy my machine. Can't I make him wait for the next lot to come in?" Berry sells bicycles while he waits for the power machines to come and do the quick disappearing act.

Our Canadian News Letter

PUT IN HOME TRAINER

Vancouver Dealers Have One to Develop Racers for Next Season

VANCOUVER, B. C.—Haskins & Elliott have installed a bicycle home trainer in their store and the cyclists of Vancouver are to be encouraged to make use of the machine during the coming rainy season.

The intention is to develop racing riders so that a number of road races can be held next spring and summer. Roller races are to be staged every Saturday afternoon during the coming four months and valuable prizes will be put up.

DEALERS MEET

Hamilton Association Members Open Season with Banquet

HAMILTON, Ont.—The Hamilton Bicycle and Motorcycle Dealers' Association got away to a good start for a winter of activity on Tuesday evening, December 5, when a banquet was held at the New Commercial Hotel. Practically all of the 17 bicycle stores in the city were represented. The assembly was addressed by A. E. Humphrey of the Humphrey Bicycle & Motor Company, the Toronto jobbers.

The Hamilton association has decided to co-operate with the manufacturing interests for the holding of a special spring bicycle campaign next March or April. Window-dressing and tidy-store competitions will again be held and the dealers are already at work on various other features of the "push."

BOTH USE HENDERSONS

TORONTO, Ont.—Constable Ellis, who patrols the western half of the 40-mile concrete highway between Toronto and Hamilton, has provided himself with a Henderson motorcycle. Constable Hunter, who looks after the other half of the new model boulevard, purchased a Henderson several weeks ago, so that the popular roadway is now patrolled from end to end by Henderson-equipped cops.

HARRIS IN TRANSPORT SERVICE

TORONTO, Ont.—Toronto's bicycling fraternity has received the surprising information that "Stoker" Harris, a well-known bicycle racing man of these parts, is now serving with the Imperial Mechanical Transport in Egypt. Harris is the captain of a soldiers' football team which is playing various matches in the valley of the Nile.

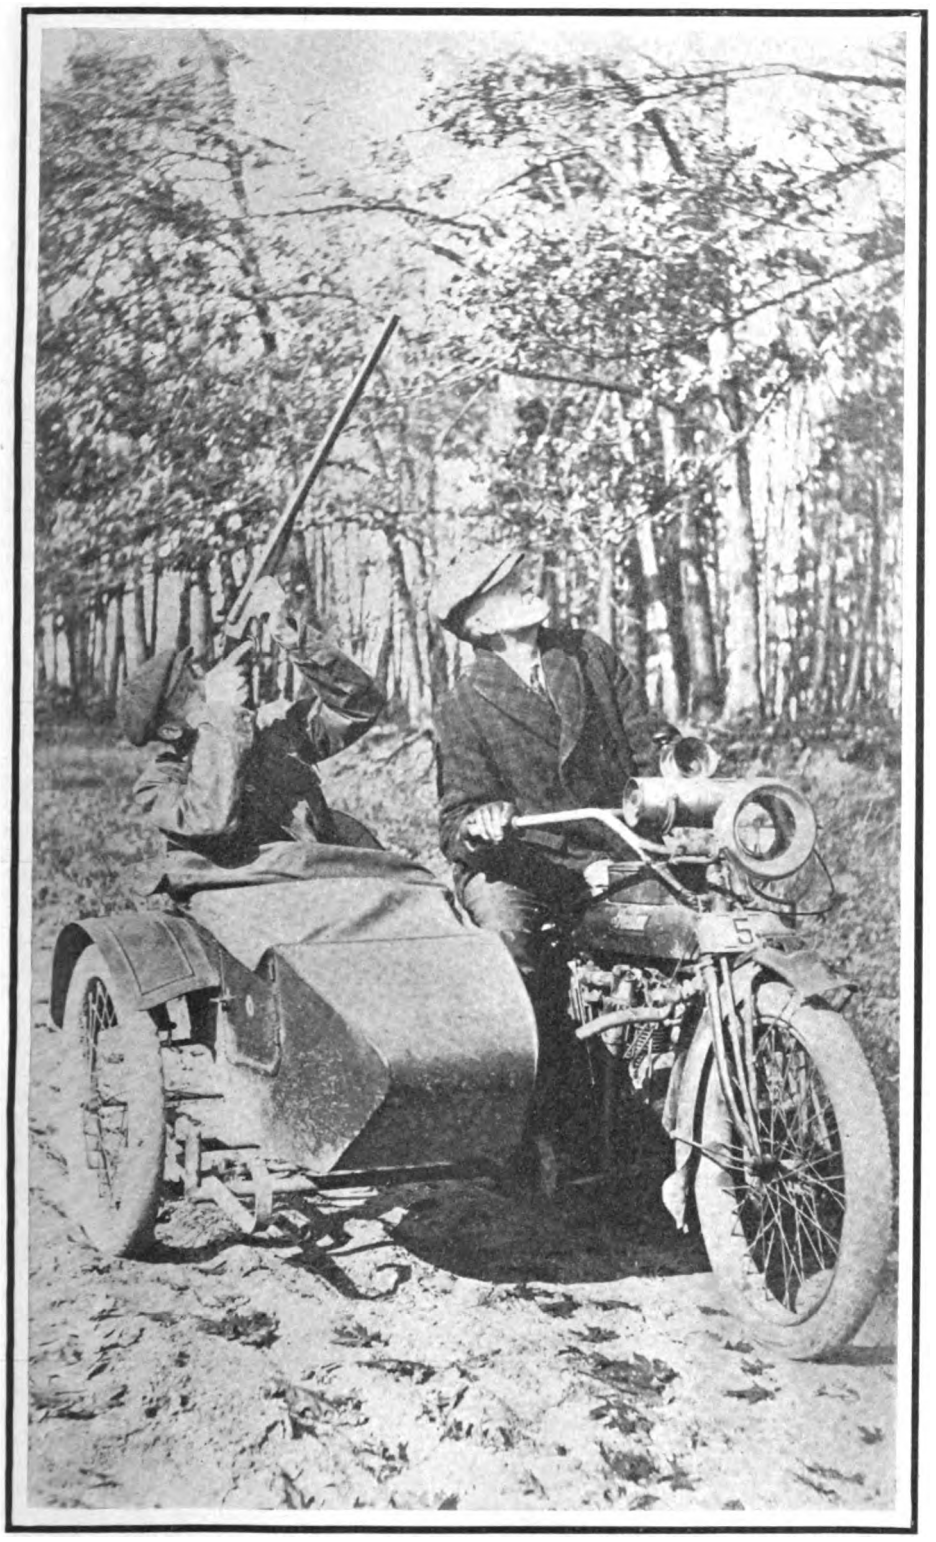
Bagging a Squirrel en Route



HERE'S a seasonable picture of more than passing interest. In addition to depicting a most attractive phase of motorcycle sportsmanship, and one which is rapidly growing in popularity throughout the country, the photograph presents George M. Johnson (in the saddle) and D. B. Pangburn, both of New Haven, Conn., and both regular and clever contributors to **Motor Cycle Illustrated.**

These writers, who are happily as facile with the pen as they are in tooling a sidecar combination through the woods, or in plugging a big twin over mountain roads, will continue to greet you throughout the coming year in these pages. If you have not kept in touch with their articles, you have overlooked some of the best motorcycle literature that is being produced in this country. Now is a good time to get acquainted.

A Few Spare Links

BY E. B. HOLTON

CHINNING the other day, we got round to balance, and the opinion of the crowd was that the foot-boards on modern motorcycles have much to do with your keeping "right-side up with care" in rough going.

In the "stone age" of the sport you rode with your feet on the pedals abaft the motor, with the result that the front wheel had nothing to hold it down; it danced all over the road and sooner or later you answered the call of Old Man Gravity.

Nowadays with your feet and legs thrust forward, your weight helps in keeping that bucking wheel steadier, and you tumble less often.

You need weight forward. The English solve the problem by using a semi-racing type of handle-bar, called the Tourist Trophy, and the riding position is such that your body is supported in a measure by your arms, which goes toward holding the front end down.

Over here, in the Land of the Free, we'd be pinched by the first motor-cop who saw us, for the pose would add 25 miles an hour to our speed in his estimation were we to use a drop-down bar.

Gee whiz! Here it is December. 'Spose some of you fellows are thinking of putting the ole bus in "dry dock" for the winter, now that the days are shorter and colder, and the scenery has taken on its faded winter hue.

Don't! Why man, be bigger than the weather. Get out your heavy clothes, gloves and cap and ride just as long as the roads are open.

Wait 'til the snows come before you give up riding, and then, even then, when the snow blocks traffic, get out and buck the drift.

There's lots of good riding this side of New Year's and after it, too, for the hardier motorcyclists.

Any of you lads who recall Art LaRoe, Indian rider from Perth Amboy, who had a liking for number "13" in road competitions, may be surprised to learn that he is "somewhere in France" with the Red Cross.

His address is Hospital Auxiliare No. 10, Bretigny-sur-Orge, Seine, Oise, France. Drop him a line and make him feel good to hear from the old bunch.

A local rider pulled a clever stunt this week. He was hit by an auto, and his motorcycle was damaged amidships, especially around the gear-shifts.

It will be a court case, so the foxy motorcyclist has had six photos of his damaged machine taken, and these will be his evidence, the automobilist claiming that the motorcyclist ran head-on into him. The pictures will show the truth in the matter.

Meanwhile, the motorcyclist will have his mount put back into riding condition, as he needs it in his daily work.

Remember it, if you should have a smash-up, the photographs may save you dollars in court.

AMATEUR SIDECAR RECORD GOES UP

(Continued from page 36f)

the going reasonably fair, considering what they had been up against, but from Plattsburg to Chasy the road was full of potholes.

At Rouse's Point the road was extremely slippery and full of sharp turns, in rounding one of which they skidded clear around and landed against a pile of rocks. Here also they were obliged to stop for their admission papers to Canada, a proceeding which used up 30 minutes of time. Then they crossed into Canada.

At Lacolle, Que., they encountered a new difficulty, as the Canadian inspector decided he did not like their looks and at first refused to let them enter. Thirty-five minutes of spirited argument, however, finally convinced him that they really were engaged in an endurance run and had no ulterior motives in mind, and their Canadian papers were reluctantly handed to them.

From Lacolle to within a few miles of Montreal things went well, but within five miles of the city they struck a plank road full of holes, and with the holes full of water.

The chilling water splashed continually from the front wheel to Buck's leg, and from there to the spark plugs. This necessitated frequent stops while the heat from the engine dried the plugs. Crawling along in this manner, they ultimately struck better roads just outside the city and were able to proceed again at some speed.

Reaching the Victoria Bridge into Montreal they were stopped by guards who looked them over and made a casual search of the sidecar, a proceeding which was repeated at the other end of the bridge, where the search was slightly more rigid than the first. Nothing suspicious being found, they were allowed to enter the city, reaching the store of the Arlington Bicycle Company at 4:07 o'clock.

On their arrival they were wet through, and the cold and hardships of the run made it necessary for them to rest before proceeding. They had already established a record, having made 568 miles, but were unwilling to stop until they had gone farther toward riding out the full 24 hours. After a rest of 45 minutes, they again started out, making a swing out in the vicinity of Mt. Royal, returning at 5:45 o'clock with 16 more miles to their credit, making their total of 584 miles in 24 hours of running time.

Their checkers for the run were as follows: November 28, W. G. McCann, Hendee Manufacturing Company, 6 p. m.; J. N. Boyd, F. A. M. Garage, New Haven, 7:57 p. m.; D. Levine, auto supplies, Mt. Vernon, 10:20 p. m.; Michael Gilday, U. C. L. Co., Yonkers, 10:56; Jack Smith, Poughkeepsie Buick Co., Poughkeepsie, 1:30 a. m.; F. E. Reed, Waldorf Lunch, Albany, 4:05 a. m.; Walter B. Thomas, Reservation Lunch, Saratoga, 6:17 a. m.; A. Ginsberg, merchant, Lake George, 7:33 a. m.; Prime Garage, Elizabethtown, 10:27 a. m.; John C. Agnew, Plattsburg, 12:25 p. m.; Elijah S. Landry, deputy collector and inspector, Rouses Point, 1:30 p. m.; Andy Nolin, customs officer, Lacolle, 2:12 p. m.; R. A. Cudmore, Arlington Bicycle Company, Montreal, 4:07 p. m.; Thomas Bentley, Arlington Bicycle Company, Montreal, 5:45 p. m.

VITALIC DINNER

Novel Course Dinner Enjoyed by Continental Rubber Folks

ERIE, Pa., Dec. 2.—Something novel in the way of a course dinner was indulged in by members of the Vitalic Club on Thanksgiving Eve, November 29.

The dinner was served in four courses, each course being served at a different house. The first course was given at the home of Mr. and Mrs. H. J. Bryant, the second at the home of Mr. and Mrs. W. J. Surre. The third course was taken at the home of the Misses Horn, while Mr. and Mrs. C. Strickland played hosts for the gathering at the final course of the dinner.

The next undertaking of the Vitalic Club, which is made up entirely of the members of the office force of the Continental Rubber Works, will be a Christmas party, for which plans are already well under way.

HOFFMAN-NUNZIATA TEAM WINS

U. S. I. Combination Prove Best Sprinters in B. V. W. Team Race—Buffalo Team Takes Second Honors

NEWARK, N. J., Dec. 3.—There was plenty of action, spills galore and interesting doings in connection with the two-hour race of the Bay View Wheelmen, which was run yesterday at the half-mile trotting track at Weequahic Park. Twenty-eight teams started in the race out of a field of 32 teams that were entered for the event, which was postponed from Thanksgiving Day.

"Long Bob" Spears, the Australian cyclist, started the big field away and from the very start of the race the excitement ran high. The team of C. Duerr and F. Herbst were lapped shortly after a spill in which the latter was jarred up somewhat. William Purdue and Joe O'Leary and Larry Seufert and Gus Ziebarth were lapped in the tenth mile. Others were very weary before the first half-hour had been covered.

During the running of the first hour three sprints for extra prizes were staged at 15, 30 and 45 minutes. Harry Hoffman won the first and third sprints and William Keller the second. In the first hour the leaders had covered 20½ miles, with George Brindle holding the lead.

In the last hour seven sprints were run on the so-called Berlin style of finish and points were scored as follows: Winner, 1; second, 3; third, 4; fourth, 5; fifth, 6; sixth, 7; seventh, 8, and eighth, 9. All teams finishing outside of eighth place were credited with 11 points. The team scoring the lowest number of points were declared the winners.

Winner's Low Score

In the seven sprints the team of Jerry Nunziata, Brooklyn, and Harry Hoffman, San Francisco, riding under the Unione Sportiva Italiana colors, scored the lowest number of points. Nunziata and Hoffman had 24 points to 32 for Andrew Ciaciuch and Al Krushel, the Buffalo team; 46 for Robert Benwell and Eugene O'Mara of the Bay View Wheelmen; 47 for Fred Taylor, Newark, and J. J. Marquard, New York; 48 for Amateur Champion John L. Staehle and Ed Bryon, the Australian, both of the Bay View Club; 50 for Chris Dotterweich and G. Taylor, National Turn Verein, and 54 for the team of Henry Werner and William Weimer, Bay View Wheelmen.

Ciaciuch Wins First Sprint

Ciaciuch won the first sprint from Tommy Fitzsimmons, Werner and Dotterweich. Fred Taylor won the second from Nunziata, Benwell and Keller. Ciaciuch won the third from Staehle, Hoffman and Werner. The fourth went to Hoffman, who beat Dotterweich, Ciaciuch and Benwell. In the fifth sprint Werner beat Staehle, Hoffman and Benwell, and in the sixth sprint Fred Taylor won from Ciaciuch, Dotterweich and Hoffman. The final sprint was won by Nunziata from Larry Smith, Ciaciuch and Fred Taylor. The total distance was 40½ miles.

After the final sprint protests galore were filed with the officials over the riding of the Hoffman-Nunziata and the Krushel-Ciaciuch teams. The rules forbid changing in the last two laps of a sprint or making pickups on any other part of the track but the home stretch. Hoffman and Nunziata changed in the turn in the last sprint and Ciaciuch relieved Krushel in the last lap on account of Krushel puncturing. The two teams, along with that of Smith and Knoller, were disqualified in the last sprint, but the disqualification was later rescinded. In the Brassard race, run before the start of the team event, Charles Osterreiter dethroned George Brindle, the "Brassard King."

Spills a-Plenty

Several spills featured the race. In one smash, near the 15-mile mark, eight riders went down in a heap, but none of them were badly hurt. The home stretch, where the changes were made, also saw a few spills, but most of the injuries were suffered by the bicycles, the riders seemingly having better luck. The finish of the first eleven teams in the sprints and the points scored in each sprint follows:

Pts.	Team.	Sprint 1	2	3	4	5	6	7	Pts.
1	Hoffman-Nunziata	6	3	4	1	4	5	1	—24
2	Ciaciuch-Krushel	1	8	1	4	11	3	4	—32
3	Benwell-O'Mara	11	4	6	5	5	9	6	—46
4	F. Taylor-Marquard	7	1	11	11	11	1	5	—47
5	Staehle-Byron	11	9	3	6	3	7	9	—48
6	Dotterweich-G. Taylor	5	11	8	3	11	4	8	—50
7	Weimer-Werner	4	11	5	11	1	11	11	—54
8	Beck-Fitzsimmons	3	7	11	8	6	11	11	—57
	White-Paetz	9	11	9	7	8	6	7	—57
10	Schneider-Keller	11	5	7	9	9	8	11	—60
11	Horvarth-Bailey	8	6	11	11	11	11	11	—69

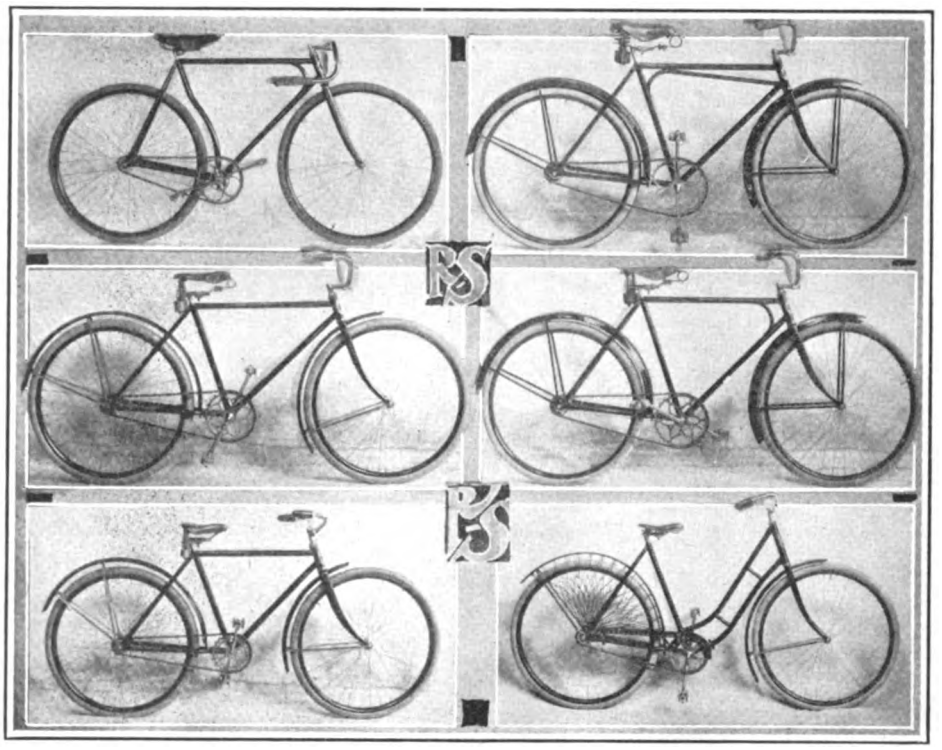
R-S BICYCLES IN ELEVEN MODELS

Pennsylvania Firm Opens Twenty-First Manufacturing Season with Full Line of High-Grade Machines Which Range in Price from $50 to $25



Top left, the R-S Racer Model; at Right, the Roadster; Center at Left, the Tourist Type; at Right, the R-S Special; Bottom at Left, the Speeder, a Boy's Model; at Right, the Ladies' Mount Corresponding to the Roadster

READING, Pa., Dec. 3.—Ever since the first Reading Standard bicycle appeared on the market twenty years ago, the maker has offered high-class R-S bicycles with most careful attention to finish and workmanship. The twenty-first season, that of 1917, is no exception to the rule and the Reading Cycle Manufacturing Company today offers a line of eleven bicycles of top-notch grade, ranging from $50 for the Racer to $25 for the Speeder Juvenile.

While the list prices of the Reading Standard line for 1917 have been advanced from those of the past season in some cases, the increase has been very slight and by no means in proportion to the extras that the rider gets. No machine has advanced over $5 and any standard coaster brake and a full set of guards is included in the new figures. In the past, the coaster brake was listed at $5 extra, for example, so that with the increased prices of raw material and advance in equipment rates, the firm is giving better value for really no advance in price.

Eleven in Line

There are eleven models offered by the Reading Cycle Manufacturing Company for the new season. These are: R-S Race, $50; R-S Road Racer, $50; R-S Flyer, $46; Roadster, $40; R-S Special, $35; Tourist, $30; Ladies' Roadster, $40; Ladies' Special, $35; Ladies' Tourist, $30; Speeder Juvenile, $25; Girls' Speeder Juvenile, $25.

The R-S Racer with its short wheelbase, listing at $50, is continued in the main from last season, during which it proved very popular. Like its 1916 predecessor, it has the best of equipment and liberal options. The bend in the seat mast tube brings the rear wheel directly under the rider, making for easy sprinting. Many well-known pro. riders have won on Reading Standard machines at six-day races in Madison Square Garden and on foreign tracks as well.

Road Racer

The R-S Road Racer, also listed at $50, is fitted with the same high-grade two-piece sleeve contained hanger fitted to the Racer. This hanger has been thoroughly tested out and is equal to the highest grade hanger on the market today. The Road Racer is a quality road machine and is fitted with guards and coaster brake unless specified otherwise.

At $46, the R-S Flyer will, no doubt, prove as popular as in 1916, the year it made its debut. It is regularly enameled in with either green or red head, but an option of blue with white head, or carmine with gold stripes is offered. Both the men's and ladies' Roadsters, priced at $40, have one-piece hangers and have high-class saddle, tire and other equipment. These models proved popular last season.

Special and Tourist

The Reading Standard Special, for men and ladies, has a truss head frame, known for years as characteristic of R-S construction. The list is $35 for either model. The Tourist is a new $30 model, having regular diamond frame and one-piece hanger.

In the juvenile line are the boys' and girls' Juvenile Speeder models, each priced at $25. They have 17-inch frame with 26-inch wheels. The cranks are 5½ inches in length. Thus one model only is necessary, as the regular 28-inch wheels are made in 19-inch frames.

Efficient Factory

The Reading Cycle Manufacturing Company occupies a factory building which is well adapted to the needs of high-class cycle production. There are over 30,000 square feet of floor space, all of which is in use. The capacity for 1917 is figured at 20,000 machines. All R-S frames are dip-brazed. Any excess metal is removed by an electro-deplating process, which has a capacity of 300 frames per day. All cranks are machined, as well as fork crowns and drop forgings.

Direct Representation

The firm handles its dealers direct in the following states: Pennsylvania, Ohio, Michigan, New York and New Jersey. For Montana, Idaho, Utah, Wyoming, Colorado, Arizona and New Mexico, trade is handled through L. O. Scott, the Western representative, whose headquarters are at Denver, Colo. In addition, the following firms distribute the territories mentioned:

Hub Cycle Company, Boston, Mass.—all of New England; G. H. Griess, Philadelphia, Pa.—Philadelphia County; W. H. Grover, Norfolk, Va.—North Carolina; Henry Keidel & Co., Baltimore, Md.—Maryland, Virginia, West Virginia, Delaware and District of Columbia; Walthour & Hood, Atlanta, Ga.—South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana and Tennessee; R. L. Leacock Sporting Goods Co., St. Louis, Mo.—Missouri, Texas, Oklahoma, Arkansas, Kansas, Illinois and Kentucky, Pacific Motor Supply Co., San Francisco, Cal.—California; Ballou & Wright, Portland, Ore.—Oregon and Washington.

NEW G. W. AGENTS

America, Adlake and Crown Bicycles Appeal to Dealers at the Show

LA PORTE, Ind., Dec. 4.—Among the many new agencies placed with the Great Western Mfg. Co., of this city, during the recent Chicago Cycle Show were the following: C. A. Clarke & Son, Hamilton, O., Adlake; New England House Furnishing, Minneapolis, Adlake; E. L. Lawson, Auburn, N. Y., America, and C. F. Sauer & Co., New Orleans, La., America.

The Crown bicycles will be handled by the following: Crowley-Milner Co., Detroit, Mich.; E. C. Van Loon, Streator, Ill.; Daniel P. Savage, Gary, Ind.; F. A. Dunklee, Fort Wayne, Ind.; W. J. Tuebner & Co., Dayton, O.; S. L. Clark & Co., Middletown, O.; Sandusky Bicycle Co., Sandusky, O.; F. A. Copley, Fostoria, O.; Chris Morler, Boise, Idaho; Heagy Bros., Carlisle, Pa., and B. E. Andre, Charleston, W. Va. In addition a number of Chicago agencies were placed at the Coliseum.

EMIL FRIOL IS A WAR VICTIM

Famous French Cycle Sprinter Meets His Death as a Dispatch Bearer at the French Front; Had Visited America Twice

ONE more famous racing cyclist has been killed in the European war. The latest one to give up his life for his country is Emil Friol, the French sprinter, who received fatal injuries in a collision between a motorcycle which he was using and an automobile, near Amiens, France, about November 17. Friol, who was a motorcycle dispatch bearer, was at first reported killed by a bomb, but later reports proved that was erroneous.

The dead cyclist was born at Lyons, France, in 1881, and started racing at the age of 18 years. Friol confined most of his early racing to the provincial race meets, but about 1902 he went to Paris to compete against the best of the world's stars. In 1904 he won the sprint championship of France and he won the same race in 1906, 1907, 1910 and 1913. The world's sprint championship was accounted for by Friol in 1907 and again in 1910.

Friol had many other classic races to his credit. He won the Grand Prize of Paris in 1907, 1909 and 1910; the Grand Prize of the Republic in 1908, and the Grand Prize of the U.V.F., a race named after the controlling French body, the Union Velocipedique de France, in 1908, 1910 and 1911. He also accounted for the winter championship at the Velodrome d'Hiver, Paris, during the winters of 1909-10 and 1910-11. In 1910 Friol won the championship of France, the Grand Prize of Paris, the world's title and the Grand Prize of the U. V. F., being the only rider to win all four races in one season.

Friol has visited America on two occasions. One year he came to ride match races at Madison Square Garden in connection with the annual six-day race, and again in 1912, when he competed in the world's titular races in Newark. He met Frank Kramer, the American champion, in a series of match races at the Newark track the same year, Kramer winning the series. The unfortunate cyclist was well liked in this country and the news of his death was a shock to his many friends.

TEAM RACE FOR PARISIANS

A team race, run along American lines, was staged at the Velodrome d'Hiver, Paris, Sunday, November 19, and the winning combination was made up of Thorwald Ellegaard, the Dane, and Henry Contenet, the old-time French paced performer. The event was run over the 100-kilometer (62½ miles) route and was called the "Race of 400 Laps" (the track is one of 250 meters). Philip Thys, the Belgian, and Juseret finished second and Charles Deruyter and Mantelet third. The winner's time was 2 hours 30 minutes and 5 4/5 seconds. Fourteen teams started, one being made up of "Woody" Hedspath and Henry Martin, but the team quit early.

BIG SCHMELZER ADDITION

KANSAS CITY, Mo., Dec. 4.—The Schmelzer Arms Co. has under construction a large addition to its already extensive headquarters at 1224 Grant avenue. The new building will give the company 17,500 additional square feet of floor space. T. A. Taylor, manager of the bicycle department, states that arrangements have been made to devote about 3,200 square feet of the additional space on the ground floor to a retail bicycle department.

FRANK CALVIN KILLED

One-Time Racing Cyclist Meets Death in Automobile Race

UNIONTOWN, Pa., Dec. 3.—While competing in the Universal Trophy race at the opening of the Uniontown Speedway yesterday afternoon Frank Galvin, a former racing cyclist, lost control of his racing car and crashed into the press stand and received injuries that later resulted in his death. In the crash Galvin's mechanician, Gaston Weigel, and Hughie Hughes, another racing driver, were killed.

Galvin hailed from New Milford, Conn., and was a familiar figure about eastern cycle tracks. He started in the six-day race at Madison Square Garden, New York City, in 1902 with Eddie Root and they finished sixth. He has also ridden in other six-day races in Madison Square Garden with Walter Bardgett, George Wiley, Arthur MacDonald and Norman Anderson. Galvin rode his last six-day race in New York with George Wiley in 1911, when they were put out through accidents on the fifth day. As an automobile racer Galvin had more or less success. He finished second in the recent Harkness Trophy at the Sheepshead Bay Speedway and was well placed in other races this season.

WALTER RUTT STILL WINS

Walter Rutt, the German champion cyclist, is still winning races in Germany. At a recent race meet at the Treptow, Berlin, track, Rutt defeated Willie Lorenz, Hahn, Abraham, Wiegandt and Arend in the order named in an 1,800-meter scratch race. Rutt also finished fifth in the handicap from the honor mark, Neiderkrone being the winner.

TEAM RACE CALLED OFF

WOODMERE, L. I., Dec. 1.—Owing to inclement weather the two-hour bicycle team race, which was scheduled to by run by the Woodmere A. C. yesterday, was called off.

BENSON VISITS MANY AGENTS ON TRIP

A. O. Smith Sales Manager Hits High Spots and Finds Much Optimism on Journey to New York Show

NEW YORK.—Following the Chicago Show, J. A. Benson, sales manager of the A. O. Smith Corp., spent a busy day at the factory and then packed his grip and hustled for Detroit on a flying business trip. From Detroit he worked southward, hitting the high spots along the line and finally arriving in New York early this week. When seen at the New York Show, Sales Manager Benson reported that he had been highly successful in lining up Smith Motor Wheel agents on his way from Detroit to the metropolis.

Mr. Benson is optimistic over the business outlook for 1917, and states that every mail is bringing to the factory orders for Smith Motor Wheels and Flyers, as well as inquiries concerning those products.

Among the recent important agencies closed by Mr. Benson is one with C. J. Peterson, pioneer bicycle man of Minneapolis, Minn., who will handle the Smith Motor Wheel for the next season. Peterson also signed up a substantial contract for the Smith Flyers in his territory.

J. Menard, 2209 Central avenue, will handle the Smith Motor Wheel and Flyer on the east side in Minneapolis, working in conjunction with Peterson.

Another agent who has just signed up with Benson is C. Cuzaroff, of St. Paul.

XMAS SALES SUGGESTIONS FOR DEALERS

Current Number of "Million Bicycles Bulletin" Urges Retailers to Make the Most of Holiday Opportunities and Offers Timely Suggestions

NEW YORK, Dec. 4.—One of the most potent influences that has been set at work for the enlivenment of holiday cycle business is the Christmas number of the *"Million Bicycles Bulletin,"* which is just off the press and ready for distribution to dealers. This snappy periodical is published by the United Cycle Trade Directorate, and is as attractive along pictorial lines as it is constructive in its text matter. It presents the Christmas bicycle trade proposition in an impressive manner, and points out to the dealer the fact that the pedal two-wheeler is one of the most attractive articles that can be offered to holiday buyers.

A Christmas Opener

The Christmas number of the *Bulletin* opens with an interesting and constructive article under the heading "Get Ready for Big Christmas Business." This feature treats at some length of the importance of the holiday bicycle market, and then proceeds to give specific sales instructions for dealers throughout the country.

It has been the aim of the United Cycle Trade Directorate to make the *"Million Bicycles Bulletin"* helpful without making it "dry" reading, and this has been accomplished in the current number. Every paragraph of the paper is suggestive of the strong and healthy spirit of optimism which the Directorate is endeavoring to communicate to dealers throughout the land, and this atmosphere of enthusiasm, backed up by practical and informative material, has enabled the publishers to turn out a valuable addition to the literature of the Million Bicycles movement.

Another feature of the *Bulletin* which is deserving of careful attention from dealers is an offer of $50 by the Directorate for the best Christmas window display of bicycles, and $50 for the most effective Christmas bicycle ad that appears in a newspaper. The dealer who wishes to enter the window display contest is requested to have a clear photograph taken of his window and forward it at once to Charles F. Olin, of Bristol, Conn., secretary of the Directorate.

Emphasis is placed upon the necessity for writing the name and address of the contestant plainly on the back of the photograph. Any window display made during the month of December is eligible to the contest, and dealers may send in as many photographs of December window displays as they wish.

In the newspaper advertisement contest, copies of the complete newspaper containing the ad should be forwarded to Secretary Olin as soon as possible. Both contests will close on December 31, and all window display photos and newspaper advertising should be mailed so as to reach Secretary Olin not later than January 10, when the material in each contest will be turned over to a committee of competent judges.

Special Electrotypes

Special electrotypes, putting across the Christmas bicycle idea in attractive form, are also ready for distribution to the dealers, and several of them are reproduced in the *Bulletin*. These are intended for use in local newspapers, and are made in suitable sizes. Dealers who wish to avail themselves of the opportunity to use these cuts are invited to communicate with Secretary Olin.

Considerable space is devoted to the subject of bicycle races, and emphasis is placed upon the importance of working up interest along these lines on a national basis. Numerous encouraging letters are published from dealers throughout the country who have co-operated in the bicycle race movement during the past season.

To Explain Big Plans

It is announced, by the way, that the December number of the *"Million Bicycles Bulletin"* will outline in full the extensive plans which have been worked out by the Directorate for furthering the interests of bicycle dealers during the coming season. Backed by the hard-working enthusiasts who make up the Directorate, and with funds either in hand or assured for the near future, the present bicycle movement promises to outdo anything of the kind ever launched in this country.

Needless to say, all announcements concerning the national selling plans are of the utmost importance to bicycle dealers, and they are urged by Secretary Olin to make a point of obtaining and carefully reading every issue of the *"Million Bicycles Bulletin."*

One of the Xmas Ad Electrotypes Prepared for Dealers

ANOTHER XMAS BOOSTER

One of a Series of Attractive Electrotypes Arranged for Dealers by the New Departure Mfg. Co.

INDOOR BIKE RACES

Naval Reserve Will Stage Varied Program in Rochester Armory, Dec. 9

ROCHESTER, N. Y., Dec. 4.—The first of a series of indoor bicycle races at the Armory will be held on the evening of December 9 under the auspices of the Naval Reserves. The program will consist of scratch races at one and three miles, and a five-mile handicap. The floor of the Armory has been put in shape for the cyclists, who will be permitted to use the track every evening between six and seven-thirty. About a dozen riders have been "working out" at the Armory for the past week.

Entry blanks have been placed with all the dealer, and the promoters are looking forward to a strong field. A number of track teams from the high schools, and from the Y. M. C. A. are booked to compete. The meet will be held under N. C. A. & A. A. U. rules.

NEW NEWARK CYCLE CLUB

NEWARK, N. J., Dec. 7.—A new bicycle club has been organized in this city. The Arrows is the name by which the new club will be known and the following officers have been elected: President, John Rooney; secretary, William J. Fagan, and Howard Ball treasurer. Many interesting features are being arranged for the winter and next season.

NEW DEPARTURE SALES HELPS

Well-Known Coaster Brake Concern Issues New Series of Folders and Other Business-Bringing Literature to Dealers

BRISTOL, Conn.—Following its policy of helping live dealers to sell bicycles in a practical way, The New Departure Mfg. Co., maker of the well-known New Departure coaster brake, hubs, etc., is again offering specially-prepared folders, signs and lantern slides. These are for the use of dealers in stimulating sales of bicycles for Christmas gifts.

The folders are printed in colors, with attractive illustrations on all pages, and talks right up for the bicycle from start to finish.

Dealers who used the same service supplied by The New Departure Company last year sold more bicycles than they thought it possible to sell at the Christmas season. In fact, a great many dealers who were skeptical of the New Departure claim that good business could be secured at Christmas time found that by newspaper advertising, window displays, and the use of the folders and posters good business could be stirred up.

The New Departure printing department is working with double force getting out this material to dealers who have written in for it this year—not hundreds of them, but thousands of them. It is not too late for you to send in your request. This material is furnished free by The New Departure Company, and every dealer who is willing to try out the possibilities of Christmas sales in his city should certainly send for these selling helps.

BUBP BEST JUNIOR

Takes First Prize in Reading B. C. Ten-Mile Road Race

READING, Pa., Dec. 1.—Forty-six junior cyclists competed in the ten-mile bicycle road race of the Reading Bicycle Club, which was held over the Reading to Temple route yesterday. The roads were in a very muddy condition due to the hard rains, but despite that handicap the riders made good time.

Ralph Bubp, from the middle mark, won the race in 25 minutes and 8 seconds, and he received a gold watch for his efforts. Raymond Levan finished second; James Dick, third, and Elmer Hart, a scratch man, finished in fourth place only four seconds back of the winner. Hiester Dick, Herman Nein, Carl Body, William Lutz, Raymond Huber and Warren Rubright finished as named, all of them receiving prizes. The officials were: A. A. Fink, referee; Albert Rhode, starter; James Mayo, A. E. Keeport and George L. Gring, judges. A large crowd assembled at the line and cheered the efforts of the riders.

SELLING BICYCLES ALSO

ROCHESTER, N. Y., Dec. 4.—The Wagner-Dolph Co., Inc., Cleveland and Harley-Davidson distributors for Rochester and vicinity, has taken on the new line of Harley-Davidson bicycles, and has launched an energetic campaign. The company has also signed up to handle the Cleveland lightweight for another year.

Up to the present time the firm has delivered nine of the new olive drab Harley-Davidson twins, and has booked a considerable number of orders for delivery in the near future.

CYCOMO BICYCLES

Saufley Supply Co. Launches New Line With Six Models; CycomoTires Also

KANSAS CITY, Mo., Dec. 4.—The Saufley Supply Co. has recently placed a new line of bicycles in its salesroom under its trade name, "Cycomo." The line embraces six models which will retail from $32.50 to $42.50. The company will also distribute these bicycles throughout the southwestern territory.

The Saufley Company recently closed negotiations for the manufacture of a new bicycle tire to be known as the Cycomo Vacuum Tread. This tire will retail at $2.75.

COMMERCIAL BICYCLES IN DEMAND

COLUMBUS, O.—One of the beneficial features of the bicycle trade in central Ohio territory is the buying on the part of solicitors and collectors. Laborers are also buying well, but recently the tendency has been towards more buying by house-to-house canvassers and collectors. The bicycle business has been especially active during the past few months according to dealers.

A WICHITA, KAS., FIRM MOVES

WICHITA, Kas., Dec. 4.—An indication of the growth of the bicycle business in this city was seen in the move made by the Ellis Bicycle Company. This hustling firm has moved from 133 N. Lawrence avenue and the new quarters will give them three times the room they had in their old location. A big stock of bicycles and accessories will be carried.

Motorcycle News Continued

HAMILTON TAKES STAND AGAINST SPEEDING

Well-Known Pittsburg Dealer Withdraws Support From Motorcycle Racing Following Fatal Accident in 200-Mile Sidecar Race

PITTSBURGH, Pa.—Speaking of the accident which resulted in the death of Harold Glacken, in a 200-mile road race held at Pittsburgh Nov. 26, S. C. Hamilton, local Harley-Davidson agent, states that he is fully convinced that the speed game is not worth what it coses. Glacken was occupying a sidecar with L. Keys in the saddle, and the contesting team was composed of C. Coulter and a young man named Sills, with an Indian outfit. Near Bedford, Pa., the sidecar combination operated by Keys and Glacken turned turtle while making a turn at high speed, and Glacken was instantly killed. Keys was hurt, but not seriously. Glacken had been in the employ of Agent Hamilton for nine years.

Sentiment against high speed work, on either road or track, is spreading rapidly in this section, and there is a growing tendency to consider the motorcycle more as a pleasant and economical service vehicle than as a mere road-burner. This policy will have Agent Hamilton's unqualified support hereafter.

NEAT ANNOUNCEMENT CARD

BROOKLYN, N. Y.—An attractive card announcing the opening of their Reading Standard distributing agency and inviting an inspection has been sent out by Nickerson & Schroeder, Inc., of 1078 Bedford avenue. The story is told in a few words, in a manner which is both artistic and pleasing.

THORS FOR WESTERN SUPPLY

DENVER, Colo., Dec. 2.—The Western Supplies Company, 1448-52 Larimer street, this city, have just received quite a large shipment of 1917 Thors. The Western Supply people are urging motorcycle folks to call and see the new machines and state that they will find the store "right there with the Thor efficiency and service," as in past seasons.

AD. CAMPAIGN FOR FOX

DENVER, Colo., Dec. 2.—Peter Fox, 321 Main street, Grand Junction, Colo., is conducting a newspaper advertising campaign in the smaller towns and cities in his part of the State. In these ads. he is featuring the Indian motorcycles and bicycles. Fox is also planning on establishing a subagency in Montrose, Colo., soon.

THANKSGIVING RUN WINNERS

PROVIDENCE, R. I.—The annual Thanksgiving run of the Providence M. C, from this city to Westerly and return drew a creditable field, and competition was keen among the experienced roadsters. The best score went to Fred Wilbur, Jr., of Woonsocket, and Edward A. Swenson, Providence, was second. Henry Lazzelle, of Davisville, finished in third place, and W. J. Warnock, of East Greenwich, R. I., received the fourth award. The first three mentioned were mounted on Powerplus Indians, and the fourth rider was mounted on a 1913 Indian twin. The run was directed by B. A. Swenson, local Indian man, who conducts this affair annually, as well as a number of others.

WHEN MATTING WEARS

AFTER rubber matting on the sidecar floor has become spotted and frayed from use it could be restored to its original brightness by painting it with a lead-colored paint, then varnishing it. By doing this the matting will look like new and can be kept clean much easier than before painting it.

CONSTANT SETS PACE ON NEW JERSEY HILL

(Continued from page 36h)

initial try, followed by the pride of Paterson, Orie Steele, also on an Indian, in 34 flat, while Stevens, Harley-Davidson, rose in 32 4/5.

Three more tried and failed: Kluczek and Buchanan, R-S, and "Babe" Buttlar, Harley-Davidson, who found out that this hill was no place for a short-coupled single-geared racing mount.

That makes the first round of solo riders.

Next time up Havenstrite speeded up and crossed the summit in 30; Georke made it in 33 4/5; Constant, 24 4/5, two-fifths slower than first climb; Eckhardt broke into the elite by an ascent in 38; Bergfels passed his hoodoo spot and arrived safely in 37 2/5; McKinney used his eyes to good advantage and was clocked in 38 1/5, having found the "groove;" Snyder put his mount up in 30 flt; Somers in 31; MacDonald rode it in 32; "Young" Steele by an ascent in 28 4/5 moved up into second fastest notch; Terhune came along in 32 1/5 and the second string had been contested.

All contestants who failed twice were barred from a third trial, which thinned the ranks of the contestants and speeded up matters a lot.

It was during the third and final climb that the boys began to give her all they had, and as a result the crowd was treated to a series of wonderful sand-riding exhibitions and were showered with dirt and stones from the weaving hind-wheels.

Some one had been experimenting and found that the hill could be climbed on second, and as a result "Conny" reeled one off in 21 4/5 that will stand as the record for the hill. Terhune, rocking like a ship in a gale, followed in his wake with a 23-second ride, while Snyder was clocked in 26 seconds.

Other riders made good times, but we have kept that sidecar bunch waiting long enough.

Spear, Thor, started off with a 401-foot climb, immediately bettered by Havenstrite, Harley-Davidson, who rolled up 450.4 feet. This was not bettered by the next six drivers; then Bush, Harley-Davidson, started up and kept going higher and higher. Past the 500-foot mark, then the 600-foot—Gee Whiz! past the 700-foot peg, and then when he was within hailing distance of the 800-foot mark the motor said "Enuff." The tape read 770.3 feet. *Some* climb! Great joy in the Harley-Davidson ranks!

Two more tries that were tame by comparison were made by Terhune, Harley-Davidson, and Ker Henderson. Then Snyder, Indian, started and kept going. On he went always with that mark of Bush's before him. Higher and higher he went, then "chug" she said and the measurers read the figures, 772.8 feet.

Joy went over to the Indian camp then, for Snyder had passed Bush by 2.5 feet.

On the next try the field was reduced to 10 contestants and the best distances were: Bush, 534.4; Havenstrite, 492 and Snyder 777.6 feet.

Two trials were counted and the average taken for the final results.

Darkness put a stop to the ambitious climbers at the right moment and everyone rode home happy for a day of real clean sportsmanship and cleancut motorcycle competition.

The officials were: W. M. Walden, starter; A. R. Mackey, clerk of course; T. K. Lee, John Steele, Jr., S. D. Goodman, timers; Art Wintsch, scorer, and E. B. Holton, a little bit of every old job.

FORCE IS INCREASED

READING, Pa.—In order to take care of the increased demands now being made upon it, the Reading Standard Co. has made considerable additions to its working force. It is stated that practically enough material is now on hand for the year's requirements, and judging by the present indications, the company will experience no difficulty in making regular deliveries. Eighty per cent of the maximum output of the factory has already been contracted for.

Production will naturally be strongest on the electrically-equipped and regular twin models of this popular line.

KLUCZEK REPORTS ACTIVITY

NEWARK, N. J.—The Kluczek garage, 47 William street, local agent for the Reading-Standard line, has received the initial shipment of machines and has already lined up six buyers for the 1917 models with many names on the list of live prospects.

The New Departure Coaster Brake

"The Brake that Brought the Bike Back"
Let it help swell your Christmas sales.

This is the Big Christmas for Bicycles

Never before was money so plentiful.

Never before has so much money been spent in holiday buying as will be spent this year.

Never before have the grown-ups gotten so far away from cheap and worthless toys to buy gifts of real worth for their children.

This means you can sell Bicycles this Christmas.

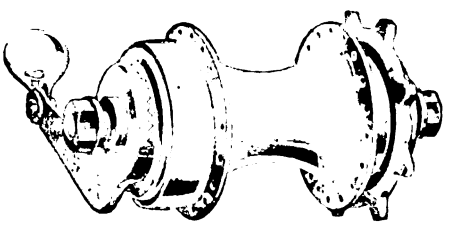
The more you put it up to the boys and girls that they can now own the Bicycle they have wanted so long

The more you talk Bicycles and the good they do, to the parents of these children, the more you can sell.

This is Certainly the Big Christmas for Bicycles

Leave nothing undone to get your share of this business: Advertise—Trim up your store, your store windows—See that you have plenty of New Departure equipped Bicycles in stock to meet the demand—Write us for timely literature and suggestions that will swell your Christmas sales.

The **NEW DEPARTURE MFG. CO., Bristol, Conn., U. S. A.**



Rightly used, it's good for life-long service.

Columbia

A certain number of Columbia bicycles are going to be sold within the next few weeks to meet the usual Christmas demand.

This is no speculation, but a sound, practical conclusion based on the experience of thirty-nine years.

This year, with the greatly increased interest in bicycling, the world-wide prestige of the Columbia itself and the nation-wide advertising it has received, the demand is going to be greater than ever before.

Dealers the country over have already begun to feel the effect. They are selling more Columbias than in past years and we are manufacturing more.

Our facilities place us in a position to fill your orders immediately with a complete line of these famous bicycles. With a wide range of attractive prices there is a model for every purpose: Motobike, Juvenile, Chainless, Daily Service, Superb and others.

Christmas, Columbia and the cash register are closely related. Work the combination now. Telegraph your order at once.

DE LUXE HEADQUARTERS FOR R-S

Nickerson & Schroeder, Inc., Complete Place in Brooklyn and Establish Up-To-Date Shop; Fixed Work Rates; Agents Signed Up

BROOKLYN, N. Y., Dec. 1.—Nickerson & Schroeder, Inc., distributors of the Reading Standard for New York, Connecticut and New Jersey, have put the finishing touches to their headquarters at 1078 Bedford avenue. The establishment is situated on a corner, having a frontage of 38 feet and a length of 85 feet. Of the length, 10 feet is partitioned off as offices, the remainder being for the show room.

Large plate glass windows are fitted on both front and side of the show room, giving ample lighting under all circumstances. The show floor is of hardwood, a brass mat being laid down from the office door to the main entrance. In the basement is located a modern repair shop, which includes an enameling outfit and a forge.

Nickerson & Schroeder, Inc., announce that they will undertake repairs at cost price plus 10 per cent., and will specialize in re-enameling and nickeling. The time rate, as stated by General Manager Schroeder will be 60 cents per hour. Only expert repairmen are employed.

To date the following local agents have been signed for the R-S by the firm: F. W. Anderson, Albany; Joe Jonaschek, Bronx; George E. Denton, Ossining; Child Brothers, Amsterdam; Lewis & Fry, Schenectady; Cole & Brown, Johnstown; Kraus & Heil, Syracuse; J. Nelson, 112 Fourth Place, Brooklyn, New York; Andrew Lardino, Jersey City, N. J.; Jos. F. Coupe, Utica, N. Y., and Sidney Hurvin, Jamaica, N. Y.

In the new headquarters, the company has a complete stock of accessories and supplies for motorcycles, in addition to the new models of the Henderson and Excelsior. James Sechlietner, formerly a salesman for the Wagner Dolph Co., Inc., has joined the sales staff of Merkle & Spacher, and Merritt M. Mitchell has charge of the repair end of the company's business.

NEW WANDERSEE STORE

Detroit Harley-Davidson Man to Erect Another on Woodward Avenue

DETROIT, Mich.—William F. Wandersee, Harley-Davidson distributor in this city, is building another store to give better service to patrons and dealers. The new place is to be at the corner of Woodward avenue and Boulevard. It will be devoted exclusively to motorcycles.

The size of the new structure is 30 x 100 feet, one story in height. It will be fireproof. The cost is to be $8,000. Wandersee sold more than 300 Harley-Davidsons last season and so far has disposed of 35 new ones. His bicycle sales exceeded 300 wheels.

LOCATED IN NEW STORE

Merkle & Spacher Are in Larger Headquarters As Result of Recent Fire

ROCHESTER, N. Y., Dec. 4.—The Merkle & Spacher Co., Inc., Henderson and Excelsior dealers in this territory, are now settled in their new store at 162 Clinton avenue north, where they located after the $5,000 fire which gutted their old store at 189 Clinton avenue.

FIRST SHIPMENT SOLD OUT

COLUMBUS, O.—John H. Beebe, manager of the Columbus branch of the Sykes Motor Co., central Ohio distributors for the Indian, reports that the first shipment of the new models has been sold out, and that business is now being lined up to take care of the second carload of machines which is expected daily. Manager Beebe reports unusual interest in the new opposed motor twin.

OKLAHOMA TRIP FOR WEED

KANSAS CITY, Mo.—R. A. Weed, of the Saufley Supply Co., will leave this city in a few days for an extended business trip through Oklahoma. Mr. Weed states that Oklahoma business has increased steadily of late, and that the trip he is now planning promises to be the most successful one of the kind he has ever made.

"BOB" SELLS 17

Brooklyn Harley-Davidson Man Delivers Them, Also Eight Sidecars

BROOKLYN, N. Y., Dec. 3.—Bob Brazenor, the live wire Harley-Davidson man in this city, has just sold and delivered his seventeenth Harley-Davidson of 1917 model. The day before Thanksgiving, "Bob" had six customers waiting to ride off on their mounts as soon as the machines were taken out of the crate.

In addition to the machines, "Bob" has sold eight sidecars to date. A picked staff from his stores at 1157 Bedford avenue and 494 Jamaica avenue are at the Harley-Davidson booth in the Madison Square Garden show.

TO HANDLE HENDERSON ONLY

KANSAS CITY, Mo., Dec. 1.—Newby Brothers, well-known motorcycle and bicycle dealers in this city, announce that on and after January 1, 1917, they will handle the Henderson four-cylinder motorcycle exclusively. Until that date, the Flying Merkel and Thor representations now held will be continued.

ROCHOW BACK IN THE GAME

ROCHESTER, N. Y., Dec. 4.—Arthur J. Rochow, formerly traveling representative for the Excelsior, and more recently with the Vim Motor Truck Co., has taken up the duty of manager for the Merkle & Spacher Co., Inc., Excelsior and Henderson agency in Rochester.

2 Atherton Elements that Make the Bike "Go"

Atherton Service

Is something more than a mere promise to help. It embraces plans that have been tried, have made good, and are making good. It means a service that starts at the factory, gathers momentum as it passes through the selling and advertising branches of the business, and strikes with full force at the public through you.

There isn't an Atherton dealer who isn't enthusiastic about it because they know from the results they are getting that it is a sure-as-fate service.

SERVICE

Atherton Braking

Is the very essence of simplicity and certainty. Examine an Atherton Brake and you will be struck at once by its remarkably small number of parts. Yet it has two driving contacts—two separate bids against slippage.

And as for safety, there never was a hill that could get past the three braking surfaces of the Atherton, each holding the wheel true to the wheel of the rider—ON THE INSTANT.

"Safety Always"—that's the pledge that goes with every Atherton-equipped Wheel.

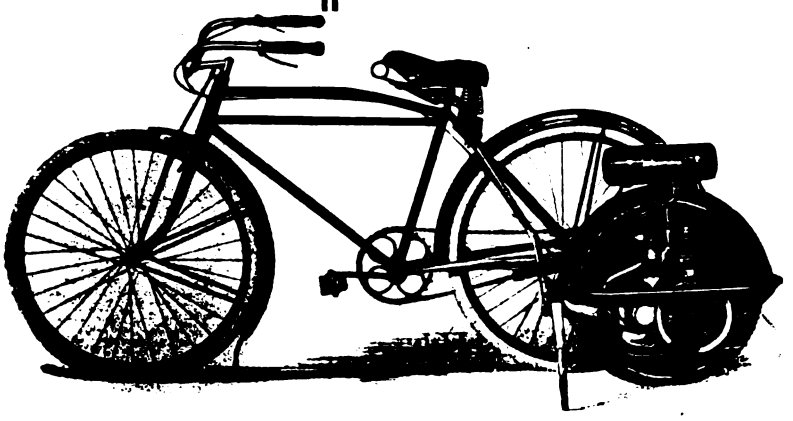
ANOTHER "WALK-AWAY"

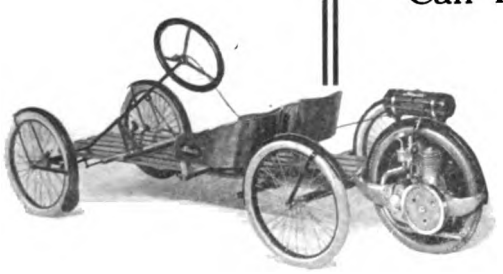


THE SMITH LINE easily won first place in dealer estimation at the Chicago Show. New York will be another Smith "walk-away."

Smith Motor Wheel $60.00

Opportunities for big Smith Motor Wheel business from the word "go" was the feeling among dealers at the Chicago Show. The eagerness with which they placed their orders is evidence. **Everywhere** Smith dealers are getting after holiday business—and they're bringing home the bacon, too.

Improvements make the Smith Motor Wheel an even better seller than before; and the Flyer, the lightest, most economical two-passenger motor-vehicle, is being welcomed with delight by both grown-ups and young folks. Right in your town there are customers ready to buy before Christmas, if you are only equipped to sell. And the cream of big holiday business in horns, lamps, handlebars and new **bicycles** will come to the dealer who sells Smith Motor Wheels and Flyers. Handle Smiths and these extra profits are yours.



"Can I secure the Smith line for next season?" is the question with most dealers, and not "Can I sell 'em?" because with demonstration Smith Motor Wheels sell themselves from Maine to California. For Smith representation see us at spaces 76-77, New York Show. If you can't attend, don't delay, but write for our profit proposition today.

Smith Flyer $125.00

Useful Rig for Cleaning Carbon from Pistons

PISTONS for quite a number of motors are inclined to be thin and are consequently easily put out of round when handled for removing carbon. When distorted in this manner, they will not fit properly in the cylinder. Any distortion, however, will be slight, and can easily be corrected by light tapping on the piston when it shows signs of bulging.

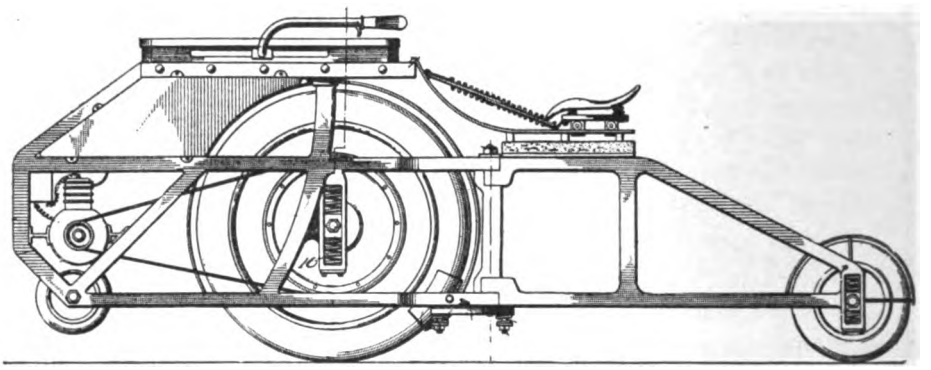
If the piston after removal from the cylinder and connecting-rod is held in some fixture, the distortion will not occur and much time and work will be saved. One such fixture can be readily made from a block of even-grained wood bored to slightly over the diameter of the piston and slightly less than its length. The block should be at least 5 x 5 x 8 inches for the piston of a 7 or 8 horsepower motor, the hole being bored centrally.

For a 3¼-inch piston, bore the hole on one of the 5 x 5 sides to a diameter of 3 5/16 inches: The depth should be ⅛ inch less than the length of the piston, to prevent wearing away the upper surface of the wood when using the scraper. Next bore a ⅜-inch hole from the opposite side. It is desirable that the bottom of the hole is parallel to the top surface of the block.

To clean the piston, insert it in the hole carefully, and then proceed with the scraping. When the head of the piston is cleaned, insert a rod through the lower hole and gently push the piston upwards until the top piston ring projects. The gum and carbon can then be cleaned out or loosened by kerosene and afterward removed. A further pushing out of the piston will enable the operator to get at the next ring.

Care should be taken not to hammer on the rod when the piston is being pushed upward in the hole, as this may cause a crack in the piston head. If the piston will not go with a steady pressure into the hole, use a half-round smooth file to enlarge the hole slightly. The expansion of the rings will keep the piston snug in the hole if it is not too large.

NOVEL TYPE OF MOTOR WHEEL INVENTED BY MESECKE



HOBOKEN, N. J., Nov. 24.—A novel invention in the motor vehicle line is the subject of a patent recently granted to Johannes Mesecke, formerly of Havelberg, Germany, but now in this city. The motor wheel, as it is called, uses a single tractor wheel.

The tractor or combined steering and driving wheel is carried in pedestals in a movable frame, springs being interposed to take care of shocks. The movement of this frame is in a horizontal plane under control of a pair of handlebars. The wheel is bevel driven from a jointed shaft extending rearward from the motor.

An idler wheel is fitted to the forward lowest part of the main frame, while there is a hinged connection at the rear for a trailer wheel, also pedestal and spring mounted. Mr. Mesecke can be addressed, care of s. s. *President Lincoln,* Hoboken, N. J., for further information.

Hornlite Spotlight

LIGHTING·SYSTEMS

At the Show, the two outstanding features of the Hawthorne exhibit —"The House of Bright Ideas"— will be the HORNLITE and the SPOTLIGHT.

The HORNLITE has most emphatically "taken hold" in the motorcycle field. Six big manufacturers have already adopted this self-contained horn and lamp for their 1917 electrically equipped models, Indian, Henderson, Dayton, Thor, Pope and R-S.

The features which recommend themselves to the buyer are the graceful lines of the HORNLITE, the generous size and the deep, rich tones of the horn, which has the entire body of the lamp for its diaphragm. Then, too, there is the focusing device and the switch, which makes the HORNLITE the most convenient, the best looking and most efficient combination equipment on the market.

A real spotlight, that can be directed to the right, to the left, up or down as desired. It enables the rider to follow every twist and turn of the road, to spot road-signs, in fact, actual use will demonstrate the thousand-and-one conveniences made possible by the "OLD SOL" SPOTLIGHT.

Specifications are:

6 inch door and body. All parts black enameled. 6 v. 15 c. p. bulb. Silver-plated reflector. Hole with eyelet for insertion of six-foot cable in lamp and battery end of cable provided with copper terminal. On and off switch at rear of handle. This lamp is equipped with 3-inch mirror for rear view. List price complete, $5.00.

Dealers — don't miss our booth at the SHOW. We've some very interesting "OLD SOL" innovations to show you.

USES SIDECAR RIG TO DELIVER REELS

Atlantan Finds Indian Combination Unsurpassed in Getting Movie Films to Express Office for Catching Through Train

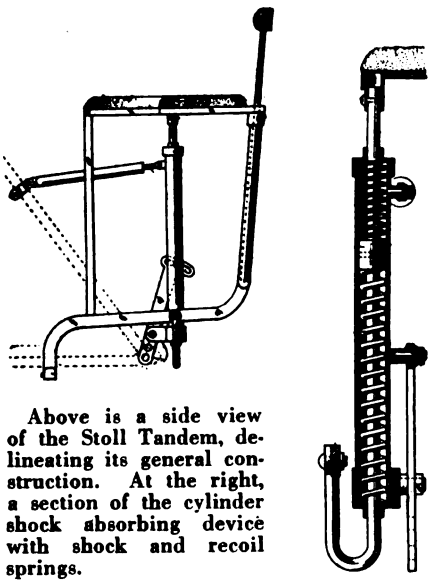
ATLANTA, Ga.—That the motorcycle is an important adjunct to the successful distribution of motion picture reels is demonstrated by H. J. Glenn, of this city. The reels must be sent from local theatres immediately they are run through to the express office in time to catch the train from Atlanta to Birmingham, otherwise, the audiences in the latter city will miss the favorite "thriller." Here's where Glenn and his Indian sidecar outfit come in.

Glenn gets the reels packed at his local theatre and has to drive a mile to the railroad station, and get the reels expressed in time for a certain train. He has 20 minutes in all to do this. Incidentally, he has done it so regularly that the entire circuit is pleased. Glenn took to the Indian rig after trying cabs, messenger boys and other alleged means of quick delivery, and now would not change for any money.

STOLL TANDEM SEAT

FRANK M. STOLL, of the Stoll Manufacturing Company, of Denver, Colo., has been granted a patent on a shock-absorbing motorcycle rear seat or tandem attachment, in which readers will recognize the elements of the well-known Stoll tandem. The seat is supported on plungers having pistons whose movement is governed by spiral springs. The springs work within cylinders which are pivoted to sector guides, the latter being secured to the frame of the motorcycle. A footrest, whose position is adjustable to the weight and build of the rider, is part of the invention.

There is a separate plunger, piston and cylinder on each side of the tandem, suitably connected to ensure the proper working of the parts with relation to one another. The patent is No. 1,205,489 and was granted November 21, 1916, although Mr. Stoll made his application in October, 1912.



Above is a side view of the Stoll Tandem, delineating its general construction. At the right, a section of the cylinder shock absorbing device with shock and recoil springs.

What to Tell the Purchaser of a New Machine

ONE of the things that should be impressed on the purchaser of a new machine is that speeding should not be attempted until after at least 500 to 600 miles have been run. In fact, a speed not to exceed 25 to 28 miles per hour should not be exceeded during this period, for the bearings must be given a chance to be run in.

Quite a little metal gets rubbed off the bearings of a new motor and falls into the crankcase. For this reason, it is advisable to drain off the oil in the crankcase after the first 1,000 miles and replace it with fresh oil, for the old lubricant contains particles of metal from the bearings and these will cut the shafts and bushings if circulated again and again.

100% INCREASE, SAYS PETERS

ALLENTOWN, pa.—A. A. Peters, who for the past two years has handled the Reading Standard line in Allentown, reports that he sold 14 machines during his first year in business and increased his sales last year by more than 100 per cent. Peters has already booked orders for 12 of the 1917 R. S. machines and asserts that he will reach the 50 mark for the coming season.

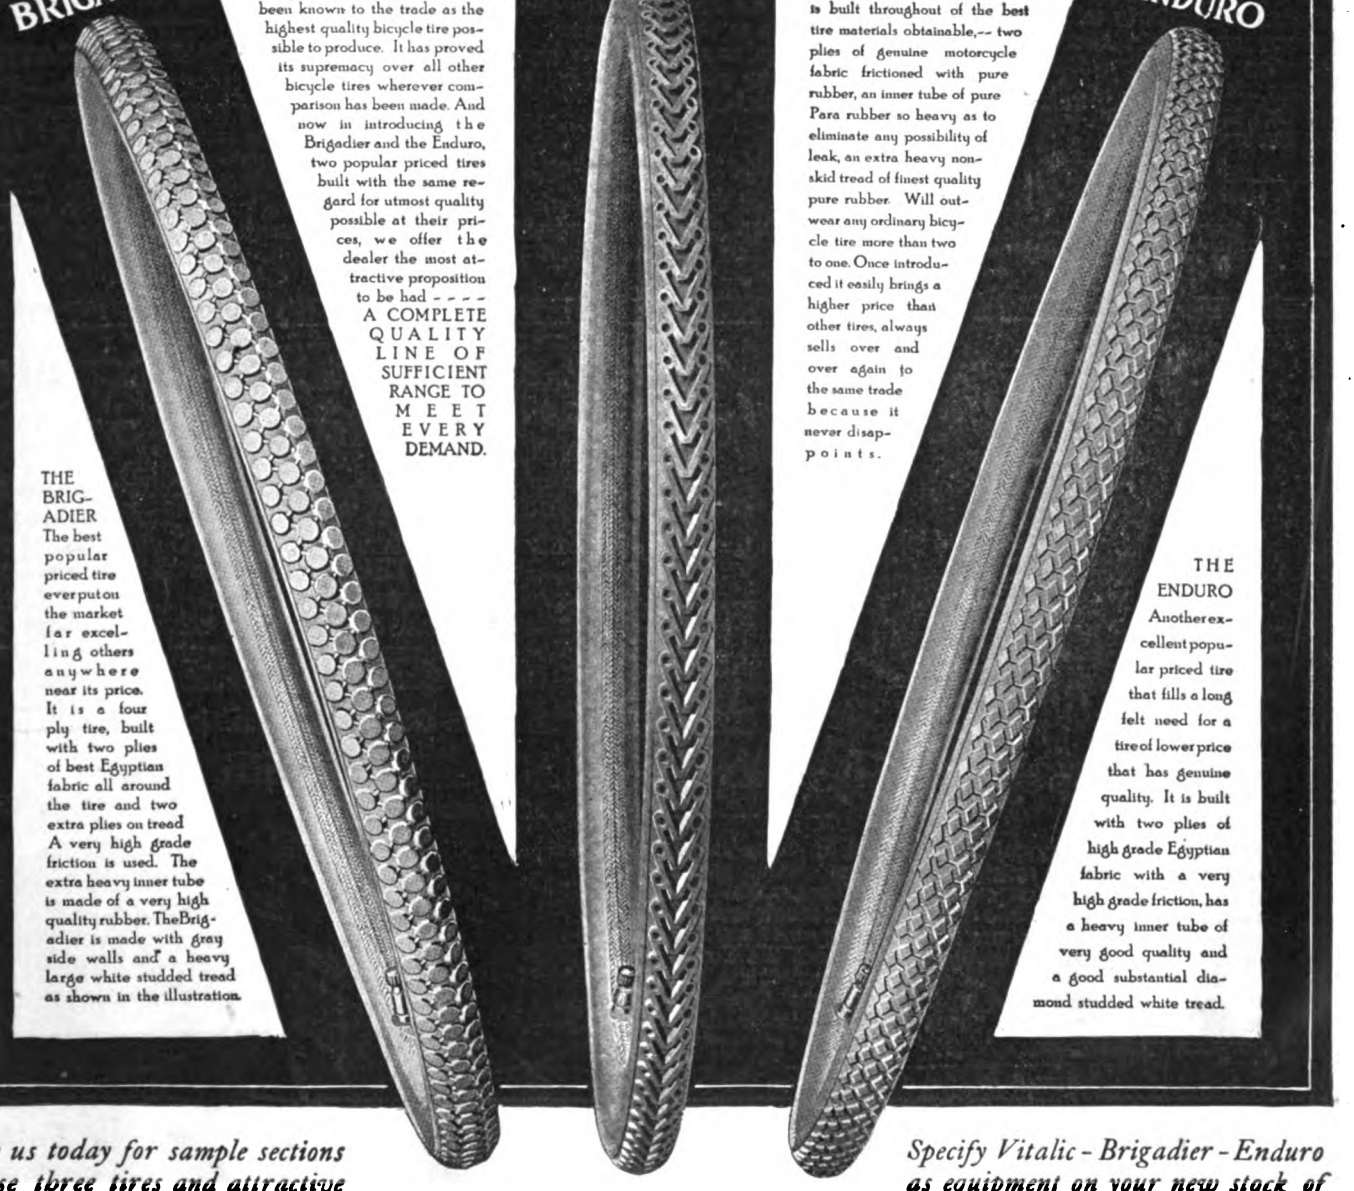
THE COUNSEL OF THE DEALER—

The counsel of the dealer is important. Your trade depends upon your judgment. Your stock of goods must at all times be complete. The Vitalic-Brigadier-Enduro tire line enables you to supply the demands of every customer that comes into your store -- from the one who wants the best regardless of price to the one who wants a good tire at a popular price. This "Tire Preparedness" should interest you.

BRIGADIER

VITALIC

ENDURO



For years the Vitalic tire has been known to the trade as the highest quality bicycle tire possible to produce. It has proved its supremacy over all other bicycle tires wherever comparison has been made. And now in introducing the Brigadier and the Enduro, two popular priced tires built with the same regard for utmost quality possible at their prices, we offer the dealer the most attractive proposition to be had - - - -

A COMPLETE QUALITY LINE OF SUFFICIENT RANGE TO MEET EVERY DEMAND.

THE VITALIC

is built throughout of the best tire materials obtainable,-- two plies of genuine motorcycle fabric frictioned with pure rubber, an inner tube of pure Para rubber so heavy as to eliminate any possibility of leak, an extra heavy non-skid tread of finest quality pure rubber. Will outwear any ordinary bicycle tire more than two to one. Once introduced it easily brings a higher price than other tires, always sells over and over again to the same trade because it never disappoints.

THE BRIGADIER

The best popular priced tire ever put on the market far excelling others anywhere near its price. It is a four ply tire, built with two plies of best Egyptian fabric all around the tire and two extra plies on tread A very high grade friction is used. The extra heavy inner tube is made of a very high quality rubber. The Brigadier is made with gray side walls and a heavy large white studded tread as shown in the illustration.

THE ENDURO

Another excellent popular priced tire that fills a long felt need for a tire of lower price that has genuine quality. It is built with two plies of high grade Egyptian fabric with a very high grade friction, has a heavy inner tube of very good quality and a good substantial diamond studded white tread.

Write us today for sample sections of these three tires and attractive display material and dealer helps. Your jobber will show you the tires

Answers to Questions

USE RUNNING START

HAVING an Excelsior of 1914 model I desire to fit it to a motor sled similar to that shown in the October 19 issue, but would like some further information. Please tell me how to start the motor after it is in place on the sled.

E. W. GAYLORD.

Geneva, N. Y.

The fitting on your motor to the sled is readily done by following the directions given in the original article. The bracket R will take the front axle after having the movable parts of the Excelsior fork taken out. You will locate the bracket E (see Motor Snowster article) after putting the motorcycle in position in the sled frame. A careful reading over of the instructions will make this clear.

Since you have pedal gear fitted, it is obvious that the machine will have to be pushed off similarly to making a running mount on a solo motorcycle. A compression release should be fitted to your motor sled, preferably to the bracket E, so that the driver can start with his hand on the lever.

WILL NOT RETARD SLED

I AM about to build a Motor Snowster similar to that described in the issue of October 19. I would like to inquire if you have listed any riders who have built such a power sled and to find out how they may overcome the riding of the drive wheel on the ridge in the roads between the wheel or sleigh tracks.

It is my opinion that this ridge would have a tendency to overturn the sled or cause more or less damage.

Gloversville, N. Y. C. KING.

A clearance of 14-15 inches from the runners is allowed for in the design of this sled, and a track of 36 inches. Any machine with a 36-inch track should be able to run on the "ridge" between the ruts on a road, while if the ruts are very deep and close together, the obvious thing is to straddle them with the sleds of the "Snowster," keeping the drive wheel on as packed a surface as possible. Light or moderately-packed snow unmixed with dirt should not hold back the sled, even if it came up to the main frame.

At the present time we have not heard from any riders who have built such a power sled.

Many-Sided Shop Tool

ONE of the many tools which the repair shop can use to advantage is the scraper. By this is meant the scraper made from a three-cornered file, for in many cases the patent scrapers are difficult to work motorcycle bearings with on account of their size. It is easy to make and costs very little.

The file-scraper, to give it a distinctive name, is made from a triangular file, the end of the file first having been broken off to give a new surface for grinding, etc. The grinding should leave the end of the file with three distinct faces corresponding to those of the file surface, with the edges very sharp and kept sharp at all times.

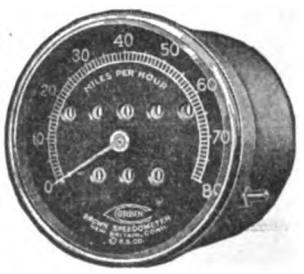
As a three-cornered file is made narrow in the face, the scraper made from it will work well in even the smallest bearing for the main or cam shaft, and the use of a special scraper is not needed. The file-scraper comes in handy for dressing down flat surfaces, which is not the case with the regular bearing scraper.

The file-scraper can be used to clean off shafts or spindles by gentle scraping, thus doing away with the emery paper often used, and at the same time not injuring the surface of the shaft. It can be used to enlarge oil grooves and to take off burrs from anything but the hardest metal pieces.

FOX CHANGES LOCATION

GRAND JUNCTION, Colo.—Peter Fox, local Indian and Cygnet agent, announces that he has just sold two 1917 Indian and Cygnet combinations to the New Method Laundry of Grand Junction. Fox also reports that he has changed his location from Main street to 124-128 South Fourteenth street.

Worthy of Your Consideration



The CORBIN-BROWN SPEEDOMETER

This instrument's reputation is backed by many seasons of exceptionally satisfactory service. When purchasing a speedometer or specifying equipment it would be worth your while to give it a thorough investigation. The demand for it becomes greater every year. This would not be the case had not the Corbin-Brown made good. In every instance where it has been subjected to a rigorous test the Corbin-Brown has proved itself to be an accurate, durable, dependable speedometer.

Specify it.

THE FLXIBLE SIDE CAR CO. LOUDONVILLE. OHIO. U.S.A.
TRADE FLXI MARK

This Fatal Accident

is an Eloquent Argument for the Flxible Sidecar

The fatal ending to the road race told of here would have been avoided had the contestants all used the FLXIBLE. It was principally due to the *rigidity* of the sidecar which broke loose from the motorcycle that caused the terrible catastrophe.

Coulter, driving the Indian Flxible Combination, says: "The course was a rough one. We went over boulders, down steep, sliding hills at breakneck speed. The FLXIBLE swung along, *giving* to every bump, and springing straight again afterward. *Not a nut or bolt was loosened.*

(From Motorcycling and Bicycling)

ROAD RACE ENDS FATALLY

PITTSBURGH, Nov. 27.—Harold Glacken, 18 years old, employed by S. C. Hamilton, local ——— distributor, was killed yesterday in a match sidecar race to Bedford and return, between the ——— and the ———.

Lawrence Keys, with Glacken as passenger, drove the ——— outfit, while Clifford Coulter piloted the Indian Flxible sidecar combination. At Irwin, after covering about 20 miles, the ——— had frame trouble and transferred the motor and sidecar to the frame of another machine, losing much valuable time. Five miles from Bedford, after making up most of the lost time, the outfit overturned on a bad curve, throwing Keys about 25 feet, and pinning Glacken under the machine, killing him instantly. Keys was painfully but not seriously injured.

Coulter finished in the fast time of 5 hours 20 minutes, covering the 200 miles over the mountains.

How different the story of the unfortunate victims! Note that they had to change the entire motor and sidecar from one motorcycle frame to another.

THINK—riders! Why trust your safety and that of others to a sidecar that has absolutely *no* compensating action for the terrible shocks of the road—when, at the same price, you can get a truly scientific sidecar, the FLXIBLE?

Write for full information.

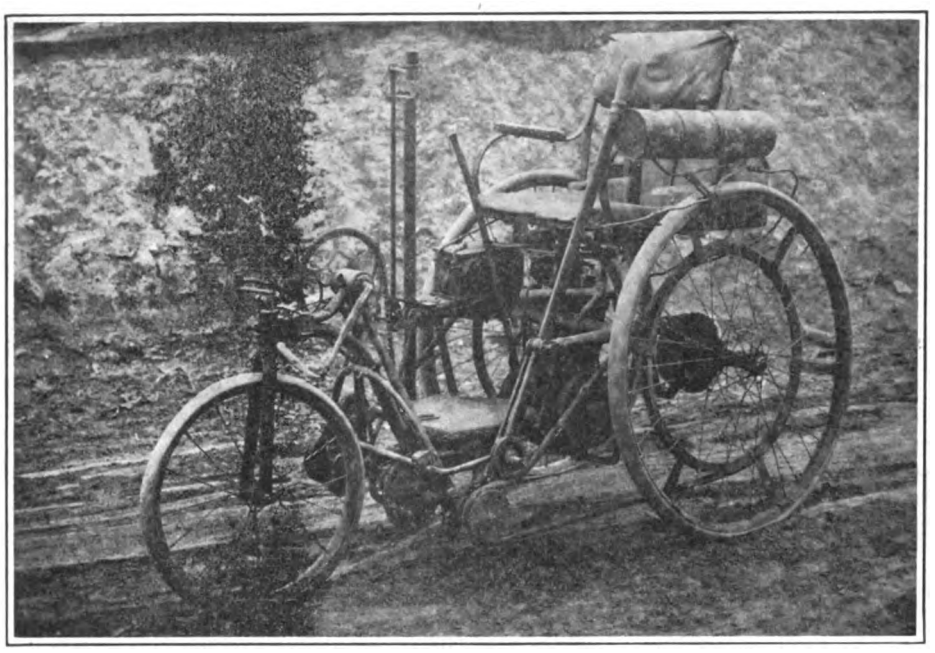
MOTOR TRICYCLE DESIGNED FOR CRIPPLES



Lunford's Motor Tricycle—Idler Handler at Left of Seat, Steering Arm at Right. Note Starting Gear of Pedal Type on Front Frame

MARBLE, N. C.—Sam J. Lunford, of this city, is the inventor of a novel motor driven tricycle, designed for those who can only use their hands and arms for controlling, cranking, etc. He has obtained a patent, No. 1,200,379 on the machine.

The Lunford tricycle consists of an ordinary tricycle with a motor located under the seat and slightly forward of the center line. This motor drives a countershaft under the footboard by chain, with final drive by round belt to each rear wheel. A jockey pulley operated by a hand lever at the left side gives the free engine position.

The motor is cranked by a pedal gearing to the countershaft, the pedal arm and sprocket being located in front of the passenger. Steering is made by a small tired wheel in front of the machine, the movement being controlled by a handle in the right hand.

About Carbon and the Oxygen Process of Removal.

CARBON and carbonization are subjects which offer opportunity for prolonged and varied discussion. We are apt to class as carbon all of the black mass which forms on the walls of the combustion chamber and the top of the piston, whereas, as a matter of fact, at least a third of this, and in some cases as much as half, is not carbon at all but plain ordinary road dirt. The dirt is sucked in as dust through the carbureter air intake to be glued to the wall by the gummy oil deposit and carbon.

When we take the motor down and scrape the carbon from the surfaces in the good old fashioned way, naturally the road dirt or silica is removed with it. But is this so with the oxygen method?

I must confess that I do not know whether the heat generated when the carbon is burned in the presence of the oxygen is sufficient to consume the silica or not; but it is a point I should like to have cleared up before I resort to oxygen.

If not, I would not recommend the process to anyone, for it is obvious that this deposit of silica, which is nothing more than sand and grit, being very fine, will work down between the piston and the cylinder walls and act as an abrasive and induce rapid wear.

Pleasure Trips as Sales Aids

How Touring Information and Interesting Photographs Can Be Employed by a Live Dealer to Convert Prospects Into Customers

By IRA R. ALEXANDER.

DENVER, Col.—When a motorcycle dealer is on a vacation trip with his motorcycle he should not forget his business entirely as there is a vast amount of material in the trip that can be used in furthering motorcycle sales. This is the view held by a number of Denver dealers and it has been found to work out with good results.

An example is in the trip recently taken by W. W. Whiting, Harley-Davidson distributor of this city. His trip covered over a thousand miles, and he visited all parts of the state. This gave Whiting a good opportunity to get acquainted with the road conditions of the state, and puts him in a position to advise motorcycle owners and prospective owners as to best motoring routes and the like.

Road Information of Value

This fact alone can be worked into sales talks and by it a prospect's interest can be secured. Other dealers here see the advantage of such an aid and make it a point to keep posted on roads and road conditions throughout the state. The fact that a dealer is posted on the subject of best touring routes and kindred subjects is the means of drawing people to that man's store for information, and, of course, it is bound to better the dealer's business in the long run. In fact, it is a business asset of the first class and is therefore worth widespread adoption.

Whiting took his camera with him on his trip and secured a large number of pictures. Many of these pictures he has framed and hang on the walls of his salesroom, where they attract attention from those coming into the store. They ask questions about them and in this way their interest in motorcycling is increased, and if they do not already have a machine, a way to a future sale is paved. The Mead Autocycle company store, handling Excelsior, as well as that of Boyd & Williams, Indian agents, have on their walls photographs of scenes along different motor routes.

Photos Help Sales Arguments

In showing these pictures taken on pleasure trips to those visiting the store and telling some interesting story about them, a dealer is aiding his cause. Those that see the pictures and hear the stories about the photographs, have their interest in motorcycles increased just that much. It gives the prospect a new angle from which to view the value of owning a motorcycle. In mixing the mechanical qualities of a motorcycle with the pleasure trip talk, a dealer has a very good combination that is bound to increase his sales very materially.

A dealer should also see that he has pictures taken while on winter trips in order that he may show what his machine is capable of doing when it has winter weather to combat. This will aid in boosting the motorcycle for winter motoring and will increase the winter sales of that machine.

Linking Pleasure With Business

If a dealer sees that a prospect is losing interest in what he is saying about the motorcycle he is trying to sell he can, in a great many cases, rekindle that interest by resorting to other lines of talk such as showing photographs of a pleasure trip he has taken, and telling interesting incidents about the trip and the part the motorcycle played in it. In this method he can also work in, from time to time, the different points relative to the mechanical qualities of the motorcycle that were demonstrated on the trip.

A motorcycle dealer, whenever he makes a trip out of the city in which he does business, should never fail to carry his business with him—in his mind, and be always on the alert to find things that will aid him in making future sales. He should always have a camera with him as many interesting pictures can be taken home that are of great use in illustrating sale talks. There are many ways in which a live motorcycle dealer can bring in different parts of his pleasure trips as an aid to him in making sales. It has been proven to be a successful aid and is one that is well worth trying.

MACLEAN BRACKET ABSORBS VIBRATION

Novel Handlebar Device Invented by Australian Assimilates All Shocks From Road Inequalities and Is Adaptable to Any Machine

NEW YORK, Oct. 14.—An ingenious and highly practical device for absorbing handlebar vibration is that of J. P. MacLean, of Hamilton, N. S. W., Australia, which has just been introduced into this country. This device is a spring bracket, adapted to any standard model of motorcycle, and fitting between the fork stem and the regular handlebars. It has not only had severe and long tests abroad, but has been tried out with success on a Cleveland lightweight for several weeks by C. W. Waughop, Eastern Cleveland representative.

The MacLean spring handle bracket, as it is termed, consists of a T-shaped lower portion at whose center is attached the end of the fork stem. At each extremity is attached a flat H-shaped piece forming part of a spring construction. To right and left of each H-shaped piece are slidably fitted half-round members, the springs being held between lugs and end plates. There are two springs, one at each end of the T-shaped lower portion, and the upper end of the front spring is attached by a special linkage which pivots on the portion of the lower member clamping the stem.

The upper end of the rear spring, which sets approximately vertical when in action, is attached to a forging which carries the clamp for the handlebars. The forward part of this forging attaches by side links to the upper end of the front spring. The result is that the handlebar is floating under the action of the springs, but only in a vertical plane, all movement horizontally being eliminated. The springs are tapered and so fitted as to give a cushion effect when in action.

MacLean Bracket on Cleveland Lightweight

The handlebars remain motionless at all times. When a road shock is transmitted to the forward part of the motorcycle, the front spring of the MacLean device elongates while the rear one telescopes, thus cushioning the shock. When the front wheel drops into a depression, on the other hand, the rear spring elongates and the front one telescopes. Between the two springs, no jar is left on the bars at any point.

The illustration shows the MacLean apparatus on Waughop's machine. It will be seen that the device is by no means unsightly and in no way affects the position of the handlebars. Information on this handle bracket can be had from C. W. Waughop, care of the Audobon Motorcycle Garage, 4192 Broadway, New York, or from the inventor.

Handling Small Steel Parts With a Horseshoe Magnet

WHERE small parts like cotter pins have to be handled when assembling a machine, a horseshoe magnet will be found of value in saving time and temper. A small magnet, such as can be purchased at a toy store, will do the trick and will not cost more than 5 or 10 cents.

When the pole ends are inserted in the box of cotters, several will adhere and one or more of these can be pulled off the poles much more readily than when rummaging with the fingers in the box. Brass parts, of course, will not respond to the pull of the magnet, nor will aluminum pieces.

"NORMA"
BALL BEARINGS
(Patented)

In the world of ignition apparatus, "NORMA" stands for bearing service. Therefore, when you adopt "NORMA"-equipped magnetos, you will introduce into your equipment an element of dependability that will add to the serviceability and saleability of your product.

ANDREWS INCREASES FORCE FOR 1917

Ontario Harley-Davidson Distributor Takes More Men for Service Station; McBride Has Firestone and Rogers Sidecar

TORONTO, Ont.—With a view to developing the Harley-Davidson service station plan, Walter Andrews, Ontario distributor for this make of motorcycle, has decided to make a substantial increase to his sales and repair shop staffs and he has already secured the services of several more workmen. Arthur Andrews, brother of the company's representative, will also go to the factory on January 1 for one month's special training, while a factory efficiency man will come to Toronto to supervise the arrangement of several local details.

Percy A. McBride, Toronto, Rogers sidecar distributor in Canada, has arranged with the Firestone Tire & Rubber Company, whom he also represents in local territory, for the placing of Firestone tires as standard equipment on Rogers sidecars imported into Canada. One option is permitted, namely, Dunlop tires, which are made in Toronto.

The Humphrey Bicycle & Motor Company, Toronto, Canadian jobbers, have added the Mesinger saddle line for 1917, an order having been placed for the goods at the Chicago show by A. E. Humphrey.

Herb Kipp, Canadian traveling representative for the Indian, is expected to return to Toronto about December 15 after an extensive western tour.

WHY CASH IS PLENTIFUL

Cycle Dealers in Moose Jaw Find Closing of Bars Has Helped Sales

MOOSE JAW, Sask.—The abolition of bars in the Province of Saskatchewan is given as the reason why the motorcycle and bicycle business of the Province took such a brace during the past six months, according to an opinion given by Stanley Wilkins, the hustling Moose Jaw agent for Indian motorcycles and C. C. M. bicycles.

Wilkins explains that he has made a great number of cash sales and he is firmly convinced that the closing of the bars has given many people a chance to save money. A number of young men have paid cash for machines, he declares, who did not have the wad to load the proverbial shot-gun a year ago.

TAKES SIXTH HENDERSON

TORONTO, Ontario.—The Toronto Police Department has ordered its sixth Henderson motorcycle from Percy A. McBride, Canadian distributor. The new mount is intended to replace a 1916 model which was wrecked during an exciting chase of a speeding automobilist. The new machine is a 1917 three-speed model.

JOINS IMPERIAL OIL CO.

TORONTO, Ont.—Blount Burtschaell, the former Atlanta, Ga., motordrome and dirt track racer, has joined the Toronto sales force of the Imperial Oil Company. This company constitutes the Standard Oil interests in Canada.

PORTER SOLD 27 R-S IN FIRST SEASON

Toronto Representative Took Orders for Sidecars on All But One of These Reading-Standard Machines; First Model Arrives

TORONTO, Ont.—W. J. Porter, the Toronto motorcycle dealer who formerly handled nothing but English models, has just started his second year's activities as Toronto sales representative for the Reading Standard. The first of the 1917 models has arrived and Porter is hustling. He got away to a late start last season, but disposed of twenty-seven new Reading Standards without difficulty. It is interesting to note that in twenty-six of these sales, Porter also took an order for either a Pullman or Rogers sidecar.

Porter has sold the second Reading Standard to the Ruud Mfg. Co., Toronto, for use in the delivery of hot water heaters. He also secured a repeat order for one Reading Standard from the T. Eaton Co., Ltd., the largest departmental store in Canada. This machine is to be used by a city traveler.

Porter has obtained possession of the next-door premises on Brunswick avenue, which were formerly occupied by the Toronto Motorcycle Club. This gives him exactly double the original floor space.

Special Delivery!

For quick deliveries this Stevens Side Car is just the thing. Light construction, but tough—carries 100 pounds. Not unwieldy—only 26 inches wide over all.

Well hung and well sprung—equipped with non-skid, studded tires.

Easy to detach, leaving bicycle for other use.

Hamper furnished in wicker or enameled wood, with lid.

PRICE, complete with fittings for attaching..... $20

Baker, Murray & Imbrie INC. NEWS

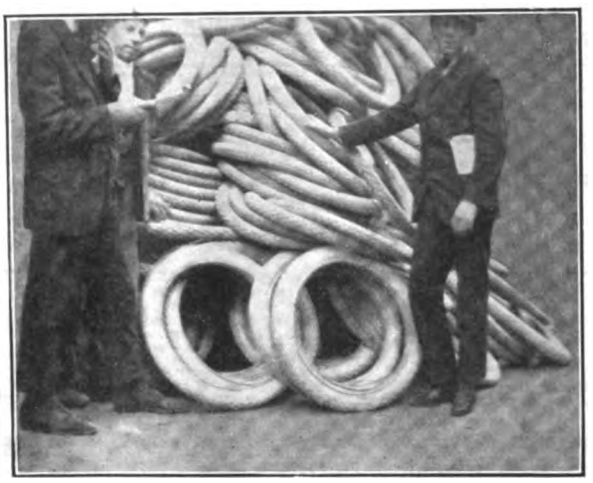
So Many Things Happen on Warren Street

that once every other week we're going to cover a page of expensive white paper telling you all about them.

They're the sort of things in which you have a natural purse-interest and to follow this page carefully is to be in on the latest profit-making opportunities in the bicycle and sporting-goods line.

If the Baker, Murray and Imbrie News brings to you now and then some bit of first-hand information that means a quick turnover and a handsome profit for you—if it keeps you in intimate touch with the doings of a house that has stood at the head of the line for a great many years—if finally it reflects the purpose and spirit of the men back of the Baker, Murray and Imbrie organization—it will have done all that those responsible for its existence desire.

2300 Goodyear Seconds Will Go Fast



Unloading Two Carloads of Goodyears at 10 Warren Street

THESE serviceable Goodyear Motorcycle Seconds are sure-fire sellers, every one of them. You can't keep them any longer than we can—once the wise riders in your locality know you are offering them.

We are able to offer these Seconds to you at such liberal terms that you can sell them at a man-sized profit. These are the sizes:

29 x 2¾ 28 x 2¾
28 x 2½

You'll Welcome Our Wholesale Sports Goods Department

You know what we've done with bicycles. Use our bicycle wholesale department as a standard by which to judge our new wholesale sporting-goods department. For that's the standard we've set up for ourselves.

It's with your store's interest first in mind that we've put in charge of the new department those who have had years of experience in all the ins and outs of the wholesaling of sporting goods.

This experience will work for the profit of wholesaler and retailer alike. The new department's heads know the retailer's viewpoint and give the best that's in them to serving you intelligently.

Ask our salesman for the full story next time he calls—or write.

When You're in the Movie Mood, Here Are Catchy Victor Slides

You know from your own experience that you're usually in a receptive mood when you're at the movies. Things appeal to you then just as they appeal to your customers. No one has ever figured out how many sales are made on the screen, but their number must easily equal that of Mary Pickford's admirers.

All of which leads up to the fact that we have a number of Victor Moving Picture slides that you Victor dealers can use to great profit in your favorite theatres.

Why You Should Order Abbey & Imbrie Fishing Tackle for a Full Season's Needs

In the past it has been the policy of Abbey & Imbrie to accept re-orders within a reasonable time at the prices quoted for the original order. For 1917, however, we have been obliged to withdraw the price guarantee because we ourselves are so subject to market fluctuations that we are unable to control prices to the trade.

We urge, in the interest of protecting your 1917 profits and retail prices, that your 1917 orders be placed *in full* early, so that we, in turn, can protect *you*.

The far-seeing dealer will act upon the suggestion—and the results will show in his earnings.

The *quality* of "Fishing Tackle That's Fit For Fishing" does not fluctuate—whether the market goes up or down.

Don't Overlook This Pierce Point!

A high-grade bicycle at a lower price than any other on the market—that's the nut-shell story of the Pierce one-piece hanger bicycle.

You don't need to know anything more about it, do you? There's your market—bigger this coming year than ever before, if the word of those on the inside of bicycle history means anything. And there's your Pierce product perfectly priced.

Unusual Discounts on Fisk Tires

There's a limit to the quantities of Fisk First Quality Tires that we're offering at less than the usual dealers' discounts. You know the Fisk story, and what's more, your customers know it. So that means getting in your orders to-day if you want to pile up to-morrow's profits.

Here are the goods:

Fisk Premier, 28x1¼, 1⅜, 1½ assorted treads.
Fisk 66 Smooth Tread, 28x1¼, 1⅜, 1½.
Fisk Extra Heavy Corrugated, 28x1¾.
Fisk 88-H Raised Tread, 28x1½.
Fisk Victor Thorn Proof, 28x1⅜ assorted treads.
Fisk Victor Corrugated, 28x1⅜, 1½, 1⅝.
Fisk Victor Non-Skid, 28x1⅜, 1½.

And with these are some fully guaranteed 1916 special brands and a lot of selected seconds of good value.

Harley-Davidson Vans

—*Permanent Business Builders*

Economy of operation has made Harley-Davidson delivery vans familiar sights on the streets of America's most progressive cities and towns.

The efforts required to sell the first few Harley-Davidson vans in a community are more than offset by the ease with which repeat orders may be secured after the equipment has made good.

Commercial sales probably mean more to Harley-Davidson dealers than to dealers selling other lines, because in most cases Harley-Davidson dealers are doing the biggest commercial business.

Has it ever occurred to you that if you could get hold of the Harley-Davidson line you could materially increase your commercial business? We are always glad to hear from live wires.

Harley-Davidson Motor Co.

Milwaukee, Wis., U. S. A.

Take Cleveland fo

Cleveland, one of the largest cities in the world, depends, to a considerable extent, for the maintenance of its lighting efficiency upon the MASTER THOR.

The East Ohio Gas Company has 49 THORS in 24-hour-a-day service. Forty-nine messengers of speed always on tap to carry the "turn on" men across town to give light and heat to the householder. Forty-nine utterly reliable steeds to carry inspectors over short-cut lots, rolling land, muddy meadows, to the outlying country to regulate the supply of gas in the wells to meet the varrying demands of a great city.

The THOR cooperative policy is the strongest, most considerate of the dealer's requirements and most broad-gauge of any motorcycle manufacturer. That is one of the big reasons why THOR dealers stick to the Master THOR year after year—and more representative merchandisers are daily flocking to the THOR standard. Write for our proposition.

nstance One Company Uses 49 Thors

Speed and certainty of getting there were the two main essentials that received consideration in the selection of the THOR by the East Ohio Gas Company officials. Certainty of service demanded a machine that would stand up under the gruelling use and abuse of such hard, constant service and the THOR met that demand by its simplicity, its powerful action and durable construction. And as for speed—well, all the traffic cops of Cleveland have their eyes out for "those gas company fellers that ye can't hear comin' and can't hardly see goin'."

Tomorrow, another gas company, another electric light corporation, another telephone company in another city will call for the THOR. Will YOU be ready to supply them?

1917 Indian Climbs to Another Victory!

Speed and power predominate in hill climbing contests—to win you MUST HAVE power and speed—this is the answer to the Indian victories in ALL of the principal hill climbing events of the 1917 season.

The latest Indian victory at the Yonkers, N. Y., hill climbing contest further demonstrates that the stock powerplus motor has NO EQUAL—its power and speed is supreme—it stands ALONE—Master of them all!

Indian Powerplus Wins Yonkers, N. Y., Hill Climb—

Over winding roads of soft, wet clay and rocks, made more difficult by an uneven car track crossing, John U. Constant drove his 1917 Indian Powerplus up the 1000 foot, 15% grade Yonkers Hill in 16 seconds, winning the event. Folliett, also on a 1917 Indian Powerplus, finished second. Time 16¼ seconds.

Wallace Stuart, on a 1917 Indian Powerplus with side car attached, was the winner in the side car class, making the climb in 39¾ seconds.

Indian Powerplus First in New Jersey Motorcycle Club's Hill Climb

John U. Constant, astride a 1917 Indian Powerplus, ascended the 851 foot hill selected for this event in 21 4-5 seconds, winning first place.

In the side car class, Harvey Snyder with a 1917 Indian Powerplus and side car, was awarded first prize for greatest distance—ascending this most obstinate hill 777.6 feet.

Indian Powerplus Makes Best Time at Bakersfield, Cal., Hill Climb

A 1917 Indian Powerplus Carried Roy Artley up the 800 foot, 55% grade hill at Bakersfield, Cal., in 21 4-5 seconds—the fastest time of the contest.

JUST AS INDIAN HAS MOUNTED SUCCESSFULLY THESE DEFYING HILLS, SO HAVE INDIAN SALES BEEN GOING UP—FAR EXCEEDING THE SALES OF ANY PREVIOUS YEAR FOR THE SAME PERIOD OF TIME. THIS IS NOT MERELY INDIAN "LUCK," BUT RATHER INDIAN QUALITY—INDIAN SUPERIORITY—INDIAN LEADERSHIP!

BLUE STREAKS

These Tires Save You Competition

Blue Streak Bicycle Tires are sold direct to dealers.

They are sold at one price—whether you buy ten pairs or a thousand pairs.

No jobbers can buy them from us any cheaper than you can yourself.

No mail-order house can buy Blue Streaks from us at *any* price.

Think of the competition this saves you.

If you are the smallest dealer in the world, your profit on every Blue Streak Tire you sell is just as large as that of the dealer who sells thousands of pairs a year.

These are the things Goodyear is doing to protect the dealer.

One price—one brand—one policy—one guaranty to all.

Don't you see the advantage in pushing these well-known, serviceable, fair-priced Blue Streak Bicycle Tires?

FEW SURVIVE SAN FRANCISCO-LOS ANGELES DOUBLE ENDURANCE GRIND OF 867 MILES

Los Angeles Squad Rides to Frisco and Back, While Golden Gate Boys Make Run to Southern Metropolis and Return; Seven of Frisco Party Complete Round Trip on Time Out of 36 Starters and Same Number of Los Angeles Entrants Bring Home Clean Scores

GOLD WATCHES AND $1,000 IN OTHER AWARDS FOR THE HIGH SCORE MEN

SAN FRANCISCO, Dec. 12 (By telegraph).—California added a remarkable chapter to the annals of motorcycle competition in this country December 9-10 when the 867-mile double endurance run between this city and Los Angeles sent squads of seasoned roadsters, of both solo and sidecar divisions, plugging through fog and over mountain passes. The contest was featured equally by the nerve and daring of riders, the stamina of machines (quite a few of which were fresh from the crates), and the number of spills and hairbreadth escapes.

The double run was started simultaneously from San Francisco and Los Angeles at midnight December 9, the participants from this city riding to Los Angeles and back, 867 miles, while the starters from Los Angeles made the dash to this city and back home, covering the same route. There was a lay-over of twelve hours at the turning points.

OF thirty-six entrants who started from San Francisco seven finished on time, as follows: C. Joyce, of Hollister, with Indian, 1,000 points; H. F. Manchester, of San Jose, and F. M. Gattrell, Harley-Davidson side-car combination, 1,000; Dudley Perkins and T. S. Hale, Harley-Davidson side-car, 1,000; Frank Karslake, Harley-Davidson, 1,000; Erwin G. Baker, of Indianapolis, with Indian, 1,000; F. H. King, of San Francisco, Excelsior, 975; E. House, of San Jose, Indian, 754. C. Joyce was the only amateur to finish the run at this end.

Jinx Gets Several Riders

Eleven out of the twelve riders from Los Angeles checked in with clean scores in this city for the first half of their journey. Fletcher, on an Indian, was in a mixup with an automobile here a few hundred feet from the checking station, after making a perfect run. He suffered a dislocated shoulder and a lacerated arm. Four members of the firm of House & Showater, San Jose Indian agents, were also injured. Carl Showater and Mike Slaghts were hurt at Morgan Hill on the return trip from Los Angeles, and at latest reports Showater was still unconscious.

Ben Torres lost his side-car wheel at San Felipe and was slightly hurt. E. House, after checking in here, rode to San Jose, and on the way fell asleep on his machine and struck a telegraph pole. He sustained quite serious injuries. Roy Artley, of Los Angeles, checked in at San Francisco with his Indian and then filled his tanks, changed his rear wheel and started his motor, which promptly caught fire from gasoline which had been spilled in the haste of replenishing the tanks. Artley extinguished the blaze and was out on the road again in twenty minutes from the time he checked in at the San Francisco control.

The San Francisco riders who failed to reach Los Angeles were Gerrick, Henderson; Westfall, Henderson; Cromie, Henderson; Campbell, Indian; Mahlstedt, Indian; Angwin, Henderson; Haldeen, Henderson.

THE RETURNS FROM LOS ANGELES

LOS ANGELES, Dec. 12 (By Telegraph).—The Los Angeles riders who returned to this city with perfect scores from their run to San Francisco were as follows: Gilmore, Excelsior; Ed Tice, Harley-Davidson; Bedell, Harley-Davidson; Ludlow, Henderson; Sagahin, Henderson; Bennett, Excelsior, and Ray Smith, Excelsior.

Bruschi, Harley-Davidson, went out on the return run, and Artley, Indian; Gilfilland, Harley-Davidson, and Leonette, Excelsior, were also put out of the running.

Twenty-one riders from San Francisco checked in here, and all but Leonard, an Indian rider, started back.

There were troubles in great variety to account for the retirement of the Los Angeles boys who failed to go through. Bruschi, Harley-Davidson, wore out his brake lining by dragging his brake unknowingly, and when he struck a turn at speed in Tejon Pass, going north, he dropped over the embankment and fell 30 feet with his side-car outfit and passenger. Bruschi and his partner stopped at the 30-foot drop, but the motorcycle went down another 100 feet. It was pulled back with a rope and went into Bakersfield under its own power.

Fletcher's Game Work

Roy Artley was trailed by the jinx all the way to San Francisco, having minor troubles, and in the Golden Gate city he topped off the program by having his machine catch fire. On the way back to Los Angeles Artley was hit by an automobile near Tulare and was forced to quit.

Gilfillan, with Harley-Davidson side-car, broke his motorcycle frame north of Tulare and went out. Fletcher, with an Indian just out of the crate, made an easy job of it until within half an hour of San Francisco, when he struck a tow-line between two automobiles and was thrown. While he was pinned under his machine, Bedell, mounting a Harley-Davidson, ran into him.

Fletcher and Bedell were fifty minutes ahead of schedule, so the former was taken to a hospital and hurriedly "patched up." In the meantime his machine underwent repairs, and as soon as he got out of the

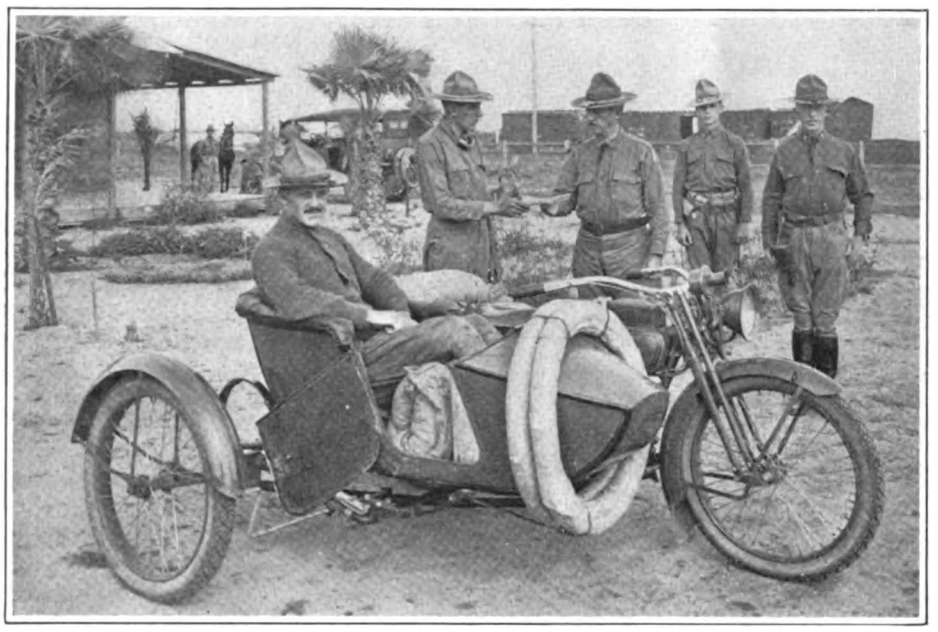
DRESSER DESCRIBES HIS ARMY TRIP

Military Courier and His Partner Traversed Uncharted Roads, a Lot of Bad Ones That Were Charted and Suffered a Bit From Cold and Lack of Proper Sleep; Army Men Impressed



Dresser Receiving General O'Ryan's Message to Governor Whitman at Camp McAllen; Edwards Is Seen Seated in the Sidecar

NEW YORK, Dec. 8.—Dan LeRoy Dresser and Corporal Harvey Edwards, the army despatch riders, completed their run from Camp McAllen, Texas, to Albany, N. Y., yesterday, arriving at the New York State capitol at 1 p. m. As Governor Whitman was not in town, Corporal Edwards remained over till this afternoon to deliver Major General J. F. O'Ryan's message, while Dresser drove his Harley-Davidson back to New York. The outfit was placed at the stand of the Harley-Davidson Motor Company, in Madison Square Garden immediately.

As related in **Motor Cycle Illustrated** last week, Dresser and Edwards arrived at the Garden at 7 p. m., on December 6, having covered 2,895 miles. The total mileage from start to the capitol at Albany was 2,956 miles, the time taken being 15 days, 15 hours, including all stops. The trip was completed with only one puncture and without mechanical trouble of any nature.

Dresser and Edwards carried the regulation pack in the sidecar, in addition to a spare tire and inner tubes. A sleeping bag was made up for the sidecar passenger, who rode in a reclining position practically all the time. Dresser and Edwards alternated in driving throughout, the man in the sidecar sleeping while his mate drove. They ate where they could and kept on traveling, stopping indoors but one night—at Old Washington, O.—and that in a hotel.

Dresser describes the stretch from Rio Grande City to Laredo, Tex., as unadulterated Sheol. The highway traversed is known as the Mexican Trail and is mostly ruts in the adobe mud, ranging as much as two feet deep. The Trail is well intersected with bayous and fords, and as it had rained for several days prior to the start, only low gear travel was possible. For four miles, in one place, an average of two miles per hour only was possible.

Part of the delay on the Mexican Trail was due to Edwards getting two gallons of kerosene instead of gasoline from a Mexican store by the wayside. The motor balked entirely the next morning after filling the tank with the kerosene, but was finally got going with some of the regular fuel obtained from a military camp nearby.

From Laredo to San Antonio there was more adobe mud, of varying depth, and the going through the rest of Texas was described by Dresser as pretty poor. To Oklahoma City, traveling was indescribable. Dresser stated, in fact, that his outfit pursued a storm all the way to Zanesville, O., being about twelve hours behind it. As it was a heavy downpour, the state of the dirt roads can be imagined.

Going on to Kansas City from Arkansas City, the roads were fair but rutty, and from then on to Louisiana, Mo., the going was slightly better. At Louisiana the Mississippi was crossed under the following circumstances: The last boat having gone, Dresser had to have recourse to a launch, and a skiff to carry the sidecar and its crew. Three times the crossing was essayed and three times the crafts turned back, as the launch took in too much water for safety. Finally, another skiff was procured and hitched to the opposite side of the launch, when the crossing was made safely.

From Louisiana to Indianapolis there was more mud-plugging. Indianapolis was left at 2 a. m. and Columbus reached at 11 a. m., this being one of the fastest stretches of the trip. As far as Zanesville, the going improved, but shortly after leaving this city, the couriers ran into a cloudburst and had to stop at Old Washington, O., being cold, hungry and soaked through.

From Wheeling, W. Va., to Cambridge, the road was under construction, and the

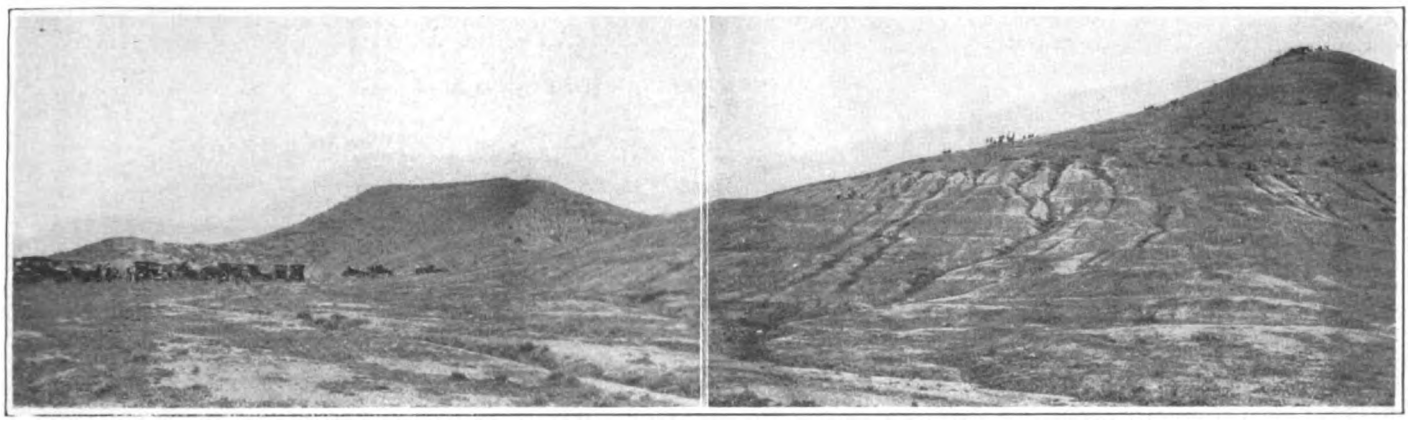
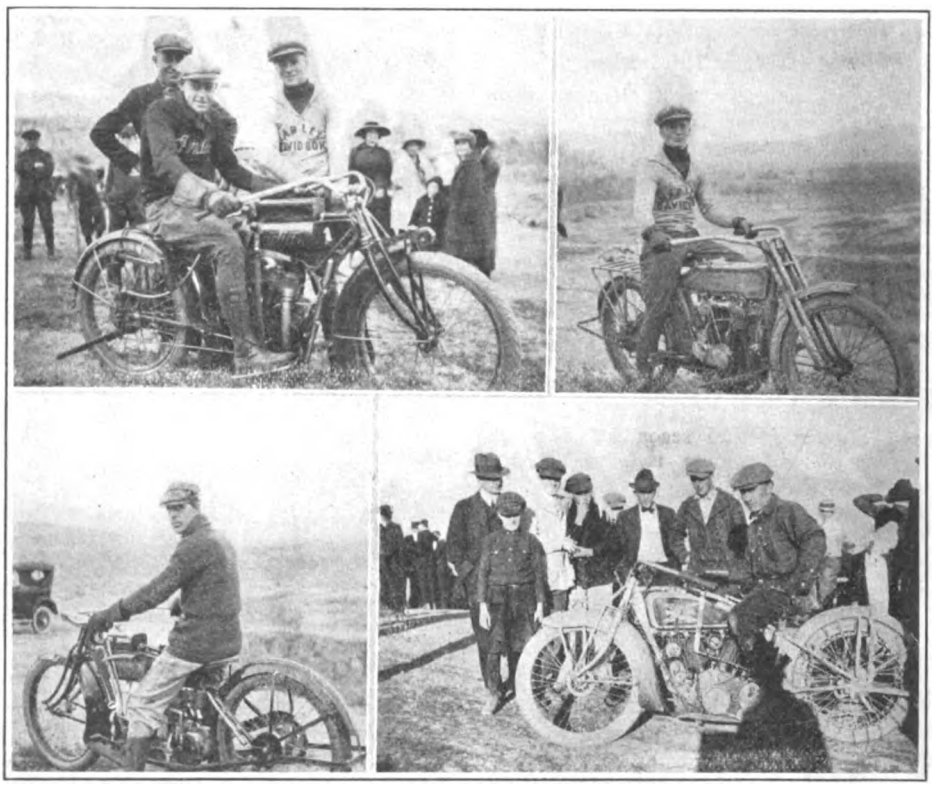
BAKERSFIELD HILL "SOME SKY-TICKLER"

List of Entries for Climb Was Small but Classy and the Grade Itself Was—Well, Take a Slant at It in the Panoramic Photo; the Four Top Scorers Pictured





The Panoramic View Above Shows the Scene of the Climb; at the Right Are Artley, on His Indian, and Tice, with His Harley-Davidson; Below Them Are Bill Parks, Henderson, and Gilmore, Excelsior. The Men Are Named in the Order in Which They Finished

BAKERSFIELD, Cal., Dec. 12.—If you don't believe the Bakersfield boys know how to pick a grade for a hill-climb just look at the panoramic picture on this page. It tells the story. Eight miles out of Bakersfield the Kern river has dug out of the plain a mighty canyon, and for a few miles the roadway skirts along the summit of the cliff, which is the southern wall of this canyon. At one point the cliff is broken into a steep slope, and here the club's hill-climb was staged.

As was stated in last week's issue of **Motor Cycle Illustrated,** the best climb of the day was made by Roy Artley, on his Indian, with Ed Tice a close second on a Harley-Davidson. Bill Parks was third on a Henderson and Bert Gilmore, Excelsior, fourth.

The course was 800 feet long. The first 200 feet was a gradually ascending slope, but after that came a 55 per cent. grade that continued to the summit.

DRESSER DESCRIBES ARMY MOTORCYCLE TRIP

(Continued from page 10)

despatch carriers were advised to ride through the construction. They did, and scarcely average 5 miles per hour as a result. Finally, the National Pike was entered upon and travel was fast to Hagerstown, Md. There was one bad stretch between Waynesboro, Pa., and Gettysburg, but from then on to the finish at Albany, really good roads were the rule.

One spill marked the trip. This was in Oklahoma, with Edwards driving. The outfit dropped into a mudhole and Dresser was awakened from his peaceful slumbers in the car by being slung into the soppy adobe. Two rabbits were run down in Illinois and the bunnies were collected and traded for a breakfast in the next town.

METROPOLITAN ASSOCIATION FORMED

Score of Dealers Attend Show Meeting and Vote to Combine—Constitution Committee Appointed

NEW YORK, Dec. 11.—An even score of dealers attended the meeting of the Motorcycle Dealers' Cooperative Association which was held in the Concert Hall of the Madison Square Garden last night and voted to join the body which is made up of motorcycle dealers of the Metropolitan district.

Carl Bush, the Newark Harley-Davidson dealer, acted as temporary chairman and the meeting was addressed by O. A. Adams, of the Cyclemotor Corp., of Rochester, who told of the success attending the formation of the Rochester Motorcycle Dealers' Association; W. H. Parsons, of *Motorcycling and Bicycling*, who pointed out some of the benefits accruing to the Chicago dealers through the agency of co-operative effort, and E. J. Mueller, of the Harley-Davidson Motor Co., who told how the Milwaukee Dealers' Association had made for better business conditions in that city.

Having voted to support the movement, the assemblage elected A. H. Patterson, Brooklyn Excelsior distributor, Gus Rotholz, New York Indian and Excelsior dealer, and E. F. Hallock of **Motor Cycle Illustrated,** a committee of three to draw up a constitution and by-laws and inaugurate a rapid fire membership campaign.

The dealers represented at the meeting were: A. H. Patterson, Excelsior, Brooklyn; Charles Krebs, Henderson and Pope,

"CONNIE" REPEATS ON YONKERS GRADE

Tops Rough and Slippery Incline in 16 Seconds on First Try—Mrs. Terhune Performs Best Among Lightweight Pilots and Wally Stuart Bests Dan Dresser in Run Off of Sidecar Tie

YONKERS, N. Y., Dec. 10.—John U. Constant, of Brooklyn, treated those of us who were unfortunate enough to miss the New Jersey Hill Climb last week to another little exhibition of his ability to "get up in the world" when he topped the Roberts avenue hill today in sixteen seconds flat. Of course he rode an Indian. Special? Well, specially fast.

"Frenchy" Folliot—his front initial is M. —also on an Indian made the second best showing in the solo division when he whizzed up the 1,000 feet of incline under a head of steam that carried him cross the tape in 16¼ seconds.

Folliot also made the third best time at 16¾ seconds and tied for fourth at 17 seconds. But as only the lowest time of the three tries counts, the rest of his remarkably consistent score goes into the discard.

Terhune Gets Third Place

As a consequence, third place goes to J. W. Terhune, the Hackensack Harley-Davidson dealer who scorched up the boulder-bestrewn and clay-bedabbled incline in 17 seconds flat while Art Herrington on a Harley-Davidson, E. C. MacDonald, similarly mounted, and Harvey Snyder on an Indian tied for fourth position at 17¼ seconds.

The sidecar contest provided much sport. "Wally" Stuart on an Indian tied with "Soldier" Dan Dresser at 26¼ seconds and as a consequence the duo figured for a fourth try. In the run-off, Stuart bettered his time to 26 seconds flat, while Dresser, through some unfortunate circumstance fell off to 28¾ seconds. The soldier, however, fits into second place with his 26¼ score with Orrie Steele, the Paterson wonder, in third berth with a showing just a second slower.

Lightweights Draw "Shemales"

The lightweight division, although slower and considerably less spectacular than either of the others, furnished some keen and clean sport—sport that was all the keener and likewise all the cleaner for the fact that it drew forth a couple of "shemale" competitors.

Yea Bo, and 'twas a suffragette that won the event, too, for Mrs. J. W. Terhune chugged up to the top on a little two-stroke Cleveland in just 38 seconds, clipping one and three-quarter seconds from the score of "Wally" Stuart, who made the climb on an Indian Featherweight and lays claim to second honors.

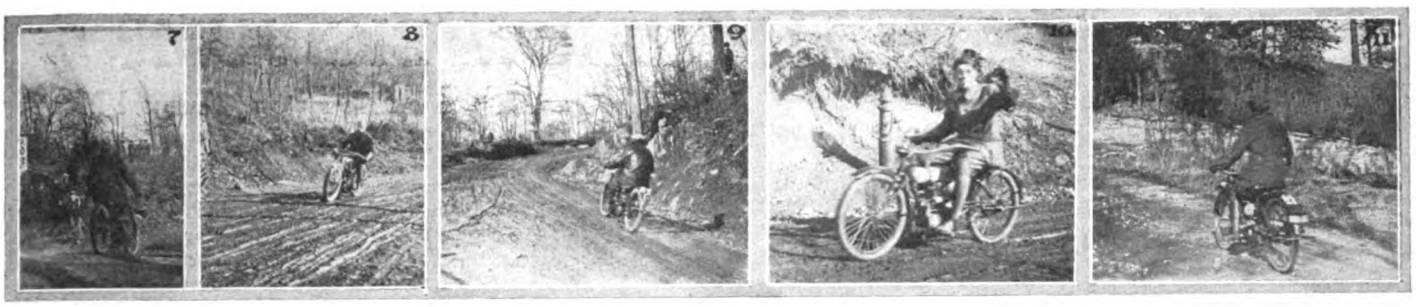
Third place went to Miss Adeline Van Buren, who although newly initiated to lightweight riding after "transcontinenting" on a Powerplus, topped the incline on the Featherweight in 41 seconds flat. Harry Raoul, on a Cleveland, with a score of 43 and C. W. Waughop, also on a Cleveland with one of 44½, finished out the lightweight division.

The day broke cold, but clear, and those of us who had them went right in for that preparedness stuff by donning our chamois shirts and macks against the chill of the day. The contest had been called for ten o'clock but the fellows who got to Yonkers at that hour—and there were mighty few of them—instituted a practice period which strung along till two o'clock before the start was made.

By that time such of the loose boulders

1. Mrs. J. W. Terhune, Who Won the Lightweight Climb on a Cleveland. 2. "Soldier" Dan Dresser. 3. Sladsky, Indian, at the Finish Line. 4. Art Herrington, Harley-Davidson, Smiles. 5. Shaughnessy, the "Wig Wagger," Wirelessing the Top for Time. 6. La Fosse and Barnard, Excelsior

Digitized by Google



7. "Connie," the Winner, Half Way Up. 8. La Fosse, Excelsior, Nearing the Top. 9. The Sharp Curve at the Finish. 10. Waughop, Cleveland, Doing It in 44 Flat. 11. Mrs. Terhune Starting on Her Winning Try

as Promoter George Ellis and the "Missus" had not succeeded in clearing away from the lower stretch between the hours of eight and ten in the morning—a hard job for a cold morning and typical of Ellis' unselfish devotion to the sport—had been cast aside by the chainshod rear wheels of the snorting machines and much of the wetness and "skittishness" of the upper clay stretch had been dried out by a combination of sun, breeze and incessant passage of tires.

Lightweights First

The lightweight division started the affair, Stuart making his lowest score on his second try. With all of the others finished and Miss Van Buren's score of 41 flat standing next to that of Stuart, teammanager Waughop in charge of the Cleveland operations, took a desperate chance and sent Mrs. Terhune to the top on "high" and his strategy coupled with uncommon riding ability which the girlie herself possessed won the day for Cleveland in the lightweight division with a score of 38 seconds. In her other trys, Mrs. Terhune used low gear.

Sidecars Provide Sport

The sidecar boys were next to face the starter and right off the reel Dan Dresser nonchalantly slipped to the top in 26¼. And had the scoring been on the basis of consistency 'twould have been Dresser's day, for the soldier boy repeated on his second try and on the third dropped behind only to the extent of half a second. For a while it looked as though the soldier was going to walk off with the sidecar honors, for the closest approach to his mark was 27¾ made by Orrie Steele on an Indian on his first try.

When Stuart managed to tie the score on his third time up and finally managed to beat it by a quarter of a second on the runoff, enthusiasm was keyed to a high pitch.

Event Drew a Multitude

The solos which bounded up the short lower bebouldered incline threatening every minute to skid into the ditch or throw the daring pilot, then "aviated" across the car tracks which interrupted the continuity of the incline to land on the soft clay of the upper grade with the chain shod rear wheel doing the buzz saw act to the road surface, furnished a thrill that was worth traveling miles to see. And the crowds turned out in fine style to see the sport, fully 800 people lining the course while a conservative estimate puts the number of motorcycles parked on the bordering streets at 200.

HOW SOLO RIDERS FARED

Rider and Machine	Seconds
J. U. Constant, Indian	16
M. Folliot, Indian	16¼
J. W. Terhune, Harley-Davidson	17
Art Herrington, Harley-Davidson	17¼
E. C. MacDonald, Harley-Davidson	17¼
Harvey Snyder, Indian	17½
J. Wasko, Harley-Davidson	17¾
"Babe" Buttlar, Harley-Davidson	18¼
A. La Fosse, Excelsior	19
Calvin R. Webber, Indian	19¼
J. McCann, Harley-Davidson	19¼
W. H. Bergfels, Jr., Harley-Davidson	19¼
R. Callahan, Thor	20

Miss Adeline Van Buren, Indian	22
F. Sladsky, Indian	22½

THE SIDECAR SCORES

Wallace Stuart, Indian	26
Dan Dresser, Harley-Davidson	26¼
Orrie Steele, Indian	27¼
Harry Raoul, Indian	28¼
Harvey Snyder, Indian	29
H. S. Bracken, Harley-Davidson	31½

LIGHTWEIGHT DIVISION

Mrs. J. W. Terhune, Cleveland	38
Wallace Stuart, Indian	39¾
Miss Adeline Van Buren, Indian	41
Harry Raoul, Cleveland	43
C. W. Waughop, Cleveland	44½

Even as Dresser was consistent in the sidecar division, so was Frenchy Folliot throughout his three trys which were timed at 16¾, 16¼ and 17 seconds respectively. Likewise Terhune, who came in for third honors, went up once at 17½ and twice at 17 seconds flat.

"Connie," on the other hand, was particularly fortunate in making his record on his intial try, for a plug fouled on his second attempt and he stalled just before crossing the finish tape, while on his third comeup the same negative agency worked to slow his time to 26½ seconds.

Hats Off to Miss Van Buren

The participation of Miss Van Buren in the solo event added a degree of interest that is uncommon and the crowd marveled as the slight, seemingly frail girl, clad in regulation leather togs wriggled up the incline and aviated 'cross the car tracks with the best of them.

During the running of the event there were two spills which marred the sport and chilled the spectators to the marrow. Most of them are wondering yet how Babe Buttlar managed to escape unhurt when his machine dropped on top of him just as he reached the take off on the lower incline—but Babe came through with merely a few scratches and came up the hill in good style a couple of minutes later amid the cheers of the crowd.

La Fosse on the Excelsior furnished the other spill which occurred in the soft stuff on a sharp right turn just after he had crossed the tape in 19 seconds flat. The rider was unhurt, but the impact put some of the motor vitals out of commission and the only Excelsior which was looked for to provide some keen competition with La Fosse and Irving Barnard in the saddle was out of the running.

Trade Folks Galore

The event brought forth an unprecedented number of trade folk. Some of those whose presence was noted are: E. M. Jackson, Indian; E. J. Mueller, Harley-Davidson; Art Herrington, Harley-Davidson; Irving Barnard, Excelsior, and Ben Goldstein, E. J. Willis Co.

The following dealers were in the ranks: Carl Bush, Newark, Harley-Davidson; John Steele, Paterson, Indian; W. D. Hanna, Yonkers, Indian; Stern Bros., Indian; New York; Tom Sixsmith, Excelsior, New York; Bob Brazenor, Harley-Davidson, New York; J. W. Terhune, Harley-Davidson and Cleveland, Hackensack; G. E. Wood, Harley-Davidson, New York; Chas. Drude and John Cobban, Jr., Henderson, New York; Harry Raoul, Indian, New York; John Lever, Cleveland, New York; Wallace Stuart and Calvin Webber of Baker, Murray and Imbrie, New York Indian distributors, and E. C. MacDonald, manager of Wood's new Bronx branch.

The Officials

The affair was promoted simply for the love of the sport by State F. A. M. Commissioner George A. Ellis. Mrs. Ellis acted as checker at the starting line; W. D. Hanna officiated as starter. The timer was Vice-Commissioner Dieterich, assisted by E. J. Mueller, and the scorer, E. F. Devlin. Jack Shaughnessy of Co. A. 9th Inf., N. Y. N. G., acted as signal man with the assistance of two members of the Crotona M. C., who had learned their art at the military training camp at Plattsburgh.

The best times of the contenders in all three divisions are shown in the accompanying table.

GOODYEAR SALES SHOW BIG JUMP

Gross Business Increased from $36,000,000 to $63,000,000 as Shown by Reports at Annual Meeting of Stockholders; Net Earnings $7,000,000; Doubling Size of Factory

AKRON, O.—All reports submitted at the annual meeting of the Goodyear Tire & Rubber Co., held Dec. 4, at the general offices of the company in Akron, bear out the statement that 1916 was the best year in the history of the concern, the gross business jumping from $36,000,000 to $63,000,000, showing an increase of 80 per cent. over 1915. Emphasis was placed upon the fact that the Goodyear Company had no "war babies," and that the remarkable growth referred to was brought about through domestic and peaceful foreign business. The net earnings of the company, incidentally, jumped from $5,000,000 to $7,000,000.

President Seiberling's Report

President F. A. Seiberling closed his report to the stockholders by saying: "It will be of interest to stockholders to know that with 59,000 customers' accounts on the books of the company, the net loss of collections has been less than one-tenth of one per cent.

"We are pleased to state that prospects for increase in both volume and profits for the coming year are encouraging, and that the policy of the company to manufacture only products of high quality, and the fair treatment to all customers, is exerting a widespread and highly beneficial influence."

Factory Expansion

President Seiberling stated that the company actually had turned down some orders this year, because the capacity of the factory had been reached. Buildings are now under way, however, which will practically double the size of the factory, and the company is also back of a plan to build 1,000 houses in the Goodyear section of the city for the use of Goodyear workmen.

All the directors were re-elected, as follows: F. A. Seiberling, C. W. Seiberling, G. M. Stadleman, F. H. Adams, P. W. Litchfield, H. B. Manton and J. P. Lunis. The directors in turn re-elected the officers: F. A. Seiberling, president; C. W. Seiberling, vice-president; G. M. Stadleman, vice-president and sales manager; P. W. Litchfield, vice-president and factory manager; A. F. Osterlow, secretary; F. H. Adams, treasurer; W. E. Palmer, assistant secretary and assistant treasurer, and H. J. Blackburn, second assistant treasurer.

TWO MODELS OF CENTURY ANNOUNCED

New Firm Heralds Single-Cylinder and Opposed Motor Machines, Both of Two-Stroke Type, for Delivery March 1

CHICAGO, Ill.—A single cylinder two-stroke lightweight and an opposed motor model in the same class, also working on the two-stroke cycle, are announced by Vice-President Will Lanning, of the First Mortgage & Bonding Company, of this city. The machines will be known as the Century. Deliveries are promised for March 1.

The single cylinder model, listing at $100 and weighing about 100 pounds, is closely identical with a machine announced just before the Chicago Show of 1915 by Russell & Osborne of Chicago. It was, however, never put upon the market. The present motor is rated at 2½ horsepower, with a maximum speed of over 35 miles per hour. Its dimensions are: Bore 2⅝ inches, stroke 3 inches. The wheelbase on this and on the opposed motor model is 52 inches. Both models have flywheel magnetos. The single cylinder machine has pedals and belt drive.

The opposed motor model, listing at $150 and weighing about 130 pounds, has a lever starter, the motor being given several revolutions when the rider draws the lever back by hand. The clutch lever is at the left. Final drive is by chain. A luggage carrier is fitted to this model and long footboards are included.

The First Mortgage & Bonding Company state that the plan of manufacture is to be one of assembling exclusively. Negotiations for several factory sites are now under way. Vice-President Lanning says that the machine has been under tests for a year and that the firm is satisfied it will do all that is claimed for it.

ARGENTINA VICTORY

Harley-Davidson Riders Get First and Second in Spring Race

MILWAUKEE, Wis.—In a despatch to the Harley-Davidson Motor Company, Dartiguelongue y Compania, Buenos Aires, Argentina representatives, state that first and second places in the Spring competition for 200 kilometres (125 miles) were obtained by riders of Harley-Davidson mounts. First place was obtained by R. Blanco, while the second man was Arnoldo Bernasconi.

"GARDEN" IS SOLD

NEW YORK, N. Y., Dec. 13.—Madison Square Garden, the famous amusement building, was sold at public auction last Friday. The New York Life Insurance Co., holders of the first mortgage of $2,300,000, bought in the property for $2,000,000. In all probability the insurance company will dispose of the property to other parties, but for the present it will still continue to be used for various sporting and amusement events.

GOODYEAR TIRE NEWS OUT AGAIN

AKRON, O.—The *Goodyear Tire News* for October and November is now being distributed. The issue is featured by a map showing the scope of Goodyear distributing centers throughout the world, and there is the usual lineup of helpful pointers for motorcyclists as well as automobilists. An instructive department for the dealer is conducted under the title of "Practical Vulcanizing Hints," and the issue throughout is well worth reading.

CHARTER FOR U. S. RUBBER CO.

DOVER, Del.—Among recent charters filed is one for the United States Rubber Co., which will deal in rubber goods of all kinds. The capitalization is $100,000. Those behind the new company are: Henry B. Hubbard, John D. Carberry, both of Brooklyn, N. Y., and George May, of Pelham, N. C.

FAIRBANK BECOMES DISTRICT MANAGER

Former Assistant Advertising Manager of Firestone Co. Takes Charge of Eastern Territory; Now Visiting Branches

AKRON, O., Dec. 4.—Announcement has just been made by the Firestone Tire & Rubber Co. of the appointment of L. G. Fairbank as Eastern District Manager. Mr. Fairbank has been assistant advertising manager for the Firestone Company for the past three years, and his friends are legion through the trade from coast to coast. He succeeds D. C. Swander as district manager, the latter going to Boston as head of the local branch there.

The object of the district manager plan, as first put into operation by the Firestone Company last spring, is to provide better service by bringing the field organization and the home office into closer touch. Being thoroughly conversant with the broad advertising and sales policy of the company, and having been a keen student of the requirements of tire users for years past, Mr. Fairbank is admirably fitted to make the most of the attractive opportunities in the eastern territory.

Mr. Fairbank is now making a tour of the Firestone branches in the eastern district and discussing local conditions with the various managers with a view of seeking better business methods.

"The Firestone organization is growing so rapidly that we feel the necessity of this final arrangement," said Mr. Fairbank in commenting upon his new work. "To give some idea of the big increase in our business, I need only to mention the fact that Firestone sales have increased from $25,000,000 to more than $33,000,000 in 1916. Before the spring riding season opens our production of pneumatic tires will be 20,000 per day.

L. G. Fairbank

A STORY OF PROFITS

Light Car Dealer States That He Gets Only 15 Per Cent Commission

NEW YORK, Dec. 11.—An interesting sidelight, or a toplight, perhaps, on the motorcycle vs. light car situation, which has been the subject of considerable discussion among motorcycle dealers of late, is found in the statement of a certain light car agent that 15 per cent. is the biggest discount allowed by the manufacturer of the product he handles. Anything above that is on a proviso basis, which is seldom very liberal, and which usually prescribes that a large number of machines be disposed of.

E. J. Mueller, assistant sales manager of the Harley-Davidson Motor Co., recently discussed the situation with a dealer who handles both motorcycles and Ford cars. This dealer stated that he makes bigger profits on motorcycles than on light cars, and that he can afford to allow $25 more on a used motorcycle turned in in connection with a sale than he can allow on a Ford car received under similar conditions.

FORD SUCCEEDS HARROP

NEW BRITAIN, Conn.—N. B. Ford, who for ten years traveled for the Corbin Screw Corpn. from their Chicago office, having his headquarters in Kansas City, and who left some two years ago to become connected with the Ford Chain Block & Mfg. Company, of Philadelphia, has reentered the employ of the Corbin Screw Corpn. as salesman, with headquarters in New Britain, and covering the territory formerly traveled by A. H. Harrop.

IT WAS GOODYEAR-SHOD

AKRON, O.—A Goodyear representative writes from South America that on a recent business trip to the small town of Parana, Brizil, he discovered a Smith Motor Wheel busily boosting a bicycle up the street in the same manner we are accustomed to see it perform in this country. A little later he had an opportunity to examine the outfit and found that the tire on the outfit was a Goodyear.

NEW ELECTROTYPES

Harley-Davidson Advertising Department Revises Catalog.

MILWAUKEE, Wis., Dec. 11.—A revised catalog of 1917 advertising electrotypes has just been sent out by the Harley-Davidson Motor Company to its dealers.

The Milwaukee factory furnishes a complete assortment of made-up advertisements for its dealers, ranging in size from the single column to the 5-inch space. These electrotypes are furnished free of charge, the company merely requesting that the dealer in turn send clippings showing the use of the electrotypes in an advertisement or other printed matter.

Dealers in small towns find a distinct advantage in using factory electrotypes, due to the fact that they embody the latest styles of type faces, and give the dealers' advertisements prominence that could not be obtained in any other way.

MANY FOREIGN ORDERS

Smith Motor Wheels and Flyers Take Well with Foreign Dealers

MILWAUKEE, Wis., Dec. 12.—The A. O. Smith Co., makers of the Smith Motor Wheel and Smith Flyer, report that the foreign business of the company has developed at a rapid rate. The Australian representative has a standing order for ten of the company's motor wheels and a number of Flyers each month. During November 88 Smith Motor Wheels were shipped to Java, and an order for 30 has been received from Amsterdam, Holland, which is proving an excellent field. Orders for 25 each have been received from China and Japan, while 40 went to Cuba along with ten Flyers.

Paris, France, is proving a good field as well. Fifty motor wheels were sent to the Gay City recently. Other foreign orders include shipments to Morocco, Guatemala, British Guiana, Panama, Africa and some of the South American countries. Korea and the Philippine Islands claim their Smith Motor Wheel riders also.

AJAX ABSORBS RACINE COMPANY

RACINE, Wis., Dec. 12.—Negotiations have been practically completed for the absorbing of the Racine Rubber Co., manufacturers of tires exclusively, by the Ajax Rubber Co. The capital stock of the Ajax Rubber Co. is expected to be increased from $5,000,000 to $10,000,000, and part of the new stocks will be offered in exchange for the Racine Rubber Co. assets, which are given at $2,250,000 net.

TIRE PRICES MAY GO UP

NEW YORK, Dec. 11.—The rising price of cotton is causing talk among some tire manufacturers that an advance in the price of tires will be necessary to meet the increased cost of cotton fabric used in tire-making. Egyptian fabric was recently quoted by one tire man as selling for over $1 a pound, or nearly double the price of a year ago. Sea Island fabric has made about the same advance in price since this time last season. On the basis of these advances it is asserted by some tiremakers that an increase in the price of tires of not less than 12½ per cent. is justified.

FULTON EXPANSION

Milwaukee Accessory Maker Takes Over Output of C. & E. Co.

MILWAUKEE, Wis., Dec. 11.—The Fulton Co., of 726 National avenue, has expanded and taken over the entire output of the manufacturing plant of the C. & E. Mfg. Co., of Marshalltown, Ia.

The Fulton company manufactures exhaust whistles and cut out mufflers and other accessories for motorcycles. S. A. Fulton, president of the concern, has just started on his annual eastern trip which he will extend over a period of several months.

WEED CAPITAL INCREASE

Stockholders' Meeting Called to Vote on Big Capital Increase.

BRIDGEPORT, Conn., Dec. 11.—A meeting of the stockholders of the American Chain Co., which manufactures Weed chains, has been called for December 22 to vote on increasing the capital stock to $10,000,000.

The company is capitalized at present at $4,000,000 and it is proposed to make the increase by issuing 30,000 new shares of common and preferred stock, making the total of 50,000 shares of each.

BAY TRACK TROUBLES

Jockey Club Starts Suit to Foreclose Sheepshead Mortgage.

NEW YORK, Dec. 12.—That the Sheepshead Bay Speedway, on which was held the largest motorcycle race meet of the East during the past season, is in financial difficulties came to light with the filing of a suit for foreclosure for the $2,040,000 mortgage which is held by the Coney Island Jockey Club.

The mortgage was originally executed on April 14, 1916, by James C. Nichols, who conveyed the property to the Sheepshead Bay Speedway Corp. One of the provisions of the mortgage makes the entire principal due should default be made in payment of either interest or part of the principal for 20 days. In filing the suit the Jockey Club maintains that interest amounting to $51,000, due October 1, 1916, is still unpaid.

The suit was started last week in Brooklyn.

A Harley-Davidson Rider Demonstrating That It Is Possible to Give a Sidecar Passenger Some of the Sensations of an Aeroplanist

TRADE ACCEPTANCES NEW TRADE FACTOR

Newest Form of Negotiable Paper Fostered by Preferred Discount Rates; Used by Harley-Davidson

MILWAUKEE, Wis., Dec. 11.—The fact that trade acceptances are daily being taken up by progressive manufacturing and jobbing concerns throughout the country, and the fact that federal reserve banks are offering preferred discount rates on all trade acceptance paper turned in by merchants is of interest to the two wheeler trade at large.

This new form of negotiable paper is being used in connection with the bicycle end of the Harley-Davidson business, and according to the accounting department, is making a big hit with the trade.

One of the Chicago newspapers, on the subject of trade acceptance discount says:

"The federal reserve bank of Chicago yesterday announced the establishment of a discount rate of 3½ per cent. on trade acceptances having a maturity within ninety days, to encourage loaning on acceptances on the sale of merchandise. The rate is preferential to the extent that on other discounts this rate applies only to paper maturing within fifteen days.

"A trade acceptance, as defined in the regulations of the federal reserve board, is 'a bill of exchange drawn by the seller on the purchaser of goods sold and accepted by such purchaser. To be eligible for purchase the bill must have arisen out of an actual commercial transaction, domestic or foreign; that is, it must be a bill which has been issued or drawn for agricultural, industrial, or commercial purposes or the proceeds of which have been used or are to be used for the purpose of producing, purchasing, carrying, or marketing goods in one or more of the steps of the process of production, manufacture or distribution. It must have a maturity at time of purchase of not more than ninety days, exclusive of days of grace.'"

GIRL HEADS STANDARD

Former President of Perfection Spring Leads Merged Interests.

CLEVELAND, Dec. 9.—As an aftermath of the merger of the Standard Welding Co. and the Perfection Spring Co. under the name Standard Motor Parts Co., which finally was consummated on Wednesday, December 6, Christian Girl, president of the Perfection Spring Co., has been elected to the presidency of the new concern.

F. W. Prentise was elected first vice-president and E. W. Farr second vice-president, while T. E. Borton, a Cleveland banker, assumes the post of treasurer. These officers, together with C. C. Bolton and Arnold S. Goss, comprise the Board of Directors. D. A. Connelly, long associated with President Girl, has been appointed secretary, but not a director.

BRANCH OFFICE MANAGERS CONFER

Forty-six of Them at Firestone Factory to Plan Closer Co-operation Between Headquarters and Field Forces

AKRON, O., Dec. 12.—In order to permit of a liberal exchange of ideas, the discussion of business methods and the establishment of closer contact between the home office and the field force, the branch office managers of the Firestone Tire & Rubber Co. gathered at the factory in this city today in a convention which will continue through December 14. This conference is the first of its kind ever held, and office managers from 46 branches are in attendance.

In addition, the traveling auditors and the officials at the home office are co-operating in the program.

In calling this conference the Firestone company is following out its policy of bringing each division of its field forces into direct contact with the home office force each year, with a view of promoting the efficiency of all departments. Several weeks ago more than 500 Firestone representatives and salesmen, from all parts of the world, attended the tenth annual sales convention, the greatest in the history of the Firestone organization.

The business sessions of the present convention are being held in the new $300,000 clubhouse recently dedicated for the use of the company's employees by President H. S. Firestone. An elaborate social program is being carried through by the Branch Organization Department of the home office for the entertainment of the visitors, and a special feature will be a dinner in their honor at the Portage Country Club, with President Firestone as host. Two other banquets and a theater party are on the list of "big doings" for the convention.

AUDUBON NOW JOBBER

New York Cleveland Agent Takes on Various Lines for Distribution

NEW YORK, Dec. 12.—The Audubon Motorcycle Garage which handles the Indian and the Cleveland, the latter as distributor for Eastern New York state and Connecticut, is branching out into the jobbing business and will incorporate within the next few weeks under the name Audubon Motor Equipment Co.

The concern closed at the New York show with the Bean Tool & Sales Co. to handle its full line of chain tools, vulcanizers and valve grinders throughout the eastern states as well as with the Splitdorf folk for distribution of the new Cyclelite and the Reeps Mfg. Co. to handle the Weed folding back rest. Chainolene lubricant will also be handled.

The concern contemplates traveling four salesmen and has just made arrangements to distribute Cleveland parts to dealers throughout its territory, having installed a stock of parts to the value of $5,000.

THIS BARON RIDES

Dutch Notable With Long Name Buys Harley-Davidson

MILWAUKEE, Wis., Dec. 9.—Among the recent notables added to the sport of motorcycling is Frans Georg Rudolph Johannes, Baron Sloettot Everlo of Hilversum, Noord-Holland, who has purchased an electrically-equipped Harley-Davidson from J. W. ten Dam, the Hilversum dealer.

PUBLICATION FOR INDIAN RIDERS

SPRINGFIELD, Mass.—The Hendee Manufacturing Company has inaugurated a policy of issuing a house organ especially for the riders of Indian motorcycles, the first issue of the new publication having made its appearance last week. The organ is a summary of all recent happenings of especial interest to Indian riders and contains many short and pithy items. It will be issued from time to time during the year, an introductory paragraph calling attention to the fact that it is neither a weekly nor a monthly, but an "occasionally" publication.

BAILEY FLYER HAS NOVEL FEATURES

New Machine Has Hand-Lever Starter, Automatic Gear Shift and Shaft Drive; Deliveries About March 1

CHICAGO, Ill.—Marked by a power plant with opposed cylinder motor, hand-lever starter, automatic gear shift and shaft drive, the Bailey Flyer is now about to be put upon the market in this city by the Bailey Flyer Auto Cycle Company. In the main, this machine resembles the first model bearing the same name which was introduced on the Pacific Coast several seasons ago.

While the Bailey Flyer has a low center of gravity, it has nevertheless a clearance of eight inches at the lowest point. The motor has a bore of 3 21/64 and a stroke of 3½ inches, the horsepower rating being given as between 16 and 20. It is fitted with a Schebler carbureter and Bosch magneto.

A leaf spring fork with scroll end is fitted. The brake is of the external contracting type, it being operated along with the clutch by a foot lever. A three-speed gearset is fitted with an automatic shift from a hand lever at the right. Starting is by means of a long lever operated by hand. Shaft drive with bevel gear is used.

The company announces that the machine has been thoroughly tested and that deliveries will be made on March 1. The First Mortgage & Bonding Company, of this city, is financing the Bailey Flyer concern.

AN AUSPICIOUS START

Weinstock-Nichols Co. Finds Dealers Flocking in to Handle the Cleveland

LOS ANGELES, Cal.—Weinstock-Nichols Co. has been so strongly impressed with the merits of the motorcycle industry, by the interest dealers are taking in the Cleveland campaign, that they have decided to lay in a strong line of accessories. The first announcement of this was made by Manager J. H. Dielmann in a conversation with the representative of **Motor Cycle Illustrated.** Dielmann will leave Los Angeles Jan. 2 to attend the New York Automobile show, and look up lines of motorcycle accessories in New York and Chicago.

The interest shown by prospective agents is indicated by the number of applications on file representing 26 towns in the southern territory alone on Dec. 6. One inquiry from Arizona is from a dealer who wants 100 machines. He is in a mining district where the miners pay 50 cents a day to ride in automobiles to and from their work, distances averaging two to five miles.

Smallest wages paid here are $5.60 a day. Two agencies have already been placed in Arizona, Moore & Cody, Phoenix, and Wickelman Motor Sales Co., Wickelman, who are building a new store to handle Cleveland sales to employes of the Ray Consolidated Mines near Wickelman and Hayden.

The Weinstock-Nichols Co. has located its retail salesroom in Los Angeles at 323 W. Eighth St.

WHEN CHAMPION MET CHAMPION

One of the Champion Spark Plug Company's Advertising Cars Met the Red Sox After the Recent Series and a "Mutual Congratulation" Party Resulted

Digitized by Google

FEW SURVIVE LOS ANGELES-FRISCO DOUBLE ENDURANCE

(Continued from page 9)

hospital he returned to his mount and checked in on time to the second. Fletcher made the run back to Los Angeles on the repaired machine and is believed to have a perfect score. The other participants in the run are unanimous in saying that Fletcher's performance is one of the gamest on the motorcycle sport record.

The cold weather was a serious drawback at some points along the route. Erwin Baker was delayed 15 minutes to fix a puncture on the Ridge Route. His fingers were so numb that he was unable to work to advantage. Many of the riders tied sheepskin in funnel-shaped guards around their handlebars to keep the biting wind off their hands and arms.

Ludlow Reaches Frisco First

Ludlow, Henderson, was the first rider to reach Los Angeles at the finish, and was also the first to check in at San Francisco. Sahagin, Henderson, went through without a spill and rode every river ford without trouble. He went over the Ridge Route without a light, having broken his lamp bracket.

Bedell, Harley-Davidson, tore off two chains and came in on the third. Aside from his chain experiences and his spill with Fletcher in San Francisco, Bedell returned in good shape and with his score clean.

Ed Tice, Harley-Davidson, collided with Smith, Excelsior, and injured one of his knees, but managed to keep a perfect score. Tice also reports that he struck a jackrabbit in Pacheco pass. "Some speed!" ejaculated Tice on his return.

Gilmore, Excelsior, had some trouble owing to the extra heavy oil supplied to him at Bakersfield, and on the return trip he put a hand out of commission while working the pump. However, he managed to finish with a perfect score.

How Others Fared

Smith and Bennett, on Excelsiors, finished with their mounts in fine shape. Leonette, Excelsior, spilled north of Bakersfield on the way back from San Francisco. Cromie, Henderson, came in on three cylinders, in spite of the Ridge Route grades, and towed an unknown Indian part of the way. Leonard, Indian, was towed in and was disqualified.

Those who were late in Los Angeles: Turney, Indian, 4 minutes; Kruger, Thor, 1 hour; Vetter, Harley-Davidson, 25 minutes; Manchester and Gattrell, Harley-Davidson side-car, 2 minutes; Macer and Casselli, Indian side-car, 66 minutes; Chapman, Harley-Davidson, 20 minutes; Menesco, Indian, 23 minutes.

Most of the time was lost by riders in getting through the city streets. Some of them also missed the pilots and came in over Cahuenga Pass, a route unfamiliar to the riders.

Erwin G. Baker, the Indian veteran, who doubtless has more endurance runs to his credit than any other rider in the country, asserts that the big double contest was the most severe ever staged. The difficulties were increased by the fog and low temperature in the mountain passes, by the rough roads and bad turns and also by the fact that a good many of the machines had just arrived from the factories and had not been tuned up.

All in all, the machines showed wonderful stability, and the tires gave little trouble. With few exceptions, the boys had no chain mishaps. Several lamp brackets were broken, which necessitated dangerous riding with poor lighting or else none at all.

Prizes to the value of about $1,000 will be awarded to the high score men, and in addition the Motorcycle and Allied Trades Association will give two handsome gold watches, one for the high man in the San Francisco squad and the other for the best finisher in the Los Angeles list.

M. AND A. T. A. DIRECTORS' MEETING

Sanction Work of Dealers' Committee and Appropriate $600 to Start Its Work—Show Committee Appointed

NEW YORK, Dec. 11.—The appointment of a new Show Committee to handle the details of the national exhibitions at both Chicago and New York; the sanctioning of the program submitted by the Dealers' Betterment Committee, and the appropriation of $600 from the treasury to carry on the work of the committee for the next 60 days; the decision to change the name of the committee to simply Dealers' Committee; and the decision to call off the special meeting of the members of the association which was called for the Hotel Prince George on the same afternoon, were some of the principal things accomplished at the meeting of the Motorcycle and Allied Trades Association over the luncheon table at the Prince George, on Thursday of Show week.

Among Those Present

Those present at the meeting were T. W. Henderson, Henderson Motorcycle Co.; Frank J. Weschler, Hendee Mfg. Co.; Arthur Davidson, Harley-Davidson Motor Co.; E. Theurer, Reading-Standard Co.; L. G. Fairbank, Firestone Tire & Rubber Co.; George T. Briggs, Wheeler Schebler Carburetor Co., and E. F. Hallock, secretary.

It was decided, in view of the close proximity of the annual meeting of the association, which is to occur at the Hotel Astor, New York, on Wednesday, January 10, that it would be for the best interests of the association to postpone the meeting called for the Prince George Hotel until that time.

It was further decided to call the annual meeting at 12:30 o'clock and to hold a luncheon at the Astor at that time for the members, and A. H. Bartch, of the Bosch Magneto Co., and Daniel R. Walls, of the Splitdorf Electrical Co., were appointed a committee of two to arrange the details of the luncheon.

Messrs. Weschler Arthur Davidson and Huffman were appointed to act with President Henderson, ex-officio, as a show committee for the Motorcycle and Allied Trades Association, the full committee to comprise seven members, one each to be appointed by the Bicycle Manufacturers' Association, the Cycle Parts and Accessories Association, and the Cycle Jobbers' Association of America.

Digitized by Google

The secretary was instructed to notify the secretaries of these respective associations of the action taken and ask them to appoint, at their next meetings, committeemen to serve with the Motorcycle and Allied Trades Show Committee.

Messrs. H. A. Haws, chairman, and T. R. Thomas, secretary, of the Dealers' Betterment Committee, appeared before the board of directors to outline the campaign to be inaugurated by that committee and to ask for their approval and an appropriation to cover the expenses of setting the campaign in motion.

Funds for Campaign

The plans as outlined were approved with minor changes only, and it was moved and seconded that the committee be authorized to spend up to $600 within the next 60 days in putting this campaign in motion.

It was decided to hold a directors' meeting at the Hotel Astor on Tuesday, January 9, at 12:30 p. m., at luncheon.

Following the receipt of a recommendation from the United Cycle Trade Directorate as to the composition of the show committee, the directors of the M. and A. T. A. again met and decided to revise the committee to conform with the recommendations made by the cycle body.

The New Committee

The committee now comprises Frank J. Weschler, Arthur Davidson and T. W. Henderson, ex-officio, representing the M. and A. T. A.; Louis Schwab, representing the United Cycle Trade Directorate; Frank Chase, representing the Cycle Parts and Accessories Association; Horace Huffman, representing the Bicycle Manufacturers' Association and John Henry, representing the Cycle Jobbers' Association of America.

OBERT'S RECORD

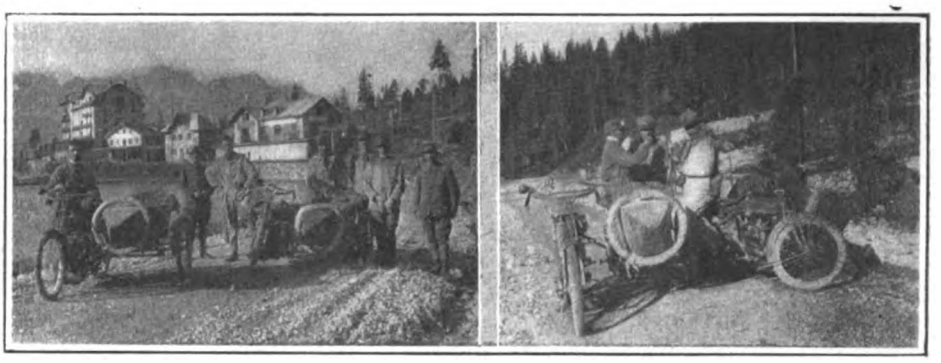
Takes Cleveland from Angel City to Frisco at 25 M. P. H.

SAN FRANCISCO—Carl A. Obert put the Cleveland before California riders in a convincing and spectacular way by a ride to San Francisco from Los Angeles, at the time when the forthcoming endurance run between those two cities was occupying the attention of every dealer and rider. His time actually cuts the one way figure set for the boys who will compete in the big round trip contest. Obert made the run of close to 500 miles in 16 hrs. 55 min., at an average speed of 25.3 miles per hour.

AHAMO CLUB CELEBRATES

OMAHA, Neb.—The recently organized Ahamo M. C. celebrated the opening of its beautiful clubrooms December 1. Over a hundred members were there to assist in the "house warming," and welcome their friends. One of the features that delight members and prospective members is the promised initiation exercises in the near future.

ITALIAN COMBINATIONS IN ARMY TRIALS



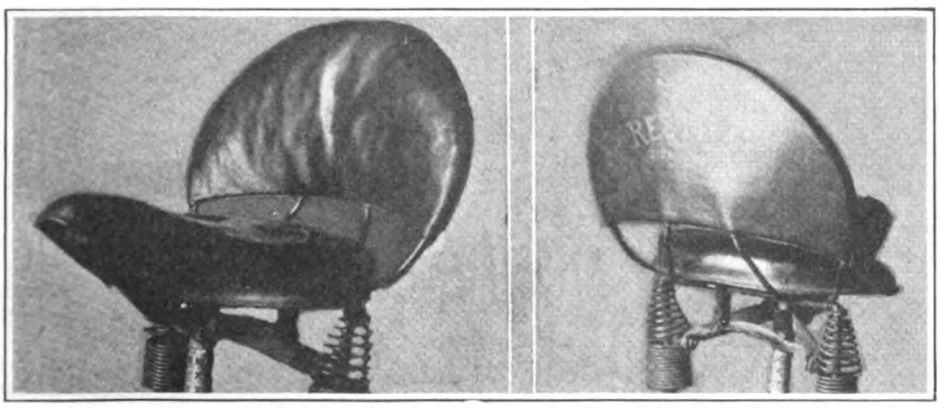
FROM Milan, Italy, come the accompanying photos of sidecar combinations undergoing tests for army service through the mountainous section of the Italian battlefront. The pictures show two Stucchi outfits of 6 h. p., and during the trials they were obliged to carry heavy ballast in addition to the driver and passenger. The pilots are two well-known motorcycle racing men, Malvisi and Ciai.

Quite a few American motorcycles are being used in the Italian army, writes the contributor, Gerald F. Head, of Milan, and in most cases they are employed with sidecars.

Among the makes represented are Indians, Excelsiors, Reading Standards and Harley-Davidsons. The latter make has just been placed with enterprising new agents, and is undergoing military tests. The Indian machine gun combination is also to be given official trials in the near future.

The Indian Light Twin has aroused a great deal of interest in Milan, according to Mr. Head, in view of the fact that the horizontal motor is in favor there. Interest is also stimulated through the progressiveness of Italian engineers, Italy being in advance of any European country (England excepted) with reference to motorcycle developments. There is already a popular horizontal twin machine of Italian design on the market there.

THE RESTEZY, LATEST IN BACK RESTS



WILKINSBURG, Pa.—Charles A. Hoehn, of this city, is the inventor of the Resteszy back rest shown in the photographs herewith. This rest has a crescent shaped frame, heavily padded, the frame having four arms forming a lower frame attaching to the under portion of the motorcycle saddle supporting the back.

The form of the rest is such that it fits the back of the rider, yet does not interfere with his movement in any way. The Resteszy is adaptable to any standard make of saddle now on the market. Mr. Hoehn's address is 217 Rose street, this city.

R-S DEALERS

Vogel Gives Out List of Agents Who Attended Show

PUBLICITY Manager, Charles Vogel, of the Reading Standard, announces that the following Reading Standard agents visited the booth at the New York show:

Mr. and Mrs. Wm. G. Schaeffer, Penn. Cycle and Motor Co., Reading, Pa.; Michael Ferraco, Sloatsburg, N. Y.; W. G. Rhodes, Philadelphia, Pa.; Geo. M. Miller, West Point, N. Y.; Andrew Lardino, Jersey City, N. J.; W. J. Kluczek, Newark, N. J.; Joe Mechanikin, Maryland Cycle Co., Baltimore, Md.; S. Mechanikin, Baltimore Cycle Co., Baltimore, Md.; E. C. Schroeder, Nickerson & Schroeder, Inc., Brooklyn, N. Y.; L. H. Guterman, Brooklyn, N. Y.; J. Jonoschek, Bronx, N. Y. City; H. G. Anderson, Albany, N. Y.; F. A. Armstrong, Paterson, N. J.; Luigi Berardo, Agent for Italy, New York City; and H. Christensen, P. Anderson, Aalnstrup, Denmark.

KOKOMO REORGANIZATION

Name to Be Changed to Kokomo Tire Co. and Capital Increased

KOKOMO, Ind., Dec. 12.—Plans are nearing completion for the recapitalization of the Kokomo Rubber Co.; they include a reincorporation under New York State laws and a change of name to Kokomo Tire Co.

It is planned to recapitalize with an issue of 100,000 shares of stock of no par value and a syndicate has been formed which is to underwrite 25,000 shares of the new issue.

D. C. Spraker, who founded the business more than ten years ago, will probably be president with Milton Kraus, vice-president; G. W. Landon, secretary and D. L. Spraker treasurer and general manager.

LUNCHEON AND CONVENTION OF INDIAN DEALERS DURING NEW YORK SHOW

This Big Pow-Wow Was Staged in the Hotel Breslin and Was Featured By Sales Talks and a General "Get-Together" Spirit

STAGE SET FOR ELLIS' "MIDNIGHT FROLIC"

New Year's Eve Run from New York to Poughkeepsie Being Promoted by F. A. M. State Commissioner—Entries Out

NEW YORK, Dec. 11.—George A. Ellis, who spends his spare moments when he is not engaged as one of the star motorcycle salesmen with Baker, Murray & Imlbrie, Inc., New York Indian distributors, in living up to his title of F. A. M. State Commissioner for New York, has just about finished his arrangements for a "midnight frolic" which he has planned for New Year's eve, December 31.

Ellis' event will take the form of a run from New York to Poughkeepsie and return, and it is his intention to make it an annual affair, calling it the "F. A. M. Midnight Run."

The run is scheduled to leave Columbus Circle, weather conditions regardless, at midnight on the last day of the year. The starting place at the circle will be designated by a reversible electric sign placed so that it can be read by all folks approaching the rendezvous. Being a sanctioned affair, as a matter of course it is open only to F. A. M. members in good standing, and this rule will be strictly enforced.

Ellis got in a lot of good work at the New York show and says that he has won over not only the support of practically all the local dealers, but also has been promised the hearty co-operation of several of the largest motorcycle manufacturers. He has also received prize donations from various accessory folk and dealers.

The prize list will be kept secret until after the completion of the run, when the winner will be given his choice, and so on down the line until the prize list is exhausted.

A schedule of 20 miles an hour will be maintained by the heavyweight machines, both solos and sidecars, while the lightweight machines will negotiate the distance at an average of 15 miles an hour.

According to this schedule, it will take five hours for the lightweight rider to reach

NEW HARLEY-DAVIDSON BRANCH IN THE BRONX

This Up-to-date Corner Store Has Just Been Opened by the Harley-Davidson Sales Co., of New York, to Handle Sales in the Bustling Bronx Section

Digitized by Google

the turning point, where an hour will be spent at luncheon and another five to make the return trip. The heavyweight rider will cover the course in three hours and 45 minutes each way. A very simple means of keeping the rider posted as to his schedule has been adopted, full particulars of which will be given later.

Entry blanks for the event are now out and can be had from George A. Ellis, care Baker, Murray & Imbrie, 10 Warren street, New York City, or from any of the Metropolitan motorcycle dealers. The fee is $1, and the entries close at midnight December 30th.

STUDY ROAD-BUILDING

Conference Is Called to Consider Uniform Highway Engineering

NEW YORK, Dec. 12.—A conference of interest to all motorcyclists has been called for Dec. 29 at the Automobile Club of New York City. As a result of the conference it is expected that some uniform program of road instruction systems will be made available for use in colleges and universities throughout the country.

At the present time instruction in highway engineering, as is given in a few institutions of learning, is of as many kinds as there are department heads to determine its character. The purpose of the conference, which has been called by Arthur H. Blanchard, professor of Highway Engineering at Columbia University is to systematize the study.

The movement has the backing of the Society for the Promotion of Engineering Education, the American Association for the Advancement of Science, the National Automobile Chamber of Commerce, and the Automobile Club of America and the National Highway Association.

N. J. LICENSE LAW

Non-Residents Must Register Machines Before Using Jersey Roads.

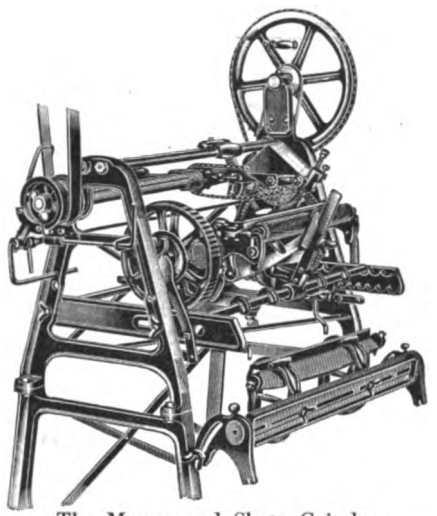
TRENTON, N. J., Dec. 9.—The United States Supreme Court has upheld New Jersey's motor vehicle law requiring nonresidents to register their machines before venturing on its roads, and once more Jersey becomes a State outside the Union, insofar as motor vehicles are concerned.

The decision was given in the appeal of Frank J. Kane from the decision of the New Jersey courts, which held legal his conviction for violation of the law in driving within the State without a New Jersey license. The appeal was backed by both the National Automobile Chamber of Commerce and the American Automobile Association. As a test case, it establishes a precedent which no doubt will have far reaching results in time to come.

FOR THE DEALER

Lawn Mower and Skate Grinders as Profit Producers

IN line with its policy of extending cooperation to dealers and emphasizing its service policy, **Motor Cycle Illustrated** departs for the nonce from its hardfast rule of carrying two-wheeler news exclusively in its columns to bring to the attention of its dealer readers a tool that dovetails uncommonly well into the motorcycle and bicycle dealers business and which undoubtedly can be made the source of a fair amount of revenue and the means



The Mower and Skate Grinder

of offsetting the dullness of the slack winter months.

For that reason we beg to call your attention to the Ideal lawn mower grinder which is manufactured by the Root-Heath Mfg. Co., Plymouth, Ohio.

By means of the Ideal grinder any person can sharpen a lawn mower accurately in one-half the time required by the old method. It will grind any desired clearance behind the cutting edge and a fine sharp edge is obtained.

The Ideal grinder is 30 inches wide, and will take in any mower with 24-inch blades. It is unnecessary to remove the reel knife, wheels, or ratchets. In fact, "You grind it as you find it."

The grinder can be operated either by hand or power. It is furnished with a first-class skate sharpener attachment for grinding skates concave, so that it will pay for itself both winter and summer.

In addition to the Ideal grinder the company also makes the Peerless horse mower grinder for sharpening horse and pony mowers. Descriptive matter and prices on application.

Some Newsy Bulletins from Frisco

SEND SIDECARS TO MANILA

SAN FRANCISCO.—The Pacific Motor Supply Co., Indian distributors, shipped two 1917 sidecars to Manila this week. The Indian store is very busy for this time of the year, having disposed of the entire carload of machines which arrived recently. Another carload was shipped the middle of October, and is expected to arrive within a few days.

SPECIAL FINISH ON THESE MOUNTS

SAN FRANCISCO. — The Motorcycle Sales Co., Henderson agents received several orders for 1917 machines this week. Three brothers have ordered new model Hendersons, which they wish enameled in cream color instead of the regulation Henderson blue. These machines are to have all the latest accessories, and the initials of the owners will be placed on the gasoline tanks.

1917 EXCELSIOR ON DISPLAY

SAN FRANCISCO.—The new 1917 Excelsior, which arrived in town recently, is on display in the window of the Edwin F. Merry store in Van Ness avenue. The big olive drab machine is attracting considerable attention. Mr. Merry has recently fitted up attractive display windows showing his line of bicycles and motorcycles.

RACES ON NEW YEAR'S DAY

SAN FRANCISCO.—Plans have been completed by some of the San Francisco motorcycle dealers for motorcycle races to be held in Tanforan Park New Year's Day. As many of the best riders are on the coast the races are expected to create much interest in motorcycle circles. Substantial prizes are offered, and the races are open to amateurs and professionals.

PREST-O-LITE WINS

Damages of $3,541.45 Are Allowed in Tank Refilling Suit in New Jersey

NEWARK, N. J., Dec. 8.—The sum of $3,541.45 damages has been awarded to the Prest-O-Lite Co. by the United States District Court for the District of New Jersey as a result of proceedings against Camille Bournonville and Ida Bournonville, of Newark, growing out of their refilling and sale of Prest-O-Lite tanks and the substitution of refilled tanks for Prest-O-Lite tanks.

This judgment is the largest one which has been given to the Prest-O-Lite Co., in the course of its litigation against refillers and dealers, and is the result of a lengthy process of accounting by the Special Master appointed by the Court for that purpose.

A RED-BLOODED CLUB

KANSAS CITY, Mo., Dec. 6.—The Kansas City Motorcycle Club is still enjoying spins about the country every Sunday. The weather conditions have made this possible and the riders of course prefer outdoor meetings on the road to indoor meetings. The club is rapidly increasing its membership. It is planned to make a Sunday run to Paola, Kas., in the near future.

REPORT ON TIME SALES

KANSAS CITY, Mo., Dec. 6.—In making a recent investigation as to the standing of the motorcycle installment business in Kansas and adjacent territory, a representative of **Motor Cycle Illustrated** found that one Kansas City firm sold forty-two machines during the summer months, of which thirty-six were time sales. The firm had only one loss, of sixty-five dollars, out of the entire thirty-six time sales.

CIRCUIT IS DELAYED

KANSAS CITY, Mo., Dec. 6.—It was recently announced in a dispatch from Coffeyville, Kas., that the race circuit which was to be formed in that section of the country has been dropped for the time being. The proposition will get under way again early in the spring.

HANSON MAY OPEN STORE

KANSAS CITY, Mo., Dec. 6.—Albert Hanson, who has lately been clearing up the business of his father, the late Charles Hanson, in the old stand, 1421 Grand avenue, now occupied by the Indian Motorcycle Sales Company, has recently sold such office fixtures as were not included in the sale to the Indian Motorcycle Sales Company. Mr. Hanson will continue to make his headquarters there for the present, however. It has been rumored that Mr. Hanson will open a cycle store for himself, as soon as the old business is straightened out, but he refuses to confirm or deny the report.

BOOSTS XMAS SALES IN MOVIES

KANSAS CITY, Mo., Dec. 6.—W. Bell, agent for the Pope motorcycles and the Cleveland lightweight at Kansas City, has been doing some seasonable advertising of a nifty character, using the moving picture shows as a medium.

AFTER CHRISTMAS SALES

DENVER, Colo., Dec. 8..—T. G. Potter, 17 East Kiowa street, Colorado Springs, has taken the agency for the Smith Flyer and Motor Wheel. The Smith Flyer is attracting a good deal of attention in Mr. Potter's city and he is pushing the sale of it as a suitable Christmas gift for the "little fellow at home."

A CRITICAL MOMENT FOR THE NIMROD

DURING the hunting season just past more than ever before the motorcycle has been used as an adjunct to the sportsman's equipment. The machine's ability to make its way over the roughest of country roads, and even to penetrate far into the woods, has made it exceptionally useful to the nimrods. The Indian motorcycle shown above was used throughout the hunting season to make long trips into the woods, often carrying camping equipment, as well as the usual touring kits, and has also brought back deer and other game aplenty.

FIRST MACHINE

From Harley-Davidson Works Had Big Mileage, Says Letter

ONE of the objects of interest at the Harley-Davidson exhibit in the Madison Square Garden was the reproduction of a letter relating to the first Harley-Davidson motorcycle ever turned out. The letter was from Steven J. Sparough, a repairman for the Thomas B. Jeffry Company, automobile maker, at Kenosha, Wis. It stated that up to March 30, 1912, he had driven the machine 32,000 miles, making its total mileage 83,000 since leaving the Milwaukee factory.

The machine is described as a 3¼ horsepower belt model single, with 26.94 cubic inches piston displacement. The letter gives the names and mileages of the owners prior to its purchase by Sparough.

ENLIVENING WINTER TRADE

DENVER, Colo., Dec. 8.—The Western Supplies Company, 1448-52 Larimer street, this city, has been enlivening business at its store this week by offering casings and inner tubes at attractive prices. They are urging motorcyclists to buy what they need right now. The concern also announces that every machine on its salesroom floor has been sharply reduced for quick selling.

DEALERS PLANNING HILL-CLIMB

DENVER, Colo., Dec. 8.—The motorcycle dealers and riders of Colorado Springs, Colo., are making plans to hold a hill-climbing contest soon. The races held in that city on Thanksgiving met with such success that those interested have been lead to arrange for future events in which the motorcycle is the main actor. Interest in the motorcycle is high in Colorado Springs.

LINING UP SUB-AGENTS

DENVER, Colo., Dec. 8.—Walter W. Whiting, Colorado distributor for the Harley-Davidson, announces that he has recently appointed a number of sub-agents in different Colorado cities and towns. One of the most recent of these is George W. Spriesterbach, of Alamosa.

RUBBER PLANT IN WICHITA

KANSAS CITY, Mo., Dec. 7.—The Midcontinent Tire Manufacturing Company is erecting a $65,000 plant at Wichita, Kan. The first unit will be a two-story building 280x60 feet, and constructed of re-enforced concrete so that additions can readily be made later on.

Digitized by Google

FLYING BITS FROM THE YONKERS HILL-CLIMB

(Continued from page 13)

SOLDIER "DAN" DRESSER was there ready for the fray, looking fine and fit after his record-breaking dash from McAllen, Texas, to Albany, N. Y.

THE MISSES VAN BUREN, the "Transcontinenetal twins" were on deck and took a shot at the hill, just to keep their hands in. Miss Adeline rode in the lightweight and solo class and acquitted herself nobly. She had never ridden a lightweight until today, and made climbs that hovered round the 40 second mark.

SALESMANAGER E. M. JACKSON, of the Hendee Mfg. Co., said that it was the first hill-climb that he has attended since 1912. He wore the smile that won't come off after Stuart's 26-second-drive in the sidecar class and it broadened to a grin when "Conny" went over the top in 16 flat with Folliot on another red one just a quarter second behind.

ART HERRINGTON, Harley-Davidson, was riding under the handicap of the number "13," but it did not affect his speed much.

IRVING BARNARD, Excelsior, was around through the crowd with his little green cap from Chicago. He did not take a ride up the hill because La Fosse spilled just after crossing the finish line first time up, putting the only machine "hors de contest."

GREAT ANTICS on the part of the sidecar passengers in their effort to give the spinning rear wheel traction added amusement and interest. Some of them hung on by the skin of their teeth, but they sure did help their drivers.

TWO MEN who had learned signalling at Plattsburg kept the officials at either end of the hill in touch with each other and their work was more than important in keeping the course open.

"BABE" BUTTLAR, Harley-Davidson, spilled at the jump-up to the car-tracks, making the second and last tumble recorded for the day.

THE HILL MEASURED approximately 1,000 feet in length and started with a right curve up a rock-strewn road over a trolley track that made 'em aviate at speed; then up a long clay surfaced road with a sharp right turn just beyond the finish line.

THE JUDGES' stand was an old wagon, but it suited the purpose well.

THOSE LITTLE Clevelands sure do have a "sassy bark" when they are not muffled down.

WELL, WE HAVE now had our first defeat at the gentle art of motorcycling from a woman, boys; guess we'll have to watch our laurels from now on.

LIGHTWEIGHT MOTORCYCLES and ladies break into the competition at the same time. Mrs. Terhune, Cleveland, and the Misses Van Buren on Indians were the stellar attractions.

E. M. JACKSON took a flyer at the hill along with Harvey Snyder. Of course, he rode an Indian outfit.

LOT OF SHORT-COUPLED stuff on the hill and say how those jackrabbits did hop around in the grease before the hill dried out.

E. J. MUELLER, Harley-Davidson, assisted J. O. E. Deiterich in timing the boys—and girls, we almost forgot our manners.

GREAT EXCITEMENT when the news spread that Stuart, Indian, and Dresser, Harley-Davidson, were tied at 26 and a quarter in the sidecar class.

IT SURE was pretty work rounding that upper turn after passing the finish-line, but most of the riders made it with ease.

THE HILL was very greasy in the morning before the bunch got to practising and smoothing the ruts out. It got better the more the boys rode, and an Army truck which gamboled around helped some.

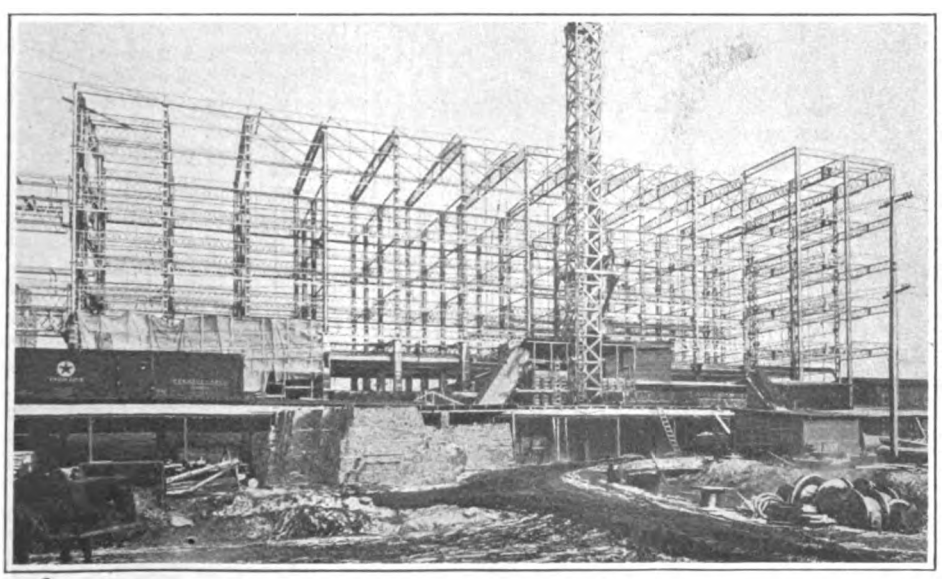
KIND OF slow in getting the entries in, but when things did begin, the climbs were run off in record time. It took about two hours and a half to hold the competitions, with 30 odd riders contesting.

QUITE A few of the fellows had to do some tall dodging to get home without lights, for the motor cops were out in full force.

PRETTY GOOD team—Geo. Ellis and the "missus." Did you see her over at the table taking entries and handling the cash?

MOTORCYCLISTS round this neck 'o woods are going mad over the hill-climb as a sporting event. Look out, boys, that we don't run off too many and sicken of them.

ONE ANGLE OF FIRESTONE FACTORY EXPANSION



Besides the New Building Shown Above, the Firestone Folks are Putting Up Another Big Structure and Adding a Story to the Main Factory

ARMY EXPERIMENTS

Earl Armstrong Reports on Motorcycle Doings at Fort Sill, Okla.

OF all the equipment in the possession of the army at the present time, it is doubtful if anything is receiving a more severe grilling in the line of experiments than is the motorcycle. The machine is yet comparatively new in army work and the full extent of its possibilities is still undetermined. The machine has demonstrated its abilities along several lines of military service and the army experimenters are now endeavoring to discover new fields in which it will prove of special value.

The principal proving point where these experiments are being made at present is in the School of Musketry in Fort Sill, Okla., where the work is in charge of Capt. O. P. Robinson, of the experimental department. According to reports brought back from Fort Sill by Earl Armstrong, of the Hendee Mfg. Co.'s staff, who has been stationed in the School of Musketry aiding the experimental work on the Indian motorcycles, several new possibilities have been discovered for this new war machine.

Much attention has been paid to the motorcycle machine gun, which has been developed by the Indian manufacturers and a number of which, mounting several types of guns, are in use on the border. This gun has been found to be particularly effective in cases where rapid work is demanded. Its specialty is considered by the army experimenters to be a running fight such as would be occasioned by a charge on a town or up a hill, where these guns would be used to clear the way for the infantry troops and unmounted machine gun companies following.

In work of this nature the motorcycle caisson has been found much more effective for auxiliary service than that of the ammunition truck.

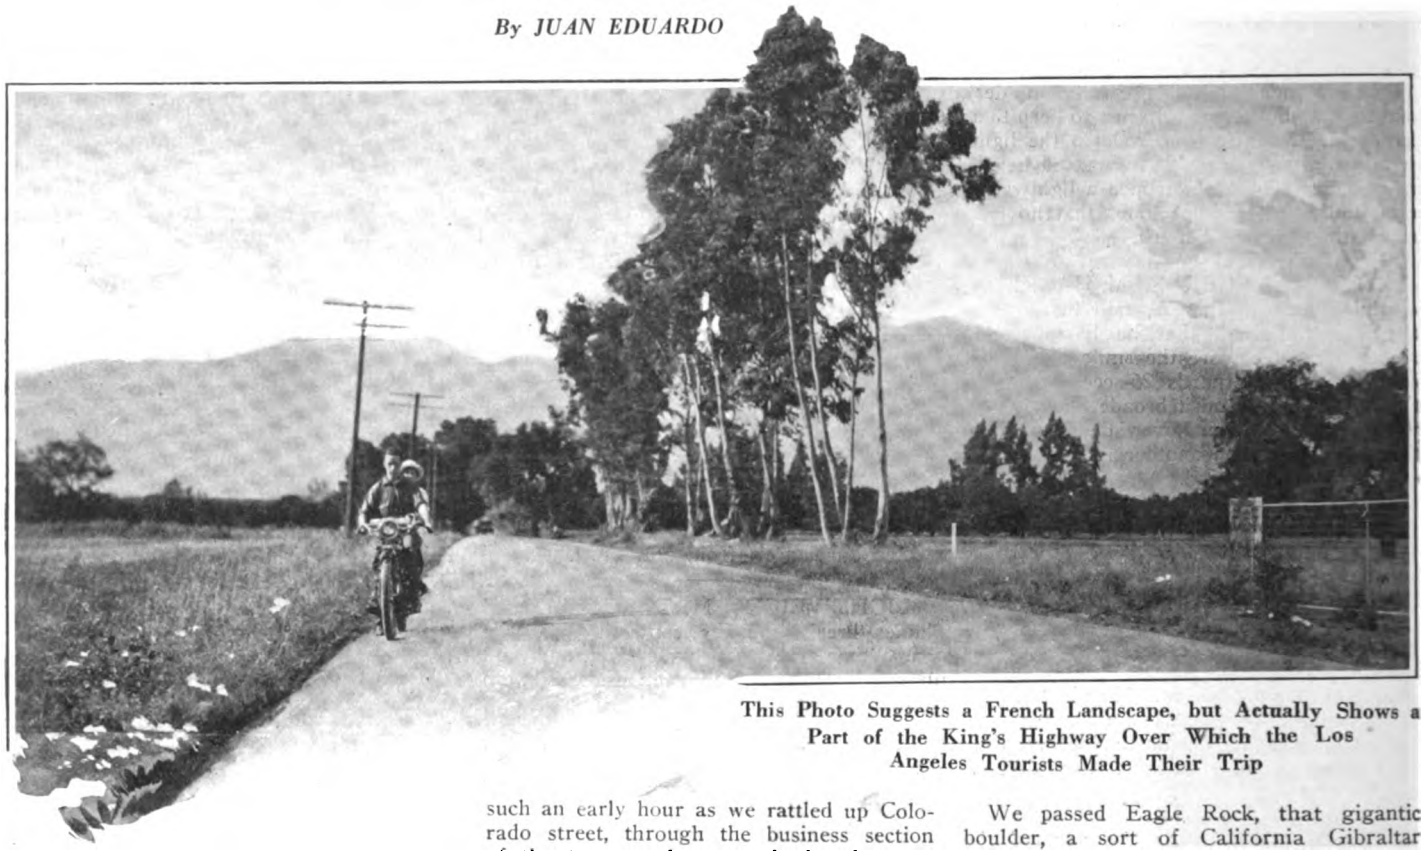
A Sunday Ramble Over El Camino Real

Think of a Roller Coaster 230 Miles Long Through Fifty-seven Varieties of Scenery, With a Motorcycle Doing the Rolling! Some Trip, What? Yessiree, and the Accompanying Article Tells All About It

By JUAN EDUARDO



This Photo Suggests a French Landscape, but Actually Shows a Part of the King's Highway Over Which the Los Angeles Tourists Made Their Trip

SUNDAY, that much anticipated day of rest and pleasure, dawned one of those typical Southern California Summer mornings. It was cool and cloudy, with the fog hanging low, making rain seem almost a certainty. It was one of those mornings when Eastern Tourists in downtown hotels of Los Angeles come out of a night's hibernation, take a look at the sky, and then skurry back after their raincoats or umbrellas, while the Californian chuckles at the visitor secure in the knowledge that there will be no rain for several months, and that the sun will be shining within a couple of hours.

It was the sort of a morning when one arises so bubbling over with the joy of life that the rhythmic reverberation of a well-tuned motor is grand opera to the motorcyclist's ear.

Our motor moted with the first stroke of the starter, and with our lunch strapped to the handlebars, and our bathing suits inside the lamp, we were off up the balmy palm-fringed Calle, out Granada to the Huntington Drive, and were off to Pasadena.

The city of millionaires nestled at the foot of the sky-towering Sierra Madre Range of mountains was not astir at such an early hour as we rattled up Colorado street, through the business section of the town, and out again by the continuation of the same street. A friendly Mexican directed us in Spanish to the San Fernando Boulevard. We sailed over the long Arroyo Seco Bridge, climbed a hill into the clouds on the other side, and then coasted down a long grade to find ourselves in a beautiful valley, where the sun was shining brightly.

Typical Scenery Along El Camino Real Near Camarillo, Ventura County, Cal. You Can't Beat It, Even in the Movies

We passed Eagle Rock, that gigantic boulder, a sort of California Gibraltar reared against the mountainside, and so called because of nature's having embossed a huge American Eagle with outstretched wings against its side.

The road through the town of Eagle Rock and on to Glendale is like a floor, except in several short stretches where the pavement has warped from the adobe manufacturing effect of the sun, and has caused its surface to wrinkle up like the skin of a winter apple. These stretches, short though they are, certainly set one's bones vibrating. The effect is much the same as could be derived if one's motorcycle were equipped with square wheels.

We soon left Glendale by an avenue fringed with palms and eucalyptus, and assured as to our road by a road-sign engraved with an arrow, and "San Francisco 497 miles," we were now really on our way. We began to shake civilization behind at the rate of about forty miles per hour.

The twenty-four miles between Glendale and San Fernando is only a joyride. The road is so smooth it shines; all dangerous curves and cross-roads are posted, so that one may tour along at about whatever speed suits his fancy, with ample opportunity to crane his neck for a view of

Digitized by Google

the scenery. As to scenery, there's plenty of it—two ranges of mountains, the low-lying Verdugos, and sky-towering Sierra Madres just to the east, and the beautiful Malibu Hills to the west, while the road winds along through miles of oranges, lemons, and olives. The clouds were still hanging low over the eastern mountains as our faithful motor purred us into the beautiful San Fernando valley, but even as we toured, the clouds began to rise higher and disappear. They grew thinner, and by the time we reached the city of San Fernando the sun was shining to the extent of removing our jackets.

Perfect California Climate

It is difficult to conceive of a more perfect combination of good roads, climate, and scenery, and generally ideal motoring conditions, than are to be found in Southern California.

From San Fernando we diverted our course westward about a mile to the historic old mission San Fernando, the fifth of the series of missions founded by Padre Junipero Serra, and established September 8, 1797. The buildings are the poorest preserved of all the early California Missions. The main building was destroyed by earthquake in 1812, and the other buildings are now abandoned to doves and linnets. We lingered only long enough to meditate a bit over its history, and then toured on.

Mission San Fernando, One of the Points of Historical and Romantic Interest Visited by the Tourists on Their Jaunt Over the Famous Highway

Returning to El Camino Real, our next twenty miles of road into Surrey was over a surface of glistening smoothness, and through some of the finest of mountain scenery. In the vicinity of the Newhall Tunnel, that great bore that eliminated one of the most blood-curdling mountain passes of Southern California highways, the beauty of the mountains simply surpasses all description. This fact is attested to by the large number of motion picture concerns that have located near the tunnel. They are simply taking advantage of the natural scenery, and the ideal atmospheric and climatic conditions.

Through the Tunnel

Passing through the tunnel is a rather weird sensation. It is lined with concrete, and as one enters the reverberations from the motor are echoed back and forth between the walls in a din that is almost deafening. The spot of light at the other end appears about the size of a dime, and in absolute darkness one can only steer for the opening, and trust to luck that he is not going to scrape his ears on the walls.

Once through the tunnel the road starts down-grade. The declivity is hair-raising. We found it easy to push out the clutch and coast the rest of the six miles into Surrey at a speed limited only by the brakes.

Leaving Surrey we had eight miles of concrete highway to the approach of a pass winding upward between two ranges of mountains. We feared that our concrete road was too good to last, and soon realized it when about a mile farther on it came to an abrupt end in an arroyo, where whatever natural road had ever existed had been washed away.

"Ocho millas esta aqui" (eight miles of this) shouted a Mexican who came trudging up out of the arroyo as we wobbled through the sand near to foundering. We were so busy keeping on the machine that we hadn't even time to thank the Mexican, but kept right on at a speed of nearly thirty miles per hour, sidewise part of the time, nearly stern first some of the time, but for the most part ahead.

We found our course to be as the Mexican had said. It was fully eight miles before we got out of the wash and onto good road again, and it seemed five times as far before we got there. A fairly good gravel road afforded us welcome relief once out of the arroyo, and it seemed like a boulevard compared with the eight miles of bottomless sand and rocks that we had come through.

A few miles over the gravel road brought us into the Ojai Valley (pronounced Oh-high), a beautiful long slender valley nestled between the Santa Clara and Bonaventura Ranges of mountains. The Santa Clara Mountains are beautiful in their barrenness. They are, for the most part, great heaps of barren jagged rocks, that from a distance look like exaggerated ant hills. Practically the entire Ojai Valley is given over to horticultural pursuits. For forty miles we followed the gravel road between the mountains and through apparently endless orchards of peaches and apricots. The peaches were not yet ripe, but the apricots were near to dropping from the trees.

At Piru we stocked up on gasoline, inquired the road to Santa Paula, and were off again. This time into the Santa Clara Valley, our road following the Santa Clara River. Some five miles down the river valley we stopped alongside a eucalyptus forest, and walked to the river bank for our lunch.

Selecting a nice grassy spot at the water's edge, beneath a huge ponciana tree, we were almost in the act of sitting down when there was a loud buzz, and a hornet whizzed up out of the grass. This was only a sample of what was to follow. The grass began to fairly ooze hornets, and they began to come out like smoke from a volcano. We never even hesitated, but "beat it" down the river bank as fast as we could go, with a dozen or more of the warm-tailed insects trailing us. Thereafter we were more careful about resting places.

Can You Blame Her?

We had scarcely gone a hundred yards when up jumped a skunk almost from under my feet, and high-tailed it off into the woods. Anita had never seen one before. "Oh, what a beautiful little animal!" she exclaimed. Then the wind blew our way and she changed her mind.

Except for a few big red-winged ants and a couple of harmless long-tailed lizzards, we succeeded in finding another grassy spot, and eating our lunch without further molestation from the wild creatures of the woods. A half-dozen or more big naked-headed vultures wheeled and soared overhead, and lost no time after we had departed getting on the job to pick over our lunch papers, and gobbling the remains of everything eatable that we had left behind.

The remainder of our road into Santa Paula was profanity provoking. It was full of ruts, sand, arroyos, and what not. In fact there was everything in the way of qualities that go to make a bad road bad. The country around Santa Paula is beautiful in the extreme, but the road was so bad that we didn't have much opportunity to be gawking around looking at the scenery. We recall that there were mountains on both sides of the valley, and that the country between is practically given over to the culture of olives.

We Enter Santa Paula

Santa Paula was indeed welcome when we arrived there. It is a quaint little Spanish town, where about three-fourths of the population speak Spanish and the rest speak Portuguese.

From Santa Paula on to the sea coast at Ventura one travels through more olive country. There is also a great deal of land given over to the cultivation of grapes and beans. The beans are in the vast majority. They are just the plain old navy beans, the sort that are in such demand just at present by the armies of the world that California ranchers who had a few acres of beans have gotten rich. Our road got better as we neared the ocean, and rounding a curve we suddenly came face to face with the Blue Pacific. A turn to the right and a couple more miles took us into Ventura

Digitized by Google

with its forests of oil-wells and intermingled odors of sea air and crude oil.

Ventura, not many years ago, was just a little Spanish adobe settlement, which was founded by the zealous padres for the purpose of foisting religion onto the Indians. It was the original Sleepy Hollow of the Pacific Coast, until one day a Mexican, who chanced to dig his well a bit deeper than usual, pumped up crude oil instead of the sweet water that he was seeking. Ventura grew like a mushroom, and in a few months the whole surrounding country was festooned with oil wells. Some of the oil wells are out in the ocean, as much as half a mile from the shore.

Then for a Refreshing Dip

We hunted up a bathhouse and, donning our bathing suits, proceeded to deposit the dust of the Ojai and Santa Clara Valleys in the Pacific Ocean. We spent half an hour in the water, then returned to the machine, ate an egg sandwich apiece, loaded up on some of Ventura's prize gasoline, and were gone again. Out over a rutty dirty road that was heavy with dust we roared along, right at the edge of the surf, for nearly five miles. Then our road took a turn up a canyon and back into the bean country again. There were miles of beans along on both sides of the road, and looking off across the fields there were beans and then more beans, just as far as the eye could reach. Our road, which had been awfully rutty and dusty, gradually got better as we toured inland, and a few miles further on we came to pavement again. It was boulevard, just as smooth as a road ever gets, where we could open up, and a mile a minute seemed like no speed at all.

A Queer Spill

Camarillo was our first stop, and there we stopped so suddenly that we almost came to grief. In the heart of the town we were passing an automobile when it ran over a board, and in some peculiar manner the board was thrown violently from under the wheels. It struck our front wheel, jammed under the mud-guard, and the wheel immediately ceased to go around. The tread of our tire whistled on the pavement, and we did a beautiful half-moon act into a shallow ditch at the side of the road, but came to a stop with the machine still on its wheels, and ourselves still with it. A deal of rubber had disappeared from the tread where it had slid, and the mud-guard was badly bent. We hammered it back as best we could, and after breaking a path from the swarm of town yokels that had gathered from—no one knows where—we were on our way again.

Nothing But Boulevard Ahead

We now had that satisfied feeling that comes f knowing that the rest of our trip home was all boulevard, and that our bad road troubles were over. The eighty or ninety miles that now lay before us seemed like a lesser distance than two miles back in the Ojai Valley.

The mile-posts now seemed to run to greet us, as our road now led us through mile after mile of fine pasture land. Cattle, sheep, and goats seem to be the principal products of the rugged country between Camarillo and the Conejo Pass (pronounced Ko-nay-ho—it is the Spanish word for rabbit.) We were greatly amused at a sign in front of a ranch which read—"Odorless Goats for Sale." Judging from our past olfactory experiences in touring by other goat ranches we were inclined to believe that "odorless goats" are in the same category as wifeless matrimony—in other words, there "Ain't no such animal."

Our road gradually led into barren rugged country, which continued to get wilder as we neared the Conejo Pass. Great barren, rocky mountains towered up on all sides, and our road began to turn and twist higher and higher. Up, up, up we went for miles; around hairpin bends and S curves. It was a case of pump oil and "give her the gun." We eventually got to the summit, where we could get a bird's-eye view of miles of rugged mountainous country. Then the trip down and there our joy began. With clutch out and brakes working, we had five miles of coasting through some of the most beautiful country we ever hope to see.

In the Valley Again

Once over the pass we were in the San Fernando Valley again, and into a country that is given over almost entirely to the raising of bees. The valley is fairly level and well wooded with huge oak trees. The abundance of sage and flowers provides the best of food for the bees, and the sage is said to produce an especially fine grade of honey.

The sixty miles from the foot of the pass home we traversed at the rate of about sixty miles per hour. We also had the good fortune to run by a motor cop at that speed, but he was busy taking inventory of an automobilist he had overhauled.

The sun was almost down as we roared up out of the San Fernando Valley, over the Malibu Mountains, through the Cahuenga Pass, and into Hollywood.

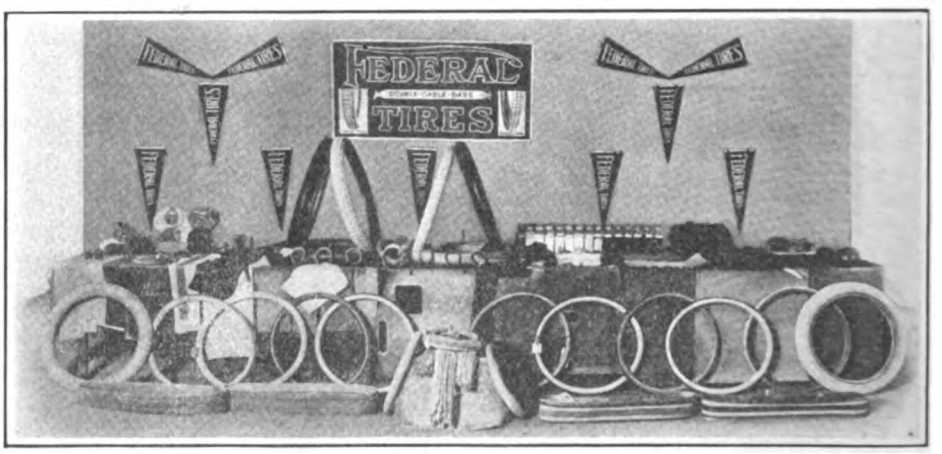
Several miles of riding through congested traffic took us out of the city and we were off on the home stretch by the Mission Road. Eight miles more of boulevard through the dusk of the evening, and we were at the door of our own little bungalow again.

Appetites Were O. K.

After a bath apiece, clean clothes, and then for that pork roast that we had put away in the ice chest. That's one of the best things about a long day's tour—the coming home to a good supper at the finish. We were a little tired, of course, the same as one would expect to be after any day's sport.

We had covered 230 miles, crossed five mountain ranges, and had gained an intimate knowledge of a large portion of our State. We had enjoyed every minute of it, and our machine, aside from being somewhat dusty, had no complaint. The cost of the trip was almost too trivial to mention. What vehicle other than the motorcycle has man devised by which the same results can be accomplished as efficiently?

COMPREHENSIVE DISPLAY OF FEDERAL PRODUCTS



This Layout Was Arranged for the Benefit of a Big Delegation of Wisconsin Teachers That Visited the Federal Plant at Cudahy Recently

Effective Means of Starting Stubborn Nuts

WHEN a nut becomes stubborn and cannot be turned even after a soaking in kerosene, the usual way is to put extra leverage on the wrench by means of a piece of pipe. While this is effective in most cases, the nut comes off with its corners damaged and in course of time will need the services of a Stillson wrench to remove or replace it.

A better way is to use two wrenches, one being the regular monkey wrench and the other a Stillson or plain jaw affair. Set up the jaws of the monkey wrench on the nut, but over the bolt-end instead of perpendicular to the bolt. Clamp the Stillson over the nut and the movable jaw of the monkey wrench, so that the handles of the wrenches are at right angles to each other. Pressure on the handles of both wrenches will now start the nut without chewing off the corners and distorting or breaking off the bolt end.

Wet Sawdust for Fighting Gasoline Fires

FOR the small garage fire which happens once and awhile through carelessness, a good extinguisher is wet sawdust. The idea in putting out any gasoline fire is to smother it without chance of spreading the flame or doing any damage to the machinery in the neighborhood.

SIX EARN TITLE OF "MOTORCYCLE EXPERT"

Just Half a Dozen of 200 Contestants in "What Do You Know About Motorcycles?" Contest Send Correct Answers to Full Dozen Pictures—New Contest Coming

WELL, here's the final word on the "What Do You Know About Motorcycles?" contest. It pulled well over a thousand answers during the twelve weeks it was run and the lists show that there were over 200 separate competitors. And judging by the letters that have come to the Contest Editor's desk during the past week about every one of the 200 is sorry that the contest is over.

The contest returned just half a dozen "Motorcycle Experts." The C. E. congratulates them, each and every one, on their keenness and bed-rock knowledge of the ins and outs of the various makes of motorcycles. And just in part payment for helping him earn his salary for the past three or four months—well, we've seen to it that Marjorie outside who tends to the "subs" will lay off sending you a bill for a full twelve months after her usual date.

There were just two contestants who came through with correct answers on all save one of the pictures while nine were perfect on ten out of the dozen. The appended list shows just where you stand at the end of the contest, provided you answered at least six of the dozen.

Just a parting shot at that "bunch from Newark." Here this morning, just before going to press they slipped through a list of 120 answers to the Harley-Davidson picture published last week—and we promptly ruled them out. Two weeks is too long to get in an answer from Newark. Besides which looks like that list was paraded around the New York show.

As a matter of fact, ruling them out does not affect the scores materially, for none of the Newark competitors except Ellie Holton was anywhere near the top; we allowed Holton's answer because he whispered it to us on the show floor before the last issue was out.

Watch for the new contest beginning next week. It's going to be a winner and interesting.

FINE ROADS FOR DENVER

Ten-Mile Concrete Highway to Golden Will Be Ready in Spring

DENVER, Colo., Dec. 8.—By the first of next July the concrete road connecting Denver with Golden, a distance of about 10 miles, will have been completed, and motorcyclists will have an unrivaled speedway, which will enable them to make the Mountain Park trip at any time of the year. The first 4.8 miles of the highway will be laid this winter, 2 miles of which is already completed. The first half of the road will cost in the neighborhood of $70,000. On January first the State Highway Commission will let the contract for the other half, and the entire job will be pushed through in time for the summer tourist travel.

Another development expected as a result of the building of the concrete road from Denver to Golden is in the way of motorcycle endurance and mountain climbing contests. From Denver to Morrison up Bear Creek to Evergreen, across to Bergen Park, and back by way of Oenessee and Lookout Mountain to Denver, will make a sixty-five mile drive. When it is considered that about forty miles of this will be on grades running as high as 6 per cent, the opportunity for contests is easily seen.

TAKE 600 INDIANS

Italian Dealers Respond to Stimulating Influence of Andrews' Visit

SPRINGFIELD, Mass., Dec. 11.—Orders for some 600 Powerplus Indians have been received from Italy according to an announcement made by Salesmanager E. M. Jackson of the Hendee Mfg. Co., today.

The orders come from regular agents, the biggest requisition coming from Milan, where Assistant Export Manager Andrews of the Hendee company is at the present time looking after the Indian interests. It is stated that none of the machines are for war service.

SARXE MOVES QUARTERS

LANSDALE, Pa.—C. M. Sarxe has moved his headquarters from 19 East 3rd street where he has held forth for the past severeal years to larger quarters in the Moyer building on Walnut near Main street.

Sarxe has again signed up with the Harley-Davidson folk for the 1917 season and in addition to the motorcycle line has taken on the Harley-Davidson bicycle for the coming year.

MARVEL ACCESSORIES EXPANDS

CLEVELAND, O., Dec. 11.—The Marvel Accessories Mfg. Co., which manufactures vulcanizers and other appurtenances for motorcycles, has increased its capital stock to $100,000.

Coincident with the capital increase the company has broken ground for a new factory building which will afford greatly enlarged manufacturing facilities.

GORDON TIRES FROM CANTON

CANTON, O., Dec. 11.—The Gordon Tire & Rubber Co., of this city, has been incorporated with an authorized capitalization of $12,000. C. W. Keplinger heads the new concern.

Letters to Dan Deeler, Esq.

SAY, DAN:—Here's a matter I've wanted to call to your attention for some time.

It concerns photographs and how to make them pay returns. It's quite a problem, too, when you get into it. For example,—

A photograph of a dealer's store may be a reg'lar old goshwalloper of a publicity-getter.

Or it may be one of those little jokers that would be better left out of the deck altogether.

It all depends on whether the camera-man did his thinking in a lignum vitae dome or a good old-fashioned noodle.

A case in point: I am lamping at this precise moment a most remarkable photo of a motorcycle agency,—almost.

The chief features in it are a delivery automobile and an electric light pole. The auto and the pole look quite well, thank you.

But you have to give the picture the triple-O in order to discover the motorcycle store. It's there, but it's all-fired bashful.

The dealer's window was too far from the camera to show well, and several motorcycles on the sidewalk are hiding behind the car and the aforementioned pole.

There's no percentage in that kind of a picture, Dan. From your angle your store is the biggest thing on the map. That's the way you ought to feel about it. Don't let anyone belittle it.

When you have a picture taken, see that the camera does full justice to your place. If the photographer is a second-rater, aim him at the next county and get a reg'lar feller to make the photo for you.

Your business, and ours, is to sell motorcycles. Let the automobile men and the electric lighting men do their own advertising. That's fair enough, isn't it?

The trade journals welcome good pictures of dealers' stores. They're durned scarce, that's why. Eight out of ten photos received have some kind of a little joker in them.

When a really bright and attractive photo of a dealer's place comes to hand, the Editor declares a five-minute recess and throws up his hat,—if he owns one. He may even go out and buy himself a cigar.

All because he knows he is going to be able to brighten his pages and at the same time help a deserving dealer and boost the motorcycle game generally.

Now, under those conditions isn't it worth while for dealers to strive for good pictures? No doubt of it. And isn't it just about as easy to get a good photo as a poor one? Nearly always.

What's needed? Why, a neat window display, clean windows, a clean sidewalk, with several motorcycles in sight perhaps, and only the actual staff of the store in or about the doorway.

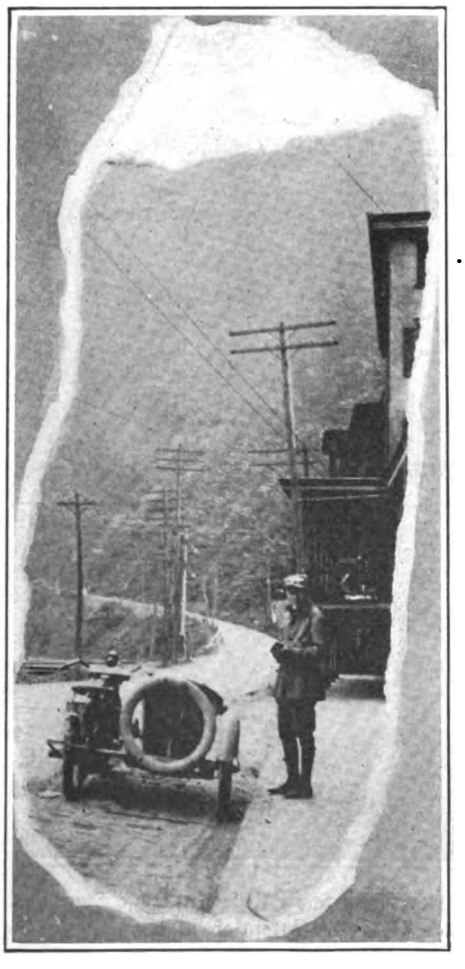
There are no ironclad rules, however. The main requirement is to show that you are running a *motorcycle* store, or a *bicycle* store, or both, as the case may be; and that your place is clean and business-like.

* * * * *

And here's another matter that I think we ought to get together on, Dan, at just about this time.

While we are telling Mr. Man-With-the-Money all about the 1917 motorcycles why not aim some special sidecar literature at the Lady-Who-Married-Him?

Seems like a logical thing to do, doesn't it? She's the one who has to be interested in eight cases out of ten before a sidecar sale can be closed.



If for any reason she should veto the sidecar proposition, Mr. Man-With-the-Money wouldn't buy the car—*and he might not even buy the motorcycle!*

That's something to think about. Seems rather foolish to overlook the lady in the case when it's a double-barreled certainty that her say-so can usually make or mar a sidecar sale.

Some of the fair ones (political stuff) have a hunch that they might not be comfortable in a sidecar, that they might be cramped for room, and mussed up, or otherwise embarrassed.

If they are toddling around with ideas tucked away under their side-combs it means that they are in need of some detailed information, does it not? It does. And who is going to give it?

Mr. Man-With-The-Money may try to explain matters, but maybe he's not a good explainer—even if he is married. He may not know much about sidecar comforts and joys himself, and besides he's chiefly interested in the motorcycle.

If the job of making a sidecar enthusiast out of the Missus is left to him he may not deliver the goods. Perhaps he'll decide that a solo motorcycle was really all he wanted, after all—and call it a day. In that case—bing! goes a sale.

So you see the only safe procedure is for the dealer himself to tell the Missus about sidecars. It's his business to do so anyway.

If it isn't possible to have personal interviews at first, why not get out a neat and instructive form letter talking sidecars, and addressed to the lady in the case, and mail it with some of the factory booklets on sidecars?

When you begin to talk motorcycle to Mr. Man-With-the-Money it's about time to say something about sidecars to the Lady-Who-Married-Him. The thought of buying a motorcycle and a sidecar at the same time won't scare him off—not after the Lady-Who-etc. gets interested.

1917 is going to be a big sidecar year, and the whole industry is going to be better because of it. The more sidecars we sell the more ladies we will have with us on the road, and the more ladies we have the higher will be the plane of the sport and the trade.

So don't leave your sidecar sales to chance. And don't leave it all up to Hubby. Tell him about the sidecar proposition, of course, but make a point also of interesting the Missus.

Suppose he hasn't a Missus? Well, that's different. The only thing to do in that case is watch where he goes on Wednesday and Sunday nights with his hair all slicked up and cologne on his coat lapel—and then slip your sidecar letter under that girl's front door.

Yours for More Shekels,

DON.

COLD WEATHER CONDITIONS IN CHICAGO

Temperature Drop Causes Rush to Buy Winter Riding Togs with Stocks Low Because of Market Conditions—How Dealers View Commercial and Used Machine Fields

CHICAGO, Dec. 11.—Cold weather has finally arrived in this vicinity, the mild, open weather which had been in evidence having been too good to last. The principal effect of the change in conditions has been a big demand for winter clothing, and caps, gauntlets, heavy coats, leggings and other equipment for the motorcyclist have been in splendid demand. In fact, stores which handle this class of goods and specialize to a certain extent along this line have been having all that they could do, and stocks of heavy garments designed for the use of the motorcyclist have been rapidly depleted.

The number of motorcycles in commercial or municipal use, which will be kept going all winter, is so great that the market for winter clothing designed for the protection of the driver is greater than ever before, and the dealers are enthusiastic over this part of the line.

Goods Are Scarce

The most significant thing in connection with the motorcycle outfitting business right now is the difficulty of obtaining goods, or, more accurately, goods at a figure which will be attractive when converted into terms of retail prices. The rapid increase in the cost of leather, and the actual scarcity of many items of leather goods, have combined to send prices soaring, and some of the dealers question the advisability of putting in a stock of this kind of goods on account of the necessity of raising the ante to the riders. An example of the situation is afforded by the fact that one of the big wholesalers on Michigan avenue, who had a contract for the delivery of 125 dozen leather puttees, was offered a bonus of $2 a dozen to release the manufacturer from the contract. This he declined to do, figuring that he has more of a profit in the goods than would be represented by $250.

The Edwards-Crist Mfg. Company, Indian headquarters, is showing a "windshield" gauntlet which is attached to the handle-bar. It is simply a fingerless, thumbless glove, which is fastened to the handlebar by a stout band of steel, so that it cannot be lost or easily detached by anyone of predatory instincts. It was intended to feature this in sheepskin, with the fleece turned in, but it has been impossible to get it in this material. The device is taking unusually well.

The Question of Discounts

The custom of giving special discounts to commercial buyers is frowned on in a good many quarters, and is the big obstacle to the development of the business by some of the principle members of the Chicago trade. They see no reason why they should give the commercial house which is in the market for a delivery outfit an "inside" price, yet they say this is being done, and is the prime reason why more dealers do not go after it.

As the dealer is expected to be liberal when it comes to taking care of machines sold for commercial use, it is pointed out that the service item is a big one, and that if the price has been shaded to begin with, the dealer is sure to come out at the small end of the horn.

Now that the off-season is here, when motorcycle men can philosophize regarding conditions about which they may show more or less feeling in warm weather, considerable sentiment is developing in favor of co-operative work among the dealers on the subject of clubs. There are comparatively few really live clubs in the city at present, and yet there is a big field, but it is regarded as inevitable that the dealers support them. Unless some commercial interest is backing the project, it is hard to keep it afloat. On the other hand, many dealers have not the time individually to maintain clubs, even though they appreciate the advantage which would accrue through having a live organization to handle runs and other social events. They would be glad to give their share to the maintenance of some one charged with the organization and operation of a club, and feel that everybody would share the benefits.

Most motorcycle dealers have considerable stocks of second-hand machines on their floors at present. Some of them regard them as Sinbad the Sailor regarded the Little Old Man of the Sea; others look on them as good property, out of which they will get real profits.

Money in Used Mounts

"The dealer who doesn't make money on his second-hand machines," declared one of the most successful Chicago motorcycle men, "is not a merchant, but a representative of the back-woods trading interests. We make just as much if not more money on our second-hand machines as we do on new ones. There isn't enough profit in the sale of new machines to warrant the dealer in handling the second-hand ones without any margin, though that is done in a good many cases. We get enough margin on old motorcycles to take care of the cost of overhauling, overhead and selling expenses, and a reasonable profit."

In this connection the second-hand business is important, a dealer remarked recently, in that it leads to business on new motorcycles. For instance, he explained, he has found that, roughly, 80 per cent of those who buy used motorcycles are taking up motorcycling for the first time; only 20 per cent. go to old riders. On the other hand, 75 per cent. of his new machines are sold to old riders, and only 25 per cent. to those just entering the field.

Cultivating Prospects

Consequently, when a second-hand machine is sold, it usually means a prospect for a new machine a little later on, which is all the more reason for giving attention to that department of the business.

A good many dealers make a point of having riders who expect to buy for delivery next spring place their orders now and turn in their machines as part payment. There is a mutual advantage in this. First, it takes care of the rider's storage problem, and second, it gives the dealer something to work on during the cold weather. He is able to keep his men together and by spring he has a good stock of used machines that are ready for the market.

H. F. Fuerst, in charge of Cook county sales of Thor machines for the Aurora Automatic Machinery Company, has just returned from a swing through Indiana

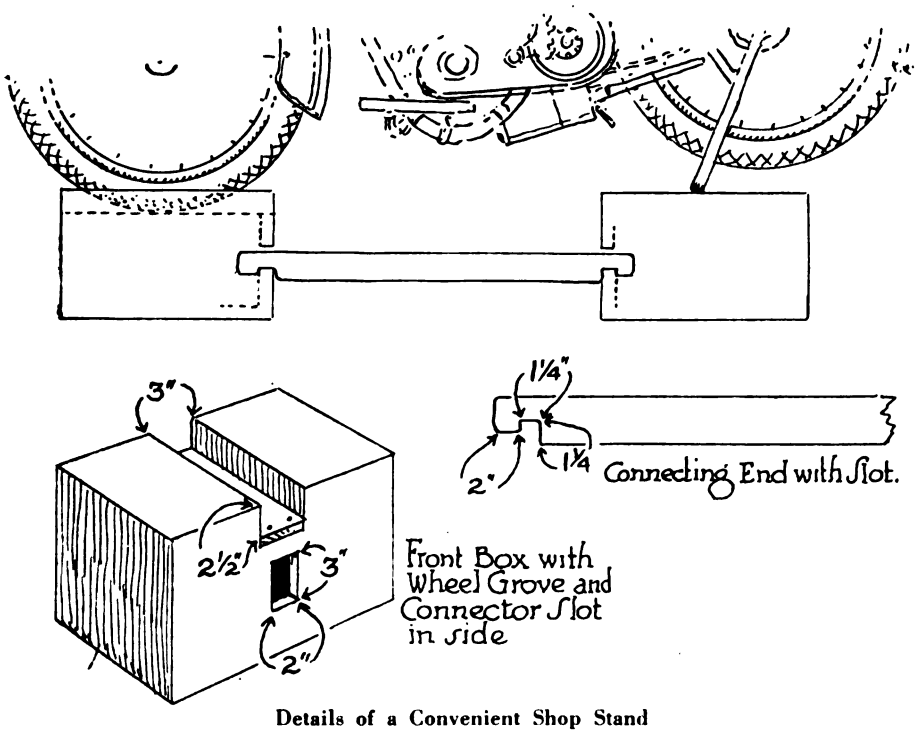
Repair Kinks and Shop Wrinkles

A "KNOCK-DOWN" WORK STAND

Describing an Inexpensive Device for Supporting the Machine When Making Repairs; Has Only Three Parts, and Occupies But Little Space

By D. R. HOBART



Details of a Convenient Shop Stand

THERE are no doubts as to the desirability of having a motorcycle raised off the floor when work is being done upon it. If only for the sake of making it easier for the workman, a stand or platform about two feet high should be in every shop, large or small.

However, in the smaller repair shops, a permanent work-stand will frequently occupy more room than can be spared, particularly as it is not in use most of the time. The writer recently found such a situation and devised a "knock-down" work-stand for the proprietor, the details of which follow:

Only Three Parts

The component parts of this stand are two mineral water or beer cases, a length of 1 x 2½ inches about six feet over all, and a few wire nails. The cases, which should be of wood and the stoutest obtainable, should have the bottle racks left in. They form the supports for the front and rear wheels of the motorcycle, when turned upside down.

The case for the front wheel is formed with a hollow or slot to take the tire, this slot being constructed as follows: Along the center line of the bottom of the case saw out a piece 3 inches wide and from 2 to 2½ inches deep. Cut through the bottle racks as well as the bottom of the case when doing this. Next take the piece of the bottom which has been cut out and nail it at the base of the slot to the two sides of the case. Note that the cut should be made on the short dimension of the case, not from end to end.

The Connector Slot

Now saw a slot 3 inches long and 2 inches wide along the center line of one side of the case, with the long dimension from top to bottom. See the illustration. Cut a similar slot in one side of the other case. These slots are to connect the two cases when the stand is ready for the motorcycle. See that the bottle partition inside each case is at least 3 inches clear of the slot in the center of the side.

The second case need not be cut through the bottom at all, as the stand when lowered will prevent any swaying of the motorcycle. The next step is to fix the long piece of 1 x 2½ to connect the cases at the proper distance apart.

Fitting the Cases

Place the cases about five feet apart and put the motorcycle on them, with the front wheel in the slot of the first case and the stand resting on the other case. Be sure that the slots in the cases face each other. Measure the distance between the slots and add 2 inches.

Now take the 1 x 2½ inch piece and commencing at least 2 inches from one end make a mark and then measure off the distance between the case side plus 2 inches. At each mark cut a slot 1¾ inches deep and wide enough to easily fit the thickness of the side of the case. The stand is now complete.

Assembling the Stand

To assemble the stand for use, place the slotted box in position and hook one end of the 1 x 2½ inch piece, the connector as it is called, in the slot at the side. Hook the other end of the connector in the slot in the other box. Mount the motorcycle as before and start to work. When finished, remove the motorcycle, take the connector ends out of the slots and pile the boxes. The space taken up will then be the width and depth of one box and the height of the two. In other words, the stand is well out of the way in even the smallest shop. The connector is to be put up on end in a corner.

The cases are amply strong to support any motorcycle. The connector is simply to gauge the distance between the cases and to keep them in their proper relative position, in the event of their being accidentally knocked or shoved in passing.

An Article of Many Uses

Such a work-stand will come in handy in larger shops for the use of customers who like to fix up their own machines. It can also be used as an emergency stand when the regular one is occupied. It costs next to nothing to make and requires a few saw cuts and some nailing to complete. An even less expensive alternative may be used, this being the use of two small wooden cleats in place of the saw cut through the bottom of the front wheel case. The cleats should be spaced so that they press slightly against the tire at front and rear when the wheel is mounted on the case.

What to Do for the Brakes When Overhauling

IN making a general overhaul of a motorcycle it is well to take a look at the brakes, particularly if the mount has had hard service. When the rear wheel is removed from the frame, the brake drum should be taken off and its inner and outer surfaces gone over with kerosene to remove any oil or gum which may have got on it through the hub. If there is considerable oil on the inner surface of the drum, the washers in the hub should be looked at, as it is a sign of lubricant leaking out.

If the friction fabric is glazed, a treatment of kerosene or gasoline will put it back in condition. However, if the fabric is so worn as to expose the wire carcass, the proper procedure is to replace it with new stock.

When the kerosene is dried out on the brake drum and friction fabric the brake should be assembled, but not before. After fitting the brake in place and putting the wheel in, make adjustments in the rods so that when the pedal or lever is released, the brake just clears the drum, inside and out.

Questions and Answers

RENEWING THE ENAMEL

I AM anxious to renew the enamel on my machine and would like some information. First, whether varnish is a satisfactory restorer, and if so, what kind is best and how many coats are necessary. Second, does air-drying enamel give satisfactory results and does it need a protective coating?

Bennington, Vt. S. A. PATTERSON.

If the enamel is not scratched or defaced badly, an application of Johnson's Prepared Wax will go a long way toward bringing it back to its original condition. There are a number of preparations on the market which will restore enamel on application, and practically all of them are good. You can get these preparations from any first class automobile supply house. We do not recommend varnish for the work you mention.

Air-drying enamel gives good results, but of course not so good as enamel which has been oven-dried. It needs no protective coating.

CURING OVERHEATING

WHEN climbing long hills and when carrying an extra passenger on tandem with my sidecar outfit, I find that my twin motor gets very warm and often will balk. Should I fit extra cooling fins between the others to cure this? The carburetion and valve timing are all right.

Philadelphia, Pa. ROBIN BROWN.

Before considering increasing the cooling surface, find out what your gear ratio on high is. Multiply the number of teeth on the motor shaft by those on the inside of the countershaft. Call the result A. Next multiply the number of teeth on the clutch by those on the rear wheel sprocket, calling the result B. Divide A by B to get the gear ratio.

For your work, this should be 4¼ to one. If it is not, put a bigger sprocket on the rear wheel. Then clean all the carbon out of the cylinders and see that the magneto timing is per the factory marks. We feel that then you will not have over-heating trouble.

BATTERY FREEZING POINT

BEING the user of an electrically-equipped machine and not yet having had the outfit through a winter, I am anxious to know whether the battery will freeze should I leave it out of doors for half a day, or even 24 hours. If the battery will freeze, should a Prest-O-Lite tank and acetylene conversion outfit for the front lamp be carried?

Newark, N. J. H. B. EDWARDS.

Unless nearly discharged, the storage battery will not freeze at zero temperature. If you let a battery get discharged, there will be more than freezing to trouble you. You can tell by a hydrometer when the battery is getting near the full-discharge point, by the specific gravity approaching 1.150. A half-discharged battery freezes at 20 degrees below zero, while a battery which has been about one-quarter discharged will stand a temperature of over 50 degrees below. Keep it fully charged each day, as a precaution.

CAUSE: CHOKED MUFFLER

THE power of my 1916 motor has fallen off a good deal lately, in spite of an overhaul with new rings and valves. Compression is excellent, and the valve timing and ignition timing correct, according to factory markings.

Brooklyn, N. Y. H. J. VERNON.

The trouble is undoubtedly a choked muffler and outlets. Remove the muffler pipes and muffler, and scrub them out with kerosene. Use plenty of the oil to clean these pipes and repeat the scrubbing until all the carbon is removed. You will find that the power will be greatly improved.

A TOUGH HILL

Tasmania Dealers Send Indian Two-Stroke Up as Demonstrating Test

WITH the view of demonstrating the hill-climbing ability of the little two-stroke machine, John King & Sons, Indian dealers in Launceston, Tasmania, recently arranged for a series of tests on a local grade known as Balfour street hill, and recognized as one of the toughest climbs in the vicinity.

The accompanying photo shows how the

machine topped the grade with its unusual load, the total weight of which was 322 pounds. The grade is rated at 1 in 3¼ and the manner in which the two-stroke rambled up has had a great deal to do with the lively business in Indians experienced by the Launceston firm.

USE SMALLER JET

I HAVE a two-lever carbureter on my machine, which I think is foreign-built. The jet is marked .26, and appears to give plenty of speed to the motor, but not as great an economy as I would like. Tell me if a different jet and what number or mark on the jet will give me what I want.

Pittsburgh, Pa. E. T. GUNTHER.

The number on the jet refers to the bore in thousandths of an inch. Thus the .26 jet is 26/1000 of an inch. Try a .24 jet for greater economy. This will slightly reduce the speed of the machine, but will attain the end desired. Inquire of the makers of either the carbureter or the motorcycle.

RESULT OF CARELESSNESS

I FIND that my electric generator will no longer spark properly and that my battery will not give current enough to light the tail light alone. I can get a series of sparks at the contact maker, but nothing regular enough to fire the motor. Please tell me the remedy.

Chicago, Ill. P. Z. H.

You have probably run down the battery to a point where it may need expert assistance in fixing it up. Take it right away to the nearest battery station for the make you use. As regards the generator, the symptoms are those of a broken down condenser, due to running at speed with the battery in poor condition. The generator will have to go to the service station for repairs. Fit an ammeter for the future and watch your battery, as you will find that neglect is costly.

TIMING TWO-CYCLE MOTOR

HAVING recently purchased a two-cycle lightweight, I have had it apart to clean the carbon out, but am at a loss as to how to time it when assembling again. D. S. G.

Portland, Me.

When you assemble the piston and connecting rod in the cylinder, the motor is timed as regards going through its cycles in the proper order. For the ignition, bring the piston to the top of the cylinder —on dead center—and have the contact-breaker lever just rising on the steel cam in the casting. Put on the magneto drive chain and the work is done.

SPROCKET OUT OF LINE

THE chain on my motorcycle whips when the motor is running idle on the stand. There is no undue play in the chain to cause this. The machine is a new one. F. S. JOHNSTON.

Guatemala, C. A.

The rear sprocket and the front sprocket are probably out of line with each other. That is, they are not in the same line parallel to the axis of the motorcycle. Note if the inside of the chain links on one side are worn more than on the other, and if so move the rear wheel sidewise in the forks in a direction opposite to the side showing the wear. Thus, if the wear is greater on the right side, move the wheel to the left.

Bicycle Section

NATIONAL DEALERS' ASS'N FORMED

Cycle Trades Directorate Arranges Meeting for Organization of Nation-Wide Body—Temporary Chairman, Secretary and Committee Chosen—To Meet at Automobile Show in January

NEW YORK, Dec. 9.—Insofar as bicycle dealers, and, in fact, the entire bicycle trade, is concerned, the most notable event of Gotham's big two-wheeler week, which comes to a close tonight, was the formation of the National Bicycle Dealers' Association, which grew out of a meeting called for the Concert Hall of the Garden yesterday by the United Bicycle Trade Directorate. Roughly, 150 dealers attended the meeting, which was called to order by Daniel F. Printz, of the Reading Saddle Co.

Printz Tells of Benefits

Printz explained the many benefits that would accrue to the dealers through an organization of such magnitude, and he suggested that the organization be divided into local units so that it might better cooperate with the Directorate. Both Harry S. Quine and Louis Schwab, members of the Directorate, also boosted the idea of forming a national association and they went into some details regarding the cooperation the Directorate would offer dealers in the way of sales helps and assistance. George W. Sherman, of the Hendee Mfg. Co., told of his experiences. He made a plea for modern merchandising methods and a clean store.

Charles F. Olin, the Directorate's secretary, aroused enthusiasm when he told of how instead of a "Million Bicycles" goal it should be several millions, as he had made quite an investigation into bicycle selling and found that the "surface had only been scratched." It was emphasized at the meeting that Directorate did not wish to control the national organization, but instead wanted the dealers to work out their own plans, but that they were willing to help them at all times.

Miner Temporary Chairman

After the various trade men had finished George L. Miner, of the George Miner Co., Indian dealer in Rochester, N. Y., was chosen as temporary chairman of the meeting, and Walter Rinck, the secretary of the Directorate, was appointed temporary secretary and treasurer. A temporary committee was then appointed to select a permanent committee, the latter to draft a constitution and by-laws and to formulate plans for organizing the association. This committee will meet during the Automobile Show in January to make a report, which will be taken up with a special committee of the Directorate. The movement has received such impetus that big things are confidently expected from the meeting in January.

The members of the temporary committee are: George L. Miner, Rochester; Joseph J. Hoffman, Boston; Frederick Von Rheim, Jr., Upper Montclair, N. J.; Phay B. Rutan, Elmira, N. Y.; James Mayo, Reading, Pa., and Joseph G. McCallister, Baltimore, Md. It was suggested at the meeting that a vice-president be chosen by each State represented, but others thought that this would be too cumbersome and moved that the country be divided into districts. All definite action on organization methods was referred to the proposed permanent committee.

C. R. C. A.'S MISS AND OUT RACE

NEW YORK, N. Y., Dec. 12.—Although it was cold and raw when the ten mile miss and out race of the Century Road Club Association was run over the Pelham Parkway course, Sunday, Dec. 10, 15 riders braved the elements and started. John J. Marquart won the race from Edwin Jensen, Louis Sattler, Max Halpern and Gustave Bailer in the order named.

CANADA CHAMPION MAKES GOOD

William Hyslop, Jr., of Toronto, Began His Career in the 90's—Has Built Up Excellent Bicycle and Motor Business

TORONTO, Ont., Dec. 12.—Among the many successful bicycle and accessories men in Canada, who have added the automobile to their business, may be found William Hyslop, Jr., president and manager of Hyslop Bros., Limited, agents for

William Hyslop, Jr., of Toronto

the Cadillac automobile in addition to a complete line of bicycles and sundries.

Born in Hamilton

Mr. Hyslop was born in Hamilton, Ont., November 8, 1871. Early in the 90's young Hyslop, like many other lads, took to cycle racing and scored a win in his first race, a novice event, which he did after pedaling to the meet from Toronto to Hamilton, a distance of 40 miles. During 1899 he held all Canadian Wheelmen's Association's championships from a quarter to five miles. He also was a famous swimmer, as his collection of cups and medals proves.

Began Business in 1890

He commenced his business career in 1890, when he became connected with the bicycle business of Hyslop, Cauldfield & Co., the senior member of which was his father. At that time the firm was selling the Whitworth, an English bicycle, and they later took on the Crescent line, and for a time they manufactured the Hyslop bicycles. The present firm was established in 1900 and they became the agents of the Olds automobile and later contracted to handle the Cadillac, which they still market.

Mr. Hyslop is a shrewd business man, but by no means a narrow one. He is an ardent sportsman as well as a business man, and while he is not a champion at golf, he enjoys a game just the same. As a fisherman and a hunter his reputation ranks high, and his amiable manner has aided him in making his business a success.

PERLMAN CO. TAKES EMBLEMS

NEW YORK, N. Y., Dec. 13.—General Manager William G. Schack, of the Emblem Mfg. Co., announced at the Madison Square Garden show last week that the Perlman Cycle Co., 34 Warren street, had taken on the distribution of Emblem nameplate bicycles in Greater New York, Long Island, New Jersey and the New York State counties of Westchester, Orange, Dutchess, Ulster and Putnam.

PIONEER JOBBER PASSES ON

MILWAUKEE, Wis., Dec. 12.—Fred W. Huennekens, a pioneer bicycle jobber of this section died last week. Mr. Huennekens was credited with being the first to introduce bicycles in this section and conducted a flourishing business until his retirement a few years ago.

TRADE DIRECTORATE WILL INCORPORATE

Committee Appointed to Handle Matter at Show Meeting of Body—Recommends New Show Committee.

NEW YORK, Dec. 9.—The decision to incorporate the body under New York State laws was the biggest thing accomplished at the meeting of the United Cycle Trade Directorate in its booth at the Garden show last evening. Daniel F. Printz, of the Reading Saddle Mfg. Co.; Louis Schwab, of the Stevens Co., and Fred A. Baker, of Baker, Murray & Imbrie, Inc., were appointed an executive committee of three to go into the details of the incorporation, and also to handle such other matters as may logically come up in the management of the body.

To Appoint Committee

Also of importance in its bearing on the trade at large is the recommendation made by the Directorate to the Motorcycle and Allied Trades Association with regard to the Show Committee, which is to manage the next New York and Chicago cycle exhibitions. The Directorate recommendation includes the appointment of a committee of two from the M. and A. T. A. and a committee of one from each: The Bicycle Manufacturers' Association, the Cycle Parts & Accessories Association, the United Cycle Trade Directorate and the Cycle Jobbers of America.

It was brought out that because of the extra work done by the Directorate in connection with the New York show, fully five times as many dealers registered at the Garden affair as were registered at the recent Chicago show, and it was decided to adopt the same means for boosting the shows for 1918.

With a view of fostering the newly organized National Cycle Dealers' Association, the Directorate voted to extend that body the use of one page in its monthly bulletin, the *Million Bicycles Bulletin*. This page will be used as the official organ of the dealers' body.

The next meeting of the Directorate will be held at the New York office, 373 Broadway, on Wednesday, January 10, at 2 p. m.

N. E. W. ELECTS OFFICERS

SAN FRANCISCO, Cal., Dec. 5.—At the annual election of the New Century Wheelmen, held last night, the following were elected to office: President, R. A. Greeninger; first vice-president, Phillip Morgan; second vice-president, Joseph Bricker; recording secretary, Harry Spence; financial secretary, Earl Castillo; treasurer, Leslie Drury; sergeant-at-arms, Arthur Page; captain, William Penaluna.

TRADE FOLK GET "BACK TO NATURE"

Novel Luncheon Staged for Show Visitors at Breslin with Parts Makers as Hosts—Speakers and Their Talks

NEW YORK, Dec. 8—The cycle trade folk simply flocked "Back to Nature" yesterday under the guidance of the genial Frank Chase, who heads the entertainment committee of the Cycle Parts and Accessories Association. The affair was a little luncheon staged for the benefit of the trade folk by the Parts Makers, and was called for the Hotel Breslin at 12:30 o'clock.

When all the boosters were seated, and the roster taken, it was found that no less than 174 "dyed in the wool" enthusiasts were in attendance. The "back to nature" portion of the program consisted of donning a long apron and a white linen cap, and getting on the outside of a full quota of luncheon without the aid of knives, forks or other eating paraphernalia.

When the luncheon was disposed of Daniel Printz of the Cycle Parts and Accessories Association called attention to the fact that there was business to be considered and he quickly but thoroughly outlined the plans prepared by the United Cycle Trade Directorate for advancing the interests of bicycle dealers both large and small the country over.

Keyser Fry, of the Reading Cycle Mfg. Co., put in a plea for a complete roster of bicycle dealers throughout the country, with a view of aiding the Directorate in its far reaching work, and Percy Pierce, of the Pierce Cycle Co., spoke up for the need of a generous attitude on the part of the manufacturer in order that the plans formulated by the Directorate may not be hampered by lack of adequate support.

The other speakers were George W. Sherman, of the Hendee Mfg. Co., who dwelt upon the advantages gained through frequent contact of the manufacturers and dealers; H. S. Quine, of the Goodyear Tire & Rubber Co., who summed up the possibilities of the minute for bicycle manufacturers and dealers in a pithy address; L. M. Wainwright, of the Diamond Chain Mfg. Co., who drove home the fact that there is no room for slackers in the big movement which the bicycle industry is undertaking; John Henry, of the Vim Cycle Hardware Co., who favored the idea of a general association, and Felix Van Cleef, of the Van Cleef Brothers, who suggested that some valuable pointers might be obtained from the National Retail Hardware Dealers' Association.

IT WAS A JOLLY CROWD THAT WAS ON HAND

Picture of the Diners at the "Back to Nature" Luncheon at the Hotel Breslin

SPRINTS GALORE FOR SIX-DAY RACE

Management Arranges Two Hours of Sprinting for Riders—Points System to Decide the Winners —New Faces to Be Seen in Daily Strenuous Contest—Field Almost Complete

NEW YORK, N. Y., Dec. 13.—Patrons of the coming six-day race in Madison Square Garden, the 24th annual affair of this kind, will see a number of new faces in the personnel of the teams, the introduction of a new system of nightly sprint sessions of two hours each night until the final evening, when one hour of sprinting will be indulged in, and a more strenous race than in the past.

Fifteen Teams to Start

It is planned to start 15 or more teams in the coming "grind" and at the present time the field is almost complete. With few exceptions the field is truly international, and before the riders are sent on their long journey a minute after midnight of Sunday, December 17, in all probability the ones who are not signed as yet will have joined the field.

Among the teams that have arranged to ride in the six-day race and the preliminary sprint meet on Saturday, December 16, are the following: Alfred Goullet and Alfred Grenda, Newark-Australia; Reggie McNamara and Bob Spears, Australia; Jimmy Moran and Hans Ohrt, Boston-San Francisco; George Wiley and Clarence Carman, Syracuse-Jamaica, L. I.; Joe Kopsky and Tommy Smith, Newark; Harry Kaiser and George Cameron, New York; Eddie Root and Eddie Madden, Boston-Newark; William Spencer and Eddie Carroll, Toronto-San Francisco; Bobby Walthour and Victor Linart, Atlanta-Belgium; Worth Mitten and Iver Lawson, Iowa-Salt Lake City; Ray Eaton and Martin Ryan, Newark; Fred Hill and Peter Drobach, Boston, and Tom Bello and Michael Debaets, the Italian-Belgium team, who will sport the colors of the Mnione Sportiva Italiana.

The race this year will be run on a percentage basis. The riders are riding for 35 per cent. of the gate receipts, and as the contenders have in past races received substantial bonuses no matter whether the race paid or not, the new arrangement has not made much of a hit with them. Among the riders that have made the most strenous objection to the percentage plan are Oscar Egg, Switzerland; Marcel Dupuy, France; Willie Hanley and Percy Lawrence, San Francisco; Jake Magin, Newark; Francesco Verri, Italy, and Frank Corry and Charles Piercey, Australia. Egg, Verri and Dupuy and probably one other will be signed if negotiations now going on between them and the management come to anything.

The introduction of the system of two-hour sprint sessions each night promises to make a better race and a contest that the public will take to. Each evening, except the final, starting at 8:30 p. m. the riders will indulge in a sprint about each five miles for the two hours ending at 10:30. Five riders in each sprint will be picked, the teams scoring from one to five points according to the position in which they finish. The points secured in the numerous sprints will then be added and the team scoring the lowest total will be credited with one point; second team two points and so on to the first five teams.

To Sprint Each Mile

On the final night the riders will have a sprint each mile during the last hour, the first seven positions being picked, with the leading member of the team tallying points from one to seven according to the position in which they finish. The points secured in the last hour will then be added along with those of the first five nights and the team scoring the lowest number of points in the total will be awaded the race. The other six moneys will be awarded according to their standing. Bookkeepers and expert accountants will be in demand during that week and if they don't get things muddled up it should be a great race.

George Wiley, Clarence Carman, Victor Linart and Bobby Walthour will meet in the feature paced race at the preliminary meet. The heats will be at five miles and two riders will meet in a heat. The winners will then meet to decide first and second places and the losers will ride for third and fourth places. Reggie McNamara

Digitized by Google

and Alfred Grenda are booked for a mixed sprint match, and Alfred Goullet, Bob Spears, Eddie Madden and another rider to be picked will meet in an "Alternance" match.

A half-mile handicap and a ten-mile open for the pros. and a half-mile handicap and a three-mile open are scheduled for the amateurs.

Patrons of Sport

A number of prominent cycle trades people have this year had their names placed on the program as patrons of the sport.

Among them can be found Fred L. Brown and J. E. Murray of the Pierce Cycle Co.; James W. Ash and Harry A. Gliesman, of the Miami Cycle & Mfg. Co.; J. W. Grady and W. P. Farrell, of the J. W. Grady Co.; J. P. Fogarty and B. A. Edgar, of the Westfield Mfg. Co.; E. J. Lonn and E. H. Leng, of the Great Western Mfg. Co.; W. G. Schack and Henry Perlman, of the Emblem Mfg. Co.; Frank J. Weschler and F. A. Baker, of the Hendee Mfg Co.; Arthur Davidson and G. E. Wood, of the Harley-Davidson Motor Co.; Horace M. Huffman and Henry Ephram, of the Davis Sewing Machine Co.; J. Lovell Johnson and J. F. Tichenor, of the Iver Johnson Arms & Cycle Co.; D. P. Harris and Stanley Wilson, of the D. P. Harris Hardware Co., and Keyser Fry, Reading Cycle Mfg. Co.

NEW PIERCE AGENTS

Baker, Murray & Imbrie, Inc., Arrange to Have Pierce Line Handled

NEW YORK, N. Y., Dec. 13.—Baker, Murray & Imbrie, Inc., Pierce cycle distributors, have signed the following dealers to handle Pierce bicycles during the coming year: H. R. Williams, Lancaster, Pa.; West End Electric & Cycle Co., Harrisburg, Pa.; H. Platt, Hazleton, Pa.; L. Martin, Berwick, Pa.; John Rawlins, Scranton, Pa.; North Philadelphia Cycle Co., North Philadelphia; Lit Bros., Philadelphia; Harder Sporting Goods Co., Williamsport, Pa.; George Dengler, Reading, Pa.; C. W. Habecker, Lebanon, Pa.

George Force, Jersey City, N. J.; Iseman & Colletta, Parisian Cycle Co.; M. Rappaport, Johnson, Esterick & Johnson, J. F. Blackman, all of the Bronx section, this city; Kings Highway Electric Co., E. R. Wagenortt, J. Colaiccio, Trotta Bros., A. Freeman, Andrew Eckel, B. Slotnick, S. Slotnick, Victor Lind, J. Triebus, J. G. Fellinger, George Ashley, Ventrice Bros., Patchen Motorcycle Co., B. Robbins, S. Litman, George Lewis, Bob Brazenor, all of Brooklyn, and H. Sharp, Baer Bros., I. Feinstein, Stern Bros., E. Lauriti, Manhattan.

THE CHICAGO "GRIND"

CHICAGO, Ill., Dec. 11.—Although it has been figured out that a six-day race for this city during this winter was outside of the question, Paddy Harmon and others that have been associated with two past "grinds" run in this city, one at the Stockyards and the other at the Coliseum, are trying to stage a race following that in New York. Harmon is negotiating with John M. Chapman, the Newark, promoter, for riders.

JOBBERS DEFINE A JOBBER

Must Travel Men, Issue Catalog and Conduct General Wholesale Business—Institute Initiation Fee

NEW YORK, Dec. 9.—The special meeting of the Cycle Jobbers' Association of America at the Prince George, Thursday afternoon, brought forth about 40 jobbers from all parts of the country. A general discussion of the ways and means of cooperating to the fullest extent with the United Cycle Trade Directorate was indulged in, and many other matters appertaining to the jobbing trade were discussed.

The biggest thing accomplished was the decision to divide the work of getting out the monthly bulletin which the jobbers have inaugurated. The first issue was edited by Keyser Fry, of the Reading Cycle Co., and the next issue will be gotten out by John Henry, of the Vim Cycle Hardware Co. The February issue will be edited by "Doc" Owen, of Coggins & Owen, and the March issue by H. P. Hansen, of the Chicago Cycle Supply Co.

Following the members' meeting, the Board of Directors of the Jobbers' Association met and decided to establish an initiation fee of $25 for incoming members and retain the regular dues of $10 annually.

Perhaps the biggest thing put through at the meeting of the directors of the Jobbers' Association was the definition of the jobber by the body itself. As defined by the Jobbers' Association, a cycle man, to be included in their number, must be one who travels men on the road, issues a catalog and does a wholesale business generally.

The next meeting of the Board of Directors was called for Wednesday, January 10, at 6 p. m., at the Hotel Astor, following the meeting of the United Cycle Trade Directorate, called for 2 p. m. at the office of the Directorate, 373 Broadway, New York.

A VETERAN DEALER

Worsham, San Diego Dealer, a Real Old Timer in the Cycle Field

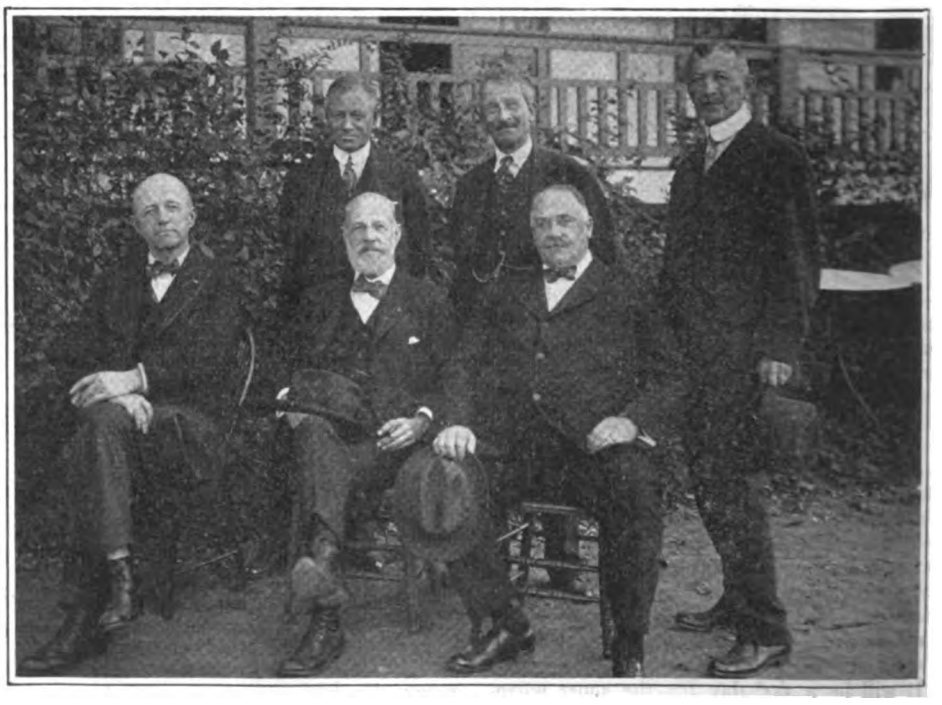
SAN DIEGO, Cal., Dec. 10.—C. M. Worsham, proprietor of the Motorcycle & Bicycle Exchange, 1225 Market street, lays claim to being a real old-timer in the cycling field. Back in 1890 he rode an old 52-inch Light Champion from Peoria, Ill., to Pipestone, Minn., a distance of 750 miles at an average of 57 miles daily.

Until recently his establishment was an exclusive bicycle store, but he has taken from Hopkins & Alzina, Reading Standard Coast distributors, the agency for that make of motorcycle. He handles the Rambler bicycle and reports a thriving business in both new machines and in repairing. Worsham reports a tendency to the lighter bicycle models and has disposed of a number of them.

MITTEN ARRIVES VIA TRAIN

NEWARK, N. J., Dec. 12.—Worth Mitten, the Davenport cyclist, who started to ride, walk or take the train from his Iowa home to the scene of the six-day race next week, arrived here Saturday, after having accomplished all he set out to do. Mitten left Davenport, Saturday, Dec. 2, and after riding to Pittsburgh, with 750 miles covered in seven days, decided to get to this city in a hurry, so he boarded a train. Mitten reported the roads in bad shape owing to rain and snow, and said that he was in great shape for the coming grind.

SOME OLD-TIME CYCLE RACING CHAMPIONS



At a Recent Meeting of the Hartford Wheel Club Veteran Speed Merchants Were on Hand. Standing, Left to Right, D. G. Post, John W. Wetmore and Joe Goodman; Sitting, Left to Right, P. Davis, Oakey, Cal.; George Pope and George Hendee

Chatter, Chin, Comment

By E. F. HALLOCK

Some Observations on Our Powers of Observation.

ARE we motorcycle riders less observant than other folk? We are accused—at least I know that I have been accused many times—of "looping it up" through districts just teeming with points of interest without taking the trouble to open our eyes and gather in what to other folk would be scenic or historic features well worth while.

The matter has been brought to my attention at this time by that little travel story by Friend Pugsley in which he captioned as a Yale College building one of the public buildings of New Haven, but whether it was the Post Office or the Public Library I cannot say. At any rate, his caption brought forth a letter from Rider Alling, of New Haven, who recognized the building as the New Haven post office; and now eight New Haven boys come through and say that both Pugsley and Alling erred. They claim that the building in question is the Public Library.

Well no matter which it is, that building has served to show me that motorcycle riders are, and are not, keenly observant; which paradox is explained by pointing out that the identity of the building is still to be cleared up to the satisfaction of all hands, yet the discussion it has aroused has proved beyond cavil that those riders who read **Motor Cycle Illustrated** are keen enough to detect even so slight an error as a mistaken identity of this sort.

I am going to ride up to New Haven and observe that building myself in a couple of weeks and I hope that in the meantime it will not have changed into the morgue or the pen.

The Girl in the Saddle—She Is Not Out of Her Sphere.

MY friend and side kick, Elliot Holton, raised a debatable point when he forged that "link" about the advisability of women riding, a week or so ago.

In the face of so remarkable a performance as the Van Buren sisters made when they did the transcontinental act on their Indians, he discounts the girl's ability to control a motorcycle just because Mrs. Holton was unfortunate enough to misjudge her distance by a couple of inches which resulted in an upset Holton family.

Friend Holton forgets that whereas his girlie has had one little mishap, which after all did not amount to much, he probably has had fifty, any one of which equaled her fault in magnitude. I remember myself some buckled rear fork stays he received early this season as a result of using his stand as a sprag when attempting to climb a steep and rugged hill.

It will be a sad day for the sport when we admit that the woman's place is in the sidecar and never in the saddle. Not all girls, of course, are constitutionally strong enough to deal with the heavyweight solo machine; but with sidecar attached the motorcycle is, if anything, easier to operate than the average automobile; and women automobile drivers are legion.

From an experience gained over the past season with Mrs. Hallock in the saddle of my Indian and Rogers combination, I am going to take a stand diametrically opposite Holton's. I have found the "missus" far less prone to take chances and to speed and at the same time more willing to show the mechanism full consideration than I have been. When anything has broken, I have been in the saddle and caused the trouble. With the exception of a puncture or two—and even these some passing "gallant" in motorcycle costume has fixed up when I have not been along—she has had not the slightest trouble. And here's hoping she never will.

Here's a Source of Carbon Not Generally Recognized.

REVERTING once again to the question of carbon, we know that much of the deposit results from a superabundance of lubricant or the use of oil of inferior quality; the remainder is generally attributed to an over rich mixture, there not being a sufficient quantity of oxygen present in the charge to consume all of the hydrocarbon. The result is the formation of "soot" just as a fire smokes when there is not enough air present for the complete combustion of the wood.

But there is another possible source of carbon which is rarely if ever considered, yet the conditions applying in the motorcycle motor are just right for it to get in its good work.

It is a fact that if a hydrocarbon in the liquid state is brought into contact with a highly heated surface, instead of simply being evaporated or volatilized, it undergoes a chemical change known as "cracking." The cracking results in the production of two or more lighter hydrocarbons and this change is accompanied by the liberation of a certain amount of free carbon which has no place in the new compounds which have been set up.

If now we take the ordinary carbureter, we find that it does not completely vaporize the fuel for the reason that the evaporation of a certain proportion of the fuel brings down the temperature to a point where the entering air is "saturated" and cannot take up any more of the gasoline; the remainder of the fuel enters the combustion chamber in the shape of small globules of liquid gasoline to be precipitated on the hot walls of the cylinder and partly vaporized and partly "cracked" with the liberation of a certain amount of free carbon.

The remedy for the condition is obvious. If heat is supplied to the carbureter or to the inlet manifold in sufficient quantity to insure the full vaporization of the entering gas without, however, the heating apparatus being maintained sufficiently hot to cause "cracking" of the fuel before it enters the cylinder, it is obvious that no carbon can result from this source since the original compound is not broken up.

Just for the purpose of experimenting along these and other lines, I am having my "winter machine," which is a big twin of ancient vintage and make now off the market, fixed up for use as an experimental model.

Setting at Rest Rumors of F. A. M. List Exploitation

REGARDING the exploitation of the F. A. M. membership list which, fancied or otherwise, has loomed up in the minds of some dealers hereabouts as an evil striking at the very vitals of their business, I have been assured by Secretary-Treasurer Gibson of the F. A. M. that the names of members have not been furnished to trade folk during the past two years.

It seems that at the Denver convention of the F. A. M. in 1913 permission was officially given to the secretary to furnish the names of members to folks in the trade and this was done on one or two occasions; it was discontinued all of two years ago.

It is well that the practice has been discontinued; it is well also that the matter has been aired for it clean knocks the bottom out of the argument which many dealers advance for withholding their support from the national riders' organization.

By way of emphasizing Secretary Gibson's assertion that the lists are not sold or loaned to cut price houses for exploitation, I might add that during all the time that I have been an F. A. M. member never once—until this year when I registered my motorcycle in New York State—have I received a cut price catalog.

No doubt it's from the State registration bureaus that the names are obtained by the cut rate houses; but our little old F. A. M. gets blamed for it just the same.

A Little Sermon on "Practicing What We Preach."

BEFORE I wander too far away from the subject of the lady rider, I want to stop up long enough to pass out my compliments to Mr. H. G. Alexander, president of the Cleveland Motorcycle Mfg. Co., which produces the Cleveland lightweight. Not only is Mr. Alexander himself a keen Cleveland enthusiast, but Mrs. Alexander also rides one of the little machines habitually.

The Alexanders make use of their mounts chiefly as a ready means of getting to and from the golf links and for a 40 or 50 mile Saturday afternoon outing; but Mrs. Alexander also uses the machine on shopping trips and even the traffic does not rattle her.

The lightweight is undoubtedly the machine for the solo lady rider and the example set by Mrs. Alexander cannot fail to stimulate interest in this direction. At the same time other trade folk deeply interested in the sale of the motorcycle will do well to follow the example set by Mr. Alexander.

The automobile is alluring, when we can afford it, but it must not be forgotten that to preach motorcycle and ride automobile is inconsistent to say the least and cannot fail to reflect on the number of motorcycles sold.

YOUR WINDOWS are the mirrors that reflect the character of your store.

They will either make patrons and profits for you or lose them.

Right now—when the holiday crowds are studying the shop-windows—is the time for you to increase the prestige of your store by displaying the Columbia bicycle.

A Columbia in your window is a trade magnet.

It is the acknowledged standard of the world—established by thirty-nine years of service.

More people know the Columbia—more people have ridden it—than any other bicycle.

Nation-wide advertising is bringing it to the attention of more people than ever before.

To display the Columbia means an immediate increase in your sales.

Your territory may still be open for the complete Columbia line.

Telegraph your orders—get prompt Columbia service.

(Continued from page 30)

and Illinois. He found the dealers in good fettle, and signed up a number for 1917. Whipple, the Motorcycle Man, who recently took the Thor agency for the West Side, has appointed a subagent, Koslow Bros., who are located at West Chicago avenue and Kedzie. They have received their Giant Thor demonstrator and are going right after business. Fuerst said that many of the dealers he has called on recently have received orders for spring delivery.

The Edwards-Crist Mfg. Company, which has three Indian branches in Cook county, north, east and south, is considering adding a couple more. If they are placed, they will be in the northwest and southwest. The growth of the territory has been rapid enough to indicate the advantage of some additional outlets.

R. C. Crist is improving his quarters on South Michigan avenue by the construction of some additional bins in the storage room. The Excelsior-Henderson dealer has stocked up heavily on practically all lines of parts and supplies, and when the new storage facilities are completed will be in fine shape for the season. Crist has the wholesale agency for the Pullman sidecar for four states, and expects to move a carload to dealers as soon as the manufacturers are able to make shipment. Indicating that retail motorcycle business is far from dead, he has already sold half of the carload of Hendersons which he received a short time ago.

Two Goodyear Pointers on Vulcanizing

TO CUT FABRIC ON BIAS

A WET knife and a quick slice across the fabric is a better method of cutting than the usual method of cutting with shears. In the Goodyear tire repair school a straight-edge is used with blocks that have 45° edges nailed to either end. In cutting one end is evened up against the edge of the table and a perfect 45° cutting angle secured. The holland strips after the gum or fabric is peeled off are soaked until they are soft. After being dried they make excellent gasoline rags.

REPLACING OLD VALVE-STEMS

THE most satisfactory results can be obtained by forcing the old valve-stem back inside of the tube and cutting a small hole about a foot from the valve hole, through which to draw it out. Insert the new valve-stem through the new hole, vulcanizing the hole shut, and bring the new valve up through the original valve hole. This prevents the fabric in the valve patch from being ruptured and strained, and will always hold the valve-stem secure.

ROWND SELLS TO POLICE

LONG BEACH, Cal.—B. E. Rownd, Long Beach Henderson rider and agent, has no quarrel with the speed cops. He took the Long Beach agency for the machine from the Henderson Motorcycle Sales Corporation on Nov. 11, and within 10 days had placed two of the 1917 models with members of the local police force.

Varied Activities of the Dealers

AFTERMATH OF THE INDIAN CONVENTION

Stimulating Talks by Prominent Factory Men and Retailers Marked Meeting of Wigwamites During New York Show

NEW YORK.—Among the prominent points brought out by factory speakers at the recent Indian Dealers' Convention in the Hotel Breslin during the Madison Square Garden Show were the improvements made at the plant of the Hendee Manufacturing Company by General Manager F. J. Weschler and the statement that the Indian bicycle was not in competition with the jobbing wheel by Sales Manager E. M. Jackson.

In his speech, which opened the convention, Mr. Weschler dwelt also upon the proposed plans of the company for the new season. He spoke of the future of the business as extremely bright, and referred at length to the shipment details for bicycles and other goods. He emphasized the parcelcar in commercial sales.

Mr. Jackson, in addition to stating that the Indian bicycle was not competing with the jobbing wheel, stated that it had the same high quality as the Indian motorcycle. He spoke on the provisions made to care for the dealers this season and dilated upon the big sales possibilities of 1917.

The Hendee sales manager was followed by M. E. Toepel, of the Splitdorf forces, who addressed the dealers on the Dixie magneto and Mag-Generator. He also invited the asking of questions and answered many. A. W. Lamson, of the Witherbee Igniter Company, addressed the assembly on the care of the storage battery. A beefsteak luncheon was then served.

In the afternoon, J. B. McNaughton, heading the Indian Dealers' Department, spoke on the scope and aims of this branch of the company's activities. He was followed by Advertising Manager J. A. Priest, whose subjects were the various advertising campaigns slated for the season, the distribution of sales-aids to the dealer and other matters of interest in his department.

George Sherman followed with a series of novel means of getting prospects and making them into customers. He gave a fine boost talk to the audience. The dealers were then invited to talk, the first one up being Tommy Butler, formerly on the Pacific Coast. Butler spoke of conditions in his old territory and how they were met. He followed this by some interesting sales arguments.

George S. Maslen, of Philadelphia, followed with a live wire talk on the direct mail order proposition, as well as how he had got riders to secure prospects for him. B. A. Swenson then stated the value of classified advertising in making sales, and said that he had been a consistent user of this method for several years. He urged co-operation in all lines of the Indian trade.

Clark Saunders and Howard A. French followed with general talks on the outlook and with boosts for the game. A number of other dealers also made brief addresses.

FREE ADJUSTMENT SERVICE

DALLAS, Tex.—George Hoehn, Smith Motor Wheel dealer in Dallas, suggests that agents will find it a good proposition to set aside a day every two or three months for free inspection of the Motor Wheels used by their customers. In addition to impressing the patron with the service idea, the plan brings him into the store and enables the dealer to show him other goods. Agent Hoehrn sends out a special postal from time to time relative to the free inspection, and inviting Motor Wheel users to come in and profit by his free service scheme.

CLEVELAND IN BRONX

Gene Coughlin & Co. Takes on Two-Stroke Lightweight for 1917

BRONX, N. Y., Dec. 11.—Gene Coughlin & Company, of 922 Washington avenue, have taken on the Cleveland for this borough for the 1917 season. This lightweight machine is to be handled in Bronx County in addition to the four-cylinder Henderson, for which the firm has already the county distribution rights.

The members of the firm of Coughlin & Company felt that there was an excellent field in their territory for the little two-stroke worm-driven machine and accordingly saw the distribution representative, the Audubon Motorcycle Garage, of 4192 Broadway, New York. The contract was signed during the New York Show, which closed last Saturday.

VAN FOR HARDWARE DELIVERIES

LOUISVILLE, Ky.—The Bomar-Summers Hardware Co. is using to advantage an Indian motocycle and sidevan in making deliveries of light hardware, especially to carpenters out on jobs at a disance from the downtown district.

TEN FLYERS FOR HONOLULU

MILWAUKEE, Wis.—The A. O. Smith Corp. has just received a wireless message from the Shuman Carriage Co., which handles the Motor Wheel in Honolulu, H. I., calling for ten Smith Flyers for immediate delivery. This company has handled Smith Motor Wheels with success for the past year and a half. The company states that roads in and about Honolulu are ideal for both the Motor Wheel, as a bicycle attachment, and the Smith Flyer.

EMBLEM LIGHTWEIGHTS IN DEMAND

KANSAS CITY, Mo., Dec. 6.—Fred Ames, agent for the Emblem motorcycles and bicycles at Kansas City, has sold a number of lightweight machines recently and the little blue fellows have been attracting quite a bit of attention on the streets of Kansas City.

FOR HARLEY-DAVIDSON DEALERS

MILWAUKEE, Wis.—With a view of aiding Harley-Davidson dealers to obtain their share of Christmas bicycle sales, the Harley-Davidson Motor Co. has prepared three illustrated layouts for distribution to its representatives. The company announces that it will supply these attractive cuts, for use in connection with newspaper advertising, without charge. All that is asked is that the dealer who uses one of the plates shall forward a clipping from the newspaper in which it appears to the Harley-Davidson folk.

BUECHEL ACTED AS JUDGE

LOUISVILLE, Ky.—George Buechel, of the Sutcliffe Co., one of the best auhorities in the city on sports, acted as one of the judges in the recent cross country run of the Y. M. H. A., in which teams from every local athletic club took part.

CYCLEMOTOR AGENTS ACTIVE

ROCHESTER, N. Y.—The Cyclemotor Corp. has just received from H. T. Pickard, of Rowley, Mass., a letter stating that his Cyclemotor demonstration has attracted attention beyond all his expectations, and that he is lining up orders for spring delivery. Pickard was recently appointed by the Hub Cycle Co., Cyclemotor distributors.

The Garden City Cyclery, of Missoula, Mont., reports that the first Cyclemotor of a shipment recently received was sold in less than two hours after the machines reached the agency. The Missoula firm reports that cold weather seems to have no effect on the sales interest in the machine, and has placed an order for three more Cyclemotors of the double bar type to be delivered at once by express.

LOUISVILLE (KY.) TRADE NOTES

R. F. Klingman has filed notice with the county clerk, affirming ownership of the Peerless Bicycle Co., 317 South Third street. Mr. Klingman does a nice business in used motorcycles along with his new and old bicycle business.

The Sutcliffe Company has mailed out a 100-page catalogue of bicycles, sporting goods, etc., to its trade, calling attention to its Christmas lines.

The firm of Kline Brothers, Harley-Davidson agents ,have arranged to carry the Harley-Davidson bicycle, and are endeavoring to get their Christmas supply.

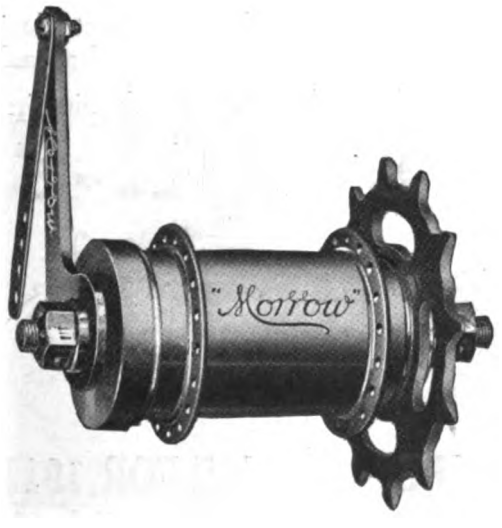
"Morrow" More Than A Brake

In its capacity of the highest example of braking control that can be applied to a bicycle, the MORROW COASTER BRAKE performs a very important duty.

By its presence on a bicycle it injects into the sales argument of the dealer an element of certainty, of surety, that reacts with strong emphasis upon the prospective buyer.

MORROW control means safety. Safety is what the buyer demands first, last and all the time in his mount. And NO brake can so strongly emphasize the smoothness, ease of handling and absolute safety of the bicycle as can the MORROW.



Thus the MORROW is more than a brake. It is the compelling force that sells the bicycle—that says "You are sure, you are safe while I, the reliable coaster brake, am on your machine."

Write for MORROW literature. It will interest you.

EXPECT TO TRIPLE 1916 SALES

KANSAS CITY, Mo., Dec. 6.—Clarence Newby, of the firm of Newby Brothers, agent for the Henderson at Kansas City, is extremely optimistic regarding the outlook for the business on the four-cylinder machines during the coming year. Mr. Newby says that their output will almost triple the number of Hendersons sold last year.

CROCKER'S CARLOAD SOLD

KANSAS CITY, Mo., Dec. 6.—Albert Crocker, manager of the Indian Motorcycle Sales Company, of Kansas City, recently received a carload of the 1917 Indians. Mr. Crocker has delivered approximately half of the shipment to customers and others he is storing for the remainder of the winter, all being marked "sold."

WELL, WHAT ABOUT IT?

LOUISVILLE, Ky.—Motorcycle riders and dealers showed much interest in the following item from the pen of Luke McLuke, the humorist on the Cincinnati *Enquirer*. Several of the boys are preserving the clipping, which is to be found glued up in the shops.

"If this Suffrage business keeps on progressing, it won't be long until the girls will drive the motorcycles and the men will have to occupy the seat in the rear."

AGENCY AND MESSENGER SERVICE

MUSKOGEE, Okla.—C. R. Hingey, who recently was a member of the Tulsa police department's motorcycle squad, has opened a Harley-Davidson agency at 204 Central avenue. In connection with the agency Hingey is operating a messenger service station, the messengers riding Harley-Davidson machines.

PARDON'S HOLIDAY INDUCEMENT

LOUISVILLE, Ky.—Henry F. Pardon, of Owensboro, is a firm believer in the idea that there are big possibilities in the holiday trade. He is announcing a 10 per cent. reduction on bicycles for December. Pardon has also adopted the plan of listing the used machines that he has for sale in his newspaper advertising.

FLYERS FOR XMAS TRADE

TOLEDO, O.—The Oberwegner Motor Co. has placed an order for five Smith Flyers, to be delivered before Christmas, with the idea that the latest product of the Smith Corporation is going to make a strong holiday appeal to boys.

WHEELING RIDERS AID POLICE

WHEELING, W. Va.—J. Landon Bier has been re-elected president of the Wheeling M. C. H. A. Brady is vice-president; Frank Heidger, secretary; John Weidner, treasurer; Dave Michaels, captain; Paul Dangel, first lieutenant, and William McEwan, second lieutenant.

In response to a request from Chief of Police Leyland, all members of the Wheeling M. C. have been sworn in as special officers to assist in curbing automobile speedsters.

MOTORCYCLE POLO POSTPONED

WHEELING, W. Va.—The motorcycle polo game that was to have been held at Belle Isle, under the auspices of the Wheeling M. C., has been postponed owing to a lack of talent. The club is now laying plans for several endurance runs to be held during 1917.

OHIO'S ROAD IMPROVEMENTS

COLUMBUS, Ohio.—The State Highway Commission will have awarded contracts for 610 miles of road improvement, at an estimated cost of $8,000,000 during the year 1916, when on Dec. 21 contracts for 38 miles of improvement will be let. The awards of Dec. 21 are the last for the year, and embrace roads in Brown, Butler, Clinton, Fayette, Hamilton, Harrison, Jefferson and Noble counties.

GOOD ROADS WORKER DIES

JAMESTOWN, O.—Jesse Taylor, president of the Ohio Good Roads Federation and one of the most consistent workers in the interest of good roads in the Middle West, died at his home here a few days ago. He was editor and publisher of "Better Roads and Streets."

WANTS "DIMMERS" USED

LEXINGTON, Ky.—Commissioner Land is endeavoring to have an ordinance passed forcing all operators of motor vehicles to use dimmers on their headlights while operating inside of the corporate limits of the city.

Prest-O-Lite for Motorcycles

Safe, Brilliant, Reliable Light

Every motorcycle rider needs safe, brilliant, dependable light just as much as he needs fuel. Prest-O-Lite has **proved** itself to be the only reliable, economical, efficient light for motorcycles.

Riders everywhere prefer Prest-O-Lite—no uncertainties—will not fail you in emergencies. It gives perfect riding light, flooding the road far ahead with penetrating light; is simple and trouble proof, and is not affected in the least by bumps and vibrations. Prest-O-Lite is as sturdy as the motorcycle itself.

Perfect Light at Low Cost

From a financial standpoint, Prest-O-Lite costs less to buy and less to use. No attention is needed but what the rider can give easily and inexpensively.

Due to its simplicity, economy and freedom from trouble, Prest-O-Lite is used by experienced riders everywhere—used by more riders than all other lighting systems combined.

On any make of motorcycle you can get Prest-O-Lite. Ask your dealer about it, or write for full details of motorcycle lighting.

DEALERS: Meeting the brisk demand for Prest-O-Lite gives the live dealer a profitable, growing business. If you are not "cashing in" on the Prest-O-Lite dealer proposition, write at once for details.

JOBBERS TO AID DEALERS' ASSOCIATION

Have Been Invited to Attend Session of Hamilton Motorcycle and Bicycle Dealers' Body Jan. 9 for Purpose of Co-operation

HAMILTON, Ont.—The next meeting of the Hamilton Motorcycle and Bicycle Dealers' Association will be held in the New Commercial Hotel, Hamilton, on Tuesday evening, January 9. Invitations have been issued to two Canadian jobbers to attend this session for the purpose of giving the local storekeepers suggestions of trade value.

N. S. Ferries, representing the Harley-Davidson motorcycle and Brantford bicycle in Hamilton, has just been made president of the Hamilton association for the fourth consecutive year. J. R. Dixon, of the Dixon Sporting Goods Company, has also been re-elected secretary-treasurer of the association.

In pointing out that practically the whole trade of Hamilton supports the association in an active manner, President Ferries declares that the various dealers have learned to place confidence in each other, and that this fact is the secret of the organization's continued success.

17 STATES IN LINE

Agree to Reciprocity with Ontario Regarding Motor Licenses

TORONTO, Ont.—According to an announcement by the Ontario Department of Highways, 17 States of the American Union and the District of Columbia have made arrangements with Ontario for the inter-use of motorcycle licenses by tourists. In every instance, the privilege has been extended to visiting riders for a stay not exceeding 21 days. The States which have entered into the reciprocal agreement are as follows: New York, Maine, Vermont, Kentucky, Connecticut, Maryland, Pennsylvania, Ohio, Michigan, Wisconsin, Minnesota, Indiana, Massachusetts, Missouri, Iowa, West Virginia and Tennessee.

Thanks to the arrangements already made, an Ontario motorcyclist can travel from Maine to Minnesota, and as for south as Maryland, West Virginia, Kentucky and Missouri, without taking out a local license—with one exception. The latter is the case of Illinois, in which State an Ontario license is not yet recognized.

LONDON BULLETINS

Local Club Hampered by Munitions Work, but Dealers Are Active

LONDON, Ont.—No meeting of the London Motorcycle Club has been held for three months. The reason for this is that it is practically impossible for all members to gather at one time because of the munition work in which nearly all are engaged. In the manufacture of munitions, the workers are called upon to work in night shifts for two weeks, and then back to day schedules for a fortnight. Secretary Keen reports, however, that the club members still possess the club spirit.

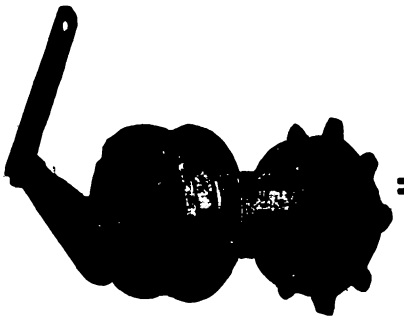
The London Motorcycle and Bicycle Dealers' Association will probably resume the holding of business meetings in January. Considerable missionary work has yet to be done in the local trade as some of the local agents have failed to realize the value of co-operative effort.

George Wenige, manager of the Bicycle & Motor Sales Company, London, has been carrying on a Christmas bicycle campaign single-handed. One of his recent coups was the sale of four Brantford bicycles to one customer for Christmas delivery.

DAYTON DEALER IN TORONTO

TORONTO, Ont.—The Davis Sewing Machine Company has secured a sales representative in the city of Toronto for the Dayton motorcycle. The dealer is Charles R. Pepper, 350 Danforth avenue.

It is understood in local motorcycle circles that a West-end dealer will also secure the privilege of selling the Dayton.



Here's the Brake

It is going to be more in demand than ever this year. More people are interested in bicycling, more bicycles are being sold and more brakes are being equipped. Now is the time to send in your order for the famous

CORBIN

DUPLEX COASTER BRAKE

Bicyclists everywhere regard the Corbin Duplex as the standard brake equipment. It is easier to sell, because it has already gained the rider's confidence. Bicyclists are safe when they buy it and dealers are safe when they sell it. Its long service record has proved its reliability to the entire bicycling field.

All manufacturers of bicycles equip the Corbin Duplex when specified. Its presence on a bicycle is an added selling feature. Send on your order today.

A "CHECK-GATHERER" IN ARMY UNIFORM

Slick Stranger Offered to Help Motorcycle Agents Sell Motors to Uncle Sam and Then Borrowed Money; Paul Gott Got Him

PEORIA, Ill.—Joseph Adams, who states that he hails from Alabama, has just been taken into custody here as the result of some financial juggling by which he separated Paul Gott, local Harley-Davidson agent, from two checks, one for $12.75 and the other for $18.25. Adams has no money to back him up and has been knocking about the country in an army uniform.

One of his methods of keeping in funds was to present himself at a motorcycle agency, win the confidence of the proprietor and then obtain checks or cash on various pretexts. In most cases he represented himself to be a motorcycle agent for the United States Army, and by making all kinds of promises as to the number of machines he would enable the dealer to sell to the government, he found it possible to acquire considerable money.

Some of the Victims

Adams admits that his bookkeeping system is somewhat vague, but states that his records to date show cash or checks obtained from the following: The Indian motorcycle agency in Syracuse, N. Y., cashed one for $20; the Firestone tire agency in Detroit, $20; a motorcycle agency in Chattanooga, Tenn., cashed two, one for $25, and one for $10. The Indian Motorcycle agency in Jacksonville, Fla., stood for $25; the Harley-Davidson agency in Charleston, S. C., was also let in for $25; McNeal & Co., the Harley-Davidson agents in Norfolk, Va., listened to the siren song of the delayed pay check and cashed in for $30; the Indian agency at Harrisburg, Pa., $25, and the Harley-Davidson agencies in Akron, O., and St. Louis, Mo., each bewails $25.

Adams was originally a barber, served part of two terms as an enlisted man in the army, and also did a five-year "trick" in the United States penitentiary at Ft. Leavenworth, Kan. Adams is being held by the authorities in Peoria, but they admit that they are puzzled as to just how to handle this case. He may be tried in Peoria in connection with the Paul Gott matter, or he may be turned over to one of the other cities in which the police are wating for him.

KENTUCKY LICENSES

Will Hereafter Be Paid for on Full-Year Basis; a New Interpretation

LOUISVILLE, Ky., Dec. 13.—Motorists of Kentucky have just been notified of a new interpretation of the motor vehicle license law, which differs decidedly from that under which motor owners have been operating for two years.

The former interpretations placed the license fee on a pro rata basis for the number of months in the year from the time the license was applied for, many owners not taking out licenses until late in the spring and thereby not paying for weather in which they could not ride.

The latest interpretation of the law removes the pro rata basis, forcing the motorist to pay the full license fee whether the machine is operated or not. Both interpretations were given out by M. M. Logan, Attorney General of Kentucky, and have been the subject of considerable discussion. The motorcycle license is $5 per year, while the motor car license runs as high as $20 for the fifty horsepower auto.

H. L. Ramsey, Deputy Commissioner of Motor Vehicles, was in Louisville December 4 to 9, for the purpose of issuing licenses for 1917, and explaining the details of the law. According to Mr. Ramsey, a total of 1,591 motorcycles were registered in 1916 as compared with 1,406 in 1915.

BIG MOTOR WHEEL MILEAGE

TACOMA PARK, Wash.—Leslie E. Ferris, of Tacoma Park, reports that he has been using a Smith Motor Wheel a year and a half and has covered over 6,000 miles without trouble. He states that he gets about 100 miles to a gallon of gasoline, and that light snowfalls do not prevent him from using his outfit.

COAL FOR GOODYEAR EMPLOYES

AKRON, O.—Because of the coal shortage, which has made it impossible for many Goodyear employes to obtain sufficient fuel for their immediate needs, the Goodyear Tire & Rubber Co. is delivering coal to employes at cost. The company's plan is to continue this practice until the present shortage is relieved.

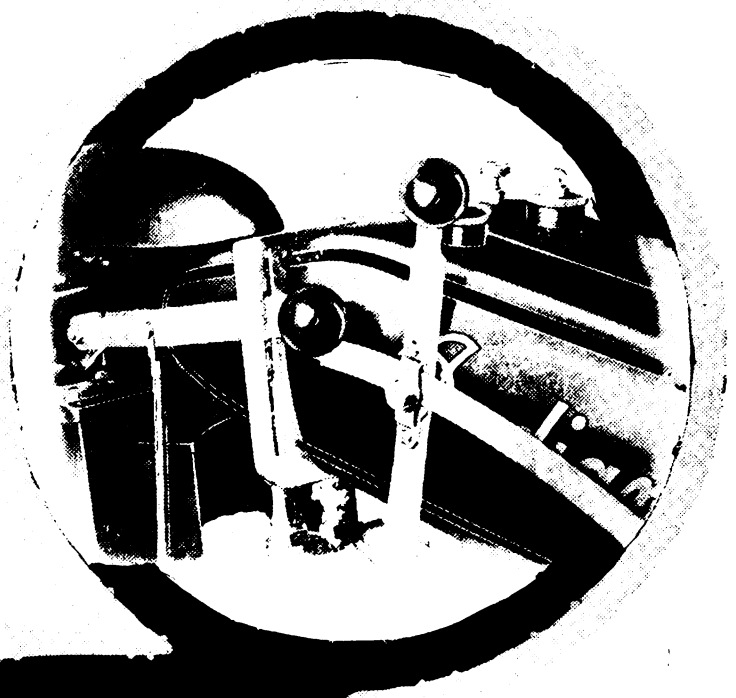
The 1917 *Indian* and the DEALER



This large Indian Gear Shift Lever with its new gate quadrant must not be confused with ordinary complicated shifting mechanism.

Its construction is extremely simple and sound—its action direct—its alignment permanent—its operation instantaneous and absolutely positive. One finger does the work of shifting, cutting out labor, lost motion, uncertainty. You can't overrun through the gears or run beyond full mesh.

It's an *Indian* feature with all the Indian thoroughness of advanced construction, quality, hardihood, and painstakingly thought out completeness.

Consider this and the Indian's other 1917 engineering masterpieces—refined *Powerplus Motor, Triple Stem Forks* with *Adjustable Handlebars,* 3½ gallon *Gasoline Tank, Webbed Frame,* and *Cradle Spring Frame*—and you will have an inkling of why Indian dealers are sending in record orders from everywhere.

Working shoulder to shoulder with us this year means *big business*—not a few scattering sales. We've got the goods and are prepared to talk turkey on a big scale. Are you in a receptive frame of mind?

Harley-Davidson Advertising for 1917—The Best Ever

OUR dealers know that Harley-Davidson advertising has been of tremendous help to them in selling Harley-Davidson products in the past—that Harley-Davidson advertising is effective and convincing—and that it has helped to create genuine confidence in the Harley-Davidson name.

Harley-Davidson advertising for 1917 will be the best ever. It will appeal to many millions, and will create actual buying interest in the minds of those who have never before evinced even passing interest in motorcycles.

We are out after *new riders*—to interest more *new blood* in the greatest sport on earth. That is our aim this season, for we have enough confidence in the 1917 Harley-Davidson products to feel that sales to experienced riders will almost take care of themselves.

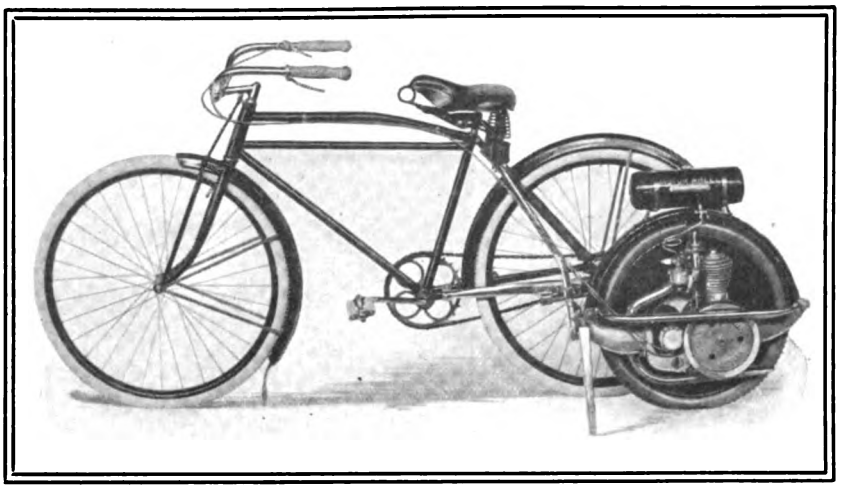
SMITH HOLIDAY SALES

ARE BREAKING ALL RECORDS



Christmas business with Smith Motor Wheels is setting a new record this year. Every bicycle rider wants a Smith. It's only a question of when he will have the price. The man, if he can't buy now, will save his money for one. The boy sees in Christmas an opportunity to get what he has longed for—a Smith Motor Wheel—and in many cases he gets what he wants.

"The limousines are stopping pretty regularly now," writes the Oberwegner Motor Company, Toledo, O., "and their owners say 'My boy won't be happy unless Santa brings him a Smith Flyer!'" Christmas trade is high class trade. Smith dealers are getting the cream of it, and are securing many new *permanent* customers, simply because they sell Smith Motor Wheels and Smith Flyers.

If you take the two Shows and the immense holiday business as any indication at all, you will agree that next season will be a bigger one than ever for Smith dealers. "Double the Business" will not only be a slogan, it will be a fact!

Any time of the year is a good time to start selling Smith Motor Wheels and Smith Flyers—they're all-year-'round sellers. No time is better than *now*. If you didn't get in on big Christmas business, make a New Year's Resolution to write us today about securing Smith representation for Nineteen Seventeen.

Here's a Merry Christmas and a Happy New Year to You.

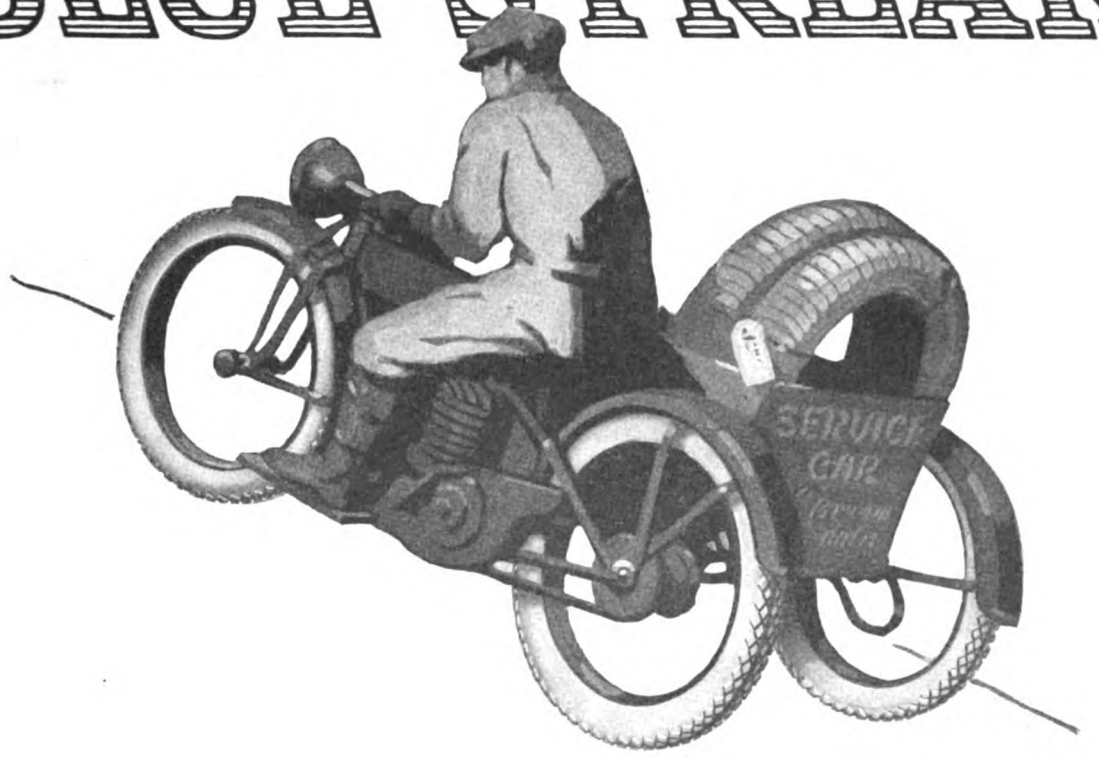
BLUE STREAKS



Tires That Help Sell Motorcycles

Goodyear Blue Streak Motorcycle Tires are standard equipment on the following motorcycles and side cars:

MOTORCYCLES

Dayton	Harley-Davidson
Excelsior	Reading-Standard
Indian	Henderson
Thor	Iver Johnson
Pope	Emblem

Militaire Autocycle

SIDE CARS:

Thos. Dunham Company
A. J. Hall Cycle & Mfg. Co.
Rogers Mfg. Company
Cygnet Rear Car Co.

Motorcycle manufacturers are doing everything in their power to make motorcycles easy for you to sell.

That is the reason they are putting Goodyear Blue Streak Motorcycle Tires on them.

They know that Goodyear Blue Streaks add prestige to any machine because of their reputation for longer mileage, greater comfort and fewer tire lay-ups.

The adoption of Goodyear Blue Streaks as standard equipment on the motorcycles listed here is in thorough keeping with the many improvements added to these machines from year to year.

The best tires for the best machines is the rule of the day.

If Goodyear Blue Streak Motorcycle Tires are considered by the manufacturers to add prestige to their motorcycles, surely these fine tires will add to your reputation as a dealer if you recommend and sell them.

Over 10,000,000 people are being told every month about the high quality of Goodyear Blue Streak Motorcycle Tires.

The Spirit of Christmas

THE Holiday season is here bringing with it the spirit of Christmas—the spirit of good cheer and good-will. Let us set aside our business care and ambition and join hearts and hands in making the world more joyous.

And so to our friends in the trade, whose friendship to us has made our years of business life a joy and pleasure, we pass the cup of Christmas spirit which intoxicates all who quaff from it with the joy of giving and serving.

May the coming year bring us all into a stronger friendship, a better understanding of and a deeper sympathy with each other, and may we all in daily practice accomplish more fully our business ideal:—

"He profits most who serves best."

This is the toast that we give you for the New Year.

Wishing You A Very Merry Christmas

ARMY WANTS 200 MORE MOTORCYCLES

Latest Request for Bids from War Department Asks for 100 Fitted with Sidecars and 100 with Tandems—May Supersede Bids of Last Week

NEW YORK, Dec. 19.—Once again the War Department at Washington has asked for bids on 200 motorcycles fully equipped, 100 of which are to be equipped with sidecars.

The remaining 100 machines are to be fitted with tandem attachments for carrying a second passenger. As with all the other army bids, that have been asked for, the equipment includes a Prest-O-Lite tank with head light, tail light and necessary piping and a supplementary oil lamp; a mechanical warning signal of Seiss make, or its equal in quality, a Corbin-Brown speedometer, or its equal in quality, and a large assortment of parts and tools.

The bids are to be opened on Friday of this week at ten o'clock in the office of the Quartermaster's Department in the Army Building on Whitehall Street.

While it is not so stated on the blanks, issued in the call for the bids, from folks in the know it is understood that this call is to supersede the one issued for a similar number of machines last week. It is stated that the bids put in last week are all to be discarded for the reason that some mistake was made in drawing up the specifications of the machines, which makes the bids worthless as a matter of course.

These machines are being bought out of the appropriation of $620,000 which was recently asked for by the War Department from Congress, and it is expected that the orders for machines for the army will now follow along one after the other in rapid succession.

These orders have come, not alone as a result of the work the motorcycle has done on the Mexican border, but also in recognition of the fact that it played a highly important part when the call came for the mobilization of the National Guard troops in practically every State in the Union.

It is stated by army officials that the part it played in this service alone was really wonderful, and so impressed the army officials with its usefulness, that it is now considered indispensable for military service.

SOME BUSINESS!

Webber Sells 16 Indians and Cygnets in Single Day

NEW YORK, Dec. 19.—Calvan R. Webber, manager of the motorcycle and bicycle department of Baker, Murray & Imbrie, Inc., the metropolitan Indian distributors, closed sales for 16 machines yesterday, seven of which are for export.

Webber is proudest of a sale of four 1917 Powerplus Indians, fitted with special Cygnet rearcars, to the Stock Ticker Quotation Co., which operates the ticker service throughout the city. These machines are to be used for delivering ticker tapes throughout Greater New York and the officials of the company are sanguine that the Indian Cygnet outfit is exactly what they need for work of this sort.

For Fire Department

Another sale which pleases Webber mightily was that of four Powerplus machines to the New York Fire Department. They are to be used in fire prevention service and are expected to give a good account of themselves in this work.

Another interesting sale was to the Rockefeller Foundation, of an Indian with sidecar which is to be shipped to Siam. Two Featherweight machines were sold for shipment to Chile, and another for export to Hong Kong, while a Mexican firm in Vera Cruz took a 1917 Powerplus.

Besides these sales Webber made one to Marx Arnheim & Co., perhaps the largest men's clothing firm in New York. They took an Indian with special Cygnet body for delivery purposes. He also sold two machines at retail, one for attachment to a Cygnet limousine, which is being used by a moving picture actress in and around New York.

DELTA IN CANADA

Humphery Concern Arranges to Handle Lamp Line in Toronto

TORONTO, Ontario.—The Humphrey Bicycle & Motor Co., Toronto, has contracted to distribute the bicycle lighting systems of the Delta Electric Co., Marion, Ind. A. E. Humphrey recently ordered a quantity of dry-cell lamps from this company.

Humphrey has also placed an order for Mesinger saddles for immediate delivery.

PROVIDENCE DEBT

Jackson Reports That National Meet Loss Has Been Wiped Out

SPRINGFIELD, Mass., Dec. 18.—E. M. Jackson, who at the Atlantic City meeting of the Motorcycle and Allied Trades Association was made chairman of the Providence F. A. M. Funds Committee to raise enough funds to clear off the debt incurred at the Providence F. A. M. meet, reports that the debt has now been wiped out and that all papers in connection with the same have been filed with President Shelby A. Falor, at Akron, O.

The total amount of the claim, according to Jackson, was $2,070.83 and of this amount $367 was raised by advertising in the F. A. M. meet program, and the balance, $1,703.83, by subscription from folks in the trade.

GROSS SIGNS UP WITH HENDERSON

DAYTON, O.—Harry Gross has just signed up a contract for the sale of Henderson motorcycles in this territory. The new four-cylinder demonstrator has been received and is on display at the sales rooms at 41 South St. Clair street.

Just As We Go To Press

DELIVERS TEETH

Big Philadelphia Dental Supply Co. Uses Thor

PHILADELPHIA, Pa., Dec. 19.—The Pioneer Motorcycle House, which is agent for the Thor, at 2123 North Broad street, has sold a 1917, three-speed Thor, fitted with Cygnet rear van, with special body, to the S. S. White Mfg. Co., of this city.

The S. S. White Dental Mfg. Co. is one of the representative dental manufacturing concerns of the country, and intends to use the Thor-Cygnet combination for delivery purposes in Philadelphia.

They have had the outfit in use for about a week. In Saturday's snow storm, even though the streets were slippery and the going hard, it made deliveries in record time.

This is not the first Thor-Cygnet combination in commercial use in Philadelphia, as there are several other outfits which have been used successfully for some time.

MORE SPEED

And Less Tax Provided by Quebec Legislature

QUEBEC, Que.—The Legislature of Quebec has adopted a measure which provides for the increase in the speed limits of the Province. The legal speed in cities and populated sections is now up to sixteen miles per hour instead of fourteen while the legal limit for speed in the open country is now twenty-five miles per hour. The former limit outside of cities was 18 miles, so that now the motorcyclists can travel in the cities almost as fast as they were formerly permitted to go in the country.

The Quebec Legislature has under consideration an amendment to the regulation which imposes a tax of $10 per year on a motorcycle owned within the Province. The proposed change provides for an annual tax of 50 cents per horse power on motorcycles and automobiles alike. In this case, a seven horse power motorcycle would be taxed only $3.50—a material reduction from the former arbitrary rate.

ATHERTON CONTEST

First Prize Goes to Henry Duksteen—Total Mileage Was 558.3

BUFFALO, N. Y.—W. F. Emerson, of the Buffalo Metal Goods Co., announces that Henry Duksteen, 412 Cherry street, New York City, won the prize of a bicycle which was put up for the New York show visitor, approximating most closely the mileage indicated by the three spinning wheels at the Atherton booth at the New York show.

The winner judged that the cyclometers would indicate 560 miles; C. A. Sawyer, Persons Mfg. Co., Worcester, and Louis P. Sattler, 510 E. 82nd street, New York City, took second and third prizes, respectively.

The wheels actually indicated 558.3 miles. Second prize is a pair of Vitalic tires, while third is an Atherton brake ready for installation.

COLORADO SPORTS

Hare and Hound Chase to Be Followed by Hill Climb

DENVER, Colo., Dec. 19.—According to present plans, motorcycle riders of Colorado Springs expect to hold a hill climb contest on New Year's day. Already a good deal of interest is putting in its appearance and a closely contested climb is looked forward to.

The recent hare and hound chase that was run in Colorado Springs served to awaken new interest in the motorcycle sport in that city. The race was over a 37-mile course, most of the way was rough going, and was won by Wilke, riding a Harley-Davidson machine. His time was 46 minutes and 20 seconds. Leaf, on a Harley-Davidson, came in 24 seconds behind the winner, while Beatty, another Harley-Davidson rider, finished the race just 15 seconds behind the second place man.

The race was won by Wilke from a field of 13 starters and he was hard pressed all the way as can be seen by the close finish.

The Colorado Springs riders are planning many similar events for the coming year. The dealers there are behind them and they see in them a means of increasing interest in the motorcycle.

CYGNET AT BAZAAR

Ogden Displays Military and Pleasure Rear Cars

NEW YORK CITY, Dec. 18.—At the main entrance of the preparedness bazzar which is being held at Grand Central Palace, New York City, the visitor is greeted by Leadley Ogden, General Sales Manager of the Cygnet Rear Co., of Buffalo, N. Y.

Ogden is there fully prepared with his machine gun outfit together with a pleasure type and a commercial van. The Cygnet car display has many visitors. Ogden is being assisted by George A. Ellis and "Wally" Stuart, of Baker, Murray & Imbrie, Inc., New York distributors of the Cygnet Rear Car.

CONEJOS RUBBER CO.

New Cincinnati Concern to Produce Rubber from Weeds

CINCINNATI, O.—A number of local men have formed the Conejos Rubber Co., with a capital stock of $100,000, for the purpose of manufacturing rubber from the root of a weed which grows in Colorado and other parts of the West. It is said that the rubber produced from this weed is equal in all respects to other rubber, and much is expected from the project.

MARVEL "NEWNESS"

Tube Vulcanizer and Adjustable Socket Wrench from Cleveland Co.

FROM The Marvel Accessories Mfg. Co., Cleveland, Ohio, comes a bit of "newness" of interest to the motorcycle rider. Perhaps the most interesting offering of the Marvel concern is the Marvel Vulcanizer for tube work, which is a more than ordinarily compact little tool that can be carried with ease in the tool kit.

The vulcanizer is an articulated clamp device made throughout of pressed steel, and so arranged that the hot plate can be firmly clamped down against the bearing plate with the tube interposed. The heat is supplied by a special heating unit made of cardboard impregnated with certain chemicals which give just sufficeint heat thoroughly to vulcanize the patch with never a danger of scorching the fully cured body of the tube.

The vulcanizer comes packed in a neat box with half a dozen heating units and half a dozen patches all ready for business. It sells for $1 and is handled by jobbers and dealers everywhere.

Also new in the Marvel line and of great interest to motorcycle folk and especially to repair men and dealers is the Marvel adjustable socket wrench. This tool, which is made with an adjustable jaw working somewhat like the chuck on a brace, is especially useful in getting at nuts located in "tight" corners—the cylinder holding down bolts, for instance. It sells for $4.

CHILE MARKET

Republic Export Manager Says American Goods Are Wanted

YOUNGSTOWN, O. — Recent news from Frank V. Springer, export manager of the Republic Rubber Co., who is in South America looking over the tire situation, is to the effect that business in Chile and Argentina is in splendid condition, promising much for the future of American interests there.

He says that the people in that part of the world are taking kindly to American tires, and especially to Republic tires, and that they offer the best market for American manufacturers. The Republic company has been experiencing a heavy business, employing 2,000 men, twice the number on its pay-roll last year.

BROOKLYN COMMISSIONER

Ellis Appoints Newbourg to Look After F. A. M. Affairs

NEW YORK, Dec. 18.—New York State Commissioner George A. Ellis has appointed C. Newbourg, of 1195 Bedford avenue, Brooklyn, N. Y., as local commissioner of Brooklyn, N. Y. The commission has noted Newbourg's good work of the past and knows he will do the F. A. M. a lot of good in Brooklyn.

Al George also has been appointed local commissioner for Albany, N. Y.

MEDALS FOR FINISHERS IN ELLIS' RUN

F. A. M. Commissioner Has Trade Behind Him on New Year's Eve Affair—Some New Details

NEW YORK, Dec. 19.—Having obtained assurance of whole-hearted support for his midnight run, which he is staging on New Year's Eve, December 31, George Ellis, State F. A. M. Commissioner, has decided to offer medals to all the participants who are able to finish the contest on schedule time.

A degree of interest attaches to Ellis' run from the fact that no one, not even Ellis himself, will know what the prizes are going to be until the contest is all over. Ellis is soliciting prize donations from motorcycle factories, accessory makers and local dealers, and asking that the donations be in order form, the orders being in sealed envelopes and not to be opened until it becomes time to award the prizes. At that time the envelopes will be opened and the winner will be given his choice, the next rider to take his choice, and so on down the line.

Trade Responding

The trade at large is responding splendidly to Ellis' call, and with nearly two weeks still to go it looks as if the "midnight frolic" is going to be the event of the metropolitan motorcycle season. Ellis has been promised the support of the Indian, Thor and Cleveland factories, as well as the Corbin Screw Corp., and practically all of the dealers in the metropolitan district are heart and soul in the movement.

In case no one is successful in reaching Poughkeepsie, the winner of the event will be the rider going the farthest distance, who, however, must have an affidavit signed by one or more persons. One must ride at least as far as Peekskill in order to be in the running.

In case of a tie, it will then be decided by the actual time, doing away with the three minutes allowed for the variation of watches. Two points will be deducted for each minute early, one point for each minute late.

Fifty Entrants

It is expected that about fifty red-blooded riders will enter, as it will take a "real rider" to stand the weather. There are to be some ladies also. Mrs. Ellis and Mrs. Wally Stuart will be on deck, along with Mrs. Terhune, of Hackensack, N. J.

Up to the present date there are fifteen entrants. The entry fee has been changed from $1 to $2. P. S. Kauffman and Jack Barmore of Yonkers have been appointed to designate the secret controls.

As was stated in the last issue of **Motor Cycle Illustrated,** the run is a scheduled time affair to be run in two divisions—one for lightweights, and the other for heavyweights. The course reaches from Columbus Circle, 59th street, New York, to Poughkeepsie and return. The distance is 150 miles and is to be covered by the lightweights in 11 hours, of which one is spent at lunch, while the heavyweight division is to cover the course in 8½ hours, 7½ of them spent in actual riding. The average rate for the lightweights figures out at 15 miles an hour, and 20 for the heavyweights.

Entry blanks are now out and can be had upon application to George Ellis, care of Baker, Murray & Imbrie, 10 Warren street, New York City, or any of the motorcycle dealers in the metropolitan district.

SEIBERLING PRESIDENT

Goodyear Vice President Heads Akron University Club

AKRON, O.—At the recent meeting of the Akron University Club, C. W. Seiberling, vice-president of the Goodyear Tire & Rubber Co., was elected president, succeeding Guy S. Norwood, secretary of the company, in that position.

The club is planning a new building, and rubber and tire men are active in its membership pushing the project.

PERLMAN MOVES

Representative Wants to Connect with Two-Wheeler Exporters

NEW YORK, Dec. 18.—M. Perlman, formerly located at 320 Fifth avenue, this city, has opened up new offices at 44 Whitehall street, where he is prepared to handle a general export business on motorcycles, bicycles and kindred lines.

Perlman is anxious to get in touch with manufacturers desiring to reach foreign markets in any part of the world.

FOWLER HOST AT DINNERS FOR SALESMEN

Sales Manager of Baker, Murray & Imbrie Arranges Two Feasts, a Constructive Program of Speeches and Inspection of Store

NEW YORK.—Two trade features of cycle show week in New York which escaped attention in the rush of activity at the Garden, but which are noteworthy as indicating the broad-gauge policies of a pioneer metropolitan firm, were a brace of dinners for salesmen presided over by H. T. Fowler, sales manager of Baker, Murray & Imbrie, Inc.

At the Prince George affair the speaking guests of the evening were Frank Kramer, the perennial racing champion, and Fred L. Brown, vice-president of the Pierce Cycle Co., both of whom discussed Pierce products and manufacturing methods.

The dinner at the Hardware Club brought together the salesmen and department heads of Baker, Murray & Imbrie, and was arranged for the purpose of getting the road men and the house organization into closer contact. Following the dinner the party went to the Baker, Murray & Imbrie headquarters on Warren street, where each department's merchandise and methods were explained by the man in charge of it.

"Our object in going about this matter so thoroughly," said Sales Manager Fowler, "was to further our plans for giving our dealers 100 per cent. service. We feel that true service requires that every salesman for Baker, Murray & Imbrie shall be able to describe and discuss our goods in such a way that the dealer will be impressed with our ability to back him up and meet his every requirement."

FRANCE OFFERS FINE CYCLE MARKET

Veteran Trade Visitor Says Opportunities for American Manufacturers at Close of War Will Be Practically Unlimited; No Activity Now

NEW YORK, Dec. 18.—N. Dellheim, who for twenty years was connected with prominent motor and cycle jobbing houses in France, is now in New York with the intention of entering the American jobbing field. Cycle business came to a halt in France shortly after the beginning of the war, except for one or two manufacturers who were filling army contracts, and the jobbing houses were left high and dry because there was nothing to "job."

Mr. Dellheim states that France is keenly in need of cycle supplies and accessories, and that the American manufacturers who get their goods through quickly after peace is declared will find a market surpassing their fondest expectations. In his opinion ten months or a year must expire after the close of the war before French manufacturers can even make a serious start at supplying the cycle needs of the country. He explains that cycle and accessory factories will have to be almost completely re-equipped, and that the labor problem is also likely to give cause for anxiety. It is Mr. Dellheim's conviction that France will gladly take all the cycles and cycle accessories that can be shipped from the United States for at least twelve months after hostilities cease.

As an interesting sidelight on the cycle and accessory situation in England, the visitor stated that a consignment of bicycle bells recently brought into France was found to have originated in Japan. They were sent out as English bells, but were identified as having come from Japanese factories. They were admitted to France on the ground that Japan is a member of the Entente.

Mr. Dellheim referred, in an interview at the office of **Motor Cycle Illustrated** a few days ago, to the fact that France had reached an annual production of 1,000,000 bicycles prior to the start of the war, and that the cycling spirit is still strong.

DALLAS TRADE

Texas Farmers' Demand Greater Than Trade Can Supply

DALLAS, Tex.—Demand for motorcycles is so heavy in Dallas and nearby territory that dealers find it impossible to get machines to fill orders now on file, according to J. A. McDougle, head of the Harley-Davidson Sales Co. McDougle reports the sale of seventeen motorcycles last week, and says he could have sold several others if they had been on hand. Most of the seventeen machines sold, he said, were three-speeds, electrically equipped.

Sales are being made for cash, according to McDougle, who says there is no necessity to talk trade or deferred payments for there are more buyers than machines on hand. The unusual demand for motorcycles in Texas is attributed to the good crops and the high prices which farmers are being paid for their cotton and other products. It is significant that many of the machines now being sold go to the country and are purchased for pleasure purposes.

KLINE MOVES

Philadelphia Harley-Davidson Dealer in Larger Quarters

PHILADELPHIA, Pa.—Alexander Klein, who handles the Harley-Davidson in Philadelphia, has moved from his old place, where he had been located for the past six years, to 2216 N. Broad street. He has leased the building for a term of five years.

The building is a three-story building on a lot running through to the street in the rear. Klein intends to use the first floor for show room and office purposes, while the second and third floors will be used for storage of accessories and supplies.

On the rear of the premises is a one-story building which will be used as a repair shop.

RHODES SHIFTS HIS R-S QUARTERS

PHILADELPHIA, Pa.—William G. Rhodes, agent for the Reading-Standard in Philadelphia, has moved his show room and shop to 2226 N. Broad street. Mr. Rhodes has been located for the past six years at 2208-10 N. Broad street. He handles both the Reading-Standard motorcycles and bicycles.

QUAKER POPE AGENT MOVES

PHILADELPHIA, Pa.—Gentel & Marshall, who handle the Pope in Philadelphia, have moved from their old location at 2427 N. Broad street to 2228 N. Broad street. Besides handling the Pope, they deal in second-hand machines and specialize on repairs.

JACK'S CYCLE GARAGE MOVES

PHILADELPHIA, Pa.—Formerly at Thirteenth and Cumberland streets, Jack's Cycle Garage is now located at 2517 N. Broad street. Besides storing machines, they make a specialty of selling accessories and second hand motorcycles and also specialize on repair work.

ROADS BOOSTERS PLAN CO-OPERATION

Organize in Milwaukee to Link Southeast District of Wisconsin With General Highway Improvement Campaign

MILWAUKEE, Wis.—For the purpose of making a concerted demand for better road conditions in Milwaukee, Racine, Kenosha, Walworth and Waukesha counties, the Southeast Wisconsin Public Welfare Association has formed in this city with the following officers: President, Gus Miller, Milwaukee; vice-president, H. O. Fitch, Lamberton; secretary, Henry J. Fels, South Milwaukee; treasurer, Henry Zens, West Milwaukee.

The directors are L. E. Marshall, Milwaukee; Clarence McKenzie, Big Bend; Leo Haumschild, Cudahy; Joseph McDonald, of Tichigan, and Walter Mayhew from Eagle.

The new association proposes to cooperate with various local advancement and civic bodies to obtain desired improvements in Wisconsin highways. It is stated that Milwaukee and Walworth counties have roads which are excellent while in the southern part of Waukesha and northwest part of Racine counties, the roads are in deplorable shape.

Various committees have been appointed to work with local good roads boosters and workers.

THE OMAHA-LINCOLN-DENVER

DENVER, Colo., Dec. 16.—The new Omaha-Lincoln-Denver highway will be thirty-six miles shorter than its original map planned, according to the announcement of D. W. Irwin, chairman of the board of directors of the highway. In making the distance from Fort Morgan to Denver, the road builders did not touch either Greeley or Brighton, Colo., but went by way of Hudson, an almost straight line route.

The new road will be 538 miles long, shorter by thirty-five miles than any other highway from Omaha to Denver.

Digitized by Google

CROSS-CANADA ROAD TO BE CONSTRUCTED

Public Works Head Makes Definite Promise of Transcontinental Highway After the War

OTTAWA, Ont.—The construction of the first transcontinental highway in Canada, immediately after the conclusion of the war, has been definitely promised by Hon. Robert Rogers, Minister of Public Works, for Canada. It will be built by returned soldiers and immigrants. The long road will follow the railroad grades through the many rough portions of Northern Ontario and British Columbia. Existing good roads will be linked up with the through route wherever possible.

Dr. Coulter, deputy postmaster general, has taken up the matter of providing for the placing of R. F. D. boxes at safe distances from the side of the road. There have been a number of collisions with the box posts and complaints to the Government officials have been somewhat numerous.

The Government has decided to label all post offices with the name of the town or the community which they serve. In thousands of cases through the country, a tourist has no means of ascertaining the name of towns or villages except by hailing a native.

MORE HELP FOR DEALERS

Another Batch of Special Binder Sheets Is Ready for Indian Agents

SPRINGFIELD, Mass.—Another set of loose-leaf sheets to be kept in binders by Indian dealers is now being sent out from the Hendee factory. These sheets give pointers concerning commercial opportunities, discuss the results of Indian Photograph Day, which was recently observed in southern California, include a business-pulling postcard idea and also tell of several publicity stunts used by Indian dealers.

One of the sheets places special emphasis on the necessity for having clean and attractive salesrooms and window displays during the holiday season.

Included with the present batch of binder sheets is a circular calling attention to the fact that the forward connection for the sidecar on 1917 Indian models is in a different position from that formerly used, and that sidecars manufactured prior to 1917 are not applicable to the new machines without the use of a special fitting. Such a fitting is being provided by the company, at $2.50, subject to the regular parts discount.

GOODYEAR CHANGES

Several Branch Managers and Salesmen Shifted

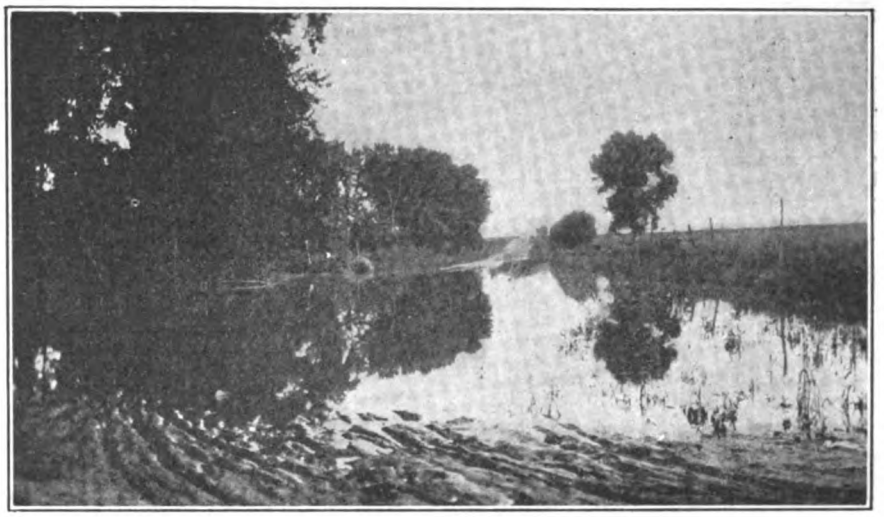
AKRON, O.—F. F. Tilden, formerly city salesman at the Indianapolis branch, has been installed as manager of the Goodyear branch at Columbus, Ohio, succeeding W. W. Magill, whose duties are to be announced later.

H. Walter, formerly city salesman at Atlanta, Ga., has been appointed resident salesman at Nashville, Tenn.

F. W. Nason, formerly manager of the Rochester, N. Y., branch has been transferred to the Export Department at Akron, Ohio.

W. G. Starnes has been made Goodyear manager of the Atlanta branch succeeding J. E. Taylor, who has been transferred to the Dealer's Help Division of the Automobe Tire Department at Akron.

STRONG CONTRASTS IN MIDDLE WESTERN ROADS



A Rider of Dundee, Kan., Sends in This Photo Which Shows a Young Lake Ranging from Six Inches to Four Feet Deep; No Detour Was Available

This Photo Comes from a Rider of Fort Wayne, Ind. The Stretch of Road Shown Is a Long One and Motorcyclists of Fort Wayne and Vicinity Make the Most of It

MASLEN STIRS THINGS UP

PHILADELPHIA, Pa.—George S. Maslen, distributor for the Indian, is right on the job advertising. Several weeks ago he mailed catalogues to the riders in his territory, these he followed up with a form letter invitation for the riders to stop in and look the new Indians over.

FLAMM SELLS 15 DAYTONS

PHILADELPHIA, Pa.—Sam. F. Flamm, manager of the Uncle Sam Motor and Cycle Co., which handles the Dayton here, reports that they have deposits on fifteen 1917 Daytons.

AS POLICE PATROL!

Galveston Officer Handcuffs Prisoner to Tandem Seat

GALVESTON, Tex.—Galvestonians are finding many and varied uses for the motorcycle, but it has remained for a member of the motorcycle-mounted squad of the Galveston Police Department to employ his machine as a patrol wagon and bring a prisoner to headquarters mounted on behind him.

John Antichevich was called to the outskirts of the city to get a man who was causing a disturbance. Antichevich found himself in a section of the city where there was no patrolman and no telephone nearby. Knowing that he was needed at the police station, Antichevich did not attempt to walk back to a telephone with his prisoner, but taking his handcuffs, he passed the chain through the handle to the tandem seat on his motorcycle and locked the cuffs on the prisoner's wrists. He then made his prisoner mount the tandem seat behind, and rode serenely into the police station bearing his prisoner behind him.

WALDEN AGAIN HEADS JERSEY CLUB

Mackey, Vice-President; Holton and Cordes, Secretaries, and Sieb Treasurer—Some Plans

NEWARK, N. J., Dec. 15.—The New Jersey M. C. held its annual election Tuesday night, returning Wilbur M. Walden to the presidency after a neck and neck race with Walter Ker, the retiring vice-president.

Others to hold office for the ensuing year are A. R. Mackey, vice-president; E. B. Holton, recording secretary; Fred W. Cordes, financial secretary, and Henry E. Sieb, treasurer.

At the close of the election a reception was held in honor of Harold I. Cogswell, a member who has just returned from border duty.

Cogswell talked of his experiences and observations regarding the use of the motorcycle in military work.

Plans for the successful running of the Sixth Annual New Year's Day Ride are under way. The destination of this year's sociability run is the Monmouth House at Freehold, and the starting time is 9 a. m. from the club house.

With the hundreds of sidecars in use in this section, it is expected that the 1915 record of 31 machines and 47 people on the run to German Valley will be broken.

The second annual theatre party and supper at one of the leading cabaret shows is set for Jan. 26, and a large delegation of out-of-town riders and trade men are expected to attend.

The club is completing a schedule of 26 sociability runs for this year, one being held every other Sunday regardless of weather conditions. Three members are eligible for the medals to be awarded any member who has attended 80 per cent. of the runs scheduled.

They are Clarence Eckhardt, Harley-Davidson sidecar; Martin Netzler, Excelsior sidecar, and Arthur Wintsch, Indian sidecar, who also held down the job of road captain very efficiently during 1916.

MARVEL INTENSIFIER

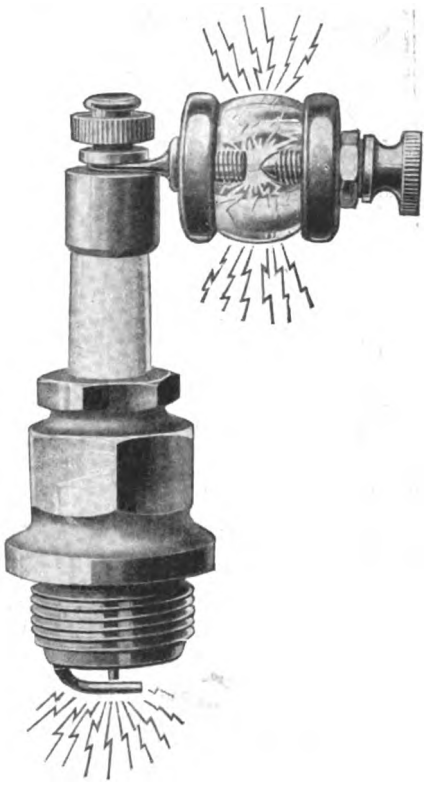
Oak Park Concern Enters Field with Ignition Device

OAK PARK, ILL.—The Marvel Mfg. Co., 1020 Washington Boulevard, has entered the motor accessory field with a neat little spark intensifier that is said to do wonders in the way of improving the ignition on any type of motor.

In its simplest aspect, the Marvel intensifier comprises a supplementary spark gap enclosed in a glass tube and so arranged that it can instantly be fitted to the orthodox sparkplug simply by attaching with the terminal screw. The plug cable attaches to the other terminal of the intensifyer so that the passage of the ignition current is through the device.

The operation of the device depends upon the well known principal that the provision of a second spark gap in the line causes an intensification of the ignition current; in other words, the spark is retarded slightly until its strength is sufficient for it to jump both the outside gap and the gap in the cylinder of the motor.

It is claimed that this intensified spark results in a power increase since the flame propagation is more rapid, while at the same time the spark is sufficiently hot to burn off both oil and carbon deposit and keep the plug constantly clean. The device is claimed to make an old plug every bit as efficacious as a new one. It sells for 75 cents and is handled through both jobbers and dealers.



Marvel Spark Intensifier

HAMILTON CLUB

Butler County Cycle Club Active Despite Cold Weather

HAMILTON, O.—The Butler County Cycle Club has been keeping up its activities since cold weather set in, with the result that even more interest than usual is evident. The first dance of the winter season was held at the club quarters on the evening of December 15, and preparations are under way for the New Year's Eve dance, which is expected to be one of the most elaborate functions the club has yet held.

A pool tournament is under way among the members, keeping them all interested, and the basketball team, which looks classy, has started on a hard schedule. Members are still talking about the "hare-and-hound" motorcycle chase which the club staged not long ago, the event being the first of its sort ever seen in this section. Three riders, acting as the "hares," started out half an hour ahead of the "hounds," marking their course by scattering confetti. prizes were awarded to the "hounds," who found three numbers hidden by the "hares" at the end of the course. Many riders became lost trying to follow the tortuous course taken by the "hares," one rider making a total of 156 miles on this account. So successful was the event that it will probably be made an annual affair.

NEW INDIAN DEALER

FARGO, N. D.—Fred Green, formerly of Minneapolis and Winnipeg, has taken the Indian agency in this city for both motorcycles and bicycles. Green's store is at 515 Second avenue north.

SITE FOR EAST PALESTINE PLANT

EAST PALESTINE, O.—The East Palestine Rubber Co. has secured a site of 12 acres of land, and will build a plant with a capacity of 500 tires and tubes daily.

Another Timely Service Feature

A MONTH ago *Motor Cycle Illustrated* took time by the forelock and published a complete technical description of a motor-sled, with working drawings, and this material has met with such wide approval that we are more than ever convinced of the popularity of the power-sled as a means of utilizing a motorcycle power plant during the winter months.

By way of supplementing the article referred to, and in order to give our readers the specialized advice needed to assist them in meeting their individual requirements, we are now announcing a special Motor-Sled Queries department. This department will be conducted by our Technical Editor, and in it he will be prepared to answer all questions pertaining to the construction and operation of a power-sled.

Despite the fact that snow has fallen as yet only in comparatively limited areas, *Motor Cycle Illustrated* has received dozens of letters commenting favorably on the article above referred to, and in many cases additional information is requested to cover some specific desire of the motor-sled builder.

It is to answer these inquiries on a systematic basis that the Motor-Sled Queries department has been decided upon. You are invited to write as often as you please, and ask as many questions as may be necessary. Simply state your exact requirements and address your letter to Technical Editor, *Motor Cycle Illustrated*, 13 Park Row, New York.

THAT CALIFORNIA DOUBLE ENDURANCE PICTURIZED

HERE'S what the camera man got of that Los Angeles-San Francisco double back-acting, reversible 1,000-mile endurance run which proved a world-beater in the way of good sport and hard going.

The first picture shows a busy scene just before the start of the San Francisco riders on their return trip from Los Angeles. The tall man in the background is J. J. O'Connor, official starter, reading off the seconds. The second picture shows Erwin G. Baker, the famous Indian rider, who came through with a perfect score. The two headlights played an important part in Baker's performance as they aided him to make the best possible speed on the mountain roads that twisted and turned like the track of a snake with a nightmare.

Here, in the third picture, are shown Fred Ludlow and Lem Sahagan, a couple of perfect-score Henderson men posing for the camera man in front of the Los Angeles store of the Henderson Motorcycle Sales Co. after the finish of the contest. Picture No. 4 shows Paul H. Cleap, a sailor in the United States Navy, who left the ship U. S. S. Hull and went through the contest on a Harley-Davidson stock machine. He rode with the San Francisco riders.

The fifth picture shows the San Francisco riders lined up for a final look at the camera before starting back from Los Angeles. The man with the number 17 on his arm in the sixth picture is D. Burlsland, one of the San Francisco Thor riders who gave a good account of himself.

Perkins and Hale are shown in the seventh picture. They say that they found it an ideal sidecar jaunt on their Harley-Davidson outfit. G. K. Brennan, shown in picture No. 8, on a Henderson, was the first of the San Francisco riders to sight the lights of Los Angeles from the summit of Cohnenga Pass.

Hearty welcome was extended to A. T. Bedell and Ed. Tice at the finish. Picture No. 9 shows Bedell and Tice in front of the Los Angeles Harley-Davidson agency.

Notice the "sheepskins" on Tice's machine.

Ray Smith and Bert Gilmore, shown in the center of picture No. 10, are a couple of perfect score Excelsior riders from Los Angeles. Fred Hoffer, of the Goudy-Hoffer Co., the California Excelsior distributor, is at the right, and O. A. Kupfer and Harold Frank, a couple of Excelsior salesmen, complete the picture.

GASOLINE GOES UP

CHICAGO, Dec. 18.—The price of gasoline is going up in this district. Heretofore it has been 15½ cents, but the Standard Oil Co. of Indiana has advanced it one cent to 16½ cents, throughout all of this territory. In the Kansas City district both the Standard Oil and independent companies have increased the price one cent a gallon, from 14 8/10 to 15 8/10 cents, tank wagon basis.

NEW WICHITA FALLS CONCERN

WICHITA FALLS, Tex.—The Automobile and Bicycle Tire Co. of West Texas, which has just been organized here with a capital of $10,000, will be one of the largest tire supply houses in West Texas. The incorporators are: M. Hull, E. A. Chamberlain, and M. McG. Hull.

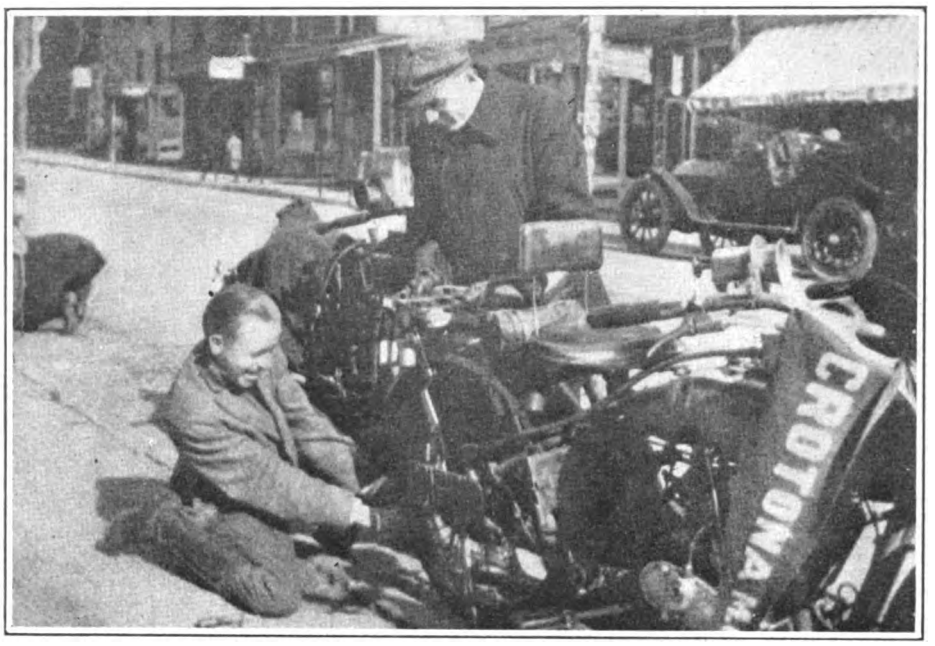
Why Not the Butt End Tube?

Rider Brings Out Its Good Points and Suggests Universal Use

By Wallace Stuart



A Puncture Never Bothers the Butt Tube User

I WONDER if a mere rider like myself can dare to make a suggestion to the motorcycle manufacturers, that is, make it and get away with it. Well, I will try it anyway, so here goes.

It seems to me that it would be the wisest thing for the motorcycle manufacturers to put butt end tubes in the shoes on new machines instead of the regular endless tubes when shipping them from the factory. As a matter of fact, for the life of me, I can't see why the butt end tube isn't used universally.

There is no question as to the convenience of that type of tube. It eliminates the necessity of taking out the wheel when fixing a puncture or blow-out, and furthermore because of the ease entailed in charging a punctured tube for a new one, or repaired one, the riders who use the butt end tube are prone to have their repairs vulcanized rather than to patch them on the road.

Not that I mean to imply that patches are unreliable if properly applied. But that's just the rub. When you are in a hurry you are liable to rush the patch job through and a leaky tube results from the first burst of speed which causes undue friction and heating and pries the patch loose from the tube. For that reason, if for no other, it strikes me that it is just the proper caper to have every puncture vulcanized as soon as possible, relying on patches only as a last resort.

Anyone who has ever used the butt end tube will vouch for its reliability. As a matter of fact, in my case at least, they have given me no more trouble than the endless type.

Personally, when I get a new machine, which I do just about every year, at my first puncture I never bother to take the wheel out to remove the tube. I simply say, "Well, here goes another $2.50," and slash it across with my knife and put a butt end tube in.

I know there are many other riders like myself who do this very thing. I have seen it done time and time again. It is a darn sight easier to slash the tire across than it is to take out the wheel and put it in again, and once the butt end tube is in place you feel different about the puncture jinx. It is easy to repair the butt end tube in comparison with the endless tube.

Some riders cut neatly across the endless tube about ten inches from the valve and then take it to a vulcanizer and have him put on a couple of extra inches and the canvas flaps, converting the old tube into the butt end type. I haven't had sense enough to do this yet, but the next time I get a machine with an endless tube I am going to try this stunt.

But, in the meantime, I am hoping that the manufacturers will give the butt end tube the consideration it deserves and will specify that type for use on the 1918 machines.

ROCHESTER SHOW

Cycle Display in Separate Building From Autos

ROCHESTER, N. Y., Dec. 19.—Something unique in the annals of Rochester and Rochester's vehicle trade is scheduled for next week. It is Rochester's annual automobile show, the novel feature of it being that the automobiles are to be housed in one building, with motorcycles and bicycles in another—sort of separate exhibit as it were. But the two-wheeler benefits by a big advertising campaign which is being carried out by the Rochester Automobile Dealers' Association in connection with the show.

Practically every Rochester motorcycle and bicycle dealer has taken space for the week, and the show bids fair to be a wholehearted success from the two-wheeler viewpoint. A special bicycle night has been arranged on which the dealers present will be addressed by Messrs. C. F. Olin, of the New Departure Mfg. Co.; W. F. Emerson and Frank Chase, of the Atherton Coaster Brake, and other big trade men.

CHRISTMAS WINDOWS

Baker, Murray & Imbrie Set Up Two Exceptional Displays

NEW YORK, Dec. 19.—Always up to the minute in the way of window displays, Baker, Murray and Imbrie, the New York Indian distributors, have exceeded themselves this week by a couple of Christmas windows that are eye-catchers and goods sellers in every sense of the word.

In the motorcycle window, Santa Claus is shown making his deliveries via the motorcycle and sidecar route, while just opposite it in the bicycle window a fireplace scene with the stockings, Christmas tree and, of course, the bicycle, call attention to the acceptability of the two-wheeler and accessories as Christmas gifts. The couple of windows are attracting an unprecedented amount of attention from passersby.

POLISH FROM DU PONT

WILMINGTON, Del., Dec. 18.—The DuPont Co., maker of powders, munitions and automobile fabrics and accessories, has just put a new product on the market. It is known as Pontoklene, and it is described as a polishing medium which is adaptable for use on sidecar bodies. It is said that it will remove grease and tar instantly. The new product sells for $1.50 a half gallon.

GAS INCREASE HITS COAST

LOS ANGELES, Dec. 18.—The high cost of gasoline has hit the coast. Both the trust and the independent companies have increased the price from 19 to 20 cents. This makes an increase of 9 cents a gallon within the past 14 months.

PUTNAM MAKES A FAST TRIP

Boston Man Rides from Detroit to Home in Three Days Despite Much Snow; Bad Roads in Middle West

BOSTON, Mass.—Take it from H. B. Putnam, who formerly handled the Harley-Davidson in Hyde Park but who recently has gone to work at the Henderson plant in Detroit, eastern riders do not know what bad roads are.

Putnam straddled his 1916 Harley-Davidson a couple of months ago and turned his front wheel toward the west, riding as far as Milwaukee where he spent a few days at the Harley-Davidson plant.

The going was fairly good, all considered, until after he left Detroit headed for Milwaukee; then he encountered not only bottomless sand but hub deep gumbo which clogged his wheels and made him stop to clean the mud out from between the tires and the mudguards.

When it comes to clear sheer riding ability, Putnam says the riders of the middle west are right there and no mistake, and what he saw of roads or lack of roads through the middle west has made him take an oath never to call even the worst of the eastern roads bad in the future. By comparison they are ideal.

Putnam made a quick trip back from Detroit for the Thanksgiving holidays. Leaving Detroit on Saturday morning before the holiday, he managed to make Cleveland by evening despite the fact that he encountered a "young blizzard" which made the going difficult.

Setting out from Cleveland he found the roads in fine condition and nothing retarded his progress until Syracuse was reached when he found the roads buried under half a foot of snow. He plowed through the snow until Utica was reached and averaged 350 miles for two days between Cleveland and Boston.

The Harley-Davidson he rode was a 1916 model which had been through two gruelling endurance contests and which had piled up a season's mileage of better than 25,000 miles.

MILITARY TEST

Fort Sill Motorcycle Spread Makes Run to Ada, Okla.

ADA, Okla.—Under command of Captain O. P. Robinson, the motorcycle mounted machine company stationed at Fort Sill, near Lawton, arrived here at 1 o'clock last Wednesday morning, having made the run from Fort Sill as an experiment and to test out the equipment.

Captain Robinson said the run from Fort Sill was most successful, only minor mishaps having been experienced which caused slight delay. He said unusually bad roads had been encountered, and the motorcycles had done all that could be expected of them. They had even surpassed the claims of the factory, he said.

The company consists of fifteen privates mounted on motorcycles, equipped with two mounted machine guns and two guns of the Lewis type carried in reserve, four caissons carrying 21,000 rounds of ammunition, and the motorcycle ridden by the commanding officer. In addition to this, the company has two automobile trucks bearing extra equipment.

SAVANNAH CLUB MOVES

Takes Larger Quarters and Plans Banquet; Other News

SAVANNAH, Ga., Dec. 16.—The Savannah M. C. will move on Jan. 1 to larger quarters at Broughton and Congress streets. The present quarters at 13 York West have been occupied for the past three years. The location is well remembered by many of the trade travelers and riders who were here during the big 300 mile races during 1913-14.

The new quarters comprise four rooms and bath. Arrangements are now being made for a big banquet to take place on New Year's night. Some of the most prominent men of the city have been invited to speak. The club will, however, go into everything in the athletic field, but motorcycling will be the chief sport.

Circular letters are being mailed out by Secretary Meyer to all club secretaries asking that the letter be read at their next meeting. The letter requests each club to save the fronts on Fatima, Chesterfield, Favorite, Piedmont and Richmond cigarettes and send same to the club. The Savannah M. C. has entered its president, George Porter, in the race for a piano which the members say will look good in the new quarters.

COLORADO'S REVENUE FROM MOTORISTS

Gross Receipts from Motorcyclists and Automobilists Will Be $205,000 for the Current Year; License Dodgers Rounded Up

DENVER, Colo., Dec. 16.—The enormous increase in motor vehicle revenue to the State which has marked the year just closing is forcibly shown in the biennial report of Chief Inspector Carl De Lochte, of the office of the Secretary of State, which will be submitted to the coming session of the State Legislature. The gross receipts from motor licenses for 1916 will be $205,000, as compared with $121,000 of last year, an increase of $84,000. All but 10 per cent of this amount, which is used for expense of collection, is used for the betterment of Colorado highways.

One of the striking features about the report is the amount collected by De Lochte through vigilant inspection. From June 1 to October 1 of this year, in the Denver district alone, De Lochte turned over $13,453 in the form of unpaid or underpaid licenses which he "picked up" from evaders or neglecters of the licensing law. In other parts of the State violators were caught, and the total amount secured from them was $8,310, giving a total of $21,763, which came into the motor vehicle revenue after the inspectors had nabbed violators.

Chief De Lochte has developed the art of "spotting" license evaders, and motorcyclists touring Colorado should be warned in time. He has hanging on the walls of his office samples of the bona fide tags from every State, and has spent many hours in fixing them in his mind. Counterfeits have to be perfect to escape his eye, as many an unscrupulous tourist will testify. Mr. De Lochte believes that this part of enforcing the motor license law has become essential, and that the $21,763 collected in Colorado this year emphasizes its importance.

"It's a business that takes time, study and eternal vigilance," says the inspector, "and one that becomes of increasing importance as the motorcycle and other motor vehicles increase in number."

NEW CYCLE CORPORATION

ALBANY, N. Y., Dec. 16.—The Martin Truck & Body Corporation was incorporated yesterday to carry on business in bicycles, automobiles and other vehicles. The company is capitalized at $450,000. Three thousand shares are of par value of $100, while 30,000 shares have no par value.

READING CLUB

Elects Two New Members, Nominates Slate and Plans Smoker

READING, PA.—At a business meeting of the Reading M. C., two new members were elected and the following nominations for officers were made: President, William Dolch and James Kinsey; vice-president, John Deysher, E. Von Neida, George Newhouser; captain, James Dunkle, Martin Hoffman and A. Anderson. The election will take place in January. The club arranged to hold a smoker on Thursday evening, Dec. 28, with special entertainment features.

$300,000,000 SPENT ON ROAD IMPROVEMENT

Figures Propounded by American Highway Association Show Remarkable Development in Ten Years, Especially in South

NEW YORK, Dec. 18.—That approximately $300,000,000 has been spent on improving the public roads throughout the United States during the present year, and that there are at present some 2,275,000 miles of improved public highways not counting the streets in the incorporated cities and towns, comes to light through a report just gotten out by the American Highway Association.

The increase in road improvement work during the past 12 years has been most remarkable, according to the association's figures. For instance, in 1904 the total expenditure on highway improvement including expenditures on streets in the towns and cities amounted to only $79,000,000, or just about 30 per cent of the money spent during the present year.

Road development work in the southern states especially has been remarkable during the past ten years. For example, the increase in revenue for road work in 1914, as compared with the revenue for 1904, was in Alabama, $2,372,584.72, or 150 per cent; in Mississippi, $2,261,030.26, or 134.9 per cent; in North Carolina, $3,856,803.55, or 283.8 per cent; in Texas, $5,781,921.62, or 139.7 per cent; in Virginia, $2,536,777.36, or 368.8 per cent, and in Maryland, $5,127,181.53, or 586.9 per cent. The increase in Delaware amounted to $420,825.12, or 463.4 per cent.

Some of the States at the lower end of the list are Kentucky, with an increase of only 14.6 per cent; South Carolina, with a small fraction over 35 per cent, and Arkansas .88 per cent.

Another instructive table on road mileage, prepared by the United States Office of Public Roads, shows that at the close of 1914 there were 50,743 miles of public roads in Arkansas, of which only 1,097.5 miles were improved and that in the period between and including 1909-1914 there was an actual decrease of .79 in the percentage of surfaced or improved roads in that State. South Carolina and Oklahoma also make a very sorry showing in the road mileage figures. In South Carolina the total road mileage at the close of 1914 was 42,226.25, the number of miles of surfaced roads at the close of 1914 and the number of miles surfaced from 1910 to 1914, both years inclusive, is expressed in these shameful looking figures in the official statistics—"*164.25" —the asterisk meaning "decrease," which means that in five years, 1910-14, less than one mile of public roads in that State was surfaced. Additional figures in the accusing official table show that whereas in 1909 the percentage of surfaced roads in the State was 11.02, in 1914 the percentage of surfaced roads was 7.98.

WHEELING ITEMS

Club and Dealer News from West Virginia City

WHEELING, W. Va., Dec. 18.—The Wheeling M. C. is planning for a big celebration of Christmas Day. Among the features will be a "turkey run," and among those who will partcipate are A. J. Pastors, Wesley House, Earl Braunlich, J. Landon Bier, Charles Caldwell, Emory Herrold, Paul Dangel, Charles Medar, Otto Reitz, Carl Schnuberger, D. H. Michaels, Carl Sells, J. P. Wasmuth and Arthur Drummond. A Christmas tree will be a feature of the decorations at the club house.

President J. Landon Bier will leave on his machine within the next few weeks for a hunting trip in the mountains down in the state.

Walter Bowman, agent for the Henderson and Excelsior machines, and Lemoin Pickens, are building a motor bobsled, which promises to create a sensation.

Harvey Bernard, of the Hendee Mfg. Co., and E. R. Durkee, of the Harley-Davidson Co., have been asked to arrange the next annual endurance run next June of the Wheeling M. C. Wheeling will be the night control city this time instead of a night control en route.

WHITING BUSY

Looking Forward to Carload Shipment for Colorado

DENVER, Colo., Dec. 19.—This week, Walter W. Whiting, 1309-11 Broadway, and Colorado distributor for the Harley-Davidson, expects a carload shipment of 1917 Harley-Davidson machines and side cars. A goodly number of machines from this shipment will be sent to different Harley-Davidson agents in various parts of the state.

Recently, Whiting received a shipment of Harley-Davidson bicycles and now has them on display in his store. The shipment consisted of thirteen wheels and is the first lot brought in this city.

NEW EXCELSIORS ARRIVE

LOS ANGELES, Cal.—The new series 18 Excelsior motorcycles and bicycles have arrived at the show rooms of the Goudy-Hoffer Co., 938 South Main street, and the boys are looking them over pretty thoroughly.

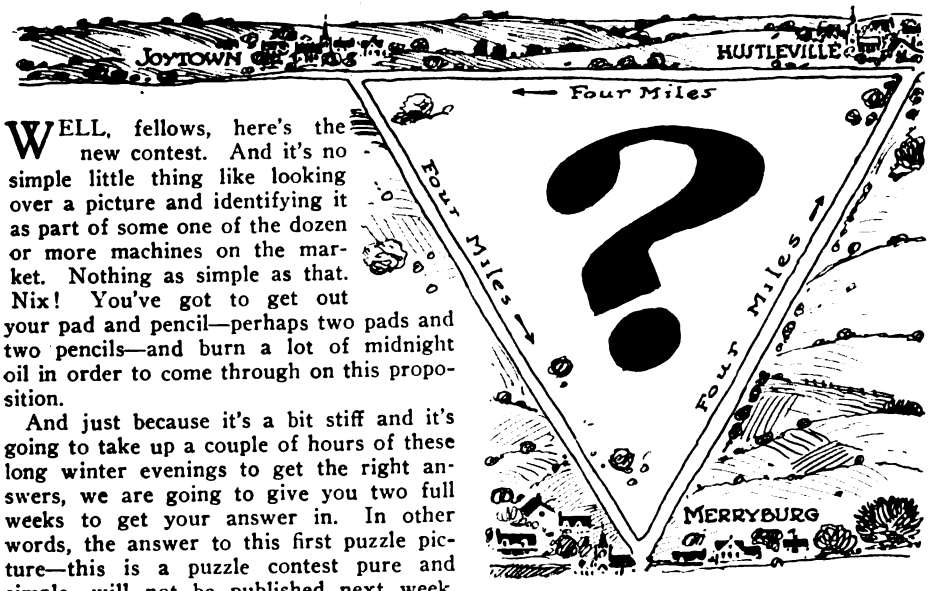
BAKER AND PERRY IN NEW CONTEST

Let's See If You Can Dope Out the Correct Answers—We Will Pay for Good Puzzles



WELL, fellows, here's the new contest. And it's no simple little thing like looking over a picture and identifying it as part of some one of the dozen or more machines on the market. Nothing as simple as that. Nix! You've got to get out your pad and pencil—perhaps two pads and two pencils—and burn a lot of midnight oil in order to come through on this proposition.

And just because it's a bit stiff and it's going to take up a couple of hours of these long winter evenings to get the right answers, we are going to give you two full weeks to get your answer in. In other words, the answer to this first puzzle picture—this is a puzzle contest pure and simple—will not be published next week. It will appear two weeks hence along with another puzzle picture.

The Proposition

Here's the proposition: Merryburg, Hustleville and Joytown, as shown by the diagram, are located on the points of a triangle, the straight roads connecting the three cities being just four miles long. In other words, a rider starting at Merryburg rides four miles along a straight highway to Hustleville, takes a sharp left turn and rides four more miles along a highway to Joytown, takes another sharp left turn and then four more perfectly straight miles of highway bring him back to Merryburg.

Now having gotten the lay of the land, so to speak, let's meander on to the puzzle. We have two riders—say Bob Perry and Erwin Baker—starting out from Merryburg and riding toward Hustleville. Bob starts first and rides at a rate of a mile an hour for one mile—then Baker starts. Then both ride at the same rate—one mile in one hour—until they reach Hustleville. Then they ride at the rate of two miles an hour until they reach Joytown. When that city is reached they again double the speed and ride at four miles an hour until they reach Merryburg again. Starting out on the second lap of the 12-mile circuit, they ride at 8 miles an hour to Hustleville again and so on, doubling the speed each time they pass one of the cities.

The Questions

We want to know just where Baker will be on the course when Perry gets back to the starting point—Merryburg—on his first lap of the course. That's an easy one.

Then we want to know just where Bob will be and how far he will have traveled when Baker is ⅛ of a mile away from Merryburg, not having reached that point yet. That one is a bit of a sticker.

There now you, fellows, you who are fond of sitting by the fire and doping things out. Go to it. There's enough work in this little puzzle to keep you busy for an hour or two at least, even if you are fairly good at figures.

And by the way, just one other little point, you know the Contest Editor has first to get all these puzzles and then set down and solve them out himself and put them up in readable style to puzzle you fellows and girls. And believe me that's no cinch job. Therefore he is going to cry "help"! And here's a second proposition:

We Want Puzzles

Supposing, you riders send in some puzzles yourselves. Make 'em just as hard as you care to, but they must be interesting and must, of course, be applicable to motorcycles. For every puzzle that is good enough to get by the Contest Editor's desk and to be used in connection with this contest, we will pay $2. There's chance to earn that new shoe, or lamp, or new "whatisit?" that you will need for your machine by the time the next season opens.

But say, don't forget to send the answer along with the puzzle you submit, because the Contest Editor earns his salary in doping out stickers for you and is not anxious to be stuck himself.

Just one more point, August Yakie, who sends his stuff all the way from Port Arthur, Texas, and O. J. Salo, who posts his answers at Red Lodge, Mont., have come through with correct answers to the last puzzle picture in the "What do you know about motorcycles?" contest. Both of them were in the "missed on two pictures" class when the final scores were published and the Contest Editor takes pleasure in promoting them this week to the class ahead.

As was the case with the last contest, the present puzzle contest is put up to **Motor Cycle Illustrated's** readers simply as a sporting proposition. There are no prizes attached to it or no awards, aside from the feeling of glory that comes when you are able to beat the other fellow and keep your contest slate clean.

I forgot to say that the idea for the present puzzle was submitted by M. E. Gale, the Angola rider who made such a name for himself a couple of years ago by doing the side by side seat act on an Emblem, and later by pulling a prairie schooner across the country with a Schickel motorcycle.

CLYMER'S SLED

Greeley Dealer Advertises Business with Power Bob

DENVER, Colo., Dec. 19.—The recent snow in Colorado has not stopped Floyd Clymer, the Harley-Davidson and Excelsior dealer at Greeley, Colo., from using his motorcycle. As soon as enough snow had fallen, Clymer brought from its summer hiding place his motorcyle sled. He has been making good use of this for the past two years. What is more, by mounting his motorcycle on runners he now can carry more of his friends than he could with a motorcycle.

Clymer uses a two-cylinder Harley-Davidson engine and propels the sled with a regular motorcycle wheel. He says he can make 50 miles an hour when the snow is hard. By riding around Greeley on his motorcycle-sled, Clymer is giving his motorcycle business some good advertising, as it shows the possibilities a motor bike possesses for winter sport.

INDEPENDENT CLUB

Elects Eytel President and Re-elects Treasurer and Secretary

NEW YORK, Dec. 18.—Ed Eytel was elected to head the Independent M. C. at the annual meeting and election of officers held at the club's headquarters, 306 West 133rd street. Fred Larsen was re-elected to the treasurership and Emil Grossman to the office of recording secretary and press agent.

Charles Shearer is the new road captain and Charles Johnston assistant captain.

The club is keenly anxious to get together with other clubs both in the metropolitan district and outside the Greater New York limits with a view of furthering the interests of the sport and arranging combination runs and sporting events. Make arrangements either with the road captain at the club address or through the secretary, Emil Grossman, 1060 Kelly street.

SPANISH CATALOG IS READY

MILWAUKEE, Wis.—The Spanish edition of the Harley-Davidson catalog for the coming season is just off the press, and is looked upon by all who have seen it as a remarkably fine addition to motorcycle literature intended for the Latin-American countries. The preparation of the material, along lines calculated to make the clearest and surest appeal to Latin-American agents and other buyers, was a tremendous job, but the results are highly creditable to the Harley-Davidson Latin-American department and the advertising department, whose joint efforts have been devoted to the new catalog for some time past.

Stolen

EXCELSIOR NO. 41227

Alva E. Radcliffe, 7002 Princeton avenue, Chicago, Ill., reports the theft of his 1914 Excelsior motorcycle. The machine was equipped with three-inch Goodyear tires, Old Sol headlight, Solar tail-lamp and Presto tank.

INDIAN No. 78 G 723

B. G. Sammis, Huntington, L. I., offers a reward of $25 for the recovery of his three-speed 1915 Indian motorcycle, No. 78 G 723. The machine had a sidecar, No. S 277641, attached.

HARLEY-DAVIDSON NO. A-14349-H.

N. L. Baldwin, 341 Pleasant street, Chicago, Ill., reports the disappearance of his 1914 Harley-Davidson twin motorcycle, No. A 14349-H.

HARLEY-DAVIDSON NO. M-511-K.

The Balfour Hardware Co., Savannah, Ga., offers a reward of $10 for the recovery of a 1915 Harley-Davidson twin motorcycle, No. M-511-K.

HARLEY-DAVIDSON NO. 6470-DG.

D. Angus, Grand Haven, Mich., reports that his 1914 Harley-Davidson chain single, No. 6470-DG., has been stolen.

HARLEY-DAVIDSON NO. L-8143-M.

C. C. Arnold, 110 E. Central street, Franklin, Mass., has reported his three-speed 1916 Harley-Davidson motorcycle No. L 8143-M., stolen. A sidecar, No. 58842, was attached.

HENDERSON No. 5825

Charles A. Merkel, Rochester, N. Y., announces a $25 reward for the recovery of a two-speed 1916 Henderson motorcycle, No. 5825, with the following equipment: Prest-O-Lite, Corbin-Brown speedometer, F-N tandem, mechanical horn, Eclipse front hub, Firestone and Fisk tires, Rogers sidecar. The machine is supposed to have been stolen by a man named Peter Jones, alias Nick Julius. He is described as short, slight and of dark complexion.

MANUFACTURERS, dealers and riders are invited to send data on the above lines to the Stolen Machine Bureau of Motor Cycle Illustrated as soon as possible upon the disappearance of a machine.

Each notice will be printed once in these columns without charge, and the details will also be filed with the Stolen Machine Bureau to be acted upon when a clue is obtained to the stolen mount.

If you lose a motorcycle or recover one, notify your local Police Department at once and then send the necessary data to Motor Cycle Illustrated.

POLICE CO-OPERATION REQUESTED

Cards Announcing Stolen Machine Bureau Are Mailed to 500 Police Chiefs Throughout the Country; Quick Action Is Essential

FIVE hundred postcards, like the one reproduced below, are now being sent to Chiefs of Police in the larger cities throughout the country to acquaint them with the work of the Stolen Machine Bureau which has just been launched by **Motor Cycle Illustrated**; as soon as these have been disposed of another batch of five hundred will be mailed to other cities. This policy will be pursued until every Police Department worthy of the name in the country is apprised of the fact that **Motor Cycle Illustrated's** Stolen Machine Bureau is striving along practical lines to co-operate with dealers, riders and the police.

A score of letters of approval have already been received from manufacturers, dealers, riders and police officials, and the fact that no less than 200 stolen motorcycles have already been reported to the Bureau gives proof of the need for prompt and definite action to curb machine thieves.

Too much emphasis cannot be placed upon the necessity for quick action by the rider who has his motorcycle stolen as well as by the party who recovers one. The rider who loses a machine by theft should notify his local police department at once, giving all the details for identification, and his next move should be to list the mount with the Stolen Machine Bureau of **Motor Cycle Illustrated.**

The party recovering a motorcycle should follow the same procedure: Notify the local police at once, and then send the specifications and any special distinguishing marks to the Bureau.

STOLEN MOTORCYCLES

Motor Cycle Illustrated, published at 13 Park Row, New York, has started a Stolen Machine Bureau, for which we respectfully solicit your co-operation.

Reports on stolen motorcycles, with all essential details, are filed by the factories and owners at this office. These records will be promptly compared with the data your Department sends us whenever you get in touch with a motorcycle that appears to have been stolen. In that way we will be able to identify the machine for you and also put you in touch with the owner.

Kindly supply us with the following details: Motor number (to be found on crankcase), name of machine, number of cylinders, make of tires, make of sidecar or tandem seat, if any; make of saddle, type of lighting equipment, any special distinguishing marks, such as bent, scraped, broken or repaired parts, or unusual fittings.

Your assistance will be appreciated.

MOTOR CYCLE ILLUSTRATED,

COVERS 1,025 MILES ON 10½ GALLONS OF GAS

Northbridge Proves the Stamina and Economy of His Dayton on Long Tour; Enjoyed Some Interesting Side Trips

BELMAR, N. J.—George A. Northbridge of Belmar has just returned from a motorcycle trip covering 1,025 miles on 10½ gallons of gasoline and costing him less than a dollar for cycle expenses. Northbridge left Belmar on a Sunday morning for Washington, D. C. He started at 7 o'clock, going by way of Lakewood, Mt. Holly and Paulsboro, where he stopped to purchase a half gallon of gasoline. He arrived at Pennegrove at 12:10 to find that he had to wait until 1 o'clock for the boat. Landing in Wilmington, Del., at 1:40, paying 30 cents for ferry charges, he proceeded across the city, climbing a hill for 16 blocks, some of it over coblestones. He traveled over splendid state roads to Perryville, Md., where he purchased another half gallon of gasoline.

Crosses Susquehanna

Again crossing a toll bridge, paying 15 cents, he crossed the Susquehanna river into Havre de Grace, where he found the roads fine but hilly. He arrived in Baltimore at 4:40, following strange roads until it got too dark to proceed. He spent the night with his brother, Lee Northbridge, and in the morning found a flat tire on his machine. After having put in a new tube he left Baltimore at 10 o'clock and arrived in Washington an hour and 15 minutes later. From this city he took four trips of 100 miles each into Maryland and Virginia. He was greeted by crowds wherever he stopped. He left Washington Saturday morning and arrived home at 2:30 last Sunday afternoon.

The total cost of the trip one way, including ferry charges, bridge tolls, vulcanizing tube and gasoline was 94 cents. Northbridge is more than ever enthusiastic about a Dayton Motor bike.

HIS SEVENTEENTH YEAR

Wesley House Celebrates Anniversary as Indian Man; 19 Years Cycle Agent

WHEELING, W. Va.—Wesley House, the Indian representative in this city, has just celebrated his seventeenth season as agent for the Hendee products. House represented the Indian in Wheeling in 1899, handling the bicycle of that make. He took on the Indian motorcycle a few seasons later and has held the agency to date.

Wesley House started in the bicycle line in 1897, during the "boom year" and has handled wheels ever since. His most recent acquisition is the line of Indian bicycles, which he took on last season.

Gasoline and Gas

By C. B. O'Hare

DID you ever have your gas go out just in the midst of your evening meal?

Did you ever wait for hours and hours for the gas works trouble man to get around and remedy the trouble?

If this has been your experience in the past, you, like many others, will be deeply appreciative when your particular gas company, if it has not done so already, adopts the use of the motorcycle for its service and trouble men.

Gas companies the country over, as well as water supply and electric light companies, are adopting the speedy motorcycle for service of this sort. The only reason for this adaptation is its serviceability. It has proven its worth and now is making headway by rapid strides.

A case in point is the use of some 51 motorcycles by the East Ohio Gas Company, of Cleveland, Ohio.

The motto adopted by this company is "service," and in an effort to live up to the letter of this policy, some three or four years ago the purchasing agent turned to the motorcycle for the use of its service and repair men.

The company first started with a couple of the machines. They proved practical. They did the work quicker by far, and at less cost and with less trouble than anything the East Ohio Gas Company had tried before.

Naturally their use was continued and increased, and from that small beginning the East Ohio company has worked on until now it is using 51 as was before stated.

And of that number we point with pride to the fact that 49 are Thor machines, and every one of them giving the sort of A1 service which this Cleveland concern demands morning, noon and night. It is with pride also that we make plain that of the 49 Thors in use, a goodly portion are Thor special service models—the Thor "supersingle."

This little Thor machine, which is a single-cylinder four-horse power two-speed, has been produced by the Thor engineers especially for service of this sort, and they are making fast headway with public service corporations the country over.

The East Ohio company uses its motorcycle fleet mostly for quick "turn-on" service. If an application for a meter reaches the office of this company before one p. m. the concern has made it an invariable rule to see that the newcomer has gas in the house that same day.

Almost the minute the application is filed the turn-on man jumps on his machine and whizzes across town and has the gas turned on in many instances before the people have actually moved into the house.

The machines are also used for inspection service in and around the city to see that the company's mains are maintained at all times in first class condition, as well as for inspection work out in the field, for practically all of the gas is of the natural variety. Some of it is piped from as far away as West Virginia, although for the greater part it is welled in a district in a radius of from 30 to 40 miles from Cleveland.

The territory takes in all of Cuyahoga and adjacent counties from a district some 20 miles square. The gas comes from wells out in this country district. Some of the wells are located where there are good roads, others where the best the rider can obtain are dirt roads, and still others in remote sections where there are no roads at all aside from an occasional cow path.

All these wells must be inspected and inspected regularly, and all of the pipe lines leading from them must undergo periodical inspections. For this purpose the company maintains a separate staff of field inspectors all mounted on motorcycles.

And they all are experienced riders as well as perfectly trained gas service men. Their work, especially in the winter months, is no child's play and calls not only for hardy men but also for motorcycles that are fully capable of standing the gaff.

The supremacy of the Thor Supersingle in this work is noteworthy. It has been designed and built just for such hard usage. Its simplicity coupled with its ruggedness make it the ideal vehicle for the public service man.

It is these motorcycle-mounted men that Cleveland dwellers have to thank for the steadiness of their light and its constancy. The gas field is one field in which the motorcycle is supreme and its increasing use by gas companies the country over is the surest sign of this supremacy.

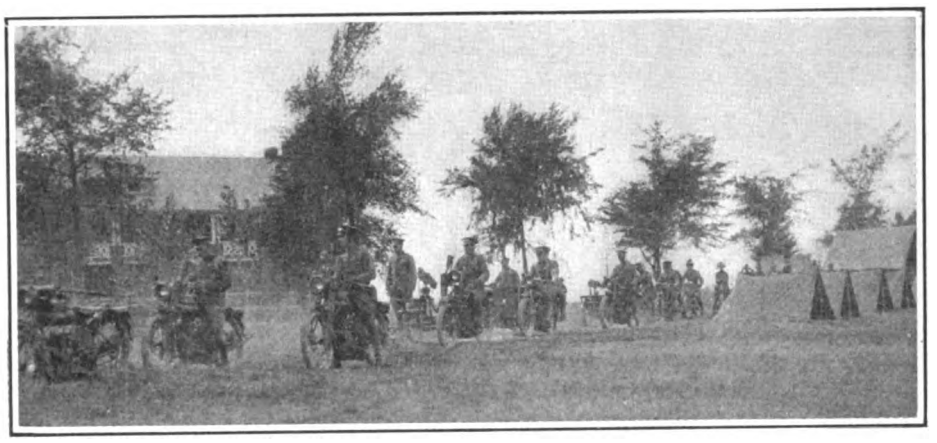
FINE WORK BY ENGLEWOOD BOYS

Indian-Mounted Motorcycle Company at Ft. Ethan Allen Overcomes All Kinds of Obstacles in Carrying Out Orders of the Officers



The Englewood Squad in Action at Ft. Ethan Allen

FT. ETHAN ALLEN, Vt.—The work of the motorcycle battery of the Englewood (N. J.) Rifle Association at Fort Ethan Allen during the past summer has been receiving considerable favorable comment from army officers who commanded the battery at one time and another during the season. The comment of these officers is of a nature favorable to the machines used by the men, but particularly so as regards the men themselves.

This body of men, all mounted on Indians, was directed in the handling of motorcycles by Earl Armstrong, of the Hendee staff, who has since been stationed along the border. Under his direction, and with the aid of their own natural aptitude for the work, the men became experts in army motorcycle work. Frequently they were used for work which was considered too difficult for the other motorcycle units present, and on such occasions they never failed to "bring home the bacon," as per order.

One occasion of this sort occurred during the hike from Fort Ethan Allen to Plattsburg. During this advance Lieut. Gordon, regular army officer in command of the motorcycle units, ordered a motorcycle squad to cross a stretch of broken country, climb a hill and form a defense for the advancing column. The squad attempted the advance and failed, turning back before half the distance had been covered. Shortly afterward the Englewood squad arrived on their Indians and received the same order. They crossed the stretch of country without difficulty, and carried out the orders of Lieut. Gordon to the letter. This is said by observers to be only a sample of the men's regular work and many compliments are paid them for the manner in which they increased the already high opinion which the army officers held of motorcycles when in the hands of competent and really interested men.

A Few Spare Links

By E. B. HOLTON

WONDER what's the matter with the motorcyclists in the big cities? In our own little Sherlock series of "spot-the-motorcycle-by-the-round - photograph," all of the perfect score men hail from towns that are mentioned only now and then, and barely get a place on a large sized map.

Why, the first of the large town riders appear in the 800 class, and hang their hats in Detroit, Mich., and Newark, N. J.; Chicago breaks into print in the 600 bunch, while New York City, the premier of 'em all, doesn't ring the bell once.

Strikes me that the big town motorcyclist should be posted on all of the makes on the market with his opportunity to "lamp" them so easily. The contest proves differently, though, so it's hats off to the observant riders from the smaller places.

When the motorcycle was in swaddling clothes, so to speak, and gasoline was a scarce commodity and sold in drug or paint stores; when motorcyclists had to have accurate knowledge of places they could rely upon for replenishment—in those happy days, the mounts sported a thimble-sized tank of about one gallon capacity.

Nowadays, when we can get gasoline on every block, and across the street, and when every farmer has a supply, we have tanks that will hold enough for a day's journey on one filling. 'Sall right, at that; no criticism intended—merely ruminating over those by-gone days, that's all.

Well, fellows, that amateur sidecar record has been established and broken all within a month.

Who's going to be next to take a crack at it? Better shoot now, while the mark is this side of 650 miles, for once it passes that distance it won't be every pair that will have ambitions to smash it, or that will come back with the bacon if they do try.

Speaking of gas and tanks reminds me of something. I wonder why some manufacturer doesn't put out a squirt gun that does not necessitate a lot of screwing and unscrewing to free the gun for use. Seems that to make a sort of breech-block contrivance, an imitation of big gun practice, where a quarter-turn would lock or unlock the squirt gun, would simplify matters a lot. Mighty handy thing these cold winter days when priming is the first move to starting the motor.

First it was the two-stroke that swept through the English motorcycle field, making adherents right and left; now the sudden popularity of the flat-twin motor is crowding the two-cycle back to the wall.

There are over a dozen firms making or announcing a 1917 180° twin, over beyond the Atlantic, and the only barrier to a large production of the horizontal twins is the war. English motorcycle manufacturers are prohibited from producing motorcycles except under government permit, of course, and you can rest assured the only mounts turned out are for war purposes.

Have you noticed this? Several years ago, feathered fowl were being slaughtered right and left daily because of their fool tactics of racing ahead of your front wheel, and then swerving into it whichever way you steered. Later models in the hen line act more sensible. Of course a bunch of 'em still go to their happy hunting ground via the gasoline route, but a considerable number beat it for the side of the road when they hear you approach. If you don't think so watch 'em next time you ride out into the country.

A special investigation conducted by the Pennsylvania Railroad from January to August of this year, showed that 75% of the accidents that occurred at grade crossings of this company, were, as the report puts it, "due to a total disregard of caution and wilful running of risks."

Same kind of an investigation out in California, revealed that out of 3,300 motorists, automobilists and motorcyclists combined, who crossed railroad tracks, but 28% of them glanced both ways along the track preparatory to going over.

Lot's wife didn't gain much by looking around, but maybe you and I will in these rapid days; so *Stop, Look* and *Listen* at all unprotected grade crossings. SAFETY FIRST!

Never saw so many vari-colored motorcycles on the road as there are today. I have seen no less than five different hues of one make, two colors of another; yes, of several. And none of the painting was a home-job either. In automobiles the same applies. Some folks say that it prevents theft; but it looks as though motorists are beginning to express their own individual tastes more than in former years.

Riders of today are after a service machine and not a piece of machinery that needs more time devoted to polishing than to riding.

EXPORT CONFERENCE

Auto Body Calls Meeting That Is of Interest to Cycle Trade

NEW YORK, Dec. 15.—Of interest to motorcycle trade folk in that it points the way to a similar conference that can be indulged in with profit both by exporters of motorcycles and of bicycles is the conference of export managers called by the National Automobile Chamber of Commerce. The meeting will be held in New York some time in January and the export experts of practically all of the automobile manufacturers represented in the body will be present.

The conference, it is expected, will help to collect information regarding changes in duties in foreign countries, customs regulations, shipping routes and charges, special permits, lists of dealers, banking arrangements, road conditions and general uses for various types of motor cars, possibilities of interesting agents and broadening markets, the handling of the trade after cars have been sold, and such other matters as might be expected to promote sales abroad.

THEY USED GOODYEARS

Record-Makers Had Sidecar Outfit Equipped with Blue Streaks

SPRINGFIELD, Mass.—One of the most recent tributes to the staying power of Goodyear Blue Streak tires comes from Edgar Buck and Howard Pasmore who established a new sidecar record by driving an Indian combination from Springfield to Montreal, Que., 584 miles, in 19 hours, 27 minutes of actual running. They set out to beat the sidecar record set up recently by Elliott Holton and Joseph B. Werner, the New Jerseyites, and finished with a margin of 39 miles.

"Ice, snow, rain, heavily-rutted roads and miles of rough and stony surfaces in the Adirondacks did not delay us materially," said Buck, in referring to the accomplishment a few days ago, "so it may be taken for granted that our tires were as dependable as the best of the outfit."

THEY'RE BOUND TO RIDE

KANSAS CITY, Mo., Dec. 12.—Following the first snow of the season at Kansas City, which fell yesterday, C. E. Whitcomb, president of the Kansas City Motorcycle Club, announced that the club would probably be forced to hold its regular meeting indoors next week, instead of on a road trip; "but," he added, "this does not mean that the members will have to walk—we will ride our machines to the meeting, by all means."

RAY'S FRIENDS DIDN'T FORGET HIM

KANSAS CITY, Mo.—When a member of the Kansas City M. C. takes unto himself a bride there are always big doings on the part of his associates, and the case of Ray Hagerman, of the Indian Motorcycle Sales Co., who was married recently, was no exception. On the day of the ceremony the riders trailed the wedding party through the streets with their horns tooting, and when Mr. and Mrs. Hagerman started housekeeping the full membership of the club turned out to assist them in making an auspicious start.

How A Busy Omaha Lad Makes His Motorcycle Give Him a Tidy Salary as Well as Recreation

MONEY in the motorcycle delivery business? Well, if you were to put that question to Charlie Hayes, of Omaha, Neb., he wouldn't have to hesitate an instant before giving you a definite and mighty interesting answer,—for Charlie knows. Take a squint at him in the photo above, with his Indian sidecar outfit loaded down with parcels, and then read his story.

One day during the latter part of January, 1916, Charlie heard that one of the biggest clothing stores in the Middle West, the Berg Clothing Co., of Omaha, wanted a man for their delivery department.

Said Charlie: "If I get a motorcycle will you allow me to deliver your packages at so much per pack? I don't want a straight salary."

"Righto!" answered the store manager. "We'll do that very thing."

So Charlie hiked right down to see his friends, the Boord Brothers, who sell the Indian in Omaha, and closed a deal for a motorcycle and sidecar. On February 28 Charlie's name appeared on the payroll of the Berg Co. as regular delivery man, and he has made good to such an extent that his employers have turned down a dozen delivery propositions from other men.

But that isn't all. From March 1 to December 1, of this year, Charlie has collected from the clothing house for his deliveries the sum of $1,311.29, or an average of $145.68 per month. His upkeep for the same period was as follows: Gasoline and oil, $71.10, or a monthly average of $7.90; tires and repairs, $55.40, or a monthly average of $6.10.

By subtracting Charlie's outlay from his gross earnings we find that he cleared $131.63 monthly. Pretty soft, eh?

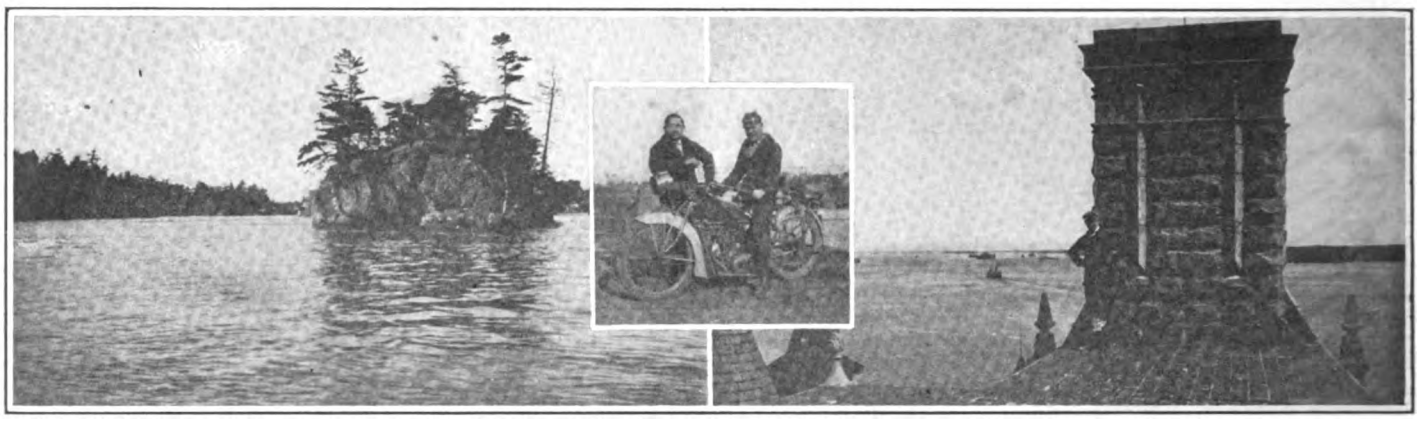
By Tandem to the Thousand Islands

The Story of a Motorcycle Tour on Which Good Roads, Varied Scenery and Interesting Wayside Incidents Formed an Ideal Combination—A Suggestion for Other Tourists.

BY THOMAS KRAMER



The Tourists, Their Mount and Just a Couple of Suggestions of the Sort of Scenery They Encountered on Their Trip to the Thousand Islands by Motorcycle

HAVING seen almost every place of interest within 500 miles of New York, we decided, my partner, Clifford Macevoy, and I, to make a tandem tour to the Thousand Islands recently and our preparations were soon completed. As the trip up to Albany offered nothing new or interesting (we had covered the same route no less than a dozen times on the machine), we decided to go to Albany by boat.

We secured our stateroom in advance, but had some trouble in getting our Excelsior motorcycle aboard, owing to the number of automobilists going to Albany for a tour through the Adirondacks and Berkshires. However, after slipping across the usual tip, we got our machine on the boat. While looking things up for the night we got in touch with a young chap named Sam Powers, who was traveling with a twin-six Packard.

A Little Party

When we went up on the upper deck our motorcycle togs aroused the interest of several socially inclined girls and we soon had a nice little party. The night was just right for singing on the deck, and as our girl friends were gifted with good voices we were able to start an impromptu quartet. We kept up the "agony" until after 11 o'clock, and then realizing that we had a big day's riding ahead of us for the morrow we turned in for the night. We awoke at 6 o'clock the next morning to find the boat docked at Albany.

Our friend with the motor car did not wait for breakfast, as he was anxious to make Buffalo that evening, a distance of about 300 miles. We explained that we were in no hurry, but did tell our friend Sam that we intended to beat him into Utica, 94 miles distance. After breakfast we started on the first leg of our 209-mile run to Alexandra Bay.

Sheltered From Storm

Five miles out of Albany we ran into a heavy shower, but luckily we were close to a railroad bridge over the state road and managed to find shelter. The shower was soon over and the sun came out again. The roads were a bit slippery, naturally, but the route from Albany to Schenectady is as straight as an arrow and we had no difficulty. We passed through Schenectady with colors flying and then struck the toll bridge to Scotia, where we paid a ten-cent fee.

A Near Spill

At the other end of the bridge we hit a trolley track at an acute angle, and if it hadn't been for the timely aid given by the tandem passenger's big feet, and the coolness of the driver, we would have taken a dandy little spill. As it was, we tangoed a little and then straightened out for the run through Hoffman, Crainsville, Amsterdam, Fonda, Palatine Bridge and St. Johnsville, to Little Falls, where we made our first stop for gas. While we were filling our tank our friend with the auto pulled in also, and we gave him a sympathetic smile. He had got off the road and lost considerable time.

Out of Little Falls the race between our machine and the Packard started again, with friend Sam having some advantage over us because of the additional stability of his four wheels on the slippery roads. However, he either went astray again, or we managed to find a short-cut, for we pulled into Utica five minutes ahead of him.

We felt then that we had earned our dinner and went into a restaurant with visions of a big steak, but the steak was tough and badly bent when it arrived. Friend Sam and his Packard continued on towards Syracuse, and as our route led due north to Watertown we saw no more of Sammy.

At Alder Creek

Our next stop was at Alder Creek, for more gas. From here on the scenery was different, for we began to see the Adirondacks, about twenty miles away, and the monotony of the level roads through the

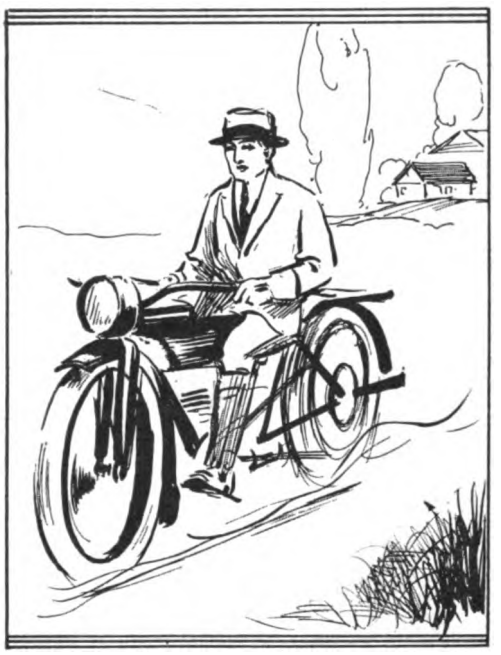
Would Maintenance Guarantee Help Sales?

Observations Prove That Uninformed Young Men Are Often Kept Out of Motorcycle Ranks by Fear of High Upkeep, and It Is Suggested That Dealer Guarantee the Expense of Maintaining Machine in First-Class Running Condition Will Not Exceed $25 a Year—This Would Be Safe Policy for Dealer, Judging by Average Rider's Experiences

BY W. DRYNAN

WHILE it would appear at first thought that a dealer could hardly be expected to give a "low upkeep guarantee" in connection with the sale of every motorcycle, owing to the widely varying abilities of the purchasers, it is a fact that this policy actually can be adopted, and with little or no risk to the agent. I am firmly convinced, after considerable riding experience and personal observation, that a dealer is safe in assuring his prospect that the upkeep of the motorcycle will not exceed $25 a year.

This is a high estimate, understand, and the chances are that the yearly maintenance bill will not be more than half that amount. I suggest the $25 figure as the maximum, and with a view of allowing the dealer what I consider plenty of leeway. It is taken for granted, of course, that this sum is not to cover an accident, for which neither the dealer nor the machine is responsible, and which may happen to the owner of any kind of vehicle. Nor is it intended to include gasoline and oil. It is simply an estimate of the prospective outlay for keeping the motorcycle in first-class running condition.



In writing this article I am probably putting myself in line for all kinds of "hot shot" from dealers who may feel that they should not be called upon to give such a guarantee, but I feel that the proposition is big and important enough to warrant discussion, and I am ready to stand by my side of it. Nothing is gained by burying an idea and forgetting it, simply because it happens to seem a little out of the ordinary. Let's "have it out," as the saying goes—for the good of the cause.

Is it worth while for the dealer to gather figures and all kinds of operating data for use as sales arguments? It certainly is. In my opinion, nothing could be more important. We have a great many riders, of course, who would stick to the motorcycle even if it were an expensive vehicle—purely for the sport and fascination of it—but the average buyer is vitally interested in learning something about the probable expense of keeping his mount in good running order.

Take my own case, for example. I had been mildly interested in motorcycles for some time, but had thought that I could not afford one. I know better now, but for a long time I deprived myself of the pleasures and benefits of the motorcycle just because I knew nothing about operating and maintenance costs. Finally there came a day of awakening for me—and I am very sorry it did not come sooner. If it had I would have avoided much trouble.

I visited a friend one day and came upon some copies of **Motor Cycle Illustrated.** Turning the pages I saw many attractive photos and some interesting and instructive articles. It was a hot day, and the idea came to me that I could have some wonderful trips through the country if I only had a motorcycle.

Could I afford to operate one? That was the question. Well, I borrowed that copy of **Motor Cycle Illustrated** and read it from cover to cover. Before I finished, I had a bad attack of motorcycle fever. Soon afterward I visited a dealer and bought a machine.

But I was still "up a tree" as to whether I had invested in a "luxury" or a vehicle of true economy. So I decided to get at the bottom of the matter for myself. I kept records and watched every detail for a year of general roadwork, and found that the maintenance of the motorcycle for the year had entailed the comparatively trifling outlay of $15.

Wouldn't it be a fine thing for the average young man to have that fact brought home to him? I think so. I know it made a rip-roaring booster out of me.

But I had to dig the facts up for myself. That was the trouble. If some dealer had given me a good talk on the low maintenance cost of the motorcycle, and finished up by offering to guarantee that the maintenance outlay would not exceed say $25 a year, I would certainly have owned a motorcycle long before I did.

To the average non-mechanical young man a motorcycle looks intricate. We, who ride them, know that the motors give very little trouble, but the "man in the street" does not know that. He is afraid that he might be called upon to pay all kinds of bills for repairs, adjustments, etc. If he has any sporting blood at all, he will not balk at gasoline and oil expenditures, but when it comes to keeping the mount in good running trim—well, that's where he begins to worry.

And there's no need for such worry. I know it, and you know it, if you are a rider, but the new prospect is not posted. He may have all kinds of pipe dreams about expense, and it's up to some one to set him straight. Whose business is it to give him the facts? The dealer's—certainly.

As I stated above, my maintenance cost for a year was $15, and this sum and a good part of the outlay for gasoline and oil was offset by the saving in carfare, as I used my motorcycle in going to and from work. But it was the improvement in my health that impressed me most. My physical condition has been much better since

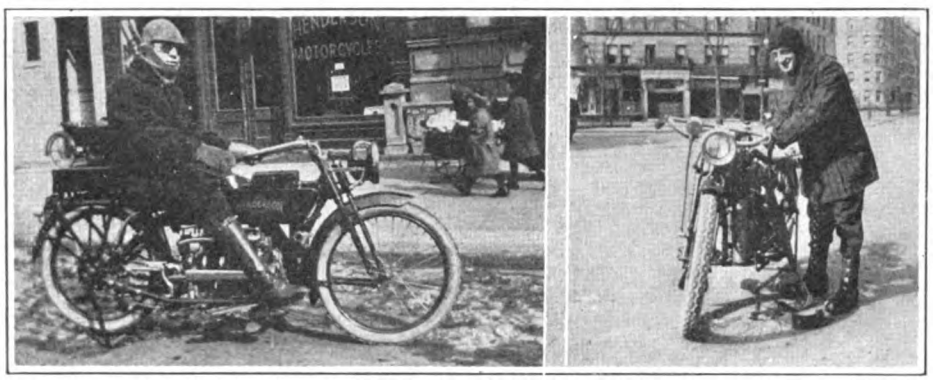
ALL-WEATHER RIDERS FROM THE METROPOLIS



Jackson and Rosenberg With Their Mounts

NEW YORK.—Two all-the-year-round riders in this city are Irving Jackson and Otto Rosenberg, both of whom use the four-cylinder Henderson. No matter what the temperature, these two will be found on the roads leading out of New York, in Westchester and Orange counties, and there are few roads within 250 miles with which they are not familiar.

The pair of Hendersonites are shown in their cold weather riding kit. Rosenberg, whom the photographer caught rolling an inner tube on his handle-bar, favors arctics as the proper foot-covering for zero traveling. Both use mackinaws, heavy riding breeches and pull-down wool caps. Among the local riders they are noted for their neat appearance.

THE INDIAN RIDERS' BOOK

Latest Addition to Wigwam Literature Is a Bright and Newsy Offering

SPRINGFIELD, Mass.—The first issue of the new Indian booklet for riders is now off the press and ready for distribution, and as was to be expected, it is a bright and informative addition to the literature of the Wigwam. The cover illustration shows the Van Buren sisters and the Indian machine with which they made their tour acrosss the country, and the contents of the book range all the way from descriptive paragraphs concerning the 1917 machines and sidecar to news notes relative to the doings of Indian riders.

BUSH DROPS IN ON ANGEL CITY

LOS ANGELES, Cal.—H. C. Bush, who covers territory from Denver west for the Morrow brake, dropped into Los Angeles with his pockets full of the toy balloons the Morrow people let loose at the Chicago show.

He found a nice increase in trade all along the line, especially on the bicycle end of the Eclipse business.

FOR USE IN VIENNA

American Embassy Secretary Orders Henderson with Special Equipment

NEW YORK, Dec. 16.—Felix Lewin, manager for the New York Henderson branch, has just received an order for a three-speed Henderson for Glenn Stuart, secretary to the American embassy in Vienna, Austria. The order for the machine is accompanied by a lengthy list of extras, such as head and tail lights, special Mesinger saddle, horn, speedometer to read in kilometres, spare tire and tubes, valve and springs.

Mr. Stuart's order states that the machine shall be shod with the new 29 x 3½ inch Firestone tires and that the spare tire shall be of this size.

DRESSER'S TIRE REPORT

Army Motorcycle Courier Says Firestones Gave No Trouble

NEW YORK, Dec. 18.—In discussing the performance of their Harley-Davidson and sidecar on the 3,000-miles trip from Camp McAllen, Texas, to Albany, N. Y., Dan Dresser and Harvey Edwards gave credit to the motor for reliability in the face of many road obstacles, and in the same breath praised the work of the Firestone tires with which the combination was shod.

"I can't imagine a more severe test for either motor or tires," said Dresser, "and the fact that neither gave trouble is certainly worthy of mention."

REEPS AGENT IN NORWAY

NEW YORK, Dec. 18.—The Reeps Mfg. Co., with offices in the Hudson Terminal Building, announces that it has just made a connection with A. Gresurg, of Christiana, Norway, for handling the Weed folding back rest in "the Land of the Midnight Sun." The Christiana firm is widely known in the motor and accessory field.

WE ALL NEED RELAXATION, SAYS GRIGG

Manager of Harley-Davidson Supply Department Tells Advertisers' Club to Get Outdoors and Tune Up for the Business Grind

MILWAUKEE, Wis.—"How much are you saving your boss?" was the subject of an interesting address by Otto Grigg, manager of the Supply Department of the Harley-Davidson Motor Co., before the Advertisers' Club of Milwaukee a few days ago. Mr. Grigg is the buyer of printing, engravings, art work and allied material for the Milwaukee factory.

"Forget your cares and give your enthusiasm an opportunity to expand," said Mr. Grigg, in speaking of the necessity for sensible recreation. "Take a trip—hunt, fish, go camping, or hiking. Go to a concert or an opera. Go somewhere or do something that will inspire you with new ideas.

"Show me a successful advertising man and I will show you where he is interested in one or more of the things just mentioned. Take, for example, our own Mr. Crolius here. I don't know a more earnest hunter or fisherman. Every time he comes back from a trip he is brimful of ideas. Sometimes I have the pleasure of accompanying him on short trips, and on nearly every occasion we bring back with us interesting material and ideas. Often we point to a scene and say, 'There's a good subject for a catalog illustration,' or 'There is just the thing for an ad.'

"Those who have never tried this great outdoor stuff cannot fully appreciate its value in building up a teetering system and increasing its efficiency. It is a powerful stimulant.

"Again I say, abandon your duties periodically; do something else or go somewhere, even if you only hike out into the country and admire the sublime wonders of nature.

"I'm sure you will return more fit, more enthusiastic, more efficient, and worth more to your firm than the man who stays at home and doesn't care."

HAS COVERED 32,000 MILES

Kenneth Lemon, of Mazomanie, Wis., With R-S Which Has Given Him Good Service in Mail Deliveries

A NEW CLUB FOR EASTON

EASTON, Pa., Dec. 18.—The Boyer Cycle Co. announces the organization of a new motorcycle club here, with 35 members. The firm invited the riders to participate in a "blow-out," and while the get-together spirit was strong the club movement was started. A large number of applications for membership have been received since the club was announced, and there are indications that the squad will be a strong and active one before the spring riding season opens.

UNITED STATES
FACTORY BRAND
BICYCLE TIRES FOR 1917

The most complete, high grade, up-to-date and attractive line of Bicycle Tires ever offered to the trade and public is briefly described in the following pages.

The line consists of Single Tube Tires of heavy construction for hard service, of light resilient construction for comfort; also a variety of Clincher Tires of the genuine Indianapolis brand with Inner Tubes and Sundries of corresponding quality.

Prices and Catalogs to jobbers and dealers on request. Inserts and electrotypes furnished for catalogs.

It's Risky to Gamble Against Fire Loss

The Cycle Dealer Who Fails to Have His Store and Stock Fully Covered by Insurance Suffers a Lower Credit Rating in Addition to the Danger of Being Burned Out of Business

By PATHFINDER

OUR attention was attracted to a little placard which decorated one corner of the desk of W. D. Isham, Credit Man for the Harley-Davidson Motor Co. It read:

Your assets of today
May be cinders tomorrow

The more we thought it over the more forceful became the fact that there is a world of truth and a whole lot of food for thought in its message. We resolved to find out more about the matter of fire insurance as concerning the retail motorcycle business from "Bill" Isham. And the longer we talked the more absorbing became the topic.

The Dealer's Assets

You know fire insurance plays an important part in credits. Here is the way it works out. We'll say a dealer schedules his assets as follows:

New Machines	$400.00
Second-Hand Machines	1,500.00
Parts	4,000.00
Accessories	4,500.00
Machinery and Shop Tools	2,000.00
Store Fixtures	1,600.00
Personal property	2,000.00
	$16,000.00

We are presuming that the dealer keeps what cash he has on hand in a fireproof safe, so don't call this item assets in this instance so as to confine the scheduie strictly to merchandise subject to loss by fire. If this dealer were to carry fire insurance approximating $4,500 he would be in a mighty poor fix. If he was doing business on some borrowed money, his predicament would only be worse. On the strength of these figures our friend would be a mighty poor credit risk. If he were wiped out by a fire, his small insurance policy would not give him much of a start and he could not afford to use very much of it in the payment of outstanding bills.

How Credits Are Affected

"Insufficient protection by fire insurance is a matter which has been brought home to me very forcibly during the past season due to the fact that we requested in addition to our usual credit information, that dealers advise the amount of fire insurance carried," said Mr. Isham. "I simply was astounded at the number of A No. 1 dealers who are not carrying nearly enough fire insurance.

"Now, get me right. I hold no brief or contract with any fire insurance company and am not looking to boost their business. Personally, I think that the last kind of a job I would strike for, even were I down and out, would be fire or life insurance solicitating. It may be that the dread of having to talk to an insurance man is what's keeping dealers from taking on more of that kind of protection. Nevertheless, I am a firm believer in carrying sufficient amount of fire insurance.

"An essential thing, of course, is a good accounting system that will enable a dealer to know where he is at in the way of finances and amount of stock on hand. To bring the matter nearer home: If you had a fire in your residence and the adjuster came to settle your insurance payment, the first question he would ask is, 'What did you have and what was it worth?'

"Could you answer that?"

W. H. Isham

WHO SAYS:

"It is part of the business duty of every cycle dealer to see that his holdings are fully covered by insurance, primarily because he may be driven out of business by a fire unless he is properly protected, and also because the lack of adequate insurance is certain to hurt his credit. A suitable policy, backed up by a reliable company, must always be considered as a real asset in the dealer's business.

"Don't wait until the fire engines are clanging down the street to your store before you begin to appreciate insurance at its true value. If you are not fully covered, act now—today. Select your policy carefully. See that it is just what you need and that it is issued by a dependable company, and then sign up without delay. It's better to talk business with an insurance man today than to wish you had,—tomorrow."

We were frank to admit that we couldn't and mentally made a resolution that when we got home that night we'd have wifey make out a schedule. Incidentally, when it was completed we found that our policy did not begin to cover what we would lose if the old shack went up in smoke.

"What would you recommend me to do if I were a motorcycle dealer and wanted to take out some insurance?" we asked. Isham's line of questions started to worry us and we wanted to get back on the questioning end of the interview.

Matters for Investigation

"The first thing I would do would be to hunt up the representative of some well recommended fire insurance company and take out a policy sufficient to protect me. That sounds simple enough, but there are a lot of technicalities about fire insurance policies that a dealer must be acquainted with before he finally affixes his 'John Hancock' to the beautifully engraved parchment that conveys in a multitudinous array of high sounding phrases the fact that maybe he is and maybe he isn't fully protected in the matter of cash for every dollar he loses.

"There are many clauses in insurance policies that we laymen feel tempted to term 'jokers.' It is entirely possible that the insurance companies, with their experience in insuring property with all kinds of business men, have found it necessary to take these precautions. This is no sign, however, that the innocent should suffer with the guilty, and it is up to a dealer to be as careful about taking out fire insurance as he is in contracting to sell motorcycles or renting a piece of property for a certain stated period of time.

Examine the Policy Carefully

"When taking up the matter of insurance do not accept any insurance man's word for it that the policy is all right; that it will cover your case and that any of the points that you might want to bring up will be properly taken care of. Read the policy carefully and satisfy yourself that you thoroughly understand its contents and also that the printed portions thereof will protect you. If not, insist that the special clauses, or 'riders,' as they are called, be written on the policy and accepted by the insurance company. If this is done, you will cheat the insurance adjusters out of a job in case you have a fire and you will be liable to get what is actually coming to you.

"There are many motorcycle dealers carrying insurance who do not know that unless specifically mentioned, the following property is not covered by their policy: Signs, awnings, store and office fixtures, and tools. Better take a look at your policy, Mr. Dealer, and if these are not specifically stated see to it that your insurance agent gives you a rider which protects you on these points.

Repair Kinks and Shop Wrinkles

Hints On Dressing Bearings

Giving in Brief Several Means By Which Satisfactory Surfaces Can Be Obtained; Tinning a Bushing

By D. R. HOBART

WHILE a large proportion of the motors of recent model use ball or roller bearings on the crankshaft or connecting rod big ends, there are a huge number of motors with plain bearings in service. In fact, experience has shown that the majority of motors sent in for repairs have such bearings, and a few hints on dressing bronze and babbitt surfaces will therefore be valuable to many shopmen.

In order to get the proper fit of a shaft in its bearing, the shaft must turn freely in the bearing without wobbling. At the same time, the bearing must conform to the surface of the shaft. It is not sufficient that the bearing is new to make it fit; the best results are obtained only when the bearing fits snugly on the shaft and fits at all points of the surface. Failure to have shaft and bearing fit in this manner means a scored shaft, rapid wear and unsatisfactory operation of the motor in the long run.

Simple Apparatus

The process of making shaft and bearing conform is known as "dressing" and it is one that is easily done, although some care must be taken in doing it. The apparatus used consists of a scraper or two and a tube of Prussian blue or some color. The latter is used to indicate any "high spots" in the bearing when dressing it.

Two forms of plain bearings are used in motorcycle motors. The first, known as a "bushing" is in one piece, while the second is split in halves. This latter form will be referred to by the word "bearing" hereafter. Both forms are made either in babbitt metal or bronze.

Shaft Must Be True

The shaft must be in good condition before any dressing of the bearing is attempted. If scratched, a smooth surface can be gotten again by careful rubbing with 00 emery cloth, given one turn around the shaft and worked by alternately pulling the ends. If the shaft is scored, it will need lapping with emery flour and oil.

Taking the case of the bushing, unless badly worn, a new surface can be had by tinning the interior carefully. Before starting to tin, the bushing, whether bronze or babbitt, should be freed from all grease by the use of a flux. The tin should be in a liquid state in a pot, and should not be used before the dross is brought to the surface by melting a tallow candle in the hot metal and skimmed off. The bushing is then plunged into the metal or the tin allowed to run on its entire inner surface from a ladle. When cold, the tinned bushing is ready to dress to the shaft.

If a bushing is badly worn, the best results can be had by replacing it with a new one, and dressing to fit the shaft. There is no economy in the long run in tinning a bearing deeply.

Fitting Split Bearing

For a split bearing, loose on its shaft, it will be necessary to bring the halves closer together in order to get a proper fit after dressing. The flanges or edges of one-half should be very lightly filed until the halves placed together fit snugly over the shaft with the flanges in contact. In some split bearings, shims are fitted between the halves, so the removal of a shim on each side will bring the halves together, ready for dressing.

Coat lightly the inner surfaces of the halves with Prussian blue or the color used in its place, and assemble the bearing on its shaft. Revolve the shaft in the bearing a few times, then lift off the halves. The "high spots" will be marked by a removal of the blue from the bearing surface. Fasten one-half in the vise, using copper jaws, and carefully scrape the bright spots, taking thin and minute chips only from the surface.

Final Steps

When all bright spots have been scraped, coat the surface again, and after having wiped off the shaft, assemble the bearing as before and rotate the shaft. Continue the dressing until the blue is not rubbed off the surfaces of the bearing at all when the shaft is rotated. The dressing is then complete. It is essential that the bearing halves are put back in the same relation to each other each time. Wipe all surfaces free of the blue, see that the oil grooves are clear, put a coating of clean lubricating oil on the shaft and put the bearing and shaft in place.

In examining a bearing before dressing, use kerosene to remove the oil from the surfaces, not gasoline. The latter leaves a precipitate which will not always be absorbed by the lubricating oil and which will score the surfaces if left in place. The kerosene should be allowed to become nearly dry, then wiped off with a clean cloth.

For Quick Repair

Where the "high spots" are of small surface as shown after the blue is applied, a quick job may be done by tinning as described above. However, the tin coating is not so good a bearing surface as the bronze or babbitt metal, and will not last as long. The regular dressing process takes a little longer than the tinning, but the results are more satisfactory.

In dressing up the crankshaft bearings of a four cylinder motor, the crankcase halves should be left in place and dressed first, in order to ensure the four bearings being in line. Each of the other halves should then be dressed to its particular crank throw.

Insuring Ample Lubricant for the Wristpin

EVERY now and then some one brings in a machine having the wristpin bearing wobbly or even tight on the small end of the connecting rod. The cause is naturally lack of lubrication, and after the necessary dressing of the bearing or its replacement have been made, the following remedy should be applied:

The small oil hole in the small end of the rod should be coned or countersunk at its outer end. In this connection, it is not at all a bad idea to slightly roughen the ribs inside the piston to get the oil from the splash to adhere, and then drop back on the small end. Care should be taken in doing both of these things, that the strength of the small end and the piston is not weakened in any manner.

Verify Oil Feed After Each Overhaul

AFTER every overhaul, either of the machine itself or of the motor, it is the safest plan to verify the flow of oil from the tank through the mechanical pump, and into the crankcase. The small screw on the pump body should be withdrawn with the motor running, or, better still, the connection at the discharge end of the oil line—into the crankcase—should be unscrewed and the flow of oil watched.

Particular care should be taken by the repairman in this respect when the oil in the tank of the motorcycle is low, as air-locks are then likely to form somewhere in the line and cause trouble later on.

Secure Means of Testing Spark Plugs

TESTING a sparkplug after removing it from the cylinder is usually clumsily done, as the plug is held by the cable and its shell rests against some part of the motor. In fact, it is rather awkward to work a kick-starter and hold the plug in position at the same time, but here is a wrinkle that is just as good on the road as in the shop for holding the plug securely and watching the spark.

Take a monkey wrench, or a Stillson, for that matter, and close its jaws around the hexagon portion of the plug. Push the handle of the wrench in under the projecting arm of the valve dome or anywhere that it will stay and make contact with some metal, such as the frame or the motor. You can do any kick-starting or pedaling now without having to hold the plug by hand and with the certainty that a proper circuit is established. The current will pass between the points and go through the wrench to the frame or motor as the case may be.

Questions and Answers

CANNOT INCREASE POWER

MY 1913 model twin has a 15-tooth motor shaft sprocket, a 33-tooth clutch sprocket, 15-tooth countershaft sprocket, and 31-tooth rear sprocket. I would like to get more power from it and ask you if the fitting of a larger sprocket on the rear wheel will effect this.

CHARLES VETTERLE.

Buchanan, Mich.

Your gear ratio is about 4.6, which is all right unless you want to speed. No alteration of the sprockets will give you more power than the motor will develop, but a lower gear ratio will give you better hill-climbing ability.

Unless your motor is in poor condition, you should be able to climb all ordinary hills with the 4.6 ratio.

However, you might try a 33-tooth rear sprocket, but your speed will be cut down appreciably by its use. Before changing the sprocket, find out how fast the motorcycle will travel; it should do 52 miles per hour if in first class condition.

A CLEMENT MOTOR

PLEASE identify the following motor for me. It is intended to fit into a bicycle frame to form a motor attachment, and I am anxious to know where I can get any spare parts for it. Bore is 2¾ inches, stroke 3¼ inches, detachable cylinder head, timing gears outside of crankcase with brass cover, automatic inlet valve over exhaust in chamber slightly at rear of center line; hinged bolts to cylinder head.

Modesto, Ill. RALPH W. GREEN.

As far as we can make out from the description, the motor is a Clement, made in France. This is presuming that the motor when it reached your hands was not altered by a previous owner. You will be unable to get spare parts for this motor, as the Clement firm ceased to import motors to this country some five years ago, and ceased motorcycle engine production in France about 1912. There is no American representative.

FOR WINTER SIDECARING

WHAT extra provision should a rider make for sidecaring in the winter; that is, with regard to the machine and car?

H. LOGIE.

Albany, N. Y.

The three wheels of the combination should be fitted with non-skid tires, the treads of which must be in good condition. Care should be taken that the tires are inflated to the proper pressure. Put a good non-skid chain on the rear wheel of the motorcycle, especially if ice and snow are to be met with.

The sidecar should be perfectly aligned, and the hub packed with a fresh supply of lubricant.

Lubricant should be placed between the leaves of the body springs and it would not be a bad idea at all to tape the springs from end to end with tire tape. In very cold weather, springs may break under a heavy jounce, so the reinforcement by means of the tape will prevent this. Provide plenty of blankets for the feet and legs of the passenger, also an apron.

FRONT SLED DETAILS

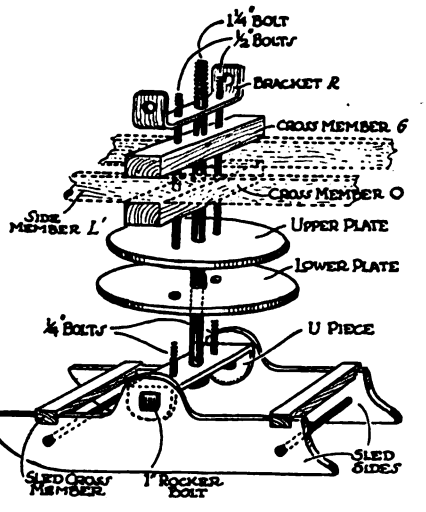
I AM going to build a motor sled similar to that shown in the October 19 issue of **Motor Cycle Illustrated**, and would like to have further details on the assembly of the front sled and forks.

Atlantic, Mass. A. B. CHURCH.

The fork ends of the motorcycle fit between the upturned sides of the axle bracket R. This bracket, as will be seen by reference to the drawing, is connected to the cross members G and O by means of ½-inch bolts. These bolts also pass through the upper of the two "fifth wheel" plates M. The axle bracket R, members G and O and the upper plate M are centrally drilled for a king-bolt, 1¼ inches in diameter. This bolt also passes through the lower plate M and the reversed yoke or U-piece on which the sled sides rock in unison.

In the drawing, the various parts are extended slightly from their respective positions to give a clearer view of the construction. There are two ¼-inch bolts connecting the lower plate M and the U-piece for the sled. Note that the sled cross members are set into notches in the sled-sides and that there are through bolts connecting the sled sides, both at the front and the rear.

The bolts in the plates M must have their heads counter-sunk so as to give it free movement of the lower plate on the upper when steering. It is understood that some grease or other lubricant is needed to enable the lower plate to turn easily on the upper.



Front Sled and Connections of Motor Snowster—Parts Separated to Show Relative Location

CLEAN THE CARBURETER

MY 1915 twin motor will not run steadily unless I give it plenty of opening in the jet. It then will run, but will not pull as it should on the hills or in sand. The timing is all right, the compression good and the ignition according to factory marks.

S. W. SMITH.

Chicago, Ill.

Provided you have not altered the gear ratio so that on top speed the motor runs too fast, the trouble will probably be found in the carbureter. Look at the cam on the throttle shaft and see that there is no groove or flat spot worn in it. If there is, get a new cam at once. Dismount the carbureter and thoroughly clean all the fuel passages.

If the jet needle is worn or its shape altered, have it fixed or get a new one. Clean out any carbon in the cylinders, and after assembling the motor and carbureter, adjust for the proper mixture.

WRITE THE MAKER

I DESIRE to get better results with my 1916 motor and would like to have your advice as to fitting a Shakespeare carbureter. Please tell me if this will give me greater economy and speed than the one now fitted.

"CHARLEY ROSS."

Philadelphia, Pa.

We have no doubt that you would get as satisfactory results with the Shakespeare carbureter as with the one on your machine, but as to better economy and speed, we cannot tell you. We have absolutely no record of this carbureter being used on a motorcycle, and doubt very much whether the carbureter would fit between the cylinders.

You could, of course, fit an extra long pipe to the inlet manifold, but this would bring the carbureter outside of the line of cylinders and might cause some inconvenience in riding. Inquire of the carbureter maker about it.

EASY STARTING

I FREQUENTLY have difficulty in starting my motor when the weather gets cold. I have to prime the cylinders and use the kick-starter considerably before the motor will run. Give me the remedy.

C. H. D.

Brooklyn, N. Y.

In very cold weather, use a cloth which has been dipped in hot water and wrung out, wrapping this around the carbureter. See that the lower air-inlet to the carbureter takes in air directly from one cylinder. When stopping for any length of time, leave the valves lowered, so as to keep mixture in the cylinders.

Close auxiliary air port when starting. We think that you will have to prime in cold weather on your motor, no matter how good a motor you have. You do not tell us if your motor starts easily or otherwise in warm weather, but if it starts hard in summer, it will assuredly start harder when the temperature is low. Avoid the use of a blow-torch, as you may cause a disastrous fire in attempting to thus heat the carbureter.

Digitized by Google

A Few Christmas Suggestions

Ways and Means by Which the Motorcycle Dealer Can Profit on the Holiday Spirit

WELL, here's Christmas right atop of us; just a couple of more days to cash in on the one time of the year when everybody spends money freely and selling goods means simply displaying them to proper advantage.

Proper advantage—that's the point. Do you realize, Mr. Dealer, that your stock of accessories constitutes an answer to a question that right at this minute is puzzling many a parent? That question is "What will we give William for Xmas?"

Our first suggestion, then, is that you write the parents of each of your riders and suggest to them the fact that William's chief aim in life is to obtain a new shoe for his "Speeder"; or a new horn, lamp or some other accessory which you stock.

That'll start 'em coming to your place; but why stop with the parents? There are other relatives—brothers, sisters, aunts and uncles—write 'em all. Yes, and write to a few of the lads' friends. Suggest to the riders themselves that the best way to show the true holiday spirit to their fellow riders is to give them something for the motorcycle.

Yes, and a few personal letters to the parents of fellows whom you know to be anxious to get motorcycles no doubt will prove effective, especially if you handle a lightweight. Tell the parents that "William" or "John" would like a motorcycle better than anything else in the world and that you have the very machine that he wants and are willing to teach him how to ride, give him a reasonable amount of service, etc.

That's the way to start them coming, all right. But then you have to carry the Christmas idea all the way through your establishment. Who would ever think of a motorcycle as a Christmas present, for instance, unless it was suggested to them in that light? A pump, or a lamp, or a horn does not in itself hold a suggestion of being a suitable Christmas gift; but tie a bit of red ribbon around it, set it off with a touch of holly or poinsettia, a dash of artificial snow, perhaps, and a little card—"This is what Willie wants"—and there's the suggestion sure enough.

That's the idea you must carry throughout your whole establishment if you would profit to any great degree by the inflated business that comes with the Christmas custom. Beginning at the store window, the Christmas idea must be carried out in a comprehensive manner, else the bicycle which looked like the ideal present for little Johnnie in the letter you sent to Johnnie's pa will look quite commonplace and inappropriate when the said worthy drops in to close the transaction.

The idea, then, is to put a good Christmas punch first into the letters you get out; then into your show windows; into your newspaper advertising if you use space; and into your store. Get your new machines out front where they can be seen and well away from the trade-in machines. And don't be afraid to use plenty of light, plenty of green and red decorations and to present your accessory stock in such a manner that even the most trivial wrench looks like the ideal gift for somebody's boy.

Another little suggestion—one that will get them talking about you. How about a Santa Claus on a demonstrator? Have him ride around during the few remaining days before the happiest day of the year. Mount a sign or a placard on the machine calling attention to the fact that motorcycles, bicycles and accessories make ideal gifts and that you are fully prepared to take care of all comers.

And don't forget that this is the time of the year to cash in on the "motor bob" business. A Santa Claus on a motor sled will prove particularly attractive and will send the lads into your store to find out how to build similar machines. There's a dealer up in Schenectady, N. Y., who is this year making a specialty of supplying all the necessary fitments for converting a motorcycle into a serviceable motor sled.

And just one thing more. A card carrying the season's greetings and totally devoid of all advertising sent to all of your customers and prospects is just the proper caper for the day before Christmas. Forget the business end of it entirely and such a card will go a long way toward cementing old friendships and making new friends for you.

HERE'S A JOB

For the Technical Man—Patent Examiner Wanted

SOME of our readers of technical turn of mind may be interested in the announcement that the United States Civil Service Commission has scheduled an examination for assistant examiner in the Patent Office, to occur throughout the country, on January 17, 18 and 19, 1917.

From the register of eligibles resulting from this examination, certification will be made to fill vacancies, as they may occur, at a starting salary of $1,500 a year, in the United States Patent Office at Washington. Emphasis is put on the fact that the supply of eligibles for this position has not been found equal to the demand, and persons qualified are urged to take the examination.

They will be examined in the following subjects: physics, mathematics, including all branches to differential calculus; mechanical arts, chemistry, including analysis and elementary organic; French or German, and mechanical drawing. The age limit is 20 years or over on the day of examination. Further information can be had by applying to the United States Civil Service Commission, Washington, D. C.

CHRISTMAS FIRESTONE

House Organ of Firestone Company Breathes the Yuletide Spirit

OF a character to carry good cheer to the trade at large is the Christmas Number of the Firestone, the house organ of the Firestone Tire & Rubber Co. The cover is a Christmas scene done in two colors, bright, cheery and with the spirit of the Yuletide built right into it.

That same idea is carried out throughout all of the sixteen pages of the number, a green and white holly decorative piece at the top and sides of the pages and red checkered borders around the green half tone illustrations adding greatly to the effect. It is easily one of the best issues of the Firestone that has come from the press in some time.

PLENTY OF ACTION IN SIX-DAY RACE

Grenda and Goullet Make Low Score in First Night's Sprint Session—Root and Madden Finish Second and McNamara and Spears Third—One Team Out

MADISON SQUARE GARDEN, Dec. 19.—Alfred Grenda and Alfred Goullet proved themselves the best sprinters in the series of ten sprints in the new system of scoring in the six-day race, which started yesterday morning. Goullet won three of the sprints, while Grenda won one, and in the sprinting session, which lasted over two hours, the team had the low score of 30 points.

Reggie McNamara won four of the sprints, but his partner, Bob Spears, failed to finish better than fifth in any of the sprints, and they finished with 34 points, two points more than Eddie Root and Eddie Madden. Ray Eaton and Martin Ryan scored 37 points and Fred Hill and Peter Drobach had 42 points to their credit. In each sprint the first five riders scored from one to five points. Their totals were then added up and the team with the low score was credited with a point for the grand total for the week. Second team received two; third team, three; fourth team, four, and fifth team five. All teams finishing outside of fifth were credited with six points.

How the Sprints Finished

The accompanying table shows how each rider finished in each of the ten sprints of last night, the total of points registered by the team and the points which will be credited to them each night according to the position in which they finish:

Team	Sprint No. 1	2	3	4	5	6	7	8	9	10	Daily Pts.	W'kly Pts.
Goullet	0	3	0	1	0	1	0	1	0	2		
Grenda	6	0	4	0	5	0	6	0	1	0	— 30	1
McNamara	1	0	1	0	1	0	1	0	2	0		
Spears	0	6	0	5	0	5	0	6	0	6	— 34	3
Egg	0	6	0	6	0	6	0	6	0	6		
Dupuy	6	0	6	0	6	0	6	0	6	0	— 60	6
Root	3	0	3	0	3	0	3	0	5	0		
Madden	0	1	0	6	0	2	0	5	0	1	— 32	2
Hill	6	0	6	0	4	0	5	2	0	3		
Drobach	0	4	0	2	0	6	0	0	4	0	— 42	5
Thomas	6	0	6	0	6	0	6	0	6	0		
H. Ohrt	0	6	0	6	0	6	0	6	0	6	— 60	6
Lawson	0	6	0	6	0	6	0	6	0	4		
Mitten	6	0	6	0	6	0	6	0	6	0	— 58	..
Eaton	0	5	0	6	0	6	0	3	0	6		
Ryan	2	0	2	0	2	0	2	0	3	0	— 37	4
Walthour	0	6	0	4	0	6	0	6	0	6		
Debaets	6	0	6	0	6	0	4	0	6	0	— 56	6
Carman	0	6	0	6	0	6	0	6	0	6		
Wiley	6	0	6	0	6	0	6	0	6	0	— 60	6
Smith	0	6	0	6	0	6	0	6	0	5		
Kopsky	6	0	6	0	6	0	6	0	6	0	— 59	6
E. Ohrt	6	0	6	0	6	0	6	0	6	0		
Bello	0	6	0	6	0	6	0	6	0	6	— 60	6
Cameron	5	0	6	0	6	0	6	0	6	0		
Kaiser	0	6	0	3	0	3	0	6	0	6	— 53	6
Spencer	4	2	0	6	0	4	0	4	0	6		
Carroll	0	0	5	0	6	0	6	0	6	0	— 49	6

There was the usual preliminaries, noise and bustle in connection with the start of the annual "grind," the 24th, by the way. After the riders had been sent around the track in a parade, with an introduction for each team, and a flashlight had been taken

SCORE AT 42 HOURS

Teams	Miles
Goullet-Grenda	840.9
McNamara-Spears	840.9
Egg-Dupuy	840.9
Hill-Drobach	840.9
Root-Madden	840.9
Carmen-Wiley	840.9
Kaiser-Cameron	840.9
Debaetes-Walthour	840.9
Lawson-Mitten	840.9
Eaton-Ryan	840.9
Thomas-Hans Ohrt	840.9
Smith-Kopsky	840.8
Ernest Ohrt-Bello	840.8

Goullet and Grenda leading.

Record is 888.2 miles and was made by Lawson and Drobach in 1914.

of the start, the Hon. Judge Edward E. McCall fired the shot that sent the riders on their long journey.

The following teams started in the race,

Tom Bello, Who Is Making His Six-Day Debut

the first named rider starting for the team: Alfred Grenda and Alfred Goullet, Reggie McNamara and Bob Spears, Marcel Depuy and Oscar Egg, Peter Drobach and Fred Hill, Eddie Root and Eddie Madden, Clarence Carman and George Wiley, George Cameron and Harry Kaiser, Bobby Walthour and Michael Debaets, Joe Kopsky and Tommy Smith, Worth Mitten and Iver Lawson, Ray Eaton and Martin Ryan, Ernest Ohrt and Tom Bello, Lloyd Thomas and Hans Ohrt and William Spencer and Edward Carroll. At the eleventh hour Jimmy Moran, who was to have ridden the race with Hans Ohrt, announced that he did not care to ride the race and Lloyd Thomas was substituted in his place. When Victor Linart was injured in the paced race on Saturday night he was forced out of the race. Debaets was put in his place to ride with Walthour. Debaets was originally scheduled to ride with Bello, but Ernest Ohrt was teamed with the Brooklyn Italian instead.

Riders Set Steady Pace

A stiff pace was set from the start, but the riders later on set down to a steady grind, which was now and then intermingled with a sprint. At the end of the first mile Eddie Root led, while Lloyd Thomas led at the five-mile station. George Wiley won the first special prize of $5 for a half-mile sprint, Kaiser and Grenda also copping a $5 bill for a like effort. Grenda later on in the day won a one-mile race for $10. Harry Kaiser led at the 12-hour point with 267.4 miles to his credit, the record being 278.2 miles. Tom Bello led at midnight, or 24 hours, the score being 516.8 miles, as against 537.9 miles, the record.

Shortly after the midnight score had been posted, and while the riders were fatigued from the ten sprints in the evening, a rabid spectator gave $50 for five $10 sprints over the mile route, the sprints to run consecutively. The sprints were won by Eddie Root, Reggie McNamara, Marcel Dupuy, Alfred Grenda and Alfred Goullet, in the order named.

During the final sprint Joe Kopsky got nervous and started a sprint that proved to be his undoing. Kopsky opened up a big gap on the field and in the "jam" that started Kopsky and his mate Tommy Smith were lapped, while Edward Carroll and William Spencer and Ernest Ohrt and Tom Bello were each penalized for making poor pickups. Shortly after the sprinting ceased Carroll complained of sickness and later withdrew from the race.

The Mounts of the Riders

In this year's race the following bicycles are being used: Alfred Grenda and Alfred Goullet, Red Wings; Hans Ohrt, Pierce, and Lloyd Thomas, Caminade; Clarence Carman, New England, and George Wiley, Pierce and Caminade; Ernest Ohrt,

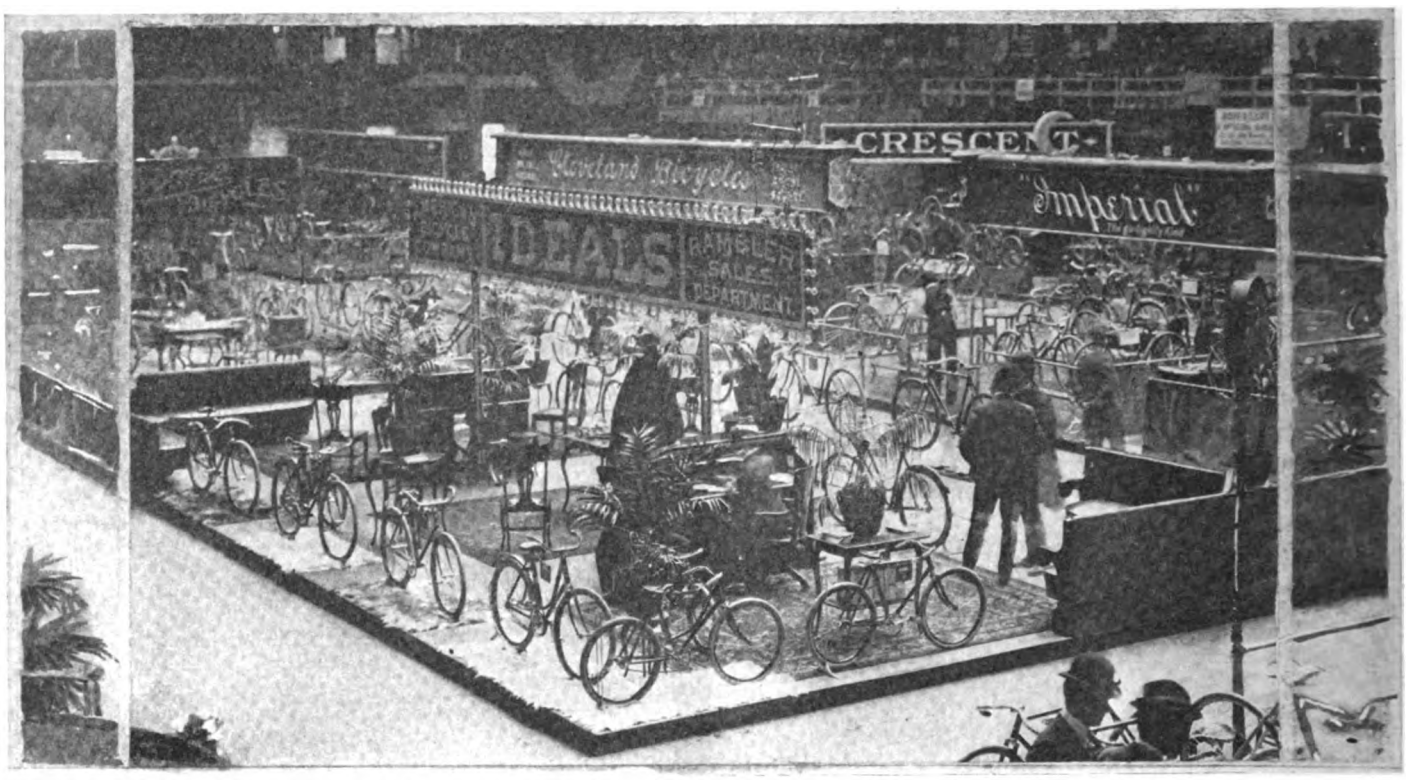
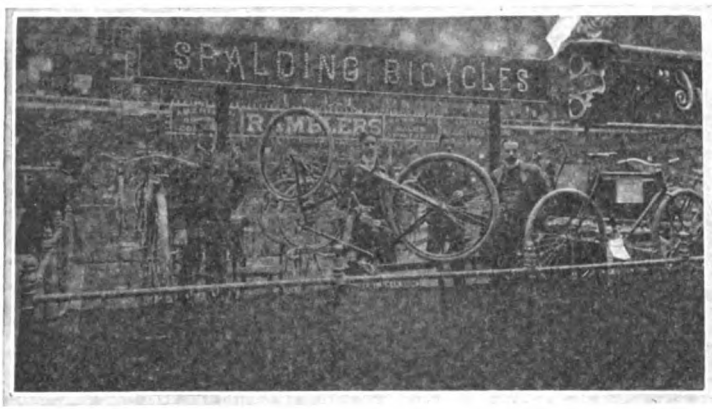
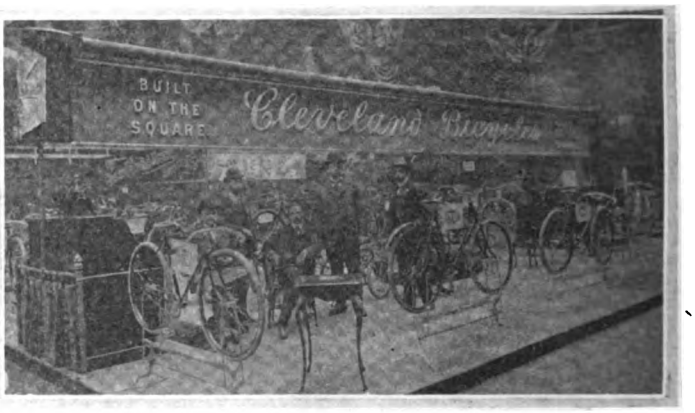
LOOKING BACK AT CYCLE SHOWS OF YESTERYEAR







HERE is a collection of cycle show pictures which will carry the veterans back to thoughts of trade conditions as they knew them well nigh a score of years ago.

They picture the cycle show that was staged in Madison Square Garden during the Fall of 1899, in the "heyday" of the pedal-propelled two-wheeler. Aside from the sentiment attaching to the pictures for the old-timers, there is also a touch of interest in them for the younger folks in the trade, for attaching to the finding of the pictures and their exclusive use in "Motor Cycle Illustrated" there is a story of the show just past.

Manager Stewart, who presides at the Garden, took Show Manager A. B. Coffman aside on Thursday afternoon during show week and told him he would like to have him look through a big collection of old pictures in the Garden storeroom. And Coffman took a minute off from his task to go through the dust-covered reminders of yesteryear, and these are what he uncovered.

Does he prize them? Well, "Motor Cycle Illustrated" pretty nearly had to put up a bond for their safe return before he would grant his permission for them to be used.

MANY MODELS IN THE DE LUXE LINE

Vim Cycle & Hardware Co., Buffalo, Offer Light and Heavy Road Service and Racing Models—Company Prides Itself on Careful Method of Construction of Their Bicycles

BUFFALO, N. Y., Dec. 18.—There are many different models in the 1917 line of Vim De Luxe line of bicycles, which are offered by the Vim Cycle & Hardware Co., of this city. The line includes bicycles for the racing men, for light and heavy road riding and for delivery service. The prices range from $37.50 up to and including $47.50.

The company prides itself on the method of construction of the Vim De Luxe bicycles. No details are overlooked in the construction of these bicycles. From the raw material to the brazing, testing, nickeling and finishing great care is taken to secure the best material and the most skilled workmen possible.

Feature Quality and Design

In the Vim De Luxe bicycles three essentials are combined: the quality of material, the quality of workmanship and the simplicity of design. Every piece of material used is tried and tested and no material will be used that fails to come up to the high standard set. The workers that build the De Luxe bicycles are highly skilled and the effective simplicity of design has been secured through the collaboration of experienced designers and engineers.

The "open hearth" method of brazing is used in De Luxe bicycles. This method is claimed to be the most efficient by the makers. The joint to be brazed is placed on a firebrick furnace and a high-pressure gas blast plays onto the joint. When the spelter is fused the operator flows it through the joint and from experience knows when to withdraw the frame to prevent warping. This method insures a strong union.

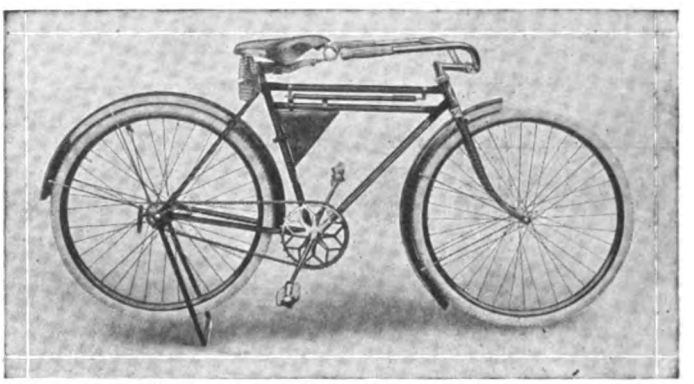
Another item that the builders are proud of is their frame testing and truing methods. Before being brazed the frames are put in a jig and lined up before they go to the operator, while the same process is followed after brazing. The front forks are also tested and trued before being brazed and when assembled the bicycle is in true alignment.

The enameling and nickeling processes employed on De Luxe bicycles are claimed by the makers to be the best obtainable. Five coats of enamel are applied by an air brush after the frames and forks have been put through a sand blasting process, which cleans all scale and makes a surface fitted for the enamel. A coat of rubbing varnish and a finishing coat of varnish are then applied. The parts to be nickeled are buffed thoroughly before a heavy coat of copper is applied. The finishing coat is then put on and the buffing wheel assures a plate that will stand hard usage.

The assembling of De Luxe bicycles is another item that is carefully watched. After a thorough inspection the parts are fitted and adjusted scientifically, so that the purchaser is assured of a bicycle that is correct.

The Vim De Luxe Roadster, Model 410, lists at $47.50 and is the highest priced model in the line. This make comes in the single-bar frame with outside joints. Is fitted with a one-piece hanger with annular bearings, motorcycle type and mudguards, Motorbyke No. 1 saddle, motorcycle type pedals, No. 50 Vim Suction guaranteed tires, reinforced handlebar, Bull Dog grips and has De Luxe finish. This model can be furnished in the double-bar frame.

Model 501. Vim de Luxe Racer



Model 410. Vim de Luxe Roadster

The Motor-Bike, Model 508, sells at $45. Is made up with double-bar frame, two-piece hanger, drop side guards, motorcycle type pedals, motorcycle type reinforced handlebars, turned cups and cones, which are specially hardened, and is furnished with special De Luxe finish.

Single-bar Frame on Roadster

Model 507, the De Luxe Roadster, is a single-bar frame with two-piece hanger. Is fitted with drop side guards, Tip Top saddle,, motorcycle type pedals, short rubber grips and has the special De Luxe finish. This model can also be supplied with double-bar frame, and the price is $40.

A more reasonable-priced machine is Model 506, which is listed at $42.50, with the equipment about the same as in Models 508 and 507. The De Luxe Heavy Road model comes with a single-bar, outside

Model 508. Vim de Luxe Motor-Bike Type

Model 407. Vim de Luxe Heavy Roadster

Digitized by Google

joint frame, one-piece annular ball bearing hanger, motorcycle type pedals, No. 40 Vim Suction guaranteed tires, box handlebar, Bull Dog grips and De Luxe finish. Sells at $42.50. Can be furnished in double-bar frame.

Model 408 is another heavy road model, which has similar equipment, and retails at $45.

For the speed merchants Model 501, the Vim De Luxe Racer, has been designed. It is a light single-bar machine, which is made up of a light gauge tubing and flush joints.

It is fitted with Thor racing hubs, Drome Champion racing saddle, Buffalo racing handlebars, Star racing pedals, and extra light spokes. The price on the racing models is $37.50.

INTER-CLUB MEETING

Re-elect McIntyre and Tonjes—To Eliminate Post Entries at All Races

NEW YORK, N. Y., Dec. 20.—At a meeting of the Inter-Club Amateur Road-Racing League, held Monday night, Dec. 11, at the rooms of the Unione Sportiva Italiana, D. J. McIntyre was re-elected president and C. J. H. Tonges, the secretary, was again chosen.

It was agreed at the meeting to do away with post entries at all races run under the jurisdiction of the league, and that when one rider left a club to join another he had to ride as an unattached rider for at least six months. In the handicapping for the races it was decided that riders will be given handicaps every 30 seconds, which will tend to make the back markers work harder to win.

An agreement, a mutual one, by the way, was made between the clubs to provide five time prizes in each race with the minimum value of $5 for the last one. The next meeting, at which time the schedule of races for the coming year will be given out, will be held Jan. 8, while the annual banquet is scheduled for Jan. 24.

BICYCLE DEMAND IN COLUMBUS

COLUMBUS, O.—Bicycle dealers in Columbus report a strong demand for the two-wheelers for Christmas giving. The increase in business for the holidays is more noticeable than for years past. In fact, there is such a good demand for bicycles that stocks are quite low. Many of the dealers have large shipments arriving shortly after the first of the year.

ATTARDI WINS FROM SCRATCH

BROOKLYN, N. Y., Dec. 16.—Anthony Attardi, a member of the Fifth Company of the Thirteenth Regiment, won the two-mile handicap bicycle race run at the regimental armory last night. Attardi started from scratch and beat J. O'Shea, Fifth Company, 50 yards, and F. Finch, First Company, 190 yards, in 4:58.

TOM BIRD ON SELLING TRIP

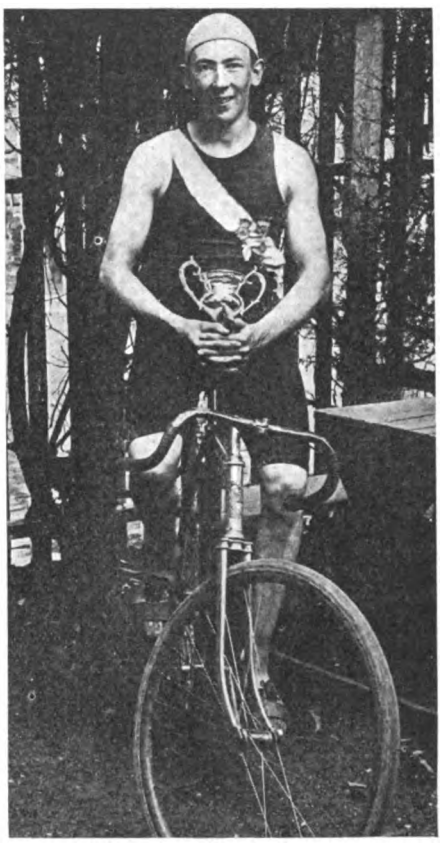
MARSHAL, Minn., Dec. 15.—Tom Bird, the man who made the Iver Johnson bicycle famous, has just completed his semi-annual tour.

He sold a shipment to Healy & Sons, and with his nephew, R. D. Balwin, called on many nearby towns.

BOOM IN BICYCLE SALES TO WOMEN

Demand for Ladies' Models in Toronto Has Been Heavy of Late; Some Feminine Buyers Drive to Agencies in Autos

TORONTO, Ont.—Convincing evidence that 1916 was really a big year for the bicycle is the fact that more ladies' bicycles were sold in Toronto during the past twelve months than were retailed in any year of the past decade. Reference to the sales books of one Toronto store, that of the Planet Bicycle Company, Queen street, east, shows that sixty-nine ladies' wheels were sold by this one concern. The Planet people sold forty-four 20-inch ladies' bicycles and twenty-five of the 22-inch frame type since last January 1. The latest sale for immediate use was booked on December 7 and, in addition, six or more ladies' bicycles are on order for Christmas delivery. These figures do not include a rather large number of girls' bicycles of juvenile size also sold by the Planet company during 1916.



Harry Hoffman, One of the Crack Riders of the Olympic Club of San Francisco, Cal.

It is interesting to note that, in many instances, women drove up to the Planet door in automobiles to purchase a bicycle for themselves. The company's statistics also show that practically all the ladies' bicycles sold during the year went to residents of the fashionable districts of Toronto. The names of the purchasers include leaders of the swell set and other prominent citizens.

The unique fact has been unfolded that a young lady of Toronto is being cured of curvature of the spine through the use of a bicycle. A prominent physician ordered the girl to ride a bicycle and it was found necessary to equip the wheel with a pair of Kelly handlebars set at odd angles. After a few months' exercise on this wheel, it has been found that the ailment is disappearing.

SPILLS AT ROCHESTER

Three Races Run at Indoor Meet—Gronkowski, Buffalo, Proves the Star

ROCHESTER, N. Y., Dec. 18.—Three bicycle races were held in connection with the meet of the National Reserves, Sixth Div., at the Armory, Saturday night, Dec. 9. There was plenty of spills, some of them bad ones, during the running of the bicycle races, but fortunately none of the riders were seriously injured.

Isadore Gronkowski, the Buffalo rider, was the star of the night. Gronkowski won the one-mile race from Wahl and Fred Roy; finished second to Roy in the three-mile race and won the two-mile event from Roy and Muehlbauer.

GOODYEAR SCOUTS TO HAVE CLUB HOUSE

AKRON, O.—Three troupes of boy scouts were given a banquet in the office dining room of the Goodyear plant, Wednesday night, December 13. P. W. Litchfield, vice-president and factory manager, announced that he would build the boys a club house, and would take six of them to Canada with him next summer. C. W. Seiberling, vice-president, offered to pay half of the expenses of each boy's uniform if the boy would earn the other half.

Talks were given by C. W. Bedford, organizer of the first troupe; P. W. Litchfield, C. W. Seiberling, Scout Executive Davis and Joseph L. Taylor. The boys are from 12 to 18 years old, and are employed at the Goodyear plant or are relatives of the employes.

CYCLISTS ARE WAR VICTIMS

NEWARK, N. J., Dec. 19.—Ernie Pye, the old Australian rider, has received word from Australia to the effect that George Morgan and James H. "Sandy" Sanberg, two famous Australian riders, have lost their lives in the fighting with the allied forces in France. Both Morgan and Sanberg have won many famous races in their native land. Sanberg, among his many wins, accounted for one Austral Wheel Race, and Morgan finished second in the Austral race in 1900, after pulling the winner, A. C. Forbes, for almost the entire distance.

CARMAN AFTER RECORD

NEW YORK, N. Y., Dec. 19.—Clarence Carman, the American paced champion, will attempt to better the famous mile done by Charlie "Mile-a-Minute" Murphy, back in 1899, when that rider did the distance back of a locomotive and a car on the Long Island R. R., covering the distance in 57 4-5 seconds.

Digitized by Google

TWO ALFS WIN PRELIMINARY RACES

Grenda Beats McNamara in Match and Cops Ten-Mile-Open—Goullet Captures Alternance Match—Paced Riders Unfortunate

MADISON SQUARE GARDEN, Dec. 18.—Alfred Grenda and his pal and friend, Alfred Goullet, who make up one of the favorite teams in the six-day race now being run in this building, were the bright stars of the preliminary sprint meet on Saturday night last. Grenda defeated Reggie McNamara, a fellow Australian, in a match race and later in the evening won the ten-mile open for the professionals, and Goullet won the Alternance match, defeating Bob Spears, · Marcel Dupuy and Eddie Madden.

In the match with McNamara Grenda caught the former in less than two miles in the pursuit heat and in the sprint match he won by a narrow margin in a hard fought race. In the Alternance match Goullet and Madden were tied after all the heats had been run and Goullet beat Madden in an extra heat to decide the places. Spears and Dupuy were also tied for third place and to the surprise of everyone Dupuy beat the fast Australian.

Lap Money Caused Pace

Lap money had the riders on the go in the ten-mile open from the start. Jimmy Moran, who was to have started in the six-day race, was among the starters, but the fast pace set caused him not only to retire from the ten-mile open, but he announced his withdrawal from the "grind" as well. Peter Drobach gathered in about 20 or more of the dollar bills offered for the leaders of the laps, while Hans Ohrt was also after the lap money.

Out of a field of 21 starters in the long race half of them were in when sprinting time came. Hans Ohrt led until Grenda passed him at three laps to go, McNamara and Hill trailing Grenda. McNamara tried hard to beat out Grenda, but the big fellow was too strong and he won by a length from McNamara, with Hill third and Eddie Madden fourth. A half-mile handicap for the professionals was won by Ed J. Carroll, the Californian, with William Spencer, his six-day mate, in second place.

Victor Linart Is Hurt

Hard luck pursued the motor-paced riders. Wiley punctured in his heat and in the final Victor Linart fell when his tire rolled off and he was so badly cut and shaken up that the physicians advised that he be withdrawn from the six-day race. Clarence Carman won, with Linart receiving second money, while George Wiley and Bobby Walthour finished third and fourth respectively.

Fred Taylor and Harry Horan, two members of the Bay View Wheelmen, of Newark, won both amateur races. Horan captured the half-mile handicap and Taylor the three-mile open. Summaries:

Half-mile handicap, amateur—Won by Harry Horan, Newark, 25 yards; second, Fred Taylor, Newark, scratch; third, Marcel Berger, San Francisco. Time, 59⅘ seconds.

Three-mile open, amateur—Won by Fred Taylor, Newark; second, Nelson Johnson, New York; third, Harry Hoffman, San Francisco. Time, 6:23.

Half-mile handicap, professional—Won by Ed Carroll, San Francisco, 30 yards; second, William Spencer, Toronto, 25 yards; third, Eddie Root, Boston, 20 yards; fourth, Tommy Smith, Newark, 30 yards. Time, 58⅕.

Ten-mile open, professional—Won by Alfred Grenda, Australia; second, Reggie McNamara, Australia; third, Fred Hill, Boston; fourth, Eddie Madden, Newark. Time, 21:35⅘.

Match race, professional, Alfred Grenda vs. Reggie McNamara—First heat (pursuit) won by Grenda. Time, 4:08⅕. Distance, 1 mile 1,672 yards. Second heat (one-mile sprint) won by Grenda. Time, 4:17.

Five-mile motor-paced, professional—Won by Clarence Carman, Jamaica, L. I.; second, Victor Linart, Belgium; third, George Wiley, Syracuse; fourth, Bobby Walthour, Atlanta. Time of heats, 8:02⅖ and 8:08⅗.

The alternance match, professional—Won by Alfred Goullet, Newark; second, Eddie Madden, Newark; third, Marcel Dupuy, France; fourth, Bob Spears, Australia. First heat won by Goullet; second, Madden; third, Dupuy. Second heat won by Spears; second, Madden, third, Dupuy. Third heat won by Dupuy; second, Goullet; third, Spears; fourth heat won by Madden; second, Goullet; third, Spears. Madden and Goullet were tied for first with 20 points, Goullet winning the heat to decide. Spears and Dupuy were tied for third and Dupuy won the heat to decide the place.

THE 6-DAY RACE

(Continued from page 35)

Red Wing, and Tom Bello, Bastide and Caminade; George Cameron, Red Wing and Caminade; Harry Kaiser, New England; Ray Eaton, Caminade, and Martin Ryan, New England and McDougall Special; Edward Carroll, Pierce, and William Spencer, Massey-Harris; Iver Lawson, Pierce, and Worth Mitten, Chater-Lea; Eddie Root and Eddie Madden, New England; Michael Debaets, Pierce, and Bobby Walthour, Caminade and Bastide; Peter Drobach, Caminade, and Fred Hill, McDougall Special; Reggie McNamara, Caminade, and Bob Spears, Caminade and McDougall Special; Oscar Egg, Caminade, and Marcel Dupuy, Bastide; Joe Kopsky and Tommy Smith, Caminade.

NOTES OF THE GRIND

Carroll and Spencer, aged 21 and 22 years, respectively, were called the "pony team." Ponies cannot stand the work of truck horses and Carroll found the going too hard and was forced to withdraw.

Willie Bolles, the caretaker of the Newark Velodrome, was on hand early and stopped among the riders until the wee small hours. Willie's chief duty was dodging the manager of the race, who Willie thought might put him to work.

Joe Kopsky now realizes that it is foolish to start anything that you cannot finish. Joe started a "jam," as sprints are called in race track parlance, and before the trouble finished he and his mate, Smith, were lapped.

Joe Fogler, one of the old-time six-day riders, is now a clerk of course, while Jimmy Moran is a trackside handler. A few other old riders are occupied in various duties about the race.

According to an announcement in the program all records made last year have been thrown out by the National Cycling Association on account of the track last year being short. The records of 1914 are now the official marks.

Last Minute Motorcycle News

HILLIARD THE FT. WORTH CHAMPION

Youngster Vanquishes Veteran Lewis in Two of Three Races of Ft. Worth M. C.

FORT WORTH, Tex., Dec. 18.—Henry Lewis, veteran motorcycle race rider, was forced to yield to A. L. Hilliard, of the younger generation, in the races on the Fort Worth race course, held under the auspices of the Fort Worth M. C. last Sunday to determine the championship of this section. It was an all-Fort Worth event, and four riders were entered.

Hilliard did not win the honors alone, for it was Old Man Jinx that put Lewis out of the running and gave the younger star the decision. Lewis on his specially built racing machine, on which he has won many a race, took a good lead in the first race, a three-mile event, with Hilliard, Excelsior, second; Nix, Indian, third, and Yarbrough, Harley-Davidson, fourth. On the second lap, however, Lewis broke a chain and was out of that race, yielding first place to Hilliard. Results—Hilliard, first; Nix, second; Yarbrough, third. Time, 3:21.

In the second event Hilliard took a slight lead, but was hard pressed by Lewis, who had good prospects of passing the Excelsior when the veteran took a spill on the south turn which came near resulting disastrously. Old Man Jinx again put the veteran out of the race just as he thought he had it won. Results—Hilliard, first; Nix, second; Yarbrough, third. Time, 5.27.

Hilliard established a good lead in the third race, a 10-mile match event between Hilliard and Lewis for championship honors.

Lewis was riding well and there was a chance for the veteran to win on the home stretch, but the jinx blocked the game, for Lewis broke a cylinder on the fifth lap and this match and the time trials, scheduled as the final event, had to be called off.

COLUMBIA EXPECTS INCREASE

VICTORIA, B. C.—The Province of British Columbia has arranged for the manufacture of 1,500 motorcycle number plates for 1917 licenses. The province evidently anticipates a big sale of motorcycles in 1917, as approximately 900 machines were registered during 1916. Seventy-five special number plates have also been ordered for the use of dealers in this province.

NEW ENGLAND DEALERS' ASSOCIATION PLANS

Active Membership Campaign Swelling Ranks of Body With Headquarters in Boston

BOSTON, Mass., Dec. 18.—The New England Motorcycle Dealers' Association has begun an active campaign which is bringing in members by the wholesale, so to speak.

The association which has its offices at the Hotel Oxford is sending out to all dealers a letter explaining the purposes of the association, its aims and the way its various undertakings are to be put through. Together with this letter goes a question sheet asking for the approval of the dealer of the policy, one step at a time, and leaving space for an expression of individual opinion on the part of the prospective member in case his ideas differ from those adopted by the association.

In this manner, the reasons that are keeping some dealers from joining the ranks of the body are ascertained and means are being taken to eliminate them and bring the dissenters into line; at the same time, a number of valuable ideas are being returned to the membership committee as to ways and means of settling, or attacking the problem of settling, the most urgent questions that beset the motorcycle dealer in the New England territory.

The problems which the association is taking up, one at a time of course, are that of adopting a scale of universal allowances and selling prices on used machines; a universal installment sales plan; a plan to have all dealers sell both motorcycles and sidecars f. o. b. factory; and the maintenance of a "dead beat" list to protect all members of the association from the habitual bill jumper.

MURRAY'S STORE REMODELED

KANSAS CITY, Mo., Dec. 12.—John Murray, agent for Harley-Davidson motorcycles at Kansas City, recently remodeled his place on East Fifteenth street. Mr. Murray enlarged the office and sales floor portion of his establishment and made the shop in the rear more compact. The office is decorated in the drab and black colors of the 1916 Harley-Davidson machines; the walls of the cases and desks, being of metal, were enameled with the above mentioned colors.

The combination is striking and attractive, and making the shop the best decorated on the interior of any in the city.

Soon after the remodeling was completed Mr. Murray decided to engage in the bicycle business during the coming season, as well as the motorcycle, and installed a complete line of the new Harley-Davidson bicycles.

THEY LIKED THE NEW YORK SHOW

BOSTON, Mass., Dec. 18.—George W. Campbell and Ben C. Straube, of the General Motorcycle Sales Co., and Jes Campbell, of the Harley-Davidson Boston branch, are among the boosters who returned from the New York Show with big news of the doings at the Metropolis.

MATHIS PAYS VISIT TO ROCHESTER

ROCHESTER, N. Y., Dec. 18.—Fred Mathis, sales manager of the Excelsior Motor Mfg. and Supply Co., was in this city a few days. While here he made his headquarters with Art Rochow, his former traveling man, who is now connected with Merkel & Spacher, local Excelsior and Henderson representatives. Mr. Mathis expressed satisfaction over the business outlook in Rochester and vicinity.

GETTING FACTORY SERVICE IDEA

BOSTON, Mass, Dec. 18.—In order to keep the Walker-Harley-Davidson Service Station up to date, W. J. Walker has sent his head mechanic, John A. Lane, to the Harley-Davidson factory to study the latest factory methods and to become fully acquainted with all the ins and outs of the 1917 models.

More News of the Dealers

LINING UP SPRING ORDERS

ROCHESTER, N. Y., Dec. 18.—The George L. Miner Co., local Indian representative, has a Powerplus demonstrator at work on the road and is lining up an unusual lot of business for spring delivery. The firm is also making a drive at Christmas business with the Indian bicycle line.

JACK HORNER INCORPORATION

TRENTON, N. J., Dec. 18.—The Jack Horner Co., of Plainfield, has just been incorporated to deal in motorcycles, bicycles and sporting goods; capitalization, $10,000. Incorporators—Robert P. Horner, Charles DeGraw, A. G. Thaanum and Jacob D. Koebler, of New York.

TENTH YEAR FOR THE THOR

ROCHESTER, N. Y., Dec. 18.—Flynn Bros., 93 Monroe avenue, have signed up for their tenth year to handle the Thor line. The firm also handles the Cyclemotor and the Vim bicycles, and is preparing for unusual activity during 1917.

A HELPFUL BUSINESS CARD

ROCHESTER, N. Y., Dec. 18.—Towner Bros., local Dayton dealers, are using an interesting card for advertising purposes. On the face side is the firm name and address, with the F. A. M. Registered Repairshop symbol, and on the reverse is a list of mileages from Rochester to 94 cities and towns.

FOR DEPARTMENT STORE MEN

ROCHESTER, N. Y., Dec. 18.—The Wagner-Dolph Co., Inc., Harley-Davidson and Cleveland agents in this city, have just delivered a 1917 Harley-Davidson to the Sibley, Lindsay & Curr Co., which conducts the largest department store here. Three more machines of the same type have been booked for spring delivery. The mounts are to be used by the firm's carpet-layers, window shade men and collectors.

BUSY IN SAN JOAQUIN VALLEY

FRESNO, Cal.—Guy Steele, who handles the San Joaquin Valley territory for the Appeal Mfg. & Jobbing Co., distributors of Harley-Davidson motorcycles and Miami bicycles, and handling a big trade in accessories and tires, reports that some of the Harley-Davidson dealers in the Valley have already delivered more 1917 machines than their sales in all of last year put together.

Bicycle dealers have been watching the announcements of the new Harley-Davidson bicycle and many of them have already instructed Steele to hold the agency for them.

CONTINUE WITH HARLEY-DAVIDSON

EASTON, Pa.—"After looking the new machines over at the New York Show," says the Boyer Cycle Co., "we decided to continue handling the Harley-Davidson for 1917. We sold 27 of the 1916 models, and have placed no less than 75 Harley-Davidsons in three years—more motorcycles than were ever sold in this city in the same time before. We have already delivered two of the 1917 machines and have orders for six more for March 15 delivery.

BENSON STOPS AT AKRON

MILWAUKEE, Wis., Dec. 16.—On his journey to the New York Show, J. A. Benson, salesmanager of the A. O. Smith Corp., stopped off at Akron, O., where he made arrangements with Manager Tucker, of the Buckeye Motor & Cycle Co., to again distribute Smith Motor Wheels and Smith Flyers through a large portion of Ohio.

HENDERSON AGENTS IN KNOXVILLE

KNOXVILLE, Tenn.—The Superior Motor Sales Co., 2009 Washington avenue, has just taken on the agency for the Henderson motorcycle and will open up a thoroughly equipped repairshop and salesroom in the early spring. The firm is made up of energetic workers who promise to meet all the requirements of riders in their district, and plans are being developed for an aggressive sales campaign to go into effect early in 1917.

MORE TERRITORY FOR ROOS

COUNCIL BLUFFS, IA.—Victor H. Roos, the well-known motorcycle man of Omaha, has been appointed Harley-Davidson representative in Council Bluffs and Pottawattamie County. Roos is planning to give the motorcycle riders on this side of the river the same attention and service that have won him friends in Omaha.

GETS VERDICT

Shreveport Motorcyclist Receives $1,050 for Injuries Sustained

SHREVEPORT, La., Dec.—After dragging through the courts for over a year, the suit of H. C. Potter, a motorcyclist, against John Glassel for injuries sustained when the latter's automobile struck the rider was settled last Tuesday night; the plaintiff received a verdict of $1,050. Potter asked for $12,347.

The accident occurred on the Belcher road and as a result of it Potter was laid up in the hospital for some months and was not expected to live. In his suit he maintained that the automobilist was driving on the wrong side of the road but the defendant brought evidence to bear that the motorcyclist had cut him off. The jury took two hours to come to a decision.

SAGINAW DEALER HOLDS RUN

SAGINAW, Mich., Dec. 18.—Maurice Canutson, Smith Motor Wheel dealer, recently run a sociability run for Smith Motor Wheel riders. The party rode through all the main streets of the city and they picked up other riders until at one time the parade was three blocks long.

GOODYEAR SCHOOL A SUCCESS

AKRON, O.—More than 1,200 pupils have been enrolled since the first of the year in the Goodyear factory school. At present 515 men are taking up the school work, 100 of whom are aliens.

The classes are heard five days each week, starting as early as 6:30 a. m., and not finishing until 10:30 p. m. Besides Manager Craigmile, eight instructors are being kept busy.

FAT ORDERS FROM WEED

KANSAS CITY, Mo., Dec. 12.—R. A. Weed, of the Saufley Supply Company, who is now in Oklahoma for his company, making what he calls a "Santa Claus" trip to the Southern dealers, has been sending back a large amount of new business as well as nice orders from old customers. Mr. Weed will not complete his trip until a few days before Christmas.

RUBBER PLANT IN WICHITA

KANSAS CITY, Mo., Dec. 7.—The Midcontinent Tire Manufacturing Company is erecting a $65,000 plant at Wichita, Kan. The first unit will be a two-story building 280x60 feet, and constructed of re-enforced concrete so that additions can later be made. The contract also calls for the construction of a vulcanizer room, machine room and boiler house.

WHITING'S SUB-AGENTS ARE BUSY

DENVER, Colo., Dec. 16.—"Business looks fairly good for this time of year," remarked Walter W. Whiting, Harley-Davidson distributor for Colorado, last week to a representative of **Motor Cycle Illustrated**. "My sub-agents throughout the State are sending in good reports. I expect to receive a shipment of Harley-Davidson bicycles within a few days now and we are going after Christmas trade harder than ever before."

READING STANDARDS IN DENVER

DENVER, Colo., Dec. 16.—The Western Supplies Company, 1448-52 Larimer street, has just received its first shipment of 1917 Reading Standard motorcycles and has them in display on their salesroom floor. The Western Supply Company is continuing its sale of used machines with considerable success. They are offering these from $25 up.

ANOTHER HOLIDAY SALES BOOSTER

DENVER, Colo., Dec. 16.—The biggest motorcycle advertiser in Colorado so far this year is Peter Fox, 321 Main street, Grand Junction, Colo., Indian agent in that city. Mr. Fox has been pushing the holiday sales of motorcycles as well as bicycles and has been using a quarter of a page in the newspapers in Grand Junction.

RACE PROGRAM SNOWED UNDER

DENVER, Colo., Dec. 16.—The 10-mile motorcycle race, which was to have been one of the chief events at the Stock Show held in Grand Junction, Colo., last week, was postponed on account of bad weather. The day before the race was to have been run a snowstorm visited Grand Junction.

BUMGARDNER IS BUSY

SAN FRANCISCO.—John H. Baumgardner, the Indian agent, has noticed an increase in business the last week in spite of the rain, which is inclined to slacken up things in the motorcycle trade. Two orders were filled for machines to be used for commercial purposes by the Don Lee Co. and the Knarsten Grocery store.

The Choice of 1917

The CORBIN-BROWN SPEEDOMETER

1917 is going to reach the high watermark of motorcycle business. The swarm of advance orders already indicates this. And this means that you are going to sell more speedometers. There is no doubt about it.

A greater number of Corbin-Brown Speedometers than ever before are going into service during 1917. The demand has grown tremendously. Quantities have been doubled to meet this demand.

Throughout the length and breadth of this country the Corbin-Brown is known. Highest authorities, including the U. S. Government, have endorsed it. Motorcyclists recognize it as the standard speedometer equipment.

We can fill your orders promptly and satisfactorily. Order now your 1917 stock. The Corbin-Brown is going to sell. Are you going to sell it? Get in touch with us at once.

The Cleveland Lightweight

75 MILES to the gallon

Price $160.00

With Kick Starter, $170.00

F. O. B. Cleveland, O.

Highest quality; Bosch Magneto; S. K. F. Ball Bearings; Multiple disc clutch; Firestone non-skid tires; aluminum castings; Brown & Barlow Carburetor; straight line worm drive; best in every way.

This Is What Shook Them Up!

The Cleveland Lightweight turned the trick—broke up all old notions about motorcycles—pointed the way—and got there, all in a year.

The dominating word in the motorcycle business today is "Lightweight." Look around and see them all coming to it.

And the dominating Lightweight is the Cleveland—here—tried—proved—accepted—acknowledged—unrivalled—trailed at every point that can be copied, but above competition because of the things in it that can't be copied on account of our design patents.

Win with the winner. Take no chances, but make your 1917 profits with the machine that built profits in 1916—the machine that fits the market, that changed all the ideas about what is the right motorcycle, and that goes into 1917 with a clean record and bigger sales possibilities than anything else on two wheels.

WOULD MAINTENANCE GUARANTEE HELP SALES?

(Continued from page 25)

I became a motorcyclist. I will never again keep an expense account for my motorcycle, because I feel that the physical benefits I have derived are worth all and more than I spend in riding.

But at the beginning it was of vital importance for me to know about expenses. I believe every young man feels the same way. They hear a lot of talk about motorcycle economy, but no one seems ready to give them the hard facts.

When I consider my own case (it was purely by accident that I struck the copies of **Motor Cycle Illustrated** and got some data), I feel that dealers must be overlooking a lot of bets. If I could have been won over by a simple statement of average expenses—and I know that I could have been—it stands to reason that plenty of others can be handled in the same way.

That's why I suggest that it might be a good idea to guarantee the prospect that his maintenance outlay will not exceed $25 a year. He then has something definite to figure on.

If for any reason the maintenance ran above that figure for the year, the dealer would have to foot the additional bill—but there shouldn't be any such bill. In fact, I'm positive there wouldn't be.

It would be interesting to obtain the opinions of dealers and riders concerning the suggestion I have offered. What are their experiences in maintaining their machines? Isn't my $25 a year estimate a liberal one?

TO STANDARDIZE GAS

S. A. E. Appoints Committee to Confer with U. S. Bureaus.

NEW YORK, Dec. 18.—In an effort to standardize gasoline, the Society of Automobile Engineers has appointed a technical committee to co-operate with the Bureau of Standards and the Bureau of Mines of the United States in formulating and establishing gasoline specifications.

Tentative specifications have been issued by the Bureau of Mines and it is expected that simple tests will be suggested to permit of the ready recognition of the quality.

DISAPPEARS ON MOTORCYCLE

MILWAUKEE, Wis.—Circular letters are being sent out to dealers in Idaho and Montana in an effort to locate Earl Sullivan, who was last seen in Butte. Sullivan is about 18 years of age, tall and slender, with dark eyes and hair, and rides a Harley-Davidson 1915 model, motor number 11084K. The machine is equipped with electric lights and a sidecar. His license number was 5109 Washington.

Anyone coming in contact with this lad is requested to communicate with Fred M. Williams, 418 Fernwell bldg., Spokane, Wash.

ACTOR USES SMITH FLYER

MILWAUKEE, Wis., Dec. 16.—William Wolgast, of the team of Wolgast and Girlie, trick cyclists, is a strong booster for the Smith Motor Wheel and Smith Flyer. Wolgast recently returned from a two-year trip around the world. He uses a Smith Motor Wheel in his act and has shown it from Alaska to Australia. He recently purchased a Smith Flyer.

PROFITS IN USED MACHINE

DENVER, Col.—The Mead AutoCycle Co., 1336 Broadway, is a firm believer in the profit possibilities of the used machine market and is now pushing a large stock of second-hand mounts. The firm claims to have the largest stock of used machines in the Middle West.

NEW MOTOR WHEEL AGENTS

KANSAS CITY, Mo., Dec. 12.—The Schmelzer Arms Company recently announced the annexation of the Smith Motor Wheel agency at Kansas City. The Saufley Supply Company until recently handled the Smith Motor Wheel in this territory.

We Know You

Break the Ice with a *Morrow*

You know the prospect who bustles into your store and bellows, "I want to buy a bike for the boy but I want to be sure it's safe."

Right there is your opportunity to break the ice by showing him a Morrow equipped bicycle. You'll get right under his skin when his eyes light on the large braking surface of the Morrow—the largest of any coaster brake made. He sees before him the highest example of braking control that can be applied to a bicycle, and he is impressed.

Then, when you lift the rear wheel, and show him with what ease and speed it spins round on the slightest forward pressure on the pedal the sale is clinched.

Words are unnecessary, for Morrow deeds are more convincing.

TO THE THOUSAND ISLANDS BY TANDEM

(Continued from page 24)

Mohawk Valley was broken by the hills and valleys which help to make any trip interesting.

Houseville was our next stopping place, but not for gas. We simply had to stop and laugh at a sight that greeted us there. A farmer appeared ahead of us leading two cows on a rope, as we entered the village, and as they occupied nearly the whole road we were obliged to open up our muffler and put on some speed. As soon as we approached the cows both "moolies" took to their heels, or perhaps we should say hoofs, and started down the road at top speed with the farmer hitting the high spots behind them.

Slide, Kelly, Slide

At a critical moment friend farmer dropped the rope and slid along on his chin through a nice string of mud puddles, and at the same time we throttled the motor and the cows stopped. We took one look at that farmer's face and then hit the gravel for some place else. We could see we weren't wanted around there.

We reached Watertown at 2:55 P. M. and after having a plate of cream (the strongest liquid we could get), we took to the road again on the last leg to Alexandra Bay.

As we neared the bay we enjoyed a beautiful sight. There is a straight road leading into the town which goes over a big hill, and from the crest of this hill one looks down on the town and at the same time out over the St. Lawrence river. The town lies at the head of the little bay from which it derives its name. This bay affords smooth anchorage for the thousand and one motorboats which the wealthy owners of the various islands use for ferrying between the mainland and their summer homes. From the top of the hill referred to the traveler can view the river and the islands up and down the river as far as the eye can reach.

The town itself is made up mostly of boarding houses and hotels during the fall of the year, and there were many visitors on hand.

At Alexandria Bay

We arrived in Alexandra Bay at 5:15 P. M. and after securing lodgings for the night we had a big feed and then strolled around the town about four hours. During our stroll we witnessed the "Northern Lights," a wonderful sight for those who have had no previous experience with it.

After a good night's sleep we turned out the next morning at 8 o'clock, ate a hearty breakfast and then started out to see the sights among the islands. We hired a motorboat with a very capable guide and went through all the various channels and rifts, our guide pointing out objects of interest along the way. Some of the islands were very quaintly named, as, for example, the "Island of Just Room Enough," and the "Island of Hardly Room Enough." There were others with equally curious titles.

We landed on one island on which is an $11,000,000 castle, still unfinished, and climbed to the top of the tower to get a bird's-eye view of the islands. After a number of interesting experiences, some of which were as amusing as they were interesting, we went back to the boat and returned to Alexandra Bay, where we arrived after a delightful four-hour sail.

We discovered that we had worked up quite decent appetites and made the most of a good dinner. Then we were ready to think of the homeward trip, and after brief preparations we took to the road again, headed for l'il old New York. It was a crackerjack trip throughout, and in addition to having a fine time on our motorcycle we saw some country that was well worth traveling for.

FROM TEXAS

Dealers Report Thriving Business in and Around Ft. Worth

FORT WORTH, Tex.—J. W. Cook of the J. W. Cook Motorcycle Co. reports sales of Harley-Davidson macihnes this week as follows: Edward Cheatham, Jore J. Wilson, Hardy H. Price, O. L. Barnes, J. C. NaBanner, R. N. Nichols, Jim Newberry of Minerals, M. Yarbrough and Dewey Price.

The demand for good motorcycles in West Texas shows no falling off, according to Mr. Cook, who says he finds ready sale for every machine he can get.

J. A. Massie of the Burton Supply Co., which handles Indian motorcycles and bicycles in Fort Worth, reports a heavy demand for Indian twin three-speed electrically equipped machines. The repair business is also picking up at this time, he says.

AN ECHO *from the* SHOWS

The New York and Chicago Shows demonstrated one thing very positively, that the bicycle dealers of the country *know* that the New Departure Coaster Brake sells easily and quickly because of its excellent reputation.

This reputation has been honestly earned and will be just as honestly maintained by keeping the brake up to the highest standards of material, workmanship, and finish.

Having such a good Coaster Brake,—one that we know is right and guarantee it,—one that you can pin your faith to,—has been the inspiration of our effort to do things that really help you dealers sell your bicycles.

Fall in line with the live ones,—specify and stock the New Departure, "the brake that brought the bike back."

FIVE MONTHS IN THE BACK WOODS

Steele Tells of Adventures of Couple of Coast Boys This Summer—Motorcycle Useful.

LOS ANGELES.—Guy Steele, who represents the Appeal Mfg. & Jobbing Co., Harley-Davidson distributors in the San Joaquin Valley, has just learned of the experience of the Person brothers who spent a remarkable summer, made possible entirely by their Harley-Davidson mount.

Being ambitious to see the mountain and lumber country of Oregon they left Fresno on June 1, Arthur Person driving, with Marvin on the tandem of their model 16-F Harley-Davidson. They made a 1,025-mile trip into Oregon and from the main trail they went off through Grant Pass to Lakeview where they got a job for the summer. Their work required them to make trips repeatedly back and forth across the mountains where there were no roads, only the roughest kind of lumber trails. One day they made a trip of 150 miles with 150 lbs. of surveyors' stakes over country where there were no roads at all. They traversed backwoods settlements where the natives had never seen a motorcycle. They returned to Fresno in the fall arriving Oct. 20.

During the summer they covered over 5,000 miles, half of which was in country where there were no regular roads and the rest of it was all on mountain roads, including one trip to an alkali lake to see volcanic deposits and soda mines where the route lay through continuous deep dust and truck ruts.

Yet all through the summer they had no trouble with their machines and never spent a nickel for any item except tire repairs.

IT'S RISKY TO GAMBLE AGAINST FIRE LOSS

(Continued from page 31)

"There are clauses in the average insurance policy that you probably never imagined were there until you took a good close look. Here's an example of some queer ones that can be found:

"You cannot employ mechanics in your building for repairing the insured premises for more than 15 days at a time without notifying the insurance company.

"If your interest as insured is other than unconditional and sole ownership or if the property insured be a building on ground not owned by the insured, it invalidates your whole policy unless there is a rider attached showing this fact. In other words you shall not have one article in your possession such as a safe, cash register, oil tank or anything of that nature which you purchased on time and on which there is a sales contract or chattel mortgage without that fact being noted in your policy.

"If illuminating gas is generated or kept or used on the premises where benzine, dynamite, fire-works, gasoline, powder, naphtha, explosives, petroleum, phosphorus or any products of greater inflammability than kerosene oil of United States standard are stored, in case of fire your policy will be declared void."

These are only a few of the many things a dealer should know about fire insurance. We will take up more in the next installment of the interview with Mr. Isham.

FROM FRISCO

Bad Weather Does Not Check Lively Business

SAN FRANCISCO.—The Appeal Manufacturing & Jobbing Co. have received another carload of Harley-Davidson motorcycles. In spite of the rain and other weather conditions which affect materially the motorcycle trade, business is very satisfactory, many substantial country orders being taken.

Fred H. Bente, Excelsior agent, reports a fine business for this time of the year. The demand for second-hand machines continues with a pleasing number of calls for new machines.

PORTER SELLS FOUR

TORONTO, Canada.—Although winter has its firm grip on Canadian soil, W. H. Porter, Reading Standard representative, has recently ordered four more machines for immediate shipment. Winter seems to have no effect on the motorcycle enthusiasts, and Mr. Porter predicts that there will be no letup in business during the entire winter.

The distinctive silence of the four-cylinder Henderson is an outward indication of inner quality.

STANDARD

Pedals

The rider who braves the chill blasts and ice-bound roads of Winter is deeply appreciative of the sure-footedness and touch of comfort afforded him by the STANDARD No. 5 Pirate Pedal.

Its great strength, the result of the highest grade of materials and highest type of construction, is more than adequate to bear up under the strains of the sharp and vicious thrusts of the winter riding red-blooder. The shocks of the frozen road are broken and softened by the deep rubber cushions and the slippery-soled shoe finds a sure resting place on its corrugated surface.

Every type of Standard Pedal shows by its quality service the results that can only come from years of specialization.

Mechanical Accuracy

Six separate and distinct operations are performed by the huge automatic machines used in the "Elisco" process of tube manufacture.

Each one of these operations is gauged to a degree of mechanical accuracy that is wholly impossible where dependence is placed upon hand labor.

ELISCO

Light Gauge, Cold Rolled

STEEL TUBING

With our recently enlarged facilities we are still able to make reasonably prompt delivery of 18 and 20 gauge tubing in most sizes from ⅜ inch to 2 inch outside diameter.

Let us submit samples and quote prices.

COLD WEATHER STRIKES MILWAUKEE

Club Re-elects Officers and Plans for March Show—Looks Like a Big Sidecar Year

MILWAUKEE, Wis.—At its annual meeting the Milwaukee M. C. expressed its confidence in the present officers by re-electing them unanimously as follows:

President, Wallace Wrede; vice-president, Paul Bruess; secretary, Hugh Sharp; treasurer, C. T. Martin; sergeant-at-arms, Emil Harrisburger; directors, Louis Peterik, chairman; Bert Talbot, F. C. Basford, Maurice Miles and Arthur Davidson.

Treasurer Martin's report showed that during the past year, and more especially after the club moved into less expensive but more centrally and conveniently located quarters on West Water street, a big chunk had been taken out of the indebtedness.

Dances and Parties

Several dances, a theater party and motorcycle show are expected to put the local organization back on its feet in good financial standing before next May.

The Milwaukee motorcycle show will be held in the Auditorium in 1917, tentative dates, Saturday and Sunday, March 2 and 3. Local dealers are enthusiastic over the prospects of a successful show this season.

The Milwaukee club has organized a bowling league with four teams—"Carburetors," "Exhausts," "Handlebars" and "Saddles"—and the hurling is being done on the Milwaukee alleys Wednesday nights. At the present time, the "Exhausts," led by President Wrede as captain, are leading the league.

The middle of December saw the first heavy snow fall in Milwaukee and the riders got their taste also of the first zero weather. This means there will be a jump in sidecar sales according to dealers.

Louis Peterik, manager of the Mueller Cycle & Supply Co., the home town Harley-Davidson dealer, reports that his sales of sidecars have been phenomenal, which can be attributed to the fact that Peterik himself is an out and out sidecar enthusiast and has injected the spirit into his sales force.

William C. Knuth, salesman for the Badger State Motorcycle Co., Indian dealers, leaves for Springfield for a three months' training course in the mechanics of the Hendee product.

CARTOON FACTORY BOWLERS

MILWAUKEE, Wis.—The sporting page of the *Milwaukee Journal* for Sunday, December 10, was featured by a three-column cartoon showing members of the Harley-Davidson bowling league in action. Most of the sketches presented reasonably good likenesses of the boys and judging by the antics witnessed by the cartoonist the league is not lacking in activity.

RIDING SOUTH

Two Rochester Boys Work As They Go to New Location

ROCHESTER, N. Y., Dec. 18—Christ Langfeld and Charles Morse, two Rochester young men left on Saturday for a trip to Florida in an Indian Sidecar outfit.

The two have no particular city as their destination and do not know when they will get there as they intend to work in different places in order to pay their expenses and when they arrive in Florida, will stay in the city where they find the best positions.

ADAPTATION OF MOTOR WHEEL

AN adaptation of the Smith Motor Wheel to the propulsion of railway velocipedes is the subject of Patent No. 1,195,380, granted to H. Miller, of Milwaukee, Wis., and assigned to the A. O. Smith Co., of that city.

The Motor Wheel is supported by horizontal members from one portion of the rectangular frame of the velocipede, so that its traction wheel will travel on the left hand rail of the track. The traction wheel is flangeless and is driven from the crankshaft of the power plant by undergearing.

Provision is made to allow the traction wheel to follow the surface of the track and to raise the Motor Wheel in toto to permit of operating the vehicle by foot-power when desired.

NEWS

Baker, Murray & Imbrie INC.

Opening Salute of Our New Wholesale Sporting Goods Dep't

950 Davis Guns Will Be Sold at Prices That Make the Greatest Firearm Buy in the Market Today.

We have purchased the entire Davis stock and are offering these guns to the dealer at prices that have no parallel considering the continually rising quotations in all makes of guns. Two models. Davis Double Gun, Blue Steel, Hammerless, 12 gauge—28 inch; 16 gauge—28 inch; 16 gauge—30 inch. List price, $22.00.

Davis Double Gun, Genuine Damascus Barrel, Hammerless. 12 gauge—30 inch; 12 gauge—32 inch; 16 gauge—30 inch. List price, $30.00.

As our salesmen are also selling these guns to the trade we advise IMMEDIATE CORRESPONDENCE regarding DISCOUNTS.

You Can't Build Up a Fishing Tackle Business on Unknown Goods.

The angler is the most exacting of all purchasers. He has whims—they're part of the sport. He has a deep interest in new kinds of tackle. He wants known quality—and expects to pay for it.

Many of the most conspicuous dealer successes in the fishing tackle line are pinning their faith in that aristocrat of all tackles—Abbey & Imbrie.

Abbey & Imbrie have made quality tackle for 96 years. It is a name so fixed in the minds of sportsmen that to have its mark on fishing equipment mean **immediate** sale, **immediate** satisfaction and **immediate** recognition of your store as a first class place to buy.

Victor Junior Price Reduced

Fifty cents less than the price originally quoted—that's what you can have the Victor Junior for now. Four models in the 1917 Victor line.

Abbey & Imbrie.

Pierce Bicycle Notes

We have already closed 85% of our Pierce dealers in our old territory. In our new territory we have booked more orders to date than was received all last year.

Here's what Bicycle News says about Pierce Boy's Racer:

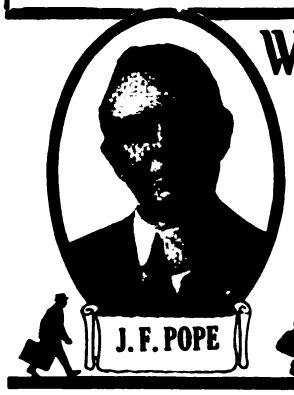
"A Bicycle must be very, very good, to call forth the voluntary expressions of approval from rival manufacturers that were directed toward the new Pierce Boy's Racer.

"It seemed to attract all classes. Even to those whose limited knowledge of the bicycle prevented them from appreciating the finer points of this newest Pierce conceded that it was a most attractive wheel.

"A well-known maker of bicycles was heard to remark: 'That is one of the prettiest-shaped frames I have ever seen.'"

The more a dealer knows about Pierce Bicycles the less he wants to talk about the ordinary jobbing wheel.

Who's Who on the Baker, Murray & Imbrie Trail



J. F. Pope—A valuable man to see whenever he calls. Knows the market thoroughly—knows when the dealer should buy—knows price tendencies. Conservative, but has made money for many a dealer because of advice for strong purchasing at right times. Believes in well-filled stocks—but never overloads a customer.

When the Big Spring Business Comes

Fortunate indeed will be Harley-Davidson dealers when the big spring buying season opens up.

The 1917 Harley-Davidson line has proved itself to be the greatest selling line in motorcycle history.

With the tremendous advantage of big early season sales, backed up with deliveries that surprised the entire trade—with heretofore unheard of power and speed for a stock machine—with everything that the most discriminating buyers want—a thoroughly finished product of the greatest engineers in the business—many Harley-Davidson dealers will show a truly remarkable increase in business over that of the 1916 season.

A number of dealers who have come into our organization since the opening of the 1917 season have forged far ahead of any previous year's business in which they handled other makes.

Although more than 90% of our 1917 production has been spoken for, we have room for a few more energetic businessmen who desire to enter our selling ranks as representative Harley-Davidson dealers.

Why not ask us about your town—and don't forget that we have an unbeatable line of bicycles.

BLUE STREAKS

Help the Dealer!

Goodyear Blue Streak Bicycle Tires are sold by us direct to the dealer only.

The price is the same to all dealers whether ten pairs or a hundred pairs are bought.

This is part of the Goodyear Policy which is written around the Goodyear Motto, "Help the Dealer."

No empty words are these.

For in both the manufacturing and the marketing of Goodyear Blue Streak Bicycle Tires, the interest of the dealer is ever borne in mind.

In manufacturing—by making the best bicycle tires possible, tires that will reflect credit upon the dealer who sells them, tires that build up his reputation and make friendly customers for the rest of his stock.

In marketing—by enabling the dealer to meet competition squarely—and to sell Goodyear Blue Streak Bicycle Tires at the same price as his competitor, no matter how big that competitor may be.

Help the Dealer!

No, these are not empty words with us.

13 PARK ROW
NEW YORK

Volume 12 **December 28, 1916** **Number 26**

OCTOBER EXPORTS SHOW MARKED DECLINE

Shipments Fall Off 25 Per Cent. During Tenth Month of 1916—Ten Month Period Shows Slight Increase Over Last Year—Bicycle Shipments Soar on Both Imports and Exports—Trade with Non Contiguous Territories Stands Still

NEW YORK, Dec. 26.—Once again our exports of motorcycles, as disclosed by the monthly summary of domestic and foreign commerce, have fallen off. In point of valuation during the month of October our exports declined a full 25 per cent. compared with the exports of October a year ago. Considering the number of pieces shipped, the showing was scarcely better, the figures showing a falling off of 22 per cent.

Tending somewhat to offset those figures bearing simply with the month of October are those which covered the ten month period ending with October. During that period in 1916, considering valuation, our exports of motorcycles showed an increase of 9 per cent. while considering the number of pieces shipped the increase figures out at 10 per cent.

The Figures

Getting right down to the figures, we shipped during October just past exactly 900 motorcycles valued at $173,478 as against 1,158 motorcycles valued at $232,128 shipped during October of 1915. During the period from January first to November first, 1916, our shipments of motorcycles comprised 14,412 pieces, valued at $2,725,552, as against only 13,017 pieces valued at $2,493,328, the figures bearing on the same period for 1915.

Far more encouraging are the figures bearing on our exports of bicycles and bicycle parts. During October just past such shipments were valued at $121,575 as against $81,900 for October of a year ago, the figures showing a percentage increase of 48. Even bigger is the increase shown by the statistics bearing on the ten month period. For that period just past the total valuation of our cycle exports was $889,535 which is just 69 per cent. better than the $525,109, the valuation placed on our cycle exports made during a similar period terminating with October, 1915.

As has been told in previous issues of **Motor Cycle Illustrated**, the figures bearing on our imports lump the motorcycle, bicycle and parts imports altogether. As our motorcycle imports amount to practically nothing it is safe to say that the figures relate almost entirely to our imports of bicycles and bicycle goods.

They show an increase of 31 per cent. for the imports of such goods during last October or October, 1915, cycle goods to the valuation of $3,021 having been brought into the country during October just past, as against only $2,272 for October of a year ago.

In considering the figures bearing on the ten month period the percentage increase amounts to 7 per cent., $56,805 worth of cycle goods having been brought in during the period ending with last October, as against merely $33,403 worth brought in during the ten month period ending with October, 1915.

Our two-wheeler trade with our noncontiguous territories is practically at a standstill, if in fact it is not slipping slightly. Considering Hawaii for the month of October, it showed a slight gain over that of October last year, Hawaii taking cycles to the value of $4,145 this year as against $3,940 during the same month of 1915. During the ten month period ending with October in both years the valuation of the shipments stood at practically $62,000. The same things holds true of Porto Rico. The shipment of cycles during the month of October fell off from $5,485 in valuation, where they stood for October, 1915, to $2,190 for October just past, but considering the ten month period the shipments practically held their own at $20,000 in valuation for both years.

Philippine Trade

The Philippine Islands, however, took far fewer two-wheelers during 1916 than during the year previous. We shipped cycle goods to the valuation of $1,526 to the Philippines during last October as against $2,756 for October of the year previous, while during the ten month period the total valuation of our cycle shipments to this far away territory was only $19,379 as against $42,968 for the same period terminating with October of a year ago.

WANTS MOTORCYCLE STORAGE REGULATED

Mayor Mitchel Enters Plea with Board of Aldermen for Adoption of Ordinance—Affects All Dealers

NEW YORK, Dec. 26.—That the absence of regulation of motorcycle shops and storage places constitutes a serious menace to the city, and that the Board of Aldermen in overlooking the necessity for such regulation is lax, is the sum and substance of a message sent to the board today by Mayor Mitchel.

An ordinance was introduced not quite a year ago relegating full control and regulation of motorcycle stores and storage places to the Fire Prevention Bureau and the passage of this ordinance was urged by Fire Commissioner Adamson.

It is because the Board of Aldermen failed to adopt the ordinance at that time and because now the report of the committee on buildings favors filing this ordinance, which virtually means killing it, that the Mayor is somewhat wrought up.

"I am convinced," wrote the Mayor, "that the danger to life and to property which is incident to the continued absence of regulation of motorcycle shops is a real and serious danger. The intelligent procedure is to enact the ordinance now so as to prevent the disaster and not to enact it after the disaster has occurred."

As a result of Mayor Mitchel's plea, the board has instructed the Welfare Committee to resume consideration of the proposed ordinance.

Just how the ordinance will affect motorcycle dealers in the Greater City, provided it is adopted, is a matter for conjecture, but the consensus of opinion is that with full power in the hands of the Fire Prevention Bureau the same regulations as are now in force for garages will be applied to motorcycle shops.

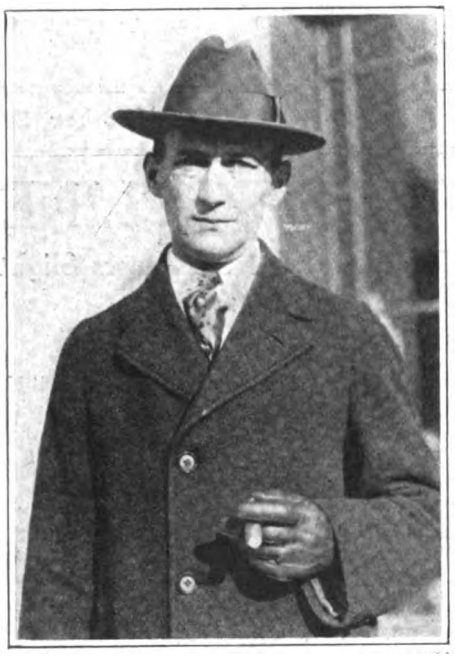
BUSY DAYS FOR WEISS

He Has His Hands Full as Purchasing Agent for the Henderson Factory

DETROIT, Dec. 26.—In these days of metal shortages and difficulties in getting the wherewithal for production, the man who has the job of buying materials is kept on his toes every minute.

Purchasing Agent W. J. Weiss of the Henderson, realizes that with the big new factory in which the four-cylinder machines will be built next year, and the steadily growing demand, the consumption of material will be much more rapid than ever before; and knowing that it will be up to him to supply the manufacturing departments with everything they will need, he has been very busy lining up orders for material for delivery next year.



W. J. Weiss

Numerous contracts for material in the raw have already been closed for 1918. Other manufactured parts, such as tires, grips, spokes, etc., which will not undergo change in the meantime, are also being bought now with delivery dates guaranteed. As soon as any detail of 1918-model construction is finally decided upon, Weiss pounces on it and makes sure that a sufficient supply of exactly the proper material will be on hand at the time manufacture is to begin.

It's a big job, of course, and one in which a novice would soon become seasick in these times of supply shortages, but Weiss has had long experience and knows all the ropes. He was connected with the Studebaker automobile organization before joining the Henderson ranks, and previous to that had been at responsible posts for a few other large firms.

TWO NEW INCORPORATIONS

ALBANY, N. Y., Dec. 27.—The Stearns Tire and Tube Co., with $250,000 capitalization, was incorporated yesterday to deal in tires. M. Hawthorne, H. Paerlman and A. K. Ott, 518 West 161st street, New York City, were named as the incorporators. The North American Toy Co. was incorporated for $10,000, to deal in bicycles and toys. C. M. Woliner, O. Schweitzer and F. Fischer, 300 East 79th street, New York City, were the incorporators.

THORS FOR PHONE CO.

Rochester Telephone Co. Takes Four Big Blue Twins

ROCHESTER, N. Y.—The Rochester Telephone Co. has bought four big twin Thors for the use of its trouble shooters.

The company has tried out several different makes of machines and has decided to standardize on the Thor in all branches of its service. Several machines of the same make are also used by the installation men, and are fitted with a large tool kit and a number of coils of wire. The sale of the last quartet of machines was made by Flynn Brothers, Thor dealers here.

NEW KLAXON

Mechanical Horn with Horizontal Action at $3

NEWARK, N. J., Dec. 26.—The Klaxon Co., formerly the Lovell McConnell Mfg. Co., is bringing out a new type of hand Klaxon which is to be sold at the low price of $3. It will be offered on January 1.

The new horn is known as the Klaxon "Three" and it differs from the old type in that it is operated by what the company calls the "push from behind" principle, the operating button having a horizontal action. At the same time the present type with the vertical-acting button will be discontinued.

The company is at present rushing work on a large addition to the factory which is made necessary by the increased production necessary to take care of the large demands for both equipment business and for the trade at large.

FOR FISH DEALER

Wagner-Dolph Sells Harley-Davidson Delivery Outfit

ROCHESTER, N. Y., Dec. 26.—The Wagner-Dolph Co., Harley-Davidson distributors, have sold a 1917, three-speed Harley-Davidson, with special sidevan, to the Wagman Fish and Oyster Co., of this city. This neat and compact delivery outfit is giving a good account of itself despite the fact that the weather in and around Rochester has been inclement for the last couple of weeks.

FIRESTONE ENTERS FOOTWEAR FIELD

AKRON, O.—One of the latest announcements of interest to the rubber trade states that the Firestone Tire & Rubber Co. has completed preparations for the manufacture of rubber footwear. Arrangements have been under way for a long time to enter this field, and company officials stated a few days ago that the new department is in complete operation.

BIG INCREASE

Coast Henderson Sales Jump from Two to Two Carloads

LOS ANGELES, Cal.—At Christmas, 1916, the Henderson distributors had sold just two of the new model machines. As a contrast, of the 1917 machine they have already sold nearly two carloads.

Charles Mankel, Sacramento agent, has just taken three; Guy Henry, of Pasadena, took another, making his third; C. A. Sheppard, of San Diego, took three more a week ago, running his score up to 12; O. A. Dawson, agent for Douglas and Bisbee, Arizona, ordered his sixth and seventh in rapid succession; and so it is going all along the line.

EXCELSIOR RUSH

Call for Sidecars Heavy: Motorcycles by the Carload

CHICAGO, Ill., Dec. 26.—That the call for the new Excelsior sidecar has been greater than was expected, comes from Fred B. Mathis, sales manager of the Excelsior Mfg. & Supply Co. The new sidecars are being turned out with all possible haste but even at that the company is quite unable to fill the demand.

Likewise the call for Excelsior motorcycles is heavy, the company having shipped five carloads during the past week. Three of these were for domestic use, being taken by the Haverford Cycle Co., of Philadelphia, Pa., Carl Rose, Portland, Ore., and Piper & Taft, Seattle, Wash., respectively, while the other two were for export, one going to Australia and the other to Sweden.

HANDY SERVICE CABINET

Stevens & Co. Offer Container for Small Parts for Shop Service

NEW YORK, Dec. 26.—Stevens & Company, of 375 Broadway, are bringing out the "Handy" Service Cabinet, to care for small parts, nuts, screws, and sparkplugs. The cabinet contains 15 drawers, three of which measure 6x3x12 inches, while the others, placed in two rows above, measure 3x3x12 inches.

The Handy cabinet is substantial and well finished. The body is of heavy fumed oak with galvanized steel drawers which cannot warp or stick under any condition. Each drawer is fitted with a combination pull and card holder and a set of blank cards accompanies the cabinet. These cabinets are interchangeable and may be built up into sections of any size desired. The price to dealers is $5.

The "Handy" Cabinet

MERKEL OFFICE

New Motor Wheel Manufacturer Opens in Circle Bldg., N. Y.

NEW YORK, Dec. 26.—The Merkel Motor Wheel Co., which is the company producing and selling the new Merkel Motor Wheel which electrified the trade at the New York show, has taken offices in the Circle Building, 60th street and Broadway; communications should be addressed there in the future.

According to Sales Manager W. Walter Shoemaker, the plans of the new company have progressed to a point where it is practically certain that deliveries will be made the latter part of February next.

Shoemaker expresses himself as highly pleased with the enthusiastic reception accorded the Merkel wheel at the show and with the requests for territory that are coming in daily as a result of both the show, trade paper publicity and advertising.

RUBBER EXPERT

Goodyear Appoints Professor as Consulting Chemist

AKRON, Ohio, Dec. 25.—Dr. Warren K. Lewis, professor of chemical engineering at Massachusetts Institute of Technology, has been appointed consulting chemist for the Goodyear Tire & Rubber Co.

Dr. Lewis will come to the Goodyear three times each month and hold consultations with the Goodyear chemists over problems in rubber chemistry.

Dr. Lewis graduated from the M. I. T. in 1905 and rose to professorship in the institution in 1913, the youngest man to hold a chair in the history of the institution.

Besides being a recognized expert in rubber chemistry, Dr. Lewis has met with considerable success in industrial fields and in mechanical and electrical engineering.

S K F CHANGES

Taylor Becomes Vice President, Ungar Advances to Engineer

HARTFORD, Conn.—S. B. Taylor, sales manager of the S K F Ball Bearing Co., has been appointed vice-president of the company, succeeding F. B. Kirkbride; Kirkbride remains on the board of directors. Taylor will remain in charge of sales.

G. A. Ungar, former representative of the company in Cleveland, Detroit and Pittsburgh, has been appointed technical manager and chief engineer, succeeding Uno Forsberg, who returns to Sweden after completing his work of creating the manufacturing organization of the S K F Ball Bearing Co. in this country.

RUBBER TRADE

Tax Assessments Prove Industry Biggest in Summit

AKRON, Ohio, Dec. 26.—Just how big the rubber industry of Akron is in comparison to other industries is made plain by the tax lists for Summit county, which show that the rubber trade is assessed for four-fifths of the total industry tax for the county.

The Goodrich plant is assessed on a valuation of $20,393,830 which is nearly half of the total assessments for the county which stand at $43,896,440. The Goodyear plant, the next largest in the rubber world, is assessed for $7,632,780 and the Firestone for $4,964,980.

In all a total of $36,220,580 is credited to the rubber industry on the tax list.

Frank Hayes, the Keystone film star, staging the first act of that well-known little drama entitled "Good Morning, Judge."

Hayes was snapped just as he was ready to mount his Indian motorcycle and ride home from "work" at the Keystone studios.

GOODRICH XMAS

Rubber Concern Gives $18,500 in Cash Presents to Its Employees

AKRON, Ohio, Dec. 25.—Each of the employees of the B. F. Goodrich Co. received a cash present from the large tire concern as a Christmas gift today.

It cost the company $18,500 in cold cash to spread the Yule tide good cheer among its large force of employees.

GOODYEAR SEEKS LOWER RATES

WASHINGTON, Dec. 22.—The Goodyear Tire and Rubber Company, of Akron, Ohio, has filed a complaint with the interstate commerce commission alleging that freight rates on tires from Akron to all points south of the Ohio river and east of the Mississippi river were unreasonably high and asking for a revision downward.

HURLEY TO COAST

Thor Vice-President Will Stay Three Weeks on Business Tour

CHICAGO, Ill., Dec. 22.—J. D. Hurley, vice-president of the Aurora Automatic Machinery Co. maker of Thor motorcycles left Chicago yesterday for a trip to the Pacific coast.

Mr. Hurley will travel throughout the far Western territory and will call on many of the Thor dealers on the other side of the Rockies. He expects to be gone for about three weeks, although he will extend the time if the occasion arises.

REPORTS ON TIRE OUTLOOK

NEW YORK.—John Maus, manager of the export department of the Fisk Rubber Co. of New York, has returned from a South American trip in the interests of the company. Maus, who speaks Spanish and German, as well as some English, was naturally well equipped to investigate conditions at first hand, and reports in glowing terms the present and prospective business that he was able to disclose. In the Island of Porto Rico, which he visited on his return, he found conditions booming.

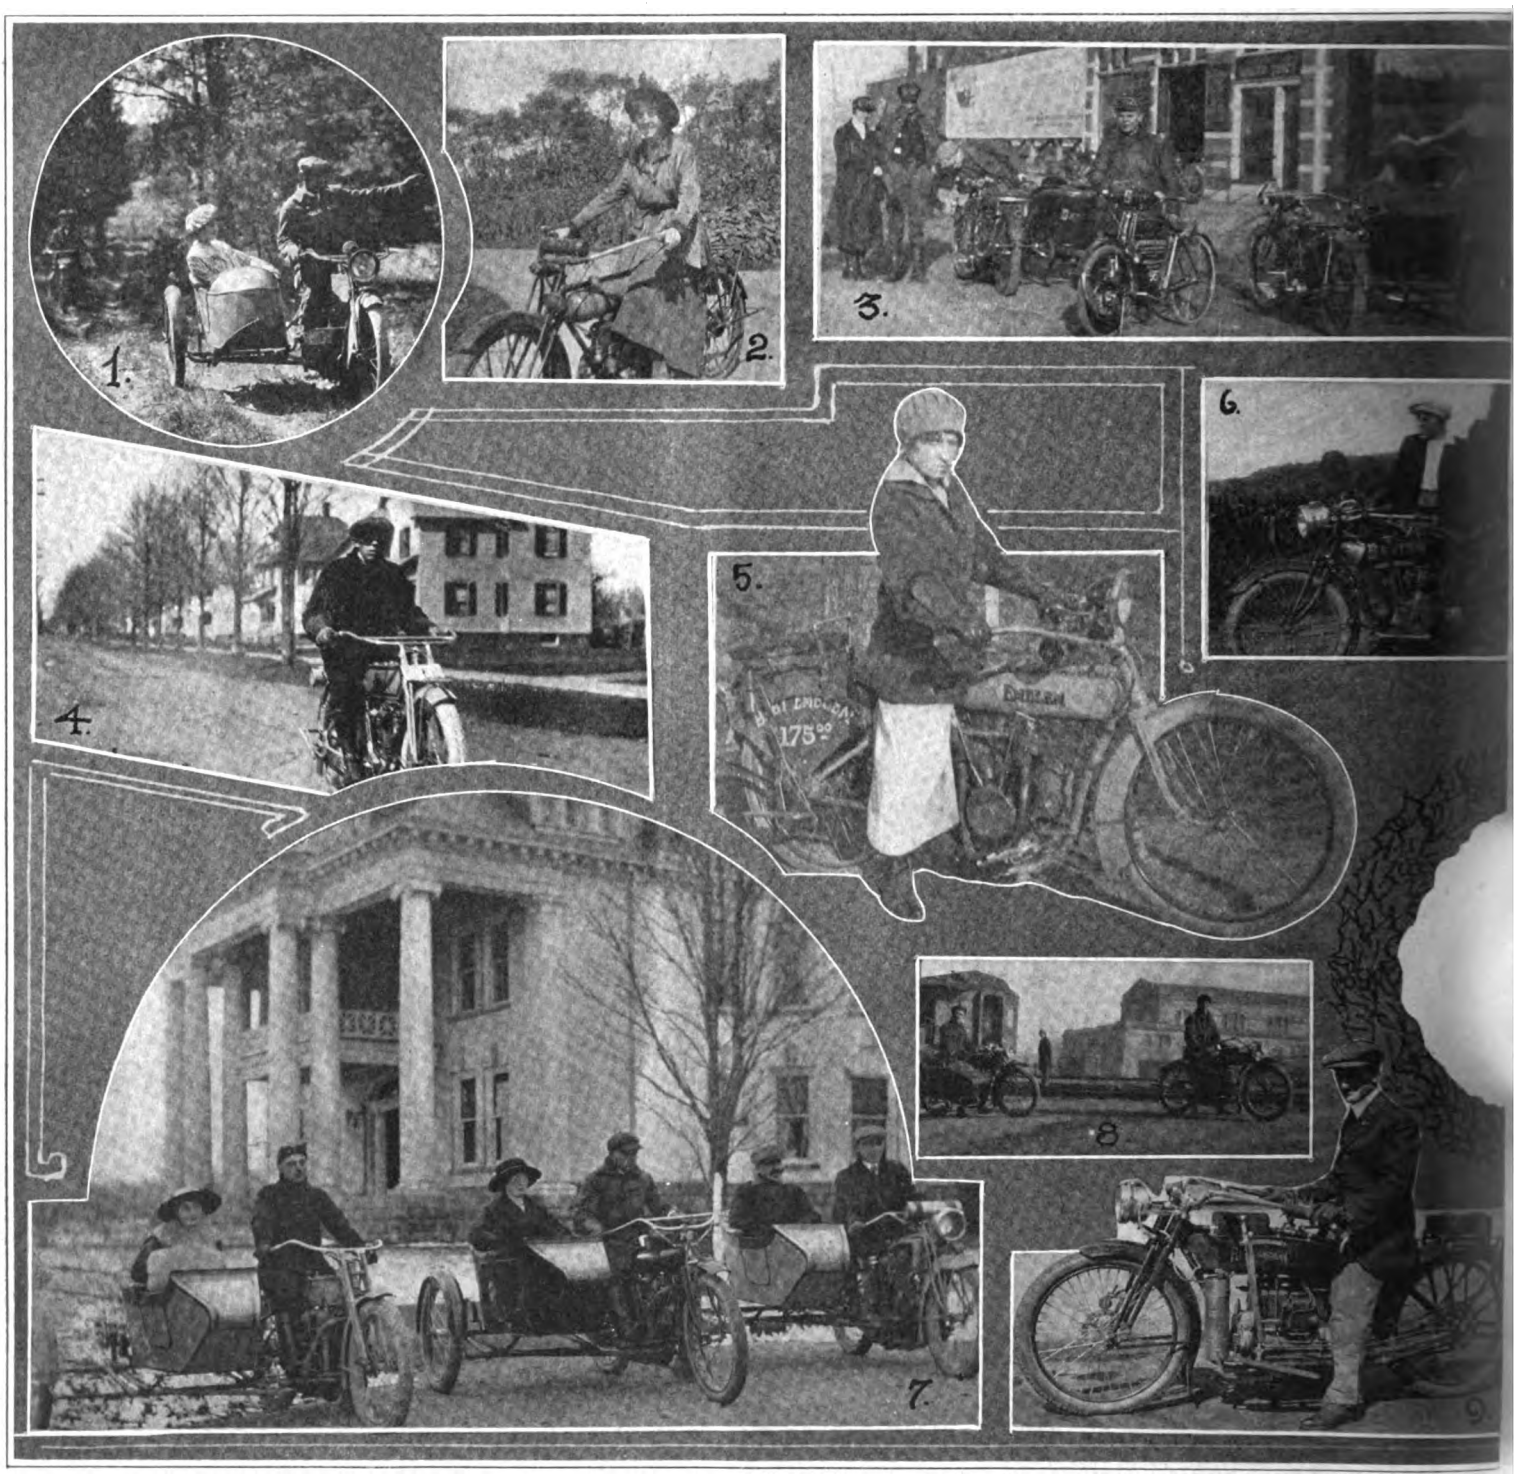
The Weekly

NEWSY EXPLOITS OF THE CAMERAMAN



REEL 1, Scene 1—A couple of Pope enthusiasts taking a little trip through Massachusetts highways and byways on a Pope-Rogers sidecar combination.

Scene 2—Miss Moresy, which particular young lady hails from Long Beach, Cal., pins all her girlish faith to the Cleveland motorcycle.

Scene 3—Showing how Driscoll & Jeanroy, Dayton agents in New York, take advantage of every endurance run and other form of competition to advertise the little Dayton motorbike.

Scene 4—On the road between Springfield and Westfield, Mass., a highway which is traversed practically every day in the year by Pope riders visiting the factory.

Scene 5—Here's a little Schenectady motorcycle enthusiast, Miss A. Frankel by name, who thinks there is nothing in the world like her little Emblem twin.

Scene 6—From Schenectady we wander all the way to Baltimore, Md., where we discover this little miss, Marie Lentz, who has every bit as much confidence in her big Dayton twin.

Scene 7—Picturing the versatility of the Pullman sidecar. It is shown here in use by three Detroit riders, one of whom uses a Harley-Davidson, another an Indian, the third an "X."

Scene 8—Patience personified! Showing Roy Hagerman and Ross Landes, of Al Crocker's Kansas City Wigwam, waiting for their first carload shipment of 1917 Indians.

Scene 9—Typifying the neat rider. He is Otto Rosenberg, of New York, and the picture shows him in his endurance run dress-up. The machine is a Henderson, of course.

Looking Down the Stretch

Dates of automobile shows are included in the list below for the benefit of dealers who may wish to arrange for exhibits.

By the way, what's doing in your district? If you or your club will keep us posted on coming programs we will be glad to list them.

Dec. 30-Jan. 6, Cleveland, O.—Sixteenth annual show of the Cleveland Automobile Show Co., at Wigmore Coliseum.

Dec. 31-Jan. 1, New York—F. A. M. Midnight Run to Poughkeepsie and return, 150 miles. Start at midnight.

Jan. 6-13, New York—Automobile show at Grand Central Palace.

Jan. 10, New York—Annual meeting of the Motorcycle & Allied Trades Association at Hotel Astor, 12:30 p. m.

Jan. 10, New York—Meeting of the Cycle Trade Directorate at New York office, 373 Broadway, 2 p. m.

Jan. 10, New York—Meeting of the Board of Directors, Cycle Jobbers' Association, at Hotel Astor, 6 p. m.

Jan. 20-27, Detroit, Mich.—Sixteenth annual show of Detroit Automobile Dealers' Association.

Jan. 20-27, Montreal, Canada—Show of Montreal Automobile Trade Association.

Jan. 22-27, Rochester, N. Y.—Ninth annual show of Rochester Automobile Trades Association, Exposition park.

Jan. 23-27, Allentown, Pa.—Show of Lehigh Automobile Trade Association. Peter Leisenring, manager.

Jan. 23-27, Baltimore, Md.—Show at Fifth Regiment Armory.

Feb. 3-10, Minneapolis, Minn.—Twin Cities automobile show of Minneapolis Trade Association.

Feb. 5-10, Bangor, Me.—Show of Bangor Automobile Association at Auditorium.

Feb. 10-18, San Francisco, Cal.—Show of San Francisco Motor Car Dealers' Association in Exposition Auditorium. G. A. Wahlgreen, manager.

Feb. 12-17, Cedar Rapids, Iowa—Show of Cedar Rapids Automobile Trade Association.

Feb. 12-17, Louisville, Ky.—Tenth annual show of Louisville Automobile Dealers Association at First Regiment Armory.

Feb. 12-17, Kansas City, Mo.—Show of Kansas City Motor Car Dealers' Association.

Feb. 14-17, Peoria, Ill.—Show of Automobile and Accessory Dealers' Association, at Coliseum.

Feb. 18-25, St. Louis, Mo.—Show of St. Louis Automobile Manufacturers and Dealers' Association.

Feb. 19-24, Bridgeport, Conn.—Fourth annual show at State Armory. R. B. Steiber, manager.

Feb. 19-24, Duluth, Minn.—Show of Duluth Automobile Dealers' Association at New Armory.

Feb. 19-24, Syracuse, N. Y.—Show at State Armory of Syracuse Automobile Dealers' Association. H. T. Gardner, manager.

Feb. 19-23, Des Moines, Ia.—Eighth annual show of Des Moints Auto Dealers' Association. C. G. Van Vliet, manager.

Feb. 26-March 3, Omaha, Neb.—Twelfth annual show of Omaha Automobile Show Association. Clark G. Powell, manager.

March 1, 2, 3, Urbana, Ill.—Show of Automobile Trade Association of Champaign County at Armory of the University of Illinois.

March 6-10, Boston, Mass.—Fifteenth annual show of Boston Automobile Dealers' Association. C. I. Campbell, general manager.

March 6-10, Fort Dodge, Ia.—Sixth annual show at New Terminal Warehouse.

March 14-17, Davenport, Ia.—Show in Coliseum building of Tri-City Automobile Trade Association.

GRIGSBY ON THE JOB

Pennsylvania Traveler Knows How to Use as Well as Sell Tires

FT. WAYNE, Ind.—The accompanying photograph shows Karl E. Grigsby, of the Pennsylvania Rubber Co., in the saddle of an Excelsior on a recent visit to this city. Grisby is a special factory representative for the Pennsylvania folks in the motorcycle and bicycle tire department and his business trips take him all over the ccountry.

Needless to say, Grigsby has friends in every city and town of importance from

coast to coast, and he is always given a warm welcome when he "blows in" on one of his business-building tours. "The outlook for motorcycle and bicycle business in this country has never been better," says the Pennsylvania booster, "and it follows naturally that the prospects for big tire sales are excellent. My 1916 season has been a mighty busy one, and I am looking forward to a still bigger demand for Pennsylvania motorcycle and bicycle tires during the coming year."

ARMY POST FOR TACOMA

Local Dealers Plan for Soldiers' Business When Fort Is Established

TACOMA, Wash.—Local motorcycle dealers and accessory men are more than pleased at the prospect that Tacoma will soon acquire an army post and that 12,000 soldiers will soon be stationed permanently on the broad prairies in the American Lake district. Dealers and demonstrators are already planning on making sales of two-wheelers to the soldiers with which to cover the 12-mile stretch over natural roads between Tacoma and American Lake.

The fact that the post will be established at Tacoma, together with the increase in the price of lumber and the various new ship-building concerns who have located here during the past year, means that Tacoma motorcycle dealers will reap a harvest during the coming year, and 1917 promises to exceed all previous years for the business.

UNIFORM OIL BILL

Colorado State Inspector Agitating for Legislation

DENVER, Colo., Dec. 23.—An attempt is being made, according to James Duce, state oil inspector, to get the convention of all the oil inspectors of the country together, to discuss uniform oil inspection bill and provisions to eliminate inferior oils. Efforts are being made to bring the convention to Denver if possible.

It is a movement, which if carried out, will be of great benefit to the motorcycle industry.

ALL FOR ROADS

Plan to Double Vehicle Tax in Oregon Has Not Full Support

PORTLAND, Ore.—The Oregon Good Roads Committee has recommended that the coming Legislature enact a law requiring all motor-driven vehicles to bear at least twice the present tax burden on the promise that all of the net proceeds from these taxes be devoted to the maintenance and construction of roads.

The recommendation has not the undivided support of the motor vehicle folk, although the majority of the trade is behind the movement.

MOTOR-SLEDS ARE POPULAR

DETROIT, Mich.—Several local motorcycle enthusiasts are hard at work on motor-sleds with which they intend to hold races on Lake St. Clair. Last year there was a great deal of interest in this winter sport and the speed developed by some of the sleds surprised the old-timers. Judging by present indications, there will be at least 50 motor-sleds, driven by motorcycle motors, in and about Detroit before the winter is over.

BUTLER BECOMES AD. MANAGER

JEANNETTE, Pa.—John L. Butler has been appointed advertising manager of the Pennsylvania Rubber Co., of Jeannette. He is well prepared to tackle his duties, having been in charge of the advertising department for the past year.

NEW CATALOG

Motor Car Equipment Gets Out Cycle Accessory Book

NEW YORK, Dec. 26.—The Motor Car Equipment Co., 21 W. 62nd street, New York, and with Boston and Newark branches, has just gotten out a catalog covering its line of motorcycle and bicycle accessories and fittings.

It was scarcely six months ago that the Motor Car Equipment Co. went into the two-wheeler accessory business in earnest and at that time they installed A. G. Chapple as head of the department. Despite the shortness of the interval, however, the catalog is replete with everything that goes to add to motorcycling and cycling comfort and is gotten out in a style that will appeal to both the trade and the retail buyer. Copies can be had upon application.

MASLEN ENTERTAINS

Quaker City Hustler Brings Together Dealers and Travelers

PHILADELPHIA, Pa., Dec. 26.—Geo. S. Maslen, the Indian distributor, staged a little dealers' and salesmen's convention all of his own last week.

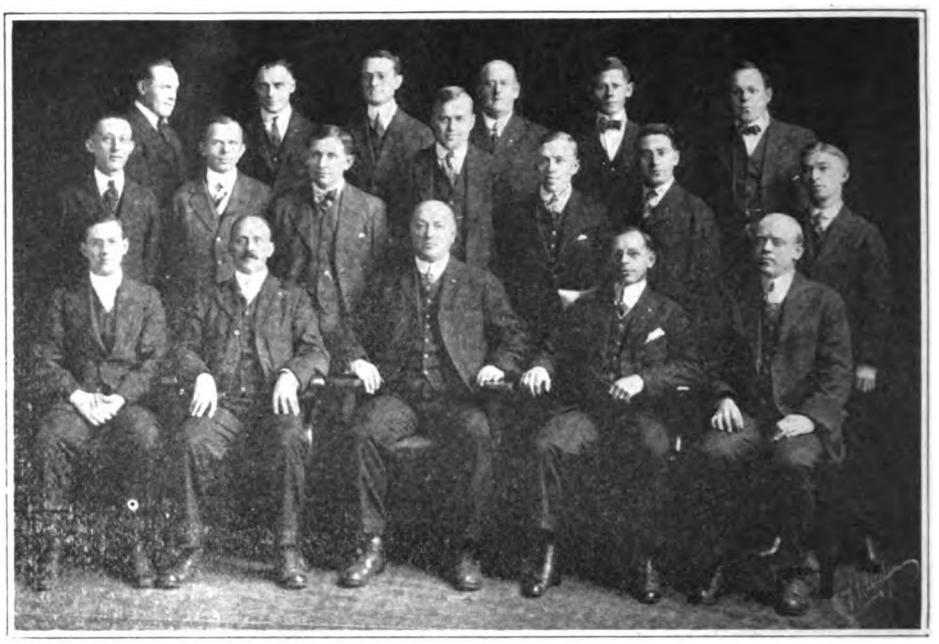
The affair opened up with a chicken dinner, at which the guest of honor was George W. Sherman of the Indian factory, who gave the assembled Indian folk an interesting talk on the ways and means of increasing sales and the possibilties for the coming year.

The convention was held at the headquarters of the Indian distributor, where a carload of new machines was on exhibition in the newly decorated salesroom.

The picture was snapped after the festivities were all over. In the picture are: Top row, from left to right: M. M. Rose, Thos. Briggs, Wm. Tweed, Geo. Sherman, H. A. Schleter, A. Greville, John Empfield, O. Campbell, Ed. B. Connell, Geo. S. Maslen. Bottom row, left to right: Wm. Briggs, F. W. Henderson, Wm. Scott, J. Rose, N. Griffith, H. Henderson.

George Maslen's Guests at Sales Conference. Item Above

FIRST-LINE VETERANS OF "CHICYCO" SALES SQUAD



AT the time of the salesmen's convention of the Chicago Cycle Supply Co., Chicago, Ill., the above photograph of the hustlers who carry "Chicyco" products to all four quarters of the continent was snapped.

Those in the picture are, sitting from left to right:

Peter Stainbrook, house salesman; Charles J. McCormick, vice-president, Chicago and vicinity; H. P. Hansen, president; David A. McNeill, treasurer; Edward L. Jacobs, house salesman. Middle row, left to right: A. R. Shade; Otto Gudenschwager, Minnesota and North and South Dakota; E. B. Steffen, Wisconsin; V. E. Sandeen, Nebraska and Iowa; A. E. Stockholm, house salesman; L. V. Hammond, Eastern Southern states; D. C. Van Brocklin, Michigan. Top row, left to right: W. J. Ash, west of the Rockies; J. G. Littlefield, central Southern states; H. E. Kenyon, correspondent salesman; W. P. Miller, Ohio; E. L. Kendall, Indiana; E. H. Hagberg, correspondent salesman.

The convention, which lasted several days, was marked by talks from representatives from several of the manufacturers whose goods are handled by the Chicago Cycle Supply Co. In these talks the selling features of the respective lines were brought well home to the salesmen.

Following the convention a banquet was spread at the Railway Club, during the course of which prizes were distributed for the annual salesmanship contest of the Chicyco concern. W. J. Ash took first prize for having done the largest business; A. R. Shade took the second; E. L. Kendall, third; Victor Sandeen, fourth.

During the course of the convention it was brought out that business for December, 1916, with half of that month still to go, is double what it was for December a year ago, and the salesmen left enthusiastic to the last man over the prospects for the coming year.

BALL WITH SCHICKEL

Former Cleveland Man Goes With Maker of S. M. C.

STAMFORD, Conn.—Eph Ball, who resigned from the Cleveland sales force during the Chicago show, has joined the Schickel.

The coming of Ball, according to Sales Manager Hopkins, is simply one step towards the completion to a comprehensive sales campaign which he has drawn up and which he expects to have in operation within the next couple of weeks.

PLANS FOR POLO MATCH

WHEELING, W. Va., Dec. 26.—Preparations are being made for a motorcycle polo game which is to be played by members of the Wheeling M. C. on the first Sunday of the new year. The event promises to be a distinct novelty with plenty of go and much of the spectacular, and is attracting the attention of motorcyclists from all parts of the city.

Digitized by Google

PLANS PERFECTED FOR "MIDNIGHT RUN"

Fourteen Entries Received to Date with Promise of Many to Come—Prize List Swelling—Finish to Be Filmed—Medals for All

NEW YORK, Dec. 26.—With fourteen entries already in and the promise of many more to come, things look bright for that "Midnight Run," which is being promoted New Year's Eve, Sunday night next, by State F. A. M. Commissioner Geo. A. Ellis.

What is more, the run bids fair to attract an unprecedented degree of attention in view of the fact that Captain Montgomery of the Motor Division of the 22d Engineers, New York National Guard, has plans for starting a whole squad of his dispatch bearers in the run, feeling that competition of this sort is just the proper training for the military motorcyclist.

Support Fine

Ellis is obtaining every bit as much support from the trade as from the local riders, the prize list being swelled with every morning's mail. The latest offering is a silver cup from the Harley-Davidson factory; that is the only one of the prizes received that will be announced, the others being offered in order form in sealed envelopes not to be opened until after the run.

Some of the other contributors to the prize list are Splitdorf Electrical Co.; Hawthorne Mfg. Co.; Badger Brass & Mfg. Co.; Aurora Automatic Machinery Co.; Baker, Murray & Imbrie, Inc., and **Motor Cycle Illustrated.**

Also of interest to entrants and prospective entrants is the fact that Ellis has extended his medal offer to include all entrants. Gold medals will be awarded to all perfect score men; silver medals to those finishing with scores better than 950, while all other entrants will receive bronze medals. In order to defray the expense attaching to the donning of the medals, the entry fee has been raised from $1, as originally announced, to $2.

As was pointed out in previous issues of **Motor Cycle Illustrated**, the course reaches from Columbus Circle, New York, where the start will be made at midnight on New Years eve, to Poughkeepsie and return. The lightweight division will proceed at a pace of 15 miles an hour for the full 150 miles, while the heavyweight machines will travel at an average rate of 20 miles an hour.

There will be several checking stations established along the route, and each contender will receive a schedule card prior to the start which calls his attention to the checking stations and makes it easy for him to tell when he is due at any one of them. There also will be two secret controls, one on the out course and one on the return, arrangements for which are being made by Kaufman and Barmore of Yonkers.

"Movie Men" to Come

Ellis has completed arrangements with a couple of the moving picture men, to have the finish of the event filmed upon the return of the riders to New York at the finish of the run, a feature which should appeal strongly to both entrants and the trade at large.

Entry blanks can be had from Geo. A. Ellis, care of Baker, Murray & Imbrie, 10 Warren street, New York, or from any of the motorcycle dealers in the metropolitan district.

THEY'RE GETTING AN EARLY START

Thomas H. Chew, Who Heads the Thor Motorcycle Co. of Boston, Distributors for the New England Territory, Showing His Kiddies the How and Why of the Thor

WINTER MOTORING

N. Y. State Federation Has Plans for Its Promotion

ROCHESTER, N. Y.—The New York State Federation is figuring on a plan whereby they will be able to make motoring through the state roads as easy in the winter as in the summertime. General Counsel John J. McInerney suggested at the meeting of the association in Buffalo last week that the Chambers of Commerce and merchants' associations be enlisted in the work.

If the plan is carried out it will be welcomed by the many motorcycle riders as well as automobilists. The plan is to purchase large motor rollers and go over all the state roads leading into the city and keep them in good motoring condition during the winter months.

ANOTHER RECORD

San Angelo Rider Reaches San Antonio in 10 Hours

SAN ANGELO, Tex.—Another San Angeloan has made the overland run of more than 200 miles to San Antonio in ten hours. This time a Harley-Davidson motorcycle with sidecar accomplished the feat.

Jim Lane, shooting gallery proprietor, left the city on Tuesday morning of last week at 7:30 o'clock and at 5:30 o'clock in the afternoon was in the Alamo City. This quick time included a stop-over for dinner. Lane plans to open a shooting gallery in San Antonio during the winter season.

GRAND JUNCTION RACE POSTPONED

DENVER, Colo., Dec. 23.—The 10-mile motorcycle race that was to have been run at Grand Junction, Col., on the last day of the Stock Show, Dec. 7, and which was postponed until last Sunday on account of bad weather, had to be called off again for the same reason. No date has been set for the race and it is probable that it will not take place at all this winter.

Digitized by Google

CLIMBING by motorcycle in mountainous country is always an interesting, and often a hazardous, occupation and the lads who undertake such trips are deserving of all the consideration they receive from their more conservative brothers of the Open Road. This is especially true of the riders who poke their motorcycles into the mountain passes throughout Colorado, and when we come to the hardy chaps who tackle Pikes Peak in cold weather we must admit that we have about reached the limit of endurance.

The accompanying photos practically tell their own story. They give a fair idea of the character of the roads traversed, and also indicate that the mercury is pretty well down in the tube. The large picture at the top of this page shows Mr. Nevejans, of Colorado Springs, with his single-speed twin Indian, at the Pikes Peak Auto Highway toll-gate. Nevejans made the climb to this point through seven inches of snow on a 10 per cent. grade, with the temperature at zero. The altitude is 8,000 feet. The natives who appear in the background had been driven from the higher altitudes by the intense cold.

The center photograph on this page shows Mr. Mahoney, of Colorado Springs, who had gone up on his machine for a look over the surrounding country. Before dismounting for this survey Mahoney had just climbed a grade one and a quarter miles long on a basis of 25 per cent. It happens that the snow was blown from the road at the point where Mahoney stands, but on most other parts of the Highway the snow was quite deep and often piled high in drifts.

Above the Clouds

The remaining view on this page shows Nevejans at a point eight miles up the Pikes Peak Highway above the clouds. His machine does not show in the picture because it is directly behind him. At this stage of his trip Nevejans would have appreciated a cup of steaming coffee, but he had to be satisfied with thinking about it.

The top picture on the opposite page shows Nevejans and Mahoney at a cabin along the Pikes Peak Highway. The altitude is 11,000 feet above sea level, and it is superfluous to state that the riders need their mackinaws and earcaps. Nevejans and Mahoney have made several trips through from seven to fourteen inches of snow on their motorcycles to catch a view of the elk which feed in the more sheltered places.

The center photo on the opposite page gives another view of the ruggedness of the country. The two motorcycles can be discerned on the road in the distance. It goes without saying that the scenery all along the Pikes Peak Highway is remarkable, and strange to say it offers considerably more variety than is usually found in mountainous sections.

The last photo shows Mahoney and the Indian motorcycle with which he climbed to an altitude of 11,000 feet above sea level through about fourteen inches of snow. The temperature was several degrees below zero when the picture was taken, but Mahoney was not suffering any particular hardship according to his own statement.

Snow Plugging

By J. Burch Gla

The Pikes Peak Auto Highway, which is now virtually completed, is the highest motor road in the world. It is notable as a piece of road engineering and unique for its climb to a point more than 14,000 feet above sea level. As the Highway winds up the precipitous northern side of the mountain, its every mile is full of scenic interest, and its summit commands a wider prospect than can be enjoyed from any other spot in America reachable by motorcycle or automobile.

He Built the Road

Folks in Colorado Springs had long dreamed of such a road up the mountain, and many movements were started to have one built, but owing to the tremendous obstacles which had to be overcome all the plans were failures until the present project was taken up. The man responsible for the success of the road is Eugene A. Sunderlin, a railway executive who at one time enjoyed the distinction of being the youngest railroad president in the United States.

Consultations were held with city, county and state authorities, and finally a petition was sent to the United States Forest Service for permission to construct a toll road through the Pikes Peak National Forest Reserve. Finding public sentiment unanimously favorable to the project, the Government granted the permit without delay, pledges of financial support were received from several public-spirited citizens and in May, 1915, the actual work of construction was started, under Mr. Sunderlin's personal supervision.

At its narrowest point the Highway is wide enough for two automobiles to pass safely, and at some places it is possible for three, or even four, cars to stand abreast. Wide "pull-outs" are arranged for at the most interesting points. The grade has been held to an average of six per cent. throughout the route, with a maximum of 25 per cent., so that any motorcycle can make the complete climb with comparative ease.

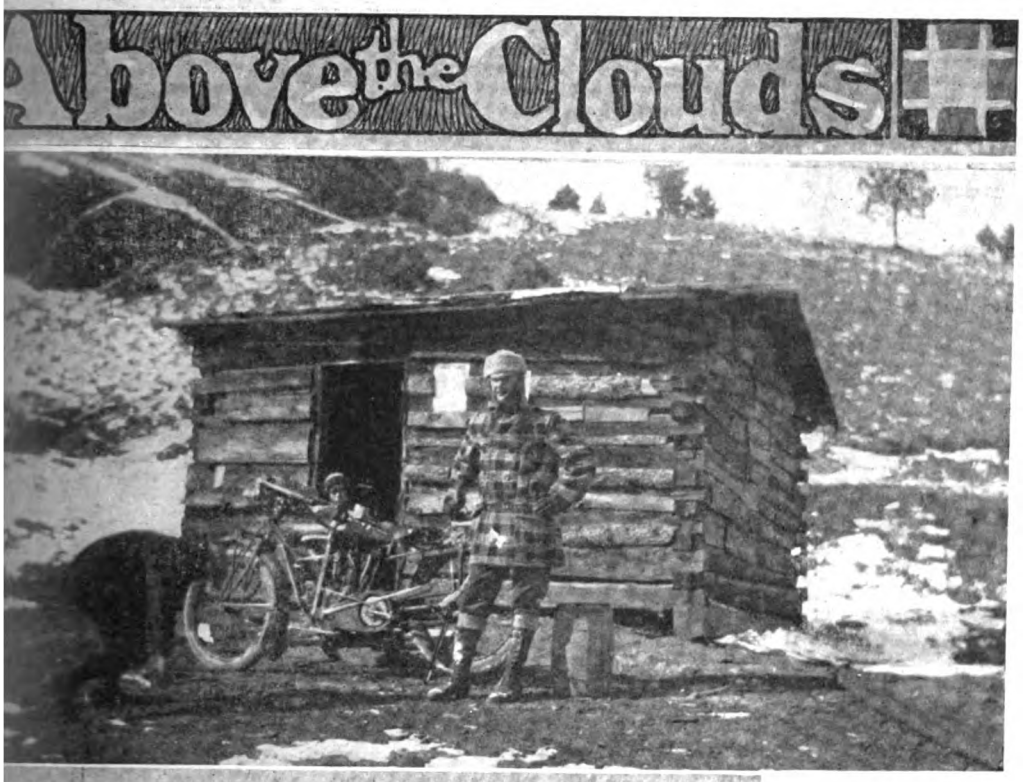
Above the Clouds



ing point of the Pikes Peak Auto Highway. From Cascade the motorcyclist must travel 18 miles in order to reach the summit, and at the end of his trip he will be exactly 14,109 feet above sea level. The first and second miles wind up the forested side of Cascade Mountain to Observation Point. Thence the road follows Cascade Creek through picturesque scenery to Crystal Creek, and thence on to its headwaters in the seventh and eighth miles.

The surface of the road consists almost entirely of a disintegrated granite formation, which is exceedingly easy on tires. Any one may drive his own motorcycle or automobile to the summit, and in addition a fleet of motor cars has been provided to carry tourists from Colorado Springs and Manitou. The round trip can be made in five hours.

The route from Colorado Springs is via the Garden of the Gods to Manitou; thence up the historic Ute Pass to Cascade, twelve miles west of Colorado Springs, the start-

Above the Timberline

Glen Cove is reached by skirting the front range, where contact is made with the granite walls of the great Peak itself. Just below Glen Cove the motorcycle tourist finds himself getting above the timberline, and here he begins the ascent of the mountain's rocky cliff. Then the route goes up and up, in ten great swings, reaching the crest of the Rampart Range in the fourteenth mile, at an elevation of 13,000 feet. So gradual has been the rise, however, that the tourist hardly realizes that he has motored to the roof of the continent.

From the summit a magnificent view greets the eye. For 300 miles, south, west and north, run giant ranges and peaks of the Rockies, mantled with eternal snow. Eastward the billowy plain rolls off into distance. Below can be seen the Auto Highway winding mile after mile up the mountain and through the National Forest; and from the summit the towering pines of the Forest seem like blades of grass.

It is safe to say that there is not a more remarkable trip open to the motorcyclist in the United States, and there are indications that the two-wheelers will become more and more common on the Highway as the wonders of the trip become known to riders.

RISDEN QUITS

Will Devote Time to Manufacturing and Auto Supplies

LOS ANGELES.—C. Will Risden has retired from the motorcycle field. Despite rumor and even news notes to the contrary Risden states positively that he has not the slightest intention of taking any motorcycle agency whatsoever in the future.

Risden is keeping about as busy as can be manufacturing the A. B. C. generator for motorcycle lighting and as the demand for this little lighting outfit keeps on growing the business takes up more and more of his time. The only motorcycle work Risden is doing is in cleaning up his stock of Indian and Cleveland machines.

Around Risden's headquarters has grown up the most active automobile district in Los Angeles and Risden intends to utilize his headquarters for the sale of automobile accessories. His plans call for a visit to New York during automobile show week where he expects to make arrangements for handling a number of high class automobile accessories in capacity of Southern California distributor.

SALARY DIVIDEND

Doehler Die Casting Co. Inaugurates Profit Sharing Plan

BROOKLYN, Dec. 26.—Beginning Jan. 1, employes of the Doehler Die Casting Co., with factories in Brooklyn, N. Y.; Newark, N. J., and Toledo, O., will receive a participating dividend on their wages, amounting roughly to 10 per cent. of their yearly wages. The dividend will be distributed only to employes who have completed a year's connection with the company, and will be declared and paid quarterly simultaneously with the regular stock dividend.

Furthermore all employes working on a basis of 50 hours per week will be put on a basis of 48 hours per week at the same pay. The company made the announcement at a dinner of the executive club, which is composed of all the executive heads. The wage dividend will affect the 1,200 men employed, and is intended to help them meet the increasing cost of living.

LEE DOES IT

Takes Henderson and Sidecar Over Roads Into Arizona

LOS ANGELES.—T. Lee, of the Henderson Motorcycle Sales Corp., distributors for the southwest, has been extending his pioneering and study of trade conditions from central California over into Arizona.

Lee is making his trip on a Henderson with Rogers sidecar, and despite the claims "it can't be done" from all quarters, he got through the bottomless sand roads and the deep rocky ruts with little or no trouble.

Charles A. Hubbard, of the same firm, is making a business and holiday trip to Boston.

EDITORIAL

By J. Leo Sauer

MOST interesting to me of the items published in a recent issue of **Motor Cycle Illustrated** was the one headed "A Story of Profits—Light car dealer says he gets only 15 per cent. commission." I confess that I had been under the impression that all automobile dealers received just as liberal commissions as do the retailers of motorcycles, but evidently this is not the case; the cycle dealer gets a larger return from his capital, although in practically all other respects the two businesses are quite similar.

The point worthy of emphasis in this connection is that the motorcycle dealer has at least a first-class *opportunity* to do well and make money. If he doesn't, it is because his sales are very small or his business mismanaged; he cannot blame it on a narrow working margin necessitating extraordinarily large sales. In other words, the cycle dealer is not handicapped by unfair conditions beyond his control. Accordingly, if he knows how to put his investment to good use, satisfactory profits will be his reward.

A Good Business Proposition

The capitalist, before making an investment satisfies himself, first that there is a demand or that one can be created and, in the second place, that the profits are reasonably sure to be good. Given this combination, he is invariably willing, and anxious, to invest. This situation prevails in the motorcycle business, that is to say, the percentage of profit is a fairly liberal one, and an aggressive dealer can create a healthy demand where one does not aleady exist. In nine cases out of ten, if he doesn't make money, it is as much his own fault as it is that of the automobile dealer whose business is not successful.

A thousand or two is the average motorcycle dealer's investment. Let's be liberal, and say $3,000, and still more liberal and assume that all other investments taken together net a ten per cent. annual return, or $100 per thousand. In addition to making his business earn for him a substantial salary the progressive motorcycle dealer can easily make more than ten per cent. a year on his capital, despite the fact that ten per cent. investments, even in these days, are none too many in business at large. Selling motorcycles is therefore a fairly good business proposition after all.

Big Values in 1917 Motorcycles

Now, the year 1917 promises to be a humdinger for business. Even the 1916 figures are likely to be surpassed. The forthcoming opportunity will be the greatest the American motorcycle dealer has ever had. In the face of a tremendous upward swing in prices for all commodities, he will actually have more to offer for the old prices than ever before. When you come to think of it, considering the fact that steel alone is 40 per cent. more expensive than it was twelve months ago, the motorcycle dealer is deeply indebted to the manufacturer for the latter's having kept prices down to substantially the 1916 quotations, and the responsibility will be entirely the dealer's if he fails to make good with the advantages with which he has been favored.

Then again, a motorcycle agency is worth more today than ever before if only because of the fact that each additional year's use of motorcycles, and the constantly increasing number of riders insures a greater revenue from replacements and the sale of accessories. This is an important item; the wise dealer knows it, and cultivates the favor of, and makes good with the present owners of machines as well as the prospective rider. For such an agent success is almost certain appreciating, as he does, that *quality* is as vital as *quantity* in business. It is within his power to impart to his business the quality it requires, and he will constantly find in the pages of this journal, during 1917 as well as in the past, many valuable suggestions for the improvement of the conditions under which his business is transacted.

When this issue of **Motor Cycle Illustrated** reaches its readers, the New Year will be at hand. It is our wish, and firm belief, that it will be a prosperous one for those who sell motorcycles, and a truly wonderful one for every dealer who succeeds in putting into his business a high degree of efficiency and good, common sense. The coming season presents a great big opportunity for the motorcycle trade, such an opportunity as knocks only once at the average man's door. Let us all contribute toward making the response unanimous!

THE SIDECAR AS A SALES-BREEDER

IS the average dealer fully alive to the fact that the sidecar and rearcar are effective sales promoters as well as good sporting propositions?

We think not. Although we know that many more dealers realize this than did a year or two ago, still we believe that too many of them regard the sidecar as also a side issue, when, instead, it can, and is being made a business-getter of no little value. Thousands of combination sales were made during 1916 which would not have taken place at all were it not for the combination; that is to say, many bought motorcycles with passenger carriers who otherwise would not have become motorcyclists at all.

Now, isn't it true that too many dealers take it for granted that many who are really good prospects would not become interested in motorcycles under any circumstances? Does not the average dealer regard as absolutely hopeless hundreds of men who, though of the auto-owning type, are sportsmen enough to be willing at least to be "shown" what there is of merit in a motorcycle? And for such, isn't the straightest and most likely avenue of approach the sidecar? Cannot many of them be convinced that it is from a motorcycle and passenger attachment—and not an automobile—that they will derive the greatest satisfaction?

Our answer to all of these questions is "Yes." And in taking that position we fully appreciate that the greatest objection in the minds of that type of men to motorcycling lies in his belief that his adoption of the motorcycle means loss of social standing in the community. Conversely is there any doubt that hundreds would demand motorcycles following their use—with the resultant publicity by even a baker's dozen of the metropolitan Four Hundred?

SMITH LOCATES NEW TOURING GROUND

California Pope Distributor Tumbles on Mountain Paradise That Is Ideal for Touring—He Tells About It

LOS ANGELES, Cal.—C. L. Smith, southern California jobber of bicycles and bicycle and motorcycle supplies, and Pope motorcycle distributor, is one of the most persistent and capable explorers in the State. As an authority on where the hunting and fishing is best, Smith has made his store a headquarters for information of this sort, and his advice is eagerly requisitioned by dealers and riders who want to know "where to get 'em."

On his last trip to Imperial Valley, Smith returned through the mountains instead of by the usual route to San Diego and north along the coast, and discovered a touring paradise that he declares is unrivalled in the State. Smith says:

"This Cuyamaca Mountain country is the most beautiful in southern California, and yet it is little known and rarely traveled by motorcyclists. From Los Angeles it is reached via Hemet and Warner's Hot Springs, at the foot of Mt. San Jacinto, or via Oceanside and Ramona from the San Diego coast route. Coming back from Imperial Valley, the way our party discovered this country, the route runs west from El Centro to Campo, 67 miles, then zigzags up into the mountains. Directly north, along mighty summit ridges, winds a fine natural gravel road to beautiful Cuyamaca Lake, famed for its duck shooting. Leaving Cuyamaca Lake and going on toward Julian one gets a glorious view of the famous Salton Sea.

"The natural gravel roads in this district are superior to asphalt for pleasurable touring. With the exception of a short piece of the first grade out of El Centro the whole distance can be made on high."

VAN ORDEN TEST

Los Angeles Harley-Davidson Man Goes Over Hollywood

LOS ANGELES, Cal.—A year ago A. F. Van Order, of the Los Angeles retail Harley-Davidson store, took a trip with his family on the park road over the summit of Mt. Hollywood with a 1916 Harley-Davidson and side car.

Last Sunday he made a similar trip, except that he used the 1917 machine. He was surprised to find that many severe grades were easy to make in the intermediate, where last year he had to use low. This is the closest mountain drive to Los Angeles, and the grades and turns stiff enough to keep an experienced driver busy.

SKINNER SKIDS!

And Friction Ignites Matches — Some Commotion, No Damage

LOS ANGELES, Cal.—The most peculiar accident that is on record among the motorcycling fraternity in Los Angeles occurred to R. A. Skinner last week. He collided with an automobile, and while sliding over the pavement the friction ignited matches he was carrying in his pocket.

Firemen from a station only a block away heard his cries as his clothing burst into flames, hurried to the scene and beat out the flames. His clothing was almost burned off, but he escaped with slight burns and bruises.

SNOW CARNIVAL AT TRUCKEE

SACRAMENTO, CAL.—The Capital City Motorcycle Club is planning to hold a snow carnival at Truckee, Sunday, January 21. President Fred Pearl will appoint committees to handle the affair, and it is expected that about 400 will participate. There will be baseball, basketball and a tug-of-war, besides numerous other sports, all played in the snow.

A special train will leave this city at 11 p. m. Saturday night, and will return late Sunday night, a reduced rate having been secured for the event.

MAYOR RIDES INDIAN

Chief Executive of Los Angeles Finds Motorcycle a Valuable Aid

LOS ANGELES, Cal.—Hon. Charles E. Sebastian, mayor of Los Angeles, is not only the chief executive of a thoroughly live-wire town, but is also one of the livest of live wires himself. Not being contented with a vehicle that is either slow or in any other way inferior, he rides a motorcycle when going to and from the executive mansion and the desk where he transacts the city's business. The accompanying illustration, which shows him mounted on his Indian, is sufficient evidence of the healthful effect this outdoor exercise has on him.

Mayor Sebastian of Los Angeles

NO "BLUE MONDAYS" FOR BARTON

SAN FRANCISCO.—Dec. 18 proved anything but a "blue Monday" for Z. Barton, local Thor representative, for on that day he received three rush orders for machines to be sent to Los Angeles, in addition to a telegraph order for a machine for Seattle. Barton states that this is not unusual for a day's business, however, and that he expects to be on the jump steadily from now on. The Thor branch in San Francisco has sold more machines to date than were disposed of up to the first of March last year.

Barton leaves soon for a trip through Southern California, where he will call on the various Thor agencies.

ORDERING BY PICTURE

That's How Los Angeles Boys Are Buying Thors These Days

LOS ANGELES, Cal.—They are dropping into the store of T. E. Berry, Los Angeles Thor dealer, and ordering them by pictures, the way the Japanese in California get their wives. Five days before Christmas Berry was not only sold up on his regular stock, but had been inveigled into parting with his demonstrator, and one of the shop men who had a Thor had it practically commandeered for the good of the cause.

The information about the new models which has been getting to the riders is creating a demand that is actually astonishing, considering the fact that until Berry took the agency the Thor had not been represented in Los Angeles for practically a year.

During the past week Berry sold another Cygnet rear car, and prospects are bright for more rear-car business.

L. A. CLUB ELECTS

Change of Policy for the Coming Year Gives Trade Members Honors

LOS ANGELES, Cal.—Making a flat reversal of policy, the Los Angeles M. C. this year has given the members "in the trade" a chance to run things, and show the increase in membership and activity which they claim is due in 1917.

George Rubsch, Indian agency, is president; L. E. Reed, Excelsior agency, vice-president; A. F. Van Order, Harley-Davidson agency, secretary and treasurer. Installation of officers will take place Jan. 2, 1917. Dec. 31 and New Year's day practically the entire membership will make the big run to San Diego, to join in the festivities of the closing of the Exposition.

SAN FRANCISCO M. C. STAFF

SAN FRANCISCO.—The San Francisco M. C. will elect officers for the new term on December 28. No opposing candidates have been presented and the ticket will stand as follows: C. Meyer, president; A. W. Green, financial secretary; G. W. Patten, treasurer; A. Meyer, recording secretary.

The masked ball given by the San Francisco M. C. proved a success both socially and financially, and as a result of the social evening the coffers of the organization have been swollen to the extent of $100. The affair had a highly stimulating effect on the club's membership campaign.

WHAT CANADIAN REGISTRATION SHOWS

Dominion Registers Over 7,000 Motorcyclists During 1916 Despite War Conditions—How Figures Compare with Registration Returns of Other Years

TORONTO, Ont., Dec. 25.—An exact line on motorcycling conditions and the general motorcycle trade situation in the Dominion of Canada is obtainable by reference to official registration figures of each of the Canadian Provinces and Territories. On the whole, the Canadian motorcycle figures for 1916 are highly encouraging, and claims that the motorcycle business throughout the country was in good shape during the year despite military enlistments are verified by the Government totals for the past twelve months.

A compilation of the official returns from all Provinces and Territories shows that 7,725 motorcycles were in use at the end of 1916. The total for 1915 was 7,394, while in December, 1914, the motorcycle registrations totaled 7,450. The increase of total registrations in 1916 was 331, while the decrease in the 1915 total from that of 1914 was 56.

Heavy Demands of the War

The official population of the Dominion is 7,206,643, but, of this number, more than 300,000 males—mostly young men and all motorcycle prospects—are now overseas fighting in the great war. Approximately 100,000 more are under arms in Canada. Taking the number of soldiers already overseas from the total population, it will be seen that about 6,906,643 people are still in the land.

This means that there is one motorcycle in Canada for every 893 persons. This deduction is important because it shows that the Canadian motorcycle field has barely been scratched as yet. Incidentally, it is interesting to note that 70,000 bicycles were made in Canada during 1916.

It is figured that 2,180 new motorcycles were sold in Canada during 1916. This is not the guess of any one manufacturer or dealer. This total is arrived at by the process of adding the number of estimated junked motorcycles to the increase in registrations for the year. On account of the great number of war enlistments during the twelve months, it is believed that a comparatively large quantity of motorcycles was discarded or laid away until the owners' return from war.

A conservative estimate of the machines thrown into the junk pile and stored away because of military calls is 25 per cent of the registration total for 1915. This runs up to 1,849. As the Government registrations for 1916 covered this shrinkage and showed an increase of 331 besides, the number of new motorcycles put into commission during the year must have been 2,180, more or less.

Many Machines are Unused

Judging by the arrangements for a great many sales, and also by the reports of many Canadian dealers regarding the supply and demand for used motorcycles, it is the opinion of trade experts that as many second-hand machines changed hands as new models were purchased. This means that more than 2,000 used mounts were handled by Canadian dealers, and each of these deals also gave a profit to interested agents throughout the country. It is possible that at least 5,000 new and used models were sold or re-sold by Canadian dealers during 1916.

Table of Registrations

The real affect of war conditions is really first shown in the registration figures for all Provinces in 1915, as the war did not start until practically the 1914 selling season was over. This accounts for the apparent decrease in total sales for 1915. The market righted itself in 1916, however, despite the war, and the Canadian trade shows a substantial increase for the latest calendar year.

The number of motorcycle permits issued throughout the Dominion of Canada and Newfoundland for the past three years is as follows:

	1914	1915	1916
Ontario	3,633	4,174	4,300
Quebec	205	296	435
Nova Scotia	96	103	115
New Brunswick	70	86	90
Prince Edward Is.	3	3	3
Manitoba	948	942	935
Saskatchewan	461	398	447
Alberta	387	390	430
British Columbia	944	923	885
Yukon	7	15	15
Newfoundland	.....	64	70

Strong Showing by Ontario

A noticeable fact of the above figures is that the Province of Ontario has always had more motorcycles than all the rest of the Dominion put together. Attention should also be drawn to the point that the adoption of the reciprocity measure by Ontario early in 1916 has caused the cessation of the practice of registering visitors' motorcycles by the Provincial Government. The actual increase in the number of motorcycles owned in Ontario during 1916 is then really greater by more than one hundred than the actual permit figures show as outside tourists' machines are not included in the Provincial total for the year. Slightly more than 100 motorcycles belonging to American tourists were registered by Ontario in 1915.

Toronto the Center

With the motorcycle population of Ontario as large as it is, it is not surprising to find the motorcycle trade center of Canada at Toronto. The majority of manufacturers, jobbers and distributors are located at Toronto. To these men the motorcycle prospects of the country appear very promising at the present moment. They expect to keep on selling motorcycles in increasing number, no matter how long the war lasts, and then when hostilities are concluded a big jump in sales is expected. This, in a word, forms the general anticipation of Toronto motorcycle tradesmen with regard to future Canadian business.

A feature of the situation for 1916 is that practically all new models sold during the year were of American or Canadian origin. A few British motorcycles found their way to Canada, but the agents of English models are few and far between. In Toronto, for instance, six or eight makes of English machines were sold before the war. During 1916, however, only three or four new English models were sold altogether. It is believed that English motorcycles will come back after the cessation of hostilities, and there will always be a certain class of prospects who will want the English productions. American manufacturers should keep this point in mind.

SOME RECORD!

Had Only One Replacement for Over 100 Indian Sales

MONTREAL, Quebec—R. A. Radmore, proprietor of the Arlington Bicycle Co., Montreal agent for the Indian, claims a record for the durability of Hendee models which is unique. Radmore disposed of almost one hundred Indian motorcycles during 1916, yet he was called upon to replace only one part and that because a machine had been operated without oil. In a number of cases new motorcycles which he sold during the year already have a mileage of 7,000 to 10,000 miles.

The first 1917 model to reach Montreal was the one which Radmore rode from the Springfield factory a few weeks ago. He covered the 341 miles through the Adirondack Mountains without difficulty.

The feeling of Montreal bicycle dealers is being secured with regard to another spring sales campaign and it is more than probable that a publicity propaganda will be carried out in both the English and French newspapers.

CHRISTMAS CARDS

Manufacturers Sent Out Some Attractive Ones; Dealers Followed Suit

PRACTICALLY all of the manufacturers of motorcycles, bicycles and accessories passed out seasonable greetings to their dealers and other friends in one form or another during Christmas week, and not a few of them distributed artistic cards. Among the latter, the cards sent out by the Hendee Mfg. Co. through its various department heads, by the Chicago Cycle Supply Co., the Excelsior Motor Mfg. and Supply Co., and A. B. Coffman, manager of the National Cycle Shows, were unusually interesting.

Not a few dealers throughout the country availed themselves of the opportunity to pass along a few seasonable words to their patrons and prospective buyers, and, all in all, the recognition of the Christmas period by the trade was more general this year than for some time past.

NO TORONTO RUN THIS YEAR

TORONTO, Ont.—Interest in sporting matters in Toronto is so quiet on account of the war that the annual midnight run to Hamilton on New Year's Eve will not be held this time. There are easily more than 2,000 motorcyclists in Toronto, but all collective events are being held in abeyance by common consent until after the war.

MERRY OPPOSES SEVERE SPEED PROGRAMS

San Francisco Excelsior Distributor Says Results Do Not Justify Risks Assumed by Contestants, and Will Support No More of Them

SAN FRANCISCO.—In a statement made to the representative of **Motor Cycle Illustrated,** Edwin F. Merry, the Excelsior distributor, took a strong stand against motorcycle races and severe endurance runs.

"Such events are not stimulating to the motorcycle business, do not help to make riders more enthusiastic about their machines and have a tendency to create false impressions with the public," said Mr. Merry. "We have seen that high-speed work, either on the track or road, and the more severe endurance contests may easily leave a trail of accidents, injuries, and perhaps even fatalities. In many instances the boys who have their machines damaged in such contests are in no position to stand these expenses, and the result is depressing to the whole trade in which the contest is held."

Mr. Merry suggests that social runs and milder endurance contests replace the road events which are now being held, and that special efforts be made to bring tandem and sidecar users into the ranks. He believes that the presence of women and children will have a far-reaching effect. Mr. Merry states emphatically that he will give no support in future to races or endurance runs.

IDEAL RIDING WEATHER

SAN FRANCISCO.—Although it would not ordinarily be expected that many motorcycles would be found on the roads in this vicinity at this time of the year, 15 machines carrying 25 riders of the San Francisco M. C., participated in a social run to Spring Valley Lakes on December 17. The riders found balmy weather and report one of the most enjoyable runs of the year.

ENDURANCE RIDERS RECOVERING

SAN FRANCISCO.—Five of the seven riders who were injured in the double endurance run between this city and Los Angeles are out of the hospital and back on the job. Carl Showalter and his partner, M. Slaights, are still in the hospital, but it is believed they will soon be able to return to their homes.

GOLATHER ON A LONG TRIP

VALLEJO, Cal., Dec. 9.—O. T. Golather left Vallejo today on a Harley-Davidson with a sidecar for his home in Oklahoma. He went by way of Fresno where he will pick up a partner. Gus Hellerman, Harley-Davidson agent, accompanied him to Susun.

ANOTHER RECORD FOR BAKER

SAN FRANCISCO.—"Cannonball" Baker broke another record a few days ago, according to his companions in a duck hunting party. C. C. Hopkins, of Hopkins & Alzine, who was one of the veteran speedster's companions, asserts that no man ever burned more powder and killed fewer ducks than Baker. The other members of the party were John Baumgarden and "Hap" Alzine. The gunners spent Sunday near Gustine and came back with eleven geese, three ducks and some other small game.

NOT TO LEAVE SACRAMENTO

SAN FRANCISCO.—Z. Barton, the local Thor distributor, has received a letter from the Motoraid of Sacramento denying a recently published article that the Sacramento firm anticipated moving to San Francisco. The Motoraid, which handles Thor motorcycles, has also taken on the Cygnet car and will continue to do business in the capital.

RECENT TRADE VISITORS

SAN FRANCISCO.—K. Knudson, of Knudson & Lundlade, Eureka, was a trade visitor during the last week.

Another trade hustler who dropped in on business a day or two ago was C. R. Weeks, of Modesto.

ORDERS SECOND CARLOAD

SAN FRANCISCO, Cal.—"Rush more machines" is the cry from Hopkins & Alzina, of the Reading Standard Branch in this city. This company has already received its first carload of machines and is arranging for another carload to leave Reading this week.

This branch has created considerable interest among riders, insofar as it practically places the factory in their midst, and that it is appreciated by the riders is readily shown by the many orders which have been closed by Messrs. Hopkins & Alzina.

Tell it to the "Tech Ed."

IF you have not availed yourself of the opportunity to refer your mechanical problems to the Technical Department of "Motor Cycle Illustrated," now is a good time to make a start. If you are among the growing number of hardy chaps who keep their mounts in service throughout the cold weather, you are pretty sure to encounter a few little mechanical "goat-getters" that would not bother you in ordinary summer riding. If so, tell the "Tech. Ed." about 'em.

If you are not riding during the winter months, perhaps you are thinking of an overhaul. In that case, our Technical Department will give you advice. This Questions and Answers page is yours, Mr. Rider; hop to it.

Write Us Early and Often; There's No Limit

METRIC DIMENSIONS

I WOULD like to know the size of the cylinder of the Harley-Davidson; also its cubic capacity in metric measurements; also the capacity of the gasoline and oil tanks.

Sector 141, France. JEAN DAVID.

The bore of the Harley-Davidson twin motor is 84.1 millimetres, while the stroke is 89 millimetres. The cubic capacity is 988.73 cubic centimetres. The fuel tank holds 10 litres, 400 in two compartments, while the oil tank has a capacity of 3 litres, 450. In the single cylinder model the bore is 84.1, while the stroke is 101.6 millimetres, the cubic capacity being 565 cubic centimetres.

REMOVE BLACK COATING

MY motor does not run with the same power as usual. It gets very hot when any second gear work is attempted and will stall on long hills. I recently coated the cylinders with black to assist radiation, on the advice of a friend. Carburetion, timing and ignition are correct.

New York. ALBERT HIGGINS.

The cause is probably the black used on the cylinders. If this is anything in the form of an enamel, the flanges and outer cylinder surface are prevented from radiating the heat properly. Remove the black and see if the motor will not then operate properly. Some black preparations are for the cylinders of automobile motors, which are water-cooled and on which such preparations have no ill effects.

BETTER CLIMBING ABILITY

PLEASE tell me what effect the use of a 14-tooth engine shaft sprocket will have on the hill-climbing abilities of my motor. The present engine shaft sprocket has 15 teeth; the clutch sprocket has 36 teeth. The inside countershaft sprocket has 18 teeth and there are 31 teeth on the wheel sprocket.

Brooklyn, N. Y. J. D. D.

With the present sprockets, your gear ratio will be 4.13:1. Using a 14-tooth sprocket, the ratio will be 4.46:1, which will enable you to climb a much steeper hill than with the 15-tooth sprocket. The engine will pull better, but of course will not travel up a given grade as fast. The method of calculating the gear ratio is: Take the product of the teeth on the engine shaft sprocket and on the inside countershaft sprocket. Divide the product by the result of multiplying the teeth on the clutch sprocket by the teeth on the rear wheel sprocket. Thus: 15 x 18 divided by 36 x 31 is equal to 4.13.

USE WEAKER AIR SPRING

ON my recent model of motorcycle, I find that the carbureter will not give a good mixture for hill-climbing and rapid travel on the road with a sidecar fitted. The mixture, however, is very satisfactory for solo work. I have verified the valve and ignition timing and also the compression. F. K. KING.

Cleveland, O.

The carbureter is not set right. Try a weaker air valve spring, and if this will not serve obtain a new auxiliary air valve body and spring, inserting this in place of the one now fitted. This will enable you to make any desired adjustment from the saddle, which is not the case at present.

WRITE TIRE MAKERS

PLEASE put me in touch with a publication devoted to tire repairing and vulcanizing. A. W. BRUSH.

Nebraska City, Neb.

There is no publication devoted to these subjects, as far as we know, but a letter to one of the big tire companies, written on your business stationery, will bring information on these subjects in the form of books issued by the tire concerns. You will find the tire firms' addresses in our advertising columns.

NEW CLUTCH PLATES

I FIND that I cannot start as easily as I used to with my twin cylinder motorcycle, owing to some fault of the transmission. The clutch tends to grab hold, but if I loosen the tension on the springs, the motor races and the clutch heats up. Please tell me the remedy. Also, why my machine will not pull a sidecar well on hills and at speed, whereas it will perform correctly when I am riding solo. H. H. EVANS.

Brooklyn, N. Y.

The plates in the clutch are worn and need replacement. Do this and you will find that the trouble will cease. Be sure that there is plenty of lubricant in the clutch before again starting. The reason that the motor will not pull is that the carbureter setting is not correct. Replace the present air valve spring with a new one. See the answer to F. K. King.

ANOTHER SNOWSTER QUERY

I WISH to use an Excelsior twin motorcycle in the Snowster described in **Motor Cycle Illustrated**, and would like some details as to the fitting of the machine. Also, the way the front sled moves.

St. Louis, Mo. J. J. O'RYAN.

The Excelsior can easily be fitted to the Snowster frame. The fork ends, after the movable portion of the front fork has been removed, will fit within the upturned ends of the axle bracket R. The loop tube will be braced by the cross member J and the blocks D. The location of the brace E is determined by the position of the seat post lug. You can use a spring above the block F if you desire.

We refer you to the answer to A. B. Church, also the drawing of front sled details given last week.

USE MOTOR-SNOWSTER

PLEASE advise me as to fitting an Indian motorcycle to a bob sled, giving details, etc. HARLAN G. ROSE.

Wilmington, Del.

We refer you to the Motor Snowster, described in our issue of October 19. If you will read this article, you will see that the axle bracket R is to be bent so as to take the fork ends of the Indian front fork. The position of the cross member J and the blocks D is dependent upon the motorcycle which is to be used on the Snowster. See the paragraph headed "Fitting the Machine." The same is true with regard to the rear brace E. If you desire, you can fit springs between the top of brace E and clip F. The Snowster was designed to take a standard motorcycle.

MAKER OF THEIM

I WOULD like to have the address of the maker of the Theim motorcycle. Also where I can get 6¼- and 9-inch spokes and nipples. H. E. RUSH.

Van Voorhis, W. Va.

The Joerns Motor Company, of St. Paul, Minn., formerly made the Theim machine. We do not know whether they are manufacturing motorcycles at the present time. The Cyclone motorcycle was the latest product of this company. As to the spokes and nipples in the lengths mentioned, we suggest that you write the National Screw & Tack Company, Cleveland, O., asking where these sizes may be had, also the Standard Co., Torrington Conn.

DENVER AGENCIES IN HOLIDAY DRESS

Trade in "Mile-High-Town" Exceeds Itself in Window Displays—How Some of the Best are Made Up

DENVER, Colo., Dec. 23.—One of the finest window displays that have appeared in Denver for some little time is that arranged this week by the Western Supplies Company, 1448-52 Larimer street. A background painted to represent different Christmas scenes with Santa Claus is there, while in the center of the display is a figure representing Santa Claus going down the chimney. How he is going to take the Thor and Reading Standard motorcycles, which are featured in the window, down the small chimney with him, however, is a mystery that is yet unsolved.

Snow is represented by cotton in the windows of the store which, combined with the other holiday decorations of the windows, go to make up a very attractive display. All manner of motorcycle accessories also find a place in the general scheme of the window's makeup.

The T. D. Shapcott motorcycle store of this city, during the week has also featured a very creditable holiday window display. The background of the window is made up of strips of red and green paper, while the floor of the window is covered with cotton and mica, giving a very realistic appearance of snow and frost.

Christmas bells and other like Christmas decorations are also used. In the center of the window stands a Cleveland motorcycle, while scattered around it are different motorcycle accessories. The window has attracted a good deal of attention, and it shows the concern to be alive to the opportunity of a good attractive window display.

The Mead Autocycle Company, State distributors for the Excelsior motorcycle, has made good use of red and green paper and Christmas bells in its windows this week in honor of the holiday season. Motorcycle gloves and the like also make up a part of the window display and a card above these has painted on it "Christmas suggestions."

The motorcycle dealers of this city have done very little advertising in the newspapers during the holiday season just closing. Most of their advertising has been done through window displays and other like methods. It seems as though the dealers here are waiting until nearer spring before they start their newspaper ad campaigns, at which time it is expected that the motorcycle dealers will take considerable space in the local newspapers.

CONCERNING DENVER TRADE

DENVER, Colo., Dec. 23.—The Western Supplies Co., this city, has been enlivening business at its store of late by giving out cards, which are good for one dollar on the purchase of a motorcycle or bicycle at the Western supply store, or are good for 50 cents when the purchase amounts to only $5. The Western Supply people are agents for the Thor and Reading Standard motorcycles, and these machines are coming in for a good deal of publicity by the method, and the advertising scheme it is expected will lead to a number of sales of these machines.

E. J. Beatty, Harley-Davidson agent in Colorado Springs, Colo., in a letter to Walter W. Whiting, Harley-Davidson man here, states that the motorcycle outlook is bright in his territory. Beatty states that he is lining up a goodly number of prospects, and that he is looking forward to a good year.

The Western Supplies Co., 1448-52 Larimer St., this city, announces that it has 100 rebuilt motorcycles on hand at the present time, and that they must be sold at once in order to make room for incoming new machines. These machines are being offered for sale at ¼ off in order to clean up the stock as quickly as possible.

FOURTH BAY STATE M. C. BALL

BOSTON, Mass.—The Bay State M. C. is preparing to open the 1917 season by holding its fourth annual ball on February 12. This event is looked forward to by nonriders as well as motorcyclists, and is always a financial as well as a social success. The committee in charge of the affair is as follows: George A. Downs, chairman; John Wing, Joseph S. Pagers, Robert Julian and Edward A. Murphy.

OTTO WALKER JOINS ABBOTT

PORTLAND, Ore.—P. L. Abbott, manager of the Motorcycle Supply Company, returned recently from a visit to the Harley-Davidson factories where new sales plans were discussed. Otto Walker, the racer, came back with Abbott and will be connected with the local shop.

MOTOR CAR CAPITAL JUMPS

NEW YORK.—The Motor Car Equipment Co., New York City, has increased its capitalization from $150,000 to $550,000.

Repair Kinks and Shop Wrinkles

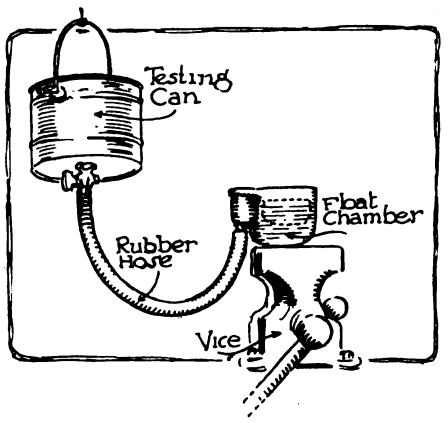
Introducing the Testing Can

This Simple Device Can Be Employed to Advantage in Several Ways by the Live Repairman; Uses Kerosene

BY D. R. HOBART

MUCH has been written about the use of kerosene in the shop for a number of purposes, but as a rule, little or nothing has been done to bring the oil ready to the hand of the workman. He usually has to pour it from a large can into a smaller vessel, then apply the kerosene from this second container to the parts to be treated. By the use of what the writer calls the "testing can," the kerosene will be right at hand and can be left from day to day without doing more than refilling when empty.

The testing can consists of a stout quart tin can provided with a cover and



bail handle. To the bottom is fitted one end of a flexible steel tube of quarter-inch size about 30 inches long, with a stop-cock fitted close to the bottom of the can. The cover has a small hole in it near the edge, this hole being to ensure the flow of the kerosene within when the cover is in place. On the end of the flexible tube is a short length of rubber tubing.

The can normally hangs by its bail handle, with the tubing turned upward and passed over the top of the can to keep it out of the way. The cover should be in place to prevent accidents.

Determining Float Level

The testing can is valuable in carbureter overhauling to verify the level of the fuel in the jet. For this purpose, the carbureter body is placed level in a vise and the rubber tubing connected to the union leading to the float chamber. The can is then supported with its bottom about 10 inches above the float chamber and the cock opened. This will show the action of the float and determine the level of the fuel in the jet. Any adjustments as to height of the float can then be made.

If the can is now hung by its handle to the handle of the vise, any change in the level of the kerosene in the float chamber will indicate a poor seating on the needle valve. The oil can be run back into the can by depressing the float until the chamber is drained.

The use of kerosene for this purpose is better than that of water, as the presence of even a few drops of the latter may cause trouble in starting when the carbureter is again on the motor.

Other Applications

When an injection of kerosene is desired to prevent gumming of the oil in the cylinder, the testing can renders the operation much easier and more economical than by the use of a gun or syringe. It is merely necessary to open the priming cock on each cylinder and insert the end of the rubber tubing, then letting the kerosene flow.

If it is desired to flush the crankcase of a motor with kerosene, the oil pipe connection to the crankcase can be broken and the rubber tubing on the testing can be fitted to it, when the kerosene will do the rest. The force with which the kerosene enters the crankcase can be varied by raising or lowering the can. For spraying, the end of the tubing can be pinched between the fingers.

As kerosene decomposes rubber in course of time, the short piece of rubber tubing will need renewal, but any old scrap of lamp tube can be used as well as a new piece. This action on the part of the kerosene renders it more desirable to use flexible metal tubing for connection to the can. The stop-cock is soldered in the hole in the base of the can and the tubing soldered on the end of the cock.

Easy Method of Restoring Scored Cylinders

THERE are often occasions when the repairman has to finish an overhaul in a short time in spite of the fact that the motor has a scored cylinder. Unless the scoring is deep and extends over much of the cylinder surface, an effective job can be done right in the shop, using the piston as a grinding medium.

Procure a block of wood which will fit snugly within the piston, without distorting it, however. Attach this block with the piston on to a screwdriver bit fixed in a brace. Lay the cylinder flat and, after having coated the piston with emery flour and oil, work it by means of the brace, using the same motion as when grinding a valve.

Withdraw the piston at intervals, wipe the surfaces and note the progress. Continue the grinding with fresh oil and emery until the scores disappear.

Quickly Removing Insulation from a Cable

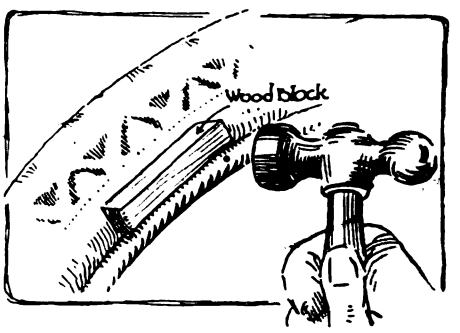
WHEN insulation has to be taken off a cable away from the end, the job can be readily done by the use of the hammer and an ordinary pocket knife. Incidentally, it will save the edge of the knife from being nicked when shaving off the insulation. Nick the insulation in at least three places along the surface to be stripped, carrying the nick all around. Make two or three cross nicks. The cable should then be rested on some hard surface and hammered gently. The insulation will be loosened and can be pulled off.

Protect High Tension Cable Ends

WHEN replacing a high tension cable, a lot of trouble can be avoided by coating the ends with paraffin wax, especially that end which is to fit into the hard rubber brush-holder on the magneto. The end can be dipped in the hot wax, but the exposed cable portion should be cleared of the wax before inserting in the brush-holder. If the cable is not so protected, there is a chance of short-circuiting through moisture entering the brush-holder alongside the cable, and such short-circuiting will be difficult to detect.

Removing Frozen Tires Without Injury

AFTER being ridden through snow and rain these days, the beads of a tire are frequently frozen to the clinchers. If sharp metal instruments are used to remove them, the chances are that the sidewalls will be cracked or otherwise



injured, although these injuries may not show up before the warmer weather.

The safest way to loosen and remove a frozen casing from the clincher is to place a block of wood close to the rim against the sidewall and then strike the block with a hammer. This will loosen the head without damage and enable it to be safely pried loose with the regular irons.

It is well to perform this operation in the warmest part of the shop to facilitate the removal of the tire.

SAVANNAH CLUB

Holds Last Meeting in Old Rooms; Meyer Resigns

SAVANNAH, Ga., Dec. 23.—The last meeting of the year 1916 was held Tuesday night in the old clubrooms, which will be discarded on New Year's eve by the Savannah M. C. when it moves into its new home. The committee in charge announced that the rooms will be among the best for clubs located in the city.

The resignation of O. A. Meyer as secretary was read. He stated that because of business he was compelled to give up the office.

Meyer has been secretary for the past three years and was responsible for the first 300-mile race in this country. He has been succeeded by C. B. Taylor.

Leonard G. Buckner, one time racer and championship holder of Georgia, who has been working in the plant of the Hendee Mfg. Co., returned to Savannah for a short visit.

Buckner announced that he leaves after the holidays for New York where he will take up his new work with Baker, Murray & Imbrie, Inc.

John S. Balmer has been appointed F. A. M. Commissioner for Georgia and O. A. Meyer has been appointed by him as local commissioner. It is under the direction of these two that the big "around-the-state" tour is being arranged for next June. From the outlook already there are enough entries promised to make an excellent showing.

CLEVELAND IN PHOENIX

Moore & Coody Take the Agency for Lightweight Machines

PHOENIX, Ariz., Dec. 26.—The Cleveland in Phoenix is being handled by Moore & Coody.

The entrance of the Cleveland marks the first time that a lightweight has been handled in this territory, and trade folks are keeping their eye on the new firm in an endeavor to determine just how large a call there is for the lightweight machine in and around Phoenix.

Moore & Coody, who enter the field as a new firm with plenty of financial backing, are acting as distributors and already have covered their territory in good style and are placing sub-agents everywhere.

PREST-O-LITE CAPITAL INCREASE

NEW YORK.—Increase of the capital stock of the Prest-O-Lite Co., Indianapolis, Ind., from 80,000 to 100,000 shares is planned, and the stockholders are to meet December 28 at the office of the company in New York City, for the purpose of voting on the plan.

BRUNELL STILL WITH BERRY

LOS ANGELES, Cal.—H. A. Brunell, one of the best known motorcycle salesmen in southern California, was recently the subject of a published report that he had changed over to another agency. Brunell is still with T. E. Berry, Thor distributor, likes his job, and there was never any reason for the report of a change so far as he can learn.

MOTOR CYCLE ILLUSTRATED

Entered at the New York post-office as second-class matter under act of Congress, March 3, 1879.

GET ACQUAINTED WITH JOE

BELOW we present to you for the first time Joe Simms, the smiling, up-and-at-'em, whole-hearted booster and sales analyst, who does the talking in a new series of articles for dealers which begins in the next issue of "Motor Cycle Illustrated." You may recognize Simms when

you see another picture or two of him, but at any rate you are going to like him. He's frank and breezy,—and above all, human.

Joe starts the ball rolling in the next issue with an unusual talk under the title, "Your Territory—What's in it?"

ABOUT THE CONTEST

Puzzle Competition Drawing Answers from All Quarters—Enter Now

WELL, fellows, judging by the way the answers are coming in, the new contest is going to be a better one than the picture contest. Answers are coming with every mail, some from old contestants and quite a number from newcomers.

There is one big point we want to emphasize. Now is the time to enter the contest, not after a couple of the puzzles have been run and you have missed your opportunity of obtaining a perfect score. Join in now. Send in your answer so that we get it before press time (Tuesday night) next week and you will have nothing to regret when the competition waxes warm a few weeks hence.

And just so as to make it easy for the fellows living far away to get their answers in on time for publication, we are running a puzzle every other week. That should give you all ample time to work out the problem and get it into the hands of the Contest Editor before it is time to run the solution and the next puzzle.

The C. E. acknowledges receipt of answers from the following contestants:

Geo. M. Johnson, New Haven, Conn.; C. A. Trumbauer, Quakertown, Pa.; Henry H. Bryan, Washington, N. J.; Bunny Paine, McKeesport, Pa.; H. J. Mader, Park Ridge, N. J.; Robert L. Charlton, Ashland, Ohio; Geo. H. Eyster, Newark, N. J.; Mrs. J. H. Raedel, Brooklyn, N. Y.; "Lone Subscriber," Van Voorhees, W. Va.; E. B. Holton, Newark, N. J.; Ed. O. Spillaine, New York City; Allyn W. Dean, Brandon, Vt.

Which of them sent in correct solutions and which went bad? Oh! That's something else again. We'll tell you that in the next issue. Some were right, however; and some were wrong, and among the wrong ones was one who was so sure of himself that he doubted if it really were a contest! Moral: There's many a slip—

The Contest Editor also wishes to asknowledge receipt of puzzles submitted for consideration by Geo. M. Johnson of New Haven and J. F. Ridolf also of that Connecticut city.

CHASE REJOINS MOSSBERG

Mother's Illness Brings Salesmanager Back to Attleboro Concern

ATTLEBORO, Mass.—Frank Chase is back with the Frank Mossberg Co.

Chase left the Mossberg concern, having been with them for ten years, on Nov. 1, last, to assume the post of sales and advertising manager with the Buffalo Metal Goods Co. His jump from the Mossberg to the Atherton Coaster Brake came as a distinct surprise to the trade and his return now after so short a stay in Buffalo is hardly less startling.

Chase came back to Mossberg simply because his mother, who resides in Attleboro, is ill and he feels that she needs his constant attention. Just who will fill his shoes at the Atherton plant has not yet been decided, although it is expected that W. F. Emerson, who is head and shoulders of the Buffalo Metal Goods Co., will resume the work where he left off when Chase stepped into the organization.

By E. F. HALLOCK

Injecting the Girl Into Motorcycle Competition

IT was quite an awe struck crowd that watched Miss Adeline Van Buren, straddling a high-powered solo machine, climb that boulder-bestrewn, muddy, slippery incline which was chosen for the setting of the Yonkers hillclimb on Sunday two weeks ago.

Every one of us just held our breaths from the time she hit the lower narrow stretch until the "wig wagger" at the top of the hill sent us down her time and the "info" that she had completed the ascent without mishap.

Which brings to us a realization of the fact that however glad we are to see the girls take up the sport of motorcycling, when it comes to speed or endurance contests, that's something else again. A hillclimb of the sort that caused "Babe" Butler to spill, and the experienced La Fosse to bite the dust is no place for a girl, even if she has been seasoned by a transcontinental trip.

We motorcyclists get a great deal of "negative" publicity as things are now; if one of the boys had been hurt on the hill, no doubt we would have gotten an inch or two in each of the New York dailies. But had Miss Van Buren been badly hurt, or had Mrs. Terhune been injured in competition, there would have been enough of the "human interest" there for Monday morning's papers to have each carried a "scarehead" story putting the two-wheeler in an unfavorable light before hundreds of thousands of people.

Let the girls ride by all means. The tour, the Sunday run, the motorcycle picnic—all of them are made more enjoyable and zestful by the participation of the female enthusiast. And without doubt the girl in competition would add much to the keenness of the contest; but the cost in negative publicity would far outbalance the good results.

What's a Motorcycle Worth?—A Whole Coast Ranch!

THERE'S always something of special interest along motorcycle lines coming out of Newark, N. J. The latest is an offer of a ten-acre California ranch, said to be situated in the San Joaquin Valley and to be worth all of $530, for an up-to-date twin or four-cylinder motorcycle.

Which reminds me that when I advertised my Indian Powerplus for sale a couple of weeks ago I got the greatest collection of trade offers of the strangest variety. Several folk wanted to exchange for automobiles on an even trade basis, while one ambitious middle westerner was quite anxious for me to accept a consignment of novelty guns, which he said I could dispose of for $300 or thereabouts if I peddled them around retail. However, I needed the cash and am glad to say that I had no trouble in disposing of my machine, which really was in fine shape, at a price which left little to be desired.

If some one of my readers is interested in this California ranch proposition, I will be glad to put him in touch with the man who makes the offer.

A Gas Lighting Tip That Is Worth While

MET a rider on the road last Sunday who had the right idea with regard to acetylene gas piping. These days when it is necessary to have a tail light as well as a sidecar light in practically every state, the piping problem is quite important.

Rubber tubing is unsatisfactory even when new, for it continually kinks and cracks or otherwise gives trouble; and with age these causes for complaint are magnified greatly.

Likewise the copper tubing does not behave in the best possible manner. It, too, cracks under the continued vibration; works loose and rattles, and, moreover, is affected by the composition of the gas so that it corrodes quickly and becomes clogged. Again, it "sweats" and the deposit of moisture often runs down and settles at the lowest point, clogging the line or at least making the gas flow erratic.

The rider in question carried his gas from his Presto tank on the handlebar to the tail light through the outer casing or sheathing of a Bowden wire. The substance has all the flexibility of the rubber tubing without its collapsibility; stands both weather and vibration without cracking, is easily attached and does not sweat, and, moreover, is perfectly gas tight. Of course, rubber connectors are used for attachment to both the tank and the light.

Applying the Hill Climb Formula to Lightweights

NO one who saw the Yonkers hillclimb a week ago could have been greatly impressed with the lightweight division, insofar as the spectacular end of it is concerned. As for performance, the lightweights did remarkably well—in fact, it is really wonderful that the little fellows got up the incline at all.

But there is nothing very impressive in the sight of a lightweight chugging slowly up an incline on low gear—the thrill that comes of the speed of the larger and more powerful solo and sidecar machines is totally absent.

Nevertheless, the lightweight performance holds much of interest for the close observer. The large part that weight plays in the performance is quite evident to anyone who took the trouble to compare the figures and approximate the weights of the riders.

Waughop, on the Cleveland, for instance, was undoubtedly the heaviest rider of the quintette—and sure enough his time is slower than that of any of the others. Raoul undoubtedly was the next heaviest, Miss Van Buren next, while from talks with those who profess to know, I gathered that both Mrs. Terhune and Wally Stuart tip the scale at 120 pounds. And according to this arrangement, the starters finished as per schedule, with the heaviest rider last and the two lightest riders comparatively close together.

In view of the finish it would be interesting to rate the results according to the hill climb formula. On the surface of it it looks as if according to the "math" way of doping out the results, the order of things would be just reversed, with Waughop the winner, Raoul next, and so on down the line. Without the exact figures, of course, it is impossible to work out the result, but I hope that a larger touch of interest will be given the lightweight division at the next hill climb by rating the competitors not alone according to time, but also by the formula figures.

Winning Back the Newly Married Man

"WHAT'S become of Lindsay? I haven't seen him with the bunch for a couple of months."

"Oh, he got married and sold his machine."

I dare say that this little conversation, modified, of course, by local conditions, has echoed at least once from the walls of every club room the country over. And through the matrimonial route we lose yearly a whole army of "regular fellows," who, before Dan Cupid turned his shrapnel on them, were among the heartiest of motorcycle enthusiasts.

But why should we lose them? The girl, perhaps, is a bit "stuck up" and rather not ride in a sidecar. A car for her, or nothing. Gosh, I know a lot of folks like that.

Yes, and I guess every one of us knows a whole lot of folks like that. They go around with their heads stuck up in the air emulating the rich and the near-rich and passing up some real good times simply because they won't get wise to themselves and get down to their own level, which, by the way, is the level of their pocketbooks, and enjoy sports which are within their means.

But it's distinctly up to us to show them the error of their ways. Get around to "Lindsey's" house with a sidecar machine; pile the girl into it—a little kidding will bring the best of them off the high horse—get "Lindsey" on the back and away you go to the club run or the Sunday picnic. A camera, a jolly crowd, a good feed and a clean day's sport and the girl's half won.

We are too much inclined to feel that the fellow who gives up motorcycling when he joins the Benedicks is a "dead one"; lost forever.

Nix, fellows! He's only half dead. Open the way for him to overcome the girl's objections, and you'll have two enthusiastic boosters instead of one.

NEW VACUUM OIL PLANT

Refinery Covering 670 Acres Now Being Finished at Paulsboro, N. J.

PAULSBORO, N. J.—The Vacuum Oil Company, of 61 Broadway, New York, is erecting an oil refinery along the river front, the plant having a frontage of one mile and a quarter. The plant, in addition to the buildings and tanks, will include a concrete bulkhead 1,200 feet long to allow for docking ocean-going steamers.

The ground to be occupied is 670 acres in extent. The following buildings are now in course of erection: three still houses for distillation, five pump houses, a wax plant, boiler house and power plant, tank and boiler shop, machine shop, pipe shop, carpenter shop, storehouse and pattern storage building. A pipe line has been laid under the Delaware river connecting with the main trunk line to Essington, Pa., to allow the pumping of crude oil direct from the Pennsylvania oil fields. It is expected that the plant will be ready for operation about April 1.

OHIO GOOD ROADS OFFICERS

COLUMBUS, Ohio.—D. S. Humphrey, Cleveland, was elected president of the Ohio Good Roads Federation, to succeed Jesse Taylor, Jamestown, who died recently. Mr. Humphrey has been treasurer of the organization. O. J. Demuth, New Philadelphia, is the new treasurer. George W. Lattimer, Columbus, was elected first vice-president and David Dunham, Lebanon, one of the 14 vice-presidents.

FOR GOOD ROADS

Butler County Council Receives $180,000 a Year for Work

CINCINNATI, O. — The Cincinnati Chamber of Commerce, which has been doing great work in pushing the construction of the various links of the Dixie Highway in this section, has received word that the Butler County Council of the association has secured a levy amounting to $180,000 a year for the improvement of the highway and other roads in the county. It is evident that road construction in this section is making remarkable strides, and motorists in all classes will soon have the finest going in the country.

INDIAN FOR ROME POLICE

ROME, N. Y., has joined the other cities and towns of the United States which have adopted the motorcycle for their police departments by purchasing a Model N Indian. The sale was made by the Bryant-Noonan Auto Cycle Company, of Rome.

SHOW WEEK DISPLAY AT FIRESTONE BRANCH

Combination Tire and Machine Display at New York Headquarters, With Some Samples of the Company's Motorcycle Tire Advertising

SPECIAL SHOW TRAINS

Dealers in Many States Arrange to Travel to New York in January

NEW YORK, Dec. 26.—A feature of the forthcoming New York Show, to be held Jan. 6-13 at the Grand Central Palace, will be a number of special trains to carry trade men from various centers to the exhibition. From Dallas, Texas, a special all-steel train will leave on Jan. 5, to carry from 150 to 200 dealers to New York.

Similar trips are being arranged by organizations in Indiana, Michigan, Ohio, Pennsylvania, Massachusetts and Connecticut. Californians are coming in a special from 'Frisco arranged for by the Oakland Chamber of Commerce.

VITALIC DINNER

Novel Course Dinner Enjoyed by Continental Rubber Force

ERIE, Pa., Dec. 26.—Something novel in the way of a course dinner was indulged in by members of the Vitalic Club recently.

The dinner was served in four courses, each course being served at a different house. The first course was given at the home of Mr. and Mrs. H. J. Bryant, the second at the home of Mr. and Mrs. W. J. Surre. The third course was taken at the home of the Misses Horn, while Mr. and Mrs. C. Strickland played hosts for the gathering at the final course of the dinner.

PRAISES AMBULANCE WORK

English Committee Man Pays Tribute to Work of Indian Outfits

IN SPEAKING before an English audience recently, T. Vesey FitzGerald of the British Ambulance Committee paid a high tribute to the work being performed by the motorcycle ambulances on precipitous mountain pathways. In the section of which Mr. FitzGerald spoke there are several Indian ambulances, the pioneers of this type of machine.

"The motorcycle ambulance," said Mr. FitzGerald, "is of immense value in places which could not be penetrated by four-wheeled vehicles. By means of these machines many wounded are now conveyed to their destinations in an hour or an hour and a half, as compared with 30 hours when the oxen-drawn French carts were used to cover the same distance.

"But aside from the question of speed which of course is highly important is that of comfort. The motorcycle ambulance has been found far more comfortable than the old method of transportation."

TO ENFORCE HEADLIGHT LAW

COLUMBUS, Ohio.—Preliminary to enforcing that section of the new traffic code against the glaring headlight menace, Safety Director Barry yesterday instructed Police Chief Carter to order strict enforcement of the regulation which requires all vehicles to be equipped with lights after dark. This includes autos, bicycles, motorcycles, buggies and wagons.

Letters to Dan Deeler, Esq.

SAY, DAN:—Did it ever strike you that confidence is one of the queerest commodities on the market? It's priceless, and yet the chap with nothing in his pocket but a hole may be loaded to the goshswizzled gizzard with it.

If so, his pocket won't long be empty. Confidence will enable him to ring the bell and get back among the reg'lar fellows in short order. But if he goes shy on confidence—good evening! he's through.

Pass a wad of confidence to a truck-driver and you invest him with royalty. Withdraw confidence from a monarch on his throne and you leave him an also-ran; and very soon somebody will put dynamite in his parsnips.

Every man who has succeeded in getting his monicker hooked up with big doings was born and raised on confidence. He refused to be discouraged and the world finally agreed with him. That's the answer.

When Thomas A. Edison was trying to make a machine talk in a little shed out in Menlo Park, N. J., folks laughed at him and said he'd probably get over it if his friends treated him kindly. Make a machine talk? Huh!

But Edison did make the machine talk in due time; and similar machines are talking all over the civilized world today. Edison's middle name is Alva—but it ought to be Confidence. They didn't play fair with him at the christening.

And listen, Dan! While he was teaching that machine its A B ab's Edison found time to supply the world with so many other scientific marvels that fourteen clerks at the Patent Office developed writer's cramp from trying to keep up with them. Edison's only asset at the start was confidence.

When Alexander Bell tried to float a company to commercialize his telephone, many years ago, he asked Uncle Joe Cannon to invest $200. Uncle Joe said Bell was a nice boy, and so forth, *et cetera*, but that he was wasting time in trying to talk over a wire. Bell thought differently—he had confidence—and he perfected the telephone.

The very day that the Wright brothers made their first flight in a heavier-than-air machine, in a secluded spot down on the Atlantic Coast, a prominent scientist explained in a scare-head newspaper article that heavier-than-air flying was a joke. We know better now, don't we, Dan?

When Marconi first talked of wireless telegraphy the scientific wiseacres smiled and the rest of the world ha! ha!-ed! But Marconi is shooting his voiced lightning around this old ball of mud today—and nobody smiles.

If you were to ask these big fellows what contributed most to their success, they'd doubtless tell you it was confidence—faith in their work. Money and opportunity helped them in course of time, but it was confidence that put pep in their progress; confidence that made the world recognize them.

Salesmanship, Dan, is seven-tenths confidence and three-tenths opportunity. When a man drops in at your motorcycle agency to look at a machine, he is about three-tenths sold, as a rule. You have to put across the other seven-tenths. Do you do it? Mebbe so, mebbe so—but I ha' me doots.

And what does a salesman amount to without confidence in the product he is selling? Zero! You might almost as well aim a phonograph at a prospective buyer as turn him over to a salesman lacking in confidence. No man can sell goods he doesn't believe in. I couldn't. You can't. Nobody can. A salesman can't communicate to a prospect what he doesn't possess himself.

If it came to a choice between a salesman who looked like a matinee idol and talked like Bourke Cochran—but who lacked confidence—and one who was shy on appearance and vocabulary (looks and chatter, in other words), but who had an abiding faith in his business, I'd hop to the latter.

I'd feel that I could trust him; that if he was so goshswizzled sure of the motorcycle's merits, there must be something to back him up. When he looked me in the eye and asserted that the average young man could obtain more fun and healthful recreation out of a mtorcycle than from any other vehicle at anything like the price, I'd know he meant it.

You need confidence, Dan (tut, tut, now—this is a frank letter from friend to friend), and most of your fellow-workers in the motorcycle sales field are handicapped in the same way. Here you are, selling as fine a piece of mechanism and as widely adaptable a vehicle as the world possesses, at a fair price and with reasonable guarantees, and you put the big story of the motorcycle's usefulness across with about as much kick as if you were speaking that piece about Mary and the mushy little lamb.

That won't do. You know the motorcycle is a good buy, don't you? Certainly. You know you're giving value for every dollar you get, don't you? Of course. You know the motorcycle will do more things, and do them better, than anything else on wheels, don't you? Prezactly. You know that if you once get a red-blooded man aboard a motorcycle for a little spin, you've made a patron, don't you? Posilutely!

Well, why in the name of Watery Gasoline don't you put all those convictions into your sales talks? It's not enough for you to believe in the motorcycle; you must believe in it so hard that you make the other fellow believe with you.

Here's the trouble, Dan: You know the motorcycle from the ground up, and for years perhaps you have been in close touch with all the things the motorcycle has done; and you have finally acquired the idea that everybody else knows all about it too. But the general public knows comparatively little about motorcycles.

When a new patron drops in at your shop he isn't supposed to know anything about motorcycles; it's up to you to tell him. He's out to wise up, and his final decision is going to be based as much upon the dealer's personal attitude towards the motorcycle as upon any specific sales argument.

Yours for More Shekels,
DON.

FOREIGN TEAM TAKES SIX-DAY HONORS

Marcel Dupuy and Oscar Egg Capture Annual "Grind" After Sensational Lap-Stealing Stunt—Madden and Root Second and McNamara and Spears Third—Team Work Hinted at

NEW YORK N. Y., Dec. 27.—Once more a foreign team has registered a victory in the annual six-day race run in Madison Square Garden. Back in 1907 Walter Rutt, the German, and John Stol, the Hollander, carried off the honors; and again, in 1914, Alfred Goullet and Alfred Grenda, two Australians, accounted for the big race. In the race which finished Saturday, Dec. 23, Marcel Dupuy, the Frenchman, and Oscar Egg, the Swiss, won after gaining a lap over the field an hour or so before the finish.

It was probably the most sensational climax to the annual "grind" that has ever been staged in the famous building. After sprinting after a $50 "prime," which was won by Reggie McNamara, the Australian, Egg started out and, after a few changes with his partner, Dupuy, the lap was gained amidst a great outburst of enthusiasm.

It was a popular win from the standpoint of the spectators, but was not satisfactory to a number of fans.

Had Planned the Coup

Before the lap had been gained it was noised around the building that Egg and Dupuy were going after a lap after the second or third sprint in the final hour of sprinting, when there was a sprint every mile. It was also said that one or two teams would help them. McNamara and Spears and Cameron and Kaiser were said to be the helping teams. They must have changed their minds about waiting until the final hour, for they went after the coveted circuit as soon as McNamara had spent his strength securing the $50 sprint.

When Egg went there was consternation about the camps of the other teams and the big building was in an uproar. Egg soon gained a commanding lead and Dupuy relieved him, the Frenchman increasing the advantage of the pair and, after a few reliefs, the precious lap was gained. Root and Madden made a desperate effort to close the gap, but as the others were reluctant to give chase the Root-Madden pair were caught with the others, Madden being the last one to be tagged. Both Dupuy and Egg held up their hands as they caught Madden as a signal that they had caught every team.

A bad smash occurred almost as soon as the lap had been gained. While rounding the Fourth Ave. turn the field swung wide and Hill crashed into Debaets and McNamara. Debaets fell first and brought down McNamara with him. Debaets, tired from his efforts in the sprint previous, was badly used up, but McNamara arose and walked to his trackside cot. The bell was rung and sprinting stopped for at least ten minutes, which gave every rider a chance to rest up.

Just before the "jam" which put Egg and Dupuy in front, Hill, who had been tipped off what was doing, urged Drobach, his partner, to stay on the trackside and not go down to the training quarters. Drobach went anyway, and when the big sprint was started by Egg he could not get on the track quick enough to relieve Hill, to save the latter from being lapped. Hill was so incensed at Drobach that he refused to come out and help Peter in the last hour of sprinting. There were 20 sprints in the last hour, and Drobach rode every one of them. Hill's actions were unsportsmanlike, to say the least; he was made to look like a quitter and Drobach was made a hero, second only to the winners.

Theatrical engagements seemingly played as much of a part in the deciding of the race as the honors that always were supposed to go to the victorious pair. Two parties who had home trainers had been very busy booking the winners at a local theatre, and whether the helping teams are cutting into the money that Egg and Dupuy are to secure for appearing in a "three-a-day" act is problematical. The winners, in all probability, will be assured of at least five weeks' of work, which may be extended, providing they prove to be drawing cards.

Eleven Teams Finished

Out of the original field of fourteen teams eleven of them finished. Ed. J. Carroll and William Spencer were eliminated early Tuesday morning, while Clarence Carman and George Wiley were forced out of the race on Wednesday, their withdrawal being caused by Carman being injured in a bad spill on Wednesday afternoon. Alfred Grenda broke his collarbone late Thursday night, and the team of Goullet and Grenda, the favorites of the race, were also forced out, much to the regret of every fan.

Dupuy and Egg, during the week, had scored 29 points in the nightly sprints. On Saturday night they won all of the 20 sprints, their total for the week being 49 points. Root and Madden scored 66½ points during the week and carried off

TWO OF THE WINNING COMBINATIONS IN THE 1916 "GRIND"

Bob Spears (left) and Reggie McNamara, the Third Team in the Strenuous Contest

Digitized by Google

second honors. McNamara and Spears finished third with 88 points, while fourth honors went to Cameron and Kaiser with 108 points. Drobach and Hill finished fifth with 116½ points, and sixth place was accounted for by Walthour and Debaets with 121 points. Seventh place resulted in a tie between Lawson and Mitten, Kopsky and Smith and Hans Ohrt and Thomas, while tenth place was tied between Ernest Ohrt and Bello and Ryan and Eaton, but neither tie was ridden off.

Winners Rode 2,625 Miles

During the week Egg and Dupuy covered 2,625 miles. The Root-Madden, McNamara-Spears. Hill-Drobach, Cameron-Kaiser and Walthour-Debaets teams were one lap back, the Lawson-Mitten, H. Ohrt-Thomas and Kopsky-Smith teams were two laps back, and the E. Ohrt-Bello and Ryan-Eaton teams three laps back of the winners. The record is 2,759.2 miles, made by Grenda and Goullet in 1914.

The riders were riding on a percentage basis. They were to receive 35 per cent of the gross gate receipts. About $37,000 was taken in during the week, and on Tuesday following the finish the cyclists attended the "ghost walk" at the Garden.

CYCLING NOTES

The winning team in the six-day race, Dupuy and Egg, opened up at the City Theatre, 14th street, Manhattan, on Christmas Day. They did four turns on the holiday, but on other days they will only do three. Other houses in and around Greater New York will book them during the next two months.

The six-day race just finished marked the 38th event of this kind, both large and small, that Worth Mitten, the Davenport, Ia., cyclist has participated in. And Mitten says he has been in the money in all but two of them.

It is said that a six-day race in Chicago will be run by Messrs. Paddy Harmon and Paul Cooper, formerly interested in the Riverview Velodrome in the Windy City. The Stockyards Amphitheatre will in all probability be the spot where the race will run, providing they can get the bicycle riders to sign for the race.

Santa Claus made a delayed call upon the riders who competed in the "grind" at Madison Square Garden. They were not paid off until Tuesday following the finish, so they will have to "Do Their Christmas Shopping Later."

Eddie Madden and Ray Eaton, two of the contestants in the annual event were married, according to Dame Rumor, the week before the race.

At the Velodrome D'Hiver, Paris, on Sunday, Dec. 3, Thorwald Ellegaard, the Danish cyclist, defeated Charles Meurger, the French sprinter, in a match race. Ellegaard won three heats and Meurger one. In the pace race, run in 20 and 30 kilometer heats, at the same meeting, Charles Parent, at one time French and world's paced champion, defeated Eugene Bruni and Henry Contenet in the first heat at 20 kilometers (13.4 miles), Bruni finished second 200 yards back, while Contenet was 400 yards back. The time was 16:51 1-5, which established a new track record. The second heat at 30 kilometers (18.6 miles) went to Contenet with Bruni second, 135 yards and Parent 850 yards back. The time was 25:25 1-5.

HOW THE SIX-DAY RIDERS SCORED DURING THE WEEK

The following table shows how the riders scored points in the first five nights and on Saturday night with their total mileage:

Team.	Mon.	Tues.	Wed.	Thur.	Fri.	Sat.	Total.	Miles.
Egg-Dupuy	6	6	6	6	5	20	49	2,625.0
Root-Madden	2	3	2½	3	1	58	69½	2,624.9
McNamara-Spears	3	1	2½	4	2½	75	88	2,624.9
Cameron-Kaiser	6	6	5	6	4	81	108	2,624.9
Hill-Drobach	5	5	4	5	2½	95	116½	2,624.9
Walthour-Debaets	6	6	6	6	6	91	121	2,624.9
Lawson-Mitten	6	6	6	6	6	*	...	2,624.8
H. Ohrt-Thomas	6	6	6	6	6	*	...	2,624.8
Kopsky-Smith	6	6	6	6	6	*	...	2,624.8
Ryan-Eaton	4	4	6	2	6	*	...	2,624.7
E. Ohrt-Bello	6	6	6	6	6	*	...	2,624.7
Goullet-Grenda	1	2	1	1	Out			
Carman-Wiley	6	6	Out					
Carroll-Spencer	6	Out						

* Did not compete in any sprints and therefore did not score points.

BIKE TRACK FOR DETROIT

DETROIT, Mich., Dec. 20.—A movement for the erection of a bicycle track has been started here by the Belgium-American Bicycle Club. The scheme has the support of many of the dealers, and business men

Worth Mitten, Who Just Completed His 38th Six-Day Race

are also interested in it. If the plans work out according to expectations construction work will be started early in the spring. Trademen are enthusiastic in support of the project, and argue that a good track would have a marked effect upon his business.

WIMMER NOW A TRAVELER

DETROIT, Mich.—Charles Wimmer, one of the oldest and best known men in the cycle trade in Michigan, is now traveling for the Detroit Cycle Supply Co. He travels Michigan, Indiana and Ohio, and reports that dealers throughout his territory are looking forward with unusual optimism to the opening of the new season.

BIG XMAS BICYCLE TRADE

DETROIT, Mich.—The William E. Metzger Co., handling the Pope and Indian lines of bicycles in Detroit, has set a new mark for holiday trade. An active campaign was conducted for several weeks before Christmas with a view of educating Detroit folks to the value of the bicycle as a Christmas gift, and the results were beyond all expectations.

CYCLE RACES IN BUFFALO

BUFFALO, N. Y., Dec. 26.—Bicycle races will be featured on the program at the opening indoor athletic meet to be held at the 65th Regt. Armory on New Year's night. All of the local stars will participate.

PUYALLUP A CYCLE CENTER

PUYALLUP, Wash.—This city is one of the ideal cycling centers of the State of Washington. There are many miles of pavement in addition to a strip of the Pacific Highway, and in consequence many bicycles are sold to mill workers and mechanics. Many of the girls employed in the canneries ride to and from their work on their bicycles.

Germans Use Many Different Tires

Rubber Gives Way to Wire, Wood, Leather and Canvas—Racing Men Still Use Their Light Tires, Although Others Are Prohibited to Do So by Military Authorities

WASHINGTON, D. C., Dec. 26.—New substitutes for rubber bicycle tires, as devised in Germany, are discussed in a recent report sent here by United States Vice-Consul H. E. Carlson at Frankfort-on-the-Main. He says:

The scarcity of rubber and the partial commandeering of rubber bicycle tires have caused a number of substitutes to appear on the German market. The substances used are steel wire, leather, wood, prepared canvas and combinations of these substances.

Steel Wire Used First

The first substitute to appear was a tire made of steel wire, about three-sixteenths of an inch thick, which was made up into a very close coil, the two ends being welded together so as to give it the proper shape. The wholesale price of this product is now twelve marks ($2.86), and it is retailed for eighteen marks ($4.28). Besides the fact that the price is high, the steel-coil tire has the additional objection that it cuts into the pavement and rattles considerably when in use. The latter objection might be overcome, it is said, by placing a layer of felt between the rim and the tire, but this would increase the price.

Wooden tires have been used with some success. At least three different types of which wood is the main part are sold here. In a few cases the tires are made of a single piece of wood and retail at four to six marks (95 cents to $1.43). Sectional wooden tires also have appeared on the market. One of these is made by the Continental Caoutchouc and Gutta Percha Company, of Hanover. It is composed of forty-seven parts.

Even Tin Is Used

These are twelve wooden tire sections of three different kinds, twelve tin plates, twelve screws, ten connecting pins and one thumbscrew. The tin plates are used to secure the sections to the rim, which must be of metal; the screws to attach the tin plates to the ends of the sections; the connecting pins to hold the sections together, and the thumbscrew is put through the valve hole in the rim and thus tends to attach the tire more firmly to the rim. The company is selling this tire for six marks. ($1.43). In reality the expense is a little more, for in order to give satisfaction shock absorbers in the form of steel springs must be attached to the fork of the front wheel. These springs retail at 7.50 marks ($1.78) and are also to be had through the Continental company. This brings the total cost for a set of tires up to 19.50 marks ($4.64).

A third wooden tire which is advertised is said not to be meeting with great success on account of the price. This is made of one piece of wood, the outer surface of which is covered with a small strip of leather. Between the under surface of the tire and the rim several steel springs are placed with a view to securing elasticity. In addition to this, large steel springs are attached to the front and back forks. The cost of this outfit, including the two tires and the large springs, is thirty-six marks ($8.57).

Several leather-covered and canvas-covered tires also are on the market. These are solid, the outer castings being of leather or prepared canvas, and the inner part consisting of wood and other substances.

Peter Drobach, Who Put Up Great Exhibition in Six-Day Race

To make the tire more durable small pieces of steel are often affixed to the outer or wearing surface. The prices for products of this class vary. One fairly good leather-covered tire retails at forty-eight marks a set ($11.42); another at seventy marks ($16.66).

"Lobo" Is Best Tire

The tire that is said to have the strongest claim to being a real substitute for the rubber article appears on the market under the trade name of "Lobo." It is made in Chemnitz, Saxony, by the Kunstgummi, G. m. b. H. It is composed of two parts, corresponding to the former inner and outer tires. The inner part, which is most important, is solid and is covered with cloth made into the shape of a tire. The tube is filled with a preparation resembling rubber. The outer tube is composed of prepared canvas and is said to have very good wearing qualities. The effect is to give the tire a certain amount of elasticity, so that it can be used without springs at either of the forks. The price for a set of these tires is fifty-two marks ($12.38). This will doubtless tend to restrict their use.

The most practical tire, from the point of view of both price and service, seems to be the sectional wooden tire.

Although rubber tires for commercial and other uses seem to be banned, the racing men are able to use their rubber tires the same as before the edict was issued. Race meets are held regularly throughout Germany and from the times made in the races, if one can judge from that, only light racing tires are used.

HIBAN AND HOFFMAN PROVE THE BEST

Take Premier Honors in Woodmere (N. Y.) Two-Hour Event on Christmas Day—Johnson and Gallen Finish Second

WOODMERE, N. Y., Dec. 27.—About 500 people turned out for the two-hour team race run by the Woodmere Cycle Club, Christmas Day. Although the race was run during a very cold spell there was enough excitement on tap to satisfy the spectators.

The course, which measured about a third of a mile, was run through the streets of the town, and out of field of ten teams seven of them finished. Louis Hiban, of the Unione Sportiva Italiana, and George Hoffman, a member of the Glencoe A. C., won the race, with Nelson Johnson, U. S. I., and George Gallen, an unattached rider, second, and Anthony Attardi and Carmelo Fontana, both of the Unione Sportiva Italiana, third.

The final hour of the race was run over the so-called Berlin style of finish, with one point to the winner, two points to second, three for third, four for fourth and five for fifth. Outside of fifth place all teams were credited with six points. The first hour's distance was 17 1-3 miles, while in the two hours the leaders covered 35 1-3 miles. George Bowker acted as starter and Clarence Carman, American motor-paced champion, officiated as clerk of course.

The first seven teams to finish, and the points scored in each sprint are as follows:

Team.	Club.	Sprint No. 1	2	3	4	5	6	7	8	9	Points
Louis Hiban	Unione Sportiva Italiana	1	1	1	2	2	3	3	2	3—	18
George Hoffman	Glencoe A. C.										
Nelson Johnson	Unione Sportiva Italiana	6	4	3	6	1	1	1	1	1—	24
George Gallen	Unattached										
Anthony Attardi	Unione Sportiva Italiana	6	5	2	1	6	2	2	3	2—	29
Carmelo Fontana											
Dick Jankosky	Woodmere C. C.	3	2	6	3	3	4	5	4	5—	35

METROPOLITAN "VETS" TO ORGANIZE

Annual Six-Day Race Brings Forth Petition for the Forming of a Veterans' Bicycle Club in Greater New York

NEW YORK, N. Y., Dec. 27.—Plans are in the making to form a "Veterans' Bicycle Club" in the Metropolitan district. While talking over old times at the recent six-day race at Madison Square Garden a party of riders of other days thought it the proper time to form such a club. Suiting action to words the following resolution was prepared:

"During the 1916 Six-Day Bicycle Race, the undersigned met, more or less accidentally. Some little time was spent relating pleasant reminiscences of old cycling days.

"Incidentally someone said that the Metropolitan district should have a club of "Bicycle Veterans." The idea set everyone going, resulting, after some discussion, in the following resolution being accepted unanimously, having been put, by temporarily acclaimed Chairman, H. A. Gliesman.

"RESOLVED: That, whereas, there is, in the Metropolitan district, a number of cyclists of early days, who are still interested in the sport and also a great number who have lost interest, due to the lack of a medium to keep it alive, we hereby signify our intention to organize ourselves into a club of "Veteran Cyclists" for these purposes:

"1—To cement together into closer bond of friendship, all eligible veteran bicycle riders and promote amongst them the most advanced degree of sociability.

"2—To aid and assist, by counsel or deed. when called upon, any amateur cycling organization promoting cycling events, be they social functions, runs, tours or races. And in furtherance of the above project Messrs. John Valentine, Walter Bardgett and H. A. Gliesman constitute a committee and at once take the initiative steps, necessary for the formation of such an organization.

"Signed: H. A. Gliesman, R. F. Kelsey, Arthur W. Ross, Wm. R. Drake, A. C. Griffin, M. D., Victor Hesse, Walter Bardgett, Paul Thomas, John Valentine, George C. Schreiber, Joseph Kopsky."

CESTONE A WINNER

Captures Final Point Event of C. R. C. A. Series from Big Field

NEW YORK, N. Y., Dec. 26.—Fifteen riders participated in the last of the series of point races run by the Century Road Club, which were run over the Fordham Road course, on Sunday. Vito Cestone, riding from the one-minute mark, finished first and covered the course, slightly over six miles, in 18:03. Louis Grace finished second and J. J. Marquart third. The first nine finished as follows:

	Hdcp.	Time.
1—Vito Cestone.....	1:00	18:03
2—Louis Grace.....	1:00	18:03⅕
3—J. J. Marquart.....	Scr.	18:10
4—Edwin Jensen.....	Scr.	18:10⅕
5—Raymond Caldwell.....	0:30	18:40⅖
6—L. P. Sattler.....	0:30	18:40⅗
7—James Tomasulo.....	0:30	18:42
8—Max Halpern.....	0:30	18:42⅕
9—Joseph Caldwell.....	0:30	18:42⅖

ONE BICYCLE—$600

Auction Sale for Soldiers' Benefit Brings Price

CORNWALL, Ontario—The highest price ever paid for one bicycle was secured in Cornwall, Ontario, during a patriotic meeting when a local citizen donated a juvenile wheel to be sold for a soldiers' fund. As soon as the bicycle was put up for sale, one man in the audience bought it for $20 but refused to take it because all his children were too large for it. During the next half hour, the same wheel was sold and re-sold for prices varying from $20 to $40. Then a group of ten boys in the back of the hall clubbed together and bought it for $35, but they, too, returned it to the chairman who had become an impromptu auctioneer.

The net result of the sale of the one wheel showed that it had brought more than $600 for the fund. And the remarkable part of the transactions is that the bicycle, according to last reports, is still claiming somebody's ownership. The bicycle is now on exhibition in a local store window.

VAN CLEEF IN NEW YORK

Partner in Chicago House at Metropolis for Six-Day Race

CHICAGO, Ill.—So keen is the interest of Van Cleef Brothers in the doings of the bicycle trade that Mr. Felix Van Cleef made a special visit to New York to attend the six-day bicycle race at Madison Square Garden.

Mr. Van Cleef reports that contracts are in hand for the 1917 season show business aggregating four times the amount done last year by the Dutch Branc company.

NEW TRACK FOR ROCHESTER

ROCHESTER, N. Y., Dec. 26.—So much enthusiasm was manifested by the crowd over the bicycle races at the recent race meet at the armory that a saucer track, along the lines of those on which the six-day races are run in New York City and other cities, will be built by Company G, Third Inf., this winter. At the next meet to be held at the armory, the bicycle races, which will be run on the new track if finished in time, will include a novice, a five-mile handicap and an Australian pursuit race.

ROCHESTER SECRETARY HONORED

ROCHESTER, N. Y., Dec. 26.—Victor E. Brown, secretary of the Rochester Fisk Bicycle Club, has received a pair of Fisk tires from the Fisk Rubber Co., New York City, for his excellence of reports, he being among the 100 secretaries of the 700 Fisk clubs throughout the country that were presented with tires by the Fisk company.

BICYCLE CATALOG

Harley-Davidson Booklet in Characteristic Style

MILWAUKEE, Wis., Dec. 26.—The Harley-Davidson bicycle catalog is just off the press. It lists, gives full specifications of and pictures each of the seven bicycles which comprise the Harley-Davidson line. It is gotten out in characteristic Harley-Davidson style. The cover is done in green and black on a good heavy drab stock and pictures a boy scout mounted on one of the Harley-Davidson motorbike models. Altogether it is a striking booklet.

COURT'S HOLIDAY OFFER

ROCHESTER, N. Y.—Frank Court, of 42 Atlantic avenue, dealing exclusively in bicycles, is offering a holiday reduction of $1 from the purchase price of any of his machines to anyone who clips his advertisements from the daily papers and presents them at his place. Court's line ranges in price from $18 to $40.

HASCALL WANTS IDEAS

MILWAUKEE, Wis.—Hiram W. Hascall, of the Harley-Davidson accessory department, is working on a new accessory catalog for the bicycle trade, in co-operation with Hallam B. Miller, of the bicycle department. These gentlemen make request for any catalogs and literature that may be used by firms dealing in bicycle accessories.

DUCKWORTH OPENS NEW WING

SPRINGFIELD, Mass., Dec. 26.—The Duckworth Chain & Mfg. Co. has just put into operation the new addition to its factory.

C. R. C. A. JOTTINGS

George Vasquez, a cyclist from Chile, South America, is now a resident of New York City and a member of the Century Road Club Association. Vasquez has had more than the ordinary luck in races run in his native land and is credited with riding 20 kilometers in 33:12. He will ride the C. R. C. A. colors in all races during the coming season.

National Treasurer John M. Mitchell has offered a silver cup to the member of the C. R. C. A. who registers the first 1917 century. The New York Division has donated a sweater to be awarded the second member to go a "100."

The annual New Year's Day ten-mile race of the N. Y. Div. C. R. C. A. will start at 10 a. m. at the northern end of McCombs' Dam bridge on Jerome avenue, and the riders will go north to 167th street, to Grand Concourse, to Fordham road, to Eastchester Bay bridge. The return trip will be over the same route.

In the annual New Year's Day C. R. C. A. race the silver and copper annual trophy, which will become the property of a two-time winner, will be contested for. Arthur Morgan, 1914; Anthony Desimone, 1915, and Edwin Jensen, 1916, are the previous winners.

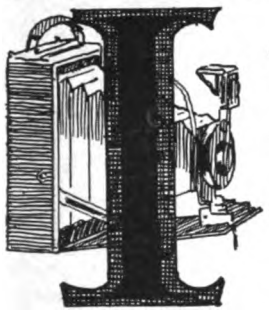
Why I Am A Motorcyclist

By D. D. Pruitt



'M chasing the Almighty Dollar awheel.

That's my answer to the question, "Why are you a motorcyclist?" And here's how and why:

First of all, I am a photographer with a studio in Coatesville, Ind. That's my business and my chief aim in life is to increase it and make it prosper.

But Coatesville is a town of less than 800 population; which makes it evident that I must rely upon the surrounding territory for an uncommonly large share of my trade.

Motorcycle Helps

And that's just where the motorcycle comes into play. I sometimes have to travel ten, fifteen or even twenty miles in order to take a picture. I can do it on the motorcycle and still make a fair profit on the job. Could I do it by any other means of transportation at my command? Hardly.

Prior to 1910 I used to get around with a horse and buggy. If I had a call to go five miles out and snap a newly married couple or some similar mission, I would of necessity have to close up the studio—for mine is a one-man business—harness up old dobbin, drive out to the location, execute my commission and then drive slowly back. Time? Just about all day to do the job, and in the meantime what business came to the studio from the city trade was lost.

Lost Time and Money

As a matter of fact, I know for a certainty that on many such occasions I actually lost more trade which came to the closed studio never to return, than could be compensated for by the profit made on the out of town job.

And a circle with a five mile radius centering around my studio was actually the largest field I could aspire to with horse and buggy transportation, and I never felt that I was doing that full justice. Often I would lie awake nights endeavoring to solve the question of transportation.

question of transportation, for I felt that with the broader field outside that five-mile limit thrown open to me, I would have just about all the work one man can handle and handle properly.

And, finally in 1910, the motorcycle idea struck me; rather it was brought to me. It was in the Spring of that year and I can remember that it was on one of those beautiful balmy days when the "spring fever" gets the best of us—and certainly it had me that day. I just longed to be out in the open—I could hear the call of the open road, with no vehicle to answer it. I had often thought of an automobile, but with my limited means it was altogether out of the question.

And just as luck would have it, along came a neatly clad motorcycle rider on a shiny new machine. He drew up at the curb in front of my establishment and came in. Just what brought him, for a while I could not imagine for we talked not of business, but of the most commonplace things.

The Deal Consummated

After quite some time he began to talk about the motorcycle, and finally asked me why I had never considered using one of the two-wheelers in my business.

For a matter of fact, I had never given the motorcycle a moment's consideration and even as he spoke of the matter I conjured up many a shadowy dark doubt as to the machine's ability, and reliability. But he set me straight on the matter and showed me how I could carry my camera and other necessary paraphernalia and the upshot of the matter was that I bought the very machine he rode.

That's how I began to chase the Almighty Dollar awheel. I found that trips that formerly took me a full day could be done in an hour, or an hour and a half and I broadened my territory to include locations that I never even imagined I could touch.

Before the advent of the motorcycle, I had watched business, that rightfully belonged to me, slip through my fingers to some competitor simply because I had no means of getting to it or because I had to close my office all day to get to some other job. The motorcycle changed all that.

MORE HELP

Two Booklets in Vest Pocket Style From Milwaukee

MILWAUKEE, Wis., Dec. 22.—In line with its broadgauge policy of coaching the dealer and rider alike in the care and maintenance of the motorcycle, the Harley-Davidson Motor Co. has just gotten out a couple of little booklets covering points in the care of the Harley-Davidson machine.

The first booklet gives explicit directions in plain easily-read and readily understandable style for timing Harley-Davidson motors, the directions covering all No. 3 points on all models of motors up to and including the 1917 model. The booklet is illustrated where needed to explain a point and is gotten out in vest pocket style for convenience in carrying.

The second booklet bears on the subject of attaching the sidecar and sidevan to the motorcycle and makes plain the way to go about the matter, the tools needed and the points to be borne in mind when fitting the side vehicle. It also is illustrated and is of vest-pocket size.

PYRENE STOCK INCREASE

Consider Plan to Boost Common Stock from 100,000 to 300,000 Shares

NEW YORK stockholders in the Pyrene Manufacturing Co., of New York City, which has been devoting considerable attention of late to equipping motorcycle fire-fighting outfits with extinguishers, will meet January 2 to vote on a proposition to increase the common stock of the company from 100,000 to 300,000 shares, the par value remaining at $10. Only one-half of the authorized increase will be issued at the present time, this being offered to present stockholders on a pro rata basis. A public offering will be made of any shares that remain unsubscribed. With the increase the capital of the company will be raised from $1,050,000 to $3,050,000, the 5,000 shares of $10 preferred being unchanged. The common stock dividend rate has been increased from 8 to 10 per cent, the next payment being due Feb. 1 to stock of record Jan. 25.

ANOTHER GOODYEAR CLUB

AKRON, O.—A unique addition to the ranks of Goodyear societies is the Cosmopolitan Club. Its purpose is the promotion of good-fellowship and better understanding among the alien born employes of the company. More than twenty different nationalities of Goodyear workmen are represented in the new club.

KAUFFMAN WITH KAENJAY CO.

NEW YORK.—Lincoln T. Kauffman, formerly identified with the Nonpareil Horn Co., has associated himself with Richard L. Jones in the Kaenjay Co. and opened up offices at 105 Chambers street, New York.

The new concern, which has been going long enough to have gotten well established, will act as manufacturers' agent for both motorcycle and bicycle supplies and fitments, and will enter both the domestic and export market.

TORONTO AGENTS O. K. THE 1917 OUTLOOK

McBride Reports 60 Per Cent. Increase for December; Kipp Company and Andrews Also Active; Cleveland May Enter Canadian Field

TORONTO, Ont.—Toronto business conditions continue to improve, according to the reports of all local motorcycle and bicycle distributors and their agents.

Percy A. McBride, handling the Excelsior and Henderson for big hunks of Canada, says that his December turnover was sixty per cent. better than one year ago and 100 per cent. better than in December, 1914. McBride reports a good local demand for bicycles for Christmas delivery, but the sale of motorcycles was not affected by the holiday demands. In other words, motorcycle transactions during the month were regular but Christmas shoppers took a great many bicycles.

Harold Pratt, former salesman for McBride, tried selling pianos for a few months but he has returned to his old love—the motorcycle whirl. He starts on the road for McBride again in January and his route will cover the whole of Eastern Canada.

H. M. Kipp & Co., Toronto Wigwam, report a good share of orders for 1917 Indians. No deliveries of new models have yet been made but orders for future delivery have been numerous.

Walter Andrews, Ontario distributor for the Harley-Davidson, declares that he has renewed contracts with practically all his sub-agents. They have signed for double the number of machines which they contracted to sell in 1916. Andrews has decided to specialize with the Harley-Davidson, although he has received one or two offers to handle other motorcycle lines.

S. Moritz, former racing crack and mechanic in the employ of McBride and Andrews, has established his own business in Toronto. He has opened a repair shop on Danforth avenue where he is already doing a large amount of repair work. He is also selling accessories.

Representatives of the Cleveland Motorcycle Mfg. Co., Cleveland, visited Toronto a few days ago for the purpose of investigating Canadian conditions with a view to arranging for Canadian distribution.

HYSLOPS TO SELL DIRECT

Pioneer Firm Has Six Travelers Lining Up Agencies for Coming Season

TORONTO, Ont.—Hyslop Brothers, Toronto, have adopted an entirely new policy for their bicycle business in which they have been engaged throughout Canada for a quarter of a century. Instead of carrying on a retail business at long range, this company has decided to sell to the trade and six travelers have been combing the country for agencies for 1917.

The company will continue to manufacture and assemble bicycles in its Toronto plant and a jobbing business in accessories will also be done from the Toronto headquarters. This concern does considerable business with American producers and has admirable connections. Very little has been done by the company in motorcycles but its various lines of bicycles are well-known throughout the Dominion. The Hyslop range consists of seven different models, including a motorbike style.

The Hyslop bicycle business during 1916 was one-third larger than in 1915 but already booked orders call for an increased amount over last season.

TWO PLATES REQUIRED

Ontario Motorcyclists Will Be Subjected to British System in 1917

TORONTO, Ontario.—The 4,300 motorcyclists of the Province of Ontario have received official intimation from government headquarters that the English custom of requiring two number plates on each licensed motorcycle, solo or with sidecar, will be enforced after the next session of Legislature in February.

The riders have been given to understand that the regulations will require the placing of one number plate on the front mudguard in a longitudinal position, namely from front to rear, while the second plate is to be secured to the back of the rear fender. It is plain to local motorcyclists that, if the present proposal of the government is carried out, manufacturers or dealers will be finding it necessary to make provision for the attachment of the front plate to the forward wheel guard, as is done with certain makes of motorcycles for foreign trade.

The government has announced that 1916 license plates and permits will be recognized until January 31, 1917, but sommonses will be issued to all those who have not renewed their licenses by that date.

The Ontario authorities have also announced that the use of the movable spotlight or swivel searchlight is prohibited by law and users, wherever noticed, are being notified to this effect by personal letters. The use of spotlights is to be discussed at the 1917 session of the Legislature as there are a number of apparent advantages in the proper use of spotlights.

GREAT FALLS DEALER WEDS

GREAT FALLS, Mont.—Announcement is made of the marriage of Alice Hazel Anthony to Le Roy V. Johnson, the Harley-Davidson dealer of this city. Mr. and Mrs. Johnson will be at home January 1.

NEWSY BULLETINS ON OTTAWA TRADE

Hurd & Co. Incorporate; Sales Reports Show Highly Satisfactory Business During 1916; Good Roads Plans Boom Cycle Interest

OTTAWA, Ont.—Announcement has been made of the incorporation of Hurd & Company, the long-established bicycle dealers of Ottawa, under a Federal charter with a capitalization of $40,000. This concern handles Massey bicycles.

Ketchum & Co., Indian representatives in Ottawa, report a fine turnover in Hendee models during 1916. This establishment secured several good government orders for Indians to be used in the war, but in addition, the regular business of the company was considerable.

Bysche & Co., Excelsior agents in Ottawa, did sixty per cent. more trade in 1916 than in the previous year.

Ottawa motorcyclists are concerned in several goods roads projects which, when completed, will have the effect of relieving this city from a state of mud siege. The Province of Quebec proposes to lay a permanent pavement from Montreal to Hull, Quebec, which is just across the river from the Canadian capital. The Ontario government is also preparing to carry out the construction of a good highway between Ottawa and Prescott on the St. Lawrence River. This road will give Ottawa riders a fine outlet to the States by way of Ogdensburg, N. Y.

ANNUAL C. M. A. MEETING

Will Be Held in Toronto in February; Only Routine Doings Promised

TORONTO, Ont.—The annual meeting of the Canada Motorcyclists' Association will be held in Toronto in February, according to an announcement by President F. A. O. Johnston, Toronto. There will be no spectacular features and the so-called convention will be held merely to keep the association alive until a revival of sport takes place after the war. Officers will be elected for the ensuing year and it is probable that the men now holding the various positions will be returned without an election. The only step of importance which the C. M. A. will make will be to seek a permanent reciprocal agreement with the F. A. M. Secretary Gibson of the American Federation declares that the original agreement between the two organizations has expired but the Canadian officials declare otherwise. Because of this mix-up the Canadian diplomats will suggest the adoption of a permanent treaty which will provide for similar racing laws in both countries and for the recognition of membership cards of visiting racers and tourists.

MRS. PORTER ON THE JOB

TORONTO, Ont.—The business of W. J. Porter, local representative of the Reading Standard, is now being conducted by his wife on account of his illness. Mrs. Porter is looking after the repair work as well as the sale of motorcycles and accessories until her husband can return to his duties. Mrs. Porter is an Englishwoman with natural mechanical tendencies and she attends to various repair jobs with rare skill.

DELIVERY SERVICE AND REPAIRS

TAMPA, Fla.—F. W. Hill, formerly of Boston, and Herbert Maass, former agent for the Harley-Davidson in this city, have started a motorcycle parcel delivery and messenger service. The new firm has opened offices at 217 Franklin street and will operate a general motorcycle and bicycle repair shop. A full line of accessories and supplies will be carried.

A JERSEYITE WHO IS NOT AFRAID OF MILEAGE

Alden L. Combs, of Washington Crossing M. C., Who Has Covered 71,685 Miles on His 1912 Thor; His Only Replacements were Three Piston Rings

A Few Spare Links

By E. B. HOLTON

IN "Chin, Chatter and Comment" we lamp the come-back re "ladies' driving ability" that we have been expecting for some time past.

Of course, there are members of the weaker (?) sex, who are good drivers, both of automobiles or motorcycles, but when it is necessary to shut off the motor, jam on both brakes and throw out the clutch while steering to the right or left, we feel confident that the situation contains four motions too many for the average woman driver.

They may be good drivers until the emergency comes—then, well, Hallock, wait until the missus gets you into one, tha's all.

Oh BOY, were you bucking the drifts Sunday? Some stuff, and just about light enough to make it fun larruping along in "second" thru the deeper ones.

Gang I was out with found that if you buzzed past a lad on the outside, then cut over sharp in front of him, you could hand him a regular "snow-bath," and say, wasn't there some mighty clever driving to hold first place in line!

Skid-chains were necessary, though, for the wheel-slip was bad when you shot it to her fast.

Riding a day like Sunday sure does make you cock your ears for the dinner-bell.

If you've never tried snow riding, man, you sure have missed one real thrill of motorcycling. Hop on the bus next snow we have.

Ever get caught out in a driving rain on the motor bike, and be compelled to keep splashing, along through it all?

And have your plugs "short" every now and then, slowing you down and making the motor hammer like the fiends of Hades?

Wipe the porcelain of mica insulators with a greasy rag and see if the film of oil you leave behind doesn't make things right again. Those plugs will shed water like a duck's back and keep firing right along steadily through any kind of a storm short of a deluge.

Funny thing, last year the motorcycle I rode "shorted" on the front plug. This year it's the rear plug that wets up and hears the bugles blowing "Cease Firing." But they both quit soldiering when the oily rag was used.

It's all very well, fellows, to listen to this stuff about carbon-removers and burning out your cylinders with oxygen while you wait. Excuse, please Mr. Pangborn, but when it comes to decarbonizing, it's me for ripping the motor down and going at the job manually with a carbon-scraper. Then you are doing the job in the only way.

I grant that these artificial aids will keep the carbon deposit low; but to rely too much on them is that "easiest way"—that line-of-least-resistance-method that sooner or later will get you into trouble.

When you tear your motor down, either removing the whole unit from the frame or rocking the cylinders off, you can see a lot of things that would come to light in no other way. Should a ring be stuck in the groove, the cylinders or piston scored, you are aware of it at once, and can get busy remedying the matter.

But nothing like this is possible when you take the short cut way of decarbonizing.

Or in the matter of valves and their seating: Many motors are not designed for the removal of the valve cages while the motor is in the frame. Therefore it is well to take the motor down, and grind in these important factors in speed and power, so that your whole machine will be in "tune" when reassembled.

No, siree, that carbon-removal work is best when done in the good old-fashioned "two-handed" way.

Speaking of 29 by 3½ shoes for sidecar use, as we were last week, I heard from a salesman for one of the big tire companies that they have already had this matter under consideration for sometime. The delay in marketing the larger casing is due to a strike among the machinists which has held up the larger moulds necessitated by the change. He added that the larger tire will not permit of the use of skid-chains, the fork clearance not being great enough in most of the present models of motorcycles. Need a little cooperation between the motorcycle and tire manufacturers now, for the rider's benefit.

HITS AT "JAY WALKER"

Pueblo Will Arrest Pedestrians Who Cross Streets at Wrong Points

PUEBLO, Col.—Pueblo has just legislated against the "jay walker." That is, the town has adopted an ordinance aimed at the man who crosses the street at other points than at intersections, and those pedestrians who fail to take heed of the arrangement are liable to pay a fine.

Motorcyclists are interested in view of the fact that it tends to make riding through the streets easier.

CROTONA STAG JANUARY 13

BRONX, N. Y., Dec. 26.—The Crotona M. C. featured its last meeting for 1916 by electing officers and hearing highly encouraging reports relative to the activities of the club during the past year. The club has been in existence four years and its growth has been steady. The official staff for 1916 is made up as follows: John Paff, president; Charles Crownshield, vice-president; Jack Welch, secretary; Kenneth Hoffman, treasurer; Fred Nissen, captain; John Cobban, first lieutenant; August Hellwig, second lieutenant, and Fred Christman and O. C. Berckheimer, Board of Directors.

On Saturday, January 13, the club will install the new officers and hold a stag. The Concourse M. C. will be invited to attend in a body.

READING M. C. OFFICERS

READING, Pa.—The following officers have been elected by the Reading M. C. for the coming year: John Kinsey, president; Thomas Deysher, vice-president; Harry Hart, recording secretary; George Newhouser, financial secretary; Charles Hart, treasurer; Morris Eck, first lieutenant; Edgar Potts, second lieutenant; Charles Sweigert, trustee; James Dunkle, captain.

The following committee was named to arrange a package party and smoker for December 29: George Mark, Ray Fritz, Owen Albright, Roy Swoyer and George Newhouser. Ralph Bubp, Russell Felix, Joseph Bowman and Harry Klapp made application for membership.

News of the Dealers

BOSTON NEWS

Arrival of New Thors Keeps Chew Busy —Commercial Sales

BOSTON, Mass.—A shipment of 1917 three-speed Thors has just reached the sales room of the Thor Motorcycle Co., of Boston, which is on Columbus Avenue. The company is distributor for the Thor throughout all of New England, and is now busily engaged in getting demonstrators into the hands of all its sub-dealers. Thomas H. Chew, who is manager of the concern, is much impressed with the new Thor features and is looking forward to a big year on the blue fellows.

All of the seven different models of the new Harley-Davidson bicycle line have arrived in Boston and are on exhibition at the store of W. J. Walker, 178 Columbus Avenue, the local Harley-Davidson dealer. They are attracting no end of attention and comment.

Although Boston is covered with a foot of snow, the Boston Post Office is finding that their Harley-Davidson Cygnet delivery equipment is giving most excellent service. The machines are in use from 5 o'clock in the morning until after midnight every day except Sunday.

As a direct result of the use of these machines by the Post Office Department Dealer Walker has sold two similar combinations to a couple of paper concerns. L. P. Winchenbaugh was the first of the paper dealers to invest in a Harley-Davidson Cygnet delivery combination and it netted him such good results that now Thomas Groom, one of the largest paper dealers of Boston, has placed an order for a similar outfit.

ROMANS SELLS FIVE

MOOSE JAW, Sask.—B. A. Romans, of the Romans' Machine and Repair Co., agent for the Harley-Davidson, reports that he sold five twin-cylinder models of the 1917 type before the middle of December, and he expects to sell several times this number in Moose Jaw before spring traffic starts.

MORE INDIANS FOR CROCKER

KANSAS CITY, Mo., Dec. 23.—So quickly did Crocker's carload of Indians go that arrived last week, that he has ordered a half carload for immediate delivery, which he hopes to have here before the holiday season is over. Crocker also has a carload of Indian bicycles on the road for this branch. The 250 bicycles in the car were also needed.

GIVES FREE STORAGE

Wagner-Dolph Offers Gratis Housing Until Spring As Service Feature

ROCHESTER, N. Y.—The Wagner Dolph Company, Inc., handling the Cleveland and Harley-Davidson, is going after storage and repair business for the winter season and is getting out an attractive circular letter to that effect. The firm states in the letter that it will store a motorcycle free of charge until spring, jacking up the tires, oiling parts, etc. For sidecars, the company charges $1 by reason of the space taken up. The Wagner-Dolph store is open 24 hours a day and has a service car ready at all times to answer calls.

RODE MACHINES HOME

KANSAS CITY, Mo., Dec. 23.—Sundwall & Johnson, Indian dealers at Jordan, Mo., received word that a carload of machines was soon to be delivered at the Indian branch here. Being anxious to get the demonstrators, the partners journeyed to the Indian Motorcycle Sales Company by train and refused to spend the time waiting for the trains to carry the machines back to Jordan for them and rode them to their agency.

WAS COP, BECOMES DEALER

MUSKOGEE, Okla.—C. R. Hingey, who until a month ago was a member of the Tulsa Police Department's crack motorcycle squad, has opened a messenger service and Harley-Davidson motorcycle agency at 204 Central street.

Write us today for sample sections of these tires and attractive display material and dealer helps. Your jobber will show you the tires.

Prest-O-Lite for Motorcycles

Here is the motorcycle machine gun company of the Second Massachusetts Regiment—the only motorcycle machine gun company now in the National Guard.

These motorcycles are equipped with Prest-O-Lite—the only practical lighting system for motorcycles—safe, reliable, practical, simple and able to stand the jolts.

Prest-O-Lite penetrates dust and fog—floods the road far ahead with brilliant light, and never fails in an emergency.

Yet, Prest-O-Lite with all its advantages is the least expensive light—costs less to buy and less to use than any other system of brilliant light.

Lighting Equipment for Real Service

"A Prest-O-Lite tank, a lamp and mechanical horn" is a typical equipment combination in great favor with thousands of riders everywhere.

Your dealer can supply you with a combination equipment like this at a very reasonable price. See him about it today.

Full details of Prest-O-Lite for motorcycle lighting sent you on request—information of great value to every rider.

More News of the Dealers

INDIAN BIKE DAY

Whitman Holds Successful Affair in Goodland and Betters Former Record

GOODLAND, Mo., Dec. 23.—E. W. Whitman, who handles the Indian in this city, had a most successful Indian Bicycle Day yesterday. He issued a number of invitations and most of those invited came in during the afternoon or evening. All the returns of the day are not yet in, but Whitman is confident that yesterday's total will better that of his last Indian Bicycle Day by 25 per cent.

Whitman was laid up in the hospital practically all last season, with the exception of four weeks. During those four weeks he got around and made sales of 15 fully-equipped Indians in the middle of summer.

MORE SPACE FOR PARTS DEPT.

KANSAS CITY, Mo., Dec. 23.—Albert Crocker, of the Indian Motorcycle Sales Company, has rearranged his sales floor and office since Albert Hanson moved his office from the same building. Crocker now has the fixtures arranged in such a manner that the parts and accessories department has a few more square feet of floor space.

BOWMAN HAS WICHITA BRANCH

LINCOLN, Kan., Dec. 23.—Hart Bowman, of the Grone-Bowman Cycle Co., handling the Indian, has opened a branch at Wichita. The new branch will handle Indian motorcycles and bicycles. Bowman himself is in charge.

SMITH TAKES HENDERSON

KANSAS CITY, Kan., Dec. 23.—C. C. Smith, of 810 Minnesota avenue, has taken the Henderson for this city, through Newby Brothers, eastern Kansas distributors. Smith's first week netted four sales, one of which was to the local post office for parcel post work.

EXCELSIOR IN BARTLESVILLE

BARTLESVILLE, Okla., Dec. 23.—Floyd R. Lowe has taken the agency for the Excelsior for Bartlesville and vicinity. He will also handle the Pierce and Cycomo bicycle. Lowe signed up with the Saufley Supply Co., of Kansas City, Mo., for these lines.

GET THOR SHIPMENT

ROCHESTER, N. Y.—Flynn Brothers, local Thor representatives, have received their first shipment of the blue twins, and have already sold several to private owners. A number of single cylinder Thors have been ordered in Rochester for use by traveling men and delivery men.

MINER'S CHRISTMAS CAMPAIGN

ROCHESTER, N. Y.—The George L. Miner Company, Indian representative, has been making a strong bid for Christmas bicycle business in the form of large advertising space in the daily papers and in two Sunday editions. The responses have been very gratifying and sales of Indian bicycles traceable to this campaign are still coming in. The Miner company also handles the Smith Motor Wheel and the Miami Power Bicycle.

PARTS FOR ALL MAKES

ROCHESTER, N. Y.—Tourner Brothers, local Dayton dealers, announce that they have in stock a large number of parts for all makes of motorcycle. Most of the parts are for "orphan" models—those no longer made.

NEW INDIAN REACHES LAWTON

LAWTON, Okla.—The 1917 Indian Powerplus motorcycle has arrived at the store of Bruce Fields, on Third street. The machine is now on display and is attracting lots of attention.

R-S IN TACOMA

TACOMA, Wash.—The Tacoma Cycle Company, 1104 Tacoma Avenue, have now a fully-equipped machine shop, cozy salesrooms and a nice display of Reading-Standard motorcycles and a complete stock of bicycles together with ample parts for the cars and repair of all machines.

Make Two Sales Grow Where Only One Grew Before

Getting right down to the root of selling, isn't it essentially a matter of creating a demand and then meeting it? And in creating a demand for the bicycle safety, ease of riding, and comfort to the prospect are the main creative impulses that actuate the sale.

That is why the presence of the

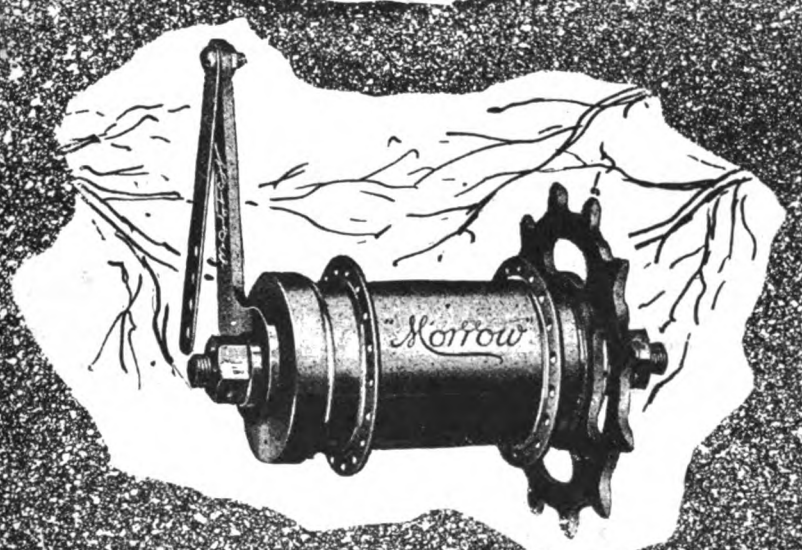
"Morrow" **COASTER BRAKE**

on any bicycle makes such a strong sales appeal to the discriminating buyer. And just as the presence of the Morrow brake creates the demand, so the performance of the Morrow meets the demand.

Meets it out of its luxurious gliding, its positive forward drive, its quick acting back drive that brakes the wheel instantly.

The Morrow by its superior design and super-ideal service is the one brake that makes two bike sales grow where only one grew before.

ECLIPSE MACHINE CO.,
Elmira, N. Y.



Digitized by Google

Mites of News from Omaha

OMAHA, Neb.—Victor Roos, local Harley-Davidson dealer, has just received 14 new, olive drab twins from the Milwaukee factory. This is the first Harley-Davidson allotment to reach the city, and practically all of its contents were delivered before the shipment was 24 hours old.

H. G. MANTHEY, traveling representative for the Harley-Davidson Motor Co., in Nebraska and South Dakota, spent a few days in this city looking over trade conditions. He has ridden his own machine 2,700 miles since leaving the factory at Milwaukee. He will go with Victor Roos, local agent, to the Harley-Davidson factory for the dealers convention just before the show.

OMAHA M. C. has elected officers as follows: Morley Young, president; W. S. Hellar, vice-president; Carl L. Peterson, secretary; Carl Wandberg, treasurer; Tom Kelly, sergeant-at-arms. There are 40 members.

R-S DEMONSTRATOR ARRIVES

LANCASTER, Pa.—The new 1917 R-S recently made its appearance in this city, and J. H. Tragesser, local representative, immediately put it through some grueling tests. Quite a few prospects called to see the new model, and Tragesser has booked several orders for January 1 shipment.

HAVE EIGHT COUNTIES

Newby Brothers Increase Territory with Henderson in Eastern Missouri

KANSAS CITY, Mo., Dec. 23.—Orville Newby, of Newby Brothers, announces that since his company has concentrated solely upon the Henderson for the coming year, his firm has become distributors and jobbers of that motorcycle in the eight counties adjoining Jackson County, Mo. Newby Brothers recently remodeled the main sales floor of their establishment and have built a private office just inside the sales floor and close to the shop in the rear.

LARDINO TRIES OUT R-S

JERSEY CITY, N. J.—Andrew Lardino, one of the oldest motorcycle agents in Jersey City, N. J., was recently seen on the road with several prospects trying out the new 1917 R-S. Lardino has handled the R-S line for many years.

OLIVER'S NEW LOCATION

NEW YORK.—Oliver Berckheimer, Indian distributor in the Bronx, announces his removal from 993 Washington avenue to 959 Brook avenue. Oliver's new telephone number is 9762 Melrose, and he invites his friends to try him with hurry calls in order that he may demonstrate the continued efficiency of his service.

CARLOAD FOR K. C.

It Comes to Indian Headquarters and Is Quickly Sold Out

KANSAS CITY, Mo., Dec. 23.—The first carload of motorcycles ever received in this city came to the Indian Motor Sales Co. a few days ago. The contents of the carload arrived after a little delay in transit and no time was lost in unloading and distributing the contents. When the dealers and riders were served, there were very few machines left. Several out-of-town dealers rode their allotments away from the Indian headquarters.

CHANGE OF LOCATION

FORT WORTH, Tex.—The Cooke Motorcycle Company is now located at 1105 Commerce street. The new Harley-Davidson models are on display at the salesrooms.

1917 INDIAN IN SPRINGFIELD, ILL.

SPRINGFIELD, Ill.—The 1917 Powerplus Indian is now on display at the salesrooms of Johannes Brothers, the new Indian agents here.

TROSSELL IN NEW ORLEANS

DETROIT, Mich.—John B. Trossell, of Michigan avenue, is now occupying his spacious new store, and is explaining to his friends that he will be able to handle Reading Standard motorcycles and National bicycles on a much more extensive scale than heretofore.

Ball Retainers Where You Can Find Them

DEALERS and repairmen who know the value of systematic stock keeping have been looking for this cabinet.

Every size of retainer you handle has a hook—stock always in order—never "out" of a size.

The label in the cover lists the size and number of retainers used in all standard motorcycles, bicycles, and coaster brakes. It's mighty valuable as a reference. The cost of the cabinet is only $2.50.

Better order one right away—from your jobber

ENLARGING QUARTERS

Metropolitan Henderson Man Fitting Up Cellar for Spring Rush

NEW YORK, Dec. 27.—Felix Lewin, manager of the Henderson Motorcycle Sales Company, factory branch in this city, is enlarging his quarters at 227 West 106th street. He has taken the cellar below his present store and is fitting it out as a storage place. An elevator well is to be cut between the cellar and main floor to give access from the store to the lower floor.

Sales of 1917 three-speed Hendersons and sidecars have reached such a volume that Lewin has had to rent part of a store opposite his place to accommodate his storage customers until the enlargement is completed.

NOW SALES MANAGER

Guterman Handles R-S Sales for Nickerson & Schroeder, Inc.—New Agents

BROOKLYN, N. Y.—Lou Guterman, formerly traveler for the Reading Standard, is now sales manager for Nickerson & Schroeder, Inc., distributing the R-S in New York, Connecticut and New Jersey.

Guterman recently returned from a road trip during which he signed up the following agents: J. Kazzas, Bridgeport, Conn.; Cole & Brown, Johnstown, N. Y.; H. Windham, Willimantic, Conn.; John E. Nelson, Brooklyn, N. Y.: Towner Brothers, Rochester, N. Y.; H. Latterman, Park Ridge, N. J.; I. Illiano and S. Slonov, New York City: J. H. Phyker, Hackensack, N. J., and Lent's Garage, Tompkins Cove, N. Y. To date 24 dealers have been signed up for the Reading Standard in the Nickerson & Schroeder territory.

SUB-AGENTS IN DETROIT

DETROIT, Mich.—R. D. Brown, of the Brown Motor Co., announces that he has taken the sub-agency for Indian motorcycles through the William E. Metzger Co. Brown has received one of the new Powerplus models and is making the most of it as a demonstrator. He reports two orders already booked and a long list of live prospects. He is located at 222 Gratiot avenue, which is recognized as the Motorcycle Row of Detroit.

Brown has also taken the agency for Pierce bicycles in Detroit through the Metzger Co.

Bob Sertman has taken the Pierce bicycle sub-agency for the East Side. Sertman has been in the business for five years, and expects to make 1917 his banner year.

BAKER USED NOBBY TREADS

NEW YORK, Dec. 26.—M. C. Stokes, manager of the motorcycle and bicycle tire department of the United States Tire Co., is calling the attention of trade folk to the fact that in the recent Los Angeles-San Francisco double endurance, Erwin Baker, the Indian rider, had his Powerplus shod with United States Nobby tread tires.

As is quite well known, Baker came through the run with a minimum of tire trouble and a perfect score.

R-S IN METROPOLIS

Slonov Signs Up with Nickerson & Schroeder for Retail Representation

BROOKLYN, N. Y., Dec. 26.—Nickerson & Schroeder, Inc., of 1078 Bedford avenue, distributing the Reading Standard, has signed up S. Slonov, of 1491 Fifth avenue, this city, as retail agent for the R-S. Slonov has just enlarged his place to accommodate an increase in business, taking the adjoining store for the purpose.

Nickerson & Schroeder, Inc., have also taken the distribution rights for the Smith Motor Wheel in southern New York territory.

TWO HUSTLERS HANDLE THE THOR

PATERSON, N. J.—Louis Weibel and Theo. Weiss, prominent members of the Paterson M. C., the former being president, have taken over the Thor agency here. They are located at present in temporary quarters at 32 Bloomfield avenue, pending the remodeling of the store which they will occupy permanently, and which is situated within a stone's throw of the City Hall.

WHEELING RIDERS ARE HARDY

WHEELING, W. Va., Dec. 26.—Dave Michaels has just gotten in from the trip to Washington, Pa., on his Thor machine. He came through in perfect style despite the deep snow. Likewise, James Wasmutch has gotten back from his home in Cameron on his Henderson motorcycle. Neither the ice or snow interfered much with the going.

"We're On Our Way To Mexico"

About two weeks ago, two officers of the 71st Regiment, N. Y. N. G., raised a fund for the purchase of automobile and motorcycle equipment for a machine gun company. A careful investigation had been made, with the result that they ordered, and have had delivery, of

71 Reading Standards

Thus establishing a new record in the purchase, in one lot, of motorcycles for military use. Eight of these machines will carry guns and the other sixty-three will be manned by escorts. They will go into active service on the Mexican border in a few days.

They Picked the R-S

Because it had actually demonstrated a wonderful adaptability to hard usage. The R.-S. would not have been selected by these critical army officers if it had not made good, time and time again, under the very conditions which will be met with on the border.

Read the interesting details of the formation of this new company, in the news pages of this issue of Motor Cycle Illustrated.

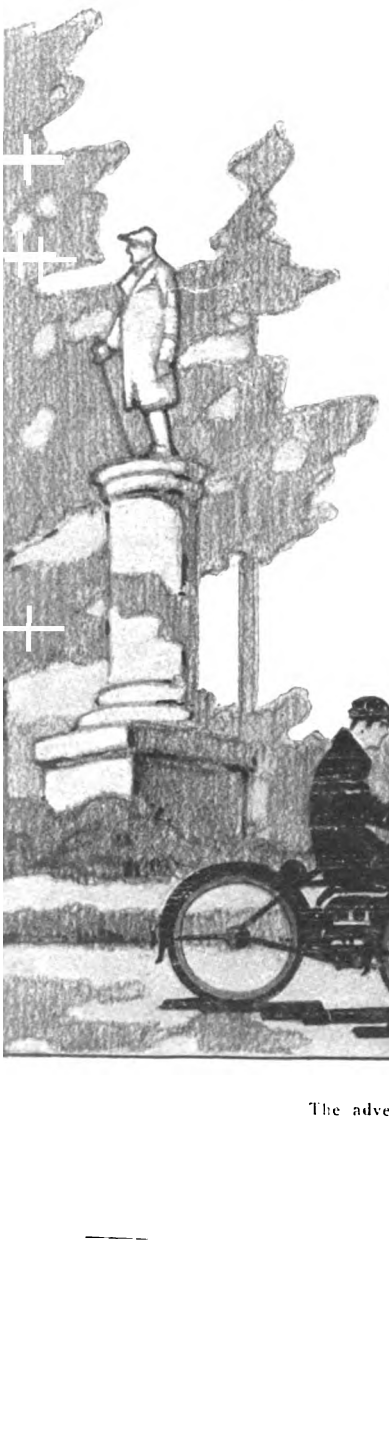
Firestone

Motorcycle Tires

RED-BLACK
Side Wall Tread



FIRESTONE specialists entered the motorcycle tire field in answer to the demand for equipment big enough and strong enough for the new high-power machines. Thus, from the beginning, Firestone "Auto-Bilt" Motorcycle Tires set a new standard of service.

The Non-Skid Tread is extra tough and thick, and the "give" of the Firestone rubber insures perfect traction. It is broad enough amply to protect the side wall and the grip holds true even in sharp turns. 30% more angles against skid.

More and better rubber for easy riding and machine protection. More and better fabric to insure extra strength and endurance. Write for records of victories and astonishing mileage.

Firestone Tubes for motorcycles are built heavier than the ordinary. Their giant, uniform strength withstands the heat of fast and long driving. Made either butt end, lap end or endless. Your dealer is ready—or can get Firestones on short notice.

More Motor Pep

Champion Spark Plugs put more pep, punch and enthusiasm into your motor.

And they "stand the gaff" better than other plugs. The incessant hammering of the explosions does not crack or weaken Champions. And they **always deliver their sparks**—even under the most gruelling conditions.

A great majority of the motorcycle makers of the country are equipping with Champions. Profit by their tests and experiments and put Champions in **your** motor.

The Champion Guarantee
Absolute satisfaction to the user, free repair, replacement or your money back.

Carbon

Why "no carbon" is impossible.
How "minimum carbon" is assured.

CARBON has many lodging places. It fouls spark plugs and kills the spark. It pits the valve seats and weakens compression. By accumulating on the piston heads and in the combustion chambers, it causes knocking and racks your motor with pre-ignition.

The amount of carbon deposited in your motor depends upon the carburetion and gasoline combustion and on the character of the gasoline as well as on the quality of the lubricating oil itself and the correctness of its body for the motor.

As both gasoline and petroleum lubricating oils are chemical combinations of hydrogen and carbon, carbon is an essential element of each.

Only the free (suspended) carbon can be taken out. To remove the carbon which is in combination with other chemical elements, constituting gasoline and oil, would result in the destruction of the product itself.

Carbon deposit is likely to occur through incomplete combustion of the gasoline or through the destruction of the excess lubricating oil which will work into the combustion chamber if the oil is of incorrect body. "No carbon" oils do not exist.

To reduce carbon to the minimum your lubricating oil **must** be of high quality and of correct body for the piston design and lubricating system of your motor.

If you are particular about your fuel, carburetion, and ignition, you can end unnecessary carbon trouble by using the grade of Gargoyle Mobiloils specified for your motorcycle in the Chart of Recommendations shown, in part, below. This Chart represents the professional advice of the Vacuum Oil Company. If your motorcycle is not listed, a copy of the complete Chart will be sent you on request.

VACUUM OIL COMPANY — ROCHESTER, N. Y., U. S. A.

Specialists in the manufacture of high-grade lubricants for every class of machinery. Obtainable everywhere in the world.

Domestic Branches: Detroit Boston New York Chicago Philadelphia Indianapolis Minneapolis Pittsburgh Kansas City, Kan.

Explanation: In the chart below, the letter opposite the motorcycle indicates the grade of Gargoyle Mobiloils that should be used. For example, "A" means "Gargoyle Mobiloil A." "Arc." means "Gargoyle Mobiloil Arctic," etc. For all motorcycle transmissions use Gargoyle Mobiloil "C." The recommendations cover all models of the same make, unless otherwise noted.

CYGNET REAR CAR

In every industry, in every branch of sport and business, the Cygnet Rear Car has demonstrated its usefulness and practicality. It has remained for the National Guard of New York to bring to the fore the wonderful effectiveness of the Cygnet in warfare. The easily-seen practical value of the rear car for rear-guard action, for defensive work, for accurate rapid-fire while on the "go" — these features are plainly shown in the photograph reproduced here.

The main outstanding feature of the CYGNET Rear Car is ADAPTABILITY. For pleasure, for business, for the grim work of war, for every conceivable use where an economical, commodious, easily handled vehicle is needed, the CYGNET has made good.

Gasoline Economy

How it is affected by correct or incorrect body in lubricating oil.

HAVE you noticed this:
Excessive consumption of lubricating oil is usually accompanied by excessive gasoline consumption.

The rough diagrams herewith indicate how this waste occurs.

In each cylinder the space between the piston itself and the cylinder walls is usually termed the piston clearance.

Each piston is fitted with a number of rings which are free to expand and contract and are designed to fill this clearance.

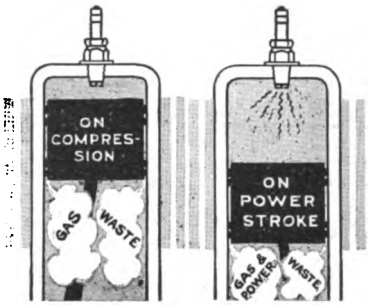
If the *body* of your lubricating oil fails to seal the piston rings two things happen:

First: The oil rapidly works *up* past the piston rings into the combustion chamber. There it is burned with each explosion. Oil is used up rapidly. Excess carbon deposit results.

Second: With a poor piston ring seal, the gas mixture works *down* past the piston rings on each compression stroke. Gas goes to waste.

On the power stroke the exploding fuel charge also works down past the piston rings. Gasoline again wastes. Power is lost. *Gas consumption mounts up.*

Gasoline economy and full power both demand oil which correctly seals the piston rings in your motor.



The design of the pistons, the piston clearance and the number, construction and fit of the piston rings as well as the type of lubricating system employed vary in different motorcycles.

Different motorcycles, therefore, demand oils of different body.

In the Lubrication Chart below which represents our professional advice, you will find specified the correct grade of Gargoyle Mobiloils for your motorcycle—the oil which assures a proper piston ring seal.

In use you will find that this oil will maintain full compression and prevent the escape of the expanding gases on the power stroke, thus assuring—

Gasoline Economy
Power Economy
Oil Economy—and
Preventing the formation of carbon deposits.

The complete Chart is shown here.

THE SMOOTH POWER ROAD

Another vast horde of riders will take the smooth power road in 1917, for among other leading makes *all 1917 Harley-Davidson motorcycles* will be equipped with SKF Self-Aligning Ball Bearings—as have been those of 1916 and previous years.

So when you see a Harley-Davidson go by and hear the deep bass hum of the motor, the "tick-tick" of the cams and note how smoothly, how silently the engine shaft rotates, you will know that friction has been clipped to a fraction because of SKF equipment.

This holds true also with the Pope, the Reading Standard, the Cleveland, and the Miami, all of which machines have added sales and service properties because of SKF equipment.

Write for ball-bearing data.

Oil Tests *Their Relation to Correct Lubrication*

Several years ago a prominent engineer invented a machine to determine the comparative efficiency of lubricating oils. But one day it was found that crude kerosene oil, by this machine's test, was the best lubricant.

That, of course, was ridiculous on the face of it.

This will indicate the difficulties which science has always met in trying to judge on oil's efficiency by anything but the practical tests of *use*.

Nevertheless, *during manufacture*, certain scientific tests are essential.

Gargoyle lubricants, whether intended for steam engine use, gas engine use, or use on other friction surfaces, are all put through many such scientific tests.

For example: Each batch of Gargoyle Mobiloils which goes on the market is put through at least 35 separate and distinct tests.

These tests are *not* aimed to get at the *efficiency* of the oil. The oil's efficiency had to be arrived at by long experiment in practical use.

The scientific laboratory tests simply make sure that the oil is running uniform—that every lot manufactured is up to the proven standard.

A great difference in efficiency may exist between oils which *look* alike and *test* alike. To cope with this puzzling condition, the Vacuum Oil Company has for years maintained thoroughly equipped laboratories and engineering departments in many parts of the world.

In recommending a Gargoyle lubricant for a given purpose, we first analyze the operating conditions to be met, then specify the lubricant which is known, from practical experience, to meet the conditions most efficiently.

With Gargoyle Mobiloils this situation is met by a lubrication Chart which is shown on this page. The oils specified for the various motorcycles in this Chart are determined annually by a careful engineering analysis of each model and make of motorcycle.

The recommendations are based on 50 years of practical experience in lubrication. The formulae and methods used in manufacturing these oils are based on almost numberless practical tests. You may safely feel that the oil specified for your motorcycle in this Ch. will insure

Greater Power; Less Friction; Less Carbon; Lower Consumption of Lubricating Oil; Lower Consumption of Gasoline; Minimum Repairs; Longer Life of Your Motorcycle.

VACUUM OIL COMPANY — Rochester, N. Y., U. S. A.

Specialists in the manufacture of high-grade lubricants for every class of machinery. Obtainable everywhere in the world.

Domestic Branches: Detroit Boston Kansas City, Kan. New York Chicago Philadelphia Indianapolis Minneapolis Pittsburgh

Explanation: In the chart below, the letter opposite the motorcycle indicates the grade of Gargoyle Mobiloils that should be used. For example, "A" means "Gargoyle Mobiloil A." "Arc." means "Gargoyle Mobiloil Arctic." etc. For all motorcycle transmissions use Gargoyle Mobiloil "C." The recommendations cover all models of the same make, unless otherwise noted.

MOTOR CYCLE ILLUSTRATED

Ten Cents a Copy — NEW YORK — October 19, 1916

9 things the motorcyclist should remember

1. One of your smallest expenses — lubrication — is your chief safeguard against your heaviest expense — depreciation.

2. Friction is relentless.

The effects of the incorrect oil will not be apparent during the first piston stroke or the second. But when piston strokes run up into the millions—and that does not take long—friction begins to get its due. You need not *look* for the effect of wear then. You can *hear* it.

3. Worn motors never "come back."

4. If given intelligent care and scientific lubrication, your motorcycle should run better the 2000th mile than the first.

5. No matter how freely a low quality or wrong-bodied oil is used it can never do the work of the correct lubricant.

6. No one oil will suit all motorcycles. This is absolute.

7. You selected a motorcycle that suits you. Now select an oil that suits your motorcycle.

8. Though you may *want* correct lubrication, you will seldom stumble on it by chance.

9. The Lubrication Chart, printed below, was prepared only after an engineering analysis of every American motorcycle. It is revised yearly to include each season's new models. It represents our professional advice and specifies the correct oil for your motorcycle.

VACUUM OIL COMPANY, Rochester, N. Y., U. S. A.

Specialists in the manufacture of high-grade lubricants for every class of machinery. Obtainable everywhere in the world.

Domestic Branches: Detroit Boston New York Chicago Philadelphia Indianapolis Minneapolis Pittsburgh Kansas City, Kan.

Explanation: In the chart below, the letter opposite the motorcycle indicates the grade of Gargoyle Mobiloils that should be used. For example, "A" means "Gargoyle Mobiloil A." "Arc." means "Gargoyle Mobiloil Arctic," etc. For all motorcycle transmissions use Gargoyle Mobiloil "O." The recommendations cover all models of the same make, unless otherwise noted.

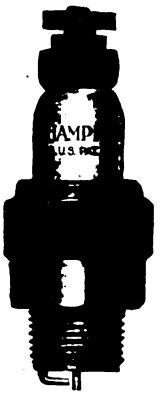
THE DAYTON MOTOR BICYCLE

There's Nothing Else Like It On The Market

Dayton Motor Bicycles are in a class by themselves. They are the lowest priced motor vehicles in the world. Simple and easy to handle—light in weight and so economical that their upkeep expense is hardly noticeable. You don't have to worry about time, distance or mechanical troubles, for the motor in the Dayton is so simple that it is practically trouble proof.



Champion Heavy Duty Metric Price $1.

Champion
"TOLEDO MADE FOR THE WHOLE WORLDS TRADE"

No small part of the Dayton motors' dependability is due to the spark plugs with which they are equipped. Champion Spark Plugs were selected because they proved themselves the best in a series of tests made by the Dayton engineers—tests which covered practically all makes of spark plugs. When men who are experts in their line, select Champions in preference to all others it is a pretty good hunch for you to follow.

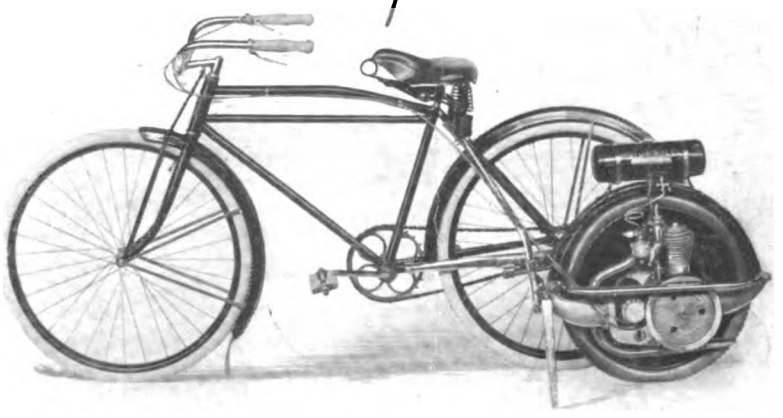
We Can Double the Business!

was the frank opinion of hundreds of leading dealers who put their stamp of approval on the new model Smith Motor Wheel at the Chicago Show.

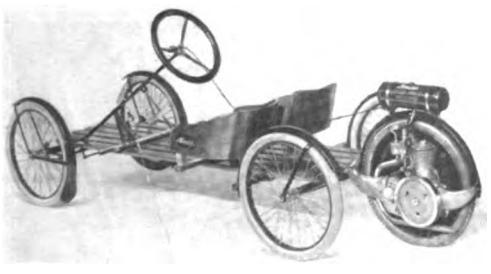
And they backed it up by contracting for 18% more Motor Wheels than have been sold this entire season!



Smith Motor Wheel
DETACHABLE

"The simplest and safest control ever designed," exclaimed a leading Illinois dealer, when he saw the new control. "I can sell practically every one of my prospects before Spring, when I show them these improvements," chimed in an Ohio booster. A large California dealer in ordering a quantity said, "The only thing worrying me is, can you ship immediately?"

The Smith Flyer's first appearance at any Show was another Smith triumph! Chicago Show dealers were unanimous in their praise for this practical, economical, four-wheeler. "Just what we want to interest our big holiday trade," beamed a Texas dealer.



Ask for our proposition to you on the improved Smith Motor Wheel and new Smith Flyer at the New York Show. We'll be glad to see you at our exhibit, spaces 76 and 77.

Champion

"TOLEDO MADE FOR THE WHOLE WORLD'S TRADE"

Dependable Spark Plugs

The Manufacturer's Choice

At the National Motorcycle Show held in the Coliseum at Chicago, November 13 to 18, the following well known makes of motorcycles all carried Champion Spark Plugs as standard equipment:

Thor
Cleveland
Dayton
Harley-Davidson
Flying Merkel
Smith Motor Wheel
Schickel

The names listed above represent the best types of motorcycles on the market. When the manufacturers of each and every one of these machines adopt the same make of spark plug for their product, there must be some special reason for it.

And there is—Champion Spark Plugs are known the world over for their dependability. Engineers who have tested them out invariably select Champions in preference to all others.

You will find the same predominance of Champion Spark Plugs as standard equipment on motorcycles exhibited at the New York Show, Madison Square Garden, December 4 to 9.

That feeling of security that comes of KNOWING, not HOPING that the essential parts of the mount are built to best the worst of bumps is fostered by the use of STANDARD pedals, DIAMOND E spokes and nipples and STANDARD toe clips.

To do full justice to your product and make dealer and rider alike know that it is a quality product, you must specify STANDARD pedals—in a variety of types—DIAMOND E spokes and nipples, and STANDARD toe clips.

We specialize on pedals, toe clips, spokes and nipples for cycles and other vehicles. That's why STANDARD products are QUALITY products.

Our interesting booklet is yours for the asking.

Rollfast

TRADE MARK

-made to last

A Happy and Prosperous New Year to All

1916

The few remaining minutes of 1916 are as precious stones to us. We sit up nights watching them tick off, we love them so. For 1916 has seen the Rollfast Line of Tires rise to heights of popularity in swift and certain bounds.

Of course there never was a doubt in our minds that Rollfasts would make such remarkable forward strides in such a short space of time, but it is particularly gratifying to know that the promises we made that Rollfasts would live up to their name in selling and in gaining popularity in 1916, have come true.

We take this opportunity of thanking you for your valued patronage and wishing you a Happy and Prosperous New Year, assuring you that if quality and service can make that wish come true Rollfasts will "stand by and deliver the goods."

Youngstown, O., Stambaugh Thompson Co.

1917

Promises to be an even greater year than 1916 in the number of sales and satisfied customers that Rollfast Tires will bring to you and keep for you.

Of course, the number of Rollfast dealers is steadily increasing, but that does not mean a diminishing of the number of Rollfast Tires you can sell. Why? Because no dealer can cut in on your territory—you get exclusive selling rights with the Rollfast agency. It rather means an increase in the number of sales, for the more dealers there are the more Rollfasts there will be on the road—and the more Rollfasts on the road the more good advertising there is for the tire.

If you want to join our happy family next year better get busy right now and write the nearest distributor.

D. P. Harris Hardware & Mfg. Company

Digitized by Google

With the dawn of Another Year

comes a new chapter in motorcycle history.

This chapter will tell of a re-vitalized, an immeasurably strengthened industry, stripped clean of all crudities of construction, replete with refinements of detail around a core of real, solid, time-tested efficiency—an industry made up solely of those who have faithfully upheld ideals that the years have proven to be the *only* true ideals upon which to build for permanence.

The new year upon whose threshold we now stand will witness an unbelievable widening of the motorcycle sphere. This *must* be so, for with a plethora of prosperity on every hand, with the trade more closely knit together by the bonds of a common aim, than ever before; with a standard of merchandising efficiency lifted to a high plane, and, finally, with a greater structural perfection of the motorcycle itself—such a combination of forces can mean but one thing—a truly BIG year for the motorcycle.

To wish the trade a Prosperous New Year is as unnecessary as "carrying coals to Newcastle." But the industry can be certain that we shall do our share—and a big share it will be—in standing four-square for all that tends to advance and strengthen the cause and as fearlessly condemning all that threatens to retard and weaken it.

Finally, in extending to all the season's heartiest best wishes, we as sincerely congratulate everyone allied with the motorcycle industry on being associated with a business whose brilliant success of 1917 is clearly written for all to see.
